DUNSE, *dunce*, a town and parish of Berwickshire, in Scotland, 13 miles from Berwick-on-Tweed. It is well built, and has an elegant town-house, a parish church, several chapels for dissenters, subscription libraries, and a reading-room. *Pop.* of town, 2,600.—This is the birthplace of Duns Scotus; M'Crie, the historian of Knox; Boston, author of the "Four-fold State;" and Sir Joseph Paxton, architect of the Crystal Palace. A station on a branch of the North British Railway.

DUNSTABLE, *dun'-stă-bel*, a town and parish of Bedfordshire, situate at the base of the Chiltern Hills, 18 miles from Bedford. The plaiting of straw is carried on to a great extent, and it may be regarded as the principal seat of that manufacture in Britain. *Pop.* nearly 4,000.

DUNSTAN, ST., *dun'-stan*, archbishop of Canterbury in the reign of Athelstan, who gave him lands at Glastonbury, where he founded a monastery. King Edgar made him bishop of Worcester, and, in 959, archbishop of Canterbury. The pope confirmed the appointment, and appointed him his legate. Dunstan extended the papal power in a most arbitrary manner, though opposed by the English clergy; for which he deprived many of their benefices, and placed monks in their room. On the death of Edgar, in 975, he placed on the throne his son Edward, who being a minor, Dunstan assumed the regency. Under Ethelred, however, he lost his influence, and died of grief, 988. B. at Glastonbury, 925.

DUNTON, John, *dun'-ton*, a noted bookseller, who published the "Athenian Mercury," which was reprinted in 4 vols. 8vo, under the title of the "Athenian Oracle." In 1710 appeared the "Projects of Mr. John Dunton." He also wrote a book called "Dunton's Life and Errors," which abounds in literary history of a curious kind. B. in Huntingdonshire, 1659; D. 1733.

DUNTON, the name of several parishes in England, none of them with a population above 600.

DUNWICH, *dun'-idj*, a village of Suffolk, 2 miles from Southwold, on the North Sea. This was formerly an important place; but successive inroads of the sea have so reduced it, that it has now a population of only about 250.

DU PAGE, *du paij*, a county of Illinois, U.S., intersected by the Chicago and Galena Railway. *Area*, 342 square miles. *Pop.* 10,000.

DUPERLEY, Louis Isidore, *doo'-pair-le*, a French hydrographer, who in 1817 made a voyage in the North Pacific Ocean, and mapped the Ladrone Islands and several others; but, whilst engaged in his duties, suffered shipwreck among the Sandwich Islands, in 1820. After remaining ten weeks on an island, he and the crew were taken by an American ship to Monte Video, whence he returned to France in the same year. He was subsequently engaged in making surveys in the South Pacific, and afterwards published the results

of his expeditions, which are regarded as valuable contributions to the physical sciences of the South Seas. B. at Paris, 1786.

DUPIN, Lewis Ellis, *doo'-pă*, a French writer, who, about 1684, commenced his valuable work entitled "Bibliothèque Universelle des Auteurs Ecclésiastiques," &c., or "History of Ecclesiastical Writers," which, notwithstanding its general excellence, was much censured by zealous Romanists for some freedoms of sentiment, which the author was compelled to retract. He afterwards became involved in a profitless dispute with Dr. Wake, archbishop of Canterbury, on a projected union between the English and Gallican churches. B. at Paris, 1657; D. there 1719.—Besides the above work, he wrote several others on the Scriptures, church government, and practical divinity.

DUPIN, André Marie Jean Jacques, an eminent French lawyer, who, in 1815, became a member of the Chamber of Representatives, and opposed the proposal to proclaim the son of Napoleon I., emperor, under the title of Napoleon II. In the same year he was united with Berryer in the defence of Marshal Ney. Subsequently, he defended several others, among whom may be named Béranger, in 1821, from the vengeance of arbitrary power. In 1826 he became a member of the Chamber of Deputies, and assisted by his influence and opposition to produce the revolution of 1830. In the same year he was made procureur-général of the Court of Cassation, and, in 1832, became president of the Chamber of Deputies, to which office he was re-elected seven times. After the forced abdication of Louis Philippe, in 1848, he proposed the young count of Paris to be king of the French, but failed in this attempt to stem the republican tide. He then endeavoured to form a new government, and, in the following year, became president of the Legislative Assembly. During this stormy period of political vicissitude, his conduct was marked by great firmness and courage. In 1852, when the decrees confiscating the property of the House of Orleans were published, he resigned his procureur-generalship. In 1857, however, he again accepted the office of procureur-général, and in his address, written at the time, he says, "I have always belonged to France, and never to a party." He has written several valuable works on law. B. at Varzy, in the department Nièvre, 1783.

DUPIN, Charles, Baron, brother of the above, entered the French navy in 1803, as an engineer, and, after performing some services in the Mediterranean, became professor of mechanics and the physical sciences in the Ionian Academy, which he assisted in forming, at Corfu. In 1813 he returned to Paris, and, in 1813, instituted the maritime museum at Toulon. After the peace of 1815, he visited Great Britain, for the purpose of examining her public engineering-works, and afterwards published the results of his examinations. In 1828 he was elected to the Chamber of Deputies, as representative for the department of Tarn, and, after the revolution of 1830, represented Seine. When the change of 1848 was effected, he became a representative in the Constituent Assembly, and also in the Legislative Assembly. After the revolution of 1851, he became a senator. In 1851 he was president of the French jury at the Great Exhibition in London. He has written a great number of important works connected with the science of engineering. B. at Varzy, 1784.

DUPINO, Charles François, *doo-pe'-no*, a modern French philosopher, who, during the revolutionary era, distinguished himself as a politician, and rose to the presidency of the Legislative Assembly. Previous to this, however, he had filled the chair of rhetoric in the college of Lisieux, and had deeply devoted himself to astronomical studies. He was the inventor of a telegraph, by which he corresponded with a friend at some distance, until dread of the political factions then rampant, compelled him to lay it aside. By this time he had published several scientific works, when, in 1794, appeared his "Origine de tous les Cultes; ou, la Religion Universelle," a great work, which ultimately led to the "commission," undertaken to explore the ruins of Upper Egypt, in the time of Napoleon I. This production was succeeded by other volumes, relating to astronomy and mythology. B. at Frye-Château, near Chaumont, 1742; D. at Is-sur-Lille, 1809.

DUPLEIX, Scipio, *doo-plaï*, historiographer of France, wrote a work on the liberties of the Gallican church, which he presented to the chancellor Seguier to be licensed; but that magistrate threw it into the fire. This so preyed upon his mind, that he died in 1661. B. at Condom, 1566.—Besides the above, he produced,—1. "Memoirs of the Gauls;" 2. "History of France," 6 vols. folio; 3. "Roman History," 3 vols. folio; 4. "A Course of Philosophy," &c.

DUPLEIX, Joseph, a celebrated French merchant, who, in 1730, was sent as director of the colony of Chandernagore, where he carried on an extensive commerce through all parts of the Indies. In 1742 he was made governor of Pondicherry, which, in 1748, he defended against two English admirals. For this he was created a marquis by the French king, and a nabob by the Mogul. He was recalled, however, in 1753, and died soon after.

DUPLIN, *dup'-lin*, a county of North Carolina, U.S. *Area*, 576 square miles. *Pop.* 14,000.

DUPPA, Brian, *dup'-pa*, a pious prelate, who, in 1638, was appointed tutor to the prince of Wales, afterwards Charles II., and, about the same time, made bishop of Chichester, whence, in 1641, he was removed to Salisbury. He attended Charles I. in the Isle of Wight, and is supposed to have assisted him in the composition of "Eikon Basilike." At the Restoration he was made bishop of Winchester and lord almoner. B. at Lewisham, Kent, 1589; D. 1662.—He published a few devotional pieces, but his greatest works were those of charity.

DUPRAT, Anthony, *doo-pra'*, a French statesman, who became president of the parliament of Paris in 1507, and chancellor of France in 1515. He was also appointed tutor to the count of Angoulême, afterwards Francis I., and was the author of the famous "Concordat," which rendered him so acceptable to the court of Rome, that he obtained several ecclesiastical preferments and a cardinalship. D. 1535.

DUPRÉ DE ST. MAUR, Nicholas Francis, *doo'-prai*, a French writer, who was a member of the Academy of Paris, and translated into French, Milton's "Paradise Lost." He also wrote an essay on the coins of France, "Inquiries concerning the Value of Moneys," &c. B. at Paris, 1775.

DUPUYTREN, Guillaume, le Baron, *doo-pwe'-tren*, a distinguished French modern surgeon and anatomist, who invented several surgical instruments, and greatly extended the limits of his profession by the scientific character which he gave to his clinical instructions. He wrote very little, and, on the evening before he expired, desired that a medical paper might be read to him, "that he might carry," said he, "the latest news of disease out of the world." B. at Pierre-Buffière, in the department Haute-Vienne, 1777; D. in Paris, 1835.—Whilst pursuing his studies, Dupuytren was so poor that he could hardly obtain the means of keeping life in his body; yet he bequeathed a fortune of £280,000 to an only daughter, and £8,000 for the endowment of a pathological anatomical chair in Paris.

DUQUESNE, Abraham, Marquis, *doo-kain'*, a celebrated French seaman, first went to sea under his father, who was in the service. He distinguished himself at so early an age, that at 17 he had the command of a vessel, in which he fought several successful actions with the Spaniards. In the troubles which occurred in France during the minority of Louis XIV., he was in the service of Sweden, and defeated the Danish fleet commanded by King Christian IV. Recalled to France in 1647, he got together a squadron at his own expense, and was engaged several times both with the English and Spanish. In the French war of 1672 with Holland, Louis XIV. sent him against De Ruyter, and Duquesne defeated him in a terrible engagement near Messina, in 1676. He afterwards gained great successes against the pirates in the Mediterranean, and humbled the dey of Algiers. B. 1610; D. 1688.—Being a Protestant, Louis XIV. did not raise him to those high positions which his services entitled him to; and thus he never became an admiral. (*See* RUYTER, DE.)

DURAN, Don Augustin, *door'-an*, a modern Spanish critical and miscellaneous writer, who has made some excellent collections of the romances of his native

country, and acquired considerable fame by some of his own poetical imitations of old ballads. B. at Madrid about 1793.

DURANCE, *doo'-rans*, a river of France, rising near Mont Genèvre, in the Upper Alps, and, after a course of 170 miles, joining the Rhone between Avignon and Tarascon.

DURAND, Jean Nicholas Louis, *doo'-rant*, an eminent French architect, who, in 1780, obtained the great prize for an architectural design from the Royal Academy of Architecture in Paris. He afterwards became professor of architecture in the Polytechnic School, and produced several works illustrative of his art. These are not considered very valuable, although they have been greatly commended. B. at Paris, 1760; D. at Thiais, in the vicinity of Paris, 1834.

DURANGO, *doo-ran'-go*, chief town of a department of the same name, in the Mexican Confederation, built at an elevation of nearly 7,000 feet, 150 miles from Zacatecas. It is the residence of the intendant and of a bishop. Its principal edifices are a cathedral, theatre, a mint, and several convents. *Pop.* 22,000.—The DEPARTMENT has an estimated area of 54,500 square miles, with a population of 150,000.

DURANGO, a town of Spain, in the province of Biscay, 13 miles from Bilboa. *Pop.* 2,300.

DURANTE, John Stephen, *doo-rant'*, first president of the parliament of Toulouse, in 1581, and murdered by the Leaguers in 1589. He wrote "De Ritibus Ecclesiæ," printed at Rome in 1591.

DURAZZO, *doo-rats'-o*, a fortified seaport-town of European Turkey, on the coast of Albania, 88 miles from Ragusa. *Pop.* about 10,000, with a considerable import and export trade.—This is the ancient Epidaurus, the expulsion of whose aristocracy, 436 B.C., was the origin of the Peloponnesian war.

DUREN, *doo'-ren*, a town of Prussia, on the Roer, 15 miles from Aix-la-Chapelle. It is the seat of several courts and public offices, and has both Protestant and Catholic churches, a gymnasium, and three nunneries. *Manf.* Woollens, paper, leather, iron and steel wares. *Pop.* 8,500.—This was a Roman town, and is mentioned by Tacitus by the name of Marcodurum. Charlemagne here defeated the Saxons. In 1594 it was taken by the French, and, in 1815, given to Prussia.

DURER, Albert, *doo'-rer*, the first engraver on wood,

ALBERT DURER.

and an eminent artist, the son of a goldsmith in Nuremberg. He engraved more than he painted; so that his pictures are scarce, and highly valued. The people of Nuremberg show with pride his portraits of Charlemagne and other emperors; but it is as an engraver that he is most celebrated. He is said to be the first who engraved upon wood; yet, as a painter, he was so highly esteemed, that the emperors Maximilian I. and Charles V. appointed him their artist, and conferred upon him rank and riches. His best historical paintings are in the collections of Dresden, Vienna, Munich, and Prague. He was also the first who printed woodcuts in two colours. B. at Nuremberg, 1471; D. there, 1528.—Durer wrote a book on the rules of painting, and some other works; and since the revival of German art, he is looked upon as its great exemplar.

D'URFEY, Thomas, *dur'-fe*, a facetious English poet, who wrote a number of plays and songs, which are very licentious. Charles II. was wont to lean upon his shoulders, and hum the tunes of some of his songs. His effusions however, on account of their looseness, are now justly forgotten. He resided frequently with the earl of Dorset at Knowle, where is a portrait of him, painted when he was asleep, after dinner; for he had such an ordinary visage, that he could not bear to have his likeness taken. His ballads, &c. were printed in 6 vols. 12mo, under the title of "Pills to purge Melancholy." B. at Exeter, 1628; D. in London, 1723.

DURHAM, *dur'-ham*, a maritime county of England, bounded N. by Northumberland, E. by the German Ocean, S. by Yorkshire, from which it is separated by the river Tees, and W. by the counties of Cumberland and Westmoreland. *Area*, inclusive of Holy Island and its islets, 1,097 square miles. *Desc.* Mountainous and heathy in the W., where, however, considerable progress has been made in agriculture. The fairest portions of the county are found in the valleys, watered by numerous streams. *Rivers.* Derwent, Skorne, Wear, Tees, and Tyne. *Pro.* Mustard and the usual crops. Sheep are largely reared, and it is famous for its breed of short-horned cattle. *Minerals.* Lead, iron, and grinding-stones; but the most important is coal, which occupies a large subterraneous area. Marble is also found. *Manf.* Cordage, glass, pottery-ware, and shipbuilding. There are, besides, iron-foundries and forges. *Pop.* 391,000.—Durham is traversed by numerous branch railways, and is connected with most of the principal towns of England and Scotland by railway.

DURHAM, an ancient city, and capital of the above county, on the Wear, by which it is almost surrounded, 15 miles from Newcastle-upon-Tyne. The river is crossed here by several bridges, and an ancient cathedral overhangs its banks, which are laid out in gardens, and beautifully wooded. This venerable structure was commenced in the year 1093, a century after the foundation of the city; and its central tower, which is 214 feet high, was erected between 1233 and 1258. It contains several ancient monuments. Besides the cathedral, Durham contains six parish churches, and other places of worship, a county infirmary, a gaol, almshouses, public libraries, assembly-rooms, a mechanics' institute, and several charitable houses. To the N. of the cathedral is a castle, founded by William the Conqueror, containing apartments for the bishop, although it is mostly appropriated by an ecclesiastical university, incorporated in 1837. *Manf.* Woollens, hats, iron and brass goods. *Pop.* 13,200. *Lat.* 54° 56′ N. *Lon.* 1° 35′ W.

DURHAM, the name of several towns in the United States, none of them with a population above 3,000.

DURHAM, John George Lambton, Earl of, was educated at Eton, and, in 1813, became member of parliament for the county of Durham. In 1828 he was raised to the peerage, by the title of Baron Durham, of the city of Durham, and, in 1830, became prominently connected with the reform agitation. In the same year he was made lord privy seal, under the administration of Earl Grey. In framing the Reform Bill at that time, he proposed the introduction of the ballot; but this was rejected. In 1833 he resigned his office in the government, and was created earl of Durham. In the same year he was sent on a special mission to Russia, and, on his return, differed from his colleagues, but was, in 1835, again sent to Russia, where he remained for two years, and became an especial favourite with the emperor of that country. In 1839 he was sent as governor-general, with extraordinary powers, to Canada; but conceiving himself

not supported in his measures by the home government, he returned, without being recalled, in the next year. For this step he was rebuked, and not permitted to land under the usual salute. This may be regarded as the close of his public life. B. at Lambton Castle, Durham, 1792; D. at Cowes, Isle of Wight, 1840.

DUROC, Michael, *doo'-rok*, entered the French army in 1792, and accompanied Napoleon I. to Egypt, where he greatly distinguished himself, and was severely wounded by the bursting of a howitzer. When the imperial court was formed, in 1805, he was made grand-marshal of the palace, and was subsequently engaged in several diplomatic missions, although he still continued to play his part in the wars of France. He was made duke of Friuli, and fell in the battle of Bautzen, 1813. B. 1772.—This was an attached and faithful friend of the emperor, who wept over him on his deathbed.

DURRENSTEIN, *door'-ren-stine*, a town of Austria, on the Danube, 40 miles from Vienna. *Pop.* 500.—In the neighbourhood, on a rock, are the ruins of the castle in which Richard Cœur-de-Lion was imprisoned, in 1192. In 1805 the Russian and Austrian armies were here defeated by the French. (*See* BLONDEL.)

DURR-SEE, *door'-se*, a lake of Switzerland, 38 miles from Bern, at an elevation of 4,000 feet above the level of the sea.

DURSLEY, *durs'-le*, a town and parish of Gloucestershire, 15 miles from Gloucester. *Manf.* Principally woollens. *Pop.* about 3,000.

DURWAZ, *door-waz'*, a territory of Independent Turkestan, inhabited by Tajiks, of the Sunnite sect of Mahometans. It grows cotton, and manufactures it for export. *Pop.* Unascertained. *Lat.* 37° N. *Lon.* 71° E.

DUSSELDORF, *doos'-sel-dorf*, a handsome town of Prussia, on the Rhine, where that river is joined by the Dussel, 21 miles from Cologne. The streets are wide and regular, and the squares fine. The castle, though greatly damaged by bombardment in 1794, was afterwards repaired; and contains the gallery of paintings, most of which were, in 1805, transferred to Munich. It has several elegant churches, extensive barracks, a town-hall, mint, an academy of sciences, school of painting, a museum, an observatory, and pleasant public walks. *Manf.* Woollen cloth, paper-hangings, glass, leather, chemicals, starch, and vinegar. *Pop.* about 28,000.—Dusseldorf was made over to Prussia in 1815, and is now the capital of a GOVERNMENT with an area of 2,058 square miles, and a population of 920,000. *Pro.* Wheat, barley, rye, oats, potatoes, flax, and tobacco. *Minerals.* Iron and potters' clay.

DUSTEE, *doos-te'*, a river of Beloochistan, rising in the province of Mecbran, and, after a course of 1,000 miles, in which it is, in some parts, extremely shallow, falls into the Arabian Sea, in *lat.* 25° 3′ N.; *lon.* 61° 50′ E.

DUTTEEAH, *doot-te-a'*, a rajahship of Hindostan, in Bundelcund. *Area*, 850 square miles. *Pop.* 120,000. —The capital town of this territory is of the same name, and has a population of about 50,000.

DUTTON, *dut'-ton*, two townships, one in Cheshire, and the other in Lancashire. Neither has a population above 500.—In the former is the Grand Junction Railway viaduct, with 20 arches, 70 feet high and 60 feet in span.

DUUMVIRI, *du-um'-vi-ri*, two noble patricians at Rome, first appointed by Tarquin to keep the Sibylline books, which were supposed to contain the fate of the Roman empire. These priests continued in their original institution till the year 451 B.C., when a law was proposed by the tribunes, to increase the number to ten, to be chosen promiscuously from patrician and plebeian families. From this number they were called *Decemviri*, and, some time after, Sylla increased them to fifteen, known by the name of *Quindecemviri*.—There were also certain civil magistrates among the Romans that bore this name. (*See* DECEMVIRI.)

DUVAL, Nicholas, *doo-val'*, a Dutch painter, who studied in Italy under Pietro da Cortona, whose manner he adopted. King William III. appointed him director of the academy at the Hague. B. 1644; D. 1732.

DUVAL, Valentine Jamerai, an extraordinary person, who, after serving as a shepherd, became, in his 18th year, keeper of the cattle belonging to the hermits of St. Anne, near Luneville. Under these brothers he ardently devoted himself to study, and by an accident, got introduced to the duke of Lorraine, who placed him in the college of Pont à Mousson. The duke afterwards made him his librarian, and professor of history in the academy of Luneville. In 1738 he followed the grand-duke Francis to Florence, and on the marriage of that prince with the heiress of the house of Austria, he accompanied him to Vienna, where the emperor appointed him keeper of his cabinet of medals. B. 1695; D. 1775.

DWARACA, *dwar-a-ka'*, a town and celebrated temple of Hindostan, in the province of Guzerat. *Lat.* 22° 21′ N. *Lon.* 69° 15′ E.

DWIGHT, Timothy, *dwite*, an American divine of high reputation, both as a pulpit orator and lucid expounder of the Scriptures. In 1795 he became president of Yule College, Newhaven, where he also held the professorship of theology. He wrote several religious works, but the one upon which his fame rests, is entitled "Theology explained and defended, in a Series of Sermons." This is an extensive work, and consists of a course of lectures delivered by him, as professor of divinity, on the Sundays in term-time. These extended over four years, and although exhibiting no great depth or originality of thought, are still, as a whole, a pleasing collection of divinity. B. at Northampton, Massachusetts, 1752; D. 1817.

DWINA, or DVINA, *dwi'-na* (Russ. *dve'-na*), a large river of Russia, rising in the government of Tver, and, after a direct course of about 400 miles, falling into the Gulf of Riga, a few miles below Riga. It is connected by canals with the Beresina and the Niemen.—Another river of Russia, which, after a course of 330 miles, enters the White Sea, a little below Archangel.

DYCE, William, R.A., *dice*, a distinguished Scottish painter, who was taught the rudiments of his art in the Scottish Academy. In 1844 he exhibited at the Royal Academy "King Joash shooting the Arrow of Deliverance," which raised him to the rank of an associate of that institution. He afterwards exhibited specimens of his skill in fresco-painting, and soon afterwards received a commission from Prince Albert to paint, in that style, one of the compartments of his summer-house in Buckingham Palace. He was subsequently similarly employed at Osborne. He was also among the first artists engaged upon the new palace of Westminster, and his "Baptism of Ethelbert," in the House of Lords, is considered one of the best paintings in the chamber. After this he was appointed to paint the queen's robing-room. In 1848 he was elected R.A.; since which time he has produced "Omnia Vanitas," the "Meeting of Jacob and Rachel," "King Lear and the Fool in the Storm," "Christabel," the "Good Shepherd," and several other works of more or less merit. B. in Scotland, about 1800.

DYCE, Rev. Alexander, was educated for the church, and officiated, for some years, in both Cornwall and Suffolk; but, going to reside in London, in 1827, he entered upon a literary career, and soon rose to distinction. He edited editions of the poems of Collins and Skelton, "Specimens of British Poetesses," and several of the elder dramatists. He also appeared as a commentator on Shakspeare, and edited works for both the Camden and Shakspeare societies. In 1856 he edited a volume of "Recollections of the Table Talk of Samuel Rogers." B. at Edinburgh, 1797.

DYER, John, *di'-er*, an English poet, who was educated for the bar; but, quitting the legal profession for painting, he went to Italy, where he wrote a poem, entitled "The Ruins of Rome," which he published in 1740. He had before favoured the public with a descriptive piece, called "Grongar Hill," which, according to Dr. Johnson, is "the happiest of his productions." Not long after his return, he entered into orders, and obtained the living of Calthorp, in Leicestershire, which he exchanged for Belchford, in Lincolnshire. He also had the rectory of Coningsby, in the same county, to which was added that of Kirby. In 1757 appeared the "Fleece," a poem which possesses considerable merit, notwithstanding that it treats only of

"The care of sheep, the labours of the loom."

B. in Carmarthenshire, 1700; D. 1758.

DYLE, *dile*, a river of Belgium, which, after a course of 50 miles, joins the Nethe, 4 miles below Mechlin.—During the reign of Napoleon I., it gave its name to the department Dyle, of which Brussels was the capital.

DYMEL, *di'-mel*, a river of Westphalia, which falls into the Weser.

DYMOND, Jonathan, *di'-mond*, a linen-draper, and a member of the Society of Friends, published, in 1823, an "Inquiry into the Accordance of War with the Principles of Christianity." This work was well received; but his fame rests more particularly upon his "Essay on the Principles of Morality, &c.," which first appeared in 1829. This work was reviewed by Southey at great length, in the "London Quarterly Review." It may be regarded as one of the most valuable works on moral government in the language, even by those who may not be inclined to indorse all the views it contains. B. at Exeter, 1796; D. 1828.

DYSART, or DESART, *dis-art'*, a parish and seaport-town of Fifeshire, Scotland. The town is situate on the northern shore of the Firth of Forth, 1 mile from Kirkaldy, and has now fallen into decay. *Manf.* Ticking, checks, and flax-spinning. In the parish about 100,000 tons of flax are raised annually. *Pop.* of parish, about 9,000; of town, about 1,600.

DYSERT, or DYSART, the name of numerous parishes in Ireland, none of them with a population above 3,500.

DZOUNGARIA, *dzoon-gar'-e-a*, a country of Central Asia, bordering on the Russian government of Tomsk and the Khanat Khokaw. *Desc.* Mountainous, and it has many lakes. *Lat.* between 42° and 50° N. *Lon.* between 75° and 90° E.—This region is subdivided into several military districts.

## E.

[Where *e* is used in the explanatory pronunciation, it is sounded as *e* in bed, fed, led; where *ee* is used, it is sounded as *e* in mete, or *ee* in been, or beer.]

EACHARD, John, *e'-chard*, an eminent English divine, who became fellow, and afterwards master, of Catherine Hall, Cambridge. In 1670 he published a piece entitled "The Grounds and Reasons of the Contempt of the Clergy and Religion inquired into." This he attributed to the improper education of young men for the ministry, and to the absurd style of preaching too generally adopted. He blended much humour with his remarks, which occasioned considerable controversy. His best work, however, is his "Dialogues between Philantus and Timothy," which were intended to expose, what he considered, the absurdity of the philosophy of Hobbes. He had great powers of ridicule, but on serious subjects he exhibited not much talent. B. in Suffolk, 1636; D. 1697.—His works were published in 3 vols. 12mo, in 1779.

EADMER, *ede'-mer*, an ancient English historian, who, in 1120, was elected bishop of St. Andrew's, in Scotland, but was never consecrated. He was the friend and biographer of Anselm, archbishop of Canterbury; but his principal work is the "Historia Novorum," or "History of his own Times," which was first printed by Selden in 1623. He also wrote lives of St. Hilfrid, St. Oswald, St. Dunstan, &c., which were inserted by Warton in his "Anglia Sacra." D. 1124.

EAGLE ISLAND, *e'-gel*, lies off the W. coast of Ireland, in *lat.* 54° 7′ N.; *lon.* 10° 6′ W.

EAGLESHAM, *e'-gel-sham*, a parish and village of Renfrewshire, Scotland, 9 miles from Paisley. *Pop.* 2,600, mostly employed in cotton-spinning.—Pollok, author of "The Course of Time," was a native of this parish.

EAGLE'S NEST, THE, a perpendicular rock in the county of Kerry, Ireland, 4 miles from Killarney. *Height*, 1,300 feet.

EALING, *e'-ling*, a village and parish of Middlesex, 10 miles from St. Paul's, London. *Pop.* 10,000.—A station on the Great Western Railway.

EARLOM, Richard, *er'-lom*, an eminent English engraver, who was distinguished for his skill in mezzotint, and produced a great number of imitations of chalk-drawings. He engraved after many of the most celebrated masters, both English and foreign. B. in London, about 1742; D. about 1822.

EARLSTOON, or ERALDOUNE, *erls'-toun*, a village and parish of Berwickshire, Scotland, 7 miles from Lauder. *Pop.* 1,900.—In the locality is the spot celebrated in the beautiful melody of "The Broom of Cowdenknowes." It is the birthplace of the famous Thomas the Rhymer. *Pop.* 1,705.—Also a village in Clackmannanshire.

EARNE, or ERNE, *ern*, a river of Scotland, which falls into the Tay near Abernethey. It rises in a loch of the same name, which has a circumference of 20 miles, and is 24 miles from Perth.

EASINGWOLD, *e'-sing-wold*, a town of the N. Riding of Yorkshire, 13 miles from York. *Pop.* 2,300.

EAST, *eest*, the prefix to the name of numerous places in the United States, with populations ranging between 2,000 and 14,000.

EASTBOURNE, *eest'-born*, a town and parish of Sussex, on the English Channel, 7 miles from Hailsham. The town has been gradually increasing, possesses a theatre and a chalybeate spring, and is a favourite watering-place. *Pop.* 3,500.

EAST CAPE, the most E. point of N. Island, New Zealand. *Lat.* 37° 40′ S. *Lon.* 178° 40′ E.—Also the most E. cape of Madagascar. *Lat.* 15° 2′ S. *Lon.* 50° 4′ E.

EASTERN ARCHIPELAGO. (*See* ASIATIC ARCHIPELAGO.)

EAST GRINSTEAD, *grin'-sted*, a town and parish of Sussex, 6 miles from London. *Pop.* 3,820.

EASTLAKE, Sir Charles Lock, P.R.A., *eest'-laik*, a modern English artist, early became a student under Fuseli, at the Royal Academy of Painting, and afterwards settled at Plymouth as a portrait-painter. In 1817 he visited Italy and Greece, and in 1823 began to exhibit at the Royal Academy, and in 1827 was elected an associate of that institution. In 1828 he exhibited on its walls his "Peasants on a Pilgrimage to Rome, &c.," which is a work of great merit, and has been several times engraved. His next great work was his "Christ weeping over Jerusalem." This placed him at the head of his profession, and was, at the time of its production, esteemed as one of the best paintings in the historical style, that had appeared for a lengthened period of time. It was succeeded by his "Christ Blessing little Children" and his "Hagar and Ishmael;" both, though excellent, are considered as pictures, by no means equal to the other. In 1841 he was made secretary to the Royal Commission of Fine Arts, and, in 1843, was appointed keeper of the National Gallery. In 1850 he was elected president of the Royal Academy, with the honour of knighthood, and in 1855 became a director of the National Gallery, with a salary of £1,000 a year. In the same year he was created a knight of the Legion of Honour, and, two years previously, had the degree of D.C.L. presented to him by the University of Oxford.—Besides his eminence as an artist, Sir Charles has contributed some valuable works to the literature of art. Among these may be named his "Materials for a History of Oil-painting," first published in 1847. B. at Plymouth, 1793.

EAST MAIN, or SLADE RIVER, a river of Labrador, with an estimated course of 400 miles, in which it traverses many lakes, and falls into James Bay, in *lat.* 52° 15′ N.; *lon.* 78° 41′ W.

EASTON, *eest'-on*, the name of numerous parishes in England, with populations ranging between 200 and 1,200.

EASTON, the name of several small townships in the United States.

EASTPORT, *eest'-port*, a township and port of entry of Washington county, Maine, U.S., on Passamaquoddy Bay, 144 miles from Augusta. It has a garrison, and packet communication with Boston, in Massachusetts. *Pop.* 4,200.

EATON, *e'-ton*, the name of numerous parishes in England, with populations ranging between 200 and 3,000.

EATON, a county in the centre of Michigan, U.S. *Area*, 576 square miles. *Pop.* 8,000.—The name of several other small places in the U.S.

EAUX BONNES, *o-bun*, 'good waters,' a town of France, in the department of the Lower Pyrenees,

25 miles from Oléron. Its thermal springs date their celebrity from the battle of Pavia, after which their healing properties were seen in their effects on the wounds of the Béarnais.

**Ebed Mellech**, *e'-bed mel'-lek*, 'servant of the king,' a pious Ethiopian officer to Zedekiah.

**Ebenezer**, *eb'-e-ne'-zer*, 'the stone of help,' the name of a field, so called from the stone set up by Samuel to commemorate the defeat of the Philistines.

**Eber**, *e'-ber*, 'a passenger,' a descendant of Shem.

**Eberbach**, *eb'-er-bak*, a town of Baden, on the Neckar, 18 miles from Heidelberg. *Pop.* 3,700.

**Ebrebach**, a village of Nassau, Germany, 3 miles from Hattenheim, famed for producing one of the best wines in the district.

**Ebersbach, Upper and Lower**, *eb'-ers-bak*, a large village of Saxony, and one of the principal seats of the linen manufacture of Saxony. *Pop.* 6,000.

**Ebersberg**, or **Ebelsberg**, *eb'-ers-bairg*, a town of Upper Austria, on the Traun, 8 miles from Ens, remarkable for being the scene of the defeat of the Austrians by the French, in 1809.

**Eberstorf**, *eb'-ers-dorf*, a town of Lower Austria, on the Danube, 5 miles from Vienna. *Pop.* 1,136.—Another, on the Reuss, 40 miles from Weimar. *Pop.* 1,800.—Here, in 1806, Napoleon I. issued his first proclamation to the Saxons.—The name of several other small places.

**Ebion**, *e'-bi-on*, a Jew, the founder, in the 1st century, of a sect called Ebionites. This sect differed little in its doctrines from the Nazarenes, denying the divinity of Jesus Christ, and the writings of the apostles, with the exception of the gospel of St. Matthew, which they mutilated. To the precepts of the Christian religion they added Mosaic practices. The first Ebionites were strictly moral, but, in process of time, they gave themselves up to great excesses. St. John is said to have written his gospel against the errors of Ebion.

**Ebro**, *ai'-bro*, a river of Spain, which rises in the province of Santander, and, after a course of 350 miles, falls into the Mediterranean below Tortosa, in Catalonia. It is the Iberus of the ancients.

**Ecbatana**, *ek-bat'-a-na*, the capital of Media, built by Deioces, king of Media. It was surrounded with seven walls, which rose in gradual ascent, and were painted in seven different colours. The outermost was the lowest, and the innermost, which was the most celebrated, contained the royal palace. Parmenio was put to death here by Alexander's order, and here also Hephæstion died.—A town of Syria, where Cambyses gave himself a mortal wound when mounting on horseback.

**Ecchlin**, *ech-ai'-leen*, a patrician family of Italy, which, in the 12th and 13th centuries, played a conspicuous part in the wars of the Guelphs and Ghibelines, and sided with the latter faction.

**Eccles**, *ek'-kels*, a parish of Lancashire, 4 miles from Manchester. In it is Chat-Moss. *Pop.* 41,500.—It has a station on the Manchester and Liverpool Railway.—Another in Norfolk, 11 miles from Thetford, with a station on the Eastern Counties Railway. *Pop.* 200.

**Ecclesfield**, *ek'-kels-feeld*, a parish in the W. Riding of Yorkshire, 5 miles from Sheffield. *Pop.* 17,000.

**Eccleshall**, *ek'-kels-hawl*, a town and parish of Staffordshire, 7 miles from Stafford. *Pop.* 4,700.—A station on the Great Junction Railway.

**Eccleshill**, *ek'-kels-hil*, a township of the W. Riding of Yorkshire, 3 miles from Bradford. *Pop.* 3,700.—Another in Lancashire, 3 miles from Blackburn. *Pop.* 600.

**Eccleston**, *ek'-kels-ton*, a township of Lancashire, 4 miles from Chorley. *Pop.* 3,200.—Several other small townships in England.

**Echard**, Lawrence, *e'-chard*, an English divine and historian, was brought up at Christ's College, Cambridge, where he took the degree of M.A. in 1695. On entering into orders, he obtained two livings in Lincolnshire. In 1699 he published a "History of Rome," 3 vols. 8vo, and, in 1702, his "General Ecclesiastical History," 2 vols. 8vo. His principal work, however is the "History of England," 3 vols. folio. He also published a "Gazetteer, or Newsman's Interpreter," which was once a popular book, and the foundation of all of its class. In 1712 he was made archdeacon of Stowe, and, some time after, obtained three livings in Suffolk. B. in Suffolk, about 1670; D. 1730.

**Echellensis**, Abraham, *ek'-el-len'-sis*, a Maronite, and professor of the Oriental languages at Rome. He translated Apollonius's Conics from the Arabic into Latin, and assisted Le Jay in his Polyglot Bible. D. 1654.

**Echelles, Les**, *ai-shel'*, a village of the Sardinian states, 12 miles from Chambóry. Here a road in the mountains was begun by Napoleon I., and finished by the king of Sardinia in 1817. The place takes its name from a flight of stairs (French, *échelles*), formerly the only mode of communication with Chambóry, which this road replaced.

**Echidna**, *e-kid'-na*, a celebrated monster, sprung from the union of Chrysaor, who had issued from the blood of Medusa, with Callirhoe, the daughter of Oceanus. She is represented as a beautiful woman in the upper parts of the body, and as a serpent below the waist. By Typhon she became the mother of Cerberus, the Hydra, the Chimæra, the Sphinx, the Nemean lion, and other monsters.

**Echinades**, *e-kin'-a-dees*, a group of islands in the Adriatic, off the coast of Acarnania, and opposite the mouth of the Achelous. According to Pliny, they were 9, and according to Ovid 5, in number.

**Echmiadzin**, *ek-me-ad-zin'*, the ecclesiastical capital of Armenia, in the dominions of Russia, 25 miles from Mount Ararat. It is the seat of the primate of the Armenian church. *Pop.* Unascertained.

**Echo**, *ek'-o*, a daughter of the Air and Tellus, who chiefly resided in the vicinity of the Cephisus. She was once one of Juno's attendants, but her loquacity displeased Jupiter; when she was deprived of the power of speech by Juno, and only permitted to answer the questions which were put to her. After she had been punished by Juno, she pined away through love of Narcissus.

**Ecija**, *ai-the'-ha*, a town of Spain, in the province of Seville, on the Xenil, 53 miles from Seville. It is reputed to have been formerly of great importance, and it contains many churches, convents, and hospitals; it has also a large square, with a piazza. *Manf.* Linens, woollens, and leather. *Pop.* 24,000. *Lat.* 37° 31′ 50″ N. *Lon.* 5° 4′ 34″ W.

**Eckernforde**, *ek'-ern-ford*, a town of Denmark, on an islet in the Baltic, 10 miles from Schleswig. It has shipbuilding-docks, distilleries, and a malting trade. The harbour is deep and secure. *Pop.* 4,000.

**Eckersdorf**, *ek'-ers-dorf*, three villages of Prussia, none of them with a population above 1,200.

**Eckhung Choo**, *ek'-hoong choo*, a river of Tibet, supposed the principal head-stream of the Indus. It takes the name of the Indus in lon. 79° E.

**Eckington**, *ek'-ing-ton*, a village and parish of Derbyshire, 7 miles from Chesterfield. *Pop.* 5,000, principally employed in potteries and making nails.—It is a station on the North Midland Railway.

**Eckmuhl**, *ek'-mool*, a town of Bavaria, 13 miles from Ratisbon, celebrated for being the scene where the Austrians were defeated by the French in 1809. Davoust showed great bravery in this action, and was named by Napoleon, prince of Eckmuhl.

**Eclusa**, Charles de l', *ai-klooz'*, a physician of Arras, and professor of botany at Leyden, whose works on botany were published at Antwerp, in 2 vols. folio, 1601. B. 1525; D. 1609.

**Ecuador**, *ek'-wa-dor*, an independent republican state of S. America, inclosed on the N., E., and S. by New Grenada, Brazil, and Peru; having the Pacific Ocean on the W. *Area*, estimated from 212,000 to 325,000 square miles. *Desc.* Mountainous in the west, where the giant chain of the Andes throws up its lofty summits to the height of upwards of 19,000 feet, in Chimborazo, Antisana, Cotopaxi, and others. In the E. the country falls into the central plain of the continent, and is watered by the upper course of the Amazon and its tributaries. *Rivers.* The Amazon and its tributaries, the Putomayo, Nafo, Pastaço, Muras, and the Huallaga. On the west, or maritime side of the mountains, the Esmeralda, Guayaquil, and Mira are the principal, and flow into the ocean. All these rivers, in so far as they flow through the territory of the republic, were, in 1853, declared free of all navigation dues. *Pro.* Wheat, cotton, sugar, coffee, cacao, corn,

tobacco, yams, fruits, wax, gums, and sarsaparilla. Agriculture, however, considered in a scientific point of view, is in a very backward state. There are extensive forests, and the chinchona-bark tree is common. The shores of the Pacific, and the rivers, abound with fish. *Minerals.* Gold, quicksilver, lead, iron, copper, and emerald stones. Gold is found in the sands of all the rivers, and sulphur is abundant near Chimborazo. The mineral riches of the country, however, are by no means developed. *Manf.* Woollen and cotton goods. *Pop.* 800,000. *Lat.* between 1° 40′ N. and 5° 10′ S. *Lon.* between 69° and 81° 20′ W.—Ecuador is divided into three departments,—Quito, Guayaquil, and Assuay. In 1526 it was discovered by Pizarro, when it was comprised in the empire of the Incas. It was held under the Spanish crown till 1812, when it was erected into a free republic. In 1822 it united with New Grenada and Venezuela to form the republic of Columbia. This union, however, was dissolved in 1831, when Quito, with its associated departments, took the name of Ecuador. Its population are mostly the descendants of Spaniards, aboriginal Indians, and Mcztizos. The Indians chiefly occupy the plains, where they live by hunting and fishing.

EDAM, *e'-dam*, a town of the Netherlands, 12 miles from Amsterdam, near the Zuyder Zee. *Pop.* 4,200.—An island in the Archipelago of Sunda, near the N. coast of Java, belonging to the Dutch, and serving as a place of transportation for the criminals of that nation.

EDAY, *e'-dai*, one of the Orkney Islands, Scotland. *Ext.* 7 miles long, and 2 broad. *Desc.* Hilly, and containing excellent pastures. *Pop.* 950.

EDDYSTONE ROCKS, *ed'-di-stone*, a reef of rocks in the English Channel, on which is the well-known lighthouse of that name, 14 miles from Plymouth breakwater. The lighthouse is 72 feet high, and was erected of Portland stone, incased in granite, in 1759. *Lat.* 50° 10′ 54″ N. *Lon.* 4° 15′ 53″ W.

EDELINCK, Gerard, *ed'-e-link*, an eminent Dutch engraver, who mostly resided in France, where he executed most of his works; among which may be noticed, as his finest, the picture of the Holy Family, by Raffaele, and "The Tent of Darius," by Le Brun. B. at Antwerp, 1641; D. 1707.

EDEMA, Gerard, *e'-de-ma*, a Dutch landscape-painter, who went to Norway and Newfoundland to delineate the plants and insects of those countries. He settled in London in 1670, and became famous for painting landscapes. D. about 1700.

EDEN, *e'-den*, a river of England, rising in Westmoreland, and, after a course of 40 miles, falling into the Solway Firth.

EDEN, a river of Scotland, rising in Berwickshire, and, after a course of 18 miles, falling into the Tweed, 4 miles below Kelso.—Another, rising in Kinrossshire, and, after a course of 18 miles, falling into St. Andrew's Bay.

EDEN, 'delight,' the country in which God planted the garden for our first parents. It is supposed to have been near the Persian Gulf, on the banks of the Euphrates.

EDENTON, *e'-den-ton*, a port of entry of Chowan county, N. Carolina, U.S., 60 miles from Norfolk. *Pop.* 2,000.

EDESSA, *e-des'-sa*, the modern Orfa, an ancient city of Mesopotamia, was the capital of Osrhoene under the Romans, and one of the frontier places of the empire. It contained manufactories of arms and engines of war, and was one of the first cities to receive the doctrines of Christianity, its inhabitants remaining true to the faith up to the time of the Crusades. In 1097, Baldwin, the brother of Godfrey de Bouillon, here founded a principality, which was the first Christian state erected by the Crusaders, and was regarded as the bulwark of the Holy City. (*See* ORFA.)

EDFU, *ed'-foo*, a village of Upper Egypt, 50 miles from Thebes. *Manf.* Egyptian earthenware and blue cotton cloths. *Pop.* 2,000.—This place is celebrated for possessing the finest remains of antiquity in Egypt.

EDGAR, *ed'-gar*, king of England, at the age of 16, succeeded his father Edwy, in 959. He made war against the Scots, and compelled Wales to pay him yearly a certain number of wolves' heads, which cleared the country of those animals. Securing his kingdom from invasion by the maintenance of a large fleet, he subdued Ireland, and governed his people with a vigorous success. His queen dying, and hearing of the great beauty of Elfrida, a daughter of the earl of Devon, he sent Earl Ethelwald, one of his favourite courtiers, to see if the charms of the lady were equal to what was reported of them. The moment he beheld her, the earl forgot his duty to his master, gave a false report of her charms, and married the lady himself. His conduct ultimately became known to the king, who caused him to be slain for his treachery, when the beautiful Elfrida became the wife of Edgar. D. 975. The moderation of his reign procured him the name of Peaceable. (*See* ELFRIDA.)

EDGAR, the 89th king of Scotland, was the son of Malcolm III., by the sister of Edgar Atheling of England. His niece married Henry I. of England, which circumstance terminated a war which had been raging between the two countries. D. 1107.

EDGAR, a county of the United States, in the E. part of Illinois. *Area*, 642 square miles. *Desc.* Fertile in the usual cerealia, but a considerable portion of it still remains in a state of nature. *Pop.* 12,000.

EDGBASTON, *edj'-bās-ton*, a parish of Warwickshire, 2 miles from Birmingham. *Area*, 2,790 acres. *Pop.* 10,000.

EDGECOMBE, *edj'-kum*, a county of the United States, in N. Carolina. *Area*, 492 square miles. *Pop.* 20,000, of whom nearly a half are slaves.

EDGECUMBE BAY, an inlet of the Pacific Ocean, in E. Australia. *Lat.* 20° S. *Lon.* 147° 30′ E.

EDGEFIELD, *edj'-feeld*, a district in S. Carolina, United States. *Area*, 1,680 acres. *Pop.* 32,000, of whom two thirds are slaves. Cotton is the principal product.

EDGEHILL, *edj'-hil*, an elevated ridge in Warwickshire, 7 miles from Banbury, where, in 1642, the first blood was shed between the royalist troops of Charles I. and the parliamentary forces. Richard Baxter, the celebrated nonconformist, and author of the "Saints' Rest," was preaching within the sound of the din of this battle, when it rolled along the side of the hill. (*See* BAXTER, CHARLES I., and CROMWELL.)

EDGEWARE, *edj'-wair*, a parish of England, in Middlesex, 10 miles from London. *Area*, 1,990 acres. *Pop.* 800.

EDGEWORTH, Richard Lovell, *edg'-werth*, an English writer, was designed for the profession of the law; but on the death of his father, in 1769, he relinquished all intention of carrying out this design, and went to Ireland, in 1782, to dedicate the remainder of his life to the improvement of his estate and the education of his children. To this duty he nobly devoted himself, and reared a large family by four different wives, he having been as often married. B. at Bath, 1744; D. at Edgeworthtown, Longford, Ireland, 1817.—He greatly assisted his celebrated daughter, Maria, in her works, although he himself was by no means "a ready writer." The following, however, appeared in his name:—"Poetry Explained;" "Rational Primer;" "Professional Education;" "Speeches in Parliament," and an "Essay on the Construction of Roads and Carriages." He was a member of the last Irish House of Commons, and an active magistrate in the neighbourhood where he resided.

EDGEWORTH, Maria, the daughter of the preceding, a favourite modern English authoress, was the offspring of his first marriage, and resided in England till 1782. She then removed to Ireland, where her education proceeded under the direction of her father, and in 1798 they published a joint production on "Practical Education." "Early Lessons" was the next production, which attained great popularity. In 1802 appeared the "Essay on Irish Bulls," another joint production; but it is not on these that the fame of Miss Edgeworth rests, but on the excellent series of novels, which already had begun to appear under her sole name; the first of these was, "Castle Rackrent," which was issued in 1801, and which indicated the possession of powers of a very rare character. In all her novels, her pen was devoted, not only to make us *feel* what is good, but to make us *do* what is good. This is especially the case in her "Belinda," "Leonora," "The Modern Griselda," "Moral Tales," "Popular Tales," "Tales of Fashionable Life;" in

short, all that she has written. Her last and most popular novel was "Helen," which appeared in 1834, and which was closed by the juvenile story of "Orlandino." It was to her "rich humour, pathetic tenderness, and admirable tact" in the delineation of her Irish characters, that Sir Walter Scott was indebted for the suggestion to do something in a similar way for his own country. He accordingly began the Waverley novels, keeping, no doubt, the productions of Miss Edgeworth clearly in his view. As a general estimate of her genius, the following discriminating criticism of Lord Jeffrey — — just as it is happily expressed. "The writings of Miss Edgeworth exhibit so singular a union of sober sense and inexhaustible invention—so minute a knowledge of all that distinguishes manners, or touches on happiness, in every condition of human fortune—and so just an estimate, both of the real sources of enjoyment, and of the illusions by which they are so often obstructed—that it cannot be thought wonderful, that we should separate her from the ordinary manufacturer of novels, and speak of her tales, as works of more serious importance than much of the true history and solemn philosophy that come daily under our inspection. . . . It is impossible, we think, to read ten pages in any of her writings, without feeling not only that the whole, but that every part of them, was intended to do good." D. at Hare Hatch, Reading, 1767; D. at Edgeworthtown, Longford, Ireland, 1849.

EDINBURGH, *ed'-in-bru(r)*, the metropolis of Scotland, called "Modern Athens," is also the capital of Edinburghshire, and is situate in its northern part, at the distance of about a mile and a half from the Firth of Forth. It stands on high and uneven ground, being built on three ridges, running in a direction from east to west. The central ridge, on which the city was originally built, is terminated abruptly on the west by a precipitous rock, crowned by the Castle, while, to the east, it gradually inclines to a plain or valley, whence, on the one side, rise the lofty elevations of Arthur's Seat and Salisbury Crags, and, on the other, the Calton Hill. The valley to the north of this ridge, which was formerly filled with water, is converted into beautiful gardens, and is, on the E. side, crossed by the North Bridge, and, in its centre, by the Earthen Mound. On the rising ground to the north of this valley, stands the New town of Edinburgh. Both sides of the central ridge, occupied by the principal street of the Old town, extending from the Castle to Holyrood House, are covered with buildings, crowded together in the closest array, and descending from the main street, chiefly in long and narrow lanes. In the bottom of the valley, on the south side of the High-street and parallel with it, runs a narrow street called the Cowgate. This street communicates, by streets and narrow lanes, with the southern part of the town, containing several old-fashioned squares, and leading to the handsome suburbs called Newington and Morningside. Here are the Meadows, a large level park, surrounded by trees and walks; and, adjoining them, Bruntsfield Links, an extensive common, frequented by the golf-players of Edinburgh. The New town is built on the lower and northernmost of the ridges, and is connected with the Old town by the North Bridge and the Earthen Mound. The ground which it occupies was added to the royalty in 1767; and, since that period, numerous streets and squares have been constructed on it, in beauty and regularity unsurpassed by those of any other city in the world. Edinburgh is connected with the Calton Hill and Prince's Street by an elegant bridge, of one large arch, called Waterloo Bridge, and with Leith by a broad and very fine road, called Leith Walk. The scenery around the city, owing to the abrupt and craggy heights of the Calton Hill and Arthur's Seat, which suddenly rises 800 feet high from the surrounding plain, and presents the rocky heights of Salisbury Crags towards the city, is very fine; and all that art can do has been done to display its natural advantages. Around the Calton Hill, walks have been made at different elevations, from which the surrounding town and country are seen to great perfection; a walk also winds round the still higher elevation of Salisbury Crags, from which the view is, at once, grand and imposing. Of the public buildings in Edinburgh, the Castle is the most remarkable. With its works, it occupies an area of seven English acres, and is separated from the town by an open space nearly 300 feet square. It can accommodate 2,000 soldiers, and has an armoury space for 30,000 stand of arms. Here is the celebrated gun called *Mons Meg*, built of malleable iron staves, and supposed to have been forged in Flanders, in 1486. In one of the apartments, called the Crown-room, the regalia of Scotland were deposited at the Union. They were found in 1818, when the chest in which they had been placed was broken open by a royal warrant. In one of its rooms James VI., afterwards king of England, was born, and on the esplanade which leads to the Castle, is now placed a bronze statue of the late duke of York. There is a tradition, which says that this castle was the residence of the daughters of the Pictish kings, previous to their marriage: hence it is called the "Camp of the Maidens." At the opposite, or eastern extremity of the Old town, stands the palace and abbey of Holyrood, for several centuries the residence of the monarchs of Scotland, and associated with many of the most interesting events in her history. The abbey, of which only the walls remain, was founded in the year 1128, by David I.; and in the burying-place within, are interred several of his successors. In the chapel connected with these ruins, Queen Mary was married to Lord Daruley; and to

EDINBURGH.

the abbey there is attached a privilege of sanctuary for insolvent debtors. The Palace is a large quadrangular building of hewn stone, with a court within, surrounded by piazzas. In one of the apartments of this edifice, David Rizzio, the confidential secretary of Queen Mary, was murdered, in 1566. It was on this occasion that the queen said, "I will weep no *more;* I will now think of revenge." At each angle of the west front are two double circular towers; and, in the centre, is a portico, ornamented by four Doric columns, which support a cupola in the form of a crown. It contains a gallery 150 feet long, 72½ wide, and 18 high, adorned with imaginary portraits of the kings of Scotland from the time of Fergus I. As it now stands, it is not of high antiquity. Its north-west towers were built by James V., but the remaining part of it was added during the reign of Charles II. In the area in front of the building, a statue of Queen Victoria, executed by Richie, is placed. In the centre of the city is a small square called Parliament Square, in which is an elegant equestrian statue of Charles II. Here is also a great irregular pile of

buildings, in which the supreme courts hold their sittings for the administration of justice. The original portion of this mass was intended for the reception of the Scottish parliament. It consists of an extensive hall, 122 feet in length by 49 in breadth, and not less than 40 feet high. It contains marble statues of the first Lord Melville and Lord President Blair. The workmanship of the inner roof, which is of a polygonal figure, of massive oak timber, ornamented with gilding, and supported by abutments projecting from the wall, has been generally admired. Here is the advocates' library, the richest and rarest collection in Scotland, consisting of not less than 150,000 volumes, and about 1,700 MSS., and a smaller one belonging to the writers to the signet, besides several public offices. Nearly opposite to the Parliament Square stands the Royal Exchange, which was founded in the year 1753, and was formerly employed as a custom-house. The Register-office, in which the public records of Scotland are deposited, is situate at the east end of Prince's Street, facing the North Bridge. It was founded in 1774. Of the churches, the metropolitan church, dedicated to St. Giles, the tutelar saint of the city, is the most ancient. It is built in the figure of a cross, and forms one side of the Parliament Square. It was erected into a collegiate church in 1466, but is said to have been founded nearly 600 years before. The steeple contains a set of musical bells. It was in this church that the Solemn League and Covenant was subscribed in 1643, by the English commissioners, the commission of the Church, and the committee of estates of Parliament. Both the regent Murray, assassinated at Linlithgow, and the marquis of Montrose are interred within its precincts. The other churches are Trinity College church, founded by Mary of Guelderland in 1462; the Old and New Greyfriars, the Tron, the Canongate, St. Cuthbert's, Lady Yester's, St. Andrew's, and St. George's; and a number of other churches, chapels, and places of worship for the various sects and denominations of which the inhabitants consist. The university of Edinburgh has long since attained to general celebrity. It was originally founded in the year 1582, when there was only one professor. All the different branches of literature, science, and philosophy, are taught in it. The High School, standing on a part of the Calton Hill, is the principal grammar-school of the city; but there are other educational establishments, affording every facility for the highest class of instruction that can anywhere be obtained, in almost every department of knowledge. Among these may be named the Edinburgh Academy, the Scottish Naval and Military Academy, and the Royal Scottish Academy of Painting, Sculpture, and Architecture. Of literary associations, the principal is the Royal Society, instituted in 1782; the Royal Society of Antiquaries, the Wernerian Society, and the Astronomical Institution, for the purpose of promoting the science of astronomy, with an observatory on the Calton Hill; the Highland Society, established for advancing the interests of agriculture, manufactures, and arts in the Highlands of Scotland; the Faculty of Advocates, and the Royal Colleges of Physicians and Surgeons. The principal charitable institutions are Heriot's Hospital, which was endowed by George Heriot, jeweller to James VI., for educating and maintaining the sons of burgesses and freemen; Watson's Hospital, for the sons and grandsons of poor citizens; and there are other institutions devoted to charitable objects. The prison and Bridewell stand on the Calton Hill, on the top of which is Nelson's monument, and near to it other monuments to Dugald Stewart, Playfair, and Burns. The columns of the national monument intended to be a literal reproduction of the ancient Parthenon, are also there. That of Sir Walter Scott is in Prince's Street, and is a very striking object. The principal establishments connected with the revenue are the Custom-house and Excise-office, both elegant mansions in the New town: and the general Post-office, in Waterloo Place,—a splendid street which ranges on each side of Waterloo Bridge. The chief places of public amusement are the theatre and the Assembly-rooms. *Manf.* Unimportant, and chiefly confined to the requirements of the citizens. The principal are household furniture, carriages, which are executed in a style of superior elegance; engraving in all its branches, musical instruments, glass, linen, silk, sarcenet, and fine shawl-weaving. There are also brass, iron, and marble works, spirit-distilleries, and ale-brewing establishments. The trade of bookselling and printing is, also, carried on to a great extent; and various periodical and other works of high celebrity are published. Among these may be mentioned the "Edinburgh Review" and "Blackwood's Magazine." *Pop.* 160,302.—The origin of Edinburgh is lost in antiquity. About the year 854, according to the accounts of the earlier historians, it was a town of some note, and was called Edwinesburch, or the castle of Edwin, probably so named after Edwin, prince of Northumberland. Its Gaelic name is Dun-edin, and its poetical one Edina, which was given to it by George Buchanan. In 1215 a parliament was assembled here for the first time. In 1437 the kings of Scotland usually resided in it, and held regular parliaments; and about the year 1456 it began to be considered the metropolis of Scotland. It is the birthplace of a great number of distinguished men, both in arts and arms. By railway, it is connected with all the principal towns in the kingdom.

EDINBURGSHIRE, or COUNTY OF MIDLOTHIAN, is situate in the eastern part of the S. division of Scotland, and is bounded N. by the Firth of Forth and the river Almond, which separates it from West Lothian, or Linlithgowshire; E. by the county of Haddington; S. by the counties of Lanark, Peebles, and Berwick; and on the W. corner, by part of the county of Linlithgow. *Ext.* Extreme length, from E. to W., 38 miles, with an average breadth of 13. *Area*, 358 square miles. *Desc.* The general aspect of the county is pleasant, being fertile, highly cultivated, and yielding excellent crops. The Moorfoot and the Pentland hills pass through it, the highest point of which is Carnethy, attaining an elevation of 1,802 feet above the level of the sea. *Rivers.* None large. The principal are the North and South Esk, the Almond, and the Water of Leith. *Pro.* The chief crops consist of wheat, barley, oats, beans, pease, turnips, and potatoes. The farms vary from 100 to 400 acres, and are remarkable for the excellence of their arrangements. The scientific Liebig considered the Lothian farms of Scotland the best in the world. A large portion of the county is kept in pasturage, especially in the south and hilly parts. *Minerals.* Coal, iron, sandstone, and limestone. *Pop.* 260,000.—At the period of the Roman conquest, Mid-Lothian and the surrounding districts were constituted a province, under the name of Valentia. Subsequently, the county was principally occupied by the Saxons, and held by them till 1020, when it was ceded to Malcolm II. By the Union Canal it has navigable communication with the Forth and Clyde Canal, and thence to Glasgow; and it is traversed by the Edinburgh and Glasgow, North British and Caledonian, and Edinburgh and Northern railways.

EDISTO, or POMPON, *e-dis'-to*, a river of S. Carolina, U.S., which, after a course of 160 miles, falls into the Atlantic, by two branches, called N. and S. Edisto. At its mouth it forms several islands, of which the largest, also called Edisto, is about 12 miles long and 10 broad. *Pop.* 4,000.

EDMONSTONE, *ed'-mon-stone*, an island of Hindostan, in the Bay of Bengal, at the mouth of the Hooghly. From a mere sandbank, this became an island half a mile long and 2 broad, on which shrubs grew, and fresh water could be obtained. Adopted as a station for ships, it vanished almost as rapidly as it had formed, and ultimately lost all its vegetation, and at high tide is almost covered by the sea. *Lat.* 21° 30′ N. *Lon.* 88° 20′ E.

EDMONTON, *ed'-mon-ton*, a village of Middlesex, 7 miles from London, consisting of several ranges of good houses. It has a trade in timber. *Pop.* 10,000.—Cowper's poem of "John Gilpin" has made this place famous, it having been the wish of that worthy citizen to repair

> "Unto the Bell at Edmonton,
> All in a chaise and pair."

Charles Lamb died here, 1837. It is a station on the London and Cambridge Railway.

EDMUND, ST., *ed'-mund*, became king of the East

Angles in 855, and was in 870 conquered, and put to death by the Danish princes Hinquar and Hubbar, whose propositions for peace, from their humiliating conditions, he had rejected. "His body," Fuller says, "was placed in a goodly shrine, richly adorned with jewels and precious stones, at Bury, in Suffolk." He was canonized, and Bury St. Edmund's was so named from its being the place of his burial.

EDMUND I., king of England, son of Edward the Elder, succeeded his brother Athelstan in 941. He subdued Mercia, Northumberland, and Cumberland. For his personal elegance and splendour, he received the name of the Magnificent, and was stabbed at a feast in Gloucester, by Leolf, a robber, whom he had caused to be banished. Assassinated 946.

EDMUND II., commonly known as Ironside, son of Ethelred, whom he succeeded on the English throne in 1016. A fierce war raged between him and Canute, king of Denmark, and he ultimately was forced to agree to a participation of the kingdom with the Danish prince. Assassinated in 1017, at Oxford, by two of his chamberlains. (*See* CANUTE.)

EDRED, *ed'-red*, king of the Anglo-Saxons, was the youngest son of Edward the Elder, and succeeded his brother Edmund in 946. He repressed several revolts of the Danes, and defeated Malcolm, king of Scotland. D. 955, leaving the throne to his nephew, Edwy.

EDREI, *ed'-re-i*, 'a very great cloud or mass,' a city or district of Og, king of Bashan.

EDRISI, *ed-re'-se*, an Arabian writer on geography, who produced a work on that science, which has been translated into several languages. In 1836—1840, it was published in France, and formed the fifth and sixth volumes of the "Recueil de Voyages et de Mémoires" of the French Geographical Society. Lived in the 12th century.

EDWARD the Elder, *ed'-ward*, son of Alfred the Great, succeeded his father in 901. He subdued Northumbria and East Anglia, and extended his dominions as far as Scotland. D. 925.

EDWARD the Martyr, son of Edgar the Great, king of England, was murdered by order of his stepmother Elfrida, at Corfe Castle. His youth and innocence, coupled with his tragical death, procured for him the designation of the Martyr. B. 962; assassinated 978, after a reign of three years.

EDWARD, king of England, called the Confessor, was the son of Ethelred. He succeeded Hardicanute in 1041, and was crowned at Westminster on Easter-day, 1042. Having been reared in Normandy, he brought over many of the natives of that country, whom he preferred at his court, which gave great disgust to his Saxon subjects. Notwithstanding this, he kept possession of his throne, and framed a code which is supposed to be the origin of the common law of England. He abolished the tax of Danegelt, was the first who pretended to cure the king's evil by touch, and restored Malcolm to the throne of Scotland, which had been usurped by Macbeth. He consulted William of Normandy about the choice of a successor, and this afterwards furnished that prince with a plea for invading the kingdom after the death of Edward, in 1066, when he was buried in Westminster Abbey. B. at Islip, Oxfordshire.

EDWARD I., king of England, surnamed Longshanks, succeeded his father, Henry III., in 1272. At the time of his father's death he was in Palestine, fighting against the Saracens for the recovery of Jerusalem, and when he returned, completed the conquest of Wales and subdued Scotland. To preserve Wales, he caused his son, who was born in Caernarvon, to be called the "Prince of Wales," which, ever since, has continued to be the title of the eldest son of the king of England. In endeavouring to break the spirit of the Scotch, he was unsuccessful, the patriotism of Wallace and his followers completely baffling his attempts at the entire subjugation of that people. B. at Winchester, 1290; D. at Carlisle, on his way to Scotland, 1307.—Whilst in the Holy Land, Eleanor, the wife of this sovereign, saved his life by sucking the poison from a wound which he received from a vengeful assassin. She was the daughter of Ferdinand III., king of Castile. His second wife was Margaret, daughter of Philip the Hardy, king of France. The laws which he framed entitle him to the name of the English Justinian. (*See* CAERNARVON.)

EDWARD II., the son of the above, was created prince of Wales in 1284, and after his accession to the throne, suffered himself to be governed by his favourites, Gaveston and the Spencers, which occasioned the barons to rise against him. In his reign the battle of Bannockburn was fought near Stirling, in Scotland, which restored to that country whatever she had lost in the previous reign, of her independence. In 1327 he was deposed by his subjects, and his crown conferred on his son, when he was confined in Berkeley Castle, Gloucestershire, where he was murdered in 1327. B. at Caernarvon, 1284.

EDWARD III. was the son and successor of the above, and ascended the throne when about fourteen years of age. His reign was active and glorious. He obliged the Scots to acknowledge Edward Baliol for their king, who did him homage for his crown. This was the result of the battle of Hallidon Hill, in which the Scots were defeated, and had 30,000 slain. He next laid claim to the crown of France, and gained the battles of Crécy and Poictiers. In the first was defeated Philip of Valois, and in the last King John, who was taken prisoner and sent to England. He also defeated the French in a naval engagement off the coast of Flanders, which is the first sea-fight on record between the English and the French. Edward also, about the same time, defeated David Bruce, king of Scotland, and took him prisoner. He afterwards reduced Calais, and peopled it with English. B. at Windsor, 1312; D. at East Sheen, near Richmond, Surrey, 1377.—In this reign Chaucer, the father of English poetry, lived; the order of the Garter was instituted; the art of weaving cloth introduced from Flanders; guppowder invented; and cannon first used at Crécy. As his gallant son, Edward the Black Prince, died before him, he was succeeded by his grandson, Richard II. (*See* EDWARD THE BLACK PRINCE, CRÉCY, and POICTIERS.)

EDWARD IV. was the eldest son of Richard, duke of York, and disputed the crown with Henry VI., whom he succeeded in 1461. He married Lady Elizabeth Grey, whose husband had fallen, as an adherent of the house of Lancaster, and whose beauty, whilst pleading for the restoration of her husband's lands, won the heart of the king. This marriage so disgusted the earl of Warwick, commonly called the King-maker, that he joined the Lancastrian party, and, in 1469, defeated Edward's forces near Banbury. Soon afterwards Edward was taken prisoner; but, effecting his escape, he put himself at the head of his followers, and obtained a victory over Warwick at Stamford Wells. The earl fled to France, whence he returned with a supply of troops, and proclaimed Henry VI., who had been confined in the Tower for six years, and set him on the throne. This event procured for Warwick the title of "king-maker." Edward had fled to Holland, but soon returned with assistance, and marched to London, where he took Henry prisoner. Shortly afterwards, he met Warwick on the field of battle at Barnet, where the Lancastrians were defeated, and the earl slain. Another victory at Tewkesbury secured him the quiet possession of the throne, after which there are few memorable events to record of this monarch. B. at Rouen, 1441; D. 1483, and was buried in Westminster Abbey.—In his reign the art of printing was introduced into England.

EDWARD V., king of England, son of the above, succeeded his father at the age of twelve. Richard, duke of Gloucester, his uncle, afterwards Richard III., took the guardianship of both him and his brother, and placed them in the Tower, where they were smothered in their beds, in 1483.—B. in the sanctuary of Westminster Abbey, 1470.—The bodies of these princes were discovered in 1674, and removed, by command of Charles II., to Westminster Abbey. (*See* RICHARD III.)

EDWARD VI., the son of Henry VIII. by Jane Seymour, ascended the throne in 1547, at the age of ten years. He was a prince of promising talents, virtue, and piety. The Reformation, begun by his father, was energetically carried on by Archbishop Cranmer, throughout his reign. His aversion to popery was so great, that he signed a will, in which he set aside his sisters, Mary and Elizabeth, lest they should favour the Roman Catholics, from the succes-

sion, and settled the crown on Lady Jane Grey. B. at Hampton Court, 1537; D. at Greenwich, 1552.—He founded the hospitals of Christ Church, Bridewell, St. Thomas, and a number of grammar-schools, which are still popularly known as King Edward's Schools.

EDWARD, Prince of Wales, commonly called the Black Prince, from the colour of his armour, was the eldest son of Edward III. He accompanied his father to France in his 16th year, and distinguished himself there above all the warriors of his age; particularly at the battle of Crécy, or Cressy, where he captured the standard of the king of Bohemia, embroidered with three ostrich-feathers, and the motto *Ich dien*, 'I serve.' These he adopted himself; and from that time to the present, they have continued to be the crest and the motto of the princes of Wales. He also gained the victory at Poictiers, where he took prisoners John, king of France, and his son, whom he brought captives to London. Their entry into the capital took place in 1356. In 1361 he married the daughter of Edmond, earl of Kent, brother to Edward II., a widow, by whom he had a son, who was afterwards Richard II. By the peace of Bretigny, he obtained the principality of Aquitaine and Gascony, taking up his residence at Bordeaux. Here he gave an asylum to Peter the Cruel, king of Castile, who had been driven from his throne by his brother Henry, count of Trastamare. Peter was restored to his kingdom by Edward; but the Castilian behaved to him with the basest ingratitude, refusing to find supplies for the English troops. B. at Woodstock, 1330; D. 1376.

EDWARDS, George, an eminent English naturalist, who, after travelling some time abroad, returned, and became librarian of the College of Physicians, London. He published a "History of Birds," 7 vols. 4to; "Gleanings of Natural History," 3 vols. 4to; and a volume of "Essays," 8vo. B. at West Ham, Essex, 1693; D. 1773.

EDWARDS, Thomas, an English divine, who, in 1755, printed a translation of the Psalms, and afterwards was chosen master of the grammar-school at Coventry, and presented to the rectory of St. John Baptist in that city. In 1759 he published the "Doctrine of Irresistible Grace proved to have no Foundation in the New Testament;" and, in 1762, defended Bishop Hare's system of the Hebrew metre against Dr. Lowth, in which he failed. In 1766 he took his doctor's degree, and, four years later, obtained the living of Nuneaton, in Warwickshire, where he died in 1785. B. at Coventry, 1729.—Besides the above works, he published selections from Theocritus, with notes, and some other pieces.

EDWARDS, Jonathan, an American divine, who, in 1757, was chosen president of the college of New Jersey, where he died in 1758. B. at Windsor, Connecticut, 1703.—Mr. Edwards was an acute metaphysician, but a rigid Calvinist. He wrote "A Treatise concerning Religious Affections," "An Inquiry into the Modern prevailing Notion of that Freedom of Will which is supposed to be Essential to Moral Agency;" "The Great Doctrine of Original Sin defended," "Sermons," &c. &c.

EDWARDS, Bryan, an ingenious writer, who became a member of the Assembly of Jamaica, W. Indies, where he delivered a speech against Mr. Wilberforce's propositions concerning the slave-trade, in 1789. He afterwards settled in England, and became member of parliament for Grampound, in Cornwall. He made his first speech in defence of his countrymen against the advocates for the abolition of slavery, and distinguished himself by a blunt roughness of manner, blended with sound sense and judgment. B. in Jamaica; D. 1800.—He wrote "The History, Civil and Commercial, of the British Colonies in the West Indies," 2 vols. 4to; "The Proceedings of the Governor and Assembly of Jamaica in regard to the Maroon Negroes;" and "An Historical Survey of the French Colony in the Island of St. Domingo," 8vo.

EDWARDS, a county of Illinois, U.S. *Area*, 216 square miles. *Desc.* Undulating and fertile. *Pop.* 4,000.

EDWY, *ed'-we*, king of England, son of Edmund I., succeeded his uncle Edred in 955. He married Elgiva, his relation within the prohibited degrees of kindred, which proved the ruin of both. Archbishop Odo seized the queen, and having branded her in the face with a hot iron, sent her to Ireland, after which she was put to a cruel death. Edwy was driven from the throne, and died under excommunication, in 959.

EECLOO, *ai'-kloo*, a town of Belgium, 11 miles from Ghent. Its public buildings are, several churches, a town-hall, prison, convent, and schools. *Manf.* Woollens, chocolate, and tobacco. *Pop.* 9,500.

EGBERT, *eg'-bert*, the first king of all England, and the last of the Saxon heptarchy. He was proclaimed king of Wessex in 800, and, in 828, united all the other kingdoms under him. He distinguished himself against the Danes. D. 838.

EGEDE, John, *ai'-geed*, superintendent of the Danish missionaries in Greenland, went, in 1721, and resided there for fifteen years, labouring to convert the inhabitants. B. 1686; D. 1758.—Egede wrote a description of Greenland, published first in 1729.—His son PAUL became assistant to his father, and afterwards bishop of Greenland. He published a new edition of his father's book, and a journal respecting Greenland. B. 1708; D. 1789.

EGER, *ai'-ger*, a river of eastern Germany, rising in North Bavaria, and, after a course of 125 miles, joining the Elbe about 30 miles from Prague.

EGER, a fortified frontier town of Bohemia, on the above river, 90 miles from Prague. It has a parish church, college, barracks, and schools. *Manf.* Woollen and cotton fabrics. *Pop.* 10,500.—Wallenstein was assassinated here in 1644.

EGERDIR, *ai'-ger-deer*, a lake of Natolia, Asia Minor, 15 miles from Isbarta. *Ext.* 27 miles long, and 10 broad at its greatest points. At the S. extremity is a town of the same name, built at the foot of a promontory in the lake. *Lat.* 37° 52′ N. *Lon.* 31° 6′ E.

EGERI, *aizh-er'-e*, a lake of Switzerland, 4 miles from Zug. *Ext.* 4 miles long, with a breadth of about 2 at its broadest part.

EGERIA, *e-jeer'-e-a*, a nymph of Latium, who dwelt in the forest of Aricia, near Rome. Renowned for her wisdom, she was frequently consulted by Numa Pompilius, who, according to Ovid, becoming enamoured of her, made her his wife. In order that this prince might introduce his laws and new regulations more readily into the state, he solemnly declared, before the Roman people, that they had been previously approved and sanctified by the nymph Egeria. Ovid says that Egeria was so disconsolate at the death of Numa, that she melted into tears, and was changed into a fountain by Diana.

EGERTON, Thomas, *edj'-er-ton*, lord chancellor of England in the reign of James I. He received his education at Oxford, whence he removed to Lincolns Inn, and, in 1592, received the honour of knighthood, and was made attorney-general. Soon afterwards he became master of the rolls, which was followed by the office of lord keeper. In 1603 he was made Baron Ellesmere and lord chancellor. In 1616 he was created Viscount Brackley. B. about 1540; D. 1617.—After his death, were published his "Privileges and Prerogatives of the High Court of Chancery," and his "Observations concerning the Office of Lord Chancellor."

EGGA, *eg'-ga*, a town of Guinea, on the banks of the Niger, about 75 miles from its junction with the Chadda. It extends for 2 or 3 miles along the river, and is very populous, many of the inhabitants living on the river in canoes. *Lat.* 10° 42′ N. *Lon.* 6° 40′ E.

EGGEBEE, *eg-ge-be'*, a town of Western Africa, 80 miles from Kano. *Pop.* 14,000. *Lat.* 10° 52′ N. *Lon.* 9° 6′ E.

EGHAM, *eg'-ham*, a village and parish of Surrey, 3 miles from Windsor. *Pop.* of parish, 4,500.

EGHOLM, *eg'-holm*, a small island of Denmark, in the Little Belt, 4 miles from the island of Eroe.

EGINA, *e-ji'-na*, an island of Greece. (*See* ÆGINA.)

EGINHART, *ai'-gin-hart*, a German historian at the court of Charlemagne, and appointed secretary to that sovereign, who gave him his daughter Imma in marriage. He afterwards embraced a religious life, and became superintendent of several monasteries. D. 839.—Eginhart wrote a curious "Life of Charlemagne," in elegant Latin; also the "Annals of France, from 741 to 829."

EGLWYS, *e'-glis*, the prefix of several parishes in Wales, with populations ranging between 100 and 5,000.

EGMONT, *eg'-mont*, the name of several villages, with small populations, in North Holland.

EGMONT, Lamoral, Count, a distinguished nobleman in Flanders, who served in the armies of Charles V. with great reputation. He was made general of horse by Philip II., and distinguished himself at the battle of St. Quentin in 1557. But the duke of Alva, on the pretence that he meditated designs in favour of the prince of Orange, caused him, together with Count Horn, to be beheaded at Brussels in 1568. B. 1522.—(*See* ALVA, and Motley's "History of the Rise of the Dutch Republic.")

EGMONT ISLAND, NEW GUERNSEY, or SANTA CRUZ, one of the Queen Charlotte's Islands, in the South Pacific Ocean. *Ext.* 20 miles long by 10 broad. *Lat.* 10° 46′ S. *Lon.* 165° 30′ E.

EGMONT, MOUNT, an active volcano of N. Island, New Zealand, nearly 9,000 feet above the level of the sea. *Lat.* 39° 15′ S. *Lon.* 174° 13′ E.

EGOI ISLANDS. (*See* CAROLINE ISLANDS.)

EGREMONT, *eg'-re-mont*, a town and parish of Cumberland, on the Eden, 38 miles from Carlisle. *Manf.* Paper, canvas, and linens. *Pop.* 2,100.

EGYPT, *e'-jipt*, a country of Africa, bounded on the N. by the Mediterranean, E. by the Red Sea and the Isthmus of Suez, S. by Nubia, and W. by the deserts to the E. of Fezzan. *Ext.* 450 geographical miles. The greatest width of the Delta, from the Greek letter Δ, it being of that form, is about 160 miles, from Alexandria on the W., to the ruins of Pelusium on the E. The average width of the valley of the Nile is about 8 miles. *Area*, estimated at 11,000 miles. *Divisions.* It is divided into the Said or Upper, the Vostani or Middle, and the Bahari or Lower Egypt. This last comprehends the Delta. *Desc.* Fertile only in the valley of the Nile and a part of the Delta. This valley is inclosed by two ranges of hills; the one on the E. varying in height from 400 to 800 feet, and extending from Philæ, at the S. extremity of Egypt, nearly to Cairo, where they gradually begin to sink, until finally lost in the Isthmus of Suez. The chain on the W., or Libyan chain, has a similar extent, and divides the Nile from a wide valley, which, at some remote period, may have received the waters of the Nile, and a portion of which is now called "the river without water." In ancient times, so great was the fertility of this country, that not a foot of ground remained uncultivated, and there was a large number of canals, which are now filled up, but the remains of which may, in many parts, be distinctly traced. *Rivers.* The only one is the Nile, which, for the last 1,500 miles of its course, has no tributaries. It enters Egypt at Philæ, and its average width, throughout, may be estimated at half a mile. By it a number of artificial canals are supplied with water for the purpose of irrigating the country, as rain rarely, if ever, falls in Upper Egypt. *Lakes.* The principal are Birket-el-Keroun, or Lake Mœris, in Middle Egypt, and Bourlos, Mareotis, and Menzaleh, in Lower Egypt. The last can only be considered as shallow lagoons, separated from the Mediterranean Sea by numerous sandy peninsulas. In the "Valley of the Natron Lakes," to the N. of the Libyan desert, are found small pools, which in winter give out a liquid of a violet colour, leaving the substance called "natron,"—a mixture of sulphate of soda and marine salt. *Climate.* Generally uniform, and remarkably dry. When a few drops of rain fall, they are viewed by the inhabitants almost as a miracle. In Lower Egypt, the latest observations give 13 days of rain in a year. Thunder and lightning are nearly equally unfrequent. The prevalent winds are from the north, and continue from May to September, and from November to February. At intervals during the spring, for about fifty days, Egypt is liable to the terrible wind of the desert, the *simoom*, which, from its intense heat and dryness, threatens, when long-continued, almost the extinction of animal life; fortunately, however, it seldom lasts above three days. The heat of the climate, combined with the filthy habits of the people, is considered favourable to the ravages of the plague, which is supposed to be indigenous, whilst ophthalmia, another severe disease, is also peculiar to Egypt. *Zoology.* The wild animals are tigers, hyenas, wolves, antelopes, apes, black-cattle, horses, large asses, crocodiles, hippopotami, the chameleon, and a kind of rat, called ichneumon. The birds are,—ostriches, eagles, hawks, pelicans, waterfowls of all kinds, and the ibis, which resembles a duck, and was deified by the ancient Egyptians, on account of its destroying serpents and noxious insects. Among the *reptiles* is a serpent, called the cerastes, or horned viper, whose bite is fatal to those who have not the secret of guarding against it. *Pro.* Millet, maize, wheat, rice, onions, melons, cucumbers, sugar, opium, tobacco, hemp, cotton, lint, and indigo. The want of rain in this country being supplied by the annual inundation of the Nile, which begins to rise in June and to subside in September, it can hardly be said to depend for any of its fertility upon the clouds. When the waters retire, all the ground is covered with mud; then the corn is harrowed into it, and, in the following March, there is usually a plentiful harvest. But some lands are never fallow, and yield three harvests annually, particularly in Lower Egypt, where sowing and reaping are going on incessantly, wherever the water of the river can be obtained. The rice-fields are supplied with water from canals and reservoirs. There is no place in the world better furnished with corn, fruits, and all sorts of garden-stuff; and in Lower Egypt, oranges, lemons, figs, dates, almonds, cassia, and plantains, are produced in great plenty. The plants peculiar to Egypt comprise the papyrus, from which the first substance used in writing was made, the lotus, the zeziphus, and many aromatic species. There are no forests, and the palms and sycamores are thinly scattered. *Minerals.* No metals; but marble, salt, natron, saltpetre, and red granite, of which the pyramids are constructed. Emeralds are found in the mountains on the shores of the Red Sea. COMMERCE. Egypt carried on a considerable trade in E. India commodities, till the Portuguese discovered the passage to that country round the Cape of Good Hope. The merchants of Europe, however, visit the harbours in the

FELLAHS OF EGYPT.

Mediterranean, for the purpose of trafficking in various articles. The trade with the interior of Africa is mostly conducted by means of caravans, which bring, in exchange for European and Egyptian products, elephants' teeth, ebony, gold-dust, musk, civet, ambergris, ostrich-feathers, and coffee. The gold-dust is brought from Negroland to Fez and Morocco, and thence to Cairo, over immense deserts. The slave-traffic was abolished at Cairo in 1846. The principal commodities, which the merchants purchase, are coffee, senna, cassia, rhubarb, sal ammoniac, myrrh, saffron, saltpetre, aloes, opium, indigo, sugar, sandalwood, dates, cotton cloth, &c. The trade with Europe is carried on through Alexandria. *Manf.* Inconsiderable, and almost entirely monopolized by the government. The potteries are extensive, and cotton cloths and woollens are made, mostly by the natives. At Cairo, firearms and military accoutrements are made, at Benisouef carpets, and at Foulah red caps. *Antiquarian Remains.* Egypt is distinguished for her vast remains of antiquity, large portions of which bear no marks of decay, and yet display, in all their grandeur and entirety, the arts and the power of the first generations of men. These remains are remarkable for their magnitude, the aim of their contrivers being apparently to astonish by their immensity. This enormous magnitude is particularly conspicuous in the pyramids. The largest of these, measures nearly 500 feet in perpendicular height, and has a square base of 700. The greater part consists of a solid mass of masonry, composed of "Syene marble," or red granite. The temples, though they cannot rival the stupendousness of the pyramids, yet appear to exceed every other work of human art. The site of Thebes exhibits a space of ten miles, almost entirely covered with colossal sacred ruins. Even the statues with which they are adorned, always possess gigantic dimensions. *Inhabitants.* These are composed of four different races; consisting of Copts, Arabs, Turks, and, till 1811, Mamelukes. The Copts are the original race, and appear to be descendants of the most ancient inhabitants of Egypt, mingled in some degree with Persians and Greeks. The Arabs are the descendants of the Saracen conquerors, and are now the most numerous inhabitants of Egypt. The Turks have always been established to a considerable extent in the great cities; and the Jews are also numerous in the commercial cities, and are oppressed and persecuted, though never extirpated. The Mamelukes consisted of Georgian and Circassian slaves, who, under the Fatimite khalifs, were brought into the country, and being intrusted with arms, rose against their masters, whom they massacred or expelled, and thus assumed the dominion of Egypt, which they transmitted to new bands brought into the country. They were rather the plunderers than the rulers of Egypt. Their strength being broken by the defeats experienced during the invasion of the French, the Pasha, Mehemet Ali, conceived a plan for their destruction; and having invited their chiefs to a feast, treacherously massacred the greater part of them, in 1811. Those who escaped, fled to Upper Egypt, and were finally driven to establish themselves at Dongola. The complexion of the Egyptians is tawny, and as we proceed southward, they become darker, until those near Nubia are almost black. They are generally indolent and cowardly. The richer sort do nothing all day but drink coffee, smoke tobacco, and sleep; and they are ignorant, proud, haughty, and ridiculously vain. *Gov.* Despotic by an hereditary pasha. *Army.* Considerable,—about 210,000, including the Bedouin irregular cavalry and the national guards. *Rel.* Mahometan and Christian. *Pop.* 2,000,000, exclusive of the nomadic Arabs in the deserts. *Lat.* between 23° 50′ and 31° 35′ N. *Lon.* between 25° and 34° E.—The early history of Egypt is involved in obscurity. The ancient kings governed it, till Cambyses became master of it, 525 years B.C.; and in their time all those wonderful structures were raised, and works perfected, which we cannot behold without astonishment. These are the pyramids, the labyrinth, the immense grottos of the Thebais, the obelisks, temples, and pompous palaces; the lake Mœris, and the vast canals, which served both for trade and to render the land fruitful. The country continued under the Persian yoke till the time of Alexander the Great, who, having conquered Persia, built the city of Alexandria. He was succeeded by Ptolemy, the son of Lagos, 324 years B.C. Ten kings of that name succeeded each other, till Cleopatra, the sister of the last Ptolemy, ascended the throne; when Egypt became a Roman province, and continued so till the reign of Omar, the second caliph of the successors of Mahomet, who drove out the Romans, after it had been in their hands 700 years. When the power of the caliphs declined, Saladin, in 1250, set up the empire of the Mamelukes, who in time became so powerful, that they extended their dominions over a great part of Africa, Syria, and Arabia. At the commencement of the 16th century, Selim, a Turkish emperor, conquered it, and for many years it was distracted by the civil wars between the different contending beys, by which its provinces were governed. The famous Hassen Ali, the Turkish admiral, gained several victories over them in 1786; but though he repressed, he could not totally subdue them. The French invaded the country in 1798, under General Bonaparte; but they, in their turn, were driven from it by the British in 1802. In 1811, Mehemet Ali became master of Egypt by the massacre of the Mamelukes, and, under his sway, it progressed rapidly in civilization. He considerably extended its boundaries, even into Asia; but, in 1840, was dispossessed of his Asiatic conquests. The treaty of London, however, in 1841, confirmed the viceroyalty of Egypt, as a fief of the Ottoman empire, to him and his descendants. Since the establishment of regular steam-packets in the Mediterranean and the Indian Ocean, and the gradual development of its railway system, Egypt has become the highway to India, not only to most travellers, but for the general correspondence of Europe.

EHEN, or BROAD RIVER, *e'-hen*, a river of England, rising near Borrowdale, in Cumberland, and falling into the Irish Sea.

EHINGEN, *e'-hing-en*, a town of Wurtemberg, on the Danube, 10 miles from Ulm. *Manf.* Chiefly cotton goods. *Pop.* 3,200.

EHNINGEN, *en'-ing-en*, a town of Wurtemberg, 15 miles from Stuttgart. *Pop.* about 6,000.

EHRENBERG, Christian Godfrey, *air-en-bairg'*, a distinguished German microscopist and naturalist, who made several scientific expeditions into various parts of the globe; among which may be noticed one with Humboldt into the Ural and also the Altai mountains. He wrote largely on his favourite pursuits, and investigated the fossil forms of microscopic organic beings with success. B. at Delitsch, in Prussian Saxony, 1795.

EHRENBREITSTEIN, *air'-en-brite'-stine*, 'broad stone of honour,' a first-class fortress of the Prussian states, on the summit of a stupendous rock, 468 feet high. It was originally a Roman fortress, and was, without success, besieged by the French, in 1632 and 1688. In 1799 it was taken by the French, and demolished after the peace of Luneville. In 1815 it was restored to the government of Prussia, and is now capable of containing 14,000 men. At the bottom lies the town of Thal-Ehrenbreitstein. *Pop.* 4,000.

EHUD, *e'-hud*, 'he that praises,' a famous judge of Israel, who slew Eglon, king of Moab.

EIBAU, OLD and NEW, *i'-bou*, two connected villages of Saxony, on the Rumburger, in Upper Lusatia. *Manf.* Linens, of which they are the principal seats in Lusatia. *Pop.* 5,000.

EIBENSTOCK, *i'-ben-stok*, a town of Saxony, on the Mulda, 7 miles from Schwartzenburg. *Manf.* Lace, muslins, and chemicals. *Pop.* nearly 5,000.

EICHORN, Johann Gottfried, *ike'-horn*, a German professor of oriental and biblical literature in the University of Gottingen. He filled several important posts, and, in 1819, was appointed privy councillor of justice for the kingdom of Hanover. His writings, illustrative of oriental literature, are numerous, and procured for him a reputation of being amongst the most learned and distinguished scholars of Germany. B. at Dorrenzimmern, 1752; D. 1827.—CHARLES FREDERICK, a son of the preceding, distinguished himself as a jurisconsulist. B. at Jena, 1781; D. 1854.

EICHSTADT, *ike'-stat*, a town of Bavaria, on the Atmühl, 30 miles from Augsburg. It has a cathedral, several churches, a Capuchin convent, gymnasium, and a bishop's palace. *Manf.* Woollens, earthenwares, hardwares; and there are some breweries. *Pop.* nearly

8,000.—After being in the possession of various powers, this place passed, in 1805, into the hands of the Bavarian government. In 1815 it was made the capital of a principality of the same name, and bestowed on Eugene Beauharnais, in whose family it still remains. A convent in this town is much visited by zealous Catholics.

EIDER, *i'-der*, a river of Denmark, rising 8 miles from Kiel, in Holstein, and, after a W. course for 90 miles, falling into the German Ocean at Tonning. By means of the Eider or Schleswig-Holstein canal, water communication is established between the North Sea and the Baltic.

EIDSVOLD, *ides'-vold*, a town of Norway, 32 miles from Christiana. This place is remarkable, on account of its being the scene of the meeting of the Norwegian delegates, who, in 1814, when the constitution was formed and sworn to, declared Norway independent, and Christian Frederick, prince of Denmark, king.

EIG, or EGG, *eg*, an island off the W. coast of Scotland, 10 miles from the mainland, in Inverness-

EIG ISLAND.

shire. *Desc.* Uneven, and consisting mostly of heathy pastures, upon which cattle are reared. The Scuir of Eig, at its S. extremity, attains a height of 1,339 feet above the level of the sea. *Pop.* about 500. *Lat.* 56° 57′ N. *Lon.* 6° 10′ W.—This island is remarkable on account of the numerous caves with which its coasts are indented. In one of these, the M'Donalds, inhabitants of the islands, concealed themselves from the pursuit of their enemies, the M'Leods of the island of Skye; but being discovered, fires were kindled at the mouth of the cave, and the M'Donalds suffocated to a man.

EIGER, *i'-ghair*, a mountain of Switzerland, 2 miles from Mönch, in the Bernese Oberland. *Height*, 13,045 feet above the level of the sea.

EILDON HILLS, *eel'-don*, three conical peaks in Roxburghshire, Scotland. *Height* of the loftiest, 1,350 feet.

EILENBURG, *i'-len-berg*, a walled town of Saxony, 12 miles from Leipsic, celebrated for being the place where Luther preached at the beginning of the Reformation, in 1522.

EIMBECK, or EINBECK, *ime'-bek*, a town of Hanover, on the Ilm, 48 miles from Brunswick. *Manf.* Hosiery and linen fabrics. *Pop.* 6,000.

EINSIEDELN, *ine'-zeel-den*, a town of Switzerland, in the valley of the Sihl, 20 miles from Zurich. It has a famous abbey, founded in the 9th century, and connected with which is a marble chapel with an image of the Virgin, which, on the 14th of September annually, attracts 150,000 pilgrims. In 1798 the French despoiled this shrine of its riches. *Pop.* 2,460, among whom are nearly 80 inns and ale-houses for the accommodation of pilgrims.

EISENACH, *ise'-nak*, the capital of a principality of the same name in Germany, on the Hörsel, 45 miles from Weimar. The streets are neat, the houses in general well built; and it has a town-hall, mint, prison, hospitals, a gymnasium, and several schools. *Manf.* Cotton goods, soap, white-lead, with dye-works and tanneries. *Pop.* 10,000.—In its neighbourhood is the castle of Wartburg, formerly the residence of the landgraves of Thuringia. Between 1521 and 1522, Luther passed ten months' imprisonment in this abode, under the friendly arrest of the elector of Saxony, and called it his Patmos.—The principality has an area of 285 square miles, and a population of 82,500.

EISENBERG, *i'-sen-baerg*, a town of Germany, 30 miles from Leipsic. *Manf.* Woollens and porcelain. *Pop.* 5,000.

EISENBURG, *i'-sen-boorg*, a county of Western Hungary. *Area*, 1,536 geographical square miles. *Desc.* Mountainous, with extensive plains and valleys, watered by the Raab and its tributaries. *Pop.* 294,000.

EISENSTADT, *i'-sen-stat*, a free royal town of East Hungary, on the Leytha, 27 miles from Vienna. This place has a fine zoological garden, and a park, containing 7,000 species of exotic plants.

EISLEBEN, *ise'-le-ben*, a town of Prussian Saxony, 24 miles from Merseburg. *Manf.* Linen goods, and in its vicinity are silver and copper mines. *Pop.* about 10,000.—Here Martin Luther was born in 1483, and here he died in 1546. The pulpit in which he preached is still preserved in the church of St. Andrew.

EKATERINENBURG, or CATHERINENBURG, *ai-kat'-e-rin-boorg*, a fortified town of Asiatic Russia, on the Iset, in the district of Perun. It has several churches, consisting either of wood or stone. Great works are carried on for the Russian government, in iron-foundries and forges, for the manufacturing of cannon and anchors. An immense copper coinage is also produced; and the place is a seat of a council of mines. Provisions are cheap and plentiful. *Pop.* about 11,000. *Lat.* 56° 49′ N. *Lon.* 61° E.—This place was founded by Peter the Great, in 1723.

EKATERINODAR, *ai-kat'-e-rin'-o-dar*, a town of Russia, 150 miles from Stavropol. It is the capital of the Cossacks of the Black Sea. *Pop.* 4,000.

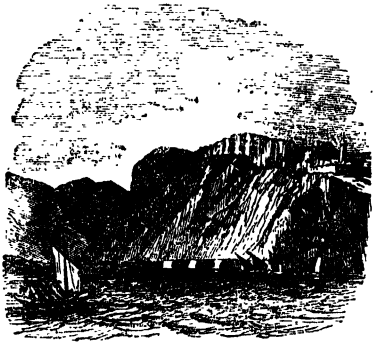
EKATERINOGRAD, *ai-kat'-e-rin'-o-grad*, a town and fortress of Russia, on the Terek, 20 miles from Mosdok. It forms an important military post of the Cossacks of the line. *Pop.* 5,000. *Lat.* 43° 40′ N. *Lon.* 43° 55′ E.

EKATERINOSLAV, *ai-kat'-e-re-nos'-laf*, a fortified town of European Russia, the capital, since 1784, of a government of the same name, 250 miles from Odessa. *Manf.* Cloths and silks. *Pop.* 14,000. *Lat.* 48° 27′ 50″ N. *Lon.* 35° 5′ 53″ E.—This place was founded in honour of the empress Catharine II., in 1787.—The GOVERNMENT, though somewhat reduced from its original size, is still very considerable, extending from *lat.* 47° to 49° 20′ N. *Lon.* from 33° 30′ to 39° 40′ E. *Area*, 19,299 geographical miles. *Pop.* 870,000.

EKHMIM, *ek'-mim*, a town of Upper Egypt, on the Nile, 52 miles from Siout. *Pop.* about 3,000.

EKRON, *e'-kron*, 'barrenness,' a chief city of Philistia, famous for the idol god Baalzebub.

ELAH, *e'-la*, 'an oak' or 'a curse,' a king of Israel.—Also a place near which David slew Goliath.



ELAM, *e'-lam*, 'a young man or virgin,' a son of Shem, founder of the ancient Persian empire.—Also the name of a principal province of Persia.

EL ARISH, *el air'-ish*, 'the garden of pleasure,' a fortified seaport of Morocco, 45 miles from Tangier. It has a mosque and dockyard. *Pop.* 4,000, of whom a third are Jews. *Lat.* 35° 13′ N. *Lon.* 6° 9′ W.

EL ARISH, a village of Lower Egypt, on the Mediterranean, on the route from Egypt to Syria. *Lat.* 31° 6′ N. *Lon.* 31° 28′ E.—It is but little more than a fort and a few houses, and was taken by the French in 1799; and here the French general Kleber signed, in 1800, a convention with Sir Sidney Smith, engaging to leave Egypt with his troops.

ELATH, *e'-lath*, 'kind, strength,' or 'an oak,' a town of Arabia, on the eastern gulf of the Red Sea.

ELBA, *el'-ba*, an island of Tuscany, in the Mediterranean. It lies between Corsica and the coast of Italy, from which it is separated by the Channel of Piombino. *Ext.* 18 miles long, with a varying breadth between 2¼ and 10½. *Area*, 97 square miles, with the neighbouring isles. *Desc.* Mountainous, with a temperate and healthy climate, except in some of the low districts, near the shore. *Pro.* Wine and fruit. *Minerals.* Iron, loadstone, alum, salt, and marble. *Pop.* 21,000.—This island has acquired historical celebrity, as the residence of Napoleon I. from 3rd May, 1814, to 26th February, 1815, when he sailed on his expedition to France.

ELBA.

ELBE, *elb*, a river of Germany, rising amid the mountains called the Riesengebirge, between Silesia and Bohemia, and, after a winding course of 550 miles, falling into the German Ocean about 70 miles below Hamburg. At its mouth it is 13 miles wide, and is connected by canals with the Oder and the Trave, an affluent of the Baltic.

ELBERFELD, *el'-ber-felt*, a town of Rhenish Prussia, 16 miles from Dusseldorf. It is an irregularly-built place, and is the seat of several commercial companies. *Manf.* Linen, ribbons, lace, siamoise, and similar stuffs. It is celebrated for its Turkey-red dye-works, to which large quantities of yarn are sent from Britain. It and Barmen supply all Germany with tapes and bands. *Pop.* 40,000. (*See* BARMEN.)

ELBERT, *el'-bert*, a county in the western district of Georgia, U.S., between Savannah and Broad rivers. *Area*, 560 square miles. *Desc.* Hilly, and productive of grain and cotton. *Pop.* 13,000, of whom one half are slaves.

EL BETHEL, *el beth'-el*, 'God of Bethel,' Jacob's altar at Bethel.

ELBEUF, or ELBEUF, *el'-be(r)f*, a town and parish of France, on the Seine, 12 miles from Rouen. *Manf.* Cloth. *Pop.* 13,000.

ELBING, *el'-bing*, a river rising in the Lake of Drousen, and falling into the Frische Haff, a large inlet of the Baltic.

ELBING, a trading town of East Prussia, on the river Elbing, 35 miles from Dantzig. Its streets are narrow and the houses lofty. The chief buildings are several Protestant churches, a public library, several charitable institutions, and a house of industry, founded by an Englishman of the name of Cowle, in which 400 children are educated. *Manf.* Woollens, vitriol, oil, sail-cloth, tobacco, sugar, starch, soap, and chicory. *Pop.* 22,000.

ELBEUF, Réné de Lorraine, Marquis of, *el'-be(r)f*, the 7th son of Claude, duke of Guise, died in 1566. Charles, his grandson, who died in 1657, married first Catharine Henriette, daughter of Henry IV., and secondly, Gabrielle d'Estrées. His posterity in the male line ceased in the person of Emanuel Maurice, who died in France, aged 86, in 1763. To this latter nobleman is attributed the discovery of the buried city of Herculaneum.

ELBURZ, *el-boors'*, a mountain of Asia, the culminating point of the Caucasus. (*See* CAUCASUS.)—Also a mountain-chain of Persia, S. of the Caspian Sea.

ELEANOR, *el'-e-nor*, duchess of Guienne, succeeded her father, William IX., at the age of 15, in 1137, and the same year married Louis VII., king of France. She accompanied him to the Holy Land, where she is said to have intrigued with her uncle, Raymond, prince of Antioch, and a young Turk named Saladin. A separation ensued between her and her husband, and in 1153 she married the duke of Normandy, afterwards Henry II., king of England, which occasioned a succession of wars between the two kingdoms. Her jealousy of Henry, and subsequent conduct to Fair Rosamond, have afforded a copious subject to poets and romance-writers. She excited her sons to rebel against their father, for which she was imprisoned sixteen years. On the accession of Richard I. she was released, and in his absence in the Holy Land, was made regent. D. in 1204, a nun in the abbey of Fontevrault.

ELEAZAR, *el'-e-ai'-zar*, high priest of the Jews, succeeded his brother, Simon the Just, about 292 B.C. He is said to have given a copy of the Hebrew scriptures to Ptolemy Philadelphus, who caused the same to be translated into Greek by seventy interpreters, which version is now known by the name of the Septuagint.—There are others of this name mentioned in the Scriptures.

ELCHE, *el'-chai*, a town of Spain, 13 miles from Alicante. It has several good streets and squares, but the general aspect of the place is melancholy. The great church is a beautiful building, with a majestic dome. Besides it there are several convents, schools, and a bridge crossing a ravine which intersects the town. *Pop.* 19,000.

ELCHINGEN, *el'-shing-en*, a village of Bavaria, on the Danube, 5 miles below Ulm, where the Austrians were defeated by the French in 1805.

ELDA, *ail'-da*, a town of Spain, on the Elda, 26 miles from Alicante. *Manf.* Soap, paper, lace, and leather. *Pop.* 4,000.

ELDAD, *el'-dăd*, 'loved of God,' one of the elders of Israel, who prophesied among the people.

ELDE, *eld*, a river of Germany, rising in Lake Müritz, and, after forming several other lakes in its course, falling into the Elbe near Dömitz.

ELDERSLIE, or ELDERSLIE, *eld'-ers-le*, a village of Renfrewshire, 2 miles from Paisley, Scotland. *Pop.* 1,100.—This is the supposed birthplace of Sir William Wallace, whose patrimony it was, and whose descendants lived in it until the last century.

ELDON, John Scott, Earl of, *el'-don*, after passing through the University of Oxford, entered himself a student of the Middle Temple in 1773, and took his degree of Master of Arts in the following year. After patient and laborious study, he rose into notice, and in 1783 was returned member of parliament for Weobly. In 1787 he was appointed chancellor of the bishopric and county palatine of Durham; and, in the following year, solicitor-general. In 1793 he was made attorney-general, and in 1799 was raised to the chief-justiceship, with a seat in the House of Lords, as Baron Eldon. In 1801 he became lord chancellor, which office he finally resigned in 1827. In 1821 he had been created Viscount Encombe and Earl of Eldon. B. at Newcastle-upon-Tyne, 1751; D. 1838.

EL DORADO, *el do-ra'-do*, a county of the United States, in the N. of California. *Area*, 2,000 square miles. It has minerals and gold in abundance. *Pop.* 40,000.

ELECTRA, *e-lek'-tra*. Of this name the following are the most remarkable:—One of the Oceanides, wife of Atlas, and mother of Dardanus, by Jupiter.—A daughter of Atlas and Pleione. She was changed into a constellation.—A daughter of Agamemnon, king of Argos. She first incited her brother Orestes to revenge his father's death, by assassinating his mother Clytemnestra. Orestes gave her in marriage to his friend Pylades, and she became mother of two sons, Strophius and Medon. Her adventures and misfortunes form one of the interesting tragedies of the poet Sophocles.

ELEI, *e-le'-i*, a people of Elis, in Peloponnesus. In their country was the temple of Jupiter, where also were celebrated the Olympic games, of which they had the superintendence. Their horses were held in great repute.

ELEPHANT ISLE, called by the natives GHARIPOOR 'full of caves,' a small island, situate between Bombay and the western coast of India. It owes its celebrity to its wonderful cave and mythological sculptures. Opposite to the landing-place is a colossal statue of an elephant, from which the Portuguese named the island Elephanta. *Lat.* 18° 57′ N. *Lon.* 73° E.

ELEPHANTINE, *el-e-fan'-tin*, a small island in the Nile, opposite Assouan, or Syene, remarkable for the ruins with which it is covered. In its neighbourhood are extensive granite-quarries, and remains of the temples erected by the Pharaohs.

ELEUSINIA, *e-lu-sin'-e-a*, 'Eleusinian mysteries,' a great festival observed every fourth year, by many of the Grecian states, but more particularly by the people of Athens every fifth year, at Eleusis, in Attica, where it was introduced by Eumolpus, 1356 B.C. It was the most celebrated of all the religious ceremonies of Greece, whence it is often called, by way of eminence, *mysteria*, 'the mysteries.' It was sacred to Ceres and Proserpine; everything contained a mystery, and Ceres herself was known only by the name of *achtheia*, from the sorrows and grief (*achthos*) which she suffered for the loss of her daughter. This mysterious secrecy was solemnly observed, and enjoined on all the votaries of the goddess; and if any one ever appeared at the celebration, either intentionally or through ignorance, without proper introduction, he was immediately punished with death. Persons of both sexes and all ages were initiated at this solemnity, and it was looked upon as so heinous a crime to neglect this sacred part of religion, that it was one of the heaviest accusations which contributed to the condemnation of Socrates. They were transferred from Eleusis to Rome, in the reign of Adrian, where they were observed with the same ceromonies as before, though, perhaps, with more freedom and licentiousness. They lasted about 1800 years, and were, at last, abolished by Theodosius the Great.

ELEUSIS, *e-lu'-sis*, a decayed village of Attica, but, in ancient times, a city of Greece, 12 miles from Athens. The ancient highway which led to Athens is still the modern road, and the plain around the village is covered with scattered ruins.

ELEUTHERA, or ALABASTER ISLAND, *el-u'-the-ra*, one of the largest of the Bahama islands, in the W. Indies. *Ext.* 80 miles long, with a breadth of 10. *Pop.* about 3,000. *Lat.* 25° 11′ N. *Lon.* 76° 15′ W.

ELEUTHERÆ, *e-lu'-the-re*, a village of Bœotia, where Mardonius was defeated, with 300,000 men.

ELEUTHERIA, *el-u-the'-re-a*, a festival celebrated at Platæa in honour of Jupiter Eleutherius, or the assertor of liberty, by delegates from almost all the cities of Greece. It originated in the victory obtained by the Grecians under Pausanias over Mardonius, the Persian general, when an altar and statue were erected to Jupiter Eleutherius, who had freed the Greeks from the tyranny of the barbarians. It was further agreed upon, in a general assemby, by the advice of Aristides the Athenian, that deputies should be sent, every fifth year, from the different cities of Greece, to celebrate Eleutheria, or festivals of liberty. The Platæans also celebrated an anniversary festival in memory of those who had lost their lives in that famous battle. There was, likewise, a festival of the same name observed by the Samians in honour of the god of love. Slaves, too, when they obtained their liberty, kept a holiday, which they called Eleutheria.

ELFDAI, EN, *elf'-di*, a village of Sweden, in Dalecarlia, remarkable for its quarries of porphyry. *Lat.* 61° 14′ 30″ N. *Lon.* 13° 58′ E.

ELFSBORG, *elf's'*.

ELGIN, *el'-gin*, the chief town of the county of Elgin, or Morayshire, on the Lossie, about 5 miles above its influx into the German Ocean. The river is here crossed by several stone bridges. In the middle of the town, which consists of one street, intersected by several lanes, stands the parish church, and, in its vicinity, a town-house, court-house, and the county gaol. It had, formerly, a magnificent cathedral, once the finest in Scotland, and called "The Lantern of the North," founded in 1224, of which the great gateway still remains. There are also the ruins of an ancient castle. It has, besides, a literary institution, museum, academy, assembly-rooms, &c., public fountain, an orphan institution, endowed with £70,000 by General Anderson, a native of the town; and Gray's Hospital, endowed with £26,600. *Pop.* about 5,500.—Elgin is supposed to take its name from Helgy, a Norwegian general.

ELGIN, Thomas Bruce, seventh Earl of, after finishing his university education in 1793, accompanied the Prussian army in its operations in Germany. In 1795 he was made envoy extraordinary, and sent to Berlin, and, in 1799, dispatched to Constantinople in the same capacity. Here he remained till the French were expelled from Egypt, in 1802. In 1800 he made a journey to Athens, for the purpose of recovering some of her remains of Grecian art, and was so far successful, as to make an excellent collection, which, in 1816, was purchased by the government, and placed in the British Museum, where it is known as the "Elgin Marbles." B. 1777; D. at Paris, 1841.

ELGIN, James Bruce, eighth Earl of, was in 1841 returned member of Parliament for Southampton; but on the death of his father in the same year, succeeded to the earldom, and in the following year was appointed governor of the island of Jamaica. In 1846 he became

LORD ELGIN.

governor-general of Canada, where the character of his policy rendered him an especial favourite, not only with those over whom he had been called to rule, but with the ministries in England. In 1849 he was created an English peer, and in 1854 appointed to the lord-lieutenancy of Fifeshire, Scotland. War having broken out between England and China, Lord Elgin was, in 1857, sent out by the British government as plenipotentiary to China, with the view of obtaining satisfactory terms of peace, or, if this could not be done, to prosecute the contest with vigour. The Indian mutiny of the same year, however, prevented him from carrying into effect his instructions so soon as he would otherwise have done; for not only was part of the force destined for China diverted from its route and sent to Calcutta, but he himself left Hong-Kong with all the troops that could be spared, to go to the assistance of Lord Canning. Returning to China at the end of the year, he immediately made a demand of redress for injuries sustained by the British, and, upon the refusal of the Chinese, through commissioner Yeh, to comply, Canton was attacked and captured. Lord Elgin then, in conjunction with

Baron Gros, the French plenipotentiary, determined to proceed with an armed force to the vicinity of Pekin, and reached the mouth of the Peiho river, which he found strongly defended by forts on each bank. These being taken by Admiral Sir M. Seymour, the forces proceeded to Tien-tsin, and there the plenipotentiaries were met by Chinese commissioners, to adjust the terms of a treaty. After much procrastination, on various pretexts, which were met by Lord Elgin with great determination, the commissioners agreed to execute a treaty, in conformity with the terms proposed to them, and on the 26th June, 1858, this was signed at Tien-tsin. (*See* CHINA, TIEN-TSIN, and other relative articles.) This great point gained, Lord Elgin determined to proceed to Japan, in order to obtain from that government a treaty which would throw open its ports to British commerce, so that it might participate in the advantages possessed by the Dutch. Taking with him a yacht, as a present from the queen of England to the emperor of Japan, he reached the port of Nagasaki, and proceeded up the Gulf of Jeddo, beyond where any foreign vessel had hitherto been allowed to pass. Landing at once, with drums beating and flags flying, he entered the city of Jeddo, and during a stay of eight days, and after being treated with the most friendly hospitality, a treaty was signed between Great Britain and Japan, which will, doubtless, ultimately have the effect of gradually opening up another great empire as a field for British industry and enterprise. In 1859 Lord Elgin returned to England, and was appointed to the office of postmaster-general in the Palmerston administration. In the same year the freedom of the city of London was presented to him, with a gold box of the value of one hundred guineas. B. 1811.

ELGINSHIRE. (*See* MORAYSHIRE.)

ELI, *e'-li*, high priest and judge of Israel, who attained that office about 1156 B.C. Though a good man, he was timid, and did not exert himself in correcting the immoralities of his family. His two sons, Hophni and Phineas, were most abandoned characters, on which account the Lord appeared to Samuel, and denounced judgment upon the house of Eli, who received the tidings with pious resignation. Shortly afterwards, the Israelites were defeated by the Philistines, the ark taken, and the sons of Eli slain. When the news reached him, he fell from his seat, and broke his neck, aged 98. Lived in the 12th century B.C.

ELIAB, *e-li'-ab*, 'God my father,' the elder brother of David.—Also, a brave man of Gad, in the army of David.

ELIAKIM, *e-li'-a-kim*, 'god of the resurrection,' the treasurer to King Hezekiah.

ELIAS, MOUNT, ST., a volcanic mountain of N. America. (*See* AMERICA, NORTH.)

ELIAS MOUNTS, *e-li'-as*, the name of many summits in Greece, the highest of which is in the Morea, 10 miles from Mistra. *Height*, 7,829 feet.

ELIASHIB, *e-li'-a-shib*, 'god of conversion,' a high priest of the Jews, after the captivity.

ÉLIE DE BEAUMONT. (*See* BEAUMONT.)

ELIEZER, *e-li-e'-zer*, 'God is my help,' the faithful steward of Abraham.—Also, a prophet, who reproved Jehoshaphat.

ELIHU, *e-li'-hu*, 'he is my God himself,' the youngest and wisest of the four friends of Job.

ELIJAH, *e-li'-ja*, an eminent prophet of Israel, in the reigns of Ahab and Ahaziah. He was greatly persecuted by the wife of Ahab, but escaped all her machinations, and was taken up to heaven in a chariot of fire, about 395 B.C.

ELIMELECH, *e-lim'-e-lek*, 'my God is king,' the father-in-law of Ruth.

ELIOT, John, *el-yot*, a pious divine, called the "Apostle of the Indians," was educated at Cambridge; but on embracing puritanism, he, in 1631, emigrated to New England, and became pastor of a congregation of Independents at Roxbury, where he established a grammar-school. In 1646 he began to learn the Indian language, that he might devote himself to the conversion of the natives. In this he met with great success, and obtained a considerable influence over the various tribes. He translated the Bible into their language, and several pieces of practical divinity. B. 1604; D. at Roxbury, 1690.—Baxter says of this divine, "There was no man on earth whom I honoured above him." A handsome memorial, to perpetuate his name, was erected in the "Forest Hills Cemetery," at Roxbury.

ELIOTT, George Augustus, Lord Heathfield, when young, was sent to Leyden, and thence to the military school in Picardy. He afterwards entered the Prussian service as a volunteer, and returned to Scotland in 1735. Not long after this, he joined the engineer corps at Woolwich, and obtained an adjutancy in the 2nd troop of horse grenadiers, with which he went to Germany, and was wounded at the battle of Dettingen. In 1759 he was appointed to raise the 1st regiment of light horse, with which he served on the continent with great reputation. On his recall from Germany, he was sent to the Havannah, in the reduction of which he had an eminent share. At the peace, the king conferred on his regiment the title of royal. In 1775 General Eliott was appointed commander-in-chief in Ireland, whence he returned soon after, and was made governor of Gibraltar, for which important post no man could have been better fitted. He was very abstemious, his constant food being vegetables, and his drink water. He never allowed himself more than four hours' sleep at a time, and was so accustomed to a hardiness, that it became habitual, and enabled him to defend that important fortress against the formidable operations of the French and Spaniards, in 1782, with such persevering obstinacy, that the siege of Gibraltar will be found one of the most glorious incidents in military history. On his return to England, he was raised to the peerage by the title of Lord Heathfield and Baron Gibraltar. B. in Roxburghshire, Scotland, 1718; D. at Aix-la-Chapelle, 1790.—Lord Heathfield married Anne, daughter of Sir Francis Drake, of Devonshire, who died in 1769, leaving one son and a daughter. His remains were brought to England, and buried at Heathfield, in Sussex, where a monument was erected to his memory.

ELIPHAZ, *e-li'-faz*, 'the endeavour of God,' a son of Esau.

ELIS, *e'-lis*, a country of Peloponnesus, lying to the W. of Arcadia and N. of Messenia. It runs along the coast, and is watered by the river Alpheus. It was famous for the horses it produced, whose speed was so well known and tried at the Olympic games.

ELISABETH, *e-liz'-a-beth*, 'God hath sworn,' the wife of Zacharias, and mother of John the Baptist.

ELISAVETHGRAD, *ai-le-za-vet'-grad*, a town and fortress of European Russia, in the government of Cherson, or Kerson, on the Ingul, 130 miles from Cherson. It is a military place, and has a magazine and an hospital. *Pop.* 10,000.

ELISAVETOPOL, or GANJEH, *ai-le-za-vet'-o-pol*, a fortified town of Georgia, 90 miles from Tiflis. In its neighbourhood are two villages,—Anenfeld and Helmendorf, peopled by Germans. *Pop.* 12,000.

ELISHA, or ELISEUS, *e-li'-sha*, 'salvation of God,' a Hebrew prophet, and the successor of Elijah, who called him from the plough. He performed numerous miracles, and was held in great respect by the kings of Israel and Syria. D. about 830 B.C.

ELISHEBA, *e-lish'-e-ba*, 'God hath sworn,' the wife of Aaron.

ELISSA, *e-lis'-sa*. (*See* DIDO.)

ELIZABETH, *e-liz'-a-beth*, the name of numerous townships and other places in the United States, none of them with a population above 4,000.

ELIZABETH, CAPE, the N.E. point of entrance into Cook's Inlet, N. America. *Lat.* 59° 9′ N. *Lon.* 151° 3′ W.

ELIZABETH PORT is situate on the W. side of Algoa Bay, Cape Colony, and is the most frequented seaport along the S. coast of Africa. *Pop.* of district, 4,300.

ELIZABETH, queen of England, was the daughter of Henry VIII. by Anne Boleyn, who was beheaded in 1536. She was educated in the Protestant religion, and, in the previous reign, was sent to the Tower, whence she was afterwards removed to Woodstock, where she was kept till 1555, and then taken to the royal palace of Hatfield. On the death of her sister, in 1558, she was proclaimed queen, and Philip of Spain, the husband of Mary, made her an offer of marriage, which, after a considerable amount of coquetting, she civilly declined. Now was commenced

the restoration of those religious reforms which had been proscribed in the previous reign, but with that prudence and moderation, which showed how well qualified she was to govern the destinies of the people, over whom she had been called to reign in such troublous times. One of her first measures was to send succours to the reforming party in Scotland, which produced the treaty of Edinburgh and the departure of the French from that country. She next gave her assistance to the French Huguenots, who put Havre de Grâce into her hands, whilst she continued gradually to tighten the reins of government upon her own Catholic subjects, and such other religionists as would disturb the peace of the state by their zeal and violence. Dudley, earl of Leicester, became her favourite, and had the ambition to aspire to her hand; she, however, preferred to make an apparent effort to unite him to Mary, queen of Scots. In 1568 that unfortunate princess fled to England for protection from the religious persecution of her subjects; but being a Catholic, and having offended Elizabeth, she was taken prisoner, and after being kept many years in confinement, was at last beheaded in Fotheringay Castle. The treatment of Mary, queen of Scots, against whom she would appear to have contracted a feeling of jealousy, is one of the blackest spots in the reign of Elizabeth. She afterwards endeavoured to clear herself of the odium which the death of Mary raised against her, and caused Davison, her secretary, to be prosecuted for issuing the warrant for the execution; but such conduct only made her guilt more transparent in the eyes of the penetrating and thoughtful. The French and Spaniards having formed a league for the extirpation of heresy, Elizabeth was induced to protect the Protestants; and her assistance was of great effect in bringing about the separation of the United Provinces from the dominion of Philip II. The king of Spain, in return, sent a body of troops to invade Ireland; but they were all cut off by Lord Grey, the deputy. In the mean time, various offers of marriage were made to the queen, the most remarkable of which was that of the duke of Anjou, who came to England for the purpose of espousing her; but after staying some time, and after Elizabeth had taken up the pen to sign the marriage articles, she withdrew her hand, and broke off the alliance. In 1588, Philip of Spain sent against England his famous armada, to which the pope gave the appellation of Invincible. It consisted of 130 vessels, carrying 2,431 pieces of artillery, 4,575 quintals of powder, and manned with about 27,000 soldiers and seamen. To oppose this formidable force, Elizabeth had 181 ships, manned by about 18,000 sailors. On this occasion the queen distinguished herself by her great presence of mind and inflexible courage. She rode on horseback through the camp at Tilbury, and inspired her people with heroism by her deportment and her speeches. The English fleet, however, assisted by the winds, prevented the Spaniards from landing, and the boasted armada was destroyed. The duke of Medina, who commanded the Spanish fleet, escaped, and arrived at Santander, in the Bay of Biscay, with no more than 60 sail out of his whole fleet, and these very much shattered. In speaking of this victory, Camden says, "Several monies were coined; some to commemorate the victory, with a fleet flying with full sails, and this inscription, *Venit, vidit, fugit*,—'It came, it saw, it fled;' others in honour of the queen, with fireships and a fleet all in confusion, inscribed *Dux fœmina facti*,—'A woman the leader of the exploit.'" In this same year, Leicester, her favourite, died, when Robert Devereux, earl of Essex, took his place; but this nobleman, on account of treason, was executed in 1601. After this event she seems to have become weary of the world, for she never recovered the shock which the signing of the death-warrant of Essex gave her. B. at Greenwich, 1533; D. 1603.—Elizabeth was endeared to her subjects by the glory of her reign, by the wisdom of her measures, and by the frugality of her administration, which rendered the public taxes few and light. She had, however, much vanity, thought herself the most beautiful and accomplished of women, and was, besides, violent and haughty in her temper. She understood the learned languages, and some of her letters and prayers, written with her own hand, are extant.

ELIZABETH of Austria, daughter of the emperor Maximilian II., and married to Charles IX. of France, in 1570. She sent to Margaret, queen of Navarre, two books of her writing; one on the Word of God, and the other a relation of the chief events in France, during the time she resided there. B. 1554; D. in a convent, 1592.

ELIZABETH PETROVNA, daughter of the czar Peter the Great. In 1741 she usurped the imperial throne, by dethroning the infant Ivan, which was effected without the shedding of blood. At her accession, she made a vow that no capital punishments should take place in her reign. But her humanity was at least equivocal, as she afterwards inflicted upon the countesses Bestuchef and Lapoukin the punishment of the knout, and had their tongues cut out, for betraying some of her secret amours. Though dissolute in her manners, she was extremely superstitious, and performed her devotions with rigorous exactness. In 1756 she joined Austria and France against Prussia, and died in 1761. B. 1709.

ELIZABETHTOWN, numerous townships in the United States, none of them with a population above 3,000.

ELK, *elk*, a river rising on the W. side of Cumberland Mountains, Tenessee, U.S., and joining Tenessee river 40 miles from Creek's Crossing-place.

ELKANAH, *el-kai'-na*, 'God the jealous,' the father of the prophet Samuel.

ELK CREEK, a river of Pennsylvania, U. S., uniting with Penn's Creek, and falling into the Susquehannah 5 miles below Sunbury.—2. Another in Ohio, which joins the Miami, in Madison, Butler county.

ELKHART, *elk'-hart*, a county in the N. of Indiana. *Area*, 460 square miles. *Pop.* 13,000.

EL-KHARGEH, *kar'-gai*, a town of Upper Egypt, the capital of the Great Oasis. It has a necropolis and some remarkable ruins. *Pop.* 6,000. *Lat.* 25° 28' N. *Lon.* 36° 40' E.

ELLAND, *el'-land*, a chapelry of England, in the W. Riding of Yorkshire, 4 miles from Halifax. *Manf.* Coarse woollens. *Pop.* 7,500. A station on the Manchester and Leeds Railway.

ELLENBOROUGH, *el'-len-bru* (r), a village of England, in Cumberland, 6 miles from Cockermouth. *Pop.* 1,000.

ELLENBOROUGH, Edward Law, first Earl of, was the son of the first Lord Ellenborough, and in 1818 succeded to the peerage as second baron. In 1828 he was made president of the Board of Control, which office he filled under the administrations of the duke of Wellington and Sir Robert Peel. In 1842 he superseded the earl of Auckland as governor-general of India, and under his government, Scinde was annexed to the British crown. In 1843 he was recalled, contrary to the wishes of the government of Sir Robert Peel, who, in 1845, appointed him first lord of the Admiralty. In the following year, with the fall of the ministry, he resigned his post, and after that time discussed in the House of Peers the affairs of India with considerable ability. In 1858 he was appointed, under the Derby administration, president of the Board of Control, which office he resigned the same year, in consequence of the censure inflicted on a severe letter written by him to Lord Canning, in reference to a proclamation issued by that nobleman, in his capacity of governor-general of India. B. 1790.

ELLESMERE, *els'-meer*, a town and parish of Wales, 16 miles from Shrewsbury. It is the head of a poor-law union. *Pop.* 7,000.

ELLESMERE, Francis Leveson Gower, Earl of, brother of the present duke of Sutherland, distinguished himself by several translations from the German, and, from 1826 to 1830, represented Sutherlandshire in the House of Commons. In 1827 he was appointed one of the lords of the Treasury; in the following year he became secretary for Ireland, and in 1830, secretary at war. On the death of his father, in 1833, he took the name of Egerton, and as Lord Francis Egerton, represented South Lancashire from 1835 to 1846. In this last year he was created earl of Ellesmere and Viscount Brackley, and in 1849 was elected president of the Asiatic Society. In 1855 he was created a knight of the Garter, and became colonel-commandant of the Lancashire yeomanry cavalry.

Besides translations, he has written works, in the form of tragedy, history, and biography, of considerable merit. His gallery of paintings is, perhaps, the finest possessed by a private individual in the kingdom. B. in London, 1800.

ELLIOTSON, Dr. John, *el'-yot-son*, a distinguished English physician, who, from the opposition which his views met with in reference to the mesmeric treatment of patients, resigned some important appointments, and, in 1849, became physician to a mesmeric hospital in London. He has been an unflinching advocate of what he deems the truths of mesmerism; has made considerable contributions to medical science, and is a fellow of the Royal College of Physicians, of the Royal Society, and the founder and president of the London Phrenological Society. B. in London, about 1800.

ELLIOTT, Ebenezer, *el'-yot*, an English poet, who was an iron-merchant at Sheffield, and became famous as a writer of "Rhymes" against the "Corn Laws." These first appeared in a local paper, after their author had settled at Sheffield, and produced a powerful effect upon all who read them. When they re-appeared in a single volume, in conjunction with "The Ranter," he no longer sung in comparative obscurity, but commanded a wide circle of admirers. In 1834 a collected edition of his works was published. His effusions have procured for him the right of being emphatically the bard of Yorkshire, as he is certainly, like Crabbe, the poet of the poor and of the Corn-law struggle, before that ended in the triumphal achievement of the aspirations of his muse. B. near Rotherham, Yorkshire, 1781; D. near Barnsley, 1849.

ELLIS, John, *el'-lis*, an English poet, brought up a scrivener, and for many years deputy of his ward, and master of the Scriveners' Company. Mr. Ellis was the intimate friend of Dr. Johnson, and wrote several pieces in "Dodsley's Collection." He also published separately, "The Surprise, or Gentleman turned Apothecary," a tale in Hudibrastic verse; and "A Travesty of the Canto added by Maphæus to the Æneid." B. in London, 1698; D. 1791.—In reference to this person, Dr. Johnson remarks to Boswell, "It is wonderful what is to be found in London. The most literary conversation that I ever enjoyed, was at the table of Jack Ellis, a money-scrivener, behind the Royal Exchange, with whom, at one period, I used to dine, generally once a week."

ELLIS, George, one of the authors of the "Rolliad," to which he contributed "The Birthday Ode," "The Ode on Dundas," &c., and was also a writer of the "Probationary Odes," and an acute contributor to the "Anti-Jacobin." His greatest work, however, is his "Specimens of the Early English Poets," which suggested Southey's "Specimens of the Later English Poets." He also produced "Specimens of the Early English Romances in Metre," which is another excellent work. B. 1745; D. 1815.—Sir Walter Scott addressed to Ellis the 5th canto of "Marmion," and says, "He was the first converser I ever saw. His patience and good-breeding made me often ashamed of myself, going off at score upon some favourite topic."

ELLIS, Sir Henry, an English writer, who became connected, as a librarian, with the British Museum in 1805, and, in 1827, was made principal, which office he held till 1856, when he resigned it. During that time, he produced many antiquarian works; among which was an edition of "Brande's Popular Antiquities," which is highly esteemed. He also published original letters illustrative of English history, from autographs in the British Museum; and, in 1816, wrote the general introduction to the "Doomsday Book," which is considered an able performance. In 1832 he was created a knight of the Royal Hanoverian Guelphic order, and, in 1838, was raised to the rank of knight bachelor. B. in London, 1777.

ELLIS, Mrs. Sarah Stickney, the wife of the Reverend William Ellis, officially connected with the London Missionary Society, was one of the most fruitful writers of her time. As a poetess she received well-deserved praise, whilst, as a prose writer, she held a highly respectable rank, especially among those whose productions have a special reference to the social condition of women. A bare enumeration of her works would occupy a considerable space; but those which are, perhaps, best known to the public, may be specified as suggestive of the moral tone of her works. "The Wives of England," "The Daughters of England," "The Women of England," "The Mothers of England," "Look to the End," &c. All these have, more or less, a character of practical good, conveying, in a meek and modest spirit, the best advice, and having in view the special improvement and edification of her own sex.

ELLISTON, Robert William, *el'-lis-ton*, a celebrated English actor, who was esteemed the best comedian of his time. "The Venetian Outlaw" was the only literary work he produced. B. in London, 1774; D. 1831.

ELLWOOD, Thomas, *el'-wood*, was bred in the Church of England, but was converted to Quakerism, through which he lost the favour of his father. He became reader to Milton, suffered imprisonment for his profession, and wrote a number of books in its defence. He also edited George Fox's Journal, and published a "History of the Old and New Testament;" a sacred poem on the life of David, &c. B. 1639; D. 1713.

ELM, *elm*, a parish and village of Switzerland, 10 miles from Glarus. *Pop.* 1,000.—Although this place is 3,182 feet above the level of the sea, it is so encompassed by mountains, that, during six months in the year, it is an entire stranger to the rays of the sun.

EL MASARAH, *el mas-a-ra'*, a village of Egypt, opposite the site of ancient Memphis, 10 miles from Cairo. It has extensive quarries, to which a railway is laid down.

ELMES, James, *elms*, was brought up for an architect, but became rather an expounder than a professor of the science in the pursuit of which he began life. He wrote largely on architecture, the fine arts, and edited "Elmes's Quarterly Review," to which Haydon contributed. He also produced a "General and Bibliographical Dictionary," and contributed to the "Encyclopædia Metropolitana." B. in London, 1782.

ELMINA, or ST. GEORGE DEL MINA, *el-me'-na*, the capital of the Dutch settlements in Western Africa, and the strongest fortress on the Gold Coast. *Pop.* 10,000 blacks. *Lat.* 5° 4′ 45″ N. *Lon.* 1° 20′ 30″ W.

ELMIRA, or NEWTON, *el-mi'-ra*, a post-township of Chemung county, New York, U.S., 160 miles from Albany. *Pop.* 8,600.

ELMORE, Alfred, A.R.A., *el'-mor*, an Irish artist, whose pictures of the "Crucifixion" and the "Martyrdom of Thomas à Becket" brought him prominently into notice in 1840; after which time he became a pretty regular contributor to the walls of the Royal Academy. His works are numerous; among which we may specify "The Inventor of the Stocking-loom" as, perhaps, one of the best known. B. at Clonakilty, Cork, 1816.

ELMSHORN, *elms'-horn*, a town of Denmark, Holstein, on the Elbe, 10 miles from Gluckstadt. It has an active corn-trade. *Pop.* 6,000.—A station on the Kiel and Altona Railway.

ELMSLEY, Peter, *elms'-le*, an eminent littérateur, and early contributor to the "Edinburgh Review," and also to the "Quarterly Review," on literary subjects. He became Camden professor of modern history at the University of Oxford, and was, besides, principal of St. Alban's Hall. As a Greek scholar, he was highly distinguished. B. in London, 1773; D. 1825.

ELNATHAN, *el-nai'-than*, 'God has given,' a nobleman of Jerusalem, father-in-law of King Jehoiakim.

ELNE, *eln*, a town of France, in the department of the Pyrénées Orientales, 8 miles from Perpignan. *Pop.* 2,300.—This is the ancient Illiberis, where Hannibal first encamped after passing the Pyrenees.

ELNE, *eln*, a river of England, falling into the Irish Sea, near Workington.

EL-OBEID, *el o'-baid*, the capital of Kordofan, Africa, 230 miles from Sennaar. The dwellings are mostly composed of reeds, or straw, and sun-dried bricks. The inhabitants traffic in gold, hides, ivory, gum-arabic, and slaves. *Pop.* 30,000.

ELON, *e'-lon*, 'oak,' or 'grove,' a judge of Israel.

ELORA, or ELLORA, *el-o-ra'*, a town of Hindostan, in the dominions of the Nizam. The cave-temples of this place surpass all others of the kind in India, in point of magnitude and execution. *Lat.* 20° N. *Lon.* 76° E.

ELPENOR, *el-pe'-nor*, one of the companions of Ulysses, changed into a hog by Circe's potions, and afterwards restored to his original shape. He fell from the top of a house where he was sleeping, and was killed.

ELPHIN, *el'-fin*, a parish, town, and bishop's see of Connaught, Ireland, 18 miles from Longford. *Pop.* of parish, 4,800; of town, 1,300.—This diocese comprises 76 parishes, in different counties.

ELPHINSTONE, William, *el'-fin-stone*, a bishop of Aberdeen, who founded the college which takes his name, in that city. He was also the principal means of establishing the Grayfriars' convent and the chapel royal at Stirling. B. at Glasgow, 1437; D. at Edinburgh, 1514.

ELPHINSTONE, the Honourable Mountstuart, joined the Bengal civil service at the age of 18, and was very early an *attaché* to the political resident at the court of the Peshwah, adoptive father of Nana Sahib, the Cawnpore slaughterer, when the duke of Wellington visited it, at the commencement of the present century. He then became attached to the duke's suite, and acted as his aide-de-camp at the battle of Assaye. He was afterwards resident at Nagpore, envoy to Cabul, and, in 1816, when the marquis of Hastings took the command of the armies of the three presidencies against the confederated Mahratta powers, of which the Peshwah was the chief, Mr. Elphinstone was the British representative at his court, and penetrated the inmost soul of Nana Sahib's worthy sire, although the latter had succeeded in making Sir John Malcolm believe that he was a faithful ally of the English. In the course of a few weeks, Elphinstone's opinion of the Peshwah was verified to himself by his being burnt out of his own ambassadorial dwelling by the emissaries of this friend; and he reached the British camp with nothing except the horse he rode and the clothes he wore. In 1820 he became governor of Bombay, to which presidency the Peshwah's country was attached, and during the seven years he ruled Western India, the Elphinstone code became law, and, for its brevity, its completeness, its clearness, its enlightened provisions, might be compared to the Code Napoléon, in imitation of which its leaves were coloured. The education of the upper classes was commenced, and, on the principles he advocated, extended itself far and wide among the natives. At the close of his administration, in 1827, he left India, when, in addition to the presentations of addresses from all classes, a college, called after him, was established by the natives; his statue by Chantrey adorns the town-hall, and other substantial tokens of respect and affection were offered. (*See* BOMBAY.) After his arrival in England, he produced his "History of India." It is said he was subsequently offered the peerage twice, with the high offices of governor-general of India and of Canada. On her majesty's accession, a deputation of the directors of the late East-India Company waited upon him to ask him to accept the order of the Bath, and a seat in the privy council. Other honours, which men esteem gorgeous appendages, were also offered, and in turn declined. D. 1859.

ELSINORE, or ELSINEUR, *el'-se-nor*, a seaport of Denmark, on the E. coast of the island of Zealand, 24 miles from Copenhagen. It stands in the narrowest part of the Sound, on a declivity inclining towards the shore. It has no harbour, but an excellent roadstead, generally crowded with vessels going up or down the Baltic, and anchoring here to take in stores of some kind or other, the supply of which forms the great traffic of the place. On its N.E. side is the fortress of Kronborg. *Pop.* about 10,000. *Lat.* 56° 2′ 11″ N. *Lon.* 12° 36′ 40″ E.—This town is the scene of Shakspeare's tragedy of "Hamlet," and the vaults of the castle of Kronborg are the fabled residence of Holger Danske, the mythic hero of the Danes. In the same fortress, Caroline Matilda, sister of George III. of England, and wife of Christian VII. of Denmark, was imprisoned. The Sound dues were here collected from all merchant vessels, except those of Sweden and Denmark. They were originally instituted for keeping up lights and landmarks on the Cattegat and neighbouring coasts. In April, 1857, a treaty was concluded between Denmark and the principal European powers, for the redemption of the Sound dues, the sum paid by Great Britain, as its share of the compensation, being £1,125,206.

ELSTER, *els'-ter*, two rivers of Germany, one of which, the White Elster, rises in Voightland, Bohemia, and falls into the Saale, 3 miles from Halle; the other, called the Black Elster, rises 2 miles from Elstra, in Saxony, and falls into the Elbe, 8 miles from Wittemberg.

ELTHAM, *elt'-ham*, a town and parish of England, in the county of Kent, 7 miles from London. *Pop.* 2,700.

ELTON, *el'-ton*, a salt-lake of Russia, 160 miles from Saratov. *Area*, 130 square miles. 100,000 tons of salt are annually obtained from this collection of water.

ELTON, the name of several parishes in England, none of them with a population above 1,000.—Also a township of Lancashire, 14 miles from Bury. *Pop.* 6,500.

EL-TYH, DESERT OF, *el-ti*, was the place wherein the Hebrews sojourned 40 years. It is applied to the peninsula between the gulfs of Suez and Akabah, and Egypt and Palestine.

ELVAS, *ail'-vass*, a strong frontier town of Portugal, in the province of Alentejo, situate on a rocky hill, not far from the Guadiana, and 10 miles from Badajoz. It is one of the most important strongholds in the kingdom, and has a cathedral, several churches, convents, college, seminary, hospital, arsenal, and a bomb-proof barracks capable of containing 6,000 or 7,000 men. It is supplied with water by a Moorish aqueduct. *Manf.* Jewellery and arms. *Pop.* 17,000.—In 1808 it was captured and held for five months by the French.

ELWES, John, *el'-wes*, an extraordinary miser, whose family name was Meggot, which he altered, in pursuance of the will of Sir Harvey Elwes, his uncle, who left him at least 250,000*l.* At this time, he was possessed of nearly as much of his own, and was in the habit of attending the most noted gaming-houses. After sitting up a whole night at play, he would proceed to Smithfield to meet his cattle, which were coming to market, from his seat in Essex, and there stand disputing with a butcher for a shilling. If the cattle did not arrive, he would walk on to meet them. More than once he walked, without stopping, the whole way to his farm, which was 17 miles from London. He would walk in the rain in London sooner than pay a shilling for a coach; sit in wet clothes to save the expense of a fire; eat his provisions in the last stage of putrefaction, and he once wore a wig a fortnight which he had picked up in a lane. In 1774 he was chosen knight of the shire for Berkshire, his conduct in parliament being perfectly independent. B. about 1712; D. 1789, leaving a fortune of half a million sterling, besides entailed estates.

ELY, ISLE OF, *e'-le*, a district lying in the N. part of Cambridgeshire, from the rest of which it is cut off by the river Ouse. It consists mostly of fens, interspersed with small hills, usually crowned with villas. Strictly speaking, the isle is about 7 miles long, by 4 broad, and is encompassed by a marsh, formerly covered with water. The soil is extremely fertile. *Pop.* 62,000. (*See* BEDFORD LEVEL.)

ELY, a city and episcopal see of England, and capital of the above district, 16 miles from Cambridge. It consists of one principal and some smaller streets, and is noted for its fine and venerable cathedral, built between the reigns of William Rufus and Edward III. It is the only city of England which is unrepresented in the House of Commons. Its bishopric was founded in 1107, and now comprises several parishes in Bedford, Cambridge, and Huntingdon. *Pop.* 6,200.—Ely cathedral has been, during the last few years, repaired, and superbly adorned.

ELY, a demesne of Ulster, Ireland, 4 miles from Enniskillen. It includes several woody islets about the head of Lower Lough Erne.

ELYMAS, *el'-e-mâs*, 'a magician,' a sorcerer of Paphas, in Cyprus.

ELYSIUM, and ELYSII CAMPI, *e-lis'-e-um*, a place or island in the infernal regions, where, according to the mythology of the ancients, the souls of the virtuous were placed after death, and where complete happiness was found. The Elysian fields were, according to some, in the Fortunate Islands, off the coast of Africa, in the Atlantic. Others place them in the island of Leuce, and according to the authority of Virgil, they were

situate in Italy; according to Lucian, they were near the moon; and to Plutarch, in the centre of the earth.

ELZEVIR, *el'-ze-vir*, a family of famous printers at Amsterdam and Leyden. There were five of this name, —Lewis, Bonaventure, Abraham, Lewis, and Daniel. Lewis began to be known at Leyden in 1595, and was the first who made the distinction between the *v* consonant and the *u* vowel. Daniel died in 1680. He published, at Amsterdam, in 12mo, 1674, a catalogue of books printed by his family.—A fount of type is called by their name at the present day.

EMANUEL, *e-măn'-u-el*, king of Portugal, succeeded John II. in 1495. He restored the nobility to their privileges, and greatly encouraged maritime expeditions, by one of which a new passage to India was discovered by Vasco da Gama, and to Brazil, in 1501, by Cabral. Emanuel also sent an expedition to Africa, and established a commercial intercourse with the kingdom of Congo. D. 1521.

EMBDEN, or EMDEN, *em'-den*, a fortified seaport-town of Hanover, at the mouth of the river Embs, or Ems, with a spacious and secure harbour, 15 miles from Aurich. It is intersected by canals, which are numerously bridged, and impart to it all the appearance of a Dutch town. The principal buildings are the great church, erected in 1455, other churches, a town-house, court-house, custom-house, barracks, gymnasium, educational establishments, and benevolent institutions. *Manf.* Hosiery, leather, soap, and tobacco. There are shipbuilding-docks, and it carries on a considerable trade in oats, barley, butter, and cheese. *Pop.* about 15,000. *Lat.* 53° 22′ 6″ N. *Lon.* 7° 12′ 45″ E.

EMERSON, William, *em'-er-son*, an English mathematician, who began life as a schoolmaster, but quitted that employment, and contented himself with a small paternal estate. He was a profound mathematician, but of singular habits, vulgar in his manners, fond of low company, and extremely shabby in his dress. He always walked to London when he had anything to publish, and carefully revised every sheet himself. B. in the bishopric of Durham, 1701; D. there, 1782.—He wrote treatises on Fluxions, Mechanics, Algebra, Optics, Astronomy, Navigation, Arithmetic; a Commentary on the Principia of Newton, and several other esteemed works.

EMERSON, Ralph Waldo, an American essayist, was the son of a Unitarian minister of Boston, U.S., and designed for the same profession. The peculiarity of his views, however, led him into other studies, which broke his connection with the religious body to which he belonged. After publishing several essays or orations, he, in 1840, started a publication called the "Dial," devoted to the discussion of prominent questions in philosophy, history, and literature. It lived for four years, during which period Mr. Emerson kept himself before the public by delivering orations upon popular subjects. In 1844 he published "Lectures on New England Reformers," and subsequently lectured on Swedenborg, Napoleon, and other eminent men. In 1846 appeared a volume of poems, and in 1849 he visited England, where he delivered a series of lectures, and afterwards published them, under the title of "Representative Men." Soon after, he published "English Traits," embodying some of his observations on English manners, customs, and characteristics. Besides these more especial labours, he has contributed to various reviews and other periodicals. B. at Boston, U.S., 1803.

EMMA, *em'-ma*, daughter of Richard II., duke of Normandy, and mother of Edward the Confessor, king of England. She was first married to Ethelred, who was obliged to flee to Normandy with his sons Alfred and Edward, when the Danes invaded the kingdom. After his death she married Canute. In the reign of her son, the earl of Kent accused her of a too intimate familiarity with her relation, the bishop of Winchester. To prove her innocence, she is said to have walked barefoot over burning ploughshares without being hurt. Lived in the 11th century.

EMMANUEL, *em-măn'-u-el*, 'God with us,' a title of Christ, indicating the mystery and reality of his being God in human nature. It is the name under which the prophet Isaiah designates the Messiah.

EMMEN, *em'-men*, two rivers of Switzerland, one rising in the Bernese Oberland, and, after a course of 45 miles, joining the Aar, 2 miles from Soleure; the other also rising in the Bernese Oberland, and, after a course of 30 miles, joining the Reuss, 2 miles from Lucerne. The valley of the first is one of the finest in Switzerland, and is famed for its cattle and horses, as well as its forest and flax culture.

EMMERICH, *em'-mer-ik*, a town of Prussia, on the Rhine, 5 miles from Cleves. It is encompassed with walls and ditches, and has several churches, a gymnasium, orphan hospital, and ecclesiastical seminary. *Manf.* Woollens, hosiery, hats, soap, leather, and tobacco. *Pop.* 7,000.

EMMOR, *em'-mor*, 'an ass,' a prince of Shechem.

EMPEDOCLES, *em-ped'-o-klees*, a philosopher, poet, and historian of Agrigentum, in Sicily. He adopted the doctrine of the metempsychosis, and wrote a poem on the system of Pythagoras, very much commended. His poetry was bold and animated, and his verses were so universally esteemed, that they were publicly recited at the Olympic games with those of Homer and Hesiod. It is said that his curiosity to visit the flames of the crater of Etna, proved fatal to him. Some maintain that he wished it to be believed that he was a god, and, that his death might be unknown, he threw himself into the crater, and perished in the flames. His expectations, however, were frustrated by the volcano throwing up one of his sandals, which discovered to the world that Empedocles had perished by fire. Others report that he lived to an extreme old age, and that he was drowned in the sea. Lived in the 5th century B.C.

EMPSON, Sir Richard, *emp'-son*, the son of a sievemaker at Towcester, Northamptonshire, who became a favourite with Henry VII., and, on account of his oppressions, rendered himself odious to the nation. He was beheaded with his coadjutor Dudley, in 1510.

EMS, *ems*, a river of Germany, rising in Lippe Detmold, traversing Westphalia, and, after a course of 150 miles, falling into the bay of Dollart, in the North Sea, a little below Embden.

EMS, a watering-place of Nassau, on the Lann, 5 miles from Nassau. It consists mostly of a long row of lodging-houses, which are occupied by the numerous visitors to the springs. *Pop.* 2,500.—The springs vary in temperature from 93° to 103° Fahr., and have long enjoyed a European celebrity.

EMSWORTH, *emz'-werth*, a town of Hampshire, 9 miles from Portsmouth. *Manf.* Sail-cloth, fishing-nets, rope, and twine. *Pop.* 1,200.—A station on the Chichester and Portsmouth Railway.

ENARA, *ai-nar'-a*, a lake of Russian Lapland, containing numerous islands, and communicating with the Arctic Ocean by the Patsjoki river. *Area*, 680 square miles. *Lat.* 69° N. *Lon.* 28° E.

ENAREA, *e-nair'-e-a*, a country of N.E. Africa, whence all the coffee and a large proportion of the slaves brought through Abysinnia, are transported, to be sold at the various marts in the N. and E. parts of the country. *Lat.* between 7° and 8° N. *Lon.* between 36° and 37° E.

ENCELADUS, *en-sel'-ă-dus*, a son of Titan and Terra, the most powerful of all the giants who conspired against Jupiter. He was struck with Jupiter's thunders, and imprisoned under Mount Etna. Some suppose that he is the same as Typhon. According to the poets, the flames of Etna proceeded from the breath of Enceladus; and as often as he turned his weary side, the whole island of Sicily felt the motion, and shook to its very foundation.

ENCKE, Johann Franz, *enk*, a German astronomer, director of the royal observatory at Berlin. He enlarged the boundaries of astronomical science, and resolved the orbit of the comet called after his name, which was seen by Rumker, in New South Wales, in 1822. B. at Hamburg, 1791.

ENCOUNTER BAY, *en-koun'-ter*, lies to the E. of Kangaroo Island, in S. Australia. *Lat.* 35° 30′ S. *Lon.* 139° E.

ENDEAVOUR STRAITS, *en-dev'-or*, a channel separating the island of New Guinea from the N.W. coast of Australia. *Lat.* 10° 45′ S. *Lon.* 142° 10′ E.—Also a RIVER of E. Australia, entering the Pacific in *lat.* 15° 26′ S.; *lon.* 121° 42′ E.

ENDERBY, *en'-der-be*, the name of several parishes in England, none of them with a population above 1,400.

ENDERLY LAND, *en'-der-le*, a large tract of land in the Antarctic Ocean, discovered in 1831, by Biscoe. *Lat.* 67° 30′ S. *Lon.* 50° E.

ENDOR, *en'-dor*, 'fountain of generation,' a city near Mount Tabor.

ENDRICK, *en'-drik*, a river of Scotland, rising in the county of Stirling, and falling into Loch Lomond, 14 miles from its source.

ENDYMION, *en-dim'-i-on*, a shepherd, son of Æthlius and Calyce. It is said that he asked Jupiter to grant him to be always young, and to sleep as much as he would; whence came the proverb of *Endymionis somnum dormire*,—'to sleep the sleep of Endymion.' Diana, or the moon, saw him unclothed as he slept on Mount Latmos, and became enamoured of his great beauty, coming down every night from heaven to visit him. This fable arises from Endymion's knowledge of astronomy, and particularly his observation of the moon's motion. The people of Heraclea maintained that Endymion died on Mount Latmos, while the Eleans pretended to show his tomb at Olympia, in Peloponnesus.

ENFIELD, *en'-feeld*, a town and parish of Middlesex, 10 miles N.E. from London. *Pop.* 9,500. It was once famous for an extensive royal chase, disforested in 1779, and for a royal palace, whence Edward VI. went in procession to the Tower, on his accession to the throne. After Queen Elizabeth, it was alienated from the crown. The British government has an armoury here, and the "Enfield rifle" takes its name from this place.

ENFIELD, several townships in the United States, none of them with a population above 4,500.

ENFIELD, William, a dissenting minister, who was educated under Dr. Ashworth, at Daventry, and, in 1763, became minister of a congregation at Liverpool. About 1770 he removed to Warrington, as tutor in the belles-lettres in the academy there. During his stay at Warrington, he published several works; as, the "History of Liverpool," "Institutes of Natural Philosophy," &c. In 1785 he undertook the pastoral care of a congregation at Norwich, and continued there till his death in 1797. B. at Sudbury, 1741.—He is best known as the author of "The Speaker," a school-book of general use. He published also a volume of Prayers and Hymns; "Biographical Sermons;" a "History of Philosophy," in 2 vols. 4to; and two volumes of Sermons.

ENGADINE, *en-ga-deen'*, a beautiful valley of Switzerland, in the Grison country, extending along both sides of the upper part of the Inn. *Length*, 45 miles, with an average width of 1½. *Pop.* 10,000. This valley is subdivided into the Ober and Unter Engadine, and has an elevation of 5,750 feet above the level of the sea.

ENGANO, or PUGNIATAN, *en-ga'-no*, an island of the Malay Archipelago, lying off the south-west coast of Sumatra. It has a circuit of about 30 miles, and is lofty and well-wooded. *Lat.* 5° 21′ S. *Lon.* 102° 20′ E. —Another small island on the coast of Papua.—A CAPE at the N.E. extremity of the island of Luzon, one of the Philippines. *Lat.* 18° 40′ N. *Lon.* 122° 20′ E. —Also the most E. CAPE of Hayti. *Lat.* 18° 35′ N. *Lon.* 68° 20′ W.

ENGEDI, *en-ge'-di*, a town on the Dead Sea.

ENGEN, *eng'-en*, a town of Baden, 22 miles from Constance, where the Austrians were defeated by the French in 1800.

ENGHIEN, *ong'-e-ĕ*, a town of Belgium, 15 miles from Brussels. *Pop.* 3,750. Here is a superb castle, with a park and gardens.—This place gives a ducal title to a prince of the house of Bourbon Condé.

ENGHIEN, Louis Antoine Henry de Bourbon, Duc d', son of the duke of Bourbon, and grandson of the prince of Condé. This amiable young prince resided at a seat which had been left him by his great-uncle, the cardinal prince de Rohan, in the principality of Ettenheim, belonging to the elector of Baden. Here he devoted himself, under the misfortunes of his family, to the cultivation of his estate. Whilst thus occupied, the agents of Napoleon I. came by night, and having seized him in his bed, hurried him to France, where he was tried by a mock tribunal for taking up arms against his country in the time of Robespierre, and condemned. In the night of the 22nd of March, 1804, he was shot in the wood of Vincennes; an event which roused the indignation of Europe, and excited an interest and sentiment of sorrow wherever it was known. B. at Chantilly, 1772.

ENGIA. (*See* ÆGINA.)

ENGLAND, *ing'-gland*, the southern and most considerable division of Great Britain, bounded N. by Scotland, S. by the English Channel, E. by the German Ocean, and W. by Wales, the Atlantic Ocean, and the Irish Sea. *Ext.* 425 miles long, from Berwick to the Land's End, with a breadth varying between 62 and 280. *Area*, 50,812 square miles. *Coast-line.* About 1,200 miles, without the indentations into the land; with them, about 2,000. The principal openings on the E. are the Humber, the Wash, and the estuary of the Thames; on the W., the Bristol Channel, Swansea and Carmarthen bays, Milford Haven, Bride's Bay, Cardigan Bay, and St. George's Channel, with the estuaries of the Dee, Mersey, Morecombe Bay, and the Solway Firth; on the S., Southampton Water, Torbay, Plymouth Sound, Falmouth Harbour, and Mount's Bay. *Capes.* Flamborough Head, Spurn Point, the Naze, Foulness, North and South Foreland, Beachy Head, Dungeness, the Needles, Portland Point, Lizard Point, Land's End, Worm's Head, St. David's Head, Great Orme's Head, and St. Bees Head. *Islands.* Holy Island, Lundy, Man, Sheppy, Scilly Isles, Walney, and Wight. *Divisions.* The country is divided into forty counties; viz., Bedford, Berks, Bucks, Cambridge, Chester, Cornwall, Cumberland, Derby, Devon, Dorset, Durham, Essex, Gloucester, Hereford, Hertford, Huntingdon, Kent, Lancaster, Leicester, Lincoln, Middlesex, Monmouth, Norfolk, Northampton, Northumberland, Nottingham, Oxford, Rutland, Salop, Somerset, Southampton, Stafford, Suffolk, Surrey, Sussex, Warwick, Westmoreland, Wilts, Worcester, and York. The last, which is the largest county, is divided into the E., N., and W. Ridings. The counties are again subdivided into hundreds, wards, lathes, wapentakes, rapes, tythings, &c. *Desc.* The aspect of the country is various and delightful, presenting all that beautiful variety which is to be found in the most extensive tracts of the globe. Although it possesses dreary scenes, lofty mountains, craggy rocks, black barren moors, and wide uncultivated heaths, yet few countries have a smaller proportion of land absolutely sterile and incapable of culture. The richest parts are, in general, the midland and southern. Towards the N. it partakes of the barrenness of the neighbouring portion of Scotland. The E. coast is, in many parts, sandy and marshy. A range of rude and elevated land extends from the borders of Scotland to the very heart of England, forming a natural division between the E. and W. sides of the kingdom. Cornwall is also a rough hilly tract; and a similar character pervades part of the adjacent counties. *Mountains.* The principal ranges are generally distinguished as the Northern, the Cambrian, and the Devonian. The first consists of the Pennine range and the Cumbrian group, the former extending from the Cheviot Hills, on the Scottish borders, to the middle of Derbyshire. In this range is Cross Fell, attaining an elevation of nearly 3,000 feet above the level of the sea; and the Peak, in North Derbyshire, rising to a height of 1,800. The Cumbrian group lies to the W. of the Pennine, being separated from it by the valleys of the Eden and the Lune. In it are Sca Fell, the loftiest mountain in England, being 3,166 feet high, with Helvellyn and Skiddaw, both above 3,000 feet. The Cambrian range comprises all the Welsh mountains, and will be spoken of in the article on WALES. The Devonian range includes the hills of Cornwall, Devon, and part of Somersetshire. The elevations in these are not nearly so lofty as those in the others. *Rivers.* The most considerable rivers are the Thames, Severn, Medway, Trent, Ouse, Tyne, Tees, Wear, Mersey, Dee, Avon, Eden, and Derwent. In aid of these, an extensive system of canal navigation permeates the country, by which, with an almost universal railway system, easy access is opened into the interior, and the produce of the various parts transported to the sea from places the most remote. *Lakes.* The most remarkable are Windermere, Ulles-water, Derwent-water,

and several others in the north-west counties, particularly in Westmoreland and Cumberland. The largest, Windermere, is not more than about 3 square miles; and it and the others are distinguished for the beauty of the scenery with which they are surrounded. They lie embosomed, like polished mirrors, among the loftiest of England's mountains, and never fail to fill the mind with the most delightful sensations, when Nature has put on her "robes of green," and when they are visited annually by thousands of tourists. *Climate.* Humid, but healthy. From the insular situation of England, it is liable to sudden and frequent changes, and to great variations of dryness and moisture. *Forests.* Not extensive. Several are preserved for growing timber for the navy. These are, the New Forest, in Hampshire; the Forest of Dean, in Gloucestershire; and Windsor Forest. *Zoology.* The native animals are the fallow-deer, the dog, the fox, the hare, the rabbit, the martin, the badger, mole, hedgehog, &c. The domestic animals are cattle, horses, goats, sheep, hogs, &c. The wild boar was formerly a native of the country, as also the wolf and the bear; but these have long ago disappeared. Of the birds, the most remarkable are the eagle, falcons of various species, owls, ravens, carrion-crows, rooks, swans, the cuckoo, the cormorant, the nightingale, the peacock, the swallow, the stork, the curlew, the snipe, the plover, the pheasant, the black-cock, the ptarmigan, which is sometimes but rarely met with on the lofty mountains of Cumberland; the grouse, the partridge, the pigeon, the lark, the starling, and the thrush. Along the coasts fish are abundant. Cod is plentiful on the coast of Yorkshire, herrings on the E., and pilchards and mackerel on both the N. and S. sides of Cornwall and Devonshire. *Pro.* The principal productions of the country are wheat, barley, oats, rye, French wheat, beans, and peas. The indigenous fruits are few, and of little value; but others have been introduced, or brought to perfection, by the skilful cultivation of the English gardeners. These are chiefly apples, pears, plums, cherries, peaches, nectarines, apricots, figs, grapes, and other fruits. Hops are cultivated to a considerable extent, principally in Kent. Timber grows abundantly in most parts of the country; and the trees are mostly oak, elm, ash, beech, alder, and willow. *Minerals.* Valuable and abundant. Coal abounds in the northern, and in some of the midland and western counties; iron in Shropshire, Gloucestershire, Derbyshire, the north of Lancashire; and it is produced, though not in equal abundance, in other counties. Tin is confined to Cornwall and the adjoining parts of Devonshire, where it has been found from time immemorial. Black-lead is limited to a small district in Cumberland, and mines of copper are wrought in Cornwall, Devonshire, Derbyshire, and partially in Yorkshire and Staffordshire. In many parts of the kingdom marbles and freestone, or calcareous sandstone, of various colours and textures, are abundant. There are also mines of rock salt, pits of fuller's earth, potter's clay, and quarries of slate. *Manf.* Important, being of greater extent than those of any other country. The manufacture of wool is one of the most ancient in the country, and is supposed to have been introduced by the Romans. It is chiefly carried on in Yorkshire, Wiltshire, Gloucestershire, and Somersetshire. The cotton manufacture is still more extensive, and has been carried to great perfection by the aid of every sort of powerful, complicated, and ingenious machinery. Its principal seat is in the towns of Lancashire and Cheshire. The hardware manufactures, of iron and steel, copper and brass, have been also brought to unrivalled perfection in England; and in this line are produced the heaviest articles of the casting-furnace and rolling-mill, as well as the most minute and trifling articles, such as pins and all sorts of children's toys. Their principal seat is in the towns of Yorkshire, Warwickshire, and Worcestershire. Silk-weaving is carried on in the cities and towns of Spitalfields, Macclesfield, Manchester, and Coventry. Nottinghamshire and Leicestershire are famed for hosiery; and earthenware is finished with beauty and taste, and in great variety, principally at the potteries of Staffordshire. Glass is manufactured in various parts, chiefly in Newcastle, Sunderland, Bristol; and, on a smaller scale, at some other places. China-ware of a very superior quality is made in Derby and Worcester. In London every sort of fine and elegant work is produced; such as cutlery, jewellery, articles of gold and silver, japan-ware, cut glass, cabinet and upholstery-work, carriages, clocks, watches, type-founding, printing, &c. COMMERCE. Large, and carried on with almost every country on the face of the globe. *Imp.* From the north of Europe, — namely, Denmark, Russia, Sweden, Poland, and Prussia, iron, kelp, timber, hemp, flax, coarse linens, tar, pitch, tallow, corn, pearl and pot ashes, &c.; from Germany, corn, hemp, flax, rags, linens, skins, timber, and wines; from Holland, cheese, geneva, butter, rags, hemp, flax, madder, clover and other seeds, corn, bacon, &c.; from France, brandy, wines, lace, cambric, silks, lawns, trinkets, &c.; and from Spain, Portugal, and Italy, brimstone, cochineal, barilla, oil, fruits, cork, wool, dye-woods, brandy, wines, silk, drugs, gums, &c. The imports from Turkey consist principally of carpets, drugs, dye-stuffs, fruits, silk, &c.; from North America are imported flour, provisions, masts, timber, cotton, wool, tobacco, rice, pitch, tar, pearl and pot ashes, indigo, furs, &c.; from South America, cotton, wool, skins, cochineal, logwood, indigo, Brazil-wood, sugar, drugs, &c.; from the West Indies, sugars, rum, coffee, pepper, ginger, indigo, drugs, and cotton; from the East Indies, China, and Persia, teas, spices, raw silk, muslins, nankeens, sugar, indigo, cloves, and other spices, opium, quicksilver, drugs, gums, rice, saltpetre, &c. *Exp.* These consist generally of all the various manufactures, to the annual value of £100,000,000, of which about £80,000,000 consists of British produce, and £20,000,000 of foreign and colonial, which has been imported. In addition to her commerce and manufactures, England has extensive fisheries, both at home and abroad. The Newfoundland fishery employs a considerable number of vessels, and the whale fishery, both in the North and South seas, is prosecuted with varying activity. *Pop.* In 1851 it was 16,921,888. *Lat.* between 50° and 55° 45′ N. *Lon.* between 1° 45′ E. and 5° 44′ W.—The aboriginal inhabitants of England were called Britons, and were invaded by Cæsar about 50 years before the Christian era. They were subsequently conquered by the Roman legions. In the early part of the 5th century, the Romans, who had kept possession of the country for upwards of four centuries, abandoned it, and the old inhabitants, being harassed by the Scots and Picts, called in the Saxons, who conquered the whole except Wales. The Saxons formed seven kingdoms, called the Heptarchy, each of which had its separate chief, till 827, when Egbert completed the conquest of the whole. About 866, the Danes made a descent on the coast, and conquered Northumberland, East Anglia, and Mercia, and finally possessed themselves of the whole kingdom, which they held till the time of King Alfred, who totally defeated them, and forced them from the country. At the beginning of the 11th century, Sweyn, king of Denmark, conquered all the northern parts of England, and on Ethelred's retiring to Normandy, the whole kingdom submitted to the invader. On his death, the Danes proclaimed his son Canute. The Saxon line was restored in the person of Edward the Confessor, in 1041; but the Normans, under William the Conqueror, defeated the Saxons at Hastings, in 1066, and took possession of the realm. In 1283, Wales was subdued by Edward I., Llewellyn, their last king, being slain. (*See* BRITAIN, GREAT, BRITISH EMPIRE.)

ENGLAND, NEW, certain states comprised in the United States. (*See* NEW ENGLAND.)

ENGLEWOOD FOREST, *en'-gel-wood*, a wide moor near Carlisle, Cumberland. In the reign of Henry VIII. it was disforested.

ENGLISH CHANNEL, THE, separates France from England, and extends from the Straits of Dover to the Land's End, Cornwall. At Dover it is 20 miles wide, and at the Land's End, 100.

ENIKALE, STRAIT OF, *en'-i-kail*, in S. Russia. (*See* YENICALE.)

ENKHUYSEN, *enk'-hoi-sen*, a fortified seaport-town of the Netherlands, 28 miles from Amsterdam. It is built in the form of a circle, and with great regularity. Its principal buildings are a town-house, weigh-house, and several churches. Fishing is the principal occupa-

tion of the inhabitants; but it has, besides, a trade in salt, timber, and cattle. *Pop.* 7,000.

ENNA, *en'-na*, a town in the middle of Sicily, with a beautiful plain, where Proserpine was carried away by Pluto.

ENNIS, *en'-nis*, the chief town of the county of Clare, Ireland, on the river Fergus, 20 miles from Limerick. It is of considerable size, but irregularly built, and has a court-house, gaol, barracks, town-hall, college, hospital, and two convents. *Pop.* 8,000. It is connected with Limerick by railway.

ENNISCORTHY, *en-nis-kor'-the*, a town of Ireland, on the river Slaney, 10 miles from Wexford. Its principal buildings are a parish church, court-house, market-house, an hospital, a dispensary, and convent. *Manf.* Woollens. *Pop.* 8,000.—Here is a castle, which, with its manor, at one period belonged to Spenser, the poet; and in the neighbourhood is Vinegar Hill, where the rebels, in 1798, were defeated by the royal troops under Lord Lake.

ENNISKILLEN, *en-nis-kil'-len*, the chief town of the county of Fermanagh, Ireland, on an island in Lough Erne, 34 miles from Sligo. Its principal buildings are a court-house, town-hall, barracks, linen-hall, infirmary, and the royal school of Poltara, founded by Charles I., and one of the best endowed in the kingdom. *Manf.* Leather, cutlery, and sewed muslins. There is also a considerable trade in corn, timber, coals, and slate. *Pop.* 6,000.—This place gives the title of earl, in the peerage of Ireland, to the family of Cole: it is connected by railway with Dundalk and Londonderry. In 1595 it made an obstinate defence against Queen Elizabeth's army, and was unsuccessfully besieged by James II.'s troops in 1680.

ENNIUS, Q., *en'-ne-us*, a Roman poet, who wrote in heroic verse the annals of the Roman republic, and displayed much knowledge of the world in some dramatical and satirical compositions. D. of the gout, contracted by his frequent intoxication, 169 B.C.; B. at Rudiæ, now Ruge, in Calabria, 239 B.C.—Scipio, on his deathbed, ordered his body to be buried by the side of this poetical friend. Conscious of his merit as the first epic poet of Rome, Ennius bestowed on himself the appellation of the Homer of Latium. Of all his writings, nothing now remains but fragments happily collected from the quotations of ancient authors.

ENNS, or ENS, *ens*, a town of Upper Austria, near the confluence of the Enns and Danube, 80 miles from Vienna. *Manf.* Iron and steel, with cotton-spinning. *Pop.* about 3,500.

ENNS, a river of Austria, rising in the circle of Salzburg, and, after a course of 110 miles, falling into the Danube at the town of Enns.

ENOCH, *e'-nok*, the son of Jared, and the seventh from Adam, is celebrated in Scripture for his pious and upright life in an evil generation. He was translated into heaven without passing through the agony of death, 3017 B.C. St. Jude has cited a prediction of Enoch respecting the last judgment. There is a book extant, called the "Prophecies of Enoch," which, though very ancient, is apocryphal.

ENOS, *e'-nos*, a maritime town of European Turkey, in Roumelia, 38 miles from Gallipoli. It is the port of Adrianople, and the seat of a limited trade, the harbour admitting only small vessels, from its being choked up with sand.—The GULF of Enos lies to the north of the town, and is 14 miles long by 5 broad.

ENOS, 'mortal man,' a son of Seth.

ENTICK, John, *en'-tick*, an English divine, who published a History of the War which ended in 1763, 5 vols. 8vo; a "History of London," 4 vols. 8vo; a "Latin and English Dictionary;" "An English Spelling Dictionary," and other works. D. 1780.

ENTRAIGUES, *on'-traig*, the name of several villages, towns, and parishes in France, with small populations.

ENTRECASTEAUX, *ontr-kas'-to*, a French admiral, who early entered the navy, and became, in 1785, commander of the naval forces of his country in the East Indies. In 1791 he was appointed to the command of two frigates destined to search for La Pérouse, and also to explore those coasts which that unfortunate navigator had not reached. In spite of all his endeavours, Entrecasteaux was unable to fulfil but the second part of his instructions. He explored the western coast of New Caledonia, the isle of Bougainville, and nearly 1,000 miles of the S.W. coast of Australia, besides visiting many points of the Tasmanian sea-board. B. at Aix, 1740; D. at sea, near Java, 1793.—Captain Rossel, who succeeded him, wrote an interesting account of the expedition.

ENTRE DEUX MERS, *ontr de(r)mair*, a vine country of France, in the department of the Gironde. It lies between the Dordogne and the Garonne, and produces an excellent quality of wine, especially that of Sainte-Foy-la-Grande.

ENTRE DUERO E MINHO, *en'-trai doo-air-o ai meen-yo*, the most N. province of Portugal, bounded W. by the Atlantic, and N. by the Spanish province of Galicia. *Area*, 2,044 square miles. *Desc.* Mountainous, interspersed with spots of great fertility, whereon large quantities of corn are raised. *Pro.* Oil, hemp, corn; and the port wines are mostly made in this province. *Manf.* Silks, linens, cutlery, hardware, and porcelain. *Pop.* about 12,000. *Lat.* between 41° and 42° N. *Lon.* between 8° and 9° E.

ENTRE RIOS, *en'-trai re-ose*, a department of the Plata Confederation, S. America, inclosed by Uruguay, Corrientes, Santa Fé, and Buenos Ayres. *Area*, estimated at 32,000 square miles. *Desc.* Flat and swampy, being characterized by extensive prairies and vast plains, which, especially in the S., are annually covered with water. Cultivation is little advanced, and its products are hides, wines, and jerked beef. *Pop.* 30,000.

ENZ, *ents*, a river of Germany, flowing through Wurtemberg and Baden, and, after a course of 55 miles, joining the Neckar, to the left of Besigheim.

ENZELI, or INZELLI, *en-zai'-le*, a lake of Persia, in the province of Ghilan, communicating with the Caspian Sea by a channel 500 yards across. *Length*, 25 miles.—Also a TOWN between the lake and the Caspian, inhabited mostly by Russians. *Pop.* 2,500.

ENZERSDORF, *en'-zers-dorf*, a fortified town of Austria, 8 miles from Vienna. *Pop.* 1,000. In 1809 it was bombarded by the French.

ÉON DE BEAUMONT, *ai'-awng bo'-mont* a French diplomatic agent and author, who became conspicuous as much on account of the doubts entertained regarding his sex, as on account of his ability. Possessing a small pretty figure, and having no beard, he was thus easily enabled to pass himself off as a woman. Appointed by Louis XV. on a secret mission to Russia, he presented himself before the empress Elizabeth in feminine costume; and, gaining her favour, was successful in cementing a friendship between the two countries. Soon after, reassuming his masculine attire and habits, he served with distinction during the "Seven Years' War." At the peace, he was sent to London as secretary to the embassy, and took a part in the treaty of 1763. Quarrelling with Count Guerchy, the French ambassador, he was dismissed from his office, and was afterwards found guilty of uttering a libel against that nobleman in his "Memoirs." After several adventures of a not very reputable nature, he returned to France, in 1777, where the king commanded him to wear, for the term of his life, women's garments. Retiring from France in 1790, he was declared an outlaw. B. at Tonnerre, 1728; D. in London, 1810.

EOOA, EAOWE, or MIDDLEBURG, *e-oo'-a*, the most eastern of the Friendly Islands, in the South Pacific Ocean. It has an elevation of 600 feet above the level of the sea, and was discovered by Tasman in 1643. *Lat.* 18° 19′ S. *Lon.* 175° 37′ W.

EOS, *e'-os*, the name of Aurora among the Greeks; whence the eastern parts of the world are called Eoo.

EOTVAS, *Jozef*, *e-ot-vas'*, an eminent Hungarian politician and *littérateur*. He wrote some dramas, and, in 1836, set out upon his travels, and visited England, of whose institutions he formed a high opinion. Some of his works have been translated into English, and are held in high estimation for the talent they display. B. at Buda, 1813.

EOUS, *e-o'-us*, one of the horses of the sun.

EPAMINONDAS, *e'-păm-i-non'-das*, a famous Theban, descended from the ancient kings of Bœotia, and celebrated for his private virtues and military accomplishments. His love of truth was so great that he never disgraced himself by a lie. He formed a sacred and inviolable friendship with Pelopidas, whose life he saved in a battle. By his advice, Pelopidas delivered

Thebes from the power of Lacedæmon. This was the signal for war. Epaminondas was put at the head of the Theban armies, and defeated the Spartans at the celebrated battle of Leuctra, 371 B.C. Pursuing his victorious career, he entered the territories of Lacedæmon with 50,000 men, and gained many partisans; but, on his return to Thebes, he was seized as a traitor for violating the laws of his country. In the midst of his successes he had neglected the decree which forbade any citizen to retain the supreme power more than one month, and all his eminent services seemed insufficient to redeem him from death. He bowed to

EPAMINONDAS.

his fate, and only begged of his judges that it might be inscribed on his tomb that he had suffered death for saving his country from ruin. This reproach produced such an effect, that he was pardoned, and again invested with the sovereign power. He was successful in a war in Thessaly, and assisted the Pleans against the Lacedæmonians. The hostile armies met near Mantinea, and while Epaminondas was bravely fighting, he received a fatal wound in the breast. Being informed that the Bœotians had gained the victory, he expired, exclaiming that he died unconquered. Fell in the 48th year of his age, 363 years before Christ. B. 411 B.C.—The Thebans severely lamented his death; in him their power was extinguished; for only during his life had they enjoyed freedom and independence among the Grecian states. Epaminondas was frugal as well as virtuous, and indignantly refused the rich presents which were offered to him by Artaxerxes, king of Persia. He is represented by his biographer as an elegant dancer and a skilful musician, accomplishments highly esteemed among his countrymen.

EPAPHRAS, *ep'-a-fras*, 'covered with foam,' a minister of Christ, supposed to have been bishop of the Colossian church.

EPAPHRODITUS, *e-păf'-ro-dī'-tus*, 'agreeable or handsome,' a bishop or deacon of the Philippian church, sent to Paul at Rome.

EPAPHUS, *ep'-a-fus*, a son of Jupiter and Io, who founded in Egypt a city, which he called Memphis, in honour of his wife, who was the daughter of the Nile. He was worshipped as a god at Memphis.

EPENETUS, *ep'-e-ne'-tus*, 'worthy of praise,' the first convert of Paul in Greece.

EPERIES, *e-per'-i-ees*, a royal free town of Hungary, on the Tarcza, 140 miles from Pesth. It is of an oblong shape, with regular fortifications, and has a town-hall, library, and several churches. *Manf.* Woollens, linens, earthenware, and beer. *Pop.* 9,000.

ÉPERNAY, *aï'-per-nai*, a small town of France, in the department of the Marne, 15 miles from Rheims. It is the chief entrepôt for Champagne wines. In it is the great manufacturing house of Möet and Chandon, whose vaults measure more than three miles in extent,

and contain, at some periods, as many as 2,000,000 bottles of champagne. *Pop.* 8,000.

EPEUS, *e-pe'-us*. The most remarkable of this name is the son of Panopeus, who was the fabricator of the famous wooden horse which proved the ruin of Troy.

EPHES DAMMIN, *e'-fees dăm'-min*, 'the effusion of blood,' the place near the Dead Sea, where Goliath and the Philistines were slain.

EPHESUS, *ef'-e-sus*, a famous city of Asia Minor, now in ruins, 35 miles from Smyrna. It was the ancient capital of Ionia, and had one of the seven Christian churches founded by the apostles. Its temple, dedicated to Diana, was considered one of the seven wonders of the world. Its dimensions were 425 feet long and 200 broad. The roof was supported by 127 columns, sixty feet high, which had been placed there by as many kings. Of these, 36 were carved in the most beautiful manner, one of which was the work of the famous Scopas. This celebrated building was not totally completed till 220 years after its foundation. Ctesiphon was its principal architect. The riches which were in the temple were immense, and the goddess who presided over it was worshipped with the most awful solemnity. It was burnt on the night that Alexander was born (*see* ERATOSTRATUS), but soon after, it rose from its ruins with greater splendour and magnificence. Ephesus for some time bore the name of Arsinoe, in honour of the wife of Lysimachus; but it was again known by its old name. Some have given the name of Ajasaloue to what they conjecture to be the remains of Ephesus. The Ephesians were much addicted to the use of spells and incantations; hence the words *literæ Ephesiæ* are applied to letters, supposed to possess such magical powers as easily to enable persons, by their use, to obtain their wishes.

EPHETÆ, *ef'-e-te*, a number of magistrates at Athens, instituted by Demophoon, the son of Theseus. They were reduced to the number of fifty-one by Draco, who, according to some, first established them. They were superior to the Areopagites, and their privileges were great and numerous. Solon, however, lessened their power. They were all more than fifty years old, and it was required that their manners should be pure and innocent, and their behaviour austere and full of gravity.

EPHIALTES, or EPHIALTUS, *ef-i-ăl'-tees*, a giant, son of Neptune, who grew nine inches every month. (*See* ALOEUS.)

EPHORI, *ef'-o-ri*, powerful magistrates at Sparta, who were first created by Lycurgus, or, according to some, by Theopompus, 760 B.C. They were five in number. Like censors, they could check the authority of the kings, and even imprison them, if guilty of irregularities. They were much the same as the tribunes of the people at Rome, created to watch over the liberties and rights of the populace. They were the arbiters of peace and war. Their office was annual, and they had the privilege of convening, proroguing, and dissolving the greater and less assemblies of the people.

EPHRAIM, *e'-frai-im*, the son of Joseph, who was adopted, together with his brother Manasseh, by Jacob among the tribes. B. in Egypt, about 1710 B.C.

EPHRON, *e'-fron*, 'dust,' a Hittite friend of Abraham.

EPICHARMUS, *ep-i-kar'-mus*, a poet and philosopher of the Pythagorean school, and mentioned as being the first writer of comedy. Aristotle attributes to him the invention of the letters $\theta$ and $\chi$. B. in Cos, and flourished in the 5th century B.C.

EPICTETUS, *ep-ik-te'-tus*, a Phrygian Stoic philosopher, originally the slave of Epaphroditus, the freedman of Nero. Though driven from Rome by Domitian, he returned after the emperor's death, and gained the esteem of Adrian and Marcus Aurelius. He supported the doctrine of the immortality of the soul, but declared himself strongly against suicide. D. at Hieropolis, and flourished in the 1st century.—His "Enchiridion" is a faithful picture of the Stoic philosophy. His style is concise, devoid of all ornament, and full of energy and useful maxims. The emperor Antoninus thanked the gods he could collect from the writings of Epictetus wherewith to conduct life with honour to himself and advantage to his country. His favourite maxim was

"Bear and forbear." Into this he resolved every principle of practical morality.

EPICURUS, *ep-i-kū'-rus*, the founder of a celebrated sect of philosophers, studied at Samos and Athens, whence he removed, in consequence of the war with Perdiccas, and opened a school, first at Mitylene, and next at Lampsacus. He finally settled at Athens, where he obtained a number of disciples, owing to the pleasantness of his system and his deportment. They lived together, and had all things in common. It is said that he wrote no fewer than 300 volumes. B. about 342 B.C.; D. near Athens, 270 B.C.—The system of Epicurus, some think, tends to atheism, by ascribing too little to the Deity, and too much to nature. His doctrine of pleasure being the supreme good, has been much misrepresented and abused; for his own life was irreproachable, and he inculcated virtue as the essence of pleasure. It must be admitted, however, that his system was afterwards grossly perverted from the author's original meaning.

EPIDAURUS, or PIDAVRO, *ep-i-dor'-us*, a town at the north of Argolis, in Peloponnesus, chiefly dedicated to the worship of Æsculapius, who had there a famous temple. It received its name from Epidaurus, a son of Argus and Evadne. It is now called Pidavro, and is the place where, in 1821, the first Greek congress assembled.

EPIGONI, *e-pig'-o-ni*, the sons and descendants of the Grecian heroes who were killed in the first Theban war. The war of the Epigoni is famous in ancient history. They resolved to avenge the death of their fathers, and marched against Thebes, under the command of Thersander. The two armies met and engaged on the banks of the Glissas. The fight was obstinate and bloody, but victory declared for the Epigoni, and some of the Thebans fled to Illyricum with Leodamas, their general, while others retired into Thebes, where they were soon besieged, and forced to surrender.

EPIMENIDES, *ep-i-men'-i-dees*, an epic poet of Crete, contemporary with Solon. He is reckoned one of the seven wise men, by those who exclude Periander from the number. While he was tending his flocks one day, he entered into a cave, where he fell asleep. His sleep, according to tradition, continued for fifty-seven years, and when he awoke, he found every object so considerably altered, that he scarcely knew where he was. It is supposed that he lived 289 years. After death he was revered as a god by the Athenians. Lived in the 6th century B.C.

EPIMETHEUS, *ep'-i-me'-the-us*, one of the Oceanides, who inconsiderately married Pandora, by whom he had Pyrrha, the wife of Deucalion. He had the curiosity to open the box which Pandora had brought with her. (*See* PANDORA.) Epimetheus was changed into a monkey by the gods, and sent into the island Pithecusa.

EPINAL, *ep'-e-nal*, a town of France, on both sides of the Moselle, 190 miles from Paris. It has museums of antiquities and paintings. *Manf.* Lace, linen fabrics, hosiery, oil, paper, earthenware, and chemicals. *Pop.* 11,000.

EPIPHANIUS, *ep'-i-fai'-ne-us*, a bishop of Salamis, active in refuting the writings of Origen; but his compositions are more valuable for the fragments of others, which they preserve, than for their own intrinsic merit. D. 403.

EPIPHANIUS, Saint, a Christian bishop, who wrote in Greek several religious works, the principal of which is the "Panarion," or a treatise on heresies. B. near Eleutheropolis, in Palestine; D. at sea, on a voyage to Cyprus, 403.

EPIRUS, *e-pī'-rus*, a country situate between Macedonia, Achaia, and the Ionian Sea. It was formerly governed by kings, of whom Neoptolemus, son of Achilles, was one of the first. It was afterwards joined to the empire of Macedonia, and at last became a part of the Roman dominions. It is now called Larta.

EPISCOPIUS, Simon, *e-pis-kō'-pe-us*, a learned divine, who, in 1612, was chosen divinity professor at Leyden, but met with considerable trouble on account of his being an Arminian. He was the principal of the Arminian remonstrants at the synod of Dort, which assembly deposed him and the other deputies from their ministerial functions, and banished them the republic. He then went to Antwerp, but in 1626 returned to Holland, and became minister to the remonstrants at Rotterdam. In 1634 he removed to Amsterdam, and was chosen rector of the remonstrants' college. B. at Amsterdam, 1583; D. there, 1643. His works make 2 vols. folio.

EPPING, *ep'-ping*, a town and parish of the county of Essex, 16 miles from London. It is famous for its butter, cream, and sausages. *Pop.* 2,300.—The royal FOREST of Epping is divided from the Forest of Hainault by the river Roding, and is still (1860) remarkable for the richness of its woodland scenery.

EPSOM, *ep'-som*, a town and parish of Surrey, 15 miles from London. Though irregularly laid out, it contains a number of good houses, and is lighted with gas. In its neighbourhood is a mineral spring, from which, at one time, the celebrated Epsom salts were manufactured. The Royal Medical Benevolent College, a handsome building, was erected in 1850, at a cost of £40,000, midway between the town and "Downs." *Pop.* about 4,500.—On Epsom Downs are annually held, in the week preceding Whitsunday, the most numerously attended horse-races in the kingdom. The principal, or Derby stakes, are run for on Wednesday, and the Oaks on Friday. The former race (for 3-year-old colts and fillies) was instituted in 1780, by the earl of Derby, and the stakes are of the annual value of £6,000 to £7,000. The "Derby Day" is the great London holiday, and for it the House of Commons adjourns every year, in order to afford to the legislature the opportunity of consulting "Dorling's correct card," and witnessing the trial of the speed and bottom of the fleetest horses in the world. The "Oaks" (for fillies only) were so named after the earl of Derby's seat, and were instituted in 1779; and these stakes are worth from £4,000 to £5,000. The "Grand Stand" is an elegant and commodious stone building, erected on the course, which, during the week of the races, is visited by nearly half a million of persons.

EPWORTH, *ep'-worth*, a town and parish of Lincolnshire, 10 miles from Gainsborough. *Pop.* 2,000, chiefly engaged in the culture and spinning of flax. Here John Wesley, founder of the Methodist sect, was born, in 1703.

EQUADOR, REPUBLIC OF, *ek'-wa-dor*, S. America. (*See* ECUADOR.)

EQUIRIA, *e-quir'-e-a*, festivals established at Rome, by Romulus, in honour of Mars, when horse-races and games were exhibited in the Campus Martius.

ER, *er*, 'watch,' or 'weary,' the eldest son of Judah.

ÉRARD, *ai'-rard*, a celebrated French pianoforte-maker, the son of an upholsterer. He early went from the provinces to Paris, and there established a pianoforte manufactory, improving considerably all that related to that instrument, as likewise to the harp and organ. He also founded an establishment in London. B. at Strasburg, 1752; D. 1831.

ERASMUS, Desiderius, *e-rās'-mus*, an illustrious Dutch writer, the illegitimate son of one Gerard, a native of Tergou, by the daughter of a physician. Erasmus was called Gerard, which he afterwards altered to the Latin name Desiderius, and the Greek, Erasmus, all signifying *amiable*. At an early age he lost both his parents, when his patrimony was left to the care of guardians, who, in order that they themselves might enjoy it, removed him from one convent to another, till at last, in 1486, he took the habit among the canons regular, at Stein, near Tergou. The monastic life being disagreeable to him, he accepted an invitation from the archbishop of Cambray to reside with him as his private secretary. During his abode with this prelate, he was ordained a priest; but in 1496 went to Paris, and supported himself by giving private lectures. In 1497 he visited England, and met with a liberal reception from the most eminent scholars, and applied himself to the study of the Greek language, of which he was before ignorant. His first literary works were philological; as his "Adagia," "De Copiâ Verborum," and "De Ratione Conscribendi Epistolas." His "Adagia" is a collection of proverbs, commented upon with great learning. In 1503 we find him at Louvain, where he studied divinity under Adrian Florent, afterwards Adrian VI. The next year he published his "Enchiridion Militis Christiani," a book of practical religion. In 1506 he took his doctor's degree at Turin, and went to Bologna, where he continued some time; thence he

removed to Venice, and resided with the famous Aldus Manutius. From Venice he proceeded to Padua and Rome, where many offers were made him to settle; but having received an invitation from Henry VIII., he set out for England, and arrived there in 1510. He at first lodged with Sir Thomas More, and while there, wrote his "Praise of Folly," designed to show that fools are everywhere to be found, even in "high places," and at the court of Rome. Fisher, bishop of

ERASMUS.

Rochester, now invited him to Cambridge, where he was made Margaret professor of divinity, and Greek professor. In this seat of learning a lodging was assigned him in Queen's College, in the grounds of which his walk is still shown. In 1514 we find him at Bâle, preparing for the press his "New Testament," and "Epistles of Jerome," which were published in 1516. This was the first time the New Testament was printed in Greek; and this is his greatest work. The Reformation now began under Luther; and though Erasmus approved of his principles and object, he was afraid to irritate the court of Rome. A friendly correspondence passed between these two great men; but afterwards a controversy ensued on free-will, and Luther treated Erasmus as a hypocrite. It is certain that Erasmus approved the Reformation in his heart, but had not courage to express himself openly; and the consequence was, that he was disliked by both parties. Indeed, he says of himself, "Even if Luther had spoken everything in the most unobjectionable manner, I had no inclination to die for the sake of truth." In 1522 appeared his "Colloquies," which gave great offence to the monks, who used to say that "Erasmus laid the egg which Luther hatched." His next controversy was with Scaliger and others, who, in their zeal for the purity of Latin composition, objected to the use of words not in the works of Cicero; whence they were called Ciceronians. Against these pedants Erasmus wrote an admirable dialogue, entitled "Ciceronianus," printed in 1528. The same year appeared his learned work, "De rectâ Latini Græcique Sermonis Pronuntiatione." His last publication was his "Ecclesiastes, or the Manner of Preaching," 1535. D. at Rotterdam, 1467; D. at Bâle, 1536, and was buried in the cathedral of that city.—The inhabitants of Rotterdam still show the house where he was born, and there is a statue erected to his memory in the great square of that city. His works were edited at Leyden in 1706, in 10 volumes folio, by Le Clerc.

ERASTUS, Thomas, *e-rās'-tus*, a physician, and the author of several medical works. He is remembered principally from the controversy known by his name. His general principle was, that the censures of the church, and other inflictions, were not the proper means to be adopted for the punishment of crimes. Dathenus and Beza were his chief opponents. B. at Baden, Switzerland, 1524; D. at Bâle, 1583.

ERATO, *er'-a-to*, one of the muses, who presided over lyric and tender poetry. She is represented as crowned with roses and myrtle, holding a lyre in her hand. She appears with a thoughtful and sometimes with a gay and animated look, and was invoked by lovers, especially in the month of April, which, among the Romans, was more particulary devoted to the tender passion.

ERATOSTHENES, *er-a-tos'-the-nees*, a native of Cyrene, intrusted with the care of the Alexandrian library. He has been called a second Plato, the cosmographer, and the geometer of the world. He first observed the obliquity of the ecliptic, and discovered the means of measuring the extent and circumference of the globe. Starved himself, after he had lived to his 82nd year, 194 B.C.—He collected the annals of the Egyptian kings by order of one of the Ptolemies.

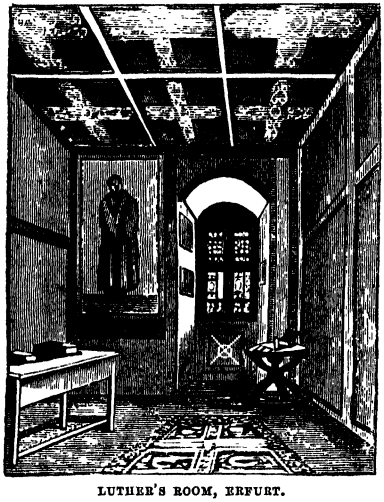
ERATOSTRATUS, *er'-a-tos'-tra-tus*, an Ephesian, who burnt the famous temple of Diana, the same night that Alexander the Great was born. His object was to transmit his name to posterity, by an action so uncommon.

ERBACH, *air-bak*, a name common to several German towns with small populations.

ERCILLA Y ZUNIGA, *air-seel'-ya e thoo'-ne-ga*, a Spaniard, who was brought up at the court of Charles V., and joined the expedition against the Araccanians in Chili, S. America. The scenes in which he was engaged suggested the composition of an epic poem, which he produced, and called "La Araucana." He wrote it on scraps of paper and bits of leather, during those intervals he was enabled to snatch from his military duties. It describes the perils of the contest in which he was engaged, with great spirit and vividness. D. in the province of Biscay, about 1530.

ERDRE, *airdr*, a river of France, which, after a course of nearly 50 miles, through the Lower Loire, joins the Loire at Nantes.

EREBUS, *er'-e-bus*, a deity of the infernal regions, son of Chaos and Darkness. He married Night, by whom he had the Light and the Day. The poets often used the word Erebus to signify hell itself.



ERREBUS, a volcano in the supposed continent discovered, in the Antarctic Ocean, by Sir James Ross, in 1841. *Height*, 12,400 feet. (*See* VICTORIA LAND.)

ERECHTHEUS, *e-rek'-the-us*, son of Pandion I., was the sixth king of Athens. In a war against Eleusis he sacrificed his daughter Othonia, to obtain a victory which the oracle promised for such a sacrifice. In that war he killed Eumolpus, Neptune's son, general of the enemy, for which he was struck with thunder by Jupiter. After death he received divine honours at Athens. He reigned fifty years, and died 1347 B.C. According to some accounts, he first introduced the mysteries of Ceres at Eleusis.

EREKLI, or EREGLI, *e-reg'-le*, a seaport-town of Asia Minor, on the Black Sea, 130 miles from Constantinople. It consists of an ancient and modern town, containing several mosques, baths, and a Greek church. On a height overlooking the town, are the ruins of an ancient castle. It has a good port and shipbuilding-yards. *Pop.* Unascertained. *Lat.* 41° 15′ 30″ N. *Lon.* 31° 30′ E.—This town stands on the site of the ancient Heraclea, whence the 10,000 Greeks, commanded by Xenophon, embarked on their return to Greece. It was founded by the Megareans, and was the port where the fleet of the Goths awaited the return of the second expedition, which, in the time of Galienus, ravaged Mysia and Bithynia.

ERFURT, or ERFURTH, *air'-foort*, a town of Prussian Saxony, on the river Gera, branches of which traverse the town in the form of canals, 14 miles from Gotha. It has a well-built citadel, on an eminence called Petersberg, and is the capital of an extensive province, but is said to have been, in the 16th century, a place of much greater importance than it is now. It has a cathedral, numerous churches, a convent, orphans' asylum, an academy of sciences, and several literary institutions. The cathedral has a famous bell, called Grosse Susanna, weighing 14 tons, and contains some excellent pictures; among which are a "Holy Family," by L. Cranach; and another, still older, supposed to

be by Van Eyck. The orphan asylum, called Martinstift, in honour of Luther, was originally the Augustinian monastery, in which he was a monk. His cell is still to be seen, as it appeared when he was its occupant,

LUTHER'S ROOM, ERFURT.

and contains both his bible and portrait. *Manf.* Woollen and cotton goods, shoes, vinegar, and vermicelli. *Pop.* 33,000.—Here, in 1808, an interview took place between Alexander of Russia and Napoleon I.—The GOVERNMENT of Erfurt has an area of 988 geographical square miles, and a population of 350,000. It is well watered, has several lofty mountains, and is abundantly supplied with minerals.

ERGHEN, *erg'-en*, a river of Central Asia, rising in the Karakorum mountains, and, after a course of 700 miles, under different names, falling into the west end of Lake Lob Nor.

ERIBOLI, LOCH, *e-rib'-o-le*, an arm of the sea, on the coast of Sutherland, Scotland. *Ext.* 10 miles long, with a varying breadth of from 1 to 3.

ERIC, *eer'-ik*, is the Swedish synonyme for the English Henry. Of this name there are many kings of Sweden and Denmark. The following are the most deserving of notice.

ERIC IX., who succeeded Margaret in 1412. He married the daughter of Henry IV. of England, and made a pilgrimage to the Holy Land, but was taken prisoner in Syria, and paid a large ransom for his liberty. Soon after his return, the Swedes revolted, and were joined by the Danes; on which he withdrew to the isle of Gothland. In 1439 he was formally deposed, and afterwards settled in Pomerania, where he died in 1459.—This monarch compiled a "History of Denmark to the Year 1288."

ERIC XIV., son and successor of Gustavus I., king of Sweden, made proposals for the hand of Princess Elizabeth, afterwards queen of England; but being refused, he married the daughter of a peasant. This alienated from him the hearts of his subjects, and, together with his cruelties, occasioned a revolt. He was compelled to renounce his throne in 1568, and died in prison, 1578.

ERICCSON, John, *er'-ik-son*, a Swedish mechanician, who, early displaying considerable ability, was appointed an engineer cadet, and subsequently entered the army of his country. He was employed in the survey of Northern Sweden, and devoted much of his time to mechanical speculations, more particularly to his "flame-engine." This was intended to work independently of steam, by condensing flame, and so obtaining the necessary power. Visiting England in 1821, he discovered that when worked by mineral fuel, the experiment failed. In 1829 he competed for the prize offered by the Liverpool and Manchester Railway for the best locomotive, and his engine attained a speed of fifty miles an hour. He subsequently removed to the United States, and many useful inventions developed there, made his name familiar to the world. His caloric engine, however, was that which attracted most attention, as likely to supersede the use of steam. It seemed, at first, to meet with some success in England, but was ultimately allowed to drop, Brunel and Faraday deciding against its practicability. A vessel called the *Ericcson* was, however, built in the United States, and fitted with his caloric engine, and, on her trial trip, she made 12 miles an hour. Returning from this, however, a squall overtook her, and she sank. Since that catastrophe, Ericcson's scheme does not appear to have proceeded further. B. in Vermeland province, 1803.

ERICHT, or EROCHT, *eer'-ikt*, a river of Scotland, in Perthshire, which joins the Isla near Cupar.—Also a lake in the N.W. of the district of Athol, in Perthshire, extending into Inverness-shire. *Ext.* 14 miles long, by 1 broad. Near this place wandered the unfortunate Prince Charles Stuart, after his discomfiture at Culloden, in 1746, lurking in caves and among rocks, exposed to the rigours of the climate, sometimes alone, at others with a few faithful adherents, till he escaped the parties that were in search of him, lured by the offered reward.—The waters of this lake descend into another, called Loch Rannoch.

ERICHTHONIUS, *er'-ik-tho'-ne-us*, the fourth king of Athens, had the invention of chariots attributed to him, and the manner of harnessing horses to draw them. D. 1437 B.C. He was made a constellation after death, under the name of Bootes.—A son of Dardanus, who reigned in Troy, and died 1374 B.C.

ERIE, *eer'-e*, the name of several counties of the United States, with populations ranging between 20,000 and 100,000.

ERIE, a township of Pennsylvania, U.S., on the S. shore of the lake of the same name. *Pop.* 9,000.

ERIE, FORT, a strong fortification in Upper Canada, on the N. shore of Lake Erie. *Lat.* 42° 59′ N. *Lon.* 78° 20′ 30″ W.

ERIE, LAKE, an immense lake of N. America, abounding with a great variety of fish. (*See* AMERICA, NORTH.)

ERIGENA, John Scotus, *er-ig'-e-na*, a learned Scotchman, who is said to have travelled to Athens, where he acquired the Greek and Oriental languages. He resided many years at the court of Charles the Bald, king of France, with whom he lived on terms of the greatest familiarity. At the request of his patron, he translated the works of Dionysius into Latin, which drew upon him the resentment of the pope; to avoid whose fury he fled to England. His greatest work was the "Division of Nature; or, the Nature of Things," printed at Oxford in 1681. Some say that he was employed by Alfred in restoring learning at Oxford, and that he held a school at Malmsbury, where he was murdered by his pupils on account of his severity. Lived in the 9th century.

ERIGONE, *e-rig'-o-ne*, a daughter of Icarius, who hung herself when she heard that her father had been killed by some shepherds whom he had intoxicated. She was made a constellation, now known under the name of Virgo.

ERINNA, *e-rin'-na*, a Grecian poetess, who was contemporary with Sappho, and wrote several pieces, fragments of which are extant, and were published in the Edinburgh edition of Anacreon of 1754. Flourished 600 B.C.

ERINNYS, *e-rin'-nis*, one of the furies, or Eumenides. The word signifies the 'fury of the mind.' (*See* EUMENIDES.)—A surname of Ceres.

ERIPHYLE, *er-i-fi'-le*, a sister of Adrastus, king of Argos, who married Amphiaraus. (*See* ALCMÆON.)

ERIS, *e'-ris*, the goddess of discord, among the Greeks, the same as the Discordia of the Latins. (*See* DISCORDIA.)

ERISAY, *er'-i-sai*, an island of the Hebrides, Scotland, lying between Harris and North Uist.

ERISICHTHON, *er'-i-sik'-thon*, a Thessalian, son of Triops, who derided Ceres, and cut down her groves. For this impiety the goddess afflicted him with continual hunger. To satisfy the cravings of his appetite,

he squandered all his possessions, and at last devoured his own limbs, for want of food. His daughter had the power of transforming herself into whatever animal she pleased, and she made use of it to maintain her father, who sold her, in one shape, after which she assumed another, and became again his property.

ERISKAY, *e-ris'-kai*, one of the smaller Hebrides, Scotland, lying to the S. of South Uist, where, in 1745, Prince Charles Edward Stuart landed on his ill-starred expedition. *Ext.* About 2 miles long.

ERITH, *eer'-ith*, a village and parish on the river Thames, 6 miles from Woolwich. *Pop.* 2,300.

ERIVAN, IRVAN, or IRIVAN, *er'-e-van*, a fortified town of Russian Armenia, the capital of a province on the Zengui, 112 miles from Tiflis. On one side, the city surmounts a precipice 600 feet high, overhanging the river, and is encompassed by a double wall. It is commanded by a spacious castle built on a steep rock. The town has suffered severely from repeated sieges. *Manf.* Leather, earthenware, and cotton stuffs. *Pop.* 15,000.—The Russians blockaded this place during six months in 1808, and were repulsed, with great slaughter, in an attempt to storm it. In 1827, however, it was taken by them.

ERLACH, John Lewis, *air'-lak*, a noble Swiss, who distinguished himself in the service of France, and obtained several victories, for which, on the defection of Turenne, he was made commander-in-chief of the army, by Louis XIV. B. at Berne, 1595; D. 1650.

ERLANGEN, *air'-lang-en*, a town of Bavaria, situate on the high road from Leipsic to Bayreuth, 11 miles from Nuremberg. It contains the Protestant university of Bavaria, founded in 1743. *Manf.* Woollens, hats, gloves, and leather. *Pop.* 12,000.

ERLAU, *air'-lou*, a town of Hungary, on the Erlau, 68 miles from Pesth. It has churches for different religions, and several good edifices, particularly the cathedral and the archbishop's palace. The citadel is strong, and stands on a lofty rock. Here also is an academy, with teachers in theology, philosophy, and law. *Manf.* Woollen and linen fabrics. *Pop.* about 20,000.

ERLENBACH, *air'-len-bak*, a small village of Switzerland, 20 miles from Berne. *Pop.* 1,200.—The name of several villages in France and Germany.

ERMENONVILLE, *airm'-nawng-veel*, a village of France, in the department of the Oise, 5 miles from Senlis. *Pop.* 500.—In a château at this place, Jean Jacques Rousseau died, 1778.

ERNE, *ern*, a river of Ireland, rising in Lake Ganny, and after a course of about 60 miles, during which it helps to form two lakes of the same name, distinguished as Upper and Lower, falling into Donegal Bay.

ERNE, a river of Devonshire, which falls into the English Channel.

ERNÉE, *air'-nai*, a town of France, on a river of the same name, 17 miles from Laval. *Manf.* Needles, principally. *Pop.* 6,000.

ERNESTI, John Augustus, *air-nes'-te*, a German writer, was, in 1742, chosen extraordinary professor of ancient literature at Leipsic, and, in 1756, professor of eloquence. Two years afterwards, he took his doctor's degree, and obtained the divinity chair, which he held, with great reputation, till his death, in 1781. B. at Tennestadt, 1707.—He published several valuable editions of Latin and Greek authors; as Xenophon, Cicero, Suetonius, Tacitus, Homer, and Callimachus, accompanied with learned notes. His "Institutio Interpretis Novi Testamenti," Leipsic, 1761, is a very excellent work; as also are his "Opuscula Oratoria, Orationes, Prolusiones, et Elogia," 8vo; and "Opusculorum Oratorum Novum Volumen," 8vo, 1791; and "Opuscula Critica," 8vo.

EROS, *e'-ros*, a servant, of whom Antony demanded a sword to kill himself. Eros produced the instrument; but, instead of giving it to his master, killed himself in his presence.—The god of love, son of Chronos, or Saturn. (*See* CUPIDO.)

EROSTRATUS. (*See* ERATOSTRATUS.)

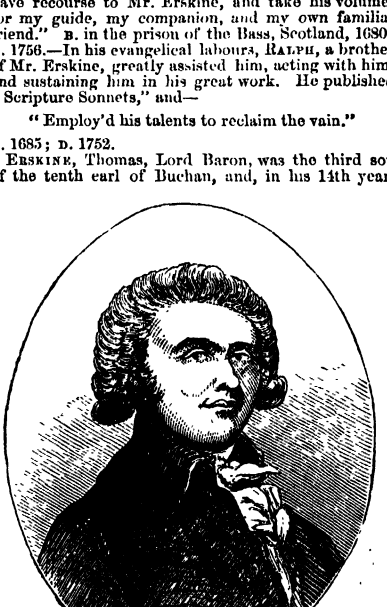
EROTIA, *e-ro'-te-a*, a festival in honour of Eros, the god of love, celebrated every fifth year, by the Thespians, with sports and games, when musicians and others contended.

ERPENIUS, or ERPEN, Thomas, *er'-pen*, a learned Dutchman, who was educated at Leyden, after which he travelled into several countries to perfect himself in the oriental languages. He returned to Leyden in 1612, and was chosen professor of the oriental tongues. B. 1584; D. 1621.—He wrote "Grammatica Arabica," "Rudimenta Linguæ Arabicæ," "Præcepta de Linguâ Græcorum Communi," "Grammatica Hebræa," "Orationes de Linguarum Hebrææ atque Arabicæ Dignitate." He also translated several Arabic works into Latin, with annotations, and the New Testament and Pentateuch into Arabic.

ERRIGAL, *er'-ri-gal*, three parishes in Ireland, severally in Londonderry, Tyrone, and Monaghan, with populations varying between 6,000 and 8,000.

ERRIS, *er'-ris*, a maritime district in the county of Mayo, Ireland, remarkable for the dreary wildness of its mountain scenery. *Pop.* about 20,000.

ERROL, *er'-rol*, a parish of Perthshire, Scotland, 10 miles from Dundee. *Pop.* 3,000, principally employed in weaving.—It has a station on the Dundee and Perth Railway.



ERSEK-UJOAR, *er'-sek oo'-jo-ar*, a town of Hungary, 22 miles from Neutra, with a Franciscan and normal school. *Pop.* 7,000.

ERSKINE, Ebenezer, *ers'-kin*, the founder of the Secession church of Scotland, wrote many sermons and discourses, which, in their day, were highly esteemed. "Were I to read in order to refine my taste," says Hervey, in his "Theoron and Aspasio," "I would prefer Bishop Atterbury's sermons, Bates' works, or Seed's discourses; but were I to read with a single view to the edification of my heart in true faith, solid comfort, and evangelical holiness, I would have recourse to Mr. Erskine, and take his volumes for my guide, my companion, and my own familiar friend." B. in the prison of the Bass, Scotland, 1680; D. 1756.—In his evangelical labours, RALPH, a brother of Mr. Erskine, greatly assisted him, acting with him, and sustaining him in his great work. He published "Scripture Sonnets," and—

"Employ'd his talents to reclaim the vain."

B. 1685; D. 1752.

ERSKINE, Thomas, Lord Baron, was the third son of the tenth earl of Buchan, and, in his 14th year,

LORD ERSKINE.

entered the navy, in which he served four years. In 1768 he quitted the sea, and entered the army, in which he remained for eight years, when he renounced the profession of war for that of the law. In 1775 he became a student of Lincoln's Inn, and, in 1778, was called to the bar, where his advancement was both rapid and brilliant. In 1783 he became member of parliament for Portsmouth; but his talents did not here

appear to the same advantage as did his forensic abilities. He, however, became attorney-general to the prince of Wales; but, in 1792, was forced to resign the appointment, for determining to defend Thomas Paine in his prosecution for the publication of "The Rights of Man." In 1802 he was made chancellor of the duchy of Cornwall; and, in 1806, when the Grenville ministry was formed, became lord chancellor, being raised to the peerage, with the title of Baron Erskine, of Restormel Castle, in Cornwall. In 1807 he retired from public life, and, in 1815, received the order of the Thistle. In the intervals of his leisure, Lord Erskine wrote a political romance, called "Armata," a preface to the speeches of Fox, "A View of the Causes and Consequences of the War with France," which passed through numerous editions. His works have been published in 5 vols. 8vo. B. at Edinburgh, 1750; D. 1823.

ERSTEIN, *airs'-tine*, a town of Alsace, on the Ill, 12 miles from Strasburg. *Manf.* Cotton, cordage, tobacco, and earthenware. *Pop.* 4,000.

ERTRAAG-OE, *air-tra'-ge(r)*, an island of Norway, 40 miles from Christiansand. *Ext.* 12 miles long, by a breadth of the same. *Pop.* Unascertained. *Lat.* 63° 13′ N. *Lon.* 8° 20′ E.

ERWIN DE STEINBACH, *air'-vĕ*, a continental architect, who built Strasburg cathedral, with the exception of the tower, which was not finished until the 15th century. B. at Steinbach, Baden. D. 1318.

ERXLEBEN, John Christian Polycarp, *airx'-le-ben*, a German naturalist, who studied physic at Gottingen, and there gave lectures on the veterinary art and natural history. He also wrote on those subjects. His "Principles of Natural History," 8vo, 1768, is a valuable work. B. at Quedlinburg, 1744; D. 1777.

ERYCEIRA, Ferdinand de Meneses, Count, *air'-e-see'-a*, a Portuguese historian, who devoted himself to military service, and distinguished himself as an able leader at Tangier. B. at Lisbon, 1614. He wrote "The History of Tangier," folio, 1723; "History of Portugal," 2 vols. folio; "The Life of John I., King of Portugal."

ERYCEIRA, Francis Xavier Meneses, Count, great-grandson of the above, was also a soldier and an author. B. at Lisbon, 1673; D. 1743. He wrote on the "Value of the Coins of Portugal;" "Reflections on Academical Studies;" "Parallels of Illustrious Men and Women;" a translation of the "Henriade."

ERYMANTHUS, *er'-i-mĭn'-thus*, a mountain, river, and town of Arcadia. On the first, Hercules killed a prodigious boar, which he carried on his shoulders to Eurystheus, who was so terrified at the sight, that he hid himself in a brazen vessel.

ERYTHRÆUM MARE, *er'-i-thre'-um mair'-e*, a part of the ocean on the coast of Arabia. As it communicated with the Persian Gulf and the Red Sea, it has often been mistaken by ancient writers, who by the word *erythrean* understood indiscriminately either the Red Sea or the Persian Gulf. It received this name either from Erythras, or from the redness (ἐρυθρος, *ruber*) of its sand or waters.

ERZBERG, *airz'-berg*, a mining district of Styria, where, for upwards of 1,000 years, iron-mines have been worked.

ERZERUM, ERZROUM, ESE-RUM, OR AZEROOM, *erz'-room*, the chief city of Armenia, in Asiatic Turkey, and the capital of a pachalic of the same name, 155 miles from Mount Ararat. In June, 1859, this city suffered immensely from the effects of an earthquake, which laid a great portion of it in ruins. "In the brief space of ten or twelve seconds," says an account written at the time, "it threw down the better half of this fine and densely-populated city, and so seriously injured the rest, that the whole will have to be rebuilt. Upwards of 1,500 men, women, and children are buried in the ruins. In one of the barracks alone, out of an entire battalion, 600 strong, not more than 350 contrived to save their lives by a precipitate retreat." The line-walls, the barracks, the quarters of the military governor, and a part of the palace of the pasha, or civil governor, including his harem, the prison, the public schools, the principal bazar, many minarets, the Austrian consulate, and the residence of the former British consul, Mr. Brandt, were among the buildings reduced to a heap of ruins. The entire population had to take to tents and canvas in the plains, fearing further disasters. Erzeroum has an extensive trade with all the adjoining countries, and is a principal halting-place for caravans going between Mecca and Teheran. *Pop.* about 50,000.—This town is built in a plain, and stands at an elevation of about 6,000 feet above the level of the sea. It was the bulwark of Armenia under the Byzantines, and still is so under the Turks. It was taken by the Russians in 1829, but, the year following, was restored to Turkey.—The PACHALIC forms one of the great subdivisions of Asiatic Turkey, and is a lofty table-land, with an elevation of 6,000 feet. In it the Euphrates, Kur, Araxes, and Tchoruk rivers have their sources. *Pro.* Rye, barley, flax, and fruits. Cattle-rearing is carried on to a large extent. *Lat.* between 39° and 41° N. *Lon.* between 39° and 44° E.

ERZGEBIRGE, *airts-ge(r)-beerzh-e(r)*, 'ore mountains,' an extensive circle of the kingdom of Saxony, separated from Bohemia by a chain of mountains of the same name, and extending from the Fichtelberg N.E. to the Saxon Switzerland. *Ext.* 120 miles long, with an average breadth of 25. *Height.* An average of 2,500 feet. It takes its name from the large number of metallic ores which it yields.

ESAU, *e'-saw*, the eldest son of Isaac and Rebecca. He sold his birthright to his brother Jacob, who also, by deceit, afterwards gained, instead of Esau, his father's blessing. Enraged at this, Esau would have slain Jacob, had the latter not fled into Mesopotamia. On his return, Esau met him, and behaved very generously to him. He was the father of the Edomites. Lived in the 18th century B.C.

ESCAUT, *es'-ko*, the French name for the river Scheldt.

ESCHWEGE, *aish'-we(r)zh-e(r)*, a walled town of Hesse-Cassel, on the Werra, 27 miles from Cassel. *Manf.* Woollens and linens. *Pop.* 7,000.

ESCONDIDO, *ais'-kon-de'-do*, the name of several harbours, chiefly in S. and Central America.

ESCURIAL, or ESCORIAL, *ais-koor-e-al'*, a village of Spain, 24 miles from Madrid, and celebrated for its monastery and palace, accounted by the Spaniards the eighth wonder of the world. *Pop.* 1,500.—The palace was built by Philip II. of Spain, after the plan of St. Peter's at Rome, and in memory of his victory of St. Quentin, gained over the French in 1563. It consisted of cloisters, a college, a library, shops of different artists, apartments for a great number of families, with extensive park and fine gardens, adorned with a great number of fountains. It stands in a dry, barren country, surrounded by rugged mountains, and is composed of grey stones, found in the neighbourhood. Its form is that of a gridiron, because St. Lawrence, to whom it is dedicated, on account of the battle of St. Quentin being fought on his fête day, was broiled on that instrument. It was 22 years in building, and cost 6,000,000 crowns; and they reckon in it 800 pillars, 11,000 square windows, and 14,000 doors.

ESHER, *e'-sher*, a parish of Surrey, 15 miles from London. *Pop.* 1,500. It is a station on the South-western Railway.

ESK, *esk*, the name of several rivers in Scotland. 1. In Dumfriesshire, falling into the Solway Firth.—2. (NORTH). In the county of Edinburgh, joining the sea at Musselburgh.—3. (NORTH). In Forfarshire, falling into the German Ocean, 3 miles from Montrose.—4. (SOUTH). In the same county, falling into the sea at Montrose.—5. (SOUTH). In the county of Peebles, falling into the North Esk below Dalkeith.

ESK, a river of Cumberland, rising in the Sca Fell, and falling into the Irish Sea near Ravenglass.

ESK, NORTH and SOUTH, two rivers of Tasmania, which join the Macquarrie and Quamly to form the Tamar.

ESKE, a river of England, rising near Kildale, Yorkshire, and falling into the North Sea at Whitby.

ESKI, *es'-ke*, a Turkish prefix, signifying 'old,' and added to several towns, with small populations, in that country.

ESKI-SAGRA, *sa'-gra*, a town of European Turkey, on the slope of the Balkan mountains, 70 miles from Adrianople. *Manf.* Carpets, leather, and hardware. *Pop.* estimated at 20,000.

ESMERALDA, *ais-mai-ral'-da*, a port of Ecuador, on

the coast of the Pacific, 10 miles from the mouth of the river Esmeralda. *Pop.* 4,000.—A River, rising near Quito, and, after a course of 110 miles, entering the Pacific in *lat.* 1° 5′ N.; *lon.* 79° 40′ W.

Esne, or Asna, *es'-ne*, a town of Upper Egypt, and the last place of any magnitude on the side of Nubia, 25 miles from Thebes. It is the entrepôt of the Senaar caravans, and is famous for a vast ancient temple, now converted into a cotton-factory. *Manf.* Cotton, shawls, and pottery. *Pop.* Unascertained.—Near this place Davoust defeated the Mamelukes, 1799.

Espagnac, John Baptist, Baron d', *es'-pan-yak*, a gallant French general, who served with great glory under Marshal Saxe, and wrote a number of books on the military art, with a History of the Marshal, in 3 vols. 4to. b. 1713; d. at Paris, 1783.

Espartero, Joaquin Baldomero, *ais'-par-tair'-o*, a modern Spanish soldier and statesman, though designed, on account of the delicacy of his constitution, for the literary profession, was so captivated by the charms of a military life, that in 1808 he enlisted as a common soldier in an infantry regiment at Seville. He subsequently entered a military school at Cadiz, where he studied the art of war generally, with the science of engineering and fortification. In 1815 he joined an expedition to Peru, in South America, and there became captain of a regiment. He was now on the way to advancement. From his being successful in no fewer than seventeen consecutive actions, he was raised to the command of a battalion; and, in 1820 and 1822, successively became colonel, brigadier, and chief of the general staff. Subsequently, the successes of Bolivar defeated the efforts and blasted the hopes of the royalist Spanish generals, and Espartero was thrown into prison at Arequipa. From this situation he soon afterwards made his escape, and arrived in Spain in 1825. He now enjoyed repose for a few years, although still following his profession. In 1833 the civil war commenced, when he sought and obtained leave to proceed against Don Carlos. Throughout the stormy period which now ensued, he took a leading part, and rose to the dignity of field-marshal and general-in-chief of the army of the North. In 1836 he acted with General Evans in the relief of Bilbao, and continued vigorously to oppose the efforts of the Carlists till 1839, when the supremacy of the queen was acknowledged. In that year he was created a grandee of the first class, and duke de la Victoria. In 1841 he became regent of the kingdom, but in 1843 was forced to quit his country, and take refuge in England. Here he took up his residence in London, and did not return to Spain till 1847. For some years he there lived in retirement, but in 1854 was again called to assume the reins of government, which he held till 1856, when he was forced to tender his resignation. b. at a village near Almagro, 1793.

Espejo, *ais'-pai-ho*, a town in Spain, 20 miles from Cordova. *Manf.* Woollens, wine, oil, and earthenware. *Pop.* 5,300.

Espen, Zeger Bernard Van, *es'-pen*, a learned professor at Louvain, who opposed the formulary and the bull Unigenitus, by which he brought himself into trouble, and went to Amersfort to avoid his enemies, where he died in 1728, aged 83.—His works on the canon law were printed at Paris, 4 vols. folio, 1753.

Esperance Bay, *es'-pe-rance*, is on the south coast of Australia. *Lat.* 33° 55′ S. *Lon.* 121° 47′ E.

Espichel, Cape, *ais-pe'-chel*, is on the west coast of Portugal, on the Atlantic, 20 miles from Lisbon. *Lat.* 38° 23′ N. *Lon.* 9° 14′ W.

Espière, *es'-pe-air*, a town of Belgium, 8 miles from Courtrai, where the allied Austrian and English army defeated the French, May 22, 1794.

Espinhalo, *ais'-peen-yal'-ho*, an extensive mountain-chain of Brazil, containing rich diamond-mines. After traversing several provinces, it terminates at the Uruguay.

Espinosa de los Monteros, *ais'-pe-no'-sa dai los mon-tair'-os*, a town of Spain, on the Trueba, 50 miles from Burgos. *Pop.* 2,500.—Here the French defeated the Spaniards in 1808.

Espiritu Santo, *ai-spe'-re-too nan'-to*, the name of several islands and bays in N. and S. America.

Espiritu Santo, a town of Cuba, near the middle of the island. *Pop.* 8,000, of whom half are whites.

Espiritu Santo, a maritime province of Brazil, with an infertile soil, but adapted for the culture of sugar. *Pop.* 140,000. *Lat.* between 18° 30′ and 21° 20′ S. *Lon.* between 39° 40′ and 42° 40′ W.—The capital town of this province is of the same name, and has about 1,000 inhabitants.

Espiritu Santo Island, the largest island of the New Hebrides, in the Pacific Ocean. *Ext.* 65 miles long, by 20 broad. *Pop.* Unascertained.

Espremenil, James Duval d', *es'-prem-e-neel*, a French advocate, who became counsellor of the parliament of Paris, and distinguished himself by his violence during the French revolution. d. on the scaffold with his old antagonist Chapelier, in 1794. b. at Pondicherry, 1746.—On his way to the place of execution, he said to his companion, "We have at this moment a terrible problem to solve; namely, to which of us two the shoutings of the mob are addressed?" He was the author of "Remonstrances," published by the parliament, 1788; "Nullity and Despotism of the Assembly," 8vo; "Actual State of France," 1790, 8vo.

Esprit, St., *es'-pre*, a town of France, in the department Landes, and on the Adour, opposite Bayonne, of which it is a suburb. *Pop.* 7,000.

Espronceda, José de, *ais-prone-thai'-da*, a Spanish poet of some reputation, but whose political predilections brought him, at an early age, into difficulties with the government of his country. He was twice imprisoned before he was eighteen, and, on the last occasion, fell in love with the daughter of a brother prisoner, when he was shipped to England with some other Spanish refugees. Here he made himself acquainted with the language, and devoted himself to the study of Shakspeare and other poets. In 1829 he took part in the political disturbances in Paris, and fought at the barricades. On the death of Ferdinand, the king of Spain, he returned to Madrid, and entered the regiment of body-guards of the queen. In 1835 and 1836 he was fighting in defence of the barricades in the streets of Madrid; and, in 1841, became secretary to the embassy of the Hague. On his return to his country, he became a member of the Cortes, which had long been an object of his most fervent ambition. b. near Almendralejo, Estremadura, 1810; d. at Madrid, 1842.—The poetry of Espronceda is estimated highly by his countrymen; but it consists only of a few short effusions, which altogether do not amount to more than would be comprised in a single volume little larger than the "Vicar of Wakefield." The character of his muse may, in some degree, be indicated by naming a few of the titles of the subjects upon which it was exercised—"The Beggar," "The Executioner," and "The Pirate."

Esquimault, Harbour of, *es'-que-molte*, the principal harbour of Vancouver's Island. (*See* Vancouver's Island.)

Esquimaux, or Eskimaux, *es'-que-mo*, an aboriginal people of N. America, inhabiting Labrador. They are low in stature; their chief employment is hunting and fishing, and they observe some sort of sacrifices. They live upon the raw flesh of whales, bears, &c., and wear the skins of the latter animals, with the hairy sides next their bodies. Darkness pervades their regions from one to six months in the year, during which the earth is bound up in impenetrable frost, and they live in huts very cleverly constructed of snow and ice. On the return of the sun, they have, during the summer, continual day, and lead the life of hunters and fishermen.

Esquimaux, an island and harbour in the Gulf of St. Lawrence, N. America. They are on the Labrador coast. *Lat.* 54° 35′ N. *Lon.* 56° 21′ W.

Esseck, *es-sek'*, a town and fortress of the Austrian empire, in Sclavonia, on the Drave, 80 miles from Belgrade. It contains an arsenal, barracks, and other military buildings, capable of containing 30,000 men. *Manf.* Silk stuffs. *Pop.* 14,000.—There were several battles fought here between the Turks and Germans. Esseck was finally taken from the Turks in 1687, since which time, it has continued in the hands of the house of Austria.

Essen, *es'-sen*, a town of Prussian Westphalia, 20 miles from Dusseldorf. It is the seat of a mining board and military court. *Manf.* Arms, steel wares,

woollens, and linens. In its neighbourhood are coal-mines. *Pop.* 8,000.

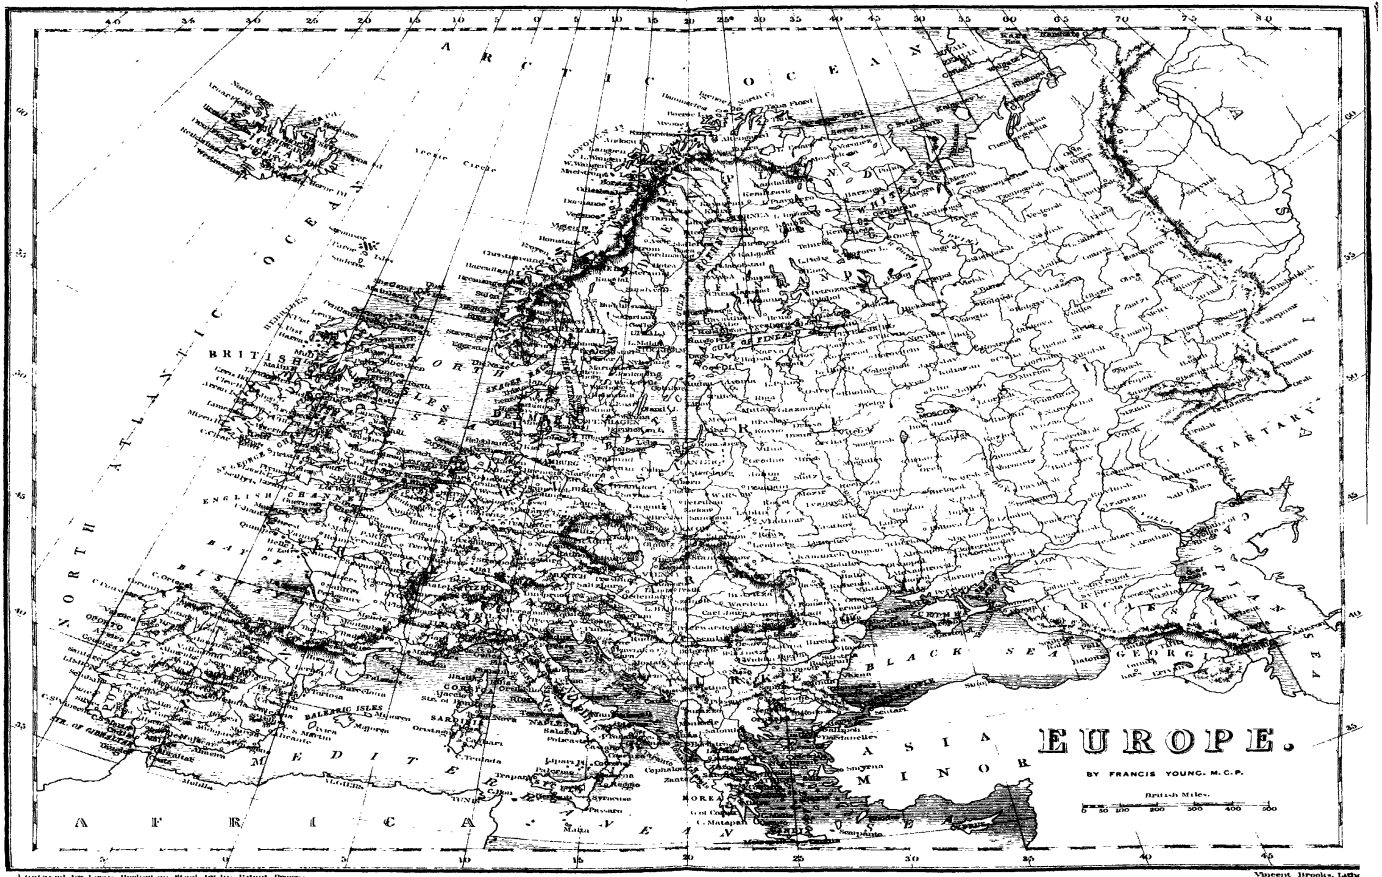
Essequibo, *es'-se-ke'-bo*, a river of British Guiana, S. America, entering the Atlantic by an estuary 20 miles broad. It has many islands, and gives its name to a country which extends along its banks. Its length has been estimated at 500 miles.

Essex, *es'-sex*, a maritime county of England, bounded N. by the counties of Cambridge and Suffolk, E. by the German Ocean, S. by the river Thames (which separates it from the county of Kent), and W. by the counties of Hertford and Middlesex. *Area*, estimated at 1,657 square miles. *Desc.* Diversified with a gentle alternation of hill and dale. On the coast, the land is broken, and indented by arms of the sea, which form a series of islets and peninsulas. Extensive salt-marshes also border the coast, most part of which is protected by embankments from the inroads of the ocean. *Rivers.* The principal are the Colne, the Blackwater, the Chelmer, the Crouch, the Ingerbourn, the Roding, and the Cam. Besides these, it is bounded by the Thames, the Stour, the Stort, and the Lea. *Pro.* Almost every diversity of soil is to be found within the limits of this county; it is, therefore, generally well adapted for agricultural pursuits, and its farming is placed among the best in England. Its principal crops are wheat, barley, oats, beans, pease, turnips, teazels, saffron, caraway, and hops. *Manf.* Essex was formerly noted for woollen manufactures of various descriptions; but these have declined; baize, however, and sacking are still made in various parts. Silks are also manufactured. A considerable proportion of the inhabitants are employed in its oyster fisheries, which are valuable. *Pop.* 370,000.

Essex, the name of several counties in the United States, with populations varying between 5,000 and 140,000. They are in Vermont, Massachusetts, New York, New Jersey, and Virginia. The name also of several small townships in the U.S.

Essex, the E. county of Upper Canada, in British N. America, between lakes Erie and St. Clair.

Essex, Thomas Cromwell, Earl of, was the son of a blacksmith at Putney. Early in life he became clerk to the English factory at Antwerp; but, leaving that situation, he went into several countries as the secret emissary of the state. On his return to England, he was taken into the service of Cardinal Wolsey, who obtained him a seat in the House of Commons, where he defended his patron with great spirit. On the fall of the cardinal, Cromwell became the chief adviser of Henry VIII., who gave him several important places. He was very instrumental in the dissolution of the monasteries, and greatly promoted the Reformation. For these services the title of earl of Essex, with many manors and estates, chiefly the spoils of the Church, were conferred upon him. At length his affairs took an adverse turn. He had been so unfortunate as to advise the marriage of the king with Anne of Cleves, who, not proving agreeable to Henry, that capricious sovereign wreaked his vengeance on the adviser of the marriage, and caused him to be tried for high treason and heresy. To be so accused was certain death. Accordingly, he suffered decapitation on Tower-hill, in 1540. B. at Putney, Surrey, about 1490.—He was a man of a liberal mind, and promoted more men of merit while he was in power, than any of his predecessors. He left a son, who was created Lord Cromwell; which title continued in the family many years.



Essex, Robert Devereux, Earl of, was the son of Walter, earl of Essex, and in 1585 accompanied the earl of Leicester, the favourite of Queen Elizabeth, to Holland, where he behaved with bravery at the battle of Zutphen. On his return to England, he was made master of the horse, and rose rapidly in the royal favour. In 1589, he accompanied Sir Francis Drake and Sir John Norris, in an expedition to Portugal, which gave great displeasure to the queen, whose dissatisfaction was further increased by his marrying a daughter of Sir Francis Walsingham and the widow of Sir Philip Sidney. In 1591, he commanded the forces sent to the assistance of Henry IV. of France, but was unsuccessful, and lost his only brother, to whom he was greatly attached. In 1596, he was appointed joint-commander with Lord Howard in an expedition against Spain, where he contributed to the capture of Cadiz, and also to the destruction of 57 ships of war belonging to the enemy. After this, he had the command of a fleet sent out to intercept the Spanish Plate fleet; but nothing was done except the taking of Fayal by a separate division of the squadron, commanded by Sir Walter Raleigh; and this occasioned a dispute between him and the earl. In the following year, Essex was made earl-marshal of England, and spoke vehemently against a peace with Spain, in opposition to Lord Burleigh, who supported the measure. On the death of that statesman, Essex succeeded him as chancellor of Cambridge; but about this time, at a private council held respecting the appointment of a proper person to govern Ireland, he had the imprudence to oppose her majesty with rudeness; on which she gave him a box on the ear. The earl instantly laid his hand on his sword, and swore that he would not endure such treatment, even from her father, and withdrew from the court. At length a reconciliation was effected, and he was sent to Ireland to subdue the province of Ulster, which had risen in rebellion. The ill success which attended him in this expedition, was the true beginning of his downfall, as it gave his enemies an opportunity of poisoning the queen against him, with apparent justice, during his absence. On his return to England, however, he met with a better reception than he expected; but, soon after, fell into disgrace, and was imprisoned. In 1600 he regained his liberty; but instead of conducting himself with caution, he began to vent his indignation in bitter terms, and said that "the queen grew old and cankered, and that her mind was become as crooked as her carcass." His enemies having intelligence of his actions and speeches, sent for him to attend the council, which he refused, and began to arm in his own defence. Some blood was shed before he surrendered; on which he was made prisoner, tried, and beheaded, in 1601. B. at Netherwood, Herefordshire, 1567.—A story is told of the queen having given Essex, whilst in her favour, a ring, with the assurance that, on his sending it to her at any time when he might be in trouble, he should receive her pardon. This ring, it is said, he gave to the countess of Nottingham, his relation, and the wife of his inveterate enemy, the admiral, to carry to the queen; but that lady, in obedience to the commands of her husband, kept it, and the unhappy Essex suffered. On her deathbed the countess is stated to have confessed this fact to Elizabeth, who said, that "God might forgive her, but she never could." The foundation of this story is uncertain; but it has served to embellish a tragedy called "The Earl of Essex." (*See* Elizabeth.)

Essex, Robert Devereux, Earl of, son of the above, was born in 1592, was educated under Sir Henry Savile at Merton College, Oxford, and was restored to his family honours by James I. He married Lady Frances Howard, daughter of the earl of Suffolk; but she, contracting an affection for the royal favourite, Robert Carr, afterwards earl of Somerset, instituted a shameful suit against her husband, and obtained a divorce. In 1620 Essex served under Sir Horatio Vere in the Palatinate, and afterwards under Prince Maurice in Holland. On his return to England, he appeared as a member in opposition to the court; and on the breaking out of the rebellion, had the command of the parliamentary army. He fought against the king at Edgehill, after which he took Reading, raised the siege of Gloucester, fought in the double battle of Newbury, and succeeded in covering London. In 1644 he marched into the West; but was so completely inclosed in Cornwall, that he and his principal officers were glad to escape by sea. By the Self-denying ordinance, in 1645, he was deprived of his command, and died the year following. B. 1592.

Essington. (*See* Port Essington.)

Essling, *es'-sling*, a village of Lower Austria, on the left bank of the Danube, 6 miles below Vienna. Between this village and that of Aspern, the French were repulsed by the Austrians in a severe engagement in 1809. (*See* Aspern.)

Esslingen, *ess'-ling-en*, a town of Wurtemberg, on the Neckar, 6 miles from Stuttgart. *Manf.* Woollens, cottons, lacquered wares, and musical instruments. *Pop.* 7,500.—A station on the Ulm Railway.

Engraved by Lewis Becker on Steel, by his Patent Process.

Printed and published by S. G. Bretton, Bouverie St. Fleet St. E.C.

Vincent Brooks, Lith.

ESSONNES, *es'-son*, a small town of France, standing on a river of the same name, 15 miles from Paris. *Manf.* Tobacco and table-linen. *Pop.* 4,000.

ESTAGEL, *es'-ta-gel*, a town of France, in the department of the Eastern Pyrenees, 10 miles from Perpignan. *Pop.* 2,500, mostly employed in quarries and distilleries.—This is the birthplace of Arago, the astronomer.

ESTAING, Charles Henry, Count d', *es'-tăing*, a French commander, who served under Count Lally in India, where he was made prisoner by the English; but was released on his parole, which he, however, broke. In the American war he was employed as vice-admiral and general of the French armies, and took the island of Grenada. In 1787 he became member of the Assembly of Notables, and commandant of the national guards at Versailles at the commencement of the Revolution. B. in Auvergne; guillotined at Paris, 1793.

ESTAMPES, Anne, *es'-tamp*, wife of the duke of Estampes, and mistress of Francis I. of France. She carried on a correspondence with Charles V. of Spain, and informed him of the state of the armies and the country. By her means Charles was enabled to gain considerable advantages, and to humiliate France. After the death of Francis, she retired to her country seat, where she died, in 1576.

ESTE, *est*, a river of Hanover, which, after a course of about 30 miles, joins the Elbe, 6 miles from Altona.

ESTE, *es'-te*, a walled town of Lombardy, 15 miles from Padua. It contains several good buildings. *Manf.* Linens, silk, and earthenware. *Pop.* 8,000.

ESTE, HOUSE OF, one of the oldest historical families of modern Europe, its origin being traced as far back as the 5th century. The last offspring of this house was Maria Beatrice, wife of the archduke Ferdinand of Austria, who died in 1800. Their son, Francis IV., was restored to the Modenese dominions of his maternal ancestors by the treaty of Paris, in 1814. He died in 1846, and was succeeded in his possessions and titles by his son, Francis V., deposed in 1859.

ESTELLA, *ais-tel'-la*, a town of Spain, in Navarre, 26 miles from Pampeluna. *Manf.* Principally woollens. *Pop.* 6,000.

ESTEPONA, *ais-tai-po'-na*, a maritime town of Spain, on the Mediterranean, 25 miles from Gibraltar. *Pop.* 9,000, mostly engaged in linen-weaving and fishing.

ESTHER, *est'-her*, a Jewess of the tribe of Benjamin, and cousin to Mordecai. Ahasuerus, king of Persia, married her, after divorcing his queen, Vashti. His favourite minister, Haman, out of resentment to Mordecai, having plotted the destruction of all the Jews in the empire, she, in their behalf, supplicated the king, who revoked the decree, and ordered Haman to be hanged on the gallows which he had prepared for Mordecai. In memory of this deliverance, the Jews celebrate the yearly feast of Purim. Historians are not agreed as to the king who is called Ahasuerus in Scripture; but he seems to have been Darius, son of Hystaspes.

ESTHONIA, or REVEL, *es-tho'-ne-a*, a government of the Russian empire, bounded on the W. by the Baltic, N. by the Gulf of Finland, E. by Ingria, and S. by Livonia. *Area*, 7,800 square miles. *Desc.* Level, with rocky shores, a sandy soil, and humid climate. About two-thirds of it are unproductive, or covered with pine forests. *Rivers.* The Narva, Keyel, and Loksu. *Pro.* Hemp, flax, hops, and tobacco. *Pop.* 312,000. *Lat.* between 58° 15′ and 39° 40′ N. *Lon.* between 22° 10′ and 28° 5′ E.—After having been long an object of bloody contention between the Russians, Poles, and Swedes, this province was confirmed to the latter by the peace of Oliva in 1660; but it was subdued by Peter the Great in 1710, and finally ceded to Russia in 1721.

ESTLE, or ESTELL, *es'-tel*, a county of Kentucky, U.S. *Area*, 300 square miles. *Pop.* 4,000, of whom a fourth are slaves.

ESTRADES, Godfrey, Count of, *es'-trad*, a French general and statesman, who, in 1661, was sent ambassador to England, and again in 1666, where he strenuously maintained his right of precedence over the Spanish ambassador. The year following he went to Holland, and concluded the treaty of Breda. In 1673 he was at the conference at Nimeguen, and continued to be engaged in politics up to the time of his death. B. at Agen, 1607; D. 1686. The negotiations of the Count d'Estrades were printed at the Hague in 1472, in 9 vols. 12mo.

ESTRÉES, Francis Annibal d', *des'-trai*, duke and marshal of France, was educated for the church, and appointed bishop of Laon, which he quitted for a military life. D. 1573; D. at Paris, 1670.—He wrote "Memoirs of the Regency of Mary de Medicis," and "A Narrative of the Siege of Mantua." Gabrielle d'Estrées, the mistress of Henry IV., was this nobleman's sister.

ESTRELLA, *ais-trail'-ya*, a river of Central America, in the state of Costa Rica. After a course of 50 miles, it enters the Pacific, near Quaypo.—Also, a mountain-range of Brazil, in the province of Rio de Janeiro, with an average height of 3,300 feet. *Length*, 20 miles.

ESTRELLA, SERRA DE, a mountain-range of Portugal, in the province of Beira. *Height.* Its culminating peak is 7,520 feet. *Length*, 74 miles.

ESTREMADURA, *ais'-trai-ma-door'-a*, an old province of Spain, having the frontier of Portugal on the W., the province of Salamanca on the N., Toledo on the E., and Cordova with Seville on the S. *Ext.* About 140 miles long, and 120 broad. *Area*, 14,166 square miles. *Desc.* Fertile, but nearly all of it devoted to pasturage. *Rivers.* The Tagus and Guadiana. *Pro.* Corn, wine, hemp, and flax; but agriculture is much neglected, and the population live largely on chestnuts. Cattle-rearing is carried on. *Manf.* Unimportant. *Pop.* about 610,000. *Lat.* between 37° 54′ and 40° 38′ N. *Lon.* between 4° 50′ and 7° 24′ W.

ESTREMADURA, an important province of Portugal, which comprises Lisbon, and extends along the Atlantic, to the north and south of the capital; being bounded N. by Beira and E. by Alentejo. *Ext.* About 140 miles in length, and 70 in breadth. *Area*, 7,176 square miles. *Desc.* Mountainous in the north, and, in general, fertile. *Rivers.* The Tagus, which divides it nearly into two equal parts. *Pro.* Wine, fruits, oil, honey, cork, and salt. *Manf.* Unimportant. *Pop.* 785,000. *Lat.* between 38° 5′ and 40° 15′ N. *Lon.* between 7° 50′ and 9° 30′ W.

ESTREMOS, *ais'-trai-mos*, a strongly-fortified town of Portugal, in Alentejo, on the Tarra, 22 miles from Evora. It consists of the upper and lower towns, and has a castle, cavalry barracks, and arsenal. *Manf.* Earthenware, and near it are some marble-quarries. *Pop.* 7,000.

ÉTAMPES, *et'-amp*, a town of France, in the department of the Seine and Oise, 20 miles from Versailles. *Manf.* Leather, soap, linens, and woollens. *Pop.* 8,200. A station on the Paris and Orleans Railway.

ÉTAPLES, *ai'-tapl*, a seaport of France, in the Pas-de-Calais, 11 miles from Boulogne. It has both breweries and distilleries, with a trade in salt. *Pop.* 2,500.—Here, in 1492, a treaty was concluded between Henry VII. of England and Charles VIII. of France, when the latter was on the point of setting out on his Italian expedition.

ETAWAH, *et'-a-waw'*, a fortress and capital of a district of British India, between the rivers Jumna and Ganges, 60 miles from Agra. It has greatly fallen into decay. *Pop.* Unascertained.—The DISTRICT has an area of 1,671 square miles, and a population of about 500,000. Formerly, Thuggism prevailed in this district to a large extent, until suppressed by the British government.

ETEOCLES, *e-te'-o-kleez*, a son of Œdipus and Jocasta. After his father's death, it was agreed between him and his brother Polynices, that they should both share the royalty, and each reign alternately a year. Eteocles, by right of seniority, first ascended the throne; but after the first year of his reign, he refused to resign in favour of his brother. Polynices resolved to punish him, and implored the assistance of his father-in-law, Adrastus, king of Argos, who assisted him with a large army. War commencing, and having been carried on with various success for some time, it was at last decided by the two brothers, that they should end their dispute by engaging in single combat. They both fell, and it is said that their ashes separated themselves on the burning pile, as if sensible of resentment, and hostile to reconciliation.

ETHAM, *e'-thăm*, 'their strength,' a desert round the western arm of the Red Sea.

ETHAN, *e'-than*, 'strong,' a chief musician in the temple of Solomon.

ETHELBALD, *eth'-el-bald*, king of Wessex, was the eldest surviving son of Ethelwolf. He married his stepmother, Judith of France, but was forced to abandon that connection, and she became the wife of Baldwin, count of Flanders, and the ancestress of Matilda, wife of William the Conqueror, and, through her, of the kings of England. Ethelbald was engaged in military conflicts with the Danes, and distinguished himself by the common quality of bravery, but otherwise holds no remarkable place in history. D. 860.

ETHELBERT, *eth'-el-bert*, king of Kent, who married Bertha, daughter of Caribert, king of France. By her means he was induced to embrace Christianity, which he had permitted to be preached to his subjects by Augustine, the monk. After enacting several laws, he died 616.

ETHELBERT, king of England, the second son of Ethelwolf, succeeded his brother Ethelbald in 860. He was a virtuous prince, beloved by his subjects, and mostly engaged in repelling the incursions of the Danes. D. 866, and was buried at Sherborne.

ETHELRED, *eth'-el-red*, king of England, the son of Edgar, succeeded his brother, Edward the Martyr, in 978. His unmanly spirit submitted to pay a tribute to the Danes, by a tax levied on his subjects, called Danegelt. To free himself from this oppression, he caused the Danes to be treacherously massacred, throughout the country, in one day. On this, Sweyn, king of Denmark, entered his kingdom, and compelled him to fly to Normandy; but Sweyn dying soon after, Ethelred returned, and, after an inglorious reign of 37 years, died, 1016.

ETHELWOLF, *eth'-el-woolf*, king of England, came to the crown in 838, and has rendered his reign famous for being that in which tithes were instituted. He was a mild and religious prince, and went to Rome with his youngest son, Alfred. D. 857, and was buried at Winchester.

ETHEREGE, George, *eth'-e-redj*, an English dramatic writer of the reign of Charles II. In 1664 he produced the comedy of "The Comical Revenge; or, Love in a Tub." Encouraged by the favourable reception of this piece, he brought out another in 1668, entitled "She Would if She Could." In 1676 appeared his "Man of Mode; or, Sir Fopling Flutter." These productions raised him to a place among the best wits of his time, although they are more remarkable for spirit of dialogue than originality of invention. Their licentiousness, however, has long ago excluded them from public representation. In 1683 he received the honour of knighthood. B. 1636; D. at Ratisbon, from a fall down a stair, after a convivial entertainment, 1688.

ETHIOPIA, *e'-the-o'-pe-a*, 'blackness,' a district of Arabia Felix, including the land of Midian. Also a large country on the W. shore of the Red Sea, now called Abyssinia. (*See* ABYSSINIA.)

ÉTIENNE, ST., *ai'-te-en*, a town of France, in the department of the Loire, 32 miles from Lyons. Its principal public institutions are a school of music, a national college, a public library, and a chemical laboratory. *Manf.* Firearms, hardware goods, silks, embroidery, lace, muslins, leather, glass, and paper. In its vicinity are both coal and iron mines. *Pop.* 57,000.—It is connected by railway with Lyons.—This is a name common to many parishes and towns of France, none of them with a population above 5,000.

ÉTIENNE DE BAIGORRY, ST., *bai-gor'-re*, a town of France, in the department of the Lower Pyrenees, 23 miles from Bayonne. *Pop.* 3,300.

ETIVE, LOCH, *et-iv'*, an inlet of the Atlantic Ocean, on the west coast of Scotland. *Ext.* 20 miles long, with a varying breadth of from half a mile to 3 miles. It abounds with salmon, seals, and porpoises.

ETKO, *et-ko'*, a lagoon of Lower Egypt, 7 miles from Rosetta. It was formed by an inundation of the Nile in 1801, and has a length of about 18 miles, and an average breadth of 4.

ETNA, or ÆTNA, *et'-na*, a volcanic mountain of Sicily, on the E. coast of the island, and about 10 miles from Catania. *Circumference* at its base, 63 miles. *Height*, 10,874 feet above the level of the sea. *Desc.* This is the most celebrated mountain in Europe, and is divided by the Sicilians into three parts or regions,—the lava or lower, the wooded or middle, and the upper. The lower contains vineyards, corn-fields, and pastures, and many towns, villages, and convents; the middle is crowded with forests of oak, chestnut, ash, fir, and pine, and with an infinite number of aromatic plants; the upper is entirely destitute of vegetation, and the summit is always covered with ice and snow, except here and there, where it is overspread with a thick layer of black ashes. *Eruptions.* The first eruption of Etna on record is that mentioned by Diodorus Siculus, without fixing the period when it happened; but the second, recorded by Thucydides, was in the year 734 B.C. From this period to the year 1447 there were eighteen more eruptions. After this it ceased to emit fire nearly 90 years; when, in 1536, another took place. Others followed in 1554, 1567, 1603, 1669, 1682, and 1693, which last was very terrible, and attended with an earthquake that overturned the town of Catania. Smaller eruptions afterwards happened, in 1755, 1763, 1764, 1766, 1780, and 1787. From the great crater at the top issues continually a sulphureous smoke; but eruptions hence are very rare, as the fire cannot rise to that height without extraordinary exertions, and the lava breaks out at some fissure where it finds the least opposition.—Besides the fruits, which are the finest in the island, and the wood for fuel, which Etna affords, the inhabitants likewise derive a great profit from its snow. This is an indispensable necessary in Sicily and the S. part of Naples, and is in greater request than ice, because it affords a more cooling beverage.

ETOLIA, a province of Greece. (*See* ÆTOLIA.)

ETON, *e'-ton*, a town of Buckinghamshire, on the Thames, opposite Windsor, with which it is connected by a bridge, and within a short distance of the Windsor station of the Great Western Railway. It consists principally of one street, and is chiefly celebrated for containing a royal seminary of education, called Eton College, founded by King Henry VI., in 1446. The average number of "boys" resident here, is about 600, and they are principally composed of the sons of the aristocratic and wealthy. *Pop.* 3,700.

ETRURIA, *e-troor'-e-a*, a country of ancient Italy, now forming the greater part of Tuscany, the duchy of Lucca, and a portion of the Pontifical States. The name was revived by Napoleon I., who formed a kingdom of Etruria, and annexed it to the French empire in 1808.

ETTEN, *et'-ten*, a village of the Netherlands, 8 miles from Breda. It has a trade in corn, cattle, and fuel. *Pop.* 5,500.

ETTLINGEN, *et'-ling-en*, a town of Baden, in the circle of the Middle Rhine, 5 miles from Carlsruhe. *Manf.* Paper, cotton goods, and gunpowder. *Pop.* 5,000.

ETTRICK, *et'-trik*, a parish and river of Scotland, in Selkirkshire. *Pop.* of parish, about 600.—In it James Hogg, better known as the "Ettrick Shepherd," was born, 1772. The river joins the Tweed near Melrose.

ETTRICK FOREST, a pastoral district watered by the Ettrick, and forming, originally, a part of the great Caledonian forest.

ETTY, William, R.A., *et'-te*, an eminent English artist, who, in 1807, entered a student of the Royal Academy; but, after what might be called, without a metaphor, no end of labour and disappointment, he was unable to get himself represented by any of his pictures on the walls of the academy till 1811, when "Telemachus rescuing Antiope" was permitted to appear. From this time he continued to *plod*, but not to attract, at his art; and, in 1816, was induced to visit Italy, for the purpose of study; but he returned, almost immediately, to work again in London. Labour, as usual, met its reward. In 1820 he commanded notice by his "Coral-Finders;" and the following year his "Cleopatra arriving in Cilicia" procured and established a reputation. He was now famous, and produced a great many works, and especially excelled in representing the nude female. His aim, in all his large pictures, was to paint some great moral on the heart; as, for example, in "Ulysses and the Sirens," he meant to show the importance of resisting sensual delights. The only picture which the nation possesses of his painting is "Youth at the Prow, and Pleasure at

the Helm," which is in the Vernon Gallery. B. at York, 1787; D. there, 1849.

Eu, *oo*, a town of France, in the department of the Lower Seine, 18 miles from Dieppe. *Pop.* about 4,000. —Here, in 1843, Queen Victoria and Louis Philippe held an interview.—The FOREST of Eu extends, for a considerable way, on the east and south sides of the town.

EUBŒA, *u-be'-a*, the largest island in the Ægean Sea, after Crete, formerly distinguished by the obsolete name of Negropont. It is separated from the continent by the narrow strait of Eubœa, crossed by a bridge at its narrowest point. *Ext.* 115 miles long, with a breadth of 33 at its extreme points. *Desc.* Mountainous, but fertile, and producing wine, corn, cotton, wool, pitch, and turpentine. Cattle and goat rearing are extensively carried on. *Pop.* 66,000. *Lat.* between 37° 57′ and 39° 2′ N. *Lon.* between 22° 40′ and 24° 40′ E.

EUCLID, *u'-klid*, a celebrated mathematician of Alexandria, who immortalized his name by his books on geometry, in which he digested all the propositions of the eminent geometricians who preceded him, as Thales, Pythagoras, and others. Ptolemy became his pupil, and his school was so famous, that Alexandria, where he taught, continued for ages the great university for mathematicians. Lived in the 3rd century B.C.—The best, indeed only, edition of his whole works is that of Gregory, Oxford, folio, 1703. His Elements have gone through innumerable editions, and have been used in every country where mathematics are taught.

EUCLIDES, *u-kli'-dees*, a native of Megara, and a disciple of Socrates. When the Athenians had forbidden all the people of Megara, on pain of death, to enter their city, Euclides disguised himself in woman's clothes to introduce himself into the presence of Socrates. He was the founder of the school called the Megaric, distinguished by its dialectic subtlety. He wrote six dialogues, which are lost. Lived in the 4th century B.C.

EUDOCIA, *u-do'-she-a*, a learned Athenian lady, whose original name was Athenais. She was the daughter of Leontius, the philosophical sophist, who left her only a small legacy, bequeathing the rest of his property to his two sons. Conceiving herself ill used, she went to Constantinople to lay her complaint before Theodosius II. Here she became the favourite of Pulcheria, sister of that emperor, and embraced the Christian religion. In 421 she was married to the emperor, who afterwards divorced her in a fit of jealousy. She then went to Jerusalem, where she built churches, and led a life of great devotion, always protesting her innocence of the crime laid to her charge by Theodosius. D. 460.—This empress wrote some Greek poems, and paraphrases on some of the prophets. She is said also to have written a life of Christ, composed of lines taken from Homer.

EUDOCIA, or EUDOXIA, widow of the emperor Constantine Ducas, on whose death, in 1067, she assumed the imperial diadem, and married the general Romanus Diogenes. When her son Michael ascended the throne, he shut her in a convent, where she amused herself in writing on the pagan mythology. She left a treatise on the genealogies of the gods and heroes, which was printed in Villoison's "Anecdota Græca," 1781.

EUDOCIA, Feodorevna, first wife of Peter I., czar of Russia, and daughter of the boyard Feodor Lapukin. Peter married her in 1689, but a few years afterwards he sent her to a nunnery, on account of her complaints of his infidelity. D. 1731.

EUDOXUS of Cnidus, *u-dox'-us*, an eminent astronomer of Caria, in Asia Minor. He studied in Egypt with Plato, and afterwards opened a mathematical school at Athens. It is said that he passed a great part of his time on a high mountain, where he made celestial observations. Lived in the 4th century B.C.

EUGÈNE, Francis, *oo'-zhain*, Prince of Savoy Carignan, was the son of the count of Soissons, by the niece of Cardinal Mazarine. He was intended for the church, but the death of his father changed this design, and determined him to follow the military profession. His mother being banished to the Netherlands by Louis XIV., and his family otherwise wronged by that sovereign, he went to Vienna, where the emperor gave him a regiment of dragoons, and he served in Hungary with great reputation against the Turks. In 1691 he, at the head of the imperial army, entered Piedmont, where he relieved Coni, which was at that time besieged by the French, and took Carmagnole. In 1697 he commanded the imperialists in Hungary, and, the same year, defeated the Turks at the battle of Zeuta. On the death of the king of Spain, in 1701, the "war of the Spanish succession" commenced, and Prince Eugène achieved new laurels. At the close of the campaign of 1702, he returned to Vienna, and was made president of the council, and associated in the command of the allied army with the duke of Marlborough. In 1704 he had a principal share in the famous battle of Blenheim. In 1707 he was repulsed at Cassano by Vendôme; but he soon recovered his reputation in a bloody action near Turin, which was then besieged by the French, whose trenches he forced, and gained a complete victory. The same year he entered France, and laid siege to Toulon, but did not succeed in taking the place. In 1708 he shared in the victory of Oudenard and in the capture of Lille. In 1709 he fought at Malplaquet, where he was severely wounded, but would not quit the scene of action. In 1712 he visited London, to induce the English ministers not to make a separate peace; but his arguments were ineffectual, and England signed the treaty of Utrecht. Now left to carry on the war alone, he was successfully opposed by Marshal Villars, with whom he entered into a negotiation, which was followed by the peace of Radstadt in 1714. In 1716 a war broke out between the emperor and the Turks, on which the prince was again intrusted with the command in Hungary, where, in that year, he defeated the grand vizier at Peterwaradin, this splendid victory being followed by the no less great exploit of the capture of Belgrade. It was here, with 40,000 men, he defeated a relieving army of 150,000 Turks. Peace being concluded at Passarowitz, in 1718, he retired into private life; but in 1733, when the election for the crown of Poland was disputed, he was again employed. This campaign, however, was short, and unproductive of any remarkable action, although successful in its results. B. in Paris, 1663; D. at Vienna, 1736.—During the few years of repose which the peace of Passarowitz brought this warrior, he worthily employed himself in public affairs and in the arts of peace. The emperor Charles VI. found in him as faithful a counsellor as he was a skilful captain; and in the days of his misfortune, he would cry, "Alas! the fortune of the empire has departed with Prince Eugène!" The prince was of the middle height, but stoutly built, and was exempt from those excesses which have so often sullied the characters of great men. Napoleon places him in the same rank of generals as Turenne and Frederick the Great, and considered the plans of his campaigns, as conveying a perfect knowledge of the art of war.

EUGENIUS I., *u-je'-ne-us*, a pope and saint, succeeded Martin in 654. He is praised for his liberality and piety. D. 657.

EUGENIUS II. succeeded Pascal I. in 824, and decreed that in every country parsonage, a master should be kept to read and explain the Scriptures. He, however, defended image-worship, though the practice was condemned by the council of Paris. D. 827.

EUGENIUS III., Pope, ascended the papal chair in 1145. Rome was at that time in a turbulent state, and finding that he could do little good, Eugenius retired to Pisa, and thence to Paris. D. at Tivoli, 1153.

EUGENIUS IV. (Gabriel Condolmero) succeeded Martin V. in 1431, in which year the council of Bâle assembled. This pope and the members of that assembly differed in their judgment, when he issued a bull against them. This, however, was disregarded, and he was under the necessity of confirming the decrees. In 1438 he called a council at Ferrara, to bring about a reconciliation between the Greek and Latin churches. At this council appeared the emperor Paleologus, with several Greek bishops; but the plague breaking out at Ferrara, the council was removed to Florence, where, in 1439, a sort of union was agreed to, but was soon broken. Another council at Bâle deposed Eugenius, and elected Amadeus VIII., duke of Savoy, who took the name of Felix V. Eugenius,

however, triumphed over his adversaries. B. at Venice; D. at Rome, 1417.

EUGENIUS, an obscure grammarian, who was proclaimed emperor in Dauphiné by Count Arbogast, after the murder of Valentinian II., in 392. He crossed the Alps, and made himself master of Milan in 394; but was defeated and slain by the emperor Theodosius. Lived in the 4th century.

EULER, Leonard, *oi'-ler*, a Swiss mathematician, who received his education in the university of Bâle, with a view to the church, but principally devoted himself to mathematical studies under the famous John Bernoulli. In 1727 he followed his friends Hermann and Daniel Bernoulli to Petersburg, where, in 1733, he became professor of mathematics in the Academy of Sciences. In 1735 he impaired his sight by intense application to the solution of a difficult problem. His memoir on "Fire" obtained the prize from the French Academy of Sciences, in 1738, and, in 1740, he divided another, on the Flux and Reflux of the Sea, with Maclaurin and Daniel Bernoulli. In 1741 he went to Berlin, at the invitation of the king, to assist in establishing the academy there. When introduced to the queen-dowager, she expressed her surprise at the paucity of his conversation; upon which he replied, that he had just come from a country where those who spoke were hanged. He continued at Berlin till 1766, when he returned to St. Petersburg, where he soon after entirely lost his sight. Still he continued his favourite pursuits. He also received another prize from the French Academy, for three Memoirs on the Inequalities in the Motions of the Planets; which were followed by two others for solutions of questions on the Theory of the Moon. In 1772 appeared his Lunar Tables. B. at Bâle, 1707; D. at St. Petersburg, 1783. Besides the above works, he wrote a great number of papers in the Memoirs of several academies; "Opuscula Analytica;" "Introduction to the Analysis of Infinitesimals," &c. In 1760, when the Russians invaded Brandenburg and advanced to Charlottenburg, they plundered a house belonging to Euler. When this was told to General Tottleben, he immediately caused reparation to be made to the mathematician, and the empress Elizabeth of Russia presented him with 4,000 florins.

EUMÆUS, *u-me'-us*, a herdsman and steward of Ulysses, who recognized his master, at his return home from the Trojan war, after twenty years' absence, and assisted him in removing Penelope's suitors.

EUMELUS, *u-me'-lus*, son of Admetus, king of Pheræ, went to the Trojan war, and had the fleetest horses in the Grecian army. He distinguished himself in the games appointed in honour of Patroclus.—There are others of this name in ancient history.

EUMENES I., *u'-me-nees*, king of Pergamus, succeeded his uncle Philæterus, 263 B.C., and reigned 22 years.—EUMENES II., nephew of the preceding, succeeded his father, Attalus, 197 B.C. He assisted the Romans against Antiochus the Great, and reigned 38 years.—Both of these sovereigns were greatly attached to learned pursuits, and the latter enriched the famous library of Pergamus, which had been founded by his predecessors, in imitation of the Alexandrine collection of the Ptolemies.

EUMENES, a Greek commander, and accounted the most worthy of all the officers of Alexander to succeed him after his death. He conquered Paphlagonia and Cappadocia, of which he obtained the government, till the power and jealousy of Antigonus obliged him to retire. He then joined his forces to those of Perdiccas, and defeated Craterus and Neoptolemus. He was put to death by order of Antigonus, 315 B.C. The latter, however, honoured his remains with a splendid funeral, and conveyed his ashes to his wife and family in Cappadocia.

EUMENIDES, *u-men'-e-dees*, a name given to the Furies by the ancients. Various fabulous accounts have been given of their origin. They were three in number.—Tisiphone, Megara, and Alecto, to which some add Nemesis, and were supposed to be the ministers of the vengeance of the gods. They therefore appeared stern and inexorable, always employed in punishing the guilty upon earth, as well as in the infernal regions. They were also called Furiæ and Erinnyes, and were generally represented with a grim aspect, bloody garment, and serpents wreathing round their head instead of hair. They held a burning torch in one hand, and a whip of scorpions in the other, and were always attended by Terror, Rage, Paleness, and Death.

EUMOLPIDÆ, *u-mol'-pe-de*, the priests of Ceres, at the celebration of her festivals of Eleusis. They were descended from Eumolpus, a king of Thrace, who was made priest of Ceres by Erechtheus, king of Athens. The priesthood, which practised perpetual celibacy, remained in the family of Eumolpus for 1,200 years.

EUNAPIUS, *u-nai'-pe-us*, a physician, sophist, and historian, who wrote a history of the Cæsars, of which few fragments remain. His "Lives of the Philosophers" of his age is still extant. It is composed with fidelity and elegance, precision and correctness. Lived in the 4th century.

EUNUS, *u'-nus*, a Syrian slave, who inflamed the minds of the people by pretended inspiration and enthusiasm. Oppression and misery compelled 2,000 slaves to join his cause, and he soon found himself at the head of 50,000 men. With this force he defeated the Roman armies, till Perpenna forced him to surrender by famine, and he and the greater number of his followers were impaled on crosses, 132 B.C.

EUPATOR, *u'-pa-tor*, a surname given to many of the Asiatic princes, such as Mithridates, &c.

EUPATORIA, or KOSLOV, *u-pa-tor'-e-a*, a town of Russia, on the W. coast of the Crimea, 65 miles from Perekop. It has a magnificent mosque belonging to the Tartar inhabitants. *Pop.* 15,000.—In September, 1854, the allied English and French armies landed near here, and the town soon after was occupied by a small detachment. The Turks subsequently occupied it, and in 1855 it was attacked by the Russians, who, however, were repulsed by the Turks and the Anglo-French ships of war, lying in the neighbouring roadstead.

EUPEN, *oi'-pen*, a town of Prussia, in the duchy of the Lower Rhine, 10 miles from Aix-la-Chapelle. *Manf.* Woollens, soap, paper; and it has some tanneries. *Pop.* 13,000.

EUPHORBUS, *u-for'-bus*, a famous Trojan, and the first who wounded Patroclus, whom Hector killed. He perished by the hand of Menelaus, and the latter hung his shield in the temple of Juno at Argos. Pythagoras, the founder of the doctrine of the metempsychosis, or transmigration of souls, affirmed that he himself was once Euphorbus, and that his soul recollected many exploits which had been done while it animated that Trojan's body. As a further proof of his assertion, he showed at first sight the shield of Euphorbus in the temple of Juno.

EUPHORION, *u-for'-e-on*. The most remarkable of this name is a Greek poet of Chalcis, in Eubœa. Tiberius took him for his model for correct writing. D. 220 B.C.

EUPHRATES, *u-frai'-tees*, one of the most considerable rivers of Asia, rising in the mountains of Armenia, from two principal sources. At Korna, about 130 miles from its mouth, it is joined by the Tigris; and these united streams form one of the noblest rivers in the East, falling into the Gulf of Persia, about 50 miles from Bassora. *Length*, about 1,800 miles, the Tigris included.

EUPOLIS, *u'-po-lis*, a comic poet of Athens, who severely condemned the vices and immoralities of his age. It is said that he had composed 17 dramatical pieces at the age of 17. Some suppose that Alcibiades put Eupolis to death, because he had ridiculed him in his verses; but Suidas maintains that he perished in a sea-fight between the Athenians and the Lacedæmonians in the Hellespont. Lived in the 5th century B.C.

EURE, *oor*, a river of France, rising in the department of Orne, and falling into the Seine, near Pont-de-l'Arche.

EURE, a department of France, comprising the E. part of Normandy, and situate on the estuary of the Seine. It is divided into five arrondissements. *Area*, 2,414 square miles. *Desc.* Generally level, and producing corn, fruits, and timber. It has extensive pastures, and large numbers of cattle, sheep, and horses are raised. *Minerals.* Iron and millstones. *Manf.* Woollens, cotton, glass, paper, iron, copper, and

zinc wares. *Pop.* 420,000. *Lat.* between 48° 37′ and 49° 28′ N.

EURE AND LOIRE, a department of France, situate to the W. of Paris. It consists of a part of the old provinces Orléannois and Isle-de-France. *Area*, 2,361 square miles. *Desc.* The surface, as in the adjacent department of the Eure, is in general level, and a large quantity of corn is raised. It has excellent pastures, and numerous herds, flocks, and horses are reared. *Minerals.* Iron. *Manf.* Paper, cottons, and coarse cloths. *Pop.* 295,000. *Lat.* between 47° 57′ and 48° 55′ N.

EURIPIDES, *u-rip′-i-dees*, a Grecian tragic poet, who studied at Athens under Anaxagoras the philosopher, and Prodicus the rhetorician. He was twice married, but was unfortunate in both wives, which is supposed to have suggested some of the severe remarks which are found levelled against the female sex, scattered over his works. He left Athens in disgust, on account of the rivalry of Sophocles and the raillery of Aristophanes, and went to the court of Archelaus, king of Macedon. Here he enjoyed all the tranquillity he sought; but as he was walking one evening in a wood, he was assaulted by the king's hounds and torn in pieces. B. at Salamis, 480 B.C.; killed 405 B.C.—The Athenians, out of respect for his talents, went into mourning, and asked for his body; but the Macedonians would not part with it, but erected over it a magnificent tomb at Pella. Only 19, out of 75, of his tragedies are extant; and the best editions are those of Barnes, Cambridge, 1694, folio; and Musgrave, Oxford, 1778, 4to. He has been well translated into English by Woodhull and Potter.

EURIPUS, or EURIPOS, *u-ri′-pus*, a narrow strait, separating the island of Eubœa from the coast of Bœotia. The flux and reflux of its tide continuing regular for 18 or 19 days, and remarkably settled throughout the remainder of the month, was a matter of deep inquiry among the ancients; and it is said that Aristotle threw himself into it, because he was unable to discover the causes of that phenomenon. (*See* ARISTOTLE.)

EUROCLYDON, *u-rok′-li-don*, 'a tempestuous wind;' this wind is now called a *Levanter*, and is one of the dangers of the Mediterranean.

EUROPE, *u′-rope*, the least extensive, but most civilized, of the five great divisions of the globe. It is bounded by the sea in all directions, except the E., where it is separated from Asia by a boundary-line, formed by the river Kara, the Ural mountains and river, and the Caspian Sea. It has the Baltic on the N.; the Mediterranean, the Sea of Marmora, and the Black Sea on the S.; and a very large extent of coast bordered on the W. by the Atlantic. *Ext.* About 3,400 miles long, by about 2,300 broad. Its greatest length is from Cape Rocca, in Portugal, to the head of the Gulf of Karskaia; its greatest breadth is from Cape Matapan, in Greece, to Cape Nordkyn, in Lapland. *Area.* Estimated at 3,770,000 square miles. *Coastline.* Greater in proportion to any other continent, being about 15,000 miles, indentations inclusive. *Seas, Gulfs, Bays, and Channels.* The Mediterranean, Baltic, Black Sea, Sea of Azof, Sea of Marmora, Irish Sea, North Sea, German Ocean, and White Sea. In the Mediterranean are the gulfs of Lyons and Venice, or Adriatic Sea; in the Baltic are the gulfs of Bothnia, Finland, and Riga,—the Skager Rack in the North Sea, and the Cattegat. The Bay of Biscay is in the Atlantic, and the principal channels are the English and St. George's. *Straits.* Dover, Gibraltar, Messina, Bonifacio, Constantinople, Dardanelles, Yenikale, and the Great and Little Belts. *Capes.* Nordkyn in Lapland, N. Cape on the island of Mageroe, the Naze, the Land's End, Capes Wrath, Clear, Ortegal, Finisterre, Rocca, St. Vincent, Tarafa, and Matapan. Cape North is about 4 miles further N. than Nordkyn; but it is not on the continent. *Islands.* The principal are Great Britain and Ireland, in the Atlantic, and the largest in Europe; Sicily, Sardinia, Corsica, Majorca, Minorca, Malta, Elba, Candia, and Eubœa, in the Mediterranean; Zealand, Funen, Rugen, Laaland, Falster, Bornholm, and Aland, in the Baltic. To these are to be added the dreary regions of Spitzbergen and Nova Zembla. Iceland we have assigned to America, as more properly belonging to that continent. *Political Divisions.* Europe contains the countries of Norway, Sweden, Denmark, Great Britain, Ireland, Russia, Holland, France, Austria, Prussia, Spain, Italy, Portugal, Switzerland, and part of Turkey. There are four empires; namely, those of Russia, Turkey, Austria, and France. The monarchies, are those of Great Britain and Ireland, Spain, Portugal, Prussia, Denmark, Sweden and Norway, Sardinia, and Naples, or the Two Sicilies. Italy is (1860) undergoing a political change; and Britain, France, Austria, Prussia, and Russia are called the five great powers. *Mountains.* The principal ranges are the Scandinavian, separating Sweden from Norway in the N., and extending from the Naze to the North Cape; the Alps, the Pyrenees, the Apennines, the Carpathians, and the Balkan, in the S. In the Alps are Monts Blanc and Rosa, the highest peaks in Europe; in the Pyrenees are Maladetta and Perdu, the next highest. Some peaks of the Carpathians have an elevation of upwards of 9,000 feet, as have, also, those of the Balkan. Between Europe and Asia, on the E., is the great Uralian chain, and, on the S., the Caucasian, culminating in Mount Elburz, 18,193 feet above the level of the sea. *Plains.* The great plain commences at the foot of the Pyrenees, and terminates in the Ural mountains, on the east. It comprehends France, Holland, Belgium, and part of Denmark, the N. provinces of Germany, and a large portion of Russia. Indeed, nearly the whole of European Russia is a plain, diversified only by gentle undulations. The other plains are those of Bohemia and Hungary, the latter with an area of 40,000 square miles. *Rivers.* The Danube, Volga, Rhine, Seine, Dnieper, Vistula, Dniester, Don, Dwina, Oder, Elbe, Tagus, Douro, Guadalquiver, Loire, Rhone, Garonne. The longest of these are the Volga and the Danube. On islands or peninsulas are, the Thames in England, the Shannon in Ireland, and the Clyde in Scotland. *Lakes.* The principal are Ladoga, Onega, Maggiore, Como, and Garda, in Italy; the Peipus in Russia; the Wenner, Wetter, and Mælar, in Sweden; with the less extensive, but much better known lakes of Geneva in Switzerland, and Constance between Switzerland and Germany. *Climate.* Temperate. On the S., the continent is within 12° of the tropics; and on the N. it nowhere reaches the line of perpetual congelation. On its W. coasts it is warmer than on its E.; and, under the same latitudes, the E. coast of N. America is much colder than the W. coast of Europe. In some places this difference has been found to range as high as 10° of latitude. *Vegetation.* The most extensive forests are those of Russia, Norway, Sweden, and Germany; and the principal trees of which they consist are the oak, elm, beech, lime, fir, birch, and chestnut. The kingdom of European vegetation, however, might be divided into four zones; the first, or most northern, being that of the birch and fir, which extends south to the 62° in Russia; the second, that of the oak and the beech, extending from this limit to the 48th parallel; the third, that of the vine and chestnut, occupying the region between this parallel and the mountain-chains of the south; the fourth, that of the olive and evergreen woods, comprehending the southern peninsulas. *Zoology.* The wild animals are comparatively few: they consist of the bear, wild boar, wolf, lynx, elk, reindeer, chamois, ibex, wild sheep, and wild ox. In the great forests of Germany the wolf, wild boar, and brown bear are still plentiful; and the forests of Russia and Poland afford shelter to the elk. The chamois and ibex inhabit the mountains of the Alps, and the wild ox is still found in the woods of Russia. The domestic animals are everywhere the same, and consist of the horse, ox, dog, pig, and sheep. The camel is found in the S. of Russia, and the ass is common, generally, in the S. countries. The *birds*, though mostly destitute of that gorgeous richness of plumage which characterizes those of tropical regions, are compensated by a rare brilliancy of song. The principal *insects* are silkworms, bees, Spanish flies, gall-worms, and locusts. *Fish* abound in the seas and rivers, and are of great value. Serpents and lizards are only found in the S. *Pro.* The principal objects of culture are wheat, rye, oats, barley, and potatoes, in the north and middle region. The apple, pear, plum, cherry, and berries of various kinds, are also cultivated. Rice, the olive, the orange,

and the lemon grow to the S. of the great mountain-range; and, in the extreme S., the date-palm, sugar-cane, and cotton-plant are cultivated. The vine is cultivated as high as 51°, and the apple to 55°. *Minerals.* Gold, silver, tin, copper, quicksilver, lead, iron, zinc, coal, salt, and marble. In the precious metals Europe is not rich; but in the useful minerals, as coal, iron, tin, and copper, she is abundantly supplied. Nearly a third of the iron made use of in Europe is supplied by England, and almost all the tin. *Race.* Mostly Circassian, divided into three principal families,—the Teutonic in the N., the Greek-Latin in the S., and the Sclavonic in the E. Besides these, there are the Finnish family, in the N. of Russia; the Celtic, in Wales and the highlands of Scotland; the Basque, in Spain; the Turks, in Turkey; and the Tartar, or Mongolian race, in the N. and S.E. of Russia. *Language.* The Italian, French, Spanish, and Portuguese, which are partly a corruption of the Latin; the German, Flemish, Dutch, Swedish, Danish, and English, which proceed from the Teutonic; the Sclavonic, which predominates in the language of Poland, Russia, Bohemia, and a great part of Turkey in Europe; the Celtic, of which there are dialects in Wales, Scotland, Ireland, the N.W. of France, and Lapland; the modern Greek, and some others. *Rel.* The inhabitants, however divided into sects, are all Christians, with the exception of the Turks and scattered settlements of Jews. The Christians in Europe are composed of three great bodies,—the Catholics, the Protestants, and the Greek Church. *Pop.* 265,000,000. *Lat.* the continental part between 36° and 71° 12′ N. *Lon.* between 9° 30′ W. and 60° 50′ E.—According to the mythology of the poets, Europe received its name from Europa, who was carried there by Jupiter. Bochart derives the name from the Phœnician *ur-appa*, which he makes equivalent to the Greek *leuko-prosōpos*, 'of a white, or fair, aspect;' and considers it as applying to the continent of Europe, from the fairer visages and complexions of its inhabitants. M. Gebelin, on the other hand, deduces the word from the Phœnician *wrab*, 'west,' as indicating the country lying in that direction with reference to Asia. The first inhabitants of Europe came from Asia; and during the period when large and powerful empires flourished in that quarter of the globe, Europe remained, for a length of time, plunged in barbarism. Greece was the first country which emerged from this barbaric state, and she soon attained a very high degree of civilization, spreading, at the same time, her colonies over southern Italy, as well as on the coasts of Gaul and Spain. Rome, founded in the 8th century B.C., now appeared, and, by degrees, conquered the whole of Italy, finally extending her dominion over nearly all Europe, with the exception of its more northern nations. After the fall of the Roman empire, the barbarians, come, for the most part, from Asia, overran Europe, and, for many ages after their advent, there existed on the continent a hideous anarchy. The empire of the Visigoths was formed in Spain, that of the Franks in Gaul, the Lombards in Italy, the Saxons in the north of Germany, the Avari in the south, and, afterwards, the Saxons and Angles, or Anglo-Saxons, in Britain. The Greek empire at Constantinople, the only remnant of the Roman domination, subsisted, nevertheless, in Eastern Europe. About the year 800, a great conqueror and administrator, Charlemagne, moulded, for a time, the heterogeneous mass into one vast empire, embracing the greater part of western Europe. His successors, however, were unable to hold together what the genius of their ancestor had formed; and, from the ruins of his large possessions, arose the separate kingdoms of France, Germany, Italy, Lorraine, Provence, Burgundy, &c. In the 10th century, the great nations of the North came forth from their obscurity, and Russia, Sweden, Norway, and Denmark took rank as European powers, at the same time that the Moors, who had invaded and held the fairest portions of the Spanish peninsula from the 8th century till this period, began to retire before the Christian kings of Leon, Castile, Aragon, and Portugal. At length, in the 15th century, on the taking of Constantinople by the Turks, 1453, all the great states of Europe may be considered to have been founded. There is but little more to remark, except that the United Netherland provinces detached themselves from the Spanish crown in the 16th century; and that it was not till the 18th, that the Prussian monarchy was formed. The general war, which broke out on the French revolution of 1789, changed, for a time, the aspect of the continent, Napoleon I. being triumphant everywhere. After the fall of his empire, however, the old order of things was in a great measure re-established. The territories of the various states, as fixed by the treaties of 1815, are those which now subsist, with the exceptions of the Turkish empire, from which Greece separated in 1827; the kingdom of the Netherlands, divided, in 1831, into the kingdom of Belgium and that of Holland; and the empire of Austria, which, as a consequence of Napoleon III.'s attack on her, in 1859, relinquished Lombardy to the French emperor, who, in his turn, transferred it to the kingdom of Sardinia. (For the histories of particular states, see their own special headings.)

EUROTAS, *u-ro'-tăs*, a son of Lelex, father to Sparta, who married Lacedæmon. He was son of one of the first kings of Laconia, and gave his name to the river which flows near Sparta, and is called, by way of eminence, *Basilipotamos*, 'the king of rivers.' It was worshipped by the Spartans as a powerful god. Laurels, reeds, myrtles, and olives, grew on its banks in great abundance.

EUROTAS, a river of Greece.

EURYALUS, *u-ri'-ă-lus*, the name of several ancient persons, the most remarkable of whom is a Trojan, who came with Æneas into Italy. He rendered himself famous by his immortal friendship with Nisus. (*See* NISUS.)

EURYBIADES, *u-ri-bi'-a-dees*, a Spartan commander of the Grecian fleet, at the battles of Artemisium and Salamis, against Xerxes. He was on the point of striking Themistocles, when the latter was advising an attack on the Persian fleet; upon which the Athenian cried,—"Strike, but hear me." (*See* THEMISTOCLES.) Lived in the 5th century B.C.

EURYDICE, *u-rid'-i-se*, a name common to many women in the works of ancient writers; the most celebrated of whom are,—the wife of Amyntas, king of Macedonia.—A daughter of Amyntas, who married her uncle Aridæus, the illegitimate son of Philip, and hanged herself at the instigation of Olympias.—The wife of the poet Orpheus, who, as she fled before Aristæus, was bit by a serpent in the grass, and died of the wound. Orpheus was so disconsolate, that he ventured to descend into Hades, where, by the melody of his lyre, he obtained from Pluto the restoration of his wife to life, provided he did not look behind him before he came upon earth. He violated the conditions, from his eagerness to see his wife, and Eurydice was taken from him for ever.

EURYNOME, *u-rin'-o-me*, ancient writers have recorded many of this name, the most remarkable of whom is one of the Oceanides, mother of the Graces.

EURYSTHENES, *u-ris'-the-nees*, a son of Aristodemus, who lived in perpetual dissension with his twin brother Procles, while they both sat on the Spartan throne. It was unknown which of the two was born first; the mother, who wished to see both her sons raised to the throne, refused to declare it, and they were appointed joint kings of Sparta, by order of the oracle of Delphi, 1102 B.C. The descendants of Eurysthenes were called Eurysthenidæ, and those of Procles, Proclidæ. Eurysthenes had a son called Agis, who succeeded him. His descendants were called Agidæ. There sat on the throne of Sparta 31 kings of the family of Eurysthenes, and only 24 of the Proclidæ. The former were the more illustrious.

EURYSTHEUS, *u-ris'-the-us*, a king of Argos and Mycenæ, whose birth was hastened by Juno two months, that he might come into the world before Hercules, the son of Alcmena, as the younger of the two was doomed, by order of Jupiter, to be subservient to the will of the other. This natural right was cruelly exercised by Eurystheus, who imposed upon Hercules the most dangerous enterprises, well known by the name of the twelve labours of Hercules. (*See* ALCMENA.)

EUSDEN, Laurence, *use'-den*, an English poet, who in 1718 obtained the laureateship, which made him several enemies, particularly Pope, who placed him in the

"Dunciad." Cooke, in his "Battle of the Poets," refers to him in these lines:—

"Eusden, a laurell'd bard, by fortune raised,
By few been read, by fewer still been praised."

The duke of Buckingham, in his "Session of the Poets," also ridicules him:—

"In rush'd Eusden, and cried, 'Who shall have it
But I, the true laureate, to whom the king gave it?'
Apollo begg'd pardon, and granted his claim,
But vow'd that, till then, he had ne'er heard his name."

He became rector of Coningsby, in Lincolnshire, where he died, 1730. His poems are in Nichols's collection. B. in Yorkshire.

EUSEBIUS, *u-se'-be-us*, succeeded Marcellus as bishop of Rome, in 310, and died the same year. He was strongly opposed to the readmission of lapsed Christians to communion. His opinions on this subject gave great offence at Rome, and the emperor Maxentius banished the pope to Sicily. He was by birth a Greek.

EUSEBIUS, Pamphilus, an ecclesiastical historian, who, in the persecution by Diocletian, assisted the suffering Christians by his exhortations, particularly his friend Pamphilus, whose name, out of veneration, he assumed. He was chosen bishop of Cæsarea about 313, and was at first the friend of Arius, because he considered him as persecuted; but on perceiving the dangerous extent of his opinions, he abandoned him, and assisted at the council of Nice, which he opened with an address: he was also at that of Antioch. The emperor Constantine had a particular esteem for him, and showed him several tokens of favour. B. in Palestine, about 270; D. 338.—He wrote an "Ecclesiastical History," the "Life of Constantine," and other works. The best edition of his "Ecclesiastical History" is that of Cambridge, 3 vols. folio, 1720. He wrote, besides, many other works, the principal of which is one entitled "Evangelical Preparation," 2 vols. folio, Paris, 1628.

EUSTACHIUS, Bartholomew, *u-stāi'-she-us*, a distinguished Italian physician, who settled at Rome, and made several discoveries relative to medical science. The most important of these was the passage from the throat to the external ear, since known by the name of the *Eustachian* tube. He formed some anatomical tables, and Boerhaave, in 1707, published his "Opuscula Anatomica." D. 1574.

EUSTATIUS, or EUSTATIA, St., one of the Dutch Leeward Caribbee islands, in the West Indies, 10 miles from St. Christopher's. *Area*, 190 square miles. *Desc.* It rises out of the ocean, in the form of a huge volcanic pyramidal rock, tapering to its summit, and, in proportion to its size, is one of the finest and best cultivated islands of all the Caribbees. *Pop.* 2,000.—St. Eustatia became a Dutch island by the right of possession or occupancy. It was first settled about the year 1600; and though taken from them subsequently, it was confirmed to them by the treaty of Breda. In the year 1781 it was taken by the English, but restored at the peace, in 1783. It was again taken by the English in 1801, but was once more restored to its former owners in 1814.

EUTERPE, *u-ter'-pe*, one of the Muses, daughter of Jupiter and Mnemosyne. She presided over music, and was looked upon as the inventress of the flute. She is represented as crowned with flowers, and holding a flute in her hands.

EUTROPIUS, *u-tro'-pe-us*, a Latin historian, who wrote an epitome of the history of Rome, from the age of Romulus to the reign of the emperor Valens, to whom the work was dedicated. Of all his works, the Roman history alone is extant. It is composed with conciseness and precision, but without elegance. Lived in the 4th century.

EUTYCHES, *u'-ti-kees*, a monk, who lived near Constantinople, and who is said to have founded the sect called Eutychians, in the East. Lived in the 5th century.

EUTYCHIUS, *u-ti-ki'-us*, a physician and divine, who, after practising physic for many years, was ordained, and in 938 became patriarch of Alexandria. B. at Cairo, 876; D. 950.—He wrote, in Arabic, "Annals from the Creation to 900," published at Oxford by Pocock, in 1659, 4to. He also wrote a "History of Sicily," the MS. of which is in the public library at Cambridge.

EUXINE SEA. (*See* BLACK SEA.)

EVADNE, *e-vād'-ne*, a daughter of Iphis, or Iphicles, of Argos, who slighted the addresses of Apollo, and married Capaneus, one of the seven chiefs who went against Thebes. Her husband was struck with thunder by Jupiter for his blasphemies and impiety, and his ashes separated from those of the rest of the Argives, when she threw herself on his burning pile, and perished in the flames.

EVAGORAS, *e-vāg'-o-rās*, a Greek historian, who wrote a "History of Egypt," the "Life of Timagenes," "De Artificio Thucydidis Oratorio," "Lexicon in Thucydidem." Lived in the 1st century A.D.

EVAGORAS, king of Cyprus, who re-took Salamis, which had been taken from his father by the Persians. He made war against Artaxerxes, the king of Persia, with the assistance of the Egyptians, Arabians, and Tyrians, and obtained some advantages over the fleet of his enemy. The Persians, however, soon repaired their losses, and Evagoras saw himself defeated by sea and land, and obliged to be tributary to the power of Artaxerxes, and to be stripped of all his dominions, except the town of Salamis. Assassinated soon after this fatal change of fortune, by a eunuch, 374 B.C. He left two sons; Nicocles, who succeeded him, and Protagoras, who afterwards deprived his nephew Evagoras of his possessions, upon account of his oppression.

EVALD, Johannes, *ev'-ald*, a distinguished Danish poet. He wrote several dramatic pieces, and a poem entitled "The Temple of Fortune," which prove his genius to have been considerable. His principal work is named "Balder's Dod," a drama which takes a high standing in Danish literature. B. at Copenhagen, 1743; D. 1781.

EVANDER, *e-vān'-der*, an adventurer, who went from Arcadia to Italy, and drove the aborigines from their ancient possessions, and reigned in that part of the country where Rome was afterwards founded. He gave Æneas assistance against the Rutuli, and distinguished himself by his hospitality. It is said that he first brought the Greek alphabet into Italy, and introduced there the worship of the Greek deities. He was honoured as a god after death, and his subjects raised him an altar on Mount Aventine.—A philosopher of the second academy, who flourished 215 B.C.

EVANS, Lieutenant-General Sir De Lacy, K.C.B., *ev'-uns*, entered the British army in 1807, and, after serving several years in India, returned and fought in the Peninsular campaigns of 1812, 1813, and 1814. He also fought at Quatre Bras and Waterloo, where he had his horse shot under him. In 1835 he volunteered to command the British Legion in Spain, and for his valour throughout the campaigns in which he served against the Carlists, he was invested with the order of the Bath and the Cross of San Ferdinand and San Charles of Spain. In 1854 he became commander of the second division of the Army of the East, and greatly distinguished himself at the battle of the Alma. At Inkermann he rose from a bed of sickness to join his division; but when he saw the manner in which General Pennefather was fighting his men, he refused to take the command, but left his share of the merit entirely to that officer. He returned to England in 1855, and received the order of the Grand Cross of the Bath. With the exception of two short intervals, he had a seat in parliament since 1831. B. at Moig, Ireland, 1787.

EVANSON, Edward, *ev'-an-son*, an English divine, who became curate to his uncle at Mitcham, in Surrey. In 1768 he obtained the living of South Mimms, and was afterwards presented to the living of Tewkesbury, in Gloucestershire, to which was added that of Longdon, a village in Worcestershire. Here his sentiments on the Trinitarian doctrine underwent a change, and he ventured to make alterations in the Common Prayer, which gave such offence to the parishioners that a prosecution was instituted against him, which failed, on account of some irregularity in the proceedings. In 1778 he resigned his livings and returned to Mitcham, where he undertook the education of some

pupils. B. at Warrington, Lancashire, 1731; D. 1805.—He wrote the "Dissonance of the four generally-received Evangelists;" "A Letter to Bishop Hurd on the Grand Apostasy;" "Reflections on the State of Religion in Christendom;" and some other works.

EVE, *eev*, 'life,' the first woman, the original mother of all mankind.

EVELEIGH, General, R.A., *eve'-le*, an officer of the royal artillery, who, after many years' service, during which he frequently distinguished himself, attained the rank of general in 1854. He served in the Corunna campaign, and received the war medal and one clasp for Sabugen and Benevente. B. 1772; D. near Newport, Isle of Wight, 1859.

EVELYN, John, *ev'-lin*, an English author, who, by marriage with the daughter of Sir Richard Browne, became possessed of Sayes Court, a manor in Kent, where he led a retired life till the Restoration, to which he, in some measure, contributed. At the establishment of the Royal Society, he became one of its first members. In 1662 appeared his "Sculptura; or, the History and Art of Chalcography and Engraving in Copper." This curious and valuable work has been since reprinted. In 1664 came out his "Sylva; or, a Discourse of Forest Trees," which has gone through many editions, and is a great repository of all that was, in the author's time, known of the forest trees of Great Britain. He was appointed a commissioner for the sick and wounded seamen, one of the commissioners for rebuilding St. Paul's, and afterwards had a place at the Board of Trade. In the reign of James II. he was made one of the commissioners for executing the office of lord privy seal, and after the Revolution was appointed treasurer of Greenwich hospital. In 1697 appeared his "Numismata, or Discourse of Medals." Mr. Evelyn has the honour of being one of the first who improved horticulture, and introduced exotics into this country. Of his garden at Sayes Court a curious account may be seen in the "Philosophical Transactions." B. at Wotton, Surrey, 1620; D. 1706.—Evelyn was buried at Wotton, where, on his tombstone, he had it recorded, "That all is vanity which is not honest; and that there is no solid wisdom but real piety." He wrote several books besides the above, and of his "Memoirs" Sir Walter Scott says, "We have never seen a mine so rich."—His son, JOHN, wrote a Greek poem, prefixed to his father's "Sylva," and translated Rapin's poem on gardens into English, and the "Life of Alexander" from Plutarch. He was also the author of a few poems in Dryden's collection. D. 1698, aged 44.

EVENUS, *e-ve'-nus*, a river of Ætolia, flowing into the Ionian Sea. It received its name from Evenus, who, being unable to overcome Idas, who had promised him his daughter Marpessa in marriage, if he surpassed him in running, grew so desperate that he threw himself into the river, which afterwards bore his name.

EVERBERG, *ev'-er-bairg*, a town and parish of Belgium, 22 miles from Tournay. *Manf.* Linen and salt-refining. *Pop.* about 5,000.

EVERETT, Alexander Hamilton, *ev'-e-ret*, an American author, who began life as a tutor in an academy, but afterwards entered into the office of John Quincy Adams, as a student of the law. In 1809 he went to Russia as an *attaché* of the mission of Mr. Adams, and spent two years in St. Petersburg, studying political economy, and making himself acquainted with the modern languages. On returning to America, he connected himself, in Boston, with both law and literature. From 1818 to 1824 he served as *chargé d'affaires* in the Netherlands, where he pursued his literary studies, and, in 1821, published a work entitled "Europe; or, a General Survey of the Principal Powers, &c.," which was highly spoken of. In the following year he issued another, which entered into a consideration of the Godwin and Malthusian theories of population. In 1825 he became American minister at the court of Spain, which he held for nearly five years, during which he continued to devote himself to his studies, and produced a political work on America, whilst, at the same time, contributing to the "North American Review," then under the editorship of his brother. In 1841 he was chosen president of Jefferson College, Louisiana, and, in 1846, minister plenipotentiary to China. On his return, he devoted himself principally to private pursuits. B. at Boston, 1790.

EVERETT, Edward, D.C.L., brother of the above, studied divinity with a view to the office of pastor, and became, before he was twenty, minister of a large Unitarian congregation at Boston. In 1815 he relinquished the pulpit for the professorial chair of the Greek Language and Literature in Harvard University. Previous to his entering upon his duties, he visited Europe, and for two years settled at Gottingen, studying German, and making himself acquainted with the best modes of instruction adopted in the German universities. After a sojourn of five years, during which he visited various European countries, he returned to America, and entered upon his university duties with large stores of accumulated learning and knowledge. In 1820 he added to the duties of his chair those of editor to the "North American Review," which he continued to perform for four years. In 1824 he was elected to the House of Representatives, and, in 1836, became governor of Massachusetts. In 1841 he was appointed minister to the English court, which post he held for about five years, and, on his return, was elected president of Harvard University, which he was subsequently compelled to resign on account of ill-health. In 1853 he was elected a member of the Senate for Massachusetts. Throughout his career, Mr. Everett has evinced an ardent attachment to literary pursuits, and has published two volumes of orations, delivered by him on various occasions. He has also appended to the works of Daniel Webster, a life of that statesman. B. at Dorchester, near Boston, 1794.

EVERGETES, *e-ver'-ge-tees*, a surname signifying 'benefactor,' given to many kings in ancient times.

EVERGHEM, *ev'-er-gaim*, a town of Belgium, East Flanders, 3 miles from Ghent. *Pop.* 8,000, engaged in shipbuilding and other trades.

EVERTON, *ev'-er-ton*, the name of several parishes in England, the largest of which is 2 miles from Liverpool, of which it is a suburb, and has a population of 26,000. The populations of the others are small.

EVESHAM, *eev'-sham*, a borough and market-town of Worcestershire, on the Avon, 14 miles from Worcester. This town is of great antiquity, and has three parish churches, a free grammar-school, a charity-school, and an almshouse. It is a well-built town, and there is a convenient harbour on the Avon for barges. *Manf.* Principally stockings. *Pop.* 4,600. It is a station on the Oxford Railway.

EVIL-MERODACH, *e'-vil mer'-o-dak*, 'the fool of Merodach,' the son of Nebuchadnezzar, and father of Belshazzar.

EVORA, *ai-vor'-a*, a fortified town of Portugal, in Alentejo, 85 miles from Lisbon. It is of considerable extent, but badly built. *Pop.* 10,000.

EVREMOND, ST., *aivr'-mont*, Charles de St. Denis, Lord of, a French writer, who relinquished the law for the military profession. He served under Condé, as lieutenant of the Guards, and in the civil wars of France, fought at the battles of Rocroi and Nordlingen. He attended Mazarine in the negotiation with Spain; but having betrayed some confidential secrets, in a correspondence with the marquis de Crequi, was obliged to quit France. Accordingly, he found a refuge in England, where he was in great esteem with Charles II. In 1689 permission was granted him to return to his country; but he preferred ending his days in the land of his adoption. B. near Coutances, Normandy, 1613; D. in London, 1703, and was buried in Westminster Abbey. He was a man of wit and ingenuity. His works were printed in 1728, in 3 vols. 8vo.

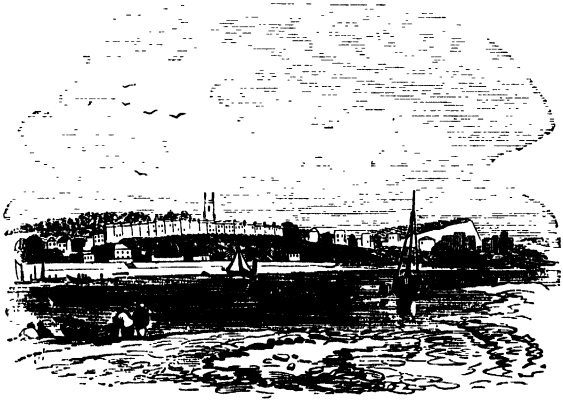
EVREUX, *ev'-re(r)*, a city of France, and the capital of the department of the Eure, on the Iton, 52 miles from Paris. The town is tolerably well built, has a cathedral in the form of a cross, an episcopal palace, a theatre, and a botanical garden. *Manf.* Cotton twist, woollens, and cotton fabrics. *Pop.* 13,000.

EWE LOCH, *u*, an inlet of the North Sea, in Ross-shire, Scotland, connected with Loch Maree by a short river.

EWELL, *u'-el*, a town and parish of Surrey, 2 miles from Epsom. *Pop.* 2,300.—It is a station on the London and Epsom Railway.

EXE, *ex*, a river of England, rising in Exmoor,

## Exeter



Somersetshire, and, after a course of about 50 miles, falling into the sea at Exmouth.

EXETER, *ex'-e-ter*, a city, episcopal see, and the capital of Devonshire, pleasantly situate on the river Exe, 10 miles from its mouth, and 64 from Bristol. The ground which it occupies is in the form of a parallelogram, and was formerly surrounded with walls, which have now mostly disappeared. The cathedral, which was begun in the reign of Athelstan, in 932, is a large and magnificent edifice. It consists of a nave with two aisles, a choir with aisles, a N. and S. transept, surmounted by handsome Anglo-Norman towers. To the E. of the cathedral is the bishop's palace, which, with its gardens, is inclosed by a lofty wall. The other principal buildings are a sessions-house, in which the assizes, quarter-sessions, and county-courts are held; prisons for debtors and malefactors, a good workhouse, almshouses, several well-endowed charity-schools, an elegant circus, with a theatre adjoining, a guildhall, general asylum for lunatics, barracks, literary and scientific institutions, public library, ball-room, fountains, cloth-halls, and infirmary. In the N.W. corner of the city stood the castle, of which but the outer walls now remain. Across the Exe is a stone bridge. An arm of the sea formerly flowed near the walls, but its navigation was ruined by one of the earls of Devon, who constructed weirs and dams in it. It has been restored by a canal; so that vessels of 150 tons can approach the town. *Manf.* Woollens, paper; and there are several breweries and iron-foundries. *Pop.* about 42,000.—The city is governed by a mayor, recorder, town-clerk, &c.; and was incorporated by King John, and erected into a county by Henry VIII. Its bishopric was fixed here in 1050, by Edward the Confessor.

EXETER, the name of several townships in the United States, none of them with a population above 3,500.

EXMOOR, *ex'-moor*, an extra-parochial district of England, partly in Devon and partly in Somerset. It consists of ranges of hills, with a varying height of from 1,100 to 1,600 feet. The Exe has its source in it.

EXMOUTH, *ex'-mouth*, a town and watering-place of

EXMOUTH.

Devonshire, 9 miles from Exeter. It has baths, libraries, and a ball-room. *Pop.* about 5,000.

EXMOUTH, Edward Pellew, Viscount, a distinguished British naval commander, who, in 1770, entered the navy, and first brought himself prominently into notice in 1776, at the battle of Lake Champlain, N. America. Having risen successively through the ranks of lieutenant and post-captain, in 1793 he was appointed to the command of the *Nymphe* frigate, of 36 guns, and falling in with the *Cleopatra* French frigate, he captured her, after a desperate fight, and had the honour of knighthood conferred upon him. Continuing in active service, in 1799 he was appointed to the command of the

## Eyre

*Impetuous*, of 78 guns, and was engaged in various services on the French coast. In 1802 he was named colonel of the marines; and, in the same year, was chosen member of parliament for Barnstaple, in Devonshire. In 1804 he commanded the *Tonnant*, of 84 guns, and received the rank of rear-admiral of the red. He was also made commander in the East Indies, on which he resigned his parliamentary seat. In 1808 he was raised to the rank of vice-admiral of the blue. In 1810 he blockaded Flushing, and, shortly afterwards, was appointed to the commander-in-chiefship in the Mediterranean. Here he co-operated with the British forces on the eastern part of the coast of Spain with great skill. The value of his services was recognized in 1814, when he was raised to the peerage as Baron Exmouth, of Canonteign, Devonshire. In the same year he was promoted to the rank of full admiral, and, subsequently, made a K.C.B. and G.C.B. In 1816 he proceeded to Algiers, to chastise the Dey for having violated a treaty concluded for the abolition of Christian slavery. His plan of attack is considered to be one of the boldest ever adopted by a naval commander. He entered the harbour with his ship, the *Queen Charlotte*, and being admirably supported by the other ships of his fleet, set fire to the war-ships of the Algerines, bombarded the city, and forced the Dey to yield to all his demands. For this service he was thanked by both houses of parliament, and raised to the rank of viscount. On the death of Admiral Duckworth, in 1817, he was appointed to the chief command at Plymouth; but, after 1821, retired from public service. B. at Dover, 1757; D. 1833.

EXUMA, *ex'-u-ma*, one of the Bahamas. *Ext.* 25 miles long, and 3 broad. *Lat.* 23° 20′ N. *Lon.* 75° W.—There is also a chain of islands called the Exuma Keys, which reach along one edge of the Great Bahama bank. *Lat.* of the principal island, between 23° 21′ and 23° 31′ N. *Lon.* between 74° 28′ and 74° 48′ W.

EXUPERIUS, *ex-u-peer'-e-us*, bishop of Toulouse, and a saint of the Roman calendar. He expended all his own wealth and sold the sacred vessels to maintain the poor in the time of famine. D. about 417.

EYCK, *ike*, Hubert van, an eminent artist, and founder of the Flemish school of painting. One of his finest works, in which he was assisted by his brother, is the "Adoration of the Lamb," in the church of St. Bavon, Ghent. He painted in distemper and in oil. B. at Maaseyk, 1366; D. 1426.

EYCK, John van, brother of the above, painted history, portraits, and landscapes; but is chiefly known by his being the inventor of a new method of mixing his oils, which greatly improved the style of painting. B. 1370, D. 1441.

EYE, *i*, a town and parish of Suffolk, 20 miles from Ipswich. It is an ancient borough, and has a Gothic church, a grammar-school, a gaol, guildhall, and house of industry. *Pop.* about 8,000. The name of several other parishes with small populations.

EYE, a small stream of Ross-shire, Scotland, falling into the Moray Firth.

EYEMOUTH, *i'-mouth*, a town of Berwickshire, Scotland, at the mouth of the Eye, 7 miles from Berwick. It has a fishery and a grain trade. *Pop.* 1,500.

EYLAU, *i'-lou*, a town of Prussia, on the Pasmar, 20 miles from Konigsberg. *Pop.* 1,500.—Here the Prussians and Russians were defeated by the French, on the 7th and 8th of February, 1807.

EYRE, *ire*, Sir William, K.C.B., an English general, entered the army in 1823, and, after serving in Canada, proceeded to the Cape of Good Hope, and distinguished himself as lieutenant-colonel in both the Caffre wars. In acknowledgment of his eminent services, he was made a companion of the order of the Bath, promoted

to be colonel in the army, and appointed an aide-de-camp to the queen. On the military force being sent out to the East, during the Russian war, he was appointed to a brigade of the 3rd division of the army, and was present at the battle of the Alma. He commanded the troops in the trenches during the battle of Inkermann, and remained in the Crimea until after the fall of Sebastopol. In 1855 he was created a knight commander of the order of the Bath, was made a commander of the Legion of Honour, a knight of the imperial order of the Medjidie of the 2nd class, and was among the general officers who received the Sardinian war-medal. After his return, in 1856, he was selected by the commander-in-chief to command the troops in Canada, which appointment, on account of ill health, he was forced to resign. B. 1806; D. at Bilton Hall, Warwickshire, 1859.

EYTUH, or ETA, *e-ta'*, a town of British India, in Mynpoorie, in the North-West Provinces. It is the principal place of a district of the same name, and is encompassed by mud walls. *Pop.* Unascertained.

EZEKIEL, *e-ze'-ke-el*, the third of the greater prophets. He was the son of Buzi, and a descendant of Aaron. In 597 B.C. he was carried captive to Babylon, where he wrote his prophecies, the style of which is bold, vehement, and tragical, and worked up occasionally to a pitch of considerable dignity. Lived in the 6th century B.C.

EZRA, *ez'-ra*, son of Seraiah, a priest of the Jews, and a descendant of Aaron. He was carried captive to Babylon by Nebuchadnezzar. Artaxerxes Longomanus, however, sent him to his own country with a colony of the Jews, and all the sacred vessels and ornaments of the temple, which he had in charge to rebuild. On his arrival at Jerusalem, 467 B.C., he set about the reformation of abuses, particularly one of strange marriages. He restored the whole canon of the Old Testament. There is in the Bible a book under his name, and in the Apocrypha two others. Josephus says that he died at Jerusalem; but others assert that he returned and ended his days in Persia.

## F.

FAABORG, *fol'-borg*, a seaport of Denmark, in the island of Fulnen, 17 miles from Oldensee. *Pop.* 2,500.

FABER, John, *fa'-ber*, a German divine, who was created doctor at Cologne, and in 1526 was appointed confessor to Ferdinand, king of the Romans. He, subsequently, was presented to the see of Vienna, and was called the mallet of heretics, owing to the zeal which he showed against Luther. B. at Habbron, 1500; D. 1542.—His works were printed at Cologne, in 3 vols. folio.—There was another of this name, who wrote several works against the Protestants.

FABIAN, *fai'-be-an*, a pope and saint, according to the Roman calendar. He ascended the papal chair in 326, and erected churches, and sent bishops into Gaul to propagate Christianity. He suffered in the persecution under Decius, 250.

FABIAN, Robert, an English chronicler, who was a tradesman in London, and served the offices of alderman and sheriff. D. 1512, and was buried in the church of St. Michael, Cornhill.—His "Chronicle of England and France" was first printed in London in 1516, and again in 1553, in 2 vols. folio.

FABII, *fai'-be-i*, a noble and powerful family at Rome, who, it is affirmed, derived their name from *faba*, 'a bean,' because some of their ancestors cultivated that pulse. Historians say that all the males of the family, amounting to 306, were slain, save one, in a general engagement near the Cremera, against the Veientes, 477 B.C. From this one, whose tender age had detained him at Rome, arose the noble Fabii. The family was divided into different branches,—the Ambusti, the Maximi, the Vibulani, the Buteones, the Dorsones, and the Pictores, Labeones, Gurgites; the three first of which are frequently mentioned in the Roman history, but the others, seldom.

FABIUS, Maximus Rullianus, *fai'-be-us*, an illustrious Roman, who was master of the horse in the war against the Samnites, and charged the enemy, and obtained a victory. Having done this in the absence of the dictator, and contrary to his orders, he was condemned to death, but was rescued by the people. In 303 B.C. he served the office of censor, and obtained the name of Maximus, for lessening the power of the populace in elections. He triumphed over seven nations, and served the office of dictator a second time 287 B.C.

FABIUS MAXIMUS, Quintus, surnamed Verricosus, a Roman, distinguished for his prudence, valour, and generosity. He was consul the first time 233 B.C., when he gained a great victory over the Ligurians. When Hannibal, the Carthaginian, defeated the Romans at the battle of Thrasymene, he was nominated prodictator, to oppose that general. He succeeded in surrounding Hannibal, whom, however, he allowed to escape, when he was recalled by the senate, who refused to confirm an agreement which he had made for the ransom of prisoners. On this, Fabius sold his estates to raise the money. When the time of his dictatorship expired, he advised his successor, Paulus Æmilius, not to hazard an engagement, which, however, was neglected, and thus was lost the famous battle of Cannæ. Fabius was now looked upon as the only refuge of the Romans, and he quickly recovered Tarentum, which had been betrayed to Hannibal. In his advanced years, he was superseded by Scipio, yet his death was lamented by the people as a common loss. D. nearly in the 100th year of his age, 203 B.C.

FÀBRE, John Claude, *fabr*, a French priest of the Oratory at Paris, who compiled two dictionaries, translated Virgil into French, and continued Fleury's "Ecclesiastical History." D. 1753.

FABRI, Honorius, *fa'-bre*, a learned Jesuit, who wrote "Physica, seu Rerum Corporearum Scientia," 6 vols. 4to; "Synopsis Optica," 4to; "De Plantis, de Generatione Animalium, et de Homine," 4to, &c. He is said, by some, to have discovered the circulation of the blood before Harvey. B. at Bellay, 1607; D. at Rome, 1688.

FABRIANO, *fa'-bre-a'-no*, a town of the Ecclesiastical States, 33 miles from Ancona. It has a Gothic cathedral. *Manf.* Parchment and paper. *Pop.* 7,000.

FABRICIUS, Caius, *fă-brish'-e-us*, a celebrated Roman, who, in his first consulship, obtained several victories over the Samnites and Lucanians, and was honoured with a triumph. Two years after, he went as ambassador to Pyrrhus, and refused, with contempt, the presents offered him. Pyrrhus admired the magnanimity of Fabricius, but his admiration was increased when he made a discovery of the perfidious offers of his physician, who had pledged himself to the Roman general for a sum of money to poison his master. To this greatness of soul was added the most consummate knowledge of military affairs, and the most perfect simplicity of manners. Fabricius wished to inspire a contempt for luxury among the people. He lived and died in the greatest poverty. His body was buried at the public charge, and the Roman people were obliged to give a dowry to his two daughters, when they had arrived at years of maturity. Lived in the 3rd century B.C.—A bridge at Rome, built by the consul Fabricius.

FABRICIUS, Jerome, an Italian physician, usually called Aquapendente, from the place of his birth. He professed anatomy with extraordinary reputation at Padua. D. 1619.—His works on anatomy have been printed in 2 vols. folio.

FABRICIUS, John Albert, a learned divine, who became professor of eloquence at Hamburg, and published "Bibliotheca Latina," 2 vols. 4to; "Bibliotheca Græca," 14 vols. 4to; "Codex Apocryphus Novi Testamenti," 3 vols. 8vo; "Codex Pseudepigraphus Veteris Testamenti," 2 vols. 8vo; "Bibliographia Antiquaria," 4to; "Bibliotheca Latina Ecclesiastica," folio; "Bibliotheca mediæ et infimæ Latinitatis," 5 vols. 8vo. B. at Leipsic, 1668; D. at Hamburg, 1736.

FABRONI, Angiolo, *fa-bro'-ne*, a learned Italian, who was educated first at Faenza, and afterwards at Rome, where he obtained a canonry. He was afterwards appointed prior of the church of St. Lorenzo at Florence, where he remained till called to be curator of the university of Pisa. He is generally known by his Biographies of Italian literati of the 17th and 18th centuries, of which work he published 18 volumes, and left another ready for the press. Besides this, he wrote separate biographies of Cosmo, Lorenzo, Leo, and

other eminent persons of the house of Medici, with many panegyrics on learned men. He also conducted the "Giornale di Litterati," and published some religious pieces. B. in Tuscany, 1732; D. at Pisa, 1802.

FAD, LOCH, *fād*, a lake of Scotland, in the island of Bute, 6 miles from Rothesay. *Ext.* 5 miles.

FADIENSKOI, *fad'-e-ens-koi*, an island of the Arctic Ocean, in the government of Yakatsk, belonging to Russia. *Ext.* 100 miles long, by about 40 broad. It is uninhabited. *Lat.* 76° N. *Lon.* 141° to 145° E.

FADLALLAH, or CHODSA RASCHID ADDIN FADLALLAH, *fad-lal-la*, a Persian historian. He was vizier to the sultan Cazan, who reigned at Taurus, and at whose command he compiled a history of the Moguls, which he finished in 1294. He added a supplement to this work by the order of Cazan's successor. The first part was translated into French by La Croix. Lived in the 13th century.

FAENZA, *fa-ant'-za*, a city of Italy, in the Ecclesiastical States, 20 miles from Ravenna. It was known anciently by the name of Faventia, and became noted in modern times for its pottery-ware. It is inclosed by walls, has a citadel, several churches with fine paintings, and a cathedral, which stands in a large square, and has, near it, a beautiful fountain. *Manf.* Earthenware, paper, silk twist and fabrics. *Pop.* 21,000.

FAGIUS, Paul, *fai'-je-us*, a German Protestant divine, whose real name was Buchlein. For some time he exercised the office of a schoolmaster, but afterwards entered into orders. In 1541 the plague broke out at Isna, where he resided at the time, and remained in the place, comforting and administering to the sick. In 1543 he and Bucer went to England, where Archbishop Cranmer employed them in a new translation of the Scriptures. B. at Heidelberg, 1504; D. at Cambridge, 1550.—In Mary's reign his body was taken up and burnt. He wrote several books on the Hebrew language and the Targums.

FAGNANO, *fan-ya'-no*, a village of Italy, 12 miles from Verona. Here, in 1799, a battle was fought between the Austrians and the French.—The name of several other small Italian villages.

FAGON, Guy Crescent, *fa'-gawng*, physician to Louis XIV., who defended the doctrine of the circulation of the blood, and collected numerous plants to enrich the royal gardens, of which he was superintendent. B. at Paris, 1632; D. 1718.

FAHLUN, or FALUN, *fa'-loon*, a town of Sweden, celebrated for its copper-mines. It is 55 miles from Gefle, and has museums and a school of practical mining. *Manf.* Cotton and yarn. *Pop.* 5,500.

FAHRENHEIT, Gabriel Daniel, *fā'-ren-hite*, an experimental philosopher, who improved the thermometer, by making use of mercury instead of spirits of wine, and formed a new scale for the instrument, grounded on accurate experiments. The English have generally adopted his scale; but the French prefer Réaumur's. B. at Dantzig, 1686; D. 1736.—Fahrenheit wrote "A Dissertation on Thermometers."

FAI-FO, *fi-fo*, a town in the empire of Anam, Further India, near the mouth of a river in the China Sea, and 15 miles from Turon. It has a Buddhic temple, and a trade in sugar and cinnamon. *Pop.* 15,000.

FAILSWORTH, *fails'-werth*, a town of Lancashire, 6 miles from Manchester. *Manf.* Cotton-spinning. *Pop.* 4,500.

FAIRBAIRN, William, *fair'-bairn*, a Scotch machinist and civil engineer. He was among the first, if not the first, to construct sea-going vessels of iron. He was also continually engaged in experimenting on the qualities of iron, and did much to advance mechanical knowledge in the department of engineering. B. at Kelso, Scotland, 1789.

FAIRFAX, *fair'-fax*, a county of Virginia, U.S. *Area*, 408 square miles. *Pop.* 11,000, of whom a third are slaves.

FAIRFAX, Edward, an English poet, who translated Tasso's poem of "Godfrey of Bouillon" into English verse, and wrote a curious book, entitled "Demonology," in which he avows his belief of witchcraft. D. about 1632.

FAIRFAX, Thomas, Lord, general of the parliamentary army in the civil war, was the eldest son of Ferdinando, Lord Fairfax. He began his military career under Lord Vere, in Holland, and when hostilities commenced between the king and parliament, he took a decided part in favour of the latter, being, like his father, a zealous Presbyterian. He had a principal command in the northern counties of England, where he and his father were defeated in several engagements; but, afterwards, Sir Thomas had better fortune, and distinguished himself so greatly at the battle of Marston Moor, in 1644, that he was appointed general of the army, in the place of the earl of Essex, and Cromwell became his lieutenant-general. In 1645 he defeated the king's forces at Naseby, after which he marched into the west, where he took Bath, Bristol, and other important places. In 1647 he was made constable of the Tower, and the following year succeeded to the title, by the death of his father. He then proceeded into the eastern counties, and took Colchester, after a brave resistance by Sir George Lisle and Sir Charles Lucas, whom his lordship, after the surrender, caused to be shot. On his return to London, he was named one of the king's judges, but refused to act, though he took no steps to prevent the death of the king, and, at the time of execution, was kept in prayer by Major Harrison. In 1650 he resigned his commission, and lived in retirement till the Restoration, when he made his peace with Charles II., upon whom he waited at the Hague. B. at Denton, Yorkshire, 1611; D. at Nun Appleton, Yorkshire, 1671.—He wrote an account of his public life.

FAIRFIELD, *fair'-feeld*, a county of Connecticut, U.S. *Area*, 630 square miles. *Pop.* 31,000.—Also several townships in the United States, with small populations.

FAIRFIELD, a district of South Carolina, U.S. *Area*, 796 square miles. *Pop.* 24,000, of whom about half are slaves.

FAIRHAVEN, *fair-hai'-ven*, a town of Massachusetts, U.S., 50 miles from Boston. *Pop.* 4,500, mostly engaged in whale-fishing.

FAIRHEAD, or BENMORE HEAD, *fair'-hed*, a lofty promontory on the N. coast of Ireland, 6 miles from Ballycastle. *Height*, about 540 feet.

FAIR ISLE, *fair*, lies between Shetland and Orkney, 22 miles from Sunburgh Head. *Ext.* 4 miles long, by a breadth of 2½.—Here, in 1588, the duke of Medina, admiral of the Spanish armada, was shipwrecked.

FAIRLEIGH, *fair'-le*, the name of several parishes in England, none of them with a population above 1,500.

FAIRVIEW, *fair'-vu*, two townships of the United States, neither of them with a population above 2,000.

FAIRWEATHER, CAPE, *fair'-weth-er*, on the W. coast of Russian America. *Lat.* 58° 51′ N. *Lon.* 137° 36′ W.—The MOUNT whence projects this cape, has a height of nearly 15,000 feet, and forms a striking point on the frontiers of the Russian and British territories.

FAISANS, ILE DES, *fais'-a*, a small island formed by the Bidassoa, near Irun, on the borders of France and Spain. In 1659, the treaty of the Pyrenees was here concluded, between Spain and France.

FAITHORNE, William, *fā'-thorn*, an English painter and engraver. He was a soldier in the royal army during the civil war, and was taken prisoner by Cromwell. On obtaining his liberty, he went to France, where, he studied under Champagne. At his return, he practised painting in miniature, and engraving, but chiefly the latter. He also published a book on drawing, graving, and etching. B. in London, 1616; D. 1691.—Walpole gives a considerable list of the prints of this artist. His son, William, was a good engraver in mezzotinto.

FAL, *fāl*, a river of England, in Cornwall, rising near the centre of the county, and flowing into the sea at Falmouth.

FALAISE, *fa-lais'*, a town of France, in the department Calvados, 15 miles from Caen. The castle, which stands on a precipice, is in ruins, with the exception of a tower. *Manf.* Lace, linen, hosiery, and cotton yarn. *Pop.* 9,000.—In the castle here, William the Conqueror was born, in 1024.

FALCONBERG, Mary, Countess of, *fal'-kon-berg*, the third daughter of Oliver Cromwell, and wife of Thomas, Viscount Falconberg. She was a woman of considerable talents, a member of the church of England, and contributed to the restoration of Charles II. D. 1712. (*See* CROMWELL.)

FALCONER, William, *fal'-ko-ner*, a Scotch poet, who

was born of humble parents, and bred to the sea. In 1751 he published a poem on "The Death of the Prince of Wales;" but his reputation rests on "The Shipwreck," a poem in three cantos, which is highly descriptive and pathetic. It was suggested by a shipwreck, suffered by himself, in a voyage from Alexandria to Venice, when only he and two others of the crew were saved. Falconer also wrote "An Ode to the Duke of York," which obtained him the post of purser to the *Royal George*. He likewise compiled a useful work, entitled "The Marine Dictionary," 4to, and published a poem against Wilkes and Churchill, under the title of "The Demagogue." He sailed from England, in the *Aurora*, for the East Indies; but, after her departure from the Cape of Good Hope, the ship was never heard of. B. in Fifeshire, about 1730. Lost, it is supposed, in the Mozambique Channel, in the winter of 1769.

FALCONIA, Proba, *făl-ko'-ne-a*, a Latin poetess, who composed a cento from Virgil, containing the sacred history from the creation, and the history of Christ in verse. Lived in the 4th century.

FALEME, *făl-e'-me*, a considerable river of Western Africa, joining the Senegal, after a course of 200 miles, in *lat.* 14° 40′ N.; *lon.* 11° 48′.

FALIERI, Ordelafo, *fal-e-air'-e*, doge of Venice, who sailed with a fleet to the assistance of Baldwin, king of Jerusalem, about 1102. He conquered Dalmatia, Croatia, and other provinces; but, in laying siege to the city of Zara, was killed, 1120.

FALIERI, Marino, doge of Venice in 1355. He formed the design of murdering all the senators, to render himself absolute; but the plot being discovered, he was beheaded.

FALISCI, *fa-lis'-si*, a people of Etruria, said to have been originally a Macedonian colony. When they were besieged by Camillus, a schoolmaster went out at the gates of the city with his pupils, and offered to betray them into the hands of the Roman enemy, that, by such a possession, he might easily oblige the place to surrender. Camillus heard the proposal with indignation, and ordered the man to be stripped naked, and whipped back to the town by the very pupils whom his perfidy would have betrayed. This instance of generosity operated upon the people so powerfully, that they surrendered to the Romans.

FALK, John Peter, *falk*, an ingenious Swede, who studied medicine at Upsal, where, also, he applied assiduously to botany under Linnæus, by whose recommendation he was appointed professor of botany in the Apothecaries' Garden, and keeper of a cabinet of natural history at Petersburg. B. 1727; shot himself, 1774.—His observations, made in his travels, were published at Petersburg, in 1785, 3 vols. 4to.

FALKENSTEIN, *fal'-ken-stine*, a town of Saxony, 12 miles from Planen. *Manf.* Muslin-weaving; and there are iron-mines in the neighbourhood. *Pop.* 3,500.

FALKIRK, *făl'-kirk*, a town and parish of Stirlingshire, Scotland, near the great canal between the rivers Forth and Clyde, 24 miles from Edinburgh. It has a spacious church, and several other places of worship, a townhouse, public library, and numerous schools. No manufactures of importance are carried on; but there is a good weekly market, and it has a considerable trade in corn, cotton, leather, and other commodities. Three fairs, the greatest in Scotland, are held, under the name of the Trysts of Falkirk. These fairs are exclusively for cattle, sheep, and horses; and not less than 300,000 head of cattle and sheep are annually exposed to sale at them. *Pop.* about 9,000. —Here Wallace was defeated in a battle by Edward I.; and here, also, the royal army was defeated by the adherents of the house of Stuart, in 1746.—A station on the Edinburgh and Glasgow Railway.

FALKLAND, *falk'-land*, a small town and parish of Fifeshire, Scotland, 20 miles from Edinburgh. *Pop.* about 3,000, many employed as linen-weavers.—A palace was erected here; and James V. died in it in the year 1542. It is now mostly in a ruinous state.

FALKLAND ISLES, two large islands, with a number of smaller ones surrounding them, situate in the Southern Atlantic Ocean. *Area.* The whole estimated at 13,000 square miles. *Pop.* Unascertained, but consisting mostly of Buenos-Ayrean colonists. *Lat.* between 51° and 52° 30′ S. *Lon.* between 57° 40′ and 61° 20′ W.—These islands were discovered by Davis in 1592, and came into the possession of the British in 1771. Since that time, however, their possession has been disputed; but since 1833 they have held uninterrupted possession of them.

FALKLAND, Henry Cary, Viscount, was lord-deputy for Ireland, from 1622 to 1629. His administration, however, was by no means popular. He wrote "A History of that most unfortunate Prince, Edward II." D. 1633.

FALKLAND, Lucius Cary, Viscount, was the eldest son of the preceding, and was educated in Trinity College, Dublin, where he became distinguished for his proficiency in classical and general literature. He married a lady of small fortune, which greatly displeased his father, when he retired to a country house, and devoted himself to the study of Greek. On the breaking out of the civil war, he joined the court party, but by no means could reconcile the integrity of his own high principles with the duplicity which marked the conduct of Charles I. In the midst of the troubles which distracted the kingdom, he lost the buoyancy of his spirits, and would frequently ejaculate to himself, in a mournful tone, "Peace! peace!" which, however, he was not destined to live to see. At the battle of Newbury, he volunteered into the cavalry commanded by Lord Byron, and fell, shot through the body, which was not found till the following day. B. 1610; killed, 1643.—Lord Clarendon, in his "History of the Rebellion," says that this nobleman "was a person of such prodigious parts of learning and knowledge, of that inestimable sweetness and delight in conversation, of so flowing and obliging a humanity and goodness to mankind, and of that primitive simplicity and integrity of life, that if there were no other brand upon this odious and accursed civil war than that single loss, it must be most infamous and execrable to all posterity." Notwithstanding the apparent excess of this panegyric, Falkland seems to have deserved it; for he was an ornament to the nation, and the envy of the age. One of his sayings was, "I pity unlearned gentlemen on a rainy day." He is represented among the statues in the lobby of the House of Commons.

FALKOPING, *fal'-ko-ping*, a town of Sweden, 38 miles from Mariestad, near which, in 1388, Margaret, queen of Denmark, defeated and made prisoner Albert, king of Sweden.

FALL RIVER, *fawl*, a seaport-town of the United States, 45 miles from Boston. It has a considerable shipping trade. *Pop.* 12,000.—It is connected with New York and Boston by railway and steamboat.

FALLOPIO, Gabriel, *fal-lo'-pe-o*, an eminent physician and anatomist, who discovered the tubes of the uterus which bear his name. He was professor of anatomy, first at Pisa, and afterwards at Padua, where he died in 1563. B. at Modena, 1420. His works were printed in 3 vols. folio, at Venice, in 1584.

FALLS, *fawlls*, three towns of the United States, two of them in Pennsylvania, and one in Ohio. None of them has a population above 2,500.

FALMOUTH, *făl'-mouth*, a seaport-town of Cornwall, at the mouth of the river Fal, 11 miles from Truro. It has a good harbour and a fine and spacious roadstead. The town consists principally of one street, nearly a mile along the beach. There are two castles on the coast, one of which, Pendennis, commands the entrance of the harbour; and the other, on the opposite side, is St. Mawe's Castle. A considerable fishery of pilchards is carried on, but the town derives its chief importance from being a station of the packet-boats, carrying foreign mails. *Pop.*, including Budock, about 8,500. *Lat.* 50° 9′ N. *Lon.* 5° 4′ W.

FALMOUTH, several townships of the United States, none of them with a population above 3,000.

FALMOUTH, a seaport of Antigua, W. Indies, called Falmouth Harbour. *Lat.* 17° 9′ N. *Lon.* 61° 28′ W.

FALMOUTH, a seaport of Jamaica, W. Indies, on the south side of Martha Brae harbour. *Lat.* 18° 31′ N. *Lon.* 77° 33′ W.

FALSE BAY, *false*, an arm of the Atlantic, S. Africa. *Ext.* About 29 miles long, by the same broad. It has, in its W. side, the Cape of Good Hope, and is the principal station of the Cape naval squadron.—FALSE CAPE lies a little to the E. of its entrance.—This is the

name of various capes and headlands in California Honduras, Hayti, and other parts of the world.

FALSTER, *fal'-ster*, a pleasant island of the Baltic, belonging to Denmark. *Ext.* 30 miles long, with a varying breadth of from 3 to 14 miles. *Desc.* Level, well watered, and productive in fruit. Timber is largely grown, and live stock and bees are plentiful. Its manufactures are wholly of the domestic kind. *Pop.* 24,000. *Lat.* 54° 50′ N. *Lon.* 12° E.

FALTERONA, MOUNT, *fal-tai-ro'-na*, a peak of the Apennine Mountains, 25 miles from Florence. On its S. side the Arno has its source. *Height*, 5,557 feet.

FALTSI, or FALKSEN, *falt'-se*, a frontier village of Moldavia, 70 miles from Jassy, where, in 1711, a treaty was concluded between Russia and Turkey.

FALU, or FALHUN, *fal'-hoon*, a province of Sweden. *Area*, 12,232 square miles. *Desc.* Mountainous, growing little corn, but much timber. Cattle-rearing is followed to a great extent, although most of the inhabitants are occupied with mining-works. *Pop.* 152,000. *Lat.* between 59° 52′ and 62° 16′ N. *Lon.* between 12° and 17° E.

FALUN, a mining town of Sweden. (*See* FAHLUN.)

FAMA, 'fame,' *fa'-ma*, was worshipped by the ancients as a powerful goddess, and generally represented blowing a trumpet.

FAMAGUSTA, *fa'-ma-goos'-ta*, a seaport-town of the island of Cyprus, on the east coast, built on the ruins of the ancient Arsinoe. Ruin and desolation are seen in every street of this town, which, under the Venetian rule, was one of the chief commercial cities of the Levant. *Pop.* Unascertained, and mostly Greeks. *Lat.* 35° 7′ N. *Lon.* 33° 59′ E.—A few miles to the north is old Famagusta, on a site covered with the ruins of ancient Salamis and Constantia. In 1571 it was taken by the Turks.

FAMATINA, *fa'-ma-te'-na*, a valley of S. America, in the Plata Confederation, bounded E. and W. by the mountain-ranges of Volasco and Famatina. *Ext.* 150 miles long, by 30 broad. In it are some silver-mines.

FAMINE PORT, *fam'-in*, a penal settlement of S. America, Chili. *Lat.* 53° 38′ S. *Lon.* 70° 58′ W.

FANCOURT, Samuel, *fan'-kort*, a dissenting minister, who became pastor of a congregation at Salisbury, whence he was obliged to remove for rejecting the Calvinistic notions of election and reprobation. He then went to London, and established the first circulating library, about 1740, in which, however, he had little encouragement. He wrote some controversial tracts, and died poor, in 1768. D. in the W. of England, 1678.

FANG-KI, *fang-ki'*, a small island off the S. coast of China, in the province of Quang-tong. *Lat.* 21° 18′ N. *Lon.* 110° 35′ E.

FANNAN ISLES, or SEVEN HUNTERS, *fan'-nan*, a group of uninhabited islands in the Hebrides, Scotland. They are a great resort of sea-fowl, and sheep are pastured on them.

FANNIUS, *fan'-ne-us*, surnamed Strabo, was twice consul of Rome, and rendered himself remarkable by a law, which prohibited any person from spending more than a certain sum daily.—His son was distinguished for his eloquence. He was consul in the 631st year of Rome.—There was another of this name, who wrote a history of Nero's cruelties, the loss of which is greatly regretted by Pliny the Younger. He lived in the 2nd century.

FANO, *fa'-no*, a well-built town of Central Italy, in the Ecclesiastical States, 6 miles from Pesaro. It contains a large square, and several churches, with elegant paintings; also an academy, a library, and a large opera-house. *Manf.* Principally silk twist. *Pop.* 7,000.

FANO, or FANNO, one of the Ionian islands, at the entrance of the Adriatic, 14 miles from Corfu.

FANOE, *fa'-ne(r)*, an island of Denmark, near North Jutland, 12 miles from Ribe. *Ext.* 8 miles long and 2 broad. *Pop.* 3,000, mostly engaged in fishing.

FANSHAWE, Sir Richard, *fan'-shaw*, a statesman and poet, who was educated at Cambridge, and in 1635 was sent ambassador to Spain, whence, in 1641, he returned, and acted steadily for the royal cause. He was taken prisoner at the battle of Worcester, and closely confined for a considerable time; but, at last, recovered his liberty, and went to Breda, where he was knighted by Charles II. in 1656. At the Restoration he was made master of requests, and sent to Portugal to negotiate the marriage with the king and the infanta Catharine. In 1664 he was sent ambassador to Spain, where he died in 1666. B. in Hertfordshire, 1608.—He translated into English the "Pastor Fido," or Faithful Shopherd, of Guarini, also the "Lusiad" of Camoens. His letters during his embassies in Spain and Portugal were printed in 1702, 8vo.

FANTEES, *fan-tees'*, once the most numerous and powerful people on the Gold Coast of Africa. Their power has since 1811 been almost entirely broken, and they are now protected by the establishments of British forts on Cape-Coast Castle.

FARADAY, Michael, *far'-a-dai*, a distinguished English chemist and natural philosopher, who was, at first, apprenticed to the trade of bookbinding, but whose mechanical genius and talent for investigation procured

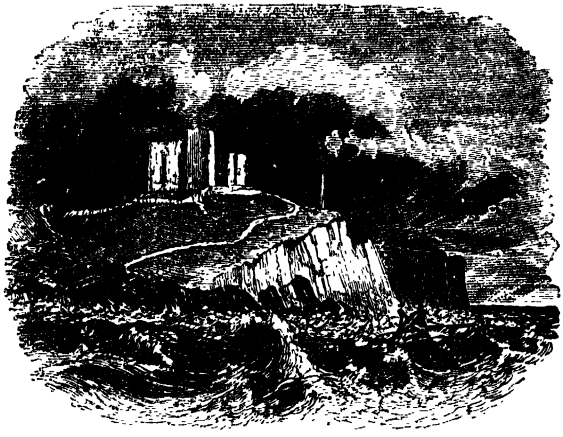
PROFESSOR FARADAY.

him the ultimate patronage of Sir Humphry Davy. Through his interest he was taken into the laboratory of the Royal Institution of London, where he was enabled to pursue his studies. In 1827 he published his work on "Chemical Manipulations," and from that time continued a regular contributor to the "Philosophical Transactions," spreading his investigations over the wide field of electricity. He succeeded, if not in discovering, at all events in establishing, the laws of electro-magnetism, and has, perhaps, done more than any other man towards the elucidation of electric phenomena. On this subject he published three volumes, entitled "Experimental Researches in Electricity," in which are included his researches into the magnetic nature of oxygen gas, light, and other important subjects. A true philosopher, he rejected all posts of honour, confining himself to his sphere in the Royal Institution, where the charm of his lectures was a continual attraction to those who delighted to follow him through the paths of magnetic science. In private life his character was irreproachable, and characterized by great goodness and humanity. B. in London, 1794.

FARAE, or FARO, *far'-o*, an island belonging to Sweden, in the Baltic Sea, lying off the extremity of Gothland. *Area*, 30 square miles. *Pop.* Unascertained, and mostly engaged in fishing.

FARAFEH, *far'-a-fe*, an oasis of the Libyan desert, in Africa, comprehending several villages and a town, with vestiges of Greek and Roman edifices. The inhabitants manufacture coarse woollen cloths and earthen vessels. *Lat.* 27° N. *Lon.* 28° 23′ E.

FARDELLA, Michael Angelo, *far-dail'-la*, professor of natural history and astronomy at Padua, who wrote several books on his favourite sciences, which are little known. B. at Sicily, 1650; D. at Naples, 1718.



FAREHAM, *fair'-ham*, a seaport-town of Hampshire, 5 miles from Gosport. It stands at the north-west extremity of Portsmouth harbour, and is resorted to for sea-bathing. *Manf.* Ropes and earthenware, and it has shipbuilding-docks, and a trade in corn, coals, and timber. *Pop.* 6,000. A station on the South-western Railway.

FAREL, William, *far'-el*, a Protestant divine, who studied at Paris; but having embraced the Reformed religion, he left France and settled at Geneva, where he laboured with great zeal against popery, and was there the chief person in establishing the Reformation. He was banished thence, with Calvin, in 1538, for refusing to submit to the synod of Berne. Farel then settled at Neufchâtel, where he died in 1565. B. in Dauphiné, 1489.—His writings are few.

FAREWELL, CAPE, *fair-wel'*, the south point of West Greenland. *Lat.* 59° 37′ N. *Lon.* 43° 43′ W.—Also a cape on the south-west coast of East Greenland. *Lat.* 59° 38′ N. *Lon.* 42° 45′ W.

FARIA DE SOUSA, Emanuel, *fa-re'-a dai soo'-sa*, a Portuguese knight, who wrote a "History of Portugal" to the reign of Henry Cardinal, a "History of the Portuguese Dominions in Europe, Asia, and Africa," and some other works. D. at Madrid, 1650.

FARINELLI, *far'-e-nel'-le*, a distinguished Neapolitan vocalist, whose real name is said to have been Carlo Broschi. He studied under Prossora at Rome, whence he went to Vienna, where he became a great favourite with Charles VI., who loaded him with riches and presents. In 1734 he visited London, and, by the captivating power of his melody, drew all who could afford to hear him. So great was the attraction of his voice, that Handel was forced to dismiss a rival company, over which he was presiding, notwithstanding his own immense popularity. His influence over the musical sympathies of his audiences seems never to have been equalled. B. at Naples, 1705.

FARN, OR FERN ISLANDS.

FARLEY, *far'-le*, two parishes in England, neither of them with a population above 1,000.

FARMER, Hugh, *far'-mer*, a learned dissenting divine, who wrote "An Inquiry into the Nature and Design of our Lord's Temptation in the Wilderness," 8vo, in which he considered that event as a divine vision, representing the different scenes of our Saviour's future ministry. It was answered by several writers. In 1771 he published his "Dissertation on Miracles." His next publication was an "Essay on the Demoniacs of the New Testament," which he maintains to have been natural diseases. This work was replied to by Dr. Worthington and Mr. Fell: to the former Mr. Farmer returned a temperate answer, but on the other he was unmercifully severe. His last performance was entitled "The General Prevalence of the Worship of Human Spirits in the Ancient Heathen Nations, asserted and proved." This was also attacked by Mr. Fell, in an acute and learned treatise, in 1785. In the same year Mr. Farmer was almost deprived of his sight; but was relieved by a surgical operation, and enabled to pursue his studies. B. at Shrewsbury, 1714; D. at Walthamstow, 1787.—He directed his executors to burn his papers; but some of his letters, and fragments of a dissertation on the story of Balaam, were published in 1804, with his life prefixed.

FARMER, Richard, a divine and antiquary, was educated at Emmanuel College, Cambridge, where he took his degree of M.A. in 1760, and the same year was appointed classical tutor. In 1767 he took the degree of B.D., and became one of the preachers at Whitehall. In the preceding year he published his "Essay on the Learning of Shakspeare," in which he proved that all the knowledge of ancient history and mythology possessed by the immortal bard, was drawn from translations. In 1775 Mr. Farmer was chosen master of his college, and took his degree of D.D. He also became chancellor and prebendary of Lichfield, librarian to the university of Cambridge, and prebendary of Canterbury, which last situation he resigned for a residentiaryship of St. Paul's. He collected ample materials for a history of Leicester; but these, with the plates, he gave to Mr. Nichols, for the use of his history of that county. B. at Leicester, 1735; D. 1797.—His collection of scarce and curious books was sold by auction.

FARMINGTON, *far'-ming-ton*, the name of several townships in the United States, none of them with a population above 3,000.

FARN, or FERN ISLANDS, *farn*, on the coast of Northumberland, 17 in number, lying off the E. coast, opposite Bamborough. The principal Farn Island is about a mile in circumference, has two lighthouses on it, and contains 6 or 7 acres of rich pasture. *Lat.* 55° 57′ N. *Lon.* 1° 39′ W.—In 1838, the *Forfarshire* steamer was wrecked on these islands; when the keeper of the lighthouse, and his heroic daughter, Grace Darling, in the midst of the storm, proceeded to the wreck in an open boat, and saved nine persons. In 1843, the *Pegasus* was also wrecked here, when 60 persons perished.

FARNABY, Thomas, *far'-na-be*, an eminent English schoolmaster, who, after a variety of fortune, settled in London, where he acquired great reputation as a teacher. In 1616 he was admitted to the degree of M.A. at Cambridge. In the civil war he was imprisoned for his loyalty, and died in 1647. B. in London, about 1575.—He published Juvenal and Persius; Seneca's "Tragedies;" Martial; Lucan's "Pharsalia;" and other classical authors, with notes; "Index Rhetoricus et Poeticus;" "Florilegium Epigrammatum Græcorum;" and "Systema Grammaticum."

FARNBOROUGH, *farn'-bur-o*, the name of several parishes in England, none of them with a population above 500.

FARNESE, Peter Louis, *far-nai'-se*, the first duke of Parma and Placentia, was the son of Pope Paul III. by a secret marriage, before he became a cardinal. He was assassinated by his subjects, on account of his oppressive conduct, in 1547.

FARNESE, Alexander, a Roman cardinal, was the eldest son of the above. Charles V. said, that if all the members of the sacred college were like Farnese, it would be the most august assembly in the world. B. 1520; D. 1589.

FARNESE, Alexander, third duke of Parma, and nephew of the preceding. He distinguished himself as an able general in the service of Philip II. against the Netherlanders, and, afterwards, in the Catholic

army in France, in support of the League against Henry IV. He was wounded at the siege of Caudebec, and died soon after, at Arras, in 1592. B. 1546.—For an account of this commander's exploits, see Motley's "Rise of the Dutch Republic."

FARNEWORTH, Ellis, *farn'-werth*, an English divine, who obtained the rectory of Carsington, in Derbyshire, where he died, 1763. B. in Derbyshire.—He translated the "Life of Pope Sixtus V." from the Italian, 1754, folio; Davila's "History of the Civil Wars of France," in 1757, 2 vols. 4to; the "Works of Machiavel," 1761, 2 vols. 4to; and Fleury's "History of the Israelites," 12mo.

FARNHAM, *farn'-ham*, a town of Surrey, on the Wye, 10 miles from Guildford. It holds a large weekly market on Thursday, and is noted for the hops grown in its neighbourhood. *Pop.* 7,500.—During the civil wars, it was strongly defended by a moat and walls, which were dismantled by the forces of the parliament. Farnham sent members to parliament in the reign of Edward II.—Three miles from Farnham is Aldershott camp. (*See* ALDERSHOTT.)—There are several other parishes of this name, with small populations.

FARNWORTH, *farn'-werth*, a township of England, in Lancashire, 3 miles from Bolton. *Pop.* 6,500.

FARO, *far'-o*, an island of Sweden, in the Baltic. *Ext.* 10 miles long, with an average breadth of 3. *Lat.* 57° 56′ N. *Lon.* 19° 32′ E.—On its E. side there is a village of the same name.

FARO, a seaport of the S. of Portugal, in Algarve, near Cape Santa Maria, 20 miles from Tavira. The harbour is almost blocked up, but the roadstead affords convenient anchorage. It has a cathedral, military hospital, and an arsenal, with a trade in fruits and wine. *Pop.* 8,500.

FARO CAPE, the N.E. extremity of the island of Sicily, helping to bound the narrowest part of the Strait of Messina. *Lat.* 38° 15′ 50″ N. *Lon.* 15° 40′ 40″ E. —The FARO CHANNEL is a name sometimes given to the Strait of Messina.

FAROE, or FAROER ISLANDS, *far'-o*, a group in the Northern Ocean, lying between Iceland and Shetland, belonging to Denmark, and consisting of 22 islands, of which 17 are inhabited. *Ext.* They occupy a length of 70 miles, and a breadth of 45. *Desc.* Each is a lofty mountain, rising out of the waves, divided from the others by deep and rapid currents. The highest summits reach the elevation of between 2,000 and 3,000 feet. Some of the islands are deeply indented with secure harbours; all are steep, and most of them exhibit tremendous precipices. *Pro.* The soil is shallow, but remarkably fertile; barley is the only corn grown, and yields an immense crop; and the grass affords abundant pasturage for sheep; but no trees above the size of a juniper or stunted willow are to be seen. Vast quantities of sea-fowl frequent the rocks, the taking of which furnishes a perilous employment for the inhabitants. *Exp.* Salted mutton, tallow, goose-quills, feathers, eider-down, knit woollen waistcoats, caps, and stockings. *Lat.* between 61° 15′ and 62° 10′ N. *Lon.* between 5° and 7° 26′ W.

FARQUHAR, George, *far'-quar*, an English comic writer, was educated at Trinity College, Dublin, and quitted that seat of learning for the boards of the Dublin theatre. Here, while playing Guyomar, in the "Indian Emperor" of Dryden, he was so unfortunate as to stab a brother actor, when he relinquished the stage and proceeded to London, where he received from the earl of Orrery a lieutenancy in his lordship's regiment. He now commenced writing for the theatre, and in 1698 appeared his first dramatic piece, entitled "Love in a Bottle," which met with success. This was followed, in 1700, by the "Constant Couple, or Trip to the Jubilee." The same year he was in Holland, of which country he has given a humorous description in his Letters. In 1701 appeared the comedy of "Sir Harry Wildair," and the year following, his "Miscellanies." In 1703 he brought out "The Inconstant, or the Way to Win Him." His next piece was the popular play of "The Recruiting Officer." His last comedy was "The Beau's Stratagem," which also had a great run, and is his best production. B. in Londonderry, 1678; D. 1707. —Farquhar's comedies are lively, natural, and full of business; but they are also extremely licentious. Cibber, in his "Lives," thus speaks of him and his comedies:—"He seems to have been a man of a genius rather sprightly than great, rather flowery than solid. His comedies are diverting, because his characters are natural, and such as we frequently meet with; but he has used no art in drawing them, nor does there appear any force of thinking in his performances, or any deep penetration into nature; but rather a superficial view, pleasant enough to the eye, though capable of leaving no great impression on the mind."

FARRINGDON, GREAT, *fär'-ring-don*, an ancient town and parish of Berkshire, 32 miles from Reading. It has a spacious church in the Gothic style. *Pop.* 3,790. —The name of another parish in Devonshire, 3 miles from Topsham. *Pop.* 400.

FARS, or FARISTAN, *fars*, a province of Persia, bounded N. by Irak, E. by the province of Kerman and Lar, W. by Kuzistan, and S. by the Persian Gulf. *Ext.* About 420 miles long, and 360 broad. *Desc.* The southern parts are hot and sandy, the northern full of mountains, on which are found the most beautiful falcons in Persia, with a great number of wild hogs and wild cats. The centre is fertile. Salt lakes are numerous. *Pro.* Principally rice, fruit, corn, dates, tobacco, opium, cotton, attar of roses, wine, and silk. Large herds of cattle are reared, and the horses, asses, and camels are of excellent breeds. *Minerals.* Iron, lead, marble, emeralds, naphtha, and salt. *Manf.* Woollens, cottons, and silks. Quantities of skins are exported. *Pop.* 1,700,000. *Lat.* between 28° and 32° N. *Lon.* between 50° and 55° E.

FASTOLFE, Sir John, *fas'-tolf*, a famous English general, who served with great reputation in France, where he obtained several high posts while the English held possessions in that kingdom In 1440 he returned to his own country, and distinguished himself as a friend to the poor, and an encourager of learning. He was a considerable benefactor to the university of Cambridge, and to Magdalen College, Oxford. B. at Yarmouth, 1377; D. 1459.—Though there be a strong similarity in the names, he is not to be taken for Sir John Falstaff, the knight so humorously rendered by Shakspeare.

FATCHIO, *fatch-e-o'*, an island of the Japanese dominions, in the Strait of Corea, in the Pacific. *Lat.* 34° 20′ N. *Lon.* 129° 30′ E.—This is the Japanese place of banishment for state criminals.

FATIMIDES, *fät'-i-mides*, the designation of a race of kings who assumed the title of caliphs, and reigned over Egypt and the north of Africa, from about the close of the 9th to the end of the 12th century.

FATSHAN RIVER. (*See* SEYMOUR, Sir Michael.)

FAUCHET, Claude, *fo'-shai*, a French antiquary, whose works are, "Gaulish and French Antiquities;" "The Liberties of the Gallican Church;" "The Origin of Knights, Armorial Bearings, and Heralds;" "Origin of Dignities and Magistrates in France;" all printed together at Paris, in 1610, 4to. B. 1529; D. 1601.

FAUCHET, Claude, a French priest, who became vicar-general to the archbishop of Bruges and preacher to Louis XVI. That monarch, however, was disgusted with his excessive vanity and theatrical mode of action, which, it is said, made Fauchet a violent revolutionist. He took a leading part in storming the Bastille, and preached a thanksgiving sermon on the occasion. In another address, he designated Jesus Christ as the first *sans culotte* of Judea. He entered among the *Illuminati*, and, in 1791, became what was called the constitutional bishop of Bayeux. He was also deputy for the department of Calvados, to the Legislative Assembly, and, afterwards, a member of the Convention. B. in Dorne, 1744; guillotined, 1793.—His works are, "A Panegyric on St. Louis," pronounced before the French Academy; "A Funeral Oration for the Duke of Orleans," "Elogium on Benjamin Franklin," "Discourse on Universal Manners," &c. There are several other French writers of this name.

FAULHORN, *fole'-horn*, a mountain of the Alps, Switzerland, 30 miles from Berne. It lies between the valley of the Grindelwald and the lake Brienz. *Height*, 8,900 feet. There is an inn on its summit.

FAUNA, *faw'-na*, a deity among the Romans, whose marriage with Faunus procured her the name of Fauna, and her knowledge of futurity, those of Fatua and

Fatidica. It is said that she never saw a man, after her marriage with Faunus, and that her uncommon chastity raised her to be ranked among the gods after death.

FAUNALIA, *faw-nai'-le-a*, festivals at Rome, in honour of Faunus.

FAUNI, *faw'-ni*, rural deities, represented as having the legs, feet, and ears of goats, and the rest of the body human. They were called satyrs by the Greeks. The peasants offered them a lamb or a kid with great solemnity.

FAUNICH, LOCH, *faw'-nik*, a lake of Ross-shire, Scotland. *Ext.* 12 miles long, by 1 broad.

FAUNUS, *faw'-nus*, a son of Picus, whose bravery has given rise to the tradition that he was son of Mars. His great fondness for agriculture made his subjects revere him as one of their country deities after death. He was represented with all the equipage of the satyrs, and was consulted to give oracles. He is said to have reigned in Italy above 1,300 years B.C.

FAUST, or FUST, John, *foust*, a goldsmith of Mentz, who is said by some to have been the inventor of printing. He is, however, supposed only to have assisted Guttenberg, and his son-in-law Schoeffer, in bringing this noble discovery to perfection. The first production, by the new process of metallic types, was produced in 1459, and was entitled "Durandi Rationale Divinorum Officiorum," by Faust and Schoeffer. This was succeeded by the "Catholicon Joannis Januensis." The greatest work, however, of all was the Bible, in 1462; previous to which they had executed two beautiful editions of the Psalter. The story of Faust's being arrested as a magician at Paris, on account of the exactness of the copies of the Bible which he took thither for sale, is not entitled to credit. He was there in 1466, and is supposed to have died soon after.

FAUST, Dr. John, a German philosopher, who, educated at Wittemberg, thence proceeded to Ingolstadt, where he studied with great success, medicine, and, it is said, astrology and magic, also; expending, in prosecuting his chemical experiments, a considerable fortune, left him by an uncle. His countrymen, in their ignorance, imagined him one having dealings with supernatural powers; and this view of Faust subsequently formed a fertile theme for the dramatist, poet, and musician, as well as for the sculptor and painter. Goethe, especially, in his "Faust," has depicted, with a rich imagination, the doctor and his sprite attendant, Mephistopheles. Lived in the first half of the 16th century.

FAUSTA, Flavia Maximiana, *faws'-ta*, the second wife of Constantine the Great. By her accusations the emperor put his son Crispus, by a former wife, to death; but her infidelity becoming notorious, she was suffocated in a bath, 327.

FAUSTINA, Anna Galeria, the Elder, *faw-sti'-na*, was the daughter of Annius Verus, and the wife of Antoninus Pius. Notwithstanding her debaucheries, the emperor would not divorce her. D. 141, aged about 37. —Her daughter was the wife of Marcus Aurelius, and exceeded her mother in dissoluteness. D. 175.

FAUSTITAS, *faw'-sti-tas*, a goddess among the Romans, supposed to preside over cattle.

FAUSTULUS, *faws'-tu-lus*, a shepherd ordered to expose Romulus and Remus. He privately brought them up at home.

FAVART, Charles Simon, *fav'-ar*, a French composer of operas, whose pieces are numerous and excellent. They make 10 vols. in 8vo. B. at Paris, 1710; D. there, 1793.—His wife was an admirable actress and singer. She died in 1772; B. 1727.

FAVERSHAM, *fav'-er-sham*, a seaport-town of Kent, 9 miles from Canterbury, opposite the isle of Sheppey. It has an assembly-room, guildhall, church, gaol, theatre, and union. Near it are gunpowder-mills, and it has an oyster-fishery. *Pop.* 5,100.

FAVIGNANA, *fa'-veen-ya'-na*, an island of the Mediterranean, off the coast of Sicily, 12 miles from Trepani. *Ext.* 6 miles long, with an average breadth of 2. It has anchovy and tunny fisheries. *Pop.* Unascertained.

FAWCETT, William, *faw'-set*, an English general, whose military predilections were early discovered, when he offered himself as a volunteer to serve in Flanders, and was soon presented with a pair of colours. He paid unremitted attention to his duty, and, in his leisure hours, studied the French and German languages. While a lieutenant in the Guards, he translated from the former the "Reveries, or Memoirs upon the Art of War, by Field-Marshal Count Saxe," published in 4to, in 1757. He also translated from the German, "Regulations for the Prussian Cavalry," published the same year. This work was followed by "Regulations for the Prussian Infantry," to which was added "Prussian Tactics," published in 1759. On General Elliot being ordered to Germany, in the "Seven Years' War," Mr. Fawcett accompanied him as aide-de-camp. Subsequently he was attached, in the same capacity, to the marquis of Granby, who sent him to England with the account of the battle of Warburgh. He was soon afterwards promoted to a company in the Guards, with the rank of lieutenant-colonel. Frederick the Great, king of Prussia, made him flattering offers to induce him to enter into his service, which, however, he declined. His services and high character were duly valued by his king and country, and he was made knight of the Bath, colonel of the 3rd regiment of dragoon guards, and governor of Chelsea Hospital. B. near Halifax, Yorkshire, 1728; D. 1804, and was buried with great pomp in the chapel of Chelsea College.

FAWKES, Guido, or Guy, *fawks*, the most active and daring conspirator in the "Gunpowder Plot," which was designed, in 1605, to blow up king, lords, and bishops, in the house of parliament assembled. He was of a respectable family in Yorkshire; but entered into the Spanish army in Flanders, and in 1598 was at the taking of Calais by the Archduke Albert. Little more is known of his history, beyond his connection with the conspirators, who had pledged themselves by an oath to blow up the House of Lords, on account of James I. having given an assurance to his council, "that he had never any intention of granting toleration to the Catholics." Fawkes had undertaken to fire the powder which had been concealed under the devoted house; but about 12 o'clock, on the night of the 4th November, was caught in the cellar, with matches and a dark lantern, ready to perform the deed for which he and seven others suffered on the scaffold in 1606.

FAWKES, Francis, an English poet and divine, who took his degree in arts at Jesus College, Cambridge. On entering into orders, he settled at Bramham, Yorkshire, but afterwards obtained the vicarage of Orpington, in Kent, which he exchanged for the rectory of Hayes, where he died, in 1777. B. in Yorkshire, 1721. —He published a volume of poems and translations of Anacreon, Sappho, Bion, Moschus, and Theocritus. His version of the "Argonautics" of Apollonius was published in 1780. Mr. Fawkes also lent his name to an edition of the Bible with notes. It was in translation, however, that he excelled. The odes of Anacreon, Dr. Johnson says, are finely translated.

FAYAL, *fay-al'*, one of the Azore islands. *Ext.* 27 miles long, and 9 broad. *Area*, about 37 square miles. *Desc.* Fertile and diversified. It is, with the exception of St. Michael, the most frequented island of the group. *Pop.* 23,000. *Lat.* 38° 30′ N. *Lon.* 28° 46′ W.

FAYDIT, Anselm, *fai'-de*, a Provençal poet, or troubadour, who was patronized by Richard Cœur de Lion. D. 1220.—He wrote a poem on the death of Richard I., "The Palace of Love," and several comedies.

FAYDIT, Peter, a French priest of the congregation of the Oratory, whence he was compelled to remove, for publishing a book on the Cartesian philosophy, contrary to a prohibition from his superiors. He also wrote "Illustrations of Ecclesiastical History," 8vo; "A Treatise on the Trinity," for which he was imprisoned; and a wretched critique on Telemachus. D. 1709.

FAYETTE, *fai-yet'*, the name of several counties in the United States. 1. In the S.W. part of Pennsylvania. *Area*, 824 square miles. *Pop.* 40,000.—2. In the central part of Kentucky. *Area*, 275 square miles. *Pop.* 24,000, of whom half are slaves.—3. In Ohio, west of Pickaway county. *Area*, 415 square miles. *Pop.* 14,000.—The name, also, of several other places in the United States.

FAYETTE, Mary Magdalene, Countess of, the wife of the count de la Fayette. She wrote the romances of "Zaïde" and the "Princess of Cleves,"

also the "Princess of Montpensier," "Memoirs of the Court of France," the "History of Henrietta of England," and other works. D. 1693.

FAYETTE, LA. (*See* LA FAYETTE.)

FAYETTEVILLE, *fai-yet'-veel*, a town of N. Carolina, U.S., so named in honour of La Fayette. There are some fine buildings, and it is one of the most healthy places in Carolina. *Pop.* 6,000.

FAYOUM, *fa-yoom'*, a province of Egypt, stretching out into the desert, by which it is almost entirely surrounded. It consists of a valley, nearly environed by a circuit of hills, 40 miles from Cairo. *Ext.* 40 miles long, by 30 broad. *Desc.* Fertile, and in this respect equal to other parts of Egypt. *Pro.* Durra, rye, barley, flax, cotton, and sugar; roses are also cultivated in considerable quantities, to supply the manufactories of rose-water carried on in Fayoum, the capital. *Manf.* Woollen, linen, and cotton fabrics. The communication with Cairo is carried on by caravans, which set out weekly from the village of Tamieh. These are loaded with shawls, sackcloth, mats, rose-water, figs, olives, dates, &c.; and raw cotton, coffee, soap, cloths, and several other European commodities, are brought back. *Pop.* Unascertained, but considerable.

FAYOUM, or MEDINA FAYOUM, the capital of the above province, though much declined from its ancient wealth, is about a mile and a half in circumference; and the houses, consisting merely of bricks dried in the sun, compose an assemblage of gloomy huts. Around it are scattered numerous remains of antiquity. *Lat.* 29° 27′ N. *Lon.* 30° 39′ E.

FÉ, SANTA, *sant'-ta fai*, South America. (*See* SANTA FÉ.)

FEALE, *feel*, a river of Ireland, rising in the mountains of Cork and Limerick, and falling, by a tidal estuary, called Cashin, into the Shannon, 11 miles above Kerry Head.

FÉCAMP, *fa'-kaw*, a seaport-town of France, in the department of the Lower Seine, 21 miles from Havre. It has a lighthouse, the port being very good. *Manf.* Cottons, woollens, lace, linen; and there are tanneries, saw-mills, and shipbuilding-docks. It is the seat of a chamber of commerce, and has a school of navigation. *Pop.* 11,500.

FECIALES, *fe'-si-ai-les*, a number of priests at Rome, employed in declaring war and making peace. When the Romans thought themselves injured, one of this sacerdotal body was empowered to demand redress, and, after the allowance of thirty-three days to consider the matter, war was declared, if submissions were not made, and the Feciales hurled a bloody spear into the territories of the enemy, in proof of intended hostilities.

FECKENHAM, *fek'-en-ham*, a town and parish of Worcestershire, 6 miles from Droitwich. *Manf.* Principally needles. *Pop.* 3,300.

FECKENHAM, John de, the last abbot of Westminster. On the commencement of the Reformation, he opposed it with spirit, and was sent to the Tower, where he continued till Queen Mary's accession, when he was made abbot of Westminster. Queen Elizabeth, whose life he had saved by his remonstrances with Mary, when the latter designed her death, would have made him archbishop of Canterbury, if he would have conformed; but he refused. He sat in her first parliament, and protested against the Reformation; for which he was committed to the Tower. He continued in confinement till 1563, and was then delivered to the care of the bishop of Winchester. B. at Feckenham, Worcestershire; D. in the castle of Wisbeach, in 1585.—He was a learned and liberal man, charitable to the poor, and the author of some controversial pieces.

FEDOR, Ivanovitch, *fai'-dor*, the last czar of the dynasty of Ruric, on the throne of Russia. He began his reign in 1584, and being weak, both in body and mind, assigned the government of his affairs to Godounoff, who seems to have managed them with dexterity and vigour. In his reign the peasants of Muscovy were converted into serfs, and attached to the land. Previously, they had enjoyed personal liberty. The conquest of Siberia was achieved by Goodenoff, and many remarkable diplomatic relations with foreign courts were effected; so that this reign may be deemed by no means the least remarkable in the Muscovite annals. D. 1591, and in him expired the last of the dynasty of Ruric.

FEDOR, Alexievich, czar of Russia, and eldest brother of Peter the Great. He ascended the throne when only 19 years of age, and evinced a strength of will and determination of character, which, had he lived, might have anticipated the reforms which his younger brother was subsequently destined to effect among the people over whom he was called to reign. His sway is rendered memorable, on account of his calling into his presence the Muscovite nobles, who desolated the country with broils about their claims of family precedence, and, throwing the rolls of the "Razriad," or "Arrangement," into the fire. The genealogical records, which did not relate to claims of precedence, were preserved and properly arranged, in accordance with his will. D. in his 25th year, 1682.

FEEJEE ISLANDS, *fe'-je*, a group in the South Pacific Ocean, comprising 200, of which 65 are inhabited. *Desc.* Volcanic, with a fertile soil, and well watered. Vegetation is remarkably luxuriant. *Pro.* Sugar, bread-fruit, and palms; but agriculture is little practiced, the natives being more engaged in warfare than in cultivating domestic arts. *Pop.* Estimated at about 130,000. *Lat.* between 15° 30′ and 19° 30′ S. *Lon.* between 177° E. and 178° W.

FEHMARN ISLAND, Denmark. (*See* FEMERN.)

FEHRBELLIN, *fair'-bel-lin*, a town of Prussia, 22 miles from Potsdam. *Pop.* 2,000.—Here, in 1675, the elector of Brandenburg defeated the Swedish army.

FEIA, *fai'-a*, a large lake of Brazil, 130 miles from Rio Janeiro. It lies near the Atlantic, with which it is connected by a canal called Furado.

FEITH, Rhynvis, *fite*, a distinguished Dutch writer in the paths of poetry, fiction, and the drama. His most successful poem is entitled "Fanny," which made its appearance in 1787. His novels never enjoyed a high reputation, and his best drama is named "Thirsa; or, the Triumph of Religion." His muse had a religious cast; and two poems of the didactic kind, entitled "Old Age" and "The Grave," were very much extolled by his countrymen. His works, in 13 volumes, were printed at the Hague, in 1825. D. at Zwolle, 1753; D. there, 1824.

FELIBIEN, Andrew, *fe-lib'-e-en*, a French historiographer, who wrote "Entretiens sur les Vies, et sur les Ouvrages des plus Excellens Peintres," 5 vols. 4to; "The Principles of Architecture, Painting, and Sculpture," 4to; and "Conferences of the Royal Academy of Painting." He became superintendent of the Royal buildings at Paris, and was the friend of Nicholas Poussin, whose acquaintance he made at Rome. B. at Chartres, 1619; D. 1695.—His sons, JOHN FRANCIS and MICHAEL, were also ingenious men. The first succeeded him in his places, and wrote, "The Lives of Celebrated Architects," 4to; and "A Description of Versailles." D. 1733.—MICHAEL was a Benedictine of St. Maur, and wrote "The History of the Abbey of St. Denis," folio; and began "The History of Paris," which was afterwards completed by Lobineau, in 5 vols. folio. D. 1719.—JAMES FELIBIEN, the brother of Andrew, was canon of Chartres and archdeacon of Vendôme. He wrote several religious works. D. 1716.

FELICE, Fortuné Barthélemy de, *fai-le'-chai*, an indefatigable continental writer, who was originally a professor of sciences at Rome and Naples. Compelled to quit Rome in consequence of an intrigue with the countess of Panzutti, he for a long time wandered in Italy and Switzerland, finally taking up his residence at Berne, where he continued his scientific labours, and connected himself with Haller. Here he embraced Protestantism and married. Subsequently he formed, at Yverdun, in the canton of Vaud, a large printing establishment, whence issued a number of good books, he, at the same time, successfully directing an academy. His first publications were translations from the English and French, into Italian and Latin, those scientific works which he wished to make known to Italy; among others, those of Newton, Descartes, Maupertuis, and D'Alembert. From 1758, he edited, with Tscharner, some literary and scientific journals, which were held in high estimation, as also several other writings of great merit. Finally he published, from 1770 to 1780, in 48 vols. 4to, and 10 vols. of plates, the Encyclopædia, known as that of Yverdun.

In this great work, of which Diderot's formed, in some measure, the base, he had, as collaborateurs, Euler, Haller, Lalande, and other German, French, and Italian writers. Besides the works here named, his country owes to him the production of other instructive and well-digested volumes. B. at Rome, 1723; D. at Yverdun, 1789.

FELIX, *fel'-lix*, 'happy,' governor of Judæa. St. Paul, when brought before him, delivered an admirable discourse, which made him tremble. Nero recalled him, on account of his rapacity. Lived 53 A.D.

FELIX I. succeeded Pope Dionysius in 269, and was canonized. He wrote an epistle against Sabellius and Paulus Samosatenus, which is extant. D. 274.

FELIX II., antipope. He was placed in the papal chair in 355, by the emperor Constans, during the exile of Liberius, on the return of whom he was expelled. Constans would have had the two popes reign together; but the people exclaimed, "One God, one Christ, and one bishop!" Felix was then exiled, and died in 365.

FELIX III. succeeded Simplicius, in 483. He had a violent dispute with the emperor Zeno in behalf of the Western church, and died in 492.

FELIX IV., a native of Benevento, ascended the chair after John I., in 526. He governed the church with zeal and piety, and died in 530. He introduced extreme unction.

FELIX, bishop of Urgella, in Catalonia. He espoused the notion of his friend Elipand, archbishop of Toledo, that Jesus Christ was the son of God only by adoption. For this, Charlemagne caused him to be deposed and banished to Lyons, where he died, in 815.

FELIX HARBOUR is in Boothia, N. America. (*See* BOOTHIA.)

FELL, John, *fel*, a learned English prelate, who was educated at Christchurch, Oxford, of which his father was dean. In the civil war, he was ejected from the college for his loyalty. At the Restoration he was made canon and dean of Christchurch, to which college he was a liberal benefactor. He served the office of vice-chancellor several times, and, in 1675, was made bishop of Oxford, with leave to hold the deanery in commendam. B. at Longworth, Berkshire, 1625; D. 1686.—His works are, "The Life of Dr. Hammond," "A Paraphrase on St. Paul's Epistles," editions of several ancient authors, with notes; as Cyprian and others. The bishop's father was turned out of his deanery by the rebels, in 1647, and died of grief for the murder of the king.

FELL, John, an English dissenting minister, who, from being bred a tailor, became resident tutor in the dissenting academy at Homerton. Here he had not long been, when a misunderstanding arose between him and the managers of that institution, which ended in his dismissal, without being heard in his own defence. Some friends then subscribed for him a yearly stipend of £100, for which he was to deliver a course of lectures on the evidences of Christianity. Four of these were given by him in 1797; but the treatment he had received brought on a complaint, of which he died, in that year. B. at Cockermouth, Cumberland, 1732.—Mr. Fell was the author of an answer to Mr. Farmer's "Essay on the Demoniacs," and another in reply to that gentleman, "On the Idolatry of Greece and Rome;" an "Essay on the Love of One's Country," "Genuine Protestantism," "A Letter to Mr. Burke on the Penal Laws," "An Essay towards an English Grammar," and several other papers.

FELLAHS, *fel'-las*, the peasants and labourers of Egypt. (*See* EGYPT.)

FELLER, Joachim Frederick, *fel'-ler*, a learned German, who became secretary to the duke of Weimar, and published "Monumenta Varia inedita," 1714, 4to; "Miscellanea Leibnitiana," "Genealogy of the House of Brunswick," &c. B. 1673; D. 1726.

FELLER, Francis Xavier, an ex-Jesuit, who published, at Luxembourg, "An Historical and Literary Journal, from 1774 to 1794," "A Geographical Dictionary," and "The Historical Dictionary," in 8 vols. 8vo, at Liège. The editors of the last edition of the "Nouveau Dictionnaire Historique" are very severe on him, on account of this last work, which they call a piracy committed on their own. B. at Brussels, 1735; D. at Ratisbon, 1802.—Feller also wrote "Observations on the Philosophy of Newton," "An Impartial Examination of the Epochs of Nature," by Buffon, &c.

FELLOWS, Sir Charles, *fel'-lows*, a traveller, who, in 1838, made a tour in Asia Minor, and explored the banks of the ancient Xanthus, and discovered the ruins of Xanthus, the ancient capital of Lycia, Ilos, and thirteen other cities, in all of which he found a greater or less number of works of art. A large proportion of these were, ultimately, transported to England, and now form the Lycian saloon in the British Museum. In 1852 he republished the journals of his travels in a cheap form, under the title of "Travels and Researches in Asia Minor, particularly in the Province of Lycia." In 1845 he was knighted for his discoveries. B. at Nottingham, 1799.

FELTON, John, *fel'-ton*, a Catholic gentleman, who placed the pope's bull, excommunicating Queen Elizabeth, upon the gates of the bishop of London, for which he was executed, in 1570.—His son THOMAS was an ecclesiastic of the order of St. Francis, and, visiting England as a missionary, was apprehended and executed, in 1588.

FELTON, the name of several parishes in England. —1. In Herefordshire, 8 miles from Hereford. *Pop.* 200.—2. In Northumberland, 8 miles from Alnwick. *Pop.* 1,600.—3. In Shropshire, 4 miles from Oswestry. *Pop.* 1,100.

FELTRE, *fail'-trai*, a town of Italy, on a height near the Piave, 17 miles from Belluno. It has a cathedral and a diocesan school. *Manf.* Silk twist, bleaching-fields; and it has a trade in wine, oil, and corn. *Pop.* 6,000.

FELTRE, Henri Jacques Guillaume Clarke, Duc de, *feltr*, entered the French military service in 1781, and, by the time he was 27 years of age, had risen to the rank of lieutenant-colonel, chiefly by the patronage of the duke of Orleans. In 1793 he was made general; and, in 1795, was sent on a secret mission to Vienna, and to the seats of war in Italy, for the purpose of watching the ambitious movements of Napoleon I. In a short time, however, he was fascinated by the rising star of that great man, entered his service, and, throughout his varying fortunes, continued with him till his fall. In 1807 he was made Minister of War, an office which he retained, through much ill-will and clamour, till 1814. In 1809 he was made duke of Feltre. After the fall of the emperor, he served Louis XVIII.; but his merits, however appreciated by the sovereign, were not proof against the continual attacks of other courtiers, and he was sent into a kind of honourable exile, to Rouen, with the command of the 3rd division. B. at Landrecies, 1765; D. at Rouen, 1818.

FEMERN, *fai'-mern*, an island of Denmark, in the Baltic. *Area*, 70 square miles. *Desc.* Level, but fertile in corn, and cattle are abundant. Fishing and navigation are the principal pursuits of the inhabitants. *Pop.* 9,000. *Lat.* 26° 10' N. *Lon.* 11° 12' E.

FÉNÉLON, Francis de Salignac de Lamothe, *fai'-nai-lawng*, archbishop of Cambray, completed his studies at Paris, where, when young, he distinguished himself as a preacher. In 1686 he was employed by Louis XIV. as a missionary in Poitou, to convert the Protestants, and, by his persuasive eloquence, made many friends. In 1689 he became tutor to the dukes of Burgundy, Anjou, and Berri, which office he discharged so well, that he was preferred to the archbishopric of Cambray. About this time he fell into trouble, on account of his book entitled "The Maxims of the Saints," which was charged with favouring the mystical principles of Madame de Guyon. Bossuet, bishop of Meaux, who was a violent enemy of that celebrated mystic, attacked the archbishop, and by his influence with the king, obtained an order for him to be banished to his diocese. The book was also condemned at Rome, by Pope Innocent VIII., and, to this censure, Fénélon submitted with profound deference, and even read the decree from the pulpit. He spent the remainder of his days in his diocese, and never recovered the king's favour, owing, in a great measure, to his composing, for his royal pupil, the duke of Burgundy, "Telemachus," in which Louis imagined he discovered some passages reflecting on himself. The good archbishop, however, bore his exile with the serenity of conscious integrity. His charities were unbounded, and so revered was his character, that the duke of Marlborough, and other

generals of the allies, when possessed of that part of Flanders, exempted his lands from pillage or exaction. B. at the Castle of Fénélon, in Perigord, 1651; D. 1715, without money and without debt.—Besides the above works, he wrote "Dialogues of the Dead," "Dialogues on Eloquence," a "Treatise on the Education of Daughters," a "Demonstration of the Existence of God," and "Spiritual Works." Fénélon is inferior, in force and sublimity, to his countryman Bossuet, but no author has, perhaps, surpassed him in the grace and charm of his style; he has been one of the most successful of writers to reproduce, in modern times, the noble simplicity of the ancients. As a man and Christian, he practised virtue, as he taught it, and caused the name and essence of religion to be loved and respected. Many of his works are lost; for, on the death of the duke of Burgundy, Louis XIV. caused several of his writings to be burned, which were found amongst the prince's papers.—His grand-nephew, the Abbé de Fénélon, was chaplain to Maria Leczinska, wife of Louis XV., and undertook the direction of an establishment charitably founded for the support of the little Savoyards in Paris. In spite, however, of his virtues and benevolence, he was arrested and brought before the revolutionary tribunal, which condemned him to death. All the Savoyards in Paris hastened to the Convention to demand pardon for him, whom they called their "good father." Their prayers were vain; he was executed 1794. B. at St. Jean des Tallais, 1714.

FENTON, Elijah, *fen'-ton*, an English poet, who was, for some time, usher of a school in Surrey, and afterwards master of one at Sevenoaks, in Kent. In 1710 he became secretary to the earl of Orrery, and tutor to his son. He afterwards lived with Lady Trumbull as tutor to her son, and died at her seat in Berkshire, in 1730. B. at Shelton, Staffordshire, 1683.—He wrote some poems; the "Life of Milton;" the tragedy of "Mariamne;" and assisted Pope in his translation of the "Odyssey."

FENTON, the name of several parishes in England, none of them with a population above 4,500, which is the largest, and is 3 miles from Newcastle-under-Lyne, Staffordshire. It has a station on the Manchester and Birmingham Railway.

FERALIA, *fe-rai'-le-a*, a festival in honour of the dead, observed at Rome, the 17th or 21st of February. It continued for eleven days, during which, presents were carried to the graves of the deceased, marriages were forbidden, and the temples of the gods were closed.

FERDINAND, *fer'-di-nand*, a name derived from the German *verdienen*, 'to merit,' and which has been borne by several emperors of Germany, kings of Spain, Naples, Sicily, &c.

### EMPERORS OF GERMANY.

FERDINAND I., emperor of Germany, succeeded his brother Charles V. in 1558, at which time Ferdinand was king of the Romans, and of Hungary and Bohemia. He made peace with the Turks, and died in 1564, leaving the character of a wise and humane prince. B. 1503.

FERDINAND II. was the son of the archduke of Styria, and was elected king of Bohemia and of Hungary. Soon afterwards he succeeded Matthias as emperor. The Bohemian states having chosen the elector palatine Frederick to be their king, the latter raised an army of Protestants against the emperor, and thus was commenced the struggle known as the "Thirty Years' War," lasting from 1618 to 1648. Ferdinand defeated Frederick at Prague in 1620, and deprived him of his estates. A second league was then formed against the emperor by the Protestant princes, headed by Christian IV. of Denmark, who was defeated by Tilly, and forced to sign a treaty of peace at Lubeck, in 1629, which put an end to the war. Another league was now formed, of which Gustavus Adolphus was at the head, who defeated the Imperialists in different battles, but was himself slain at Lutzen, in 1632. A partial peace was afterwards made between the emperor and some of the Protestant princes, but it was soon broken, and the war renewed. D. 1637. Maximilian of Bavaria, Tilly, and Wallenstein, were amongst Ferdinand's generals. (*See* those names.)

FERDINAND III. the son of the preceding, was made king of Hungary in 1625, of Bohemia in 1627, and succeeded his father in 1637. Sweden and France being in alliance, gained several advantages over the Imperialists, which terminated with the peace of Westphalia in 1648. B. 1608; D. 1657.

### SOVEREIGNS OF SPAIN (CASTILE, LEON, ARAGON, &c.)

FERDINAND I., king of Castile and Leon, called the Great, was the second son of Sancho III., king of Navarre. By the death of Bermudo, in 1037, he became king of Leon. He then made war against the Moors, from whom he took several cities, and pushed his conquests as far as Portugal. He next declared war against his brother, Garcias IV., king of Navarre, in which that prince lost his kingdom and his life. D. 1065.

FERDINAND II., son of Alphonso VIII., king of Leon and Castile, gained great advantages over the Portuguese, and made their king, Alphonso Henriquez, prisoner, whom he used with moderation. D. 1187.—In the reign of this prince, the military order of St. James was instituted, for the purpose of defending the dominions of the Christian powers against the Saracens.

FERDINAND III., son of Alphonso IX., obtained the crown of Castile by the abdication of his mother, Berengere, in 1217, and that of Leon by the death of his father, in 1230. He took many places from the Moors; but while he was projecting an expedition against Morocco, died, in 1252.—He was canonized by Pope Clement X., and is regarded as the founder of the university of Salamanca.

FERDINAND IV. succeeded to the throne of Castile in 1295, at the age of ten years, under the guardianship of his mother, who governed the kingdom with great prudence. D. 1312.—In 1309 Gibraltar was taken from the Moors by the Spaniards. This prince, in a fit of anger, caused two noblemen to be precipitated from a high rock. Just before undergoing this fate, they told him that he would appear before God in thirty hours from that time. Their prediction was verified, and thence he obtained the name of the "Summoned."

FERDINAND V., called the Catholic, son of John II., king of Aragon, married Isabella of Castile, sister of Henry IV., and thereby united the two kingdoms of Castile and Aragon. He declared war against Alphonso, king of Portugal, and defeated him at Toro, in 1476. He next completed the conquest of Grenada, and in 1516 expelled the Moors from Spain. The most remarkable event which signalized his reign, was the discovery of America by Columbus. He also made himself master of part of Navarre, and by the brilliancy of his successes, placed himself generally at the head of European princes. D. 1516.—In 1481 the tribunal of the Inquisition was reorganized in Spain by Ferdinand and Isabella. Notwithstanding his great successes, he has been reproached for his instability and craft, which procured for him the surname of the "Crafty," in addition to that of the Catholic, for his victories over the Moors. In all his enterprises he was ably seconded by his consort Isabella, his minister Cardinal Ximenes, and his general Gonsalvo de Cordova. (*See* ISABELLA and COLUMBUS.)

FERDINAND VI., son of Philip V. and of Mary of Savoy, ascended the throne in 1746. This prince distinguished his reign by acts of beneficence, restoring liberty to prisoners, proclaiming pardon to smugglers and deserters, and assigning two days in a week to render justice to his subjects. He took part in the war of 1741, and signed the peace in 1748, by which means one of his brothers obtained the crown of the the Two Sicilies, and the other the dukedom of Parma and Placentia. He re-established his marine, and reformed and promoted arts and agriculture. D. at Madrid, without issue, 1759.—A singular coincidence of earthquakes occurred in this monarch's reign, no less than three severe shocks occurring in South America and Europe. In 1746 Lima, the capital of Peru, was almost entirely destroyed; Quito, in the same country, experienced a like misfortune in 1755; and seven months after this, many cities and towns in Spain suffered considerably from the earthquake which overthrew Lisbon.

FERDINAND VII., king of Spain and the Indies, was

the son of Charles IV., and was, when only six years old, recognized as prince of Asturias. During his minority, Spain was governed by Godoy, who vainly endeavoured to acquire the same influence over his mind that he had gained over the minds of his parents In 1801 he married Maria Antonia, a princess of Naples, possessed of great beauty and accomplishments. She, however, is supposed to have been poisoned in 1806, when Napoleon I. began to form his designs upon Spain. With the view to disconnect Ferdinand from the projects of Godoy, the French emperor proposed a matrimonial alliance between him and the daughter of Lucien Bonaparte, which was entertained by Ferdinand, but prevented by Godoy, who informed Charles IV. of the design, and so exasperated the king against the prince, that he was imprisoned in the Escurial. Soon afterwards a public reconciliation took place, when the French army entered Spain, and the public indignation rose to a high pitch against Godoy, whose dismissal from the councils of his sovereign was loudly demanded. Charles became alarmed, and, abdicating his throne, Ferdinand was proclaimed his successor, and immediately assumed the reins of government. Meanwhile the French advanced towards Madrid, when Ferdinand sent a deputation requesting the preservation of amity with Napoleon; but that sovereign replied that Charles IV. was his friend and ally, and he could not recognize the right of any other claimant to the Spanish throne. Shortly afterwards, under pretence of having an interview with Napoleon at Bayonne, he was made a prisoner, when the French emperor demanded his renunciation of the Spanish crown. Charles IV., with his queen and minister Godoy, resumed possession of the throne and government, whilst the Spaniards, in all directions, were rising in arms. Napoleon now persuaded the royal family to take refuge in Bordeaux, and there formally abdicate the crown. So soon as this was accomplished, Joseph Bonaparte, the brother of Napoleon, was proclaimed king, whilst Ferdinand was placed in confinement at Valençay, where he and his family remained till 1813, when he was restored to the exercise of his regal rights. On returning to his kingdom, he was received with open arms by his people; but on arriving at Madrid, he dissolved the Cortes, and assumed the powers of an absolute monarch. The Inquisition was re-established, and those liberals who had fought for the expulsion of the French from the Spanish soil, were persecuted with the utmost rigour, despoiled of their property, forced to flee, or submit to the axe of the executioner. These measures exasperated the people, who, in 1820, rebelled against Ferdinand and re-established the Cortes, who endeavoured to stay the progress of the revolution, and adjust the affairs of the kingdom. In 1823 France again declared war against Spain, and the duke of Angoulême, at the head of an army of 100,000 men, entered the country, with the avowed purpose of restoring Ferdinand to all his absolute powers. The object was effected, but Ferdinand was not permitted to govern entirely by his own will. His despotic disposition was checked on one side by the dread of the liberals, and on the other by doubts of the friendship of the more violent absolutists, who deemed even the rule of Ferdinand too moderate to satisfy their tyrannical propensities. In this position he continued to reign, though hardly to govern, till 1833, when he died, and was buried with great pomp in the vaults of the chapel of the Escurial. B. 1784.—By his will he left the crown to his daughter Isabella, under the regency of her mother, Maria Christina, to the exclusion of Don Carlos, his brother. A long and disastrous civil war was the consequence. (*See* CARLOS, DON.)

FERDINAND, king of Portugal, succeeded his father, Peter, in 1367. On the death of Peter the Cruel, king of Castile, he assumed the latter title, which produced a war between him and Henry of Transtamara, who ravaged Portugal, and forced Ferdinand to make peace and marry his daughter. This marriage he afterwards disowned, and entered into an alliance with John of Gaunt, duke of Lancaster, who laid claim to the Castilian throne. This war proved very disastrous to the Portuguese, and Ferdinand was obliged to sue for peace. Another war was entered into, in which he was supported by the English, and was for a time successful, but was at last under the necessity of making peace. D. 1383.

FERDINAND, infant of Portugal, son of John I., passed into Africa, at the age of 14, to attack the Moors, and laid siege to Tangier. He was, however, made prisoner by the Moors, and spent the remainder of his life in captivity, dying of chagrin, 1443.—This prince's misfortunes have formed the subject of a great number of legends and tales.

SOVEREIGNS OF NAPLES AND SICILY.

FERDINAND, king of Naples and of Sicily, succeeded Alphonso in 1458. In his reign, a civil war raged in his kingdom; but, uniting his arms to those of Scanderbeg, prince of Albania, he was enabled to defeat his barons in 1462. His rule, however, was again disturbed by them; when, in 1480, on the occasion of the marriage of his niece, he had many of the leading barons arrested in Naples, where they were thrown into prison, and numbers of them strangled. He was detested for his debaucheries and cruelties; yet he enacted many good laws, and restored the university of Naples. D. 1494.

FERDINAND II. ascended the throne at an early age, and entered into a war with the French, who, however, forced him to withdraw from Sicily. His reign was short, and marked by no event of general public importance. D. at Naples, 1496.

FERDINAND III. is the same as Ferdinand the Catholic. (*See* FERDINAND V. of Spain.)

FERDINAND IV. of Naples, and I. of the Two Sicilies, ascended the throne in 1759, and, for 30 years, brought peace and comparative happiness to the people over whose destinies his dominion was cast. On the breaking out of the French revolution, in 1792, the French demanded that Naples should renounce all connection with Great Britain; but, on the death of Louis XVI. of France, Ferdinand joined the coalition, and participated in the general war against France, from 1793 to 1796. Two years of peace now intervened; when the victory of Nelson, at Aboukir, once more brought Ferdinand into the field against the French, who defeated him, drove him from his kingdom, and proclaimed the Parthenopean Republic, in 1799. In the same year, however, the capital was retaken by the royalist army. In 1806 he lost his dominions again, Napoleon conferring the crown, first on his brother Joseph, and afterwards on Murat; Ferdinand, however, by the aid of the English, continuing to reign in Sicily. In 1814, the congress of Vienna finally established Ferdinand as king of the Two Sicilies. In 1820 a revolutionary movement commenced, under the auspices of a secret society called Carbonari, which proclaimed a constitution similar to that of Spain, and convoked a parliament at Naples. Another revolt broke out at Palermo, which was not suppressed without much bloodshed. This state of things excited the interest of Russia, Austria, and Prussia, who would not acknowledge the new system of government established at Naples; and resulted, in 1821, in an Austrian army crossing the Po, and moving on Naples. The Neapolitans resisted, but were defeated; and the Austrians entered the city. Ferdinand, who had quitted his capital, now returned to it, and the government again became and continued absolute throughout the remainder of his reign. B. 1751; D. 1825.

FERDINAND II., surnamed "Bomba," king of the Two Sicilies, was the son of Francis I. and Isabella of Spain. He succeeded his father on the throne of Naples and Sicily in 1830. On his accession, by the introduction of a few liberal measures, the announcement of an amnesty for political offenders, and the promise to heal the wounds of this unhappy country, he was received with quite an ovation of joy and gratitude. These feelings were not destined, however, to last long. No sooner did he feel himself securely fixed in his seat, than he, like his father, placed himself in the hands of the clergy, more especially the Jesuits, to whom he at first allowed the monopoly of instruction; and thus they soon obtained supreme power. This they shared to some extent with the police, the latter seizing on all the highest posts in the government, without, however, being able to hinder conspiracies and risings amongst the people. The whole reign of Bomba is but

a long recital of these. Three attempts at insurrection were made in the year 1833; others, more serious, took place in 1837, 1841, 1844, and 1847. The king now instituted a procedure of torture, and put a price on the heads of those who were suspected of designs against his authority; many lost their lives, and numerous families were forced into exile. This rigorous rule served only to exasperate the people, and hasten the events of the revolution of 1848. In that year, when the thrones of Europe seemed trembling in the balance, the rebellion in Sicily, and the popular manifestation at Naples, forced the king to promulgate and swear to a constitution. Public opinion also forced him to send a *corps d'armée* to the support of the revolution in Lombardy; but, after having succeeded in repressing the revolutionists at Naples, he recalled the troops, and employed them to extinguish the insurrection in Calabria. Emboldened by his success, he treated with contempt the parliament, which had been assembled by virtue of the new constitution, and in the early part of 1849 declared it dissolved. He then turned his attention to his revolutionary subjects in Sicily, and at the same time undertook his unfortunate campaign against the Roman republic. Sicily being now conquered by Filangieri, and Rome occupied by the French, who had driven out the republicans, Ferdinand II.'s tyranny knew no bounds. The picture of his rule, as drawn by Mr. Gladstone, in 1851, in his famous "Letters to Lord Aberdeen," struck no one as an exaggeration. Vexatious and arbitrary proceedings substituted for the law; the civil code mutilated and defaced; education at a stand-still; literature and science humiliated; a rigorous and puerile censorship of the press; relations with other countries rendered difficult, or altogether interdicted; punishments multiplied; the most honourable citizens exiled,—such is the history of the last years of Bomba's reign. The use that he made of his absolute power, seemed to the most absolute of European sovereigns a stigma and disgrace to all government, and grave complaints were made at the congress of Paris, 1856, and even warnings addressed to him by the diplomatists at his court. In vain, however, all this,—he protested against the slightest interference in the internal affairs of his kingdom; and although France and England proceeded, in 185–, to the extremity of jointly recalling their ambassadors, it had no effect in causing a more gentle rule of the Neapolitans on the part of the king. B. at Palermo, 1810, when the throne of Naples was occupied by Murat; D. at Naples, 1859.

FERDINAND I., Emperor of Austria, son of Francis I., ascended the imperial throne in 1835, and continued to pursue the policy of his father, leaving the chief direction of affairs in the hands of Prince Metternich. In his reign, the republic of Cracow was annihilated, and a portion of it added to the empire. During the revolutionary year of 1848, he dismissed Metternich, and declared that the new minister should be responsible, and caused him to prepare a constitution. The concessions not being sufficient, Vienna revolted in May, the emperor retiring to Innspruck, whence he was induced to return at the pressing solicitations of the Viennese. The city rising again in October, Ferdinand established himself at Olmutz, and on December 2, 1848, abdicated, having no children, in favour of his nephew, Francis Joseph I. (*See* METTERNICH.)

FERDOUSI, or FERDUSI, *fer-doo'-se*, a celebrated Persian poet, whom Mahmoud commissioned to write the "Châh Nâmeh," or History of the Persian Kings. The bard was employed thirty years in executing this immense work, which contains no less than 120,000 verses; and he was to receive a thousand pieces of gold for every thousand couplets. Whilst, however, he was giving himself up to the execution of his task, his enemies at court managed to damage him in the estimation of the king, and forced him, by their calumnies, to fly the kingdom. He retired to Bagdad, where his great reputation, which had preceded him there, obtained for him the protection of the caliph. After several years' exile, Ferdousi was recalled to his country, and passed there the remainder of his days. The "Châh Nâmeh" was published in London, in Persian, in 1829, and was afterwards translated into English, in 1831. It has also been translated into French. B. at Rizvan, near Thous, about 940; D. about 1020.

FÈRE, LA, *fair*, a fortified town of France, in the department of Aisne, on an island in the Oise, 14 miles from Laon. It has an arsenal and a school of artillery. *Manf.* Chemicals and woollen goods. *Pop.* 4,500.—This town was taken by the Spaniards in 1530, and by the Prussians in 1814.

FÈRE CHAMPENOISE, LA, *shamp'-nwarse*, a town of France, in the department of the Marne, 20 miles from Epernay. *Pop.* 2,300.—In 1814 the French were here defeated by the allies.

FERETHIUS, *fe-re'-tre-us*, a surname of Jupiter, from *ferendo*, because he had assisted the Romans, or from *feriendo*, because he had conquered their enemies under Romulus. He had a temple at Rome, built by Romulus. It was there that the spoils called *opima* were always carried.

FERGUS, *fer'-gus*, a river of Ireland, running through the county of Clare, and, after a course of 30 miles, entering the Shannon by a wide estuary, 10 miles from Ennis.

FERGUS, ST., a maritime parish of Scotland, situate in Aberdeenshire, with a village 5 miles from Peterhead. *Area*, 12 square miles. *Pop.* 1,600.

FERGUS I., king of Scotland, was the son of Fergus, king of the Irish Scots, and was invited to Scotland to repel the Picts, and for this was chosen king. Drowned in his passage to Ireland, about 404.

FERGUSON, Adam, LL.D., *fer'-gus-on*, was the son of the Rev. Adam Ferguson, minister of Logie Rait, Perthshire, and was educated at the University of St. Andrew, where he greatly distinguished himself. In 1744, he entered the 42nd regiment as chaplain, the duties of which office he discharged till 1757, when he became tutor in the family of Lord Bute. In 1759 he was chosen professor of natural philosophy in the University of Edinburgh, and in 1764 professor of moral philosophy. From 1773 to 1775, he travelled on the continent with the earl of Chesterfield, and in 1778 received the appointment of secretary to the commissioners sent to America to endeavour to effect an amicable compromise with the Congress representing the different States. In 1785 he resigned his professorship of moral philosophy in favour of Dugald Stewart. Subsequently he retired to St. Andrew's, where he passed the remainder of his days. B. at Logie Rait, 1724; D. 1816.—His works are, "An Essay on the History of Civil Society;" "Institutes of Moral Philosophy;" and the "History of the Progress and Termination of the Roman Republic." This last is a work of great merit.

FERGUSON, Robert, an English nonconformist, who was ejected, in 1662, from the living of Godmersham, in Kent, and afterwards distinguished himself by his political intrigues. He joined the duke of Monmouth, whom he is supposed to have betrayed, but was never long attached to any party. D. 1714.—He wrote the "Interest of Reason in Religion," 8vo; a "Discourse concerning Justification," &c.

FERGUSON, James, a Scotch philosopher and astronomer, whose father was a day-labourer, and who was enabled to send him to school only for three months at a small village in the north of Scotland. When about nine years of age, he was placed out as a servant to a farmer, who employed him as a shepherd; in which situation he acquired a surprising knowledge of the stars. His abilities being discovered by some neighbouring gentlemen, one of them took him to his house, where he learned decimal arithmetic and the rudiments of algebra and geometry. From a description of the globes in Gordon's grammar, he made, in three weeks, one of these instruments, sufficiently accurate to enable him to work problems. He afterwards made a wooden clock and a watch, which induced the country gentry to employ him in repairing and cleaning their clocks; and, having a taste for drawing, he earned something by designing patterns for ladies' work. He next began to paint portraits with Indian ink, by which he supported himself creditably some years. In 1743 he went to London, where he continued to draw portraits, and published some astronomical tables and calculations. He also gave lectures in experimental philosophy, which he repeated with success throughout the king-

dom. In 1754 he published a brief description of the solar system, with an astronomical account of the year of the crucifixion of Christ, 8vo; also an "Idea of the Material Universe, deduced from a Survey of the Solar System." His greatest work, however, is his "Astronomy explained upon Sir Isaac Newton's Principles, and made easy to those who have not studied Mathematics." It first appeared in 1756, 4to, and has frequently been reprinted. On the accession of George III., to whom he had read lectures, Mr. Ferguson obtained a pension of £50 a year. In 1763 he was elected a fellow of the Royal Society, without paying the admission-fee, or the annual subscriptions; the same year appeared his "Astronomical Tables and Precepts," 8vo. In 1767 he published "Tables and Tracts relative to several Arts and Sciences," 8vo. Besides these, he published "Select Mechanical Exercises;" the "Young Gentleman and Lady's Astronomy;" an "Easy Introduction to Astronomy;" an "Introduction to Electricity;" the "Art of Drawing in Perspective made easy;" and several tracts and papers in the Philosophical Transactions. B. near Keith, Banffshire, 1710; D. 1776.—Under the title of the "Peasant-Boy Philosopher," Mr. Henry Mayhew has most delightfully described this youth's marvellous pursuit of knowledge under real difficulties.

Ferguson, William, a Scotch artist, distinguished as a painter of dead game and still life. D. 1690.

Ferguson, Robert, a Scotch poet, who was educated for the ministry; but habits of dissipation disqualified him for that profession, and he obtained a place in the sheriff clerk's office at Edinburgh. He contributed to the pages of Ruddiman's Weekly Magazine, and was greatly admired by Burns, whose own genius was stimulated to poetical composition by the perusal of his effusions. B. at Edinburgh, 1750; D. insane, in the lunatic asylum of that city, 1774.—The poems of Ferguson consist of pastoral, humorous, and lyrical effusions; but his genius is greatly inferior to that of Burns, who often bewails his unhappy end, both in his prose and poetical pieces.

Fergusson, James, a Scotch author and architect, was designed for a mercantile life, but, after passing a couple of years in a counting-house in Holland, and a like period in another in London, he went, in 1829, to India. Here he resided for ten years, during which period, as managing partner in a large firm in Calcutta, he amassed a fortune sufficiently large to enable him to return to England, where he began to devote himself to literary and scientific pursuits. His work entitled "Ancient Topography of Jerusalem," appeared in 1847; but it had been preceded by the "Ancient Architecture of Hindostan." Both were illustrated. These works were considered as exquisite specimens of artistic skill, "enhanced in value by the faithfulness with which every scene and place was recorded." In 1848 they were succeeded by an "Historical Inquiry into the True Principles of Beauty in Art, more especially with reference to Architecture," a work highly extolled at the time of its appearance. In 1851 he produced "The Palaces of Nineveh and Persepolis restored," which contains many things of general interest, relating to one of the most wonderful discoveries ever made in the history of the world. The principles of this work are illustrated in the Assyrian Court at the Crystal Palace, which was planned and produced under the superintendence of Mr. Fergusson. In 1851 he illustrated, by a model, a new system of fortification, and subsequently issued "The Peril of Portsmouth; or, French Fleets and English Forts," which was designed to subvert the approved systems of military engineers. A sequel to this work appeared, with notes on Sebastopol, which showed that the subject was well understood by its author. After this, Mr. Fergusson became general superintendent of the Crystal Palace at Sydenham. B. at Ayr, Scotland, 1808.

Ferie Latinæ, *fer'-i-e lă-tī'-ne*, festivals at Rome, instituted by Tarquin the Proud. The *feriæ* among the Romans were certain days set apart to celebrate festivals, and during that time it was unlawful for any person to work. They were either public or private. The public were of four different kinds, and were called *stativæ*, or immovable; *conceptivæ*, or movable; *latinæ*, *compitalia*, *imperativæ*, appointed only by the consul, dictator, &c.; *nundinæ* and *privatæ*. The days on which the *feriæ* were observed were called by the Romans *festi dies*, because dedicated to mirth, relaxation, and festivity.

Fermanagh, *fer'-ma-na*, an inland county of Ireland, bounded N. by the counties of Tyrone and Donegal, E. by the former and the county of Monaghan, and S. by the counties of Cavan, Connaught, and Leitrim. *Area*, 714 square miles. *Desc.* Diversified with hill and dale, presenting wild uplands and beautifully rich vales. A large portion of the surface may be termed mountainous, and it is generally bare of wood. *Rivers.* The principal is the Erne, which falls into a lake of the same name. This lake is denominated the Upper and Lower, and, with the river, divides the county nearly into equal portions. The Upper lake is 9 miles long, and from 1½ to 5 in breadth; the Lower 10 miles long, and from 2 to 8 wide. *Pro.* Oats, wheat, barley, flax, and potatoes. Agriculture, however, is generally backward, except in the N. The chief occupation of the inhabitants consists in rearing black cattle, and in the manufacturing of linen. *Pop.* 120,000.

Fermat, Peter de, *fair'-ma*, a distinguished mathematician, poet, and civilian, who wrote poetry in the Latin, French, and Spanish languages. He was universally respected for his talents, and became a counsellor in the parliament of Toulouse. His prose works were collected and published under the title of "Opera Varia Mathematica," in 1670, and also in 1679. B. at Toulouse, about 1595; D. 1664.

Fermo, *fair'-mo*, a delegation of the Papal States, bounded on the N. and N.W. by Macerata, W. by Camerino, S. by Ascoli, and E. by the Adriatic. *Ext.* 27 miles long and 18 broad. *Area*, 370 square miles. *Desc.* Fertile, and covered with branches of the Apennines. *Rivers.* The Chienti, Tenna, and Aso, all flowing into the Adriatic. *Pro.* Maize and corn. Large numbers of cattle are raised, and much attention given to the culture of silkworms and bees. *Pop.* estimated at 90,000.

Fermo, a seaport of the Ecclesiastical States, on the Gulf of Venice, 35 miles from Ancona. Its chief buildings are a palace, built by Jerome Bonaparte, a cathedral, several churches, convents, and a university. It has a small trade, and exports grain, silk, and woollen cloths. *Pop.* 15,000.

Fermoselle, *fair-mo-sail'-yai*, a frontier town of Spain, 26 miles from Zamora. *Manf.* Cloths. *Pop.* 3,500.

Fermoy, *fer-moi'*, a town of Ireland, in the county of Cork, on the Blackwater, which is crossed by a bridge of thirteen arches, 20 miles from Cork. Fermoy was an insignificant village, when, in 1791, a new town was projected, which has advanced rapidly. It has now a barracks, court-house, bridewell, hospital, a handsome church, and classical school. Its trade principally consists of rural produce. *Pop.* 10,000.

Fern, Fanny, *fern*. Under this *nom de plume*, an American lady has written some sketches of domestic life called "Fern Leaves," which in the United States and Great Britain have attained some degree of success. She is a sister of N. P. Willis, known also as an author of some celebrity, and was originally married, in 1837, to Dr. Eldredge, who died in 1846. She subsequently married Mr. Farrington, from whom, however, she afterwards separated. Besides "Fern Leaves," she wrote a tale, called "Ruth Hall," and "Rose Clark." B. at Portland, Maine, 1811.

Fern Islands. (*See* Farn Islands.)

Fernandez, Juan, *fair-nan'-daiz*, a Spanish navigator, who, in 1572, discovered the island which bears his name. (*See* Juan Fernandez.)

Fernandez, Navarette, surnamed El Mudo, or the Dumb, was one of the most distinguished of the pupils of Titian, and became painter to Philip II. of Spain, who employed him mostly in adorning the Escurial. His principal works are a "Martyrdom of St. James," a "Nativity of Christ," "St. Jerome in the Desert," and "Abraham with the Three Angels." This last is esteemed his greatest work. He painted with great ease, and, on account of his colouring, was named the Spanish Titian. B. at Logrono, on the Ebro, 1526; D. at Segovia, 1579.

FERNANDEZ. (*See* JUAN FERNANDEZ.)

FERNANDO DE NORONHA, *fair-nan'-do dai no-rone'-a*, an island in the South Atlantic Ocean, belonging to the empire of Brazil. *Ext.* 8 miles long, by about 2 miles broad. *Desc.* Mountainous, rugged, and covered with wood. *Pop.* Unascertained. *Lat.* 3° 50′ 4″ S. *Lon.* 32° 25′ 5″ W.—No females are permitted to land on this island, which has long served as a place of banishment from Brazil.

FERNANDO PO, *fer-nän'-do po*, an island of Africa, near the coast of Benin. *Ext.* 45 miles long, with an average breadth of from 5 to 15. *Desc.* Mountainous in the interior, and presenting a rich and varied aspect of beauty and fertility. A large portion of its surface is covered with dense forests of valuable timber, whilst the land gradually rises from the steep and rocky coasts, into two peaks, attaining an elevation of upwards of 10,000 feet above the level of the sea. The streams and brooks are numerous and clear, and the sugar-cane grows wild in abundance. Yams are also abundant, and furnish the natives with a principal article of food. The animals are monkeys, squirrels, antelopes, a kind of porcupine, land crabs, and snakes, the latter in great numbers and very large. Birds are numerous and of beautiful plumage, and fish, at some seasons, are plentiful. The climate, however, is unhealthy. *Pop.* 14,000 negroes. *Lat.* between 3° 10′ and 3° 44′ N. *Lon.* between 8° 22′ and 8° 54′ E.—This island was discovered in 1471, by the Portuguese, who, in 1778 ceded it to Spain. It is now in the hands of the British.

FERNANDO, SAN. (*See* SAN FERNANDO.)

FERNEL, John Francis, *fair'-nel*, physician to Henry II. of France, published a number of works on medical subjects, which have been frequently reprinted. B. at Mont Didier, in Picardy, 1506; D. 1558.

FERNEY, or FERNEX, *fair'-ne*, a village of France, on the frontier of Switzerland, at the foot of the Jura Mountains, 5 miles from Geneva. *Pop.* 1,500.—Here Voltaire took up his residence in 1759, and established a manufactory of watches. He lived at this place till near the close of his career, and the house in which he resided is still shown to the passing stranger.

FEROE ISLANDS. (*See* FARO ISLANDS.)

FERONIA, *fe-ro'-ne-a*, a goddess at Rome, who presided over the woods and groves. It was usual to make a yearly sacrifice to her, and it is said that those who were filled with the spirit of this goddess, could walk barefooted over burning coals without receiving any injury.—Also a town at the foot of Mount Soracte.

FEROZABAD, *fe-ro-za-bad'*, a town of British India, in the presidency of Bengal, 24 miles from Agra. *Pop.* about 12,000.—There is another town of the same name in the Nizam's dominions, 112 miles from Hyderabad.

FERRARA, *fair-rar'-a*, a city of Italy, and the capital of the most N. legation of the Pontifical States, situate in a marshy plain near a branch of the Po, 25 miles from Bologna. The streets are long, wide, and straight; the principal square is the Piazza Nuova; and there are several good edifices in different parts of the town. The theatre is one of the best in Italy. Of private buildings, the principal are the mansions of Este, Villa, and Bevilacqua. The churches and convents are very numerous; the cathedral is an ancient fabric in the form of a Greek cross; and there are several academies, museums, and a public library with 80,000 volumes and nearly 1,000 MSS. Here Ariosto lies buried in a Benedictine convent, and Tasso was confined as an idiot in the hospital of St. Anna. Byron, in his prelusory notice to his "Lament of Tasso," says, "At Ferrara, in the library, are preserved the original MSS. of Tasso's 'Gierusalemme,' and of Guarini's 'Pastor Fido,' with letters of Tasso, one from Titian to Ariosto, and the inkstand and chair, the tomb and house of the latter. But as misfortune has a greater interest for posterity, and little or none for the contemporary, the cell where Tasso was confined in the hospital of St. Anna, attracts a more fixed attention than the residence or monument of Ariosto—at least it had this effect on me. There are two inscriptions, one on the outer gate, the second over the cell itself, inviting, unnecessarily, the wonder and the indignation of the spectator. Ferrara is much decayed and depopulated. The castle still exists entire; and I saw the court where Parisina and Hugo were beheaded, according to the annal of Gibbon." *Pop.* about 35,000, of whom a third are Jews.—Ferrara was, under the line of Este, the capital of a sovereign duchy, with a population estimated at 80,000. It afforded an asylum to Calvin, Marot, and other reformers. Founded in the 5th century, by the inhabitants of Aquileia, which had just been destroyed by the Huns, it was at first a place of little importance. After having been subject to the emperors of the West, the Heruli and the Ostrogoths, and to the Byzantine emperors, it fell, in the 8th century, into the hands of the Lombards, and was subsequently included in the gift which Pepin made to Pope Stephen II. Under the papal rule, Ferrara became a seignory of the Church, and comprised within itself nearly the extent of the whole Legation. After passing through various hands, it came, in 1208, into the possession of the house of Este, the princes of which made it their residence, and the capital of their states. From that period the importance of the place may be dated, and it soon became one of the principal seats of learning in Italy. Re-established in their states in 1317, by the pope, the Venetians for a time having seized them, the lords of Ferrara acknowledged themselves vassals of the Vatican. In 1471 the lordship of Ferrara was erected into a duchy, and after that time till 1597 it remained, with a few interruptions, in spite of the efforts of Pope Julian II., in the possession of the Este family. The ducal line now being extinct, Clement VIII., as suzerain, took possession. In 1796 the French entered the place, and made it the capital of a department. In 1814 the Church again recovered it, but the Austrians had the right to maintain here a garrison.

FERREIRA, Antonio, *fair'-rai-eer-a*, a Portuguese poet, who held the office of judge, and wrote, with considerable success, elegies, odes, comedy, tragedy, and also epics. His best piece is "Inez de Castro," one of the first complete tragedies of modern times. His works were collected at Lisbon, 1598, and his comedies were reprinted in 1621. He was, in his time, the chief of the classical school, and seems to have deserved his title of the Portuguese "Horace." B. at Lisbon, 1528; D. 1569.

FERRERAS, Don John de, *fair-rair'-ass*, a learned Spanish divine, who was a member of the Spanish Academy at its commencement, and contributed largely to the dictionary produced by that body. He also wrote a "History of Spain," 10 vols. 4to, and other works, highly esteemed for their minuteness and accuracy. B. at Labaneza, 1652; D. 1735.—As an historian of Spain, this writer is much more to be depended on than Mariana, whose pages, however, are more elegant and fascinating.

FERRET COL, *fer'-rai*, a pass over the Pennine Alps, between Orsières, in Switzerland, and Cormayeur, in Piedmont. *Height*, 7,640 feet above the level of the sea.

FERRIER, Miss, *fer'-ri-er*, was the daughter of a writer to the signet in Edinburgh, who held an appointment in the Court of Session as the colleague of Sir Walter Scott. Her early introduction to the best literary society of Edinburgh gave a bias to her tastes, and she became the authoress of three excellent novels, entitled the "Marriage," the "Inheritance," and "Destiny, or the Chief's Daughter." B. at Edinburgh, 1782; D. 1854.—At the conclusion of the "Legend of Montrose," Sir Walter Scott thus compliments the abilities of this lady:—"I retire from the field, conscious that there remains behind, not only a large harvest, but labourers capable of gathering it in. More than one writer has already displayed talents of this description; and if the present author, himself a phantom, may be permitted to distinguish a brother, or, perhaps, a sister shadow, he would mention, in particular, the author of the very lively work entitled 'Marriage.'"—Miss Ferrier was a frequent guest at Abbotsford, and helped to cheer the melancholy hours which clouded the last moments of the life of the great novelist.

FERRIÈRE, *fer-re-air'*, the name of several villages and parishes in France, none of them with a population above 3,500.

FERRINTOSH, *fer-rin'-tosh*, a village and barony of Scotland, formerly in Ross-shire, but now forming a

part of Nairnshire. It was formerly famous for its whiskey, manufactured free of duty; a privilege withdrawn from it by the government in 1785.

FERRO, or HIERO, *fair'-ro*, the most westerly and smallest of the Canary Islands. *Area*, 100 square miles. *Desc.* Not very fertile; but the inhabitants raise corn, sugar, fruits, and legumes, and feed a great number of cattle. *Pop.* about 5,000. *Lat.* of W. extremity, 27° 42′ 5″ N. *Lon.* 18° 9′ 7″ W., Greenwich.—The western extremity of Ferro was heretofore, by common consent, accounted the place of the first meridian; but national partialities induced the moderns generally to adopt the capital of their own particular countries as the place from which to reckon the longitude.

FERROL, *fair'-role*, an important seaport of Spain, situate on the N. coast of Galicia, at the influx of the river Juvia into the extensive inlet called the Bay of Corunna, 12 miles from Corunna. The town is of comparatively recent erection. It was only in 1752 that it was determined to establish here dock-yards, arsenals, and manufactories. The harbour, for depth, capacity, and safety, is not equalled by many in Europe, and is entered by a strait, and defended by the castles San Felipe and Palma. The basin in which the ships are laid up is of great extent and solid workmanship. The marine barracks is a vast and beautiful building, affording accommodation for 6,000 men. The establishments are all naval, and there is an academy for the Guardas Marinas, a mathematical school for marine artillerists, and a nautical as well as a pilot school. *Manf.* Hats, leather, paper, hardware, and naval stores. *Exp.* Brandy, vinegar, fish, and corn. *Imp.* Manufactured goods and salted meats. *Pop.* 17,000. *Lat.* 43° 29′ 30″ N. *Lon.* 8° 13′ W.—In 1799 this place was unsuccessfully attacked by the English.

FERRYBRIDGE, *fer'-re-bridj*, a town of England, in the W. Riding of Yorkshire, 2 miles from Pontefract.

FERRYDEN, *fer'-re-den*, a village of Scotland, on the South Esk, 1 mile from Montrose, inhabited mostly by fishermen. *Pop.* 930.

FERRY PORT ON CRAIG, a village and parish of Scotland, at the mouth of the river Tay, 12 miles from Cupar. It is a ferry-station of the Edinburgh, Perth, and Dundee Railway. *Pop.* 2,360, mostly engaged in the manufacture of linen and the salmon-fishery. One of the Tay lighthouses is here, in *lat.* 56° 29′ N.; *lon.* 2° 49′ W.

FERTÉ BERNARD, LA, *fair'-tai bair'-nar*, a town of France, in the department of the Sarthe. *Manf.* Linen fabrics and cotton yarns. *Pop.* 2,700.—LA FERTÉ is an old term, which signifies a feudal fortress, and is embraced in the names of many towns, &c. of France. The largest of them, however, has not a population above 6,000.

FESA, *fai'-sa*, a town of Persia, in the province of Fars, 80 miles from Shiraz. *Manf.* Silken, cotton, and woollen fabrics; with a trade in tobacco. *Pop.* 18,000.

FESCENNIA, *fes-sen'-e-a*, a town of Etruria, where the Fescennine verses were first invented. These verses were a sort of rustic dialogue spoken extempore, in which the actors exposed, before their audience, the failings and vices of their adversaries, and, by a satirical humour and merriment, endeavoured to raise laughter and ridicule. They were proscribed by Augustus as of immoral tendency.

FESCH, Cardinal Joseph, *fesk*, a distinguished Corsican, and the half-brother of Letitia Ramolini, the mother of Napoleon I. After suffering considerable privations in the revolutionary period of France, he suddenly found his fortunes changed by the elevation of his nephew to the command of the Army of Italy. He became one of its commissioners, or factors; but, in 1802, was appointed archbishop of Lyons. In the following year, he was sent ambassador to the Holy See; and, from the court which he paid to the pope, he received a cardinal's hat, and the consent of that dignitary to visit Paris to crown Napoleon. After the coronation, he, in 1805, became grand aumonier, and received the grand cordon of the Legion of Honour. In 1809 he rejected the archbishopric of Paris, on account of the severity with which the pope was treated by the emperor; and, in 1810, actually openly rebuked Napoleon before the council of Paris. For this he was driven into exile, and took refuge in Rome, where he passed the remainder of his days. B. at Ajaccio, 1763; D. at Rome, 1839.

FESTUS, Porcius, *fes'-tus*, pro-consul and governor of Judæa, before whom St. Paul was accused by the Jews; but, the apostle appealing to the emperor, Festus sent him to Rome.—Also, a celebrated Latin grammarian, whose age is not accurately ascertained; but he is believed to have lived in the 3rd century. He compiled some voluminous works on his favourite science, and is classed by Scaliger amongst the best or most useful etymologists for understanding the language of ancient Rome. Lived in the 1st century A.D.

FETISHISM, *fe'-tish-ism*, 'the adoration of *fetishes*,' a gross idolatry, and so called from the word *fetisso*, 'a thing charmed or bewitched,' a name given by the Portuguese to the idols and charms, and other objects of worship, of the African negroes. This idolatry obtains amongst the savage aborigines of the Australian continent, and the less barbarous tribes of central Asia and Africa, as well as those of South America. Their fetishes are constituted of the elements, especially fire, and of trees, streams, and those invisible beings, those benevolent or malevolent genii, the offspring of fear and superstition. Human sacrifices and other atrocious deeds accompany, for the most part, these wretched beliefs.

FETTERESSO, *fet'-te-res'-so*, a parish of Scotland, on the North Sea, in Kincardineshire, 2 miles from Stonehaven. It includes a part of Stonehaven. *Pop.* about 6,000.

FEURBACH, Paul John Anselm, *foir'-bak*, an eminent German writer on criminal law, who became successively professor at the universities of Giessen, Jena, Kiel, and Landshuth. Although he wrote a number of able papers on criminal jurisprudence, his fame did not become established till he produced his "Review of the Fundamental Principles and Ideas of Penal Law." This work, in conjunction with another which appeared shortly afterwards, exercised a great influence on German criminal legislation, and placed Feurbach in an eminent position in the eyes of his countrymen. In 1808 he became a privy councillor in Bavaria; in 1817 second president of the court of appeal at Bamberg; and in 1821 first president of appeal at Anspach. To these offices his sphere of action was entirely confined throughout the rest of his life. B. at Frankfort-on-the-Maine, 1775; D. there, 1833.

FEVEDA, *fai-vai'-da*, an island of N. America, in the Gulf of Georgia, Oregon territory, between Vancouver's Island and the mainland. *Ext.* 32 miles long, with an average breadth of 2. *Lat.* 49° 41′ N. *Lon.* 124° W.

FEVERSHAM. (*See* FAVERSHAM.)

FÈVRE, Tannegui le, or Tanaquil Faber, *faivr*, a learned critic, pensioned by Richelieu, at 2,000 livres, to inspect the books printed at the Louvre; but on the death of the cardinal, his salary was stopped. He then removed to Saumur, where he embraced the reformed religion, and obtained the classical professorship. B. at Caen, 1615; D. 1672.—He was the father of the celebrated Madame Dacier, and published several comments on Greek and Latin authors; two volumes of Letters; "Lives of the Greek Poets," in French; "Greek and Latin Poems;" a "Method of Education."—There are several other French writers of this name.

FEZ, *fez*, a city of Morocco, Africa, situate about 85 miles to the S. of the Mediterranean. It was built in 793, by a prince of the name of Edris, and soon became the chief city of all the western Mahometan states, distinguished both as a school of learning and as a resort of religion. It is situate in the hollow part of a valley, and the gardens, orchards, and orange-groves seen around it, form a most delightful amphitheatre. On a height above the rest of the city, stands New Fez, founded in the 13th century, and forming a well-built town, surrounded by beautiful gardens, and, by its situation, commanding the old. It is chiefly inhabited by Jews. The finest edifice is the mosque of Caroubin, built during the most flourishing period of Fez, with 300 pillars, and numerous fountains. It has also a tower containing globes and astronomical instruments. The city contains many caravansaries,

or inns, called fondaques, which are tolerably convenient. They are two or three stories high, with galleries towards the court, which is always in the centre, and by which light is admitted into the apartments. The principal houses have cisterns under them; they have also flat and terraced roofs, elegantly constructed, on which carpets are spread for their inhabitants to enjoy the coolness of evening. All the magnificence is in the interior. The hospitals, once numerous, have now in a great measure fallen to decay. The shops make no handsome appearance, and should rather be called stalls; there being just room for a sedentary Moor, who never stirs, but has his baskets heaped around him. The markets are much crowded, being the resort of all the wandering Arabs, who here purchase their foreign and manufactured articles. *Manf.* Morocco leather, carpets, silks, woollens, jewellery, earthenware, and saddlery. *Pop.* estimated at 80,000, but is not now supposed to contain more than 40,000. *Lat.* 34° 6′ 3″ N. *Lon.* 5° 1′ 10″ W.

FEZZAN, *fez'-zan*, a kingdom of North Africa, situate to the south of Barbary, and bounded on the N. by Tripoli, and on all its other sides by the Sahara, or Great Desert. *Desc.* Fezzan consists of an extensive valley, bounded by an irregular circuit of mountains on all sides except the west, where it opens into the desert. One of the ranges of these mountains is called the Black Mountains, and is composed of basalt, nearly black, and of a shining or polished appearance. *Rivers.* None, properly so called; water, however, is plentifully found at a depth of from 10 to 12 feet. There are a few small lakes, which are sometimes covered with a thin crust of carbonate of soda. *Zoology.* The most common wild animals are the ostrich, the antelope, and a beautiful species of deer, of a white colour, streaked with different hues of brownish red. The domestic animals are goats, horned cattle, horses, and camels. *Climate.* The heat of summer is very great, and the south wind, intensely dry and impregnated with fiery particles, is scarcely supportable, even by the natives. The winter, on the other hand, is cold; which is painfully felt, even by the natives of a northern climate. *Pro.* Wheat is raised; but maize and barley are the grain on which the country chiefly depends for subsistence. Dates are abundantly produced, and form a large portion of the food of the inhabitants; figs, pomegranates, and legumes are also abundant. *Manf.* None, and shoemakers and smiths are the only artisans. Fezzan derives its chief importance from that favourable situation which renders it a grand depôt for the immense interior commerce which is carried on between Northern and Central Africa. The communication of Egypt and of Barbary with the vast countries situate to the east and south of the Niger, centres almost entirely in Mourzook. Of the caravans to the south, the principal is that to Bornou, with which Fezzan maintains a regular and extensive communication. Another grand caravan goes directly southward into Cassina. The arrival of the great caravans forms a sort of jubilee in the cities of Fezzan. The goods sent thence southward, consist of various European articles, fire-arms, powder, sabres, knives, glass, paper, beads, imitations of coral, and toys of a great variety of kinds; also tobacco and snuff. *Gov.* The sovereign of Fezzan pays a fixed tribute to Tripoli, but is, in other respects, entirely independent, and rules his dominions with absolute sway. The throne is hereditary in the eldest prince of the royal family, whether he be son or nephew. *Pop.* variously estimated at from 80,000 to 150,000. *Lat.* between 23° 30′ and 30° 50′ N. *Lon.* between 12° and 19° E.

FICHTE, Johann Gottlieb, *feesht-e(r)*, a learned German, who, in 1793, became professor of philosophy at Jena, and thence promulgated his system, known as the "Doctrine of Science." Shortly afterwards, a suspicion of irreligious tendencies fell upon him, when he retired to Prussia, and, after living some time in Berlin, received the appointment of professor of philosophy at Erlangen. Here he continued for some time highly esteemed, but in 1814 he visited Berlin, where, in the military hospital of that city, his wife caught a fever, and communicated it to him. She recovered, but he died, in 1814. B. in Upper Lusatia, 1762.

FICINUS, Marsilius, *fi-si'-nus*, a learned Italian, whose father was physician to Cosmo de' Medici, by whom Marsilius was greatly esteemed, on account of his attachment to the doctrines of Plato. Under the patronage of Cosmo he made rapid progress in all kinds of learning, and was chosen first president of an academy founded by him at Florence. After this, he published a complete version of Plato's works in the Latin language, and translated Plotinus, Iamblichus, Proclus, and other Platonists. Lorenzo the Magnificent was also a liberal patron of Ficinus, and thus Platonism revived with great splendour in Italy. At the age of forty-two he entered into orders, and obtained some considerable preferment through the means of the high patronage with which he had been honoured. B. at Florence, 1433; D. 1499.—His works were collected and printed together in two vols. folio.

FIDES, *fi'-dees*, the goddess of faith and honesty, worshipped by the Romans. Numa was the first who paid her divine honours.

FIDIUS DIUS, *fid'-e-us di'-us*, a divinity by whom the Romans generally swore.

FIDJI, or FIJI ISLANDS. (*See* FEEJEE.)

FIELD, Nathaniel, *feeld*, a dramatic author, who is supposed to have been a member of Shakespeare's company, and to have been one of the players of the Globe and Blackfriars theatres. He wrote "A Woman 's a Weathercock," "Amends for Ladies," and, in conjunction with Massinger, "The Fatal Dowry." Lived between the reigns of James I. and Charles I.

FIELD-DALLING, *feeld dăl'-ling*, a parish of Norfolk, 5 miles from New Walsingham. *Pop.* 500.

FIELDING, Henry, *feel'-ding*, a celebrated English author, son of Lieutenant-General Fielding, and great-grandson of William, third earl of Denbigh. After receiving the rudiments of his education at home, he went to Eton, whence he was sent to Leyden, where, for two years, he devoted himself to the investigation of civil law, and then returned to England. The narrowness of his father's circumstances, and the largeness of his family, prevented him from providing in a suitable manner for his son, who, in his twenty-first year, went to London, and began writing for the stage. His first piece was entitled "Love in several Masques," and met with a favourable reception; as did his next performance, called "The Temple Beau." Some of his future dramatic efforts, however, were not so successful, and he had the courage to prefix to one of them, "As it was *damned* at the theatre royal, Drury-lane." A long list of his plays are now, by the generality of readers, entirely unknown. In 1734 he was fortunate enough to marry Miss Charlotte Cradock, a lady of some wealth, and, by the death of his mother, came into the possession of 200*l.* a year. His extravagances, however, were such, that, at the age of thirty, he had reduced himself to his former condition; on which he entered the Temple, and studied the law with considerable ardour, still exercising his pen for immediate support, as assistant editor of a periodical paper called "The Champion," and by occasional contributions of a poetical kind. About this time he produced the "History of Jonathan Wild," a notorious character, whose story Fielding wrought up into an entertaining romance. This has been pronounced, perhaps, the most ingeniously-arranged description of a tissue of blackguardisms which has ever been given to the world. In 1742 appeared his "Joseph Andrews," a novel full of humour and admirable delineations of human nature. During the rebellion of 1745 he published some patriotic pieces, for which he was made a Middlesex justice, in which situation he gained considerable reputation, by his "Inquiry into the Causes of the late Increase of Robberies," and his "Proposal for the Maintenance of the Poor." In 1749 he published his principal work, the novel of "Tom Jones," which exhibits a great knowledge of life, and is equally rich in comic delineation and pathetic expression. His "Amelia" followed in 1751, and is more correct in sentiment, though deficient in humour and variety. For this novel he received 1,000*l.* A complication of complaints had now produced a dropsy, and after undergoing the operation of tapping, he went with his family to Lisbon, where he ended his days. B. at Sharpham, Somersetshire, 1707; D. at Lisbon, 1754.

His works have been printed uniformly in 12 vols. 8vo, with his life prefixed by Mr. Murphy.—That Fielding had a great genius as a writer, is unquestionable; and when we consider the comparative brevity of his life, and the difficulties under which he almost invariably wrote, we are amazed at the number and general excellence of his productions. He wrote twenty-four dramatic pieces; and although his talents were not of a decidedly theatrical cast, still it was something to escape general disapprobation, though he was, at times, received with indifference. Of his three great works,—"Joseph Andrews," "Amelia," and "Tom Jones," upon which his reputation rests, it must be confessed that, however they may occasionally err in their morality, they are extremely happy representations of those features of human nature which must always interest, simply because they are immediately recognized as genuine, by every mind that has been brought into contact with the various elements at work in society at large. "Joseph Andrews," Fielding tells us himself, was written as an imitation of the style and manner of Cervantes, and it cannot be denied that he has well succeeded in copying the humour, the gravity, and the fine ridicule of his master. His "Amelia" is also an admirable production. "It is, perhaps, the only book," says Dr. Johnson, "of which, being printed off betimes one morning, a new edition was called for before night." The same stern moralist read the book through without stopping; and further adds, that "Fielding's 'Amelia' is the most pleasing heroine of all the romances." "Tom Jones" is considered as the greatest work of Fielding, yet it has not escaped severe censure. "Sir," said Johnson, "there is more knowledge of the heart in one letter of Richardson's, than in all 'Tom Jones,'"—an opinion, however, in which few will concur. There is no novel with which we are acquainted, so skilfully conducted in its fable, and evincing so much art in the development of the plot. In composition, also, Fielding is a great master. Indeed, "taking him for all in all," we believe it is the general opinion that he is what Byron calls him,

"The prose Homer of human nature."

FIELDING, Sarah, was the third sister of the above great novelist, and accounted a woman of considerable learning. She wrote the novels of "David Simple" and "The Cry;" and translated "Xenophon's Memoirs of Socrates" into English; "The Lives of Cleopatra and Octavia;" "The History of the Countess of Delwin;" "The History of Ophelia;" and several other works. She lived and died unmarried at Bath. B. 1714; D. 1768.

FIELDING, Sir John, the half-brother of Henry, the novelist, and his successor as a justice for Middlesex, was blind from his childhood, yet discharged his office with great credit, and in 1761 received the honour of knighthood. D. 1780.—He laboured to reform the vicious, and published some tracts on police; a "Charge to the Grand Jury of Westminster," &c.

FIELDING, Copley Vandyke, an English painter, belonged to a family of artists, and first exhibited his pictures in 1810, at the Artists' Exhibition in Spring Gardens. He early became a teacher of his art, and from his great success in this vocation, secured a wide circle of friends and patrons. It is as a water-colour painter that he is best known and most admired; and there are few, if any, who have risen to the same height of popularity in representing English scenery, under the same or similar aspects in which he delighted to exhibit it. His path was one of unvarying prosperity, and, for many years, he held the office of president of the Society of Painters in Water-Colours. His subjects are generally chalky downs, stretching far away, until they are lost in the softened haze of distance. He has also represented both Scotch and Welsh mountain scenery, under peculiar atmospheric effects, and usually with the most striking success. He had great mechanical dexterity in the use of his pencil, notwithstanding which, he had frequently recourse to both the sponge and the cloth to produce appearances, which were not entirely free from a charge of a kind of ingenious trickery. B. 1787; D. at Worthing, Sussex, 1855.

FIENNES, William, Lord Say and Sele, *fe'-en*, was educated at New College, Oxford, and in 1624 was made a viscount. In the Rebellion he sided with the parliament, and became "very active" with Hampden and Pym, for which he was declared an outlaw by the king, after whose execution he retired to the Isle of Lundy, on the coast of Devon, where he continued till Cromwell's death. At the Restoration he was made privy seal and chamberlain of the household. B. in Oxfordshire, 1582; D. 1662.—His lordship wrote some pamphlets against the Quakers. Clarendon pronounces him "a man of a close and reserved nature, of great parts, and the highest ambition."

FIENNES, Nathaniel, second son of Lord Say and Sele, was also educated at New College, Oxford, after which he went to Geneva. On his return he was intrusted with the government of Bristol, but surrendered it to Prince Rupert, for which he was condemned to death by a council of war. His father's interest, however, saved his life. Cromwell, with whom he was in great favour, made him one of his lords. He was a distinguished leader of the independent party, and printed some speeches and pamphlets. B. 1608; D. 1669.—Lord Clarendon says of this person, "If he had not encumbered himself with command in the army, to which men thought his nature not so well disposed, he had been second to none in those councils after Mr. Hampden's death."

FIESCHI, Joseph, *fe-es'-ke*, a Corsican, and the author of one of the most terrible conspiracies of which history has preserved the remembrance. In 1835, whilst Louis Philippe was king of the French, he made an attempt to destroy that sovereign and the princes of the royal family. Preparing an "infernal machine," in a house on the Boulevard du Temple, he, on the 28th July, on the occasion of a grand review, discharged it as the king and staff were passing his windows. Eighteen persons lost their lives, among whom was Marshal Mortier, duke de Treviso; twenty-two others were severely wounded, the king escaping only by a miracle. The assassin was taken and condemned to death, with Pépin and Morez, his accomplices. This man had formerly been a shepherd, then a soldier, and had been, prior to this, sentenced to ten years' imprisonment for robbery. B. in Corsica, 1790; executed, 1835.

FIESCHO, John Lewis, *fe-es'-ko*, a noble Genoese, who, out of hatred to the famous Andrew John Doria, formed, in 1547, a conspiracy, with the assistance of France and Pope Paul, to revolutionize Genoa. In the attempt to seize the galleys, Fiescho was drowned. The conspirators, disheartened, gave up the enterprise, and the family of Fiescho was proscribed.

FIESOLE, the ancient *Fæsulæ*, *fe'-si-so-lai*, a town of Tuscany, situate on a steep hill, 3 miles from Florence. *Pop.* 3,200. In its neighbourhood are excellent free-stone quarries. Under the name of Fæsulæ, it was one of the twelve Etruscan cities, and submitted, with the rest of Etruria, to the Roman power, and was colonized by Sylla. About the beginning of the 11th century, it was destroyed by the Florentines, and many of its inhabitants transported to the city of Florence.

FIFENESS, *fife'-ness*, a cape of Scotland, on the E. coast of the county of Fife. It projects into the North Sea, in *lat.* 56° 17′ N., and *lon.* 2° 36′ W. Beyond it are the Carr Rocks, a dangerous ridge, extending for some distance into the sea.

FIFESHIRE, *fife'-sheer*, a maritime county of Scotland, bounded N. by the river Tay and counties Perth and Kinross, E. by the German Ocean, S. by the Firth of Forth, and W. by an isolated portion of Perth and Clackmannan. *Ext.* 41 miles long by 18 broad. *Area*, 470 square miles. *Desc.* Diversified by hill and dale, having the Ochills, the Lomonds, and Largo Law for the highest summits. *Rivers.* The Eden and the Leven. *Pro.* The usual cerealia, and the "How of Fife" is especially productive. Large numbers of cattle are reared, and they are of a superior breed. *Minerals.* Copper and iron ore have been found, and the sulphurated ore of zinc. Coal is also extremely abundant, and lime, which is sometimes of sufficient hardness to admit of a fine polish. Cornelians and agates, and other kinds of stones, have also been discovered. *Manf.* Linen in all its branches, and the coal and limeworks and fisheries employ large numbers of the inhabitants. *Pop.* 154,000.

FIGEAC, *feezh'-ak'*, a town and parish of France, in the department of the Lot, on the Selle, 31 miles from Cahors. It is situate in a deep valley, encompassed by beautiful heights, clothed with the vine. *Manf.* Linen and cotton goods: there are also dye-works and tanneries. *Pop.* 7,500. Champollion the younger was born there, in 1790. (*See* CHAMPOLLION.)

FIGUEIRA, *fe-gai-eer'-a*, a town of Portugal, in the province of Bevia, at the mouth of the Mondego, 24 miles from Coimbra. It is a favourite bathing-place, and has an active trade in wine, oil, fruits, and salt. *Pop.* 5,000.

FIGUERAS, *fe-gair'-ass*, a town of Spain, in the province of Catalonia, 25 miles from Perpignan. On an eminence, in the vicinity, is a strong and magnificent castle, commanded by a military governor. It has also a large and ancient parish church, several convents, a college, various schools, hospitals, a prison, theatre, and a cavalry barracks. *Manf.* Linen and woollen fabrics, leather, soap, corks, brandy, oil, and wine. *Pop.* 8,500.—The castle of this place can accommodate 20,000 men; but, notwithstanding its great strength, the French took it in 1808, 1811, and 1823.

FILADELFIA, *fe'-la-del-fe'-a*, a town of Naples, in Calabria Ultra II., 12 miles from Nicastro. *Pop.* 4,500.

FILANGIERI, Gaetano, *fe-lan-je-air'-e*, an Italian political writer, who studied the law, but never practised it. In 1777 he entered into the service of the court, was appointed a gentleman of the bedchamber, and an officer in the marine. In 1780 he published the first volume of his work on the "Science of Legislation," which made him famous throughout Europe, and the 8th volume in 1791. It was never completed. In 1787 he obtained a place in the Royal College of Finance, which he designed to reform, but was taken ill, and died in the following year. B. at Naples, 1751. His work has gone through several editions.

FILANGIERI, Charles, an Italian general, son of the above, having lost his father at an early age, was forced by the troubles of his country, in 1799, to leave it, and set out, on foot, with his younger brother, for France. Arriving in Paris in a state of utter destitution, the name of their father procured for them at the hands of Bonaparte, then first consul, admittance to the school of the Prytaneum. Charles afterwards served in Napoleon's army, being present at Austerlitz, and afterwards distinguished himself as one of the first officers in the Neapolitan service. He subsequently served in Spain, and received for his signal acts of bravery, advancement and honours from Murat. He does not appear to have been much employed from 1820 till the accession of Ferdinand II., in 1830, to the throne of the Two Sicilies. He then had the direction of the artillery and engineers confided to him, and in 1848 was appointed to the command of the army sent into Lombardy. (*See* FERDINAND II.) He was now the docile instrument of Bomba, and, at the head of the expedition directed against Sicily, took possession of Messina after a bombardment of four days and a terrible slaughter. The same fate was in preparation for Palermo, but the English and French admirals seeing humanity so shamed in these proceedings, demanded and obtained an armistice for the suffering Sicilians. Six months later, however, hostilities again commenced, the submission of the island was completed, and Filangieri was appointed governor, with the fullest powers. B. at Naples, 1783.

FILBY, *fil'-be*, a parish of Norfolk, 3 miles from Caistor. *Pop.* 540.

FILELFO, Francis, or PHILELPHUS, *fe-lel'-fo*, an Italian philosopher, and one of the restorers of letters. After studying at Padua, he opened a school of rhetoric at Venice, the state of which appointed him chancellor, and ambassador to Constantinople. Here he made himself acquainted with the Greek language, when, on returning to Venice, he took with him many Greek manuscripts. In 1428 he removed to Bologna, where he was appointed professor of moral philosophy; but in 1429 he went to Florence. A difference having occurred between him and Cosmo de' Medici, he was forced to retire to Sienna, and afterwards to various other places. B. at Ancona, 1398; D. at Florence, 1481.—He was a man of learning and abilities, but restless and quarrelsome. His epistles were printed at Venice in 1502.—His eldest son, GIAMMARIA, or Marius Philelphus, was also a good scholar, and died at Milan in 1480.

FILEY, *fil'-le*, a parish and watering-place in the E. Riding of Yorkshire, on a tongue of land running into the North Sea. *Pop.* about 2,000. It has a station on the Scarborough and Hull Railway.

FILIPEPI, Sandro, or Alessandro, *fe'-le-pep'-e*, usually called Botticelli, from the name of a goldsmith to whom he was apprenticed. Having studied painting under Filippo Lippi, he rose to be one of the greatest painters of his time. He executed many works for the churches of Florence, some of which still exist in the Florentine Academy. His *chef-d'-œuvre* was a picture representing the adoration of the kings, in which the likenesses of Cosmo, Julian, and Cosmo's son, Giovanni Medici, were taken for the kings. He also painted, for the Sistine chapel at Rome, three grand works from the history of Moses and the Israelites. He subsequently illustrated Dante's "Inferno," and attempted to engrave his own designs, in which he failed. B. at Florence, 1473; D. there, depending on the charity of Lorenzo de' Medici, 1515.

FILIPPO D'ARGIRO, *fe-lip'-po dar-zhe'-ro*, a town of Sicily, in the Val di Demona, 30 miles from Catania. *Pop.* 7,300.

FILLANS, James, *fil'-lans*, a Scotch sculptor, who, from the humble occupation of a herder of sheep, became a weaver in Paisley, and next a stonemason. Whilst engaged in these occupations, he laboured privately to improve himself in the art of drawing, and also obtained a local celebrity by modelling in clay. Meeting with some success, and attracting the notice of William Motherwell, the poet, and also the editor of the *Paisley Advertiser*, he was brought further into notice, and encouraged to proceed to Glasgow, where he would have a wider field to work in. Here he gradually rose in his circumstances, until he found himself in a condition to visit Paris for the purposes of study. On his return, he settled in London, and was introduced to Chantrey by Allan Cunningham. He now grew into notice, and produced a "Tam O' Shanter Jug," and "The Birth of Burns," in alto-relievo, which, although creditable performances, do not seem to have done much for him. His greatest works are "The Blind Teaching the Blind," "The Boy and Fawn," and a colossal head of "Professor Wilson." To these may be added, a colossal statue of Sir James Shaw for the town of Kilmarnock. This work established his fame, and Fillans must have become eminent; but his life was drawing to a close, and, although he had been long engaged on a work entitled "Rachel Weeping for her Children," he did not live to finish it. B. at Wilsantown, Lanarkshire, 1808; D. at Glasgow, 1852.

FILMER, Sir Robert, *fil'-mer*, an English writer, who was the author of the "Anarchy of a limited and mixed Monarchy;" "Patriarcha;" in which he proves that government was monarchical in the patriarchal ages; but the arguments in which, according to Hallam, "are singularly insufficient," and were admirably answered by Mr. Locke in his book on government. He also wrote the "Freeholder's Grand Inquest." B. in Kent; D. about 1688.

FINALE, *fi-na'-lai*, a town of the Sardinian states, 10 miles from Albenga, on the Gulf of Genoa. *Pop.* 5,000.—Another in Modena, 20 miles from Modena. *Manf.* Silks and other fabrics, with an active general trade. *Pop.* 4,500.

FINCHLEY, *finch'-le*, a village and parish of Middlesex, noted for its common, and a large and beautiful public cemetery, 7½ miles N. of London. *Pop.* 4,300.

FINDEN, William, *fin'-den*, an English line-engraver, who, by study and intelligence, evinced a highly-finished taste, and rose rapidly to eminence as an engraver of steel-plates. From the excellence of his line, he was chosen to engrave the royal portrait of George IV. seated on a sofa, and painted by Lawrence. For this work he received 2,000 guineas, although the plate was not a large size. He also engraved the "Village Festival," by Wilkie, and the "Highlander's Return," by the same artist. Having now risen into great popularity, he commenced publishing works of art on his own account, and formed an extensive

engraving establishment, which he carried on in conjunction with a younger brother, also a good engraver. The result of this was, the production of engraved serials; among the most popular of which were the "Byron Gallery" and the "Gallery of British Art." But whatever may have been the successes of Mr. Finden in this line, they could only have been transitory, as the great expense necessary to support his establishment proved ultimately ruinous in a pecuniary point of view. The last work upon which he engaged himself was Hilton's "Crucifixion," undertaken for the Art Union, which he finished with a broken spirit, shortly before his death. D. 1852.

FINDHORN, *find'-horn*, a seaport of Elginshire, Scotland, 5 miles from Forres, with a herring-fishery, and a small trade in corn. *Pop.* 900.—Also a RIVER, which rises in Inverness-shire, and, after a course of 45 miles, falls into the Moray Firth. Here, in 1829, the "Moray Flood" took place, and inundated a large portion of the surrounding country.

FINGAL, *fin'-gawl*, a district of Ireland, in the county of Dublin, where are settled the descendants of some Finns, or Norwegians, who still retain a dialect and other features of their origin.

FINGAL, a personage celebrated in the poems of Ossian, who was his son. He was prince of Morven, a province of ancient Caledonia, and struggled against the power of the Romans, who were, in his time, the rulers of England. He also undertook warlike expeditions to the Orkneys, Ireland, and even Sweden, and was a prince of a highly chivalric character. Indeed, as painted by Ossian, he was a great hero, and the father of his people. Lived in the 3rd century.

FINGAL'S CAVE, a curious cavern, formed of basaltic columns, situate in the isle of Staffa, one of the Hebrides, on the W. coast of Scotland, 25 miles from Oban.

FINISTERRE, CAPE, 'land's end,' *fin'-is-tair*, the N.W. point of Spain. *Lat.* 42° 54′ N. *Lon.* 9° 20′ W.

FINISTERRE, a department of France, consisting of the W. extremity of the province of Brittany, which projects considerably into the Atlantic. It is bounded on the E. by the departments of the North Coast and Morbihan, and on the N.W. and S. by the Atlantic Ocean, in which it embraces numerous small islands. *Ext.* 68 miles long and 56 broad. *Area*, 2,690 square miles. *Desc.* The coasts are rugged and much indented; but the surface is little elevated, although traversed by the mountains of Arrée and Noires, whose highest points do not reach 1,000 feet above the level of the sea. *Rivers.* Aulne, Elorn, Ellé, and Odet. *Climate.* Humid, and subject to frequent tempests. *Pro.* Corn, rye, flax, tobacco, and potatoes. Large quantities of cider are produced from the orchards, and the domestic animals are generally of excellent breeds. The horses are also excellent, and the asses are of a large size, and are annually disposed of to other departments, to the extent of from 10,000 to 12,000. The coast fisheries are extensive, and the sardines are valuable. *Minerals.* Iron, zinc, bismuth, and lead. The mines of this last are at Poullaouen and Huelgoat, and are considered the most productive in France. *Manf.* Sailcloth, linen, soap, candles, oil, ropes, leather, paper, and tobacco. *Exp.* Grain, oil, brandy, tobacco, sailcloth, and sardines. *Imp.* Dutch cheese and colonial produce. *Pop.* 618,000.

FINKENWARDER, *fin'-ken-var-der*, an island in the Elbe, belonging partly to Hamburg and partly to the Hanoverian bailiwick of Harburg. It is surrounded by a wall 20 feet high. *Pop.* 1,800, mostly engaged in the pursuits of fishing and agriculture.

FINLAND, Grand Principality of, *fin'-land*, an extensive country in the N. of Europe, situate to the E. of Sweden, and forming an administrative division of the Russian empire. It is bounded W. and S. by the gulfs of Bothnia and Finland, N. by Lapland, E. by the governments of Olonetz and Archangel. *Ext.* 650 miles long, with a breadth averaging between 112 and 360. *Area*, differently estimated from 100,000 to 136,000 square miles. *Desc.* The surface is in general flat, and in the interior may be described as a table-land, with an average height of from 300 to 600 feet above the level of the sea. The coasts are rugged and precipitous, presenting bold masses of granite cliffs, which render the navigation of their neighbourhood extremely dangerous. *Rivers and Lakes.* The rivers are mostly small, and the longest of them are in the N.; but the lakes are numerous, the largest of which are Ladoga, Saima, and Ulla. The S. part of the country is nearly covered with water, being nothing more than a compound of lakes and marshes. *Climate.* Healthy on the coasts. In the S. and W. the winters are comparatively temperate; but in the N. and E. the cold is intense, and of long continuance. *Pro.* Barley and rye. The potato was introduced in 1762, since which period it has been extensively cultivated. Although the pasturage is poor, cattle and horses are reared in considerable numbers. Many of the heights are bare, but those of moderate elevation are mostly covered with pine-forests. *Minerals.* Iron, copper, marble, granite, and sulphur. *Exp.* The principal are timber, butter, and skins, with the produce of extensive fisheries. *Imp.* Corn, salt, metal, tobacco, and colonial produce. *Manf.* Unimportant. *Pop.* 1,540,000, chiefly composed of Finns and Laps. *Lat.* between 59° 48′ and 70° 6′ N. *Lon.* between 20° and 32° E.—Up to the 12th century, the Finns were pagans, and lived under their own kings or rulers. About the middle of that period they were conquered by the Swedes, under whose dominion they mostly lived till 1809, when, by the treaty of Frederikshamm, their country was ceded to Russia. (*See* ABO, HELSINGFORS, &c.)

FINLAND, GULF OF, one of the great arms of the Baltic Sea, extending E. and N., between *lat.* 58° 40′ and 60° 40′, and between *lon.* 23° and 30° 10′ E. *Ext.* 260 miles long, with a width varying between 25 and 90. It has numerous islands, the principal of which is Cotlin-Ostrof, or Kotlinoi, upon which Cronstadt is erected. (*See* CRONSTADT.)

FINMARK, *fin'-mark*, an extensive province of Norway, forming the most northern portion of continental Europe, and lying between Russian Lapland and the Arctic Ocean. *Area*, estimated at 27,500 square miles. *Desc.* Sterile; but yielding crops of rye and potatoes. *Pop.* 45,000.

FINN, *fin*, a river of Ireland, which, after a course of 24 miles, runs into Loch Foyle near Lifford.

FINNAN, or FINDEN, *fin'-nan*, a fishing village of Scotland, 6 miles from Aberdeen. It is celebrated for its smoked haddocks, called 'finnans.'

FINSBURY, *fins'-ber-e*, a parliamentary borough of Middlesex, comprising the N. part of London, and lying between the Tower Hamlets on the E., Marylebone on the W., and the city of London and the liberties of Westminster on the S. *Pop.* 323,772.

FINSTER-AARHORN, *fin'-stair-a'-horn*, a mountain of Switzerland, attaining its culminating point in the Bernese Alps, between Bern and Valais. *Height*, 14,020 feet.

FIORA, *fe-or'-a*, a river of Italy, rising near Mount Amiata, and, after a course of 40 miles, entering the Mediterranean Sea 20 miles from Civita Vecchia.

FIORD, *fe'-ord*, the termination of a great number of Scandinavian geographical names, and means an arm of the sea, or strait.

FIORENZUOLA, *fe'-o-raind-zoo-o'-la*, the name of several Italian towns, none of them with a population above 3,000.

FIRANDO, *fe-ran'-do*, an island of Japan, 55 miles from Nangasaki, having on its E. side a town of the same name, where, in the early part of the 17th century, the Dutch erected a trading depôt. *Lat.* 33° N. *Lon.* 129° E.

FIRMILIAN, *fir-mil'-yăn*, a bishop of Cæsarea, in Cappadocia, who was the friend of Origen, and took part with St. Cyprian in the dispute concerning the rebaptizing of converted heretics. He presided at the first council of Antioch against Paul of Samosata, and died in 269.

FIRMIN, Thomas, *fir'-min*, a benevolent Englishman, noted for his extensive charities. He began business as a linendraper in London, and amassed a considerable fortune. His piety and benevolence procured him the esteem of many of the most eminent men of his time, especially Archbishop Tillotson, who particularly courted his friendship. He erected a warehouse for the employment of the poor in the linen manufacture,

and when the French Protestants landed in England, set up another for their use at Ipswich. He was one of the governors of Christ's and St. Thomas's hospitals, to which he was a liberal benefactor, as he was to almost every charitable institution brought under his notice. B. at Ipswich, Suffolk, 1632; D. 1697.—He published, in 1678, "Some Proposals for the Employing of the Poor, and especially in and about the City of London, and for the Prevention of Begging," 4to. Donaldson, in his "Agricultural Biography," says of this pamphlet, "The author's views were sufficiently benevolent, but not very enlarged."

FIRMINY, *feer'-me-ne*, a town and parish of France, in the department of the Loire, 6 miles from St. Etienne. *Manf.* Glass, hardwares, and silks. Near it are some coal-works. *Pop.* 5,500.

FISCHER, Karl von, *fish'-er*, a distinguished German architect, who, after studying at Mannheim and Vienna, and visiting Italy, went, in 1809, to Munich, and became professor of architecture in its academy. Here he superintended the erection of several mansions of great merit, but his greatest work is the "Hof Theatre," which is still one of the chief ornaments of Munich. This building was commenced in 1811, and opened in 1818; and although, in 1823, it suffered considerably by fire, it was rebuilt in accordance with the original designs of Fischer. He is considered the founder of the Munich school of architecture. B. at Mannheim, 1782; D. at Munich, 1820.

FISH, Simon, *fish*, an English lawyer, who, on account of his active support of the principles of the Reformation, was obliged to fly to Germany, where, in conjunction with William Tyndale, he wrote the "Supplication of Beggars against Monks and Friars." This piece so pleased Henry VIII., that Fish had liberty to return. He also translated from the Dutch a little book, entitled "The Sum of the Scriptures." D. of the plague, 1571.—The "Supplication of the Beggars" was a satire upon the Popish clergy, which was answered by Sir Thomas Moore in his "Supplications of Souls in Purgatory."

FISH RIVER, a river of Florida, U.S., falling into Mobile Bay, in *lat.* 30° 30′ N; *lon.* 87° 50′ W.

FISH RIVER, GREAT, a river of S. Africa, which rises in the Sneenberg, or Snowy Mountains, and after an estimated course of 260 miles, falls into the Indian Ocean, in *lat.* 33° 30′ S., *lon.* 27° 20′ E.

FISHER, John, *fish'-er*, an English prelate, who was educated at Cambridge, and became confessor to Margaret, countess of Richmond, mother to Henry VII. By his advice the countess founded St. John's and Christ's colleges, Cambridge. In 1502 he was chosen chancellor of this university, and became a liberal encourager of learning. In 1504 he was appointed to the bishopric of Rochester, from which he would never remove to a better see. He was a zealous opponent of the Reformation, and could not be induced by Henry VIII. to concur with that monarch's divorce of Queen Catharine. Great efforts were made to bring him to acknowledge the king's supremacy, which proving ineffectual, he was sent to the Tower. While in confinement, the pope made him a cardinal, which so enraged the king, that he caused him to be tried for high treason, when he was condemned and beheaded in 1535. P. at Beverley, Yorkshire, 1459.—He wrote a "Commentary on the Penitential Psalms," a "Defence of the King's Book against Luther," a "Funeral Sermon for the Lady Magaret," &c. A collective edition of his works was published at Wurtzburg in 1695.

FISHER, Mary, a member of the Society of Friends, who conceived the idea of going to Constantinople to convert the grand seignor. The sultan, Mahomet IV., heard her patiently, and then caused her to be sent back to her own country, where she married a preacher of her own sect. This couple afterwards went to Languedoc, to preach the tenets of Quakerism among the Protestants there. Lived in the 17th century.

FISHER'S ISLAND, a small island belonging to the state of New York, U.S., and lying 12 miles from the N. end of Long Island. *Ext.* 7 miles long, by 1 broad.

FISHERROW, *fish'-er-ro*, a suburb of the town of Musselburgh, at the mouth of the Esk, 5 miles from Edinburgh. (*See* MUSSELBURGH.)

FISHGUARD, or FISGARD, *fish'-gard*, a seaport and parish of Pembrokeshire, S. Wales, 14 miles from Haverfordwest. It has a valuable fishery, and a trade in oats, butter, and slates. Its harbour is one of the best in St. George's Channel. *Pop.* 2,500.—Here a detachment of French, amounting to about 1,200, landed in 1797, and were taken prisoners by the inhabitants. It would appear, by tradition, that they committed many outrages upon the Welsh; but a better-authenticated account than tradition, states, in December, 1859, that the French commenced to land on the morning of the 23rd of February, and that before 10 P.M. of the same day they had landed, had written to his lordship (Lord Cawdor) offering to surrender, and had had their offer accepted. This allows very few hours for the perpetration of all the outrages which are imputed to them.

FISHKILL, *fish'-kil*, a town in the state of New York, U.S., on the Hudson, 78 miles from Albany. *Pop.* 10,000.

FITZ, *fits*, a name which is derived from an old French word signifying son, and which, in England, has been added to the name of the father, in order to distinguish the son. It has also been, in several instances, applied to the natural sons of the kings of England.

FITZGERALD, Lord Edward, *fitz-jer'-ald*, was the son of James, first duke of Leinster, and Lady Emily Lennox, daughter of the duke of Richmond. Entering the English army, he fought in the American war, but in 1790 quitted the service, and took his place in the Irish Parliament. When the French revolution broke out, he supported its principles, and in 1793 hastened to Paris. Here he married Pamela, the daughter, it is said, of Louis Philippe Joseph, the duke of Orleans, and Madame de Genlis. On his return to Ireland, Fitzgerald was desirous of effecting a separation of that country from England, and induced the French Directory to furnish him with a fleet and troops. A landing was attempted on several occasions; but all efforts only proved the futility of the scheme, and Fitzgerald was seized, tried, and condemned to death. D. of his wounds before the time fixed for his execution, 1798; B. near Dublin, 1763.—His wife, distinguished for her wit and beauty, had been educated with the daughters of the duke of Orleans, by Madame de Genlis, and married a second time, Mr. Pitcairn, the American consul at Hamburg, from whom, however, she separated soon afterwards. D. almost in want of common necessaries, 1831.

FITZHERBERT, Maria, *fitz-her'-bert*, was the youngest daughter of Waller Smythe, Esq., of Brambridge, and was twice a widow before she was twenty-five years of age. In 1785 she became acquainted with George IV., then prince of Wales, and was, in the same year, privately married to him at Carlton House, in the presence of her uncle and brother. This marriage was invalid by the law of the land, and the prince now married with the Princess Caroline of Brunswick. This alliance proving unhappy, Mrs. Fitzherbert again lived for several years with the prince as his wife. His gross irregularities, however, drove her into retirement, and she went to Brighton, where she lived, not only in the enjoyment of the affection and respect of a large circle of friends, but retaining the good opinion of George III. and William IV. B. 1756; D. at Brighton, 1837.

FITZJAMES, James, *fits-jaims'*, was the natural son of James II. by Arabella Churchill, sister to the duke of Marlborough. He entered early into the French service, and at the age of fifteen was wounded at the siege of Buda. In 1688 he was sent to Ireland, where he distinguished himself at the siege of Londonderry and the battle of the Boyne. He was afterwards employed on various services, for which he was rewarded with the rank of marshal of France. He gained the victory of Almanza over the English and their allies, which fixed Philip V. on the throne of Spain. He was killed by a cannon-ball at the siege of Philipsburgh, in 1734. B. at Moulins, 1671.—This prince is known in history as the duke of Berwick.

FITZROY, Captain Robert, R.N., *fits'-roi*, an English naval officer, who, from 1826 to 1830, was employed in surveying the S. American coasts of Patagonia,

Terra del Fuego, Chili, and Peru. Another expedition was planned, and in 1831 he sailed again, and surveyed the southern shores of S. America, circumnavigated the globe, and returned after an absence of four years. In 1841 he became member of parliament for the city of Durham, and in 1843 was appointed governor and commander-in-chief of the colony of New Zealand. In 1846 he was replaced by Sir George Grey, and, on his return to England, wrote a pamphlet in justification of the course of policy he had pursued in the colony. In 1850 he published "Sailing Directions for S. America, &c.," accompanied by charts, which show the results of his surveys. B. 1805.

FITZ-STEPHEN, William, *fits-ste'fen*, a monk of Canterbury, who wrote the life of his master, Thomas à Becket, in which he gives a curious description of London, and which is the earliest extant. Lived in the 12th century.

FIUME, *fe-oo'-mai*, a seaport of the Austrian empire, at the extremity of the Gulf of Guarnero, on the Adriatic, with a commodious harbour, 38 miles from Trieste. Here are several mercantile establishments, which export corn, tobacco, and wood, and import rye, sugar, spices, salt, &c. *Manf.* Woollens, linens, leather, rosognolio, and earthenware. It is the immediate outlet for the produce of Hungary. *Pop.* 12,000. *Lat.* 45° 19′ 36″ N. *Lon.* 14° 23′ 45″ E.

FLACCUS, Caius Valerius, *flăk'-kus*, a Latin poet, who lived in the reign of Vespasian. A poem of his on the Argonautic expedition is extant, the best edition of which is that of Burman, 1724.

FLACCUS, or FRANCOWITZ, Mathias, a Lutheran divine, who assumed the name of Flaccus Illyricus, on account of his having been born in an ancient part of Illyricum. He became a disciple of Luther and Melancthon at Wittemberg, where he taught the Hebrew and Greek languages, of which he was there appointed professor. He was the principal author of the "Centuriæ Magdeburgenses," and a great defender of the principles of Luther against those who were for moderate doctrines; on which account he settled at Magdeburg, and afterwards removed to other places. B. at Istria, 1520; D. at Frankfort, 1575.—He wrote "Clavis Sacræ Scripturæ," 2 vols. folio; "Catalogus Testium Veritatis," folio; "De Translatione Imperii Romani ad Germanos;" and "De Electione Episcoporum, quod æquo ad Plebem pertineat," 8vo.

FLADSTRAND, or FREDERICKSHAVN, *flad'-strand*, a fortified seaport of Denmark, in Jutland, 30 miles from Aalborg. It has a harbour and dockyard.

FLAMBOROUGH, *flăm'-bur-o*, a town and parish of the E. Riding of Yorkshire, 3 miles from Bridlington. *Pop.* 1,300.

FLAMBOROUGH HEAD, a promontory on the Yorkshire coast, with a lighthouse 214 feet above the level of the sea. *Height* of promontory, 450 feet. *Lat.* 54° 7′ N. *Lon.* 0° 5′ E.

FLAMEL, Nicholas, *flă'-mel*, a notary of Paris, who accumulated, by some unknown means, a vast property, which he appropriated to benevolent purposes and the endowment of hospitals and churches. The multitude ascribed his great wealth to his possessing the philosopher's stone; whilst others attributed to him the authorship of some works on alchemy. However this may be, he certainly founded no less than four hospitals in Paris. D. 1413.

FLAMINIA VIA, *flă-min'-e-a*, a celebrated road, which led from Rome to Ariminum and Aquileia. It received its name from the consul Flaminius, who built it.

FLAMINIUS, C., *flă-min'-i-us*, a Roman consul, of a turbulent disposition, who was drawn into a battle near the Lake of Thrasymene, by the artifice of Hannibal. He was slain in the engagement, with an immense number of Romans, 217 B.C.

FLAMINIUS, or FLAMININUS, T. Q., a celebrated Roman, raised to the consulship, and sent against Philip, king of Macedonia, and against the Achaian league. He totally defeated Philip on the confines of Epirus, and made all Locris, Phocis, and Thessaly tributary to the Roman power. He proclaimed all Greece independent, at the Isthmian games. This celebrated action procured him the name of father and deliverer of Greece. He was afterwards sent ambassador to Prussias, king of Bithynia, where, by his prudence and artifice, he caused Hannibal, who had taken refuge at this court, to dispatch himself, rather than be given up to his enemies the Romans. Flaminius was found dead in his bed, after he had imitated, with success, the virtues of his model, Scipio. —LUCIUS, the brother of the preceding, signalized himself in the wars of Greece.—FLAMMA, Calp., a tribune, who, at the head of 300 men, saved the Roman army in Sicily, 258 B.C., by engaging the Carthaginians, and cutting them to pieces.

FLAMSTEED, John, *flăm'-steed*, an English astronomer, who, when very young, discovered a strong predilection for mathematical learning, and, in 1669, calculated an eclipse of the sun which was to happen the next year. He also calculated five appulses of the moon to the fixed stars. He sent the same to the Royal Society, for which he received the thanks of that learned body. Soon after this, he visited London, and then went to Cambridge, where he entered himself of Jesus College. One of his best friends was Sir Jonas Moore, who introduced him to the king, and in 1674 procured for him the place of astronomer royal. The same year he entered into orders. In 1675 the foundation of the royal observatory at Greenwich was laid, and he being the first resident and astronomer royal, it was called Flamsteed House. In 1725 appeared his great work, entitled "Historia Cælestis Britannica," in 3 vols. folio. In the "Philosophical Transactions" are many of his papers, and in Sir Jonas Moore's "System of Mathematics" is a tract by him on the Doctrine of the Sphere. B. at Derby, 1646; D. 1719.— It is to the mass of lunar observations made by Flamsteed, that Newton was indebted for the means of carrying out and verifying his immortal discovery of gravitation.

FLANDERS, EAST and WEST, *flan'-ders*, a very interesting and early civilized portion of Europe, forming two contiguous provinces of Belgium. It is bounded on the N.W by the North Sea, and inclosed on its other sides by the provinces of Antwerp, Zealand, S. Brabant, Hainault, and the French department of the Nord. EAST FLANDERS is divided from West Flanders by a line running almost due south from Sluys, a small town nearly opposite Flushing. *Area*, estimated at 1,020 square miles. *Desc.* The surface is level in the northern part, while to the south it consists of undulating plains. The soil is in general a heavy loam, and very fertile. *Pop.* 779,500. WEST FLANDERS, on the other hand, has a considerable tract of coast, in the central part of which is Ostend. This side faces the N.; but the W. boundary of the province adjoins the French territory. *Area*, nearly 1,500 square miles. *Desc.* Its surface is in general level, except the sand-hills on the coast. The soil is also fertile, and the agriculture good. *Manf.* These, in both provinces, are pretty much the same, comprising large quantities of lace and fine linen, cotton stuffs, leather; and there are extensive breweries and distilleries, and dye and soap works. *Pop.* 646,000.— *United Area*, 2,520 square miles. *United Pop.* 1,425,500. *Lat.* between 50° 40′ and 51° 23′ N. *Lon.* between 2° 37′ and 4° 23′ E.—In the time of the Romans, the territory of Flanders was occupied by the Morini, and a portion of the Nervii, the Atuatici, and the Menapii. In the 7th century, the name of Flanders appears for the first time; but at this period it did not extend further than the territory of Bruges. By the treaty of Verdun, in 843, it was comprised in the kingdom of France. In 862, it was erected into a countship, subject to the kings of France, in favour of Baldwin, called Bras-de-fer, 'Iron-arm,' son-in-law of Charles the Bald, and it remained in the possession of this family till 1119. After the extinction of this dynasty, Flanders was possessed by Charles the Good, son of Canute, king of Denmark, up to 1127; then by Cliton, son of Robert II., duke of Normandy. Count Thierry of Alsace, son of Thierry, duke of Lorraine, succeeded Cliton, and transmitted the territory to his descendants. In the wars between France and England, Flanders often took part with the latter, although a vassal of the former power. After the death of Margaret II., countess of Flanders, who had first married Bouchard, lord of Avesnes, and then Guy de Dampierre, Flanders was inherited, 1280, by Guy de Dampierre, one of her sons. The revolt of Guy against Philip the Fair, in 1297, was

followed by the conquest and annexation of his territory to the kingdom of France; but, in 1302, the Flemings rose, defeated Philip at Courtray, and succeeded in again being governed by their own counts. In 1337, under Louis I. de Dampierre, the Flemish towns, at the instance of the first Artevelde, acknowledged Edward III. of England as king of France, and thus gave rise to the "Hundred Years' War" between the two powers. In 1382 they revolted, under the leadership of Philip Von Artevelde, against Louis II., their count, and were crushed at the battle of Rosbecq. (*See* ARTEVELDE.) After the death of Louis II., in 1384, the French family of Valois-Burgundy replaced that of Dampierre, by the marriage of Philip I. of Burgundy with Margaret, daughter of Louis II. This period was one of great splendour and prosperity for Flanders; the populous cities of Ghent, Bruges, Ypres, and others, having acquired, by their industry and art, immense riches. Somewhat turbulent, however, and jealous of their liberty and privileges, they were oftentimes at variance with their lords. After the death of Charles the Bold, who was perpetually at war with Louis XI. of France, the countship of Flanders fell, in 1477, to his daughter Marie. The latter, marrying the Archduke Maximilian, brought Flanders and its dependencies to the house of Austria; and from this, wars ensued between France and that empire. In 1526, the treaty of Madrid, abolishing the vassalship of Flanders, broke the last tie which attached this country to France. The emperor Charles V. incorporated it in the seventeen provinces which formed the circle of Burgundy, and thence it became a portion of the Spanish Netherlands. The treaty of the Pyrenees, in 1659, restored to France some of the towns of Flanders and Artois; that of Nimeguen gave it the whole of Artois, and a large part of Flanders, as also a portion of Hainault, and the town of Cambray. The peace of Utrecht conferred the remainder of Flanders on the house of Austria, whence it passed to that of Lorraine-Austria, still remaining an integral part of the German empire. In 1792 the French invaded imperial Flanders, and occupied it till 1814, forming of it the two departments of Escaut (Scheldt) and Lys. In 1814 this portion of Flanders was given to the king of the Netherlands, who divided it into two provinces. Since the revolution of 1831, it has belonged to Belgium. The Flemings were formerly the principal manufacturers and merchants of Europe; and from them the English learned the art of weaving. Their table-linens, lace, and tapestry, are still of very superior manufacture.

FLAVIAN, *flaí'-vi-an*, patriarch of Antioch, in which see he was confirmed by the council of Constantinople in 382. This act, however, occasioned a schism, numerous bishops adhering to Paulinus, and others to Flavian. The prudence of the latter at length restored peace to the church. He was a zealous opposer of the Arians. D. 404, having governed his church twenty-three years.

FLAVIAN, patriarch of Constantinople, to which he was elected on the death of Proclus, in 447. He condemned the Eutychian heresy, in a synod held at Constantinople; but the followers of Eutychius afterwards got Flavian banished to Lydia, where he died.

FLAVITAS, *flaí'-i-tis*, patriarch of Constantinople. When Acacius, patriarch of Constantinople, died, the emperor Zeno was weak enough to leave a blank paper under the altar, in expectation that an angel would write upon it the name of a person to succeed him. Flavitas, by bribing the grand-chamberlain, gained admittance into the church, and inscribed his own name in the letter; on which he was chosen patriarch. He died about three months afterwards, and the cheat being discovered, the chamberlain was executed. Lived in the 5th century.

FLAVIUS, *flaí'-ve-us*, the name of a plebeian family at Rome, from which came the emperors Vespasian, Titus, and Domitian.

FLAXMAN, John, *flaks'-man*, an eminent English sculptor, who from his boyhood discovered a remarkable genius for modelling in clay. In 1787 he visited Rome, where, during a residence of seven years, he executed his celebrated designs in outline from Homer, Æschylus, and Dante. These were engraved and published, as were some which he made from Hesiod. Whilst at Rome, he also executed the splendid group from Ovid's Metamorphoses, entitled "The Fury of Athamas," consisting of four figures, larger than life. For this work he received £600, a sum insufficient to defray even the cost. It was executed for the earl of Bristol. At this time he also produced his "Cephalus and Aurora." In 1794 he returned to England, and executed the monument for Lord Mansfield, now in Westminster Abbey: for this he received £2,500. After this he produced a large number of fine works, and has been pronounced "the greatest of modern sculptors." B. at York, 1755; D. in London, 1826.—Byron says that "Flaxman translated Dante the best;" and Allan Cunningham says that "the progeny of his pencil and chisel were of the highest rank."

FLÈCHE, LA, *flaish*, a well-built town of France, in the department of Sarthe, and situate in a pleasant valley watered by the Loire, 24 miles from Le Mans. This town was chiefly noted for its public seminary, which was broken up at the Revolution. It has still a Prytaneum, or military school, founded by Napoleon I., a town-hall, court-house, hospital, and the church of St. Thomas, a remarkable pile, whose old *flèche*, or spire, gave the place its name. *Manf.* Hosiery, gloves, and linens. *Pop.* 7,000.—Here Descartes, the distinguished French philosopher, was born. (*See* DESCARTES.)

FLÉCHIER, Esprit, *flaí'-she-ai*, a famous French bishop, who was greatly admired as a preacher at Paris, and whose funeral orations placed him on a level with Bossuet. In 1679 he published his "History of Theodosius the Great;" in 1685 he was made bishop of Lavaur, on which Louis XIV. said, "I should have rewarded you much sooner, but that I was afraid of losing the pleasure of hearing your discourses." Shortly after, he was promoted to the see of Nimes. As a bishop, he was exemplary, and when a famine raged in 1709, his charity was unbounded, and manifested to all persons, without any respect to religious persuasion. B. at Pernes, near Carpentras, 1632; D. at Nimes, 1710.—His works are, "Miscellaneous Works," 12mo; "Panegyrics of the Saints;" "Funeral Orations;" "Sermons;" "The Lives of Cardinals Ximenes and Commendon;" "Letters;" "Posthumous Works." They were all published together at Nimes in 1782, in 10 vols. 8vo.

FLECKNOE, Richard, *flek'-no*, an English poet and dramatist, noticed here, not on account so much of his own productions, as on account of his name having been borrowed by Dryden, to serve as a scourge for the punishment of Shadwell. He was poet laureate to Charles II., and wrote several miscellaneous pieces, a short treatise on the English stage; "Love's Dominion," a dramatic piece; "Erminia; or, the Chaste Lady;" and several other performances, which are now all but forgotten, even by the antiquarians in literature. Of his birth nothing is known. He is believed to have died about 1678.

FLEETWOOD, *fleet'-wood*, a seaport-town and watering-place of Lancashire, at the entrance of Morecombe Bay, 18 miles from Preston. It has a market-house, docks, and lighthouse. *Pop.* 3,500.—Steamers ply from here to both Ireland and Scotland, and it communicates by rail with Preston.

FLEMMING, or FLEMMYNGE, Richard, *flem'-ming*, an English prelate, who received his education at University College, Oxford, and, in 1408, obtained a prebend in the cathedral of York. He, for a time, zealously defended the doctrines of Wickliffe, but afterwards as strenuously opposed them. In 1442 he became bishop of Lincoln, and soon after was sent deputy to the council of Constance, where he distinguished himself by his eloquence. At his return, he executed the decree of that assembly for digging up Wickliffe's bones and burning them. He was afterwards raised to the see of York by the pope; but Henry VI. refusing to concur in his advancement, he was obliged to remain at Lincoln. B. in Yorkshire; D. at Lincoln, the college of which he founded, 1431.

FLENSBORG, *flens'-borg*, a seaport of Denmark, in the duchy of Schleswig, on a bay of the Baltic, 20 miles from Schleswig. It is a place of great activity, with good shops and well-supplied markets.

Its principal buildings are its churches, a school of *navigation*, and market-houses. Its trade consists of shipbuilding, distilling, dyeing, sugar-refining, and making tobacco, vinegar, and chicory. *Pop.* 17,500.

FLETCHER, Richard, *fletch'-er*, an English prelate, who, in 1583, was made dean of Peterborough; and, in 1586, attended Mary, queen of Scots, at her execution, with a view of converting her to the Protestant religion. In 1589 he was preferred to the bishopric of Bristol, whence he was translated to Worcester, and lastly to London. On the death of his first wife he married again, and this gave such offence to Queen Elizabeth, that she suspended him from his episcopal functions. D. in Kent; D. 1596.

FLETCHER, John, an English dramatic poet, who received his education at Cambridge, and wrote several plays in conjunction with Beaumont. We do not know whether to conceive it a fair inference, that, because the plots of many of his plays were taken from works in the Spanish, Italian, and French languages, he was acquainted with these; but be that as it may, it is certain that he possessed other merits sufficient to establish a fair claim to the reputation which time and posterity have alike awarded him in the literature of his country. Out of the fifty-two plays composed under the united names of Beaumont and Fletcher, it is stated that only in seventeen Beaumont had a share in the production. If such was the case, the friendship which could excite such generous conduct on the part of Fletcher was equally creditable to both. In addition to his other works, he assisted Ben Jonson and Middleton in "The Widow," and is believed to have been also a literary partner with Shakspeare, Massinger, and some other authors. B. 1576; D. of a plague which happened 1625, and was buried in St. Saviour's Church, Southwark. (*See* BEAUMONT.)

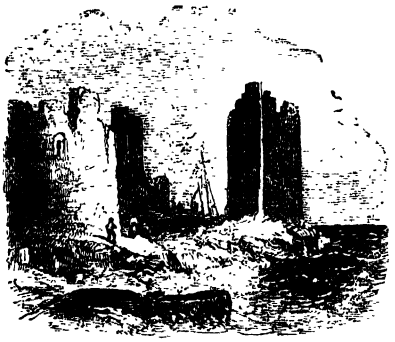
FLETCHER, Phineas, cousin to the above poet, was educated at Eton and Cambridge. In 1621 he obtained the living of Hilgay, in Norfolk, where he died in 1650. He is best known by a poem entitled "The Purple Island," which is an allegorical description of man, in the manner of Spenser, reprinted at London in 1783. He also wrote a work, now very rare, entitled "Locustes, or Apollyonists," a satire against the Jesuits. To this work Milton is said to have confessed that he owed the origin of his "Paradise Lost."—His younger brother GILES was also a divine and a poet, and wrote "Christ's Victory." He died in 1623.

FLETCHER, Andrew, a Scottish political writer, was the son of Sir Robert Fletcher, of Saltoun, in Scotland. He was bred up under the care of Dr. Burnet, afterwards bishop of Salisbury, and became commissioner for East Lothian in the Scotch parliament, in which he so strongly opposed the court measures, that he found it expedient to withdraw to Holland. In 1685 he landed in the west of England with the duke of Monmouth, but was dismissed for shooting a gentleman who had remonstrated with him for stealing his horse. One of Fletcher's biographers says, that "he was a man of breeding and nice honour, in whose constitution anger was extremely predominant." After this he was engaged in the Hungarian service against the Turks. At the Revolution he returned to his own country, and was a member of the convention for settling the government of Scotland. B. at Saltoun, 1653; D. in London, 1716.—His publications, which are wholly political, are filled with the boldest and most honest denunciations of the oppressive measures beneath which his country, in his time, groaned. His character is thus given by a contemporary: "A gentleman steady in his principles, of nice honour, with abundance of learning; brave as the sword he wears, and bold as a lion,—a sure friend and an irreconcilable enemy,—would lose his life readily to serve his country, and would not do a base thing to save it." It is in his letter to the marquis of Montrose, entitled "An Account of a Conversation," that occurs the celebrated saying erroneously attributed to the earl of Chatham: "I knew a very wise man that believed that if a man were permitted to make all the ballads, he did not care who should make all the laws of a nation."

FLETCHER, Abraham, an ingenious English mathematician, was bred to the business of a tobacco-pipe maker. He learned to read and write by his own application, and also taught himself arithmetic, mathematics, and botany. At the age of thirty he became a schoolmaster, to which he added the professions of astrologer and doctor, and acquired a fortune of £3,000. B. in Cumberland, 1714; D. 1793.—He published a compendium of practical mathematics, under the title of the "Universal Measurer," 1 vol. 8vo; a book of merit.

FLEURUS, *flur'-oos*, a town of Belgium, in Hainault, near the Sambre, and 7 miles from Charleroi. *Pop.* 2,500.—It is noted for four important battles having taken place in its vicinity. The first took place on August 30, 1622, between the Spaniards, under Gonzales de Cordova, the general of the Catholic league, the troops of the Protestant union, commanded by the Bastard of Mansfeld and the dukes of Brunswick and Saxe-Weimar: both sides claimed the advantage. The second was fought July 1, 1690; Montmorency, duke of Luxembourg, defeating the prince of Waldeck, one of the most able of the generals of the Augsburg league. The third was that in which General Jourdain defeated the imperialists under the prince of Coburg, June 26, 1794. The fourth, more commonly known as the battle of Ligny, took place on the 11th June, 1815. On that day Blucher was defeated by Napoleon. (*See* BLUCHER.)

FLEURY, André Hercule de, *flur'-e*, a cardinal and prime minister of France, was, at first, chaplain to Louis XIV., then became, in 1698, bishop of Fréjus, and was nominated by the old king, when near his death, as tutor to his successor, Louis XV. Fleury gained great influence over the mind of his pupil, and in 1726 succeeded the duke of Bourbon as prime minister, being in the same year also made a cardinal. He showed his wisdom in the internal administration of the kingdom, diminishing the taxes, and systematizing the finance department, but was not successful in maintaining the influence of France abroad. Stanislas, king of Poland, whose claims ought to have been supported, was abandoned in the war which he undertook to recover his crown. By the treaty of Vienna, 1736, Fleury, however, obtained from Austria the cession to Stanislas of the duchies of Lorraine and Bar, stipulating that these should, at the death of Stanislas, revert to France. In the War of Succession, 1740, the cardinal was not destined to see the arms of his country successful: but he did not live till the end of the conflict. D. at Lodève, Languedoc, 1653; D. 1743.



FLEURY, the name of many parishes and places in France, none of them with a population above 2,000.

FLINDERS, Captain Matthew, *flin'-ders*, a distinguished English navigator, who early entered into the merchant service, but quitted it soon for the navy, which he joined as a midshipman in 1795. Having distinguished himself in an exploring expedition through Bass's Straits (*see* BASS), he was, on his return to England, promoted, and in 1801 sailed, as captain of the *Investigator*, for Australia, and, commencing at Cape Leuwen, surveyed the eastern coast, as far as Encounter Bay. He next sailed for Port Jackson, where, having refitted, he explored Northumberland and Cumberland islands, and the great Barrier Reef of coral rocks. Thence he proceeded to Torres Straits, examined the Gulf of Carpentaria, thence to the island of Timor, and thence to Port Jackson where he arrived in 1803. From the rotten state of his ship, he was no longer able to continue his survey; accordingly, he embarked for England in the *Porpoise*, for the purpose of laying the results of his investigations before the lords commissioners of the Admiralty. In this ship, however, he was wrecked on a coral reef, in sailing for Torres Straits; but, through his own intelligence and enterprise, not only saved the crew, but eventually was the means of rescuing them, when, in a vessel called the *Cumberland*, no larger than 29 tons, he set out for England. He crossed the Indian Ocean, and reached the Isle of France, where he and his people were made prisoners of war, notwithstanding that he held a French pass, enjoining that his ship should be respected wherever it should be found, on account of the scientific objects in which its captain was engaged. Here he was detained a prisoner for six years. At length he was restored to his liberty and his country, with all his plans and charts, excepting one of his log-books, which

had been either lost, kept, or destroyed. By this time the French had issued a volume and an atlas, marking a vast number of the parts surveyed by Flinders as those which had been visited by a navigator of their own nation. Flinders, however, was enabled to assert his own, although so broken in health, that he lived only to revise the last sheet of his work, when, on the very day that his book was published, he died. B. at Donington, Lincolnshire, 1760; D. 1814.—The work of Flinders is entitled "A Voyage to Terra Australia, in the years 1801, 1802, and 1803, in His Majesty's Ship *Investigator*, and subsequently in the armed Vessel *Porpoise* and *Cumberland* Schooner." 2 vols. with Atlas: London, 1814. (*See* AUSTRALIA and BROWN, Dr. Robert.)

FLINDERS' LAND, a land in S. Australia, discovered by Captain Flinders, and so named on that account. It lies between *lon.* 127° and 140° E. (*See* FLINDERS, Captain.)

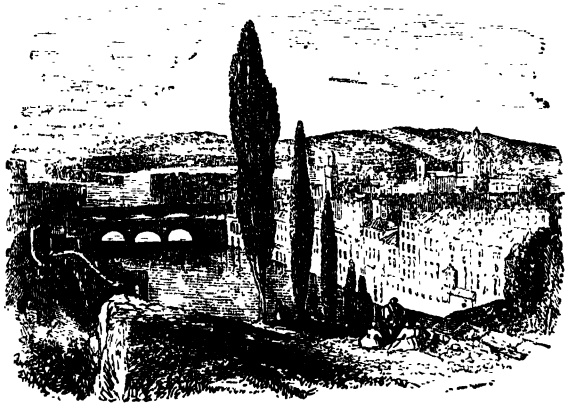
FLINT, a town of Wales, the capital of Flintshire,

FLINT CASTLE.

is situate on the estuary of the Dee, 13 miles from Chester. It is irregularly built, with a guildhall and county gaol. It has the remains of an ancient castle. *Pop.* 3,300.—It is on the walls of this castle that Shakspeare, in the 3rd act of his "Richard II.," makes the king appear, and grant all the demands of Bolingbroke, afterwards Henry IV., "without contradiction."

FLINTSHIRE, *flint'-sheer*, a county of N. Wales, bounded N. by the Irish Sea, N.E. by the estuary of the Dee, E. by Cheshire, S.E. and S.W. by Denbighshire. It is the smallest county in Wales. *Area*, 244 square miles. *Desc.* Finely diversified by hills, declining into fertile vales, which are traversed by streams. *Rivers.* The Dee is the only one navigable. There are, however, several others; and the celebrated vale of Clwyd occupies a portion of the county. *Pro.* Wheat and rye are the principal crops; and it has an excellent breed of cattle, which produce great quantities of milk, whence much butter and cheese are made. *Minerals.* Lead, copper, limestone, &c. The lead-mines are extensive and valuable. *Manf.* Cotton; but these may still be regarded as in their infancy. *Pop.* about 70,000.

FLODDEN, *flod'-den*, a village of Northumberland, 8 miles from Wooler. In its neighbourhood a sanguinary engagement was fought in 1513, between the English and Scotch. The former were commanded by the earl of Surrey, and the latter by James IV., who was slain, with 10,000 of his followers, amongst whom



were the flower of the Scotch nobility. A pillar of granite, called the King's Stone, commemorates the spot where the king fell.

FLOOD, Henry, *flud*, an Irish orator, was the son of the Right Hon. Warden Flood, chief justice of the King's Bench in Ireland. He received his education at Dublin and Oxford, and was, in 1752, created M.A. at the latter university. He entered the Irish parliament for the county of Kilkenny, and afterwards for the borough of Callan, where his eloquence acquired for him an uncommon popularity in his native country, which he lost when he obtained a seat in the British parliament. D. 1791.—Mr. Flood published a Pindaric ode to fame; and several of his speeches have been also printed. He bequeathed the bulk of his property, after the death of his wife, to the university of Dublin, for the purpose of founding a professorship, purchasing manuscripts and books, and for granting premiums.

FLORA, *flor'-a*, the goddess of flowers and gardens among the Romans, as Chloris was among the Greeks. She was worshipped among the Sabines, long before the foundation of Rome, and Tatius was the first who raised her a temple in the city of Rome. It is said that she married Zephyrus, and received from him the privileges of presiding over flowers, and of enjoying perpetual youth. She was represented as crowned with flowers, and holding in her hand the horn of plenty.—A celebrated courtesan, passionately loved by Pompey the Great.

FLORALIA, *flo-rai'-le-a*, games in honour of Flora at Rome. They were instituted about the age of Romulus, but not regularly celebrated until the year 580 U.C. They were observed yearly, and exhibited a scene of the most unbounded licentiousness.

FLORENCE (in Italian FIRENZE, and anciently FLORENTIA), *flor'-ence*, the capital of the recent grand-duchy of Tuscany, and one of the finest cities of Italy, and, indeed, of Europe, 145 miles from Rome. It stands in a beautiful valley intersected by the Arno, and occupies both sides of the river, which is crossed by several bridges, one of which, Della Trinità, is much admired for its airy lightness. It is also surrounded by walls and defended by two castles. The handsomest square is the Piazza del Duca, lined with elegant buildings, and adorned with statues. The number of churches and convents is about 250, and those of Santa Croce and Santa Maria Novella may be mentioned for the beauty of their architecture. Many of them contain valuable paintings and statues. The cathe-

FLORENCE.

dral is of great extent and magnificence, its walls being cased with marble, and its interior paved with the same material, arranged partly by Michael Angelo. The dome is much admired, also the adjoining tower, 266 feet in height. The church of St. Lorenzo contains the magnificent mausoleum of the Medicis; and, in the

adjoining convent, is the library of the same family, valuable chiefly for its MSS. There are nine theatres, capable of seating nearly 15,000 spectators, and many private edifices of great beauty, and rich in art treasures. The grand collection of works of art, however, is in the Medicean gallery, known throughout Europe as the Florentine gallery, and containing the richest collection of paintings, sculptures, and antiquities in the world. Among the educational establishments of Florence are the university, which dates from 1438, the Della Crusca academy, and the Magliabecchi library, containing an extensive collection of fine arts. In its internal regulations, Florence, like other cities of Italy, must, since the revolution of 1859, be regarded as in a transitionary state. This is especially the case in reference to her educational establishments. According to present appearances, she is to be the Athens, and Tuscany the Attica of Italy. Her ancient civilization, her pure dialect, her great literary and scientific achievements, and the very bent of her people's mind—everything seems to point out to Tuscany, the expediency of taking upon herself the task of schoolmistress for the rest of the Italian peninsula. *Manf.* Satin, taffetas, damask, straw hats, jewellery, and precious stones. *Pop.* 109,000. *Lat.* 43° 46′ 41″ N. *Lon.* 11° 15′ 55″ E.—Florence owes its origin to a colony of Roman soldiers, who, after the battle of Perugia, received a portion of territory in the neighbourhood of Fiesole. In the middle ages it was one of the greatest of the Tuscan republics, and, under the sway of Napoleon I., was united to the French empire as capital of the department Arno. It is the birthplace of many celebrated men; among whom may be named Petrarch, Boccaccio, Guicciardini, Lorenzo de' Medici, Michael Angelo, Galileo, Benvenuto, Cellini, and several others.

FLORENCE, or COMPARTIMENTO FLORENTINO, a province of Tuscany, inclosed by the Sardinian states, and by Modena, Parma, and Lucca. *Area*, including some detached portions, 3,500 square miles. *Desc.* Fertile, and finely diversified by mountains, valleys, and plains. On the N. and E. it is occupied by the Apennines and sub-Apennines, inclosed by which is the rich valley of the Arno, watered by the river from which it takes its name. *Pro.* Wheat, maize, beans, and every kind of leguminous crop. On the low grounds, the vine, orange, citron, fig, and olive become luxuriant, while the mountain-lands afford excellent pasture for the rearing of sheep. *Minerals.* Lead, copper, mercury, marble, alabaster, and fine building-stone. *Pop.* 672,000.

FLORENCE, the name of several places in the United States, none of them with a population above 3,000.

FLORENZ, ST., *flo'-rent*, a fortified seaport-town of Corsica, on the gulf of the same name, 6 miles from Bastia. *Pop.* 500. In 1793 it was taken by the British.

FLORES, *flor'-es*, an island of the Malay archipelago. *Ext.* 200 miles long, with an average breadth of 35. *Desc.* Hilly and volcanic, producing cotton, beeswax, and sandal-wood. *Pop.* Unascertained. *Lat.* 8° 50′ S. *Lon.* 119° 54′ E.

FLORES, one of the Azore Islands. *Ext.* 30 miles long, with a breadth of about 8. *Desc.* Mountainous, but fertile; producing wheat, rye, fruits, yams, and cedar-wood. *Manf.* Woollen cloths. *Pop.* about 10,000. *Lat.* 39° 30′ N. *Lon.* 31° 12′ W.

FLORES, an island in the estuary of La Plata, lying off the coast of Uruguay. *Lat.* 34° 56′ S. *Lon.* 55° 50′ W.

FLORES, an island of N. America, lying to the W. of Vancouver's Island, in the Pacific. *Ext.* 15 miles long, and from 2 to 6 broad. *Lat.* 49° 20′ N. *Lon.* 125° 45′ W.

FLORIAN, John Peter Claris de, *flor'-e-an*, a French writer, educated under Voltaire, who procured him the place of page to the duke de Penthièvre, whose friendship he obtained, and who gave him a captain's commission in his regiment of dragoons. He devoted himself, however, principally to letters, and produced a number of works, chiefly of the romantic kind. His first was "Galathée," published in 1782, which was followed by his "Théâtre," containing "Les Deux Billets," "Le Bon Ménage," "Le Bon Père," "La Bonne Mère," and "Le Bon Fils." His "Voltaire et le Serf du Mont Jura" gained him the prize given by the French Academy, of which society he became a member. His "Estelle" is reckoned equal to "Galathée;" and his "Numa Pompilius," "Gonzalvo de Cordova," and his "Fables," which rank next to those of La Fontaine, are also highly esteemed. For his "Numa" he was sent to prison during the reign of Robespierre. In his confinement he began a poem on the story of "William Tell," and finished another, entitled "Ebrahim." He gained his liberty after the fall of Robespierre, and died at Sceaux, 1794. B. in Languedoc, 1755.

FLORIAN, Marcus Antonius, half-brother of the emperor Tacitus, assumed the purple after the death of the latter, and caused himself to be acknowledged by the senate. Probus, however, having been proclaimed by the legions of the East, Florian marched against him; but experiencing a check in one of his first encounters, his soldiers killed him. He reigned but two months. D. 276.

FLORIDA, *flor'-e-da*, one of the United States, bounded N. by the state of Georgia, E. by the Atlantic, S. by the Gulf of Mexico, and W. by the Mississippi. *Ext.* Most of it consists of a peninsula, about 400 miles long and 130 broad, running N. and S., between the Atlantic Ocean and the Gulf of Mexico. *Area*, 57,000 square miles. *Desc.* It is divided into East and West. W. Florida is situate between the Mississippi on the W., and the Appalachicola on the E., and is a strip of land running along the Gulf of Mexico for 100 miles. E. Florida consists of a large peninsula, which runs southward, and a tract of land extending from the mouth of the St. Mary, westward to the river Appalachicola. It almost entirely consists of what are called *everglades*, or swamps, hardly passable to any but the Indians who inhabit the islands scattered among them. *Rivers.* The country is intersected by a number of navigable streams, which, in W. Florida, run from N. to S. into the Gulf of Mexico, and in E. Florida, either run into the gulf or into the Atlantic. The principal of these are Pearl River, the Pascagola, the Mobile, and its numerous branches; the Escambia and other streams, falling into the Bay of Pensacola; and the Appalachicola, with its tributary waters, serving as the boundary-line between E. and W. Florida. *Climate.* Hot, though various. In winter it seldom freezes, nor is the cold ever so severe as to injure the China orange-tree. In W. Florida the mercury seldom falls below 30° of Fahrenheit, and seldom rises above 94° in the shade. From the 1st of July to the middle of October, fevers are prevalent in both the Floridas. *Zoology.* The panther, wild cat, buffalo, fox, hare, goat, rabbit, otter, racoon, flying squirrel, armadillo, opossum, guana, and several sorts of serpents. Birds exist in great variety, and are numerous. The rivers abound in fish, but are, at the same time, infested with alligators. *Pro.* Cotton, coffee, rice, the sugar-cane, tobacco, the fruits of the tropical regions, a variety of different kinds of wood, and in W. Florida, wheat, maize, barley, oats, corn, pease, buck, rye, and rice. Vast herds of cattle are reared on the grazing-lands. *Pop.* 88,000, of whom 40,000 are slaves. *Lat.* between 25° and 31° N. *Lon.* between 80° and 87° 44′ W. Florida was discovered by Sebastian Cabot, in the year 1497. Its conquest was accomplished by the Spaniards in 1539. In 1763 it was ceded to Britain, but in 1781 was recovered by Spain, and confirmed to her by the peace of 1783. In 1821 it was purchased from Spain by the United States; in 1839 its constitution was formed, and in 1845 it was admitted into the Union.—A treaty, called the treaty of the Floridas, concluded in 1819, determined the limits of Mexico and the United States.

FLORIDA, CAPE, the E. point of East Florida, with a lighthouse in *lat.* 25° 44′ N., *lon.* 80° 37′ W.

FLORIDA, GULF OF, the channel between the peninsula of Florida and the Bahama islands, N. of Cuba island, and through which the gulf-stream finds a passage, running N.E. along the American coast.

FLORIDA KEYS, or MARTYR'S ISLANDS, a number of rocks and sand-banks, bounded W. by the Gulf of Mexico, E. by that of Florida. On one of the islets is the arsenal of Key-west, belonging to the United States. *Lat.* between 24° and 25° N. *Lon.* between 80° and 83° W.

FLORIS, Francis, *flor'-e*, a Flemish historical painter, surnamed the "Flemish Raphael." He was held in high estimation by Charles V. and Philip II. of Spain, and amassed a very large fortune. Amongst his best works are the "Twelve Labours of Hercules," and a "Last Judgment." B. at Antwerp, 1520; D. 1570.

FLORUS, Lucius Annæus, *flor'-us*, a Latin historian, of the same family as Seneca and Lucan. He wrote an "Abridgment of the Roman History," in four books, which is concise and elegant. Lived 116 A.D. The best editions of Florus are Duker's, 2 vols. 8vo, L. Bat. 1722; Grævius, Lips. 1760; and that of Fischer, 8vo, Lips. 1760.

FLOUR, St., *floor*, a town of France, in the department of the Cantal, 50 miles from Clermont. It has a public library, college, and a trade in corn. *Pop.* 2,500.

FLOYD, *floyd*, several counties in the United States. They lie in Virginia, Georgia, Kentucky, and Indiana.

FLUSHING, *flush'-ing*, an important seaport of the Netherlands, in the island of Walcheren, on the north side of the Scheldt, where that river disembogues itself into the North Sea. The approach to the harbour is between two jetties, which break the action of the sea. Inside the town are two basins, one of sufficient size and depth to contain a fleet of men-of-war. It has dockyards, a town-hall, and is the seat of an admiralty board. It has a large trade with the E. and W. Indies, and an extensive packet-boat communication. *Pop.* 8,000. *Lat.* 51° 24′ 24″ N. *Lon.* 3° 34′ 45″ E.—Flushing was the first town which, in 1572, declared against the Spaniards. In 1585, the Prince of Orange pledged it to Queen Elizabeth as a security for a loan, which she had made to the Netherlanders in their struggle against Philip II. of Spain. The English held it till 1616. At the commencement of the 19th century, it came into the possession of the French, and in 1809 was bombarded by the British under Lord Chatham, composing the Walcheren expedition, when it suffered severely. Admiral de Ruyter was born here, 1607.

FLUSHING, a small seaport opposite Falmouth, in the county of Cornwall, noted for the mildness of its climate. It has docks for shipbuilding.

FLUSHING, a township of New York, U.S., on Long Island, 9 miles from the city of New York. *Pop.* 6,000.

FLUVANNA, *floo-van'-na*, a county of Virginia, U.S. *Area*, 416 square miles. *Pop.* 10,000, of whom half are slaves.

FO, or FOE, the founder of a religious sect, which, in the empire of China, reckons a great number of followers, whose tenets appear to be much the same as those of Buddha. He reformed the religion of the Brahmins, denied the distinction of castes, and the superiority of any one class of men, and taught a doctrine, of which the fundamental precepts are, not to lie, to do to others as we would be done by, to kill no living creature, to abstain from wine, to avoid all impurity, and to believe in future rewards and punishments. His doctrines only began to be prevalent in China 200 years B.C. His priests are called Bonzes, and live in monasteries, travelling also considerably about the empire, and living, for the most part, on alms. B. at Benares, or in Cashmere, about 1027 B.C.

FOBBING, *fob'-bing*, a parish of Essex, near the Thames, 3 miles from Hordon-on-the-Hill, where Jack Cade's rebellion commenced. *Pop.* 500.

FOGARAS, *fo-gar'-as*, a town of Transylvania, 55 miles from Hermanstadt, with a Protestant gymnasium. *Pop.* 6,000.

FOGGIA, *fodg'-a*, a walled town of Naples, in the Capitanata, 40 miles from Benevento. It is well built, most of the houses being reconstructed since an earthquake, which happened in 1732. It has large storehouses for keeping corn, and is the place where the flocks that feed on the great plain of Apulia are registered. *Pop.* 25,000.

FOGO, FUEGO, or ST. PHILIP, *fo'-go*, one of the Cape de Verd Islands, in the Atlantic Ocean, higher than any of the rest, being 9,760 feet above the level of the sea, and appearing to be one single mountain, though, on the sides, there are deep valleys. *Area*, 40 miles in circumference. The island is without rivers, and almost without fresh water; yet it is fertile in maize, gourds, water-melons, wild figs, oranges, and apples. Indeed, it produces the best grain and fruit in the archipelago. *Pop.* Uncertain; perhaps 10,000. *Lat.* 14° 53′ N. *Lon.* 24° 30′ W.

FOHI, *fo'-he*, the first Chinese emperor and legislator. He is said to have founded this kingdom 2953 years B.C. Nothing certain is known of his reign; but there are attributed to him the institution of marriage, the invention of fishing, hunting, music, and writing. He acknowledged and worshipped a supreme deity. Lived about 3000 B.C.

FOHR, *for*, an island of Denmark, on the W. coast of Schleswig, in the North Sea. Part of the island belongs to Jutland, and part to Schleswig. *Area*, 25 square miles. *Pop.* 5,000. *Lat.* 54° 43′ N. *Lon.* 8° 30′ W.—It exports oysters largely to Hamburg.

FOIX, *fcaw*, a town of France, on the Ariége, and in the department of the same name, 44 miles from Toulouse. It has a trade in leather, wool, iron, and cattle. *Pop.* 5,000.—This was the capital of the old comté de Foix, part of the domain of Henry IV., and now forming the department of Ariége.—Gaston de Foix was born here.

FOIX, Gaston III., Count de, Viscount de Béarn, succeeded his father, Gaston II., at the age of 12, and rendered himself remarkable for his valour and magnificence. He is accused, however, of possessing a violent temper, and having caused the death of his own son. This young prince, unjustly suspected of having attempted to poison his father, was imprisoned by the orders of Gaston, at the instigation of Charles the Bad, and left to perish in his dungeon, of hunger. The life of Gaston was passed in continual wars. In 1345 he was fighting against the English; in 1356 in Prussia; two years afterwards on the side of the court, against the revolt of the Jacquerie; in 1372 against Count Armagnac; and, in 1375, against the duke de Berri. B. 1331; D. 1391. There are others of this family who rendered themselves famous in the history of France.

FO-KIEN, *fo'-keen*, a maritime province of China, bounded on the S.E. by the China Sea, and inclosed on its other sides by the provinces Che-kiang, Kiang-si, and Quang-tong. *Desc.* Mountainous, with the river Min running through it, and entering the sea below the capital city, Foo-chow-foo. *Pro.* Black tea, sugar, camphor, tobacco, and indigo. *Minerals.* Iron and alum. *Exp.* Tea, porcelain, umbrellas, and other kinds of manufactured goods. *Imp.* Grain, pulse, salted meats, drugs, fruits, and silk piece-goods. *Pop.* about 15,000,000. *Lat.* between 24° and 28° N. *Lon.* between 116° and 121° E.

FOLARD, Charles, *fo'-lar*, a French officer, who, in 1702, became aide-de-camp to M. de Vendôme, who undertook nothing without consulting him. For his services, he was rewarded with a pension and the cross of St. Louis. He was wounded at the battle of Cassano, and taken prisoner at that of Malplaquet. Being exchanged, he was sent to Malta, to assist in its defence against the Turks. He afterwards served under Charles XII. of Sweden, and was present at the siege of Frederickshall, when that prince was killed, December 11, 1718. He then returned to France, and served under the duke of Berwick. B. at Avignon, 1669; D. 1752.—He wrote "Commentaries upon Polybius," 6 vols. 4to; "A Book of New Discoveries in War," and "A Treatise on the Defence of Places."

FOLDVAR, *fold'-var*, a town of Hungary, on the Danube, 50 miles from Buda. It is pleasantly situate, partly on the side and partly on the crest of a hill, and was once strongly fortified. The district in which it stands is fruitful in corn and wine. *Pop.* 10,500.—It has an extensive sturgeon-fishery, and is a steam-packet station.

FOLKSHILL, *folks'-hill*, a parish of Warwickshire, 3 miles from Coventry. *Pop.* 8,000.

FOLEY, John Henry, A.R.A., *fo'-le*, an eminent sculptor, who, from Dublin, went to London, in 1834, and became a student in the Royal Academy. His first exhibitions were "Innocence" and "The Death of Abel;" both of which, in 1839, appeared on the walls of the academy, and attracted much attention. Next year appeared his "Ino and the Infant Bacchus,"

which further increased his fame; and from that time he may be said to have taken his place amongst the best sculptors of the day. Besides those works already named, he produced "Lear and Cordelia," "Venus rescuing Æneas," "Prospero narrating his Adventures to Miranda," and several others, displaying a rich faculty of invention, and truly classic taste in execution. He also produced many portraits and monumental memorials, which greatly helped to extend his reputation. In 1850 he was elected an associate of the Royal Academy. B. at Dublin, 1818.

FOLIGNO, *fo-leen'-yo*, a town of the Papal States, on the Topino, 10 miles from Spoleto. It has a cathedral and other churches, with the Palazzo Communale. *Manf.* Woollens, parchment, wax candles, soap, and playing-cards. *Pop.* 9,000.

FOLKES, Martin, *fokes*, an English philosopher and antiquary, who, after receiving a private education, was sent to Clare Hall, Cambridge. At the age of twenty-three he was chosen a fellow of the Royal Society, and in 1723 was nominated one of the vice-presidents. In 1741 he succeeded Sir Hans Sloane as president of that learned body, and was, about the same time, elected a member of the Royal Academy of Sciences at Paris. He was also created doctor of laws by both universities. B. at Westminster, 1690; D. in London, 1754.—Mr. Folkes wrote, besides a number of papers in the Philosophical Transactions, "A Table of English Silver Coins, from the Norman Conquest to 1745." A second edition of this work appeared in 1763.

FOLKSTONE, or FOLKESTONE, *foke'-stone*, a seaport town of Kent, with a spacious harbour and battery, 6 miles from Dover, of which cinque port it is a member. It consists of three narrow, irregular, ill-paved streets. Besides the parish church, it contains several places of worship for dissenters. *Pop.* 7,800.—This place is situate between two high cliffs, opposite Boulogne, with which it is connected by a line of steam-packets, and carries on a considerable trade. A viaduct carries the South-Eastern line of railway across the hollow in which the town lies.

FOLLONICA, *fol-lo-ne'-ka*, a maritime village of Tuscany, on the Mediterranean, 12 miles from Piombino. It is an unhealthy place, and, on account of its malaria, is almost entirely deserted from July to October. It is to it, however, that the ore raised in the island of Elba is brought to be smelted during the other eight months in the year.

FONBLANQUE, Albany W., *fon'-blank*, was brought up to the legal profession, but was never called to the bar. He early began to direct his attention to political questions, and, on Leigh Hunt and his brother parting with the *Examiner* newspaper, it passed into the proprietorship of Mr. Fonblanque. In the columns of this journal his talents have been fully recognized. In 1837 he published a selection of his papers from the *Examiner*, and entitled them "England under Seven Administrations," which were much admired. In 1852 he was appointed director of the statistical department of the Board of Trade, when his superintendence of the *Examiner* may be considered to have virtually ceased. B. 1797.—His son, Albany Fonblanque, jun., has also written in the magazines and periodicals of the day.

FONDI, *fon'-de*, a town of Naples, 14 miles from Gaeta. It consists of only one street, and is built on the Via Appia, which remains here in its original state, and consists of large flags, skilfully fitted together without cement. The wines of Fondi are still in repute. *Pop.* 6,000.

FONG, *fong*, the name of numerous cities in China, and forming a prefix to the denominations of others.

FONS SOLIS, *fons so'-lis*, a fountain in the province of Cyrene, cool at mid-day and warm at the rising and setting of the sun.

FONTAINE, John de la, *fon'-tain*, a French poet, who was educated first at Rheims, and afterwards under the fathers of the Oratory. He was a man of great simplicity of manners, credulous, fearful, and uncommonly absent. He lived for some time with the superintendent Fouquet, who allowed him a pension. Afterwards he was in the service of Princess Henrietta of England, and next lived with Madame de la Sablière. As an illustration of the laziness of his disposition, that lady on one occasion, having parted with her servants, said, "I have got rid of all my animals except three—my cat, my dog, and La Fontaine." He was married, but his wife had as little knowledge of the management of a household as himself. He wrote some licentious tales, which are little read; but his fables are very generally put into the hands of young people. They are natural, poetical, and entertaining. He also wrote "Les Amours de Psyché," a romance, some comedies, letters, &c., to be found in his miscellanies. B. at Château Thierry, 1621; D. 1695.—In his later years, La Fontaine inclined seriously towards religion, and many of his more unworthy works, he, at the instance of his confessor, suppressed. As a fable-writer he is unsurpassed; and his writings in this path are remarkable for their great simplicity and exquisite beauty.

FONTAINE, Pierre François Leonard, an architect, who has been called the father of the modern French school, early began the study of his art, and, in 1785, carried away the second prize for architecture. He now became a pensioner of the academy, to be maintained at Rome, and, having presented drawings of the "imperial city," as it was in the time of the Cæsars, he received an extraordinary prize of 3,000 francs. After the Revolution, and the elevation of Napoleon I. to the consulate, he and Percier, a brother architect, were employed to restore Malmaison. Under the imperial rule, he was further employed to restore all the palaces and complete the Louvre and the Tuileries, which, with numerous other works, occupied him and Percier throughout the whole of the rule of Napoleon I. On the fall of the empire, he was named architect to Louis XVIII., which place he held till 1848. He next became president of the Council of the Civil Buildings, and by his vast experience was thus enabled still to direct some of the works of France. B. at Pontoise, in the department of the Seine-et-Oise, 1762; D. in Paris, 1853.

FONTAINEBLEAU, *fon'-tain-blo*, a town and parish of France, in the department of Seine-et-Marne, 35 miles from Paris. *Pop.* 10,500.—Here is a celebrated royal palace, encompassed by parks and gardens, mentioned in history, ever since the 13th century, as the residence of the monarchs of France. It forms a vast but irregular pile of building, and was the scene of Bonaparte's first resignation of the imperial dignity in 1814; as it was also the place where Pope Pius VII. was detained for eighteen months. It is a station on the railway between Paris and Lyons.

FONTANA, Domenico, *fon-ta'-na*, an eminent architect and mechanic, who raised the Roman obelisk from the dust in the front of St. Peter's, a work deemed impracticable, and which many others had attempted in vain. B. at Milan, 1543; D. at Naples, 1607.

FONTANA, Prospero, an historical painter, who was preceptor to Ludovico and Hannibal Caracci. B. at Bologna, 1512; D. at Rome, 1597. His daughter Lavinia was also an excellent painter of portraits, and was patronized by Pope Gregory XIII. D. 1602.

FONTANA, the name of several towns of Italy, none of them with a population above 2,300.

FONTARABIA, *fon-ta-ra'-be-a*, anciently *Ocaso*, a strong town of Spain, in the province of Guipuscoa, 11 miles from San Sebastian. It is one of the keys of the kingdom, and is situate on a small peninsula on the left bank of the Bidassoa, in the Bay of Biscay. *Pop.* 2,100.—It has been frequently besieged; on one occasion, in 1521, by Francis I. of France, and in 1719 by the duke of Berwick; both of whom took it.

FONTE MODERATA, *fon'-tai*, a Venetian lady, who wrote two poems; one entitled "Il Floridoro," the other on the "Passion and Resurrection of Jesus Christ." She also produced a work in prose, in which she asserts that women are not inferior in understanding to men. B. at Venice, 1555; D. 1592.

FONTENAY LE COMTE, *fon'-te-nai-le(r) konte*, a town of France, in the department of La Vendée, 28 miles from Rochelle. It has a church, with a spire 312 feet high, a college, and a barracks. *Manf.* Linen and woollen cloths. *Pop.* 8,000.—Fontenay is the name of a great many places in France, with small populations.

FONTENAY, Therese de Cabarras, Marquise de, *fon'-te-nai*, a Spanish lady, who became first the wife of

M. Devin, marquis of Fontenay, a councillor in Paris, and afterwards the wife of Lallieu. She subsequently separated from Lallieu, and became the wife of prince de Chimay, notwithstanding that her first husband was still alive. The Church, however, refused to ratify her marriage, and she continued to struggle against the feelings of society, in a vain endeavour to be received into it, until 1816, when she retired to a private retreat, where she passed the remainder of her days in tranquillity. She was very beautiful, and extremely engaging by her great wit. B. at Saragossa, Spain, 1773; D. at Chmiz, 1835.

Fontenelle, Bernard le Bovier de, *fon'-te-nel*, a celebrated French writer, whose father was a counsellor of Rouen. Young Fontenelle was also bred to the legal profession, which, however, he abandoned for literature. His first efforts were directed to the stage, and although they were directed by his uncle Thomas Corneille, he did not succeed. In 1683 he published his "Dialogues of the Dead," which were well received. His conversations on the "Plurality of Worlds," which appeared in 1686, further added to his reputation; and the year following he published the "History of Oracles," taken chiefly from Van Dale. In 1688 he printed pastorals, which also became popular. He was admitted a member of the French Academy in 1691, and, in 1697, of the Academy of Sciences. He subsequently became secretary of the latter, and filled that office with honour from 1699 to 1737. In this capacity he wrote a history of the academy, and distinguished himself by the excellent eulogies which he composed upon its deceased members. B. at Rouen, 1657; D. at Paris, 1757.—Besides the above works, he wrote a "History of the French Theatre," "Elements of the Geometry of Infinites," "Moral Discourses," &c. Fontenelle is said, by some critics, to have been especially distinguished for the clearness and simplicity of his style, and to have possessed, in an eminent degree, the power of making scientific matters intelligible to all readers. As a man of the world, he shone by the sharpness of his wit and the smartness of his repartees; although he was also remarkable for his moderation and reserve in an age when there was not much of these qualities. He would say, "If I had my hands full of truths, I should take care how I opened them." He has been severely criticised, however, by some writers. Arsène Houssaye, in his sparkling work on the "Men and Women of the Eighteenth Century," says of him that "he always wanted a compliment; a slave to his vanity, he made himself the slave to the first comer. The roof which sheltered him in this world, was never other than the roof of hospitality; he passed his days here and there; with Thomas Corneille, with M. le Huguais with M. Aube (you know him—that M. Aube celebrated by Rulhières). Again, he always dined out—with Madame de Tencin, with Madame d'Épinais, with Madame de Lambert, with Madame d'Argenton; in fine, every where except at home. This style of living could not fail of being economical. He, therefore, although a poet without patrimony, died with an income of 35,000 livres (he belonged to all the paying academies), without speaking of 75,000 livres in ringing coins, which, when about 87, he had concealed in his mattress, doubtless to repose upon in the other world. Let no one say now, that all poets are improvident—but Fontenelle was not a poet. Now I repeat, that whilst he was thus hiding away his money, his cousin, the nephew of the great Corneille,—the nephew of his mother,—was begging at a neighbouring door. Besides, were there not twenty other unfortunates to succour at that time in the great family of men of letters, whence he had issued so rich and glorious? Malfilâtre dying of hunger! And so many other hidden miseries, which the eye of charity always discovers; so many other souls that were breaking their wings against the corners of some confined room, or the rafters of a garret. Oh! Monsieur de Fontenelle, you would have been pardoned for much prose, and many a verse, for some open-handed charity." On seeing his hearse pass, Piron exclaimed "This is the first time that M. de Fontenelle has left home not to go and dine in the city."

Fontenoy, *fon'-te-noi*, a village of Belgium, in Hainault, 4 miles from Tournay. *Pop.* 500.—It is

celebrated for a battle fought near it in 1745, in which the British and their allies were defeated by the French, who were commanded by Marshal Saxe.

Foote, Samuel, *foot*, an English dramatic writer and actor, whose father was justice of peace for the county of Cornwall, and whose mother was sister to Sir John Dinely Goodere, of Herefordshire. Foote was educated at Worcester College, Oxford, whence he removed to the Temple, for the purpose of pursuing the law; but this he quitted for the attractions of the stage. His first performance was in the character of "Othello." In 1747 he opened the "little theatre in the Haymarket," with a dramatic piece of his own, called "The Diversions of the Morning," which had a great success, and which was a representation of real characters, whose very voice, gait, and gestures were strikingly imitated. His next piece was called "An Auction of Pictures," in which he represented some of the most noted individuals of the day. He still continued to play at one or other of the theatres, and frequently produced new pieces. In 1760 he brought out the "Minor" at his own house in the Haymarket; but, in 1766, had the misfortune to break his leg, which was obliged to be amputated. The duke of York, out of compassion, now procured for him a patent for life for the theatre in the Haymarket. In 1776 he attacked the duchess of Kingston in a piece, which was suppressed by authority. Soon after this, a charge was brought against him, which broke his heart, although he was honourably acquitted by the jury. B. at Truro, Cornwall, 1722; D. at Dover, on his way to France, 1777. His remains were interred in Westminster Abbey.—Foote had an infinite fund of comic humour, both in writing and conversation; but he took unwarrantable liberties in mimicking persons merely on account of natural failings and peculiarities of manner. His farces have procured him the title of the English Aristophanes. Dr. Johnson said, that for loud, obstreperous, broad-faced mirth, he had no equal.

Forbes, William, *forbs*, the first bishop of Edinburgh. After studying at several universities, he went to England, where he was offered the Hebrew professorship at Oxford, which he declined. When Charles I., in 1634, erected Edinburgh into an episcopal see, he appointed Dr. Forbes to fill it; but the bishop enjoyed this dignity only three months. B. at Aberdeen, 1585; D. 1634.—He wrote "Considerationes modestæ et pacificæ Controversiarum de Justificatione, &c." 8vo, reprinted by Fabricius, at Frankfort, in 1707.

Forbes, Duncan, an eminent Scotch judge, and an excellent writer, who was educated first at Edinburgh, and afterwards at Utrecht, Leyden, and Paris. In 1708 he began to practise as an advocate at the Scotch bar, and gained considerable reputation. In 1717 he was appointed solicitor-general of Scotland, in 1725 lord advocate, and, in 1737, president of the Court of Session. In the rebellion of 1745 he zealously opposed the Pretender; but the ingratitude with which he was treated by the government, who even refused to reimburse some expenses which he had incurred, preyed upon his mind and brought on a fever, of which he died, 1747. B. at Culloden, 1685.—His lordship was a man of great piety and learning, and well versed in the Hebrew scriptures, as appears from his "Letter to a Bishop on Hutchinson's Writings and Discoveries," in 1732; "Thoughts concerning Religion, Natural and Revealed," 1735; and "Reflections on Incredulity;" the whole collected into one volume, 12mo, 1750. As a man, Forbes is highly spoken of. "I knew and venerated him," says Bishop Warburton, "one of the greatest men that ever Scotland bred, both as a judge, a patriot, and a Christian."

Forbes, Edward, an eminent naturalist, who from a child was a collector; so that by the time he was seven years of age, he was possessed of a museum of natural curiosities. For some time he was connected with the studio of the late Mr. Sass, in London, but, in 1832, went to the university of Edinburgh, where, under the instructions of Professors Jameson and Graham, he first became acquainted with the true principles of natural science. After being here some time, he made an excursion into Norway, and afterwards published his observations on the plants, rocks,

and mollusca of that country, in a volume entitled "Notes of a Natural-History Tour in Norway." He now became a contributor to the "Magazine of Natural History," whilst pursuing his studies both in zoology and botany. In 1836 he was chiefly instrumental in establishing the Edinburgh Botanical Society, to which he became the foreign secretary. In 1837 he visited the shores of Algiers and the Mediterranean, and the next year published his "Mollusca of the Isle of Man," and, in 1839, a paper on the "Mollusca of Algiers," and another on the "Distribution of the Pulmonifera of Europe." In 1841 appeared his "History of Star-Fishes," and in the same year he was appointed naturalist to her majesty's ship *Beacon*, commissioned to transport from Lycia the marbles discovered by Sir Charles Fellowes. In this voyage he discovered the great law, that among marine animals, zones of depth correspond to parallels of latitude. He subsequently became professor of botany in King's College, London, and, in 1844, became assistant secretary to the Zoological Society. He next became palæontologist to the Geological Society of Britain, and professor of natural history in the School of Sciences, in Jermyn Street. In 1854 he was elected president of the Geological Society, and also professor of natural history in the university of Edinburgh. This was the highest object of his ambition, which, however, he seemed only to have attained to die. B. in the Isle of Man, 1815; D. at Edinburgh, 1854.

Forbes, James, an Englishman engaged in the civil service of the East-India Company. He is noticed here on account of his work entitled "Oriental Memoirs, selected and abridged from a series of Familiar Letters, written during seventeen years' residence in India," published in 1813. This work is illustrated by coloured plates of animals and plants, executed with great spirit and beauty. Mr. Forbes was made a fellow of the Royal and Antiquarian societies. B. in London, 1749; D. 1819.

Forbes, Sir John, a distinguished Scotch physician, who graduated at Edinburgh in 1817. After practising some time as a physician at Penzance and Chichester, he settled in London, where his translation of the works of Avenbrugger and Laennec, on the use of the stethescope, first brought him prominently into notice among the medical profession. In 1828 he published a work on the "Climate of Penzance," and was one of the original founders of the present British Medical Association. It is to be regretted that this association, which had for its principal object the obtaining of authentic information regarding the medical topography of England, has not been so successful in its object as might have been expected. Subsequently, Sir John became one of the editors of the "Cyclopædia of Practical Medicine," to which he contributed largely himself. He also became the editor of the "British and Foreign Medical Review," afterwards designated the "British and Foreign Medico-Chirurgical Review." In this capacity he laboured to spread sound views upon all medical subjects; and by exercising an independent judgment himself, he endeavoured to induce others to do the same; so that, by the accumulation of many different views upon any speculative point, a sound opinion might be arrived at. Whilst thus actively engaged, he was appointed physician in ordinary to her majesty's household, and physician extraordinary to his royal highness Prince Albert. For his labours in medical science, the University of Oxford conferred upon him the degree of doctor of laws, and he is a fellow of the Royal Society. In every enterprise which has had for its object the education of the people, or the dissemination of sound knowledge of every kind, he has taken an active part, and was one of the members of the committee of the Society for the Diffusion of Useful Knowledge. In 1849 he published "A Physician's Holiday; or, a Month in Switzerland;" in 1852, "Memoranda of a Tour in Ireland;" and in 1855, "Sight-seeing in Germany and the Tyrol." All these works are marked by shrewd sense, coupled with a fine taste for the descriptive and picturesque. B. in Scotland, 1817.

Forbin, Claude, Chevalier de, *for'-bii*, a French naval commander, who served in the East Indies, and was with Admiral Duquesne at the bombardment of Algiers. He was also admiral to the king of Siam for two years, and greatly distinguished himself afterwards in Europe, in connection with Jean Bart, rising into favour with Louis XIV. B. 1656; D. 1733.—His "Memoirs" were published in 1749, in 2 vols. 12mo.

Force, James, Duke de la, *force*, son of Francis, lord de la Force. He was a child, in bed with his father and elder brother, when these latter were murdered in the massacre of St. Bartholomew; but being unperceived by the assassins, he escaped. He signalized himself under Henry IV., and afterwards joined the Protestants against Louis XIII. Subsequently, he made his submission to the king, and was appointed marshal of France, lieutenant-general of the army, and created a duke. He took Pignerol, and defeated the Spaniards at Carignan in 1630. D. 1652.

Ford, John, *ford*, an eminent English dramatic poet, of whom very little is known, but that, in 1602, he became a member of the Middle Temple, and adhered to his profession of the law. In his 18th year, he published a poem entitled "Fame's Memorial;" but there is little in the effusion to indicate the high talent which he afterwards displayed in dramatic poetry. Subsequently, he commenced writing for the stage, for which he wrote, either wholly or in conjunction with others, upwards of sixteen plays. In Charles Lamb's "Specimens of English Dramatic Poets," the following excellent criticism appears, relative to this author: "Ford was of the first order of poets. He sought for sublimity, not by parcels, in metaphors or visible images, but directly where she has her full residence,—in the heart of man, in the actions and sufferings of the greatest minds. There is a grandeur of the soul, above mountains, seas, and the elements." Gifford also says, "I know few things more difficult to account for than the deep and lasting impression made by the more tragic portions of Ford's poetry." Others, however, are not so lavish of their praises upon his works. B. at Islington, Devonshire, 1586. Of his death nothing is known. It is supposed, however, that, about 1640, he retired to his native place, and there ended his days.

Ford, Richard, an English writer and traveller, who, having graduated at Trinity College, Oxford, was called to the bar in Lincoln's Inn, but did not practise. In 1830 he visited Spain, where he resided for some time at the Alhambra, and, on his return, took up his residence in Devonshire, and became a contributor to the "Quarterly Review." In 1845 he published "The Handbook of Spain," which was highly commended. In 1846 appeared his "Gatherings from Spain," which was, on its appearance, pronounced "the best English book, beyond comparison, that has ever appeared for the illustration, not merely of the general topography and local curiosities, but of the national character and manners of Spain." In 1852 "Tauromachia; the Bull-fights of Spain;" 26 superb drawings by Luke Price, with descriptions by R. Ford, were given to the public; but the work is rather pictorial than literary, and is certainly splendid of its kind. B. in London, 1796; D. 1858.

Ford, the name of several parishes in England, none of them with a population above 2,300.

Fordham, *ford'-hum*, the name of several parishes of England, none of them with a population above 2,400.

Fordun, John de, *for'-dun*, a Scotch historian, and priest in the church of Fordun, who wrote a history of Scotland, which was printed by Hearne at Oxford, in 5 vols. 8vo, and by Goodal at Edinburgh, in 1 vol. folio. Camden, speaking of Fordun's history, says "that all the Scots historians who have wrote since Fordun's time have been very much beholden to his diligence; and yet there are very material differences betwixt his account of several things and theirs." Lived in the 14th century.

Fordyce, *for'-dice*, a maritime parish of Banffshire, 10 miles from Banff. *Pop.* 4,000.

Fordyce, David, an ingenious Scottish writer, who was educated at the University of Aberdeen, and became professor of moral philosophy in the Marischal College there. Though licensed as a preacher, he never became a stated minister. In 1750 he

made a tour to Italy, and on his return, the following year, was drowned on the coast of Holland. B. at Aberdeen, 1711.—He wrote "Dialogues concerning Education," 2 vols. 8vo; the "Elements of Moral Philosophy," which first appeared in Dodsley's "Preceptor;" "Theodorus, a Dialogue concerning the Art of Preaching;" the "Temple of Virtue, a Dream." His "Dialogues of Education" have considerable merit, written in some degree after the style of Shaftesbury, but without being tainted with the sophistries of that writer.

FORDYCE, George, an eminent Scotch physician, educated at the university of Aberdeen, where he obtained the degree of M.A. at the age of 14. In 1759 he settled in London, commencing lecturing on the materia medica and practice of physic, in which he acquired an unrivalled reputation. In 1770 he was chosen physician to St. Thomas's Hospital, and, in 1776, a fellow of the Royal Society. In 1787 he was elected, *speciali gratid*, a fellow of the College of Physicians, a very unusual distinction. B. near Aberdeen, 1736; D. 1802.—Dr. Fordyce is known by his "Essays on Fever," an "Essay on Digestion," "Elements of the Practice of Physic," and miscellaneous papers. He was also an excellent experimental chemist, and published "Elements of Agriculture and Vegetation." This work has always been esteemed as a very scientific treatise.

FORDYCE, James, an eminent Scotch divine, who was educated at the university of Aberdeen, and who first settled as a minister at Brechin, and afterwards at Alloa. While here, he distinguished himself by some elegant pulpit compositions, particularly one preached before the General Assembly of the Church of Scotland, on the folly, infamy, and misery of unlawful pleasures, for which the university of Glasgow conferred on him the degree of D.D. About 1762 he removed to London, where he became assistant to Dr. Lawrence, of Monkwell Street, and afterwards his successor. Here he drew crowded audiences by his eloquence and the beauty of his sermons. In 1782 he resigned his situation, and went to live first in Hampshire, and next at Bath, where he died in 1796. B. at Aberdeen, 1720. —He published a "Sermon on the Eloquence of the Pulpit," printed with his brother's "Theodorus;" "Sermons to Young Women," 2 vols. 12mo; "Addresses to Young Men," 2 vols.; "Addresses to the Deity;" a volume of poems, and single sermons.

FORELAND, NORTH, *for'-land*, a promontory of England, forming the N.E. extremity of Kent. Here is a lighthouse above 184 feet high. Height of promontory, nearly 200 feet. *Lat.* 51° 25′ N. *Lon.* 1° 27′ E.

FORELAND, SOUTH, a cape of England, on the east coast of Kent, between Dover and Deal, and 16 miles from the North Foreland, the Downs lying between. It has two lighthouses with fixed lights, to warn ships coming from the south of their nearing the Goodwin Sands. *Lat.* 51° 12′ N. *Lon.* 1° 25′ E.

FOREST, BLACK. (*See* BLACK FOREST.)

FOREST CANTONS, in Switzerland, are the cantons of Lucerne, Schwytz, Unterwalden, and Uri, in the centre of which is the Lake of Lucerne.

FORFAR, the chief town of Forfarshire, situate in the vale of Strathmore, near a small lake, 15 miles from Dundee. It is irregularly built, and has a spacious church, with a steeple 150 feet high; besides various other places of worship; a town-house, market-place, and several public schools. *Manf.* Brown linens, to a very considerable extent, and a kind of shoes, called brogues. *Pop.* 11,100. By railway it has communication with Arbroath, Dundee, Perth, and Montrose.

FORFARSHIRE, or ANGUS, *for'-far-sheer*, a county of Scotland, bounded N. by the counties of Aberdeen and Kincardine, E. by the German Ocean, S. by the Firth of Tay, and W. by the county of Perth. *Area*, 892 square miles. *Desc.* Irregular and mountainous, being traversed by the Grampians, which rise to the height of 3,000 feet; and also by the Sidlaw Hills. Numerous valleys are interspersed throughout the mountains, the most noted of which is that of Strathmore, which extends far beyond the boundaries of the county, and is equally distinguished by its fertility as its romantic beauty. *Rivers.* The North and South Esk, the Isla, and the smaller streams of the Dean, Lunan, Dighty, and Noran. *Pro.* The usual cerealia. Agriculture is making rapid progress, and the fisheries are conducted with considerable activity, both on the coast and in rivers: considerable quantities of salmon are exported to London, packed in large wooden boxes, with pounded ice to preserve them. *Minerals.* Inexhaustible beds of limestone, veins of porphyry, large quantities of jasper of different colours, from bright yellow to deep red, susceptible of the highest polish; and all varieties of pebbles. It is said that the real topaz is found here; coloured crystals, called cairngorms, commonly five-sided prisms, and terminating in a pyramid of the same description, are a common object of search among the inhabitants, and are frequently found. *Manf.* Linens; this county being the principal seat of the coarser kinds of that manufacture in Scotland. Bleaching and spinning are extensively prosecuted; also tanning, brewing, leather and rope-making, and shipbuilding. Several vessels are engaged in the whale-fishery. *Pop.* 192,000.

FORIO, *for'-e-o*, a seaport-town of Naples, in the island of Ischia, 4 miles from Ischia. *Pop.* 7,000.

FORLI, *for'-le*, a walled town of Italy, in the Ecclesiastical States, 14 miles from Ravenna. It has several good edifices, public and private, and a very fine square, and is the seat of a cardinal legate, and a court of justice. *Manf.* Silk ribands, twist, woollens, and oil-cloth. It has, besides, nitre, wax, and sulphur-works. *Pop.* 16,500.—In 1797 this place was taken by the French. In 1831, Charles Napoleon Louis Bonaparte, elder brother of Napoleon III., died here, in arms against the pope.—The PROVINCE of Forli has an *area* of 900 square miles, and produces corn, hemp, flax, saffron, madder, and fruits. The silkworm is also extensively reared.

FORLIMPOPOLI, *for'-lerm-po'-po-le*, a town of Italy, in the Papal States, between Forli and Cesena. *Pop.* 5,000.

FORMEY, John Henry Samuel, *for'-me*, a Prussian writer, who was for some years pastor of a French church in Berlin, where he became professor of philosophy in the French college. On the restoration of the Royal Academy of Sciences at Berlin, he was appointed secretary to the philosophical department, and afterwards sole secretary. He was also made a privy councillor. B. at Berlin, 1711; D. there, 1797.—Formey conducted, in conjunction with Beausobre, the "Bibliothèque Germanique." He also wrote "Le Philosophe Chrétien," "Pensées Raisonnables," "Anti-Émile," against Rousseau; the "History of Philosophy abridged," an "Abridgment of Ecclesiastical History" (these two have been translated into English), "Researches on the Elements of Matter," "Considerations on the Tusculans of Cicero," &c.

FORMICHE, *for'-me-khai*, the name of several small island groups in the Mediterranean Sea.

FORMIGNO, RIO, *for-meen'-yo*, a village of France, 12 miles from Bayeux, where, in 1450, a battle was fought between the French and English, who were defeated, and thereby forced to abandon Normandy.

FORMOSA, RIO, *for-mo'-sa*, the principal of that succession of large estuaries which open into the Gulf of Benin, 4 miles wide at the mouth. *Lat.* 5° 40′ N. *Lon.* 4° 20′ E.

FORMOSA, one of the Bissagos Islands, in W. Africa. *Lat.* 11° 30′ N. *Lon.* 16° 10′ W.

FORMOSA, an island in the China Sea, 90 miles E. of Canton, and separated from the Chinese coast by a channel of the same name. *Area*, 15,000 square miles. *Desc.* A chain of mountains, running its whole length, divides it into two parts, the E. and W., separating the wild Formosans in the east from the Chinese colonists in the west. It contains extensive and fertile plains, watered by a great number of rivulets from the mountains. *Pro.* Corn and rice, most of the Indian fruits, many of those of Europe, tobacco, sugar, pepper, camphor, and cinnamon. Wholesome water is the only thing wanting in Formosa; and it is said that every kind of water in it is pernicious to strangers. The inhabitants rear a great number of oxen, which they use for riding, from a want of horses. They accustom them early to this kind of service, and, by daily exercise, train them to go as well as horses. *Minerals.* Gold, silver, copper, and cinnabar. Coal-fields have recently been discovered; but they have not been worked. *Exp.*

Principally camphor and rice. *Imp.* Silks, woollens, tea, and other manufactured goods. *Pop.* 2,000,000 Chinese; but there is another race in the interior, of whom little is known. *Lat.* between 22° and 25° 30′ N. *Lon.* 121° E.—The Dutch built the fort of Zealand, in the W. part of this island, in 1634. They were driven thence in 1661, by a Chinese pirate, who made himself master of all the W. part. In 1682 the whole island submitted to the emperor of China. In 1782 it was entirely overwhelmed, and almost totally destroyed, by a furious hurricane and inundation of the sea. Taiouang is the capital.

FORMOSUS, *for-mo'-sus*, bishop of Porto, in Italy, succeeded Pope Stephen V. in 891. He condemned Photius, excommunicated the emperor Lambert, duke of Spoleto, and nominated in his place, Arnoul, king of Germania. D. 896.—The fiery Stephen VI., his successor, had his body disinterred, in order to put him on his trial. He was restored to his grave in 898, under John IX.

FORNAX, *for'-nax*, a goddess at Rome, who presided over the baking of bread. Her festivals, called Fornacalia, were first instituted by Numa.

FORRES, *for'-res*, a town and parish of Scotland, in Morayshire, 10 miles from Elgin. The town extends about a mile in length. *Pop.* 3,540.

FORSKAL, Peter, *for'-skal*, a Swedish naturalist, who studied at Gottingen, and afterwards at Upsal, where he became a pupil of Linnæus. In 1761 he went, at the request of the king of Denmark, with Niebuhr and others, to Arabia, to make discoveries, but died at Jerim, in that country, in 1763. B. 1736.—He printed a tract, entitled "Thoughts on Civil Liberty;" and from his papers, Niebuhr published "Descriptiones Animalium in itinere orientali," 4to; "Flora Ægyptiaco-Arabica," 4to; "Icones Rerum Naturalium quas in itinere orientali depingi curavit Forskal," 4to.

FORSTER, John Reinhold, *fors'-ter*, a celebrated German naturalist, who, in 1748, entered the university of Halle, where he studied divinity, and thence went to Russia, in expectation of considerable preferment; but being disappointed, proceeded to England, where, for some time, he taught the French and German languages at Warrington. In 1772 he accompanied Captain Cook on his voyage round the world. On his return to England, in 1775, he was honoured by the university of Oxford with the degree of LL.D. Having published, contrary to the engagement entered into with government, a botanical account of plants discovered in this voyage, he was treated with such coolness, that he quitted England and went to Halle, where he was made professor of natural history. B. in Prussia, 1729; D. at Halle, 1798.—He was the author of "Observations made in a Voyage round the World," "History of Voyages and Discoveries in the North," "On the Byssus of the Ancients," several Papers in the "Philosophical Transactions," &c.

FORSTER, George, son of the above, accompanied his father in his voyage round the world. After his return, he became professor of natural history at Cassel, whence he removed to Wilna, in Poland, and next to Mentz, where he was appointed president of the university. He was nominated by the people of Mentz their representative at Paris, in the beginning of the Revolution. B. at Dantzic, 1754; D. 1792.—He wrote, "A Voyage Round the World," 2 vols. 4to; a Defence of the same against Mr. Wales, 4to; "A Philosophical and Picturesque Journey along the Banks of the Rhine," 2 vols. 8vo; and "A Journey through England."

FORSTER, John, a modern English writer, was bred to the bar, but, by his devotion to literature, became an eminent author and journalist. For twenty-four years he was a constant contributor to the columns of the "Examiner," and for twelve of that period he had the sole charge of its editorial department. He was also a contributor to the "Edinburgh Review," the "Foreign Quarterly," and other serials, and for a short time acted as editor of the "Daily News," after the retirement of Mr. Dickens. He is, however, best known by his works, entitled "The Statesmen of the Commonwealth of England," and "The Life and Adventures of Oliver Goldsmith." The former was republished in the "Cabinet Cyclopædia" of Dr. Lardner, and the latter has been much admired. He also wrote the lives of Daniel De Foe and Churchill, and in 1858 published "Historical and Biographical Essays," principally composed of articles originally contributed to quarterly reviews, with new matter added thereto. B. at Newcastle, 1812.

FORT (LE), Francis, *for*, a soldier and statesman in the service of Peter the Great, who intrusted him with the siege of Azov, where he showed so much bravery, that the emperor made him his first minister of state, and commander of all his forces. Le Fort was intimately connected with Peter's reforms, accompanied him in his travels, and aided him effectually in civilizing his subjects, and organizing an army, navy, and the finances. B. at Geneva, 1656; D. at Moscow, 1699.—When the czar received the news of his death, he exclaimed, "Alas, I have lost the best of my friends!"

FORT, *fort*, a prefix to the names of several military stations in Britain. 1. AUGUSTUS, a fortress of Scotland, in the county of Inverness, ordered by government to be dismantled in 1818; 32 miles from Inverness.—2. GEORGE, a fortress of Scotland, in the county of Inverness, on the extremity of a low peninsula, projecting upwards of a mile into the Moray Firth. It has barracks for about 3,000 troops, and is the most complete fortification in the United Kingdom.—3. WILLIAM, a fortress of Scotland, in the county of Inverness, at the E. extremity of Loch Linnhe. It was ordered to be dismantled in 1818.—4. PITT, in England, near Chatham.—Also the prefix to various military stations in different parts of the world.

FORTESCUE, Sir John, *for'-tes-ku*, an English judge, who was, in 1442, made chief justice of the King's Bench. He was zealously attached to Henry VI., and accompanied him in his exile to Scotland. Henry made him chancellor, but he never exercised the office. He subsequently went to Flanders, and while abroad, wrote his famous book entitled, "De Laudibus Legum Angliæ," which, however, was not published till the reign of Henry VIII. This admirable treatise, according to Henry, excels every work on the subject. He returned to England with Queen Margaret, and was taken prisoner at the battle of Tewkesbury, in 1471. Edward IV. granted him a pardon, on which he retired to his seat at Ebrington, in Gloucestershire. B. in Devonshire, 1395; D. 1485.

FORTEVENTURA, or FUERTAVENTURA, *foo'-air-tu-vain-too'-ra*, one of the Canary Islands, in the E. part of the archipelago. *Area*, 758 square miles. *Desc.* Hilly, deficient in water, but possessing tracts of great fertility. *Lat.* 28° 42′ N. *Lon.* 14° 1′ W.

FORTH, *forth*, a river of Scotland, rising on the N. side of the mountain Ben Lomond, and gradually expanding in the lower part into an estuary called the Firth of Forth, which extends for many miles. At its mouth this is 35 or 40 miles wide, from Fife Ness on the N., to St. Abb's Head on the S. shore, both washed by the German Ocean. It contains several islands, of which the chief are Inchgarvie, Inchcolm, Inchkeith, the Bass, and the Isle of May; the largest of these is but a few miles in circuit. Lighthouses are erected on Inchkeith and on the Isle of May; and the ruins of castles or religious houses appear on all the different islands. The Forth possesses many good harbours, and St. Margaret's Hope, above Queen's Ferry, is one of the safest roadsteads in the island. Length of river, including its "links," 180 miles.

FORTH MOUNTAINS, a range in the county of Wexford, Ireland, celebrated for being the rendezvous of 15,000 insurgents, who, in 1798, met here previous to the attack and capture of the town of Wexford.

FORTINGAL, *for'-ting-al*, a mountainous parish of Scotland, occupying the principal part of the N.W. division of Perth. In it are Schiehallion, Glen Lyon, and Lochs Rannoch and Garry.

FORTROSE, *fort'-rose*, a town of Ross-shire, on the Moray Firth, across which there is a regular ferry to Fort George, 10 miles from Inverness. *Pop.* 1,200.

FORT ROYAL, *roy'-al*, a fortified seaport-town, and capital of the island of Martinique. *Pop.* 12,000. *Lat.* 14° 35′ 0″ N. *Lon.* 61° 4′ 2″ W.

FORT ST. DAVID, *dă'-vid*, a fortress of India, on the Coromandel coast, 12 miles from Pondicherry. An English factory, established here in 1691, became,

after the capture of Madras by the French, in 1746, the head of the British Indian settlements. In 1758, however, M. Lally took it and demolished the fortifications.

FORTUNA, *for-tu'-na*, daughter of Oceanus, according to Homer, or one of the Parcæ according to Pindar, was the goddess of fortune, and from her hand were derived riches and poverty, pleasures and pains, blessings and misfortunes. She was worshipped in different parts of Greece. Bupalus was the first who modelled a statue of Fortune for the people of Smyrna, and he represented her with the polar star upon her head, and the horn of plenty in her hand. The Romans held her in high esteem, and had no less than eight different temples erected to her honour in their city. She is generally represented blindfolded, and holding a wheel in her hand, as an emblem of her inconstancy. Sometimes she appears with wings.

FORTUNATÆ INSULÆ, *for-tu-nai'-te in'-su-le*, islands at the W. of Mauritania, in the Atlantic Sea, supposed to be the Canary Isles of the moderns. They are represented as the seats of the blessed, where the souls of the virtuous were placed after death, and where the air was wholesome and temperate, and the earth produced an immense number of various fruits without the labours of men.

FORTUNE, Robert, *for'-tune*, a Scotch naturalist, born of humble parents, and who was sent to China for the purpose of obtaining new plants, with instructions to pay all possible attention to the horticulture and agriculture of the people of that country. This he accordingly did, and, in 1853, published the result in "Three Years' Wanderings in the Northern Provinces of China." He also published "Two Visits to the Tea Countries of China," and "A Residence among the Chinese;" all excellent works of their kind. B. at Berwick, Scotland, 1813.

FORTUNE BAY, an inlet of the Atlantic, on the S. coast of Newfoundland. *Lat.* 47° N. *Lon.* 55° W.

FORUM, *for'-um*, a prefix to the name of many towns in Italy and Gaul.

FORUM, the principal public place of Rome, situated nearly in the centre of the city, between Mount Quirinal and the Capitol. Here was the tribune for the Roman orators, and around it were the courts of justice. At the present time, the place where it stood is a desert, and is called Campo Vacchino, 'cow-keeper's field.'

FOSBROKE, Thomas Dudley, *fos'-brook*, was educated at St. Paul's School and Pembroke College, Oxford, where he became an M.A. in 1792. In 1794 he was appointed to the living of Horsley, and in 1810 was made curate of Walford, and in 1830, vicar. His works are, a poem on the "Monastic Life, as it existed in England;" "British Monachism; or, Manners and Customs of the Monks and Nuns of England;" to which are added "Manners and Customs of Ancient Pilgrims, Anchorites and Hermits, and Women who had made vows of Chastity." These are his principal works, which give a comprehensive view of the manners and customs of monastic life. His book on "British Monachism" is called by Sir Walter Scott "a learned work;" and Southey, in the "Quarterly Review," after noticing some of its errors, states, "that it would be highly unjust were we not to state that it contains a great deal of curious and recondite information; and that, wherever the subject permits, the author gives proof, in the liveliness of his expressions, of a vigorous and original mind." He also wrote several other works; among which we may notice his "Cyclopædia of Antiquity and Elements of Archæology," which, at the time of its publication, was pronounced "a work as original as it is important, elegantly written, and full of interesting information, with which every person of liberal education ought to be acquainted." B. in London, 1770; D. at Walford, 1842.

FOSCARI, Francis, *fos-kar'-e*, a doge of Venice, who conquered Brescia and Bergamo; but the expense attending these acquisitions proved so offensive to the Venetians, that they deposed him, and he died in 1457, aged 84.—His son died in prison, into which he was thrown upon a false charge of having murdered a senator.

FOSCOLO, Ugo, *fos'-ko-lo*, an eminent Ionian, who received his education at Padua, and before he was twenty, produced a tragedy called "Thyestes." Soon afterwards he obtained employment as secretary to Battaglio, who was sent as ambassador to Bonaparte, to propitiate him to favour the independence of the republic of Venice. The ambassador was unsuccessful in his mission, and Foscolo went to Lombardy, where he devoted himself to the cultivation of literature, and produced his celebrated "Letters to Ortis," which established his fame. He now enrolled his name in the list of the first Italian legion that was formed, and was in Genoa during the siege of 1799. He continued with the Italian army till 1805, when he was sent to Calais with the troops professedly designed for the invasion of England; but he soon afterwards quitted the army, and in 1809 became professor of literature in Pavia. The language of his introductory lecture, however, offended Bonaparte, and the professorship was suppressed. In 1812 he produced his "Ajax," which being supposed to convey a satire on Napoleon I., he deemed it prudent to withdraw to Florence. Afterwards, it is asserted, he engaged in a conspiracy to eject the Austrians from Italy, and was forced to take refuge in Switzerland, whence he went to England, where he was received among the literary and fashionable circles. He continued to apply himself to literature, and published—"Essays on Petrarch," "Disputations and Notes on Dante," and was a contributor to the "Edinburgh Quarterly" and other reviews. B. at Zante, 1777; D. at Turnham Green, near London, 1827.

FOSSANO, *fos-sa'-no*, a town of Piedmont, on the Stura. It has manufactures of silk. *Pop.* 14,000.

FOSSE (DE LA), Charles, *foss*, a French painter, and pupil of Le Brun, who, after studying in Italy, returned to Paris, and gained a great reputation by several public works. A pension was granted him, and he became rector of the Academy of Painting, in Paris. The duke of Montague invited him to England, and employed him in ornamenting his house, now the British Museum. D. 1716.

FOSTER, John, *fos'-ter*, an English architect, who, after studying abroad for a number of years, returned, and erected several works of considerable merit. The principal of these are St. John's Market, in Liverpool, several churches in that city, and the Custom-house. He was made a fellow of the Royal Society, and was considered to have a vast amount of architectural knowledge, although it was questioned whether he had the capacity to turn it to proper account. B. in Liverpool, 1786; D. 1846.

FOSTER, Reverend John, an English divine, who was bred a manufacturer; but disliking that line of life, he devoted himself to study, and in 1792 commenced preaching among the Baptists in various parts of the country. Forced to discontinue preaching, from a glandular affection of the neck, he retired to Stapleton, near Bristol, where he devoted himself to literature, and became one of the principal contributors to the "Eclectic Review." He is best known to the world, however, by his "Essays on Decision of Character;" "On the Application of the Epithet Romantic;" and "On the Evils of Popular Ignorance." These works have received a well-merited praise, not only for the admirable precision of the style in which they are written, but for the depth and originality of the thoughts with which they abound. "I have read with the greatest admiration," says Sir James Mackintosh, "the essays of Mr. Foster. He is one of the most profound and eloquent writers that England has produced." B. near Halifax, Yorkshire, 1770; D. at Stapleton, 1843.

FOSTER, Birket, a modern English artist, who ably illustrated "Christmas with the Poets," "Cowper's Task," Longfellow's works, and many other volumes. As a simple, truthful, poetical delineator of landscape, he stands deservedly high.

FOSTON, *fos'-ton*, the name of several English parishes, none of them with a population above 1,000.

FOTHERGILL, John, *foth'-er-gil*, an eminent English physician, who, having served his time to an apothecary, went to Edinburgh, where, in 1736, he took his doctor's degree. In the same year he became a pupil in St. Thomas's Hospital, and, in 1740, went abroad. On his return, he settled in London, and, in 1748, acquired

prefixed. He was at the expense of printing Purver's translation of the Bible, and of an edition of Percy's "Key to the New Testament," for a seminary of Quakers in Yorkshire.—His brother Samuel was a considerable preacher among the Quakers, and died in 1773.

FOTHERINGAY, *foth'-e-rin-gai*, a village and parish of Northamptonshire, 4 miles from Oundle. *Pop.* 300. —In the castle of this place Richard III. was born; and Mary, queen of Scots, was imprisoned and executed here. James I. razed it to the ground.

FOUCAULT, Nicholas Joseph, *fou-kolt'*, a French antiquary, who discovered, in 1704, the ancient town of the Viducassians, near Caen, of which he gave an account to the Academy of Inscriptions. He also discovered the MS. of "Lactantius de Mortibus Persecutorum." B. at Paris, 1643; D. 1721.

FOUCHÉ, Joseph, duke of Otranto, *foo'-shai*, French minister of police under Napoleon I., was inspector of schools at Martinière when the revolution of 1789 broke out. He threw himself with ardour into the struggle against the king, and was, in 1792, appointed a member of the National Convention. In November of the next year, he accompanied Collot d'Herbois

FOUCHÉ.

(*see* that name) to Lyons, and was overwhelmed with accusations in regard to the frightful cruelties practised there by his colleague and himself. After the fall of the Convention, he was protected by Barras, and, on the 13th Thermidor, year 7, he was made police minister. In this post he displayed great activity and acuteness, and rendered important services to Bonaparte on the 18th Brumaire. The latter, however, had not much confidence in his minister's integrity, and dismissed him from office in 1802, restoring him, however, his portfolio in 1804, which he preserved till 1810. In this year he was superseded, although the reasons of his fall have never been clearly understood. After the Russian campaign, he was appointed by the emperor to the government of the Illyrian provinces,—a very difficult task. He there showed great moderation, and was successful in his mission. During the "hundred days," he again administered the police, and subsequently was appointed, after Waterloo, president of the provisional government, and, in that capacity, treated with the allied powers. Louis XVIII. retained him for a short period at the head of the police, but afterwards deputed him ambassador at Dresden. He was afterwards exiled, and died at Trieste, 1820.—The general opinion of Fouché is, that he was an able, but unscrupulous minister. His "Memoirs" appeared in Paris in 1824, but were declared not to be trustworthy by his family.

FOUCQUET, Charles Louis Augustus, *foo'-kai*, count of Belleisle, secured, by his gallant conduct at the siege of Lisle, where he commanded a regiment of dragoons, the favour of Louis XIV., after whose death he was disgraced, and confined in the Bastille. In the war of 1733 he was appointed to command in Germany, and became the confidant of Cardinal Fleury. In 1741 he was created marshal of France, and, the year following, attended the diet of Frankfort, as plenipotentiary from the court of Versailles. In 1743 he was taken prisoner near Hanover, but soon obtained his liberty. B. 1684; D. 1761.

FOUGÈRES, *foo'-zhair*, a town and parish of France, 28 miles from Rennes. *Manf.* Coarse linen and leather; and it has a trade in honey and butter. *Pop.* 9,000.—This town was the scene of many engagements between the English and French, from the 11th to the 15th centuries.

FOULAHS, *foo'-las*, the name of a race of negroes, who are very widely diffused throughout W. Africa. Their original country is supposed to be the mountainous tract near the sources of the Senegal, bearing the name of Fooladoo; but, through conquest and emigration, they spread through the neighbouring regions, and indeed more or less over most parts of Africa. Their most populous and powerful kingdom is that of Foota Jallo, situate to the S. of Gambia. They possess also Brooks, situate on the higher parts of the Senegal, coterminous with Fooladoo; Bondou and Foota Torra, between the Senegal and Gambia; the kingdom of the Seratic, on the lower part of the Senegal; Masina, on the Niger, between Bambarra and Timbuctoo; and Wassela, to the south of the upper part of the Niger. The Foulahs are easily distinguished by form and features from the other negro tribes. They differ also from the Moors, in the mildness of their manners and character.

FOULNESS, *foul'-ness*, an island of England, in the North Sea, off the coast of Essex, 9 miles from Rochfort. *Pop.* 665.

FOUNTAIN, *foun'-tain*, a county of the United States, to the W. of Indiana. *Area*, 390 square miles. *Pop.* 14,000.

FOUNTAINE, Sir Andrew, *foun'-taine*, an English antiquary, who was educated at Christ Church, Oxford, where he studied the Anglo-Saxon language, and wrote a piece inserted in Dr. Hickes's "Thesaurus," entitled, "Numismata Anglo-Saxonica et Anglo-Danica." He had also a taste for the fine arts, and made a noble collection of antiques and curiosities. He drew the designs for the "Tale of a Tub," by Swift, with whom he was very intimate, as he was with other wits of the age, and is commended by Montfaucon for his antiquarian knowledge. William III. conferred the honour of knighthood upon him, and in 1727 he was appointed warden of the Mint. B. at Narford, Norfolk; D. 1753.

FOUQUIÈRES, James, *foo'-ke-air*, a Flemish painter, the disciple of Velvet Breughel, and so excellent in painting landscapes, as to be ranked with Titian. B. at Antwerp, 1580; D. 1659.

FOUR EVANGELISTS, *e-văn'-je-lists*, a group of four islands at the entrance of the Straits of Magellan. There are several others near them, which compose a group called the Twelve Apostles. *Lat.* 52° 34′ S. *Lon.* 75° 5′ W.

FOURCROY, Antoine François de, *foor'-kroi*, a distinguished French chemist and natural philosopher, who, having chosen the medical profession for his occupation, devoted himself to the study of those sciences which are more immediately connected with it, especially chemistry. In 1784 he was appointed professor of this science at the Jardin du Roi, and became associated with Berthollet, Lavoisier, and

others in researches which led to vast improvements, whilst they suggested a new chemical nomenclature, entitled "Méthode de Nomenclature Chimique." On the breaking out of the Revolution, he became entangled in the politics of the period, and was elected a deputy from Paris to the National Convention. In 1794 he became a member of the Committee of Public Safety, and next year was received as one of the Council of the Ancients. In 1799 Bonaparte gave him a place in the Council of State, when the affairs relating to public instruction were placed under his management. In this important trust he ably acquitted himself. In the various departments of chemical science and natural philosophy, he produced many valuable works. Dr. Thomson, however, says "that the prodigious reputation which he enjoyed during his lifetime, was more owing to his eloquence than to his eminence as a chemist; though even as a chemist he was far above mediocrity." B. at Paris, 1755; D. 1809.

FOURIER, Charles, *foor'-e-ai*, was the founder of the system of communism known as Fourierism. It subsequently was called Phalansterianism, and is said to have many secret adherents. The doctrine is nothing more than a kind of socialism, which, in England at least, possesses very little vitality amongst the educated classes. B. at Besançon, in Franche-Comté, 1772; D. 1837.

FOURIER, Joseph, received his education at a college directed by the Benedictines, and, in 1789, was appointed professor of mathematics in the school where he had studied. At the breaking out of the Revolution, he became a member of the Committee of Public Safety at Auxerre, and was twice delivered from imprisonment by his fellow-townsmen. In 1794 he became one of the subordinate professors in the Polytechnic school, and subsequently accompanied the French expedition to Egypt. On his return, he was appointed prefect of the department of Isère. He afterwards became prefect of the Rhone, which post he resigned in 1815. He was subsequently appointed secretary to the academy and president of the council of the Polytechnic school. B. at Auxerre, 1768; D. at Paris, 1830.—He was the first who imparted a taste for Egyptian antiquities to the Champollions.

FOURNIER, Peter Simon, *foor'-ne-ai*, an eminent French engraver and letter-founder, who published, in 1737, a "Table of Proportions," to determine the height and relation of letters. His chief work, however, is entitled "Manuel Typographique," 2 vols. 8vo. B. at Paris, 1712; D. 1768.

FOU-TCHKOU, *foo'-tchoo*, a city of China, in Fo-kien, and the most considerable in that province, on account of its trade and the convenience of its rivers and port. It is one of the five ports opened for commerce on the Min river, 25 miles from its mouth. It is encompassed by hills, and is the residence of a viceroy and a British consul. The number of its literati, and the magnificence of its principal bridge, which has more than 100 arches, constructed of white stone, and ornamented with a double balustrade, give it a superior character. The city consists of a main street, with residences for public functionaries. *Manf.* Cotton goods, porcelain, and dyeing. It is within 70 miles of the Black-tea district, and has extensive lead-mines in its neighbourhood. *Pop.* estimated, with its suburbs, at 1,000,000. *Lat.* 26° 12′ 24″ N. *Lon.* 119° 30′ E.

FOWEY, *fo'-e*, a river of England, in Cornwall, rising between Bodmin and Launceston, and, after a course of 30 miles, falling into the English Channel near Fowey.

FOWEY, a seaport-town of Cornwall, on the Fowey, which forms a spacious and secure harbour, defended by forts. The church is a spacious and lofty structure, with a handsome tower. It has a considerable pilchard-fishery. *Pop.* 1,800.

FOWLA, or FOULA, *fow'-la*, one of the Shetland Islands, with an elevation of nearly 1,400 feet above the level of the sea. *Ext.* 2 miles long, by about the same in breadth. *Pop.* 250. *Lat.* 60° 8′ N. *Lon.* 2° 6′ W.

FOWLER, Edward, *fow'-ler*, an eminent English prelate, who was, for his zeal in promoting the Revolution, advanced to the see of Gloucester in 1691. B. at Westerleigh, Gloucestershire, 1632; D. 1714.—Besides several sermons and tracts, he wrote the "Principles and Practices of certain Moderate Divines of the Church of England, abusively called Latitudinarians," 8vo, 1670; "The Design of Christianity," 8vo, 1671 (this is an excellent book, and has been several times printed); "Libertas Evangelica, or a Discourse of Christian Liberty," 8vo.

FOWLER, Charles, an English architect, who, after having been employed in an office at Exeter, went to London, where he entered the office of Mr. Laing, whilst the Custom-house was building. His first public work was the Courts of Bankruptcy, which were succeeded by other works, the principal of which were markets. Among these may be named Hungerford and Covent Garden, in London, and the Corn-market at Tavistock. He also erected the bridge over the Dart at Totness, the Devon Lunatic Asylum, and several other works, but none of very great public importance. B. at Collumpton, Devonshire, 1792.

FOX, Edward, an English bishop and statesman, who was educated first at Eton and next at King's College, Cambridge, of which, in 1528, he was elected provost. Cardinal Wolsey took him into his service, and obtained for him the appointment of ambassador to Rome, in conjunction with Gardiner, to promote the divorce of Henry VIII. He was afterwards sent in the same capacity to France and Germany; and in 1535 was promoted to the see of Hereford. B. at Dursley; D. 1538.—This bishop was a great friend to the Reformation. He wrote "De Verâ Differentiâ Regiæ Potestatis et Ecclesiasticæ, et quæ sit ipsa Veritas et Virtus utriusque."

FOX, Richard, an English prelate, who was educated first at Boston school, and afterwards at Magdalen College, Oxford, whence, on account of the plague, he removed to Pembroke Hall, Cambridge. He next went to Paris, where he gained the friendship of Dr. Morton, bishop of Ely, who recommended him to the earl of Richmond, afterwards Henry VII. On the accession of that monarch, Dr. Fox was made privy counsellor, and preferred to the see of Exeter. He was also sent on several embassies, and, after obtaining different church preferments, was advanced to the see of Durham, whence he was removed to Winchester. B. of poor parents, near Grantham; D. at Winchester, 1528.—He founded Corpus Christi College, in Oxford, and the free schools of Grantham, and Taunton in Somersetshire.

FOX, or FOXE, John, an English divine, who was educated at Brasenose College, Oxford, whence he removed to a fellowship in Magdalen College. In 1545 he was expelled on a charge of heresy, which reduced him to great distress. At length, Sir Thomas Lucy, of Warwickshire, took him into his house, as tutor to his children. Afterwards, he removed to London, and was employed by the duchess of Richmond as tutor to the earl of Surrey's children; but his life being in danger on account of his principles, he withdrew, with his wife and other Protestants, to the continent. Mr. Fox settled at Bâle, and earned his subsistence by correcting the press for Oporinus, the printer, whilst, at the same time, meditating his great work, entitled "The Acts and Monuments of the Church; or, Book of Martyrs." On the accession of Queen Elizabeth, he returned to England, and, by means of secretary Cecil, obtained a prebend of Salisbury. In 1563 he published his "Acts and Monuments of the Church," in one large volume folio. In the edition of 1583 it made two volumes; and, in the subsequent issues, three. This book was highly esteemed by Protestants, though stigmatized by the Roman Catholics as "Fox's Golden Legend." B. at Boston, Lincolnshire, 1517; D. in London, 1587, and was buried in the church of St. Giles, Cripplegate, of which he was some time vicar.—Besides his "Acts and Monuments," he published several books, particularly Latin comedies on Scripture subjects. Bishop Burnet, himself a most painstaking searcher into original documents, says of the "Book of Martyrs," that he had compared these "Acts and Monuments" with the records; and that he had never been able to discover any errors or prevarications in them, but the utmost fidelity and exactness.

FOX, George, the founder of the sect of Friends, or Quakers, was at first placed with a shepherd, and afterwards bound an apprentice to a shoemaker. In

1643 he became a religious itinerant, and, about 1647, commenced publicly to preach, inveighing, not only against the prevailing vices, but the officiating ministers and religious services; affirming that the light within, or Christ in the heart, is alone the means of salvation, and the true qualification for the ministry. He suffered frequent imprisonments and other rough treatment, which he generally seems to have brought upon himself, by his indiscretions in opposing the clergy, and passing strictures on them in their public ministry. The name of Quakers was given to him and his followers first at Derby, on account of the strange contortions and shakings which accompanied their preaching. In 1669 he married the widow of a Welsh judge, but still continued his course of itinerant preaching, and visited Holland, Germany, and America. B. at Drayton, Leicestershire, 1624; D. in London, 1691.—His journal was printed at London in 1694, his epistles in 1698, and his tracts in 1706, all in folio.

Fox, Charles James, a distinguished English statesman and orator, was the second son of the first Lord Holland, and received his education at Westminster, Eton, and Oxford, where his devotion to classical literature laid the groundwork of his future eminence as an orator. He was designed by his father to occupy a high place in the political arena of his country, and with that view he procured for him a seat in parliament for the borough of Midhurst, when he was no more than nineteen years of age. He made his first speech in 1769, in which he supported Colonel Luttrel against Mr. Wilks, in the Middlesex election. In 1770 he became junior lord of the Admiralty in the administration of Lord North; but he resigned this post in two years, when, in 1773, he was appointed one of the lords of the Treasury. In the following year he was dismissed from his post, and in a short time appeared in the ranks of opposition to the ministry. The splendour of his oratorical talents was now exercised in denouncing the measures which led to the American war, and which finally resulted in the separation of the transatlantic colonies from England. In 1782 the administration of Lord North fell, when Fox became one of the secretaries of state, which office, however, he resigned on the death of the marquis of Rockingham. A new administration was formed under the earl of Shelburne, which, however, had but a brief tenure of existence. When the Coalition ministry was formed between Lord North and ministers, Fox resumed his former office. He now brought in his India Bill, which, having passed the House of Commons, was thrown out by the Lords, and was the proximate cause of the resignation of the ministry of which he formed a member. Mr. Pitt now entered upon office, when Fox arrayed himself at the head of the opposition, and a long contest commenced between these two illustrious individuals. Worn out with the excitement of debate, he, in 1788, repaired to the continent for the purpose of renewing his health, or perhaps of restoring the tone of wounded spirits constantly engaged in the harassing conflict of opinion; and, after passing a few days with Gibbon at Lausanne, he entered the classic land of Italy. George III., however, having been suddenly taken ill, he was soon recalled from whatever repose and enjoyment he had promised himself in that region where

"Full flashes on the soul the light of ages;"

and he returned to his parliamentary duties. In 1786 the question of the Indian administration of Warren Hastings came on, in which, from its commencement to its close, he took an active part. Next came the question of the regency, which, Fox argued, belonged by right to the prince of Wales; and then the French revolution, the principles of which he also discussed with his usual feeling, fervour, and vehemence. It was upon this question that the memorable quarrel took place between him and Burke. "I know the price of my conduct," exclaimed the latter; "I have done my duty at the price of my friend. Our friendship is at an end." In vain did Fox appeal, with tears in his eyes, to the memory of twenty-five years of uninterrupted intercourse. The words were publicly spoken, and the breach was never healed. Notwithstanding this separation, however, Burke shortly afterwards declared that Fox "was a man made to be loved." Between 1797 and 1802 Fox lived chiefly in retirement, when he formed the plan of his "History of the Reign of James II." In 1802 a dissolution of parliament took place, when Fox, who had before sat for Westminster, was again returned for the same "ancient city." Shortly afterwards he visited Paris, with the view of collecting materials for his "historical work," when he was introduced to Napoleon I., who paid him marked attention. On the death of his great rival Pitt, in 1806, Fox became secretary of state for foreign affairs under Lord Grenville; but his days were now numbered. Brief, however, as these were destined to be, he exerted himself for the abolition of the slave-trade, which was one of the many benevolent objects which lay near to his heart. He also endeavoured to negotiate a peace with France; but being afflicted with water in the chest, he did not live to accomplish his plans. B. 1749; D. 1806.—It is upon his speeches and his statesmanship that the fame of Fox rests; and the former of these have been highly praised, and commended to students of oratory as models for study. This has especially been the case with the first part of his speech on "the Westminster Scrutiny," which Brougham recommends to Macaulay "to pore over till he has it by heart." The criticism of Coleridge on the eloquence of Fox, is, "that his feeling was all intellect, and his intellect all feeling." Sir James Mackintosh calls him a "Demosthenian speaker;" but Brougham says, "there never was a greater mistake than the fancying a close resemblance between his eloquence and that of Demosthenes."

Fox, William Johnson, an eloquent English Unitarian preacher, who becoming popular as an advocate of the repeal of the corn-laws, and other liberal opinions in politics, was elected member of parliament for Oldham in 1847 and in 1852. He is best known, however, as a periodical writer, and from his connection with the "Westminster Review;" for which he wrote the opening article of the first number. He also wrote for the "Monthly Repository" and the "Weekly Dispatch" newspaper. His separate works are "Lectures to the Working Classes," 4 vols. of which were published between 1845 and 1851. He has also produced a volume on "The Religious Ideas," and several other smaller performances. B. near Wrentham, Suffolk, 1786.—As a member of the House of Commons, he has frequently brought forward motions with a view to the promotion of secular education throughout the country.

Fox Islands belong to the Aleutian group. (*See* Aleutian Islands.)

Foy, St., *foi*, the name of two towns of France, one in the department of the Gironde, and the other in that of the Rhone. Neither of them has a population above 3,000.

Foyers, *foirs*, a river of Scotland, in Inverness-shire, which, in its course, forms a cascade 90 feet high, and falls into Loch Ness.

Foyle, *foil*, a river of Ireland, which, after passing Londonderry, expands into a bay called Lough Foyle, 18 miles long and 9 wide.

Fra Diavolo, *fra de-a'-vo-lo*, a Neapolitan robber, whose real name was Michael Pozzo. He began life as a stocking-maker, after which he became a friar, and in this capacity was the leader of a gang of banditti in Calabria. In 1799 he assisted Cardinal Ruffo, who headed the counter-revolutionists in favour of the Bourbons of Naples. For this he received a pardon for his crimes, and a pension of 3,600 ducats, with which he was enabled to purchase an estate. He now lived in peace till 1806, when he rose again in favour of the expelled Bourbons. He entered Spalinga, and threw open the prisons, when he was joined by large numbers of lazzaroni; but, after a severe engagement with the Bonapartists, he was taken prisoner, condemned, and summarily executed in the same year. B. 1769.—Auber, the French musical composer, has written an opera founded on the adventures of this bandit.

Fraga, *fra'-ga*, a town of Aragon, on the borders of Catalonia, Spain, 53 miles from Saragossa. *Pop.* 5,000.

Framlingham, *fram'-ling-ham*, a market-town of Suffolk, 15 miles from Ipswich. The church, built of black flint, is a very stately edifice, and its steeple is 100 feet high. *Pop.* 2,500.

## Frampton

FRAMPTON, *frămp'-ton*, the name of several parishes in England, none of them with a population above 1,000.

FRANCAISE, LA, *fra'-saise*, a town of France, 11 miles from Montauban. *Pop.* 4,000.

FRANCAVILLA, *fraw-ka-veel'-ya*, a large and regularly-built town of Naples, in the province of Otranto, 20 miles from Taranto. The streets are wide and straight, and the houses showy, though in a heavy style of architecture. *Manf.* Woollens, cottons, snuff, and earthenware. *Pop.* 15,500.—In 1734, this place suffered severely by an earthquake.—Also the name of several other towns in Italy, none of them with a population above 4,000.

FRANCE, *france*, a country of Western Europe, bounded on the N. by the English Channel and Belgium, E. by Germany, Switzerland, and Italy, S. by the Mediterranean Sea and Spain, and W. by the Atlantic Ocean. On the N.W. it is separated from England by the English Channel. On every side of its frontier, except the N., it has strong natural barriers in the Pyrenees, the Alps, the ridge of Jura, and the Vosges. *Ext.* 650 miles long from N.W. to S.E., and 615 broad from N.E. to S.W. *Area*, 207,232 square miles. *Coast.* About 1,200 miles, formed by the Bay of Biscay, the English Channel, the Straits of Dover, the Mediterranean Sea, and the Gulf of Lyons. *Capes.* Gris Nez on the Straits of Dover, La Hogue in the Channel, Barfleur, and Bec du Raz. *Bays and Roads.* The principal are Cancale, St. Brieux, Douarnenez, and Audierne on the W., La Forest and Quiberon on the S., and the Bay of Bourgneuf at the mouth of the Loire. The Roads are, the Basque, or the Bay of La Rochelle, and those of Brest, Toulon, Cavalaire, Grimaud, Napoule, and Jouan. The four last are in the Mediterranean. *Islands.* Few and unimportant: Belleisle, Yon, Ré, Oléron, in the Bay of Biscay; Ushant off the W. of Brittany, and Corsica in the Mediterranean. *Political Divisions.* Previous to 1798, France was divided into military governments, noted in the following table under old provinces, which, in that year, the Legislative Assembly divided into departments, which were again subdivided into districts, cantons, and municipalities.

| OLD PROVINCES. | DEPARTMENTS. |
|---|---|
| Flandre Française | Nord. |
| Artois | Pas-de-Calais. |
| Picardie | Somme. |
| Normandie | Seine-Inférieure, Calvados, Manche, Orne, and Eure. |
| Isle-de-France | Seine, Seine-et-Oise, Oise, Aisne, Seine-et-Marne. |
| Champagne | Marne, Ardennes, Aube, Haute-Marne. |
| Lorraine | Meuse, Moselle, Meurthe, Vosges. |
| Alsace | Haut-Rhin, Bas-Rhin. |
| Bretagne | Ille-et-Vilaine, Côtes-du-Nord, Finisterre, Morbihan, Loire-Inférieure. |
| Naine and Perche | Sarthe, Mayenne. |
| Anjou | Mayenne-et-Loire. |
| Touraine | Indre-et-Loire. |
| Orléanois | Loiret, Eure-et-Loire, Loire-et-Cher. |
| Berri | Indre, Cher. |
| Nivernois | Nièvre. |
| Bourgogne | Yonne, Côte-d'Or, Saône-et-Loire, Ain. |
| Franche-Comté | Haute-Saône, Doubs, Jura. |
| Poitou | Vendée, Deux-Sèvres, Vienne. |
| Marche | Haute-Vienne, comprising part of Limosin; Creuse. |
| Limosin | Corrèze, comprising part of Upper Vienne. |
| Bourbonnois | Allier. |
| Saintogne, comprising Aunis | Charente-Inférieure. |
| Angoumois, comprising part of Saintogne | Charente. |
| Auvergne | Puy-de-Dôme, Cantal. |
| Lyonnois Forêt and Beaujolois | Rhône, Loire, Isère. |

## France

| OLD PROVINCES. | DEPARTMENTS. |
|---|---|
| Dauphiné | Hautes-Alpes, Drôme. |
| Guienne, comprising Gascogne | Dordogne, Gironde, Lot-et-Garonne, Lot, Aveyron, Gers, Landes, Hautes-Pyrénées. |
| Béarn, Comté-de-Foix | Basses-Pyrénées, Ariége. |
| Roussillon | Pyrénées-Orientales. |
| Languedoc | Haute-Garonne, Aude, Tarn, Gard, Lozère, Ardèche, Haute-Loire, Hérault. |
| Provence | Bouches-du-Rhône, Basses-Alpes, Var. |
| Corsica | Golo, Liamone. |

*Desc.* Level, or gently undulating In regard to soil, vast tracts in Brittany, Anjou, and Gascony, come under the description of heaths, containing a gravelly, sandy, or stony surface, almost unfit for tillage. In regard to mountains, the surface lost to tillage, is not considerable in the interior, where the ranges of Auvergne connect themselves with those of Languedoc, Dauphiné, and Provence. A striking feature in the face of the country are the Landes, lying between the Adour and the Gironde. They consist of heaths or marshes, presenting nothing but a desert, here and there interspersed with patches of pasture or cultivated land. The few inhabitants of this region are mostly employed in rearing sheep, which they tend mounted on stilts two or three feet high. *Mountains.* The most considerable are the Alps, Pyrenees, Cevennes, Auvergne, Jura, and the Vosges. The Alps, lying between France and Italy, have for their principal summits, Ventoux, Génèvre, Viso, and Pelvoux, successively rising to the majestic heights of 6,260, 11,785, 12,692, and 14,108 feet above the level of the sea. The principal summits in the Pyrenees, separating France from Spain, are Canigou, Midi, and Perdu, successively rising to 9,140, 9,440, and nearly 11,000 feet. The Cevennes culminate in Lozère, 4,884, and Mezin, 5,794 feet; the Auvergne, in the Puy-de-Dôme, 4,806; Cantal, 6,100; and Mont-d'Or, 6,188 feet. It was in ascending the Puy-de-Dôme that Pascal's famous discovery was made, which proved that, at greater elevations, the height of the column of mercury in the barometer is diminished. The Jura, between Franche-Comté and Switzerland, culminate in the Reculet, 5,643 feet; and the Vosges, between Lorraine and Alsace, reach their highest point in the Ballon d'Alsace, which is 4,688 feet above the level of the sea. The whole of the summits here given are to be taken only as the highest within the boundaries of France. *Rivers.* The principal are the Seine, Loire, Garonne, and Rhone; and there are many others, which give name to the departments through which they flow. The Seine falls into the English Channel; the Loire and Garonne into the Atlantic Ocean; and the Rhone into the Mediterranean Sea. The other important rivers are the Rhine, Meuse, Moselle, Sambre, Scheldt, and Lys, which flow into the North Sea; the Somme, Oise, Orne, Marne, Aisne, Yonne, and Eure, which fall into the English Channel; the Blavet, Vilaine, Adour, Allier, Cher, Indre, Vienne, Creuse, Mayenne, Sarthe, Loire, Gers, Dordogne, Ariége, Farn, and Lot, which disembogue in the Atlantic; the Aude, Arne, Hérault, Saône, Doubs, Isère, and Durance, which fall into the Mediterranean. Most of the chief rivers are connected by canals, and it is calculated that there are no fewer than 400 navigable rivers, and 500 smaller streams, in France. *Lakes.* None of importance. Along the coasts of the Bay of Biscay and the Mediterranean there are lagoons, separated from the sea by thin strips of land; but they are, in general, extremely shallow. *Forests.* The principal are those of Ardennes, Fontainebleau, Compiègne, and Orleans. It is estimated that one-eighth of the superficial area is covered with wood. *Climate.* In the north, this is similar to what it is in England, rain occurring frequently, and the country being, consequently, fit for pasture. The interior is different, having much drier weather and fewer changes. In the south the heat is excessive; and the corn crops are often blighted from the want of rain. On the W. coasts the air is more moist, and rain more frequent.

*Zoology.* Among the *wild* animals are the wolf, bear, wild boar, fox, wild cat, stag, roebuck, fallow-deer, chamois, beaver, rabbit, and hare. The *domestic* animals are the horse, ass, mule, ox, sheep, goat, and pig. Among birds are the eagle, falcon, partridge, buzzard, quail, and lark. The bee is extensively kept. Fish abounds on the coasts and in the rivers; salmon in the estuaries, and shellfish on the shores. Along the shores of the Mediterranean the anchovy and the tunny are caught; and, near its shores, the kermes, an insect yielding a crimson dye, is found. *Pro.* Wheat, barley, oats, pulse, potatoes, truffles, and beetroot, from which sugar is made; lint, hemp, tobacco, hops, dye-woods, and medicinal plants. In the S., olives, oranges, grapes, figs, pomegranates, citrons, and the pistachio nut. The vine is cultivated to the extent of about a twenty-seventh part of the superficial area of the country; and Burgundy, Bordeaux, and Champagne wines are produced, of the most excellent quality. Timber for carpentry and for shipbuilding purposes is largely grown; and, in the S., the cork-tree abounds. *Minerals.* Iron, which is found over nearly the whole of the country, copper, lead, silver, antimony, sulphur, gold, coal, and salt. The gold produced is comparatively insignificant, but the iron, coal, and saltworks are of great value. Marble, alabaster, slate, and a few precious stones, are also found. *Manf.* In the development of these, France was particularly active in the nineteenth century. In the produce of iron and steel goods, she made immense advances, without neglecting other industrial arts, for which she has long been famed. Her most important manufactures are those of watches, jewellery, arms, cabinet-work, coach-building, pottery, glass, crystal, musical instruments, chemicals, oil, soap, beetroot-sugar, dyeing, paper-making, printing, woollens, silks, linens, cottons, carpets, shawls, and lace. *Commerce.* The chief commercial harbours of France are Bordeaux, Marseilles, Nantes, Hâvre-de-Grace, St. Malo, L'Orient, Bayonne, Dunkirk, Dieppe, and Rochelle. Marseilles trades with the West Indies and the Levant; Bordeaux with the East and West Indies, and with the north of Europe, to a great extent in wine. Nantes has likewise a share of the colonial and wine trade. Hâvre is a principal seaport. Her chief commercial relations are carrried on with the following countries: — Belgium, Switzerland, England, Sardinia, Germany, Spain, the United States of North America, and her own colonies. With these places the imports and exports amount to about one-sixth of the whole external commerce of the country. Long imbued with the principles of protection and prohibition, it was only in 1860 that there was, under Napoleon III., inaugurated a system somewhat approaching that of the free-trade doctrines of England. This commercial reform, in the opinion of most reflective minds, was destined to be the starting-point for a largely increased development of the internal and external resources of one of the most skilful and industrious populations on the continent of Europe. *Gov.* At present an hereditary monarchy, with the title of emperor to the sovereign. There are three houses of legislature, — the Senate, the Legislative Body, and the Council of State. The Senate, limited to 150 members, is composed of cardinals, marshals, and admirals, and of citizens whom the emperor may think proper to raise to the dignity of senators. They are appointed for life, and, although their services are gratuitous, the emperor may grant them dotations, not to exceed £1,200 per annum. The Legislative Body is elected by the people on the principle of universal suffrage, and in the proportion of one representative to every 35,000 electors. These are without salary, and are elected for six years. Beyond this, there is a Council of State, numbering from 40 to 50, appointed by the emperor, and liable to removal by him: it is presided over by the emperor, and in his absence by its vice-president. Under the emperor's direction, it draws up projects of law, regulates the public administration, and resolves difficulties that may arise in the matters of administration. It maintains, in the name of the government, the discussion of the projects of laws before the Senate and Legislative Body. The councillors of state, charged

to speak in the name of the government, are appointed by the emperor. The salary of each councillor is £1,000 per annum, and the ministers have a right, by virtue of their office, to sit and deliberate in the Council of State. The governments of France, however, for the last seventy years, have been extremely various. In that period the country has seen thirteen governments, each differing from the others in origin and in aim. The following succinct account of the principal of these, forms a curious comment upon the political versatility of this nation:—Louis XVI. and the Assemblies, May 5, 1789, to August 10, 1792; the Convention, with its revolutions and incessant changes, September 24, 1792, to October 5, 1795; the Directory, October 5, 1795, to November 7, 1799; the Consulate for a limited period, December 24, 1799, to August 2, 1802; the Consulate for life, August 2, 1802, to May 18, 1804; the Empire, May 18, 1804, to April 2, 1814; the Restoration, April 24, 1814, to March 20, 1815; the Empire, March 27 to June 22, 1815; the Restoration, July 8, 1815, to August 1830; the Government of July, August 9, 1830, to February 24, 1848; the Republic, February 26, 1848, to December 2, 1851; the Presidency for 10 years, December 20-21, 1851, to December 9, 1852; the Empire, December 9, 1852. During the same period of 70 years, there have been promulgated 12 constitutions, which have had, in France, for a longer or shorter period, the force of fundamental law:—The Constitution of September 14, 1790; the Constitution of June 24, 1793; the Constitution of the 5th Fructidor, year III.; the Constitution of the 22nd Frimaire, year VIII.; the Senatus-Consultum of the 16th Thermidor, year X.; the decree of the Senate of the 28th Floréal, year XII.; the Charter of 1814; the Additional Act of 1815; the republican Constitution of 1848; the Constitution put forth by the president, of January 14-22, 1852; the same constitution modified by the Senatus-Consulta of November 7th, 1852, and the Plebiscitum of January 21-22, 1852. In all this we have a specimen of the force and unity to which the Revolution has sacrificed the rights and liberty of France! In both catalogues we have omitted all that was simply ephemeral, with the suspension by the revolutionary government of the constitution of 1793. ADMINISTRATION OF JUSTICE. — The administrators of justice are very numerous; there being a justice of peace for each canton, a court of the first instance for each arrondissement, a provincial court of appeal in twenty-seven of the principal towns, and a tribunal of commerce in every place where mercantile differences are likely to occur. In addition to this, there are tribunals of police, or petty municipal courts, for the punishment of small delinquencies; and tribunals of commerce, composed of merchants, who act without salary. There is, besides, the *Cour de Cassation*, or highest court in France, which is stationary at Paris, and takes cognizance of all appeals from the twenty-seven provincial courts. Juries are employed in criminal cases only. *Education.* The educational system of France is governmental, and is presided over by a minister of public instruction. The establishments consist of primary schools, answering to our smaller parish schools; town schools, called secondary schools, or colleges; *lycées*, now called royal colleges; large provincial schools, where the pupils meet in classes, and are taught Latin, Greek, mathematics, and even rhetoric. Lastly come the universities, or academies, which, including Paris, are twenty-six in number. *Rel.* Roman Catholic, with the exception of about 2,000,000 Protestants and 60,000 Jews. The established church had formerly very extensive landed property; but, in the early part of the great revolution, the property of these lands, computed at one hundred millions sterling, was assumed by the National Assembly, and a fixed income in money allotted to the clergy. *Army.* The whole of the (nominal) army of France, in 1860, numbered 760,951 soldiers of all ranks; thus classified;—viz., staff, 6,472; military schools, 2,100; invalids, 3,800; gendarmerie, 26,278; infantry, 510,640; cavalry, 100,221; artillery, 68,544; engineers, 15,448; equipage-train, 12,600; artisans or government workmen, 7,400; military infirmaries, 3,200; and military justice, 4,248. *Navy.* The French navy, in 1860, numbered

461 vessels, carrying 12,520 guns, the steamers being of 60,060 horse-power. In the course of the succeeding ten years it is intended to construct 150 ships of war of all classes, and 72 steam-transports. The conversion of the rest of the fleet into screw-vessels is also to be effected in the same time. In 1860 the sailing ships numbered 252, of 8,106 guns, and the steamers 209, of 4,414 guns. The *personnel* of the navy and marine included 90,298 men, or nearly double the usual annual average of the English navy. This includes the "marine" troops, which number 23,669 men; the service of the "fleet proper" being carried on by 66,629. *Pop.* in 1860, 36,205,792. *Lat.* between 42° 20' and 51° 6' N. *Lon.* between 4° 40' W. and 8° 15' E.—*Foreign Possessions.* These in America comprise Martinique, Guadaloupe, Cayenne, Désirade, Marie-Galante, Saintes, a part of St. Martin in the Antilles, French Guiana, St. Pierre, and Miquelon, near Newfoundland. In Africa, Algeria, Goree, and Senegal; the islands Bourbon and St. Marie; portions of Madagascar, and the islands Mayotta and Nossi-Be; Ado Assinie, on the W. of the Gold Coast of Guinea. In Asia, Pondicherry and Karikal, Mahé, Yanaon, and Chandernagore, in Bengal. In the Pacific Ocean, the two groups of Marquesas and Tahiti, taken possession of in 1841, and New Caledonia in 1854.—The *history* of France cannot be said to commence till the reign of Clovis, who was the grandson of Merovée, and the real founder of the Merovingian dynasty. On his accession, in 481 (*see* CLOVIS), the Visigoths, Burgundians, Romans, and Germans were disputing amongst themselves the territory of Gaul; Clovis, however, proved the superiority of the Franks, defeated the Romans at Soissons, in 486; subjugated the Germans after the battle of Tolbiac, in 496; confined the Visigoths to the possession of Septimania, by the victory of Vouillé; and shook the power of the Burgundians, whom his sons finally conquered in 534. After his death, the kingdom was divided amongst his four children, Thierry, Clodomir, Childebert, and Clotaire. In 558 these were again united under Clotaire, and, subsequently, after some internecine struggles, a second division led to the establishment of the four kingdoms of Austrasia, Neustria, Burgundy, and Aquitaine. Of these, the two former were the most powerful, but, in 687, Austrasia took the lead of the other, it having been converted into a kind of republic, governed by the Heristals, under the title of dukes. These dukes, or mayors of the palace, now became virtually the masters of the Neustrian kings; Burgundy also submitted to them, and Aquitaine, which had been overrun by the Moors, found a liberator in Charles Martel, 732. Twenty years after this, Pepin-le-Bref took possession of the crown, deposing Childeric III., the last Merovingian king, and the second of the Carlovingian dynasty. Pepin now brought Aquitania and Septimania, and united, for the first time, the whole of France under his sway, with the exception of Brittany. He extended his influence as far as Italy; forced Astolph, king of the Lombards, to acknowledge Pope Stephen, and made a gift of a territory to the pope. Charlemagne, his son, succeeded, who conquered southern Spain, Italy, Saxon Germany, Bavaria; and thus formed an immense kingdom, which, in 800, he proclaimed the new Empire of the West. This heterogenous assemblage did not long hold together, and, in 843, it broke up into the kingdoms of France, Italy, and Germany, the imperial crown falling to the lot of the Italian and German lines of the Carlovingian dynasty; then passing into the hands of foreign feudatories, and finally remaining with the Germans. In France, the commencement of the decline of Charles Martel's line dates from 843; the feudal system commences, and this increases, at the expense of royalty, when, in 887, Eudes, one of the principal feudal chiefs, seizes the throne, on which the Carlovingians had sat without territory and power. Twice were princes of this line restored to the throne, first in 893, and again in 936; but they failed to retain the sceptre, and definitively gave way to the Capet dynasty in 987. The efforts of able sovereigns and their long reigns, the formation of communes, and, above all, the enterprises of the Crusades, tended to enlarge the royal authority. From 1108 to 1226 the French territory under the Capets, which, at first, only included the duchy of France, rapidly extends—Normandy, Anjou, Maine, and Poitou, were recovered from England, which up to this time had held them. The large provinces of Guienne and Gascony were on the point of reverting to the crown, but Louis-le-Jeune's divorce from Eléonore of Aquitaine, in 1152, prevented this consummation. Louis IX., called the Saint, did not greatly add to his territory, but, during his reign, from 1226 to 1270, considerably increased the power of the sovereign, and under Philip III., from 1270 to 1284, when Languedoc was added to the crown, France's intervention in the affairs of the Spanish Christian kingdoms, extended its influence as far as Naples. Philip IV. began the recovery of the territories ceded to Lothaire in 843; fought successfully against the temporal authority of the popes, and opposed to the nobles, the States General, whom he was the first to assemble, and Parliament, of which he may be said to have been the real founder. Under his sons, from 1314 to 1328, a feudal reaction commenced, which these princes blindly supported; the Valois branch followed their example, and shortly afterwards, in 1337, broke out the Hundred Years' war between France and England. Vanquished at Crécy, under Philip de Valois, in 1346, and again at Poitiers during John II.'s reign, France somewhat recovered herself, from 1364 to 1380, under Charles V. The minority, and afterwards the insanity of Charles VI., the conflicting interests of the royal princes, the power of the house of Burgundy, and the conflicts between the Burgundians and Gascons, again shook the very fabric of the kingdom. The English, after the crowning victory of Agincourt, in 1415, occupied nearly all the maritime provinces of France, when the extraordinary successes of Joan of Arc, in 1429, changed the aspect of affairs. Charles VII. was now crowned at Rheims, and the English, after a succession of battles, finally evacuated France in 1453. Louis XI. was successful in curtailing the power of his vassals, and added considerable territories to his kingdom, from 1461 to 1483. Charles VIII. was engaged in the Italian wars; Louis XII. exhausted his kingdom in continuing them; Francis I., who defeated the Swiss at Marignano, in 1515, but was himself conquered and taken prisoner at Pavia in 1525, found himself unable to resist the enormous power of the emperor Charles V. In Henry II.'s reign, 1562 to 1589, the religious wars commenced between the Catholic and Huguenot parties, devastating and impoverishing the kingdom; and in 1589, the death of Henry III. terminated the Valois line of monarchs. With Henry IV. the Bourbon branch rose to the throne; and this good king put an end to the civil war, healed the wounds of his country, and gave her peace to recover from her exhaustion. Under Louis XIII., from 1610 to 1643, Cardinal Richelieu broke up the remaining power of the feudatories of the crown, and laid the foundations of the absolute monarchy of the succeeding sovereign. The "Thirty Years' war," resulting in the treaty of Westphalia, in 1648, and subsequently that of the Pyrenees, in 1659, made France the first power in continental Europe. The treaties of Nimeguen and Ryswick, in 1648 and 1659 respectively, were not disadvantageous to her, although she had to sign an unfavourable peace at Utrecht, in 1713, after the war of the Spanish Succession. Under Louis XV., from 1715 to 1774, Lorraine and Corsica were acquired, but in other respects the country gave way before the influence of Austria, and lost many of her colonies. At this period, however, the literature of France made great strides, and her language became that of nearly every European court. Under Louis XVI., assistance was rendered to the American revolutionists to become independent of their mother-country, and in 1789 occurred the Revolution, which overthrew, at the same time, the old constitution of France and its reigning dynasty. The republic existed from 1792 to 1804, when the empire of Napoleon I. was established, and lasted till 1814. The Bourbons now returned, and in the persons of Louis XVIII. and Charles X. (with the exception of the "hundred days" after Napoleon's escape from Elba), held the crown till 1830, when its younger branch, represented by Louis Philippe, was elected to reign over the French. On February 24, 1848, a sudden revolution overturned the monarchy and established there public. In 1852,

this gave place to the new Bonaparte empire, under Napoleon III.

FRANCE, ISLE OF. (*See* MAURITIUS.)

FRANCHE-COMTÉ, or UPPER BURGUNDY, *franzh kone'-tai*, the name, before the Revolution, of a province of France, adjacent to Switzerland and Lorraine. Its capital was Besançon, and it is now divided into the departments Haute-Saône, Jura, and Doubs.

FRANCIA, Francisco, *fran'-che-a*, a distinguished Italian painter, who, from being a goldsmith and engraver on metals, rose to eminence as an artist. Having been employed by Raphael to place a picture of his in a church at Bologna, he was so struck with its beauty, and so disheartened at his own inferiority, that he sank into despair and died, 1518. B. at Bologna, 1450.

FRANCIS I., *fran'-sis*, king of France, succeeded to the throne in 1515, on the death of Louis XII., who died without male issue. Scarcely had he ascended, than he, as grandson of Valentino of Milan, put himself at the head of an army to assert his rights over the Milanese. The Swiss, who opposed him in his entry into the duchy, were defeated at Marignano (or Melegnano), and Milan fell immediately after this victory. After a short war with England, the famous interview between Henry VIII. and Francis took place, in 1520, in Flanders, and which, for the magnificence displayed on the occasion, was called "the Field of the Cloth of Gold." In the same year, Charles V. of Spain having inherited the empire after the death of Maximilian, Francis laid claim to the imperial dignity, and declared war against his rival. In this struggle, however, he met with nothing but reverses. After the defeat of Marshal Lautrec at Bicocca, in 1522, the retreat of Bonnivet, and Bayard's death (*see* these names), Francis was himself, in 1525, beaten at Pavia, and taken prisoner. The fight had been a stout one, and the king wrote to his mother, "All is lost, except honour." Led captive into Spain, he only recovered his liberty at the cost of an onerous treaty, signed at Madrid in 1526; but which was not entirely carried out. He immediately recommenced the war in Italy, met with fresh defeats, and concluded a second treaty at Cambray, in 1529. He once more invaded Italy, in 1536, and, after various success, consented to a definitive arrangement at Crespi, in 1544, by which the French were excluded from Italy, though Milan was given to the duke of Orleans, the second son of Francis. B. at Cognac, 1494; D. at the Château de Rambouillet, 1547, and was succeeded by his son, Henry II.—Francis was a friend to arts and literature, which flourished during his reign; and he was called the Father of Letters. Justice, also, began to be better administered in his reign in France, although the Calvinists suffered great persecutions. He founded the Royal College of France, the Royal Library, and built several palaces.

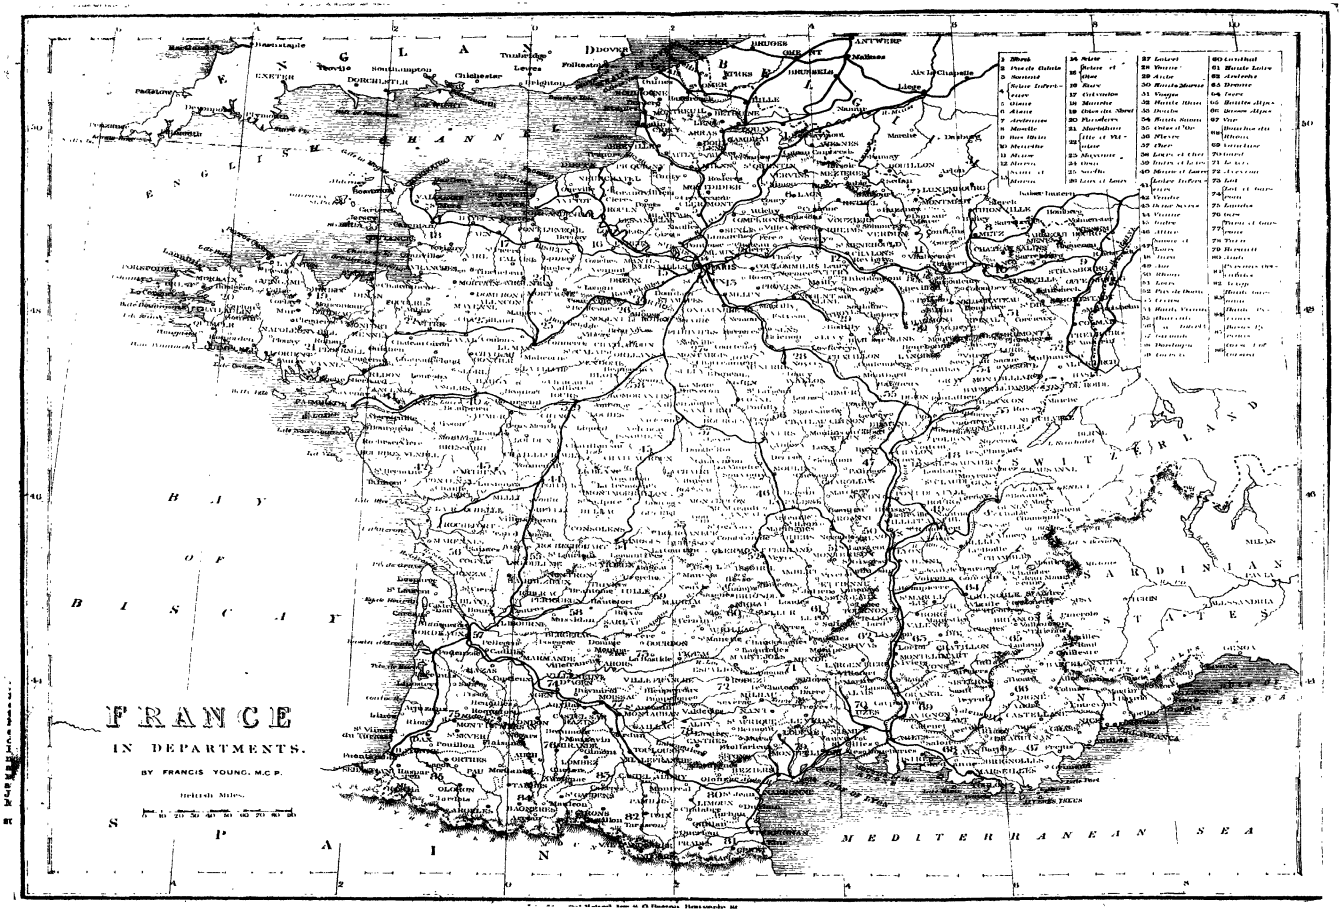
FRANCIS II., king of France, was the eldest son of Henry II. and Catherine de Medicis, and succeeded his father in 1559. The year previous he had married Mary Stuart, queen of Scots, and in 1560 he died, leaving no issue. Francis, duke of Guise, and Charles, Cardinal of Lorraine, held the principal authority in this reign, and, by the abuses of which they were guilty, had a principal share in causing the religious wars to which France now became a prey. Francis was succeeded by his brother, Charles IX.

---

FRANCIS I., emperor of Germany, was the son of Leopold, duke of Lorraine. He inherited this duchy from his father, in 1729, and six years afterwards exchanged it for that of Tuscany, which the death of the last of the Medicis had rendered vacant. In 1736 he married Maria Theresa, the daughter of the emperor Charles VI. On the death of the latter, he disputed the imperial dignity with the elector of Bavaria, whom France supported, and who took the name of Charles VII.; he was, however, defeated, and Francis reigned peaceably for twenty years. B. 1708; D. 1765.—His character was tarnished by avarice. He had sixteen children, amongst whom was Joseph II., who succeeded him, and the unfortunate Marie Antoinette.

FRANCIS II., emperor of Germany, and I. of Austria, succeeded his father, Leopold II., in 1792, as emperor of Germany, king of Bohemia, Hungary, &c. At the very commencement of his reign, he had to sustain a war against France, in which he was defeated, and was, in 1797, obliged to sign the treaty of Campo Formio, which deprived him of the Netherlands and Lombardy. Another war taking place with the same power, he was not more fortunate than in the first, and was beaten at Marengo, and lost, by the treaty of Lunéville, in 1801, all his possessions on the Rhine. In a third campaign, undertaken in 1805, the French were victorious over his armies at Elchingen, Ulm, and Austerlitz; and the treaty of Presburg still further diminished his territory. Renouncing, now, the title of emperor of Germany, he took that of Austria, under the name of Francis I. He tried again the fate of battles in 1809; but the defeats of Eckmuhl and Wagram led to the peace of Schönbrunn; to cement which more strongly, his daughter Maria Louisa was, in 1810, given to Napoleon I. Notwithstanding this alliance, however, he, in 1813, joined the coalition against his son-in-law, and contributed considerably to his overthrow. The treaties of 1815 put him again in possession of the greater portion of his territory, and he reigned peaceably till his death in 1835. B. 1768.—He was succeeded by his son Ferdinand, who, in his turn, abdicated in favour of the reigning emperor, Francis Joseph, in 1848.

---



FRANCIS I., king of the Two Sicilies, was the son of Ferdinand I., and twice, during the lifetime of his father, he carried on the government of the kingdom under the name of viceroy; first, in 1812, when a constitution was granted to Sicily; and afterwards, in 1820, during the troubles which broke out in Naples and Palermo. He mounted the throne in 1820, and died 1830, without having achieved anything remarkable.—He was succeeded by Ferdinand II. (Bomba), who, dying in 1859, was followed by Francis II.

FRANCIS, ST., an Italian, the founder of the order of Franciscan monks, was the son of a rich merchant, named Bernardon. He was at first intended by his father for commercial pursuits, and, with that view, studied the French language, which he acquired so perfectly, that he was surnamed Francis. At the age of 24, however, he gave himself up entirely to the religious life, and gained a number of followers, to whom he prescribed that they should possess nothing of their own, should live on alms, and spread themselves over the face of the globe to convert sinners and unbelievers. He himself, in 1219, departed, with this end, for Egypt and Syria. It is said that he had a remarkable vision, in which he saw an angel descend from heaven, with the marks of crucifixion on his body, and that he himself felt the pains of crucifixion at the same moment, and preserved the same marks in his flesh. B. at Assisi, Umbria, 1182; D. 1226.—There are other saints, in the Roman Catholic calendar, of this name.

FRANCIS, ST., a river of Missouri, U.S., rising 25 miles from St. Génévière, and falling in the Mississippi, 45 miles from Memphis. Its singularly pellucid waters abound in fish.—The name of various places in the United States.

FRANCIS, ST., a cape of S. Africa, W. of St. Francis Bay, Cape Colony. *Lat.* 34° 10′ S. *Lon.* 24° 52′ E.—The name, also, of a cape of Conception Bay, Newfoundland.—A lake, formed by the St. Lawrence, Canada, 35 miles from Montreal, 30 miles in length, by 2 in breadth.—A group of islands off the S. coast of Australia. *Lat.* 32° 32′ S. *Lon.* 133° 17′ E.

FRANCISCO, SAN, *fran-sis'-ko*, the capital of the state of California, U.S., stands near the N. extremity of the strip of land forming the S.W. side of Francisco Bay. The town consists of several straight and wide streets, built parallel with the bay; a number of cross streets, extremely steep; and two large squares. Formerly, the buildings were nearly all composed of peculiarly frail wooden or framework structures, which were covered with cotton cloth, and seemed half-house, half-tent. The frequent fires, however, which have devastated the place, caused these tenements to disappear, and, in their places, fine substantial brick buildings were erected. The streets also, which used to be muddy and impassable, are now overlaid with planks in the American fashion, and the paths on

each side are commodious and well kept; indeed, the whole aspect of the place is now that of a thriving and prosperous city. It has spacious and convenient wharfs, built on piles, and capable of receiving the largest ships; and the harbour is filled with sailing and steam-vessels from all parts of the world. By steam-vessels it has connection with Stockton, Sacramento City, and Panama. *Pop.* estimated at upwards of 100,000; but the number is liable to fluctuation. *Lat.* 37° 48′ N. *Lon.* 122° 28′ W.—The BAY may be called one of the finest in the world; the entrance to it is striking, a bold and rocky shore completely land-locking it, and arresting the rush of the tide through the narrow passage which leads to it. Several islands, some of which are verdant to their very tops, whilst others are barren, are inclosed in the bay. The Sierra, a lofty range of inland mountains, rises to the E., and at the N. end of the bay are the bays of San Pablo and of Suisson. The latter, which receives the waters of the Sacramento and Joaquim, is about 10 miles in diameter, and nearly circular in form. The former is not so large. *Ext.* 55 miles long and 7 broad.

FRANCIS, Sir Philip, the supposed author of the celebrated "Letters of Junius," was the son of a clergyman, and educated at St. Paul's School, London. When he was but sixteen, he was placed in the office of Mr. Fox, then minister, and subsequently was fortunate enough to be retained by Mr. Pitt, when this statesman came into power. Afterwards, he was private secretary to General Bligh, then to the earl of Kinnoull, and, in 1763, received an appointment in the War Office, which he held nearly ten years. In 1773 he was named one of the civil members in council for the government of Bengal, and remained in India till 1780, when, having had a duel with Warren Hastings, he returned to England. Here he, in 1784, was returned to the House of Commons, and remained a member till 1807, when he retired from parliament, evincing his interest in public affairs by his pamphlets and newspaper contributions. In 1816, great attention was drawn to him as being the author of the "Letters of Junius," Mr. John Taylor having published an ingenious pamphlet, in which strong evidence was given in support of this opinion. B. at Dublin, 1740; D. in London, 1818.—It may be added, in connection with Sir Philip's supposed authorship of these celebrated letters, that Lords Brougham, Campbell, Mahon, and Macaulay, have not hesitated to declare their conviction that he was that "great unknown;" and to these high names may be added other legal and literary authorities, who entertain the same belief.

FRANCISCO, São, an island of Brazil, from the coast of which it is separated by a channel, called São Francisco river. *Ext.* 24 miles long, by about 10 broad. *Desc.* Of an irregular shape, lessening in width towards the N., and of not a great elevation above the sea. Various small islets surround it, and it is watered by several streams, which increase its fertility. *Pro.* Mandioca, rice, millet, coffee, and tobacco, some of which is exported.—The town, 9 miles from the sea, has its houses principally of mud; but there is a church, built of stone, which rises conspicuously above them. There is also an hospital with a small chapel. *Pop.* of the whole island, about 7,000.

FRANCISCO São, a river of Brazil, rising in the S.W. of the province of Minaes-Geraes, flowing thence through Bahia, forming the boundary between Pernambuco and Alagoas, and, after a course of 1,500 miles, falling into the Atlantic, 50 miles from Sergipe del Rey. It has two mouths, and receives many affluents, both on its right and left; but, owing to the bar at one of its mouths, and its numerous rapids and cataracts, it is not capable of navigation.

FRANCK, Augustus Herman, *frank*, a German divine, who became professor of the Oriental languages, and afterwards of divinity, in the university of Halle. Here he laid the foundation of an orphan-house, which, in 1727, contained upwards of 2,000 children and more than 130 preceptors. He also carried into effect a mission for propagating the Gospel in Malabar. B. at Lubeck, 1663; D. 1727.—His works are, "Sermons and Books of Devotion;" "Methodus Studii Theologici;" "Introductio ad Lectionem Prophetarum;" "Commentaria de Scopo Librorum Veteris et Novi Testamenti;" "Manuductio ad Lectionem Scripturæ Sacræ;" "Observationes Biblicæ." Some of his practical books have been translated into English.

FRANCKLIN, Thomas, *frănk'-lin*, an English divine, who was educated at Westminster school, whence he was removed to Trinity College, Cambridge, where he obtained the degree of D.D. He was also chosen professor of Greek in that university. In 1758 he was appointed to the vicarage of Ware, to which was afterwards added the rectory of Brasted, in Kent. He subsequently became chaplain in ordinary to King George III. B. in London, 1720; D. 1784.—Dr. Francklin translated Phalaris, Sophocles, and Lucian into English, and wrote three plays: the "Earl of Warwick," and "Matilda," tragedies; and the "Contract," a comedy. He also published a volume of sermons on the relative duties, and permitted his name to be prefixed to a translation of Voltaire's works.

FRANÇOIS, St., *franse'-waw*, a town of the island of Guadaloupe, 7½ miles from St. Ann. Sugar and cotton works are extensively carried on. *Pop.* 5,000.

FRANCOLI, *fran-ko'-le*, a small river of Spain, rising about 3 miles from Prades, in Catalonia; thence flowing through Tarragona, and after a course of 30 miles, falling into the Mediterranean, 1 mile from Tarragona.

FRANCONIA, *fran-ko'-ne-a*, one of the ten circles of the ancient empire of Germany, the greater part of which, by the treaties of 1815, fell to Bavaria, and formed the circles of the Higher and Lower Rhine, and Rézat; the rest was divided between Wurtemberg, Baden, Hesse and Hesse-Darmstadt, Prussia, and Saxony.

FRANEKER, *fran'-e-ker*, a town of the Netherlands, well built and very clean, in Friesland, on a canal, 9 miles from the Zuyder Zee. It lies in a fertile district, and is an old place, having, in 1191, obtained some political privileges. In 1585 its university was founded. *Pop.* 4,000.

FRANKENBERG, *fran'-ken-bairg*, a town of Hesse-Cassel, 30 miles from Cassel. *Manf.* Woollen stuffs, cotton, and leather. *Pop.* 3,500.—Another in Saxony, on an affluent of the Muldo, 7 miles from Chemnitz. *Manf.* Linen and cotton weaving; and mining is carried on. The place is of considerable importance. *Pop.* 6,500.

FRANKENHAUSEN, *fran'-ken-how'-sen*, a town of Central Germany, on the Wipper, 30 miles from Erfurt. *Pop.* 5,000.

FRANKENSTEIN, *fran'-ken-stine*, a town of Silesia, standing on an eminence about 850 feet above the level of the sea. *Manf.* Linen, cloths, and powder. *Pop.* 6,300, It is the capital of a circle, with an area of 138 geographical miles, generally flat and fertile. *Pop.* 48,000.

FRANKFORT-ON-THE-MAIN, *frănk'-fort*, a city of Germany, the capital of a district of the same name, and the permanent seat of the Germanic diet, situate on the Main, about 20 miles above its influx into the Rhine. It is divided by the river into two unequal parts: the one on the north bank, called Frankfort Proper, being considerably larger than the other, which is called Sachsenhausen; and the two communicate by a stone bridge. Frankfort was formerly fortified; but most of its outworks are now converted into gardens and promenades, and it is entered by nine gates. The principal streets are wide: there are also many squares, and a number of large buildings; among which may be named the Romer, or old palace, in which the emperors of Germany were elected; the Sturm and Taxis palace and place of the assembling of the Diet; the Saalkof, a modern imperial palace; the Lutheran, or high church; other churches, Jews' synagogues, hospitals, a theatre, an academy of painting, and the Senkenberg Museum. Besides these, there are a geographical society, college, medical institute, and numerous schools. *Manf.* Carpets, table-covers, oilcloths, cotton and silk fabrics, woollen stuffs, jewellery, tobacco, and printers' black. It has, also, large printing, lithographic, and stereotypic establishments. *Pop.* about 70,000. *Lat.* 50° 6′ 43″ N. *Lon.* 8° 41′ 24″ E.—Frankfort was made a free port in 1831, and has a steamboat traffic on the Main. It

has long been noted in history, and Napoleon I. made it the capital of a grand-duchy. Its territory includes an area of 35 square miles, with a population of 75,000.

FRANKFORT-ON-THE-ODER, a well-built town of Prussia, the capital of the regency of Brandenburg, 48 miles from Berlin, with which it communicates by railway. Its university, founded in 1506, was, in 1811, transferred to Breslau. *Manf.* Woollens, silks, leather, earthenware, tobacco, mustard, and brandy. *Pop.* 30,000. *Lat.* 52° 22′ 8″ N. *Lon.* 14° 33′ 24″ E.—This place is the seat of the high court for its regency, a council of nobles, and several industrial boards. Near it is Kunnersdorf, the scene of the victory of the Austrians and Russians over Frederick the Great, in 1759.—THE REGENCY has an area of 8,000 square miles, with a population of 900,000.

FRANKFORT, the name of several townships in the United States, none of them with a population above 5,000.

FRANKFURT, or FRANKFURTH. (*See* FRANKFORT.)

FRANKLAND ISLANDS, *frănk'-land*, a group lying off the E. coast of Australia, in *lat.* 17° 16′ S.; *lon.* 146° E.

FRANKLIN, Benjamin, *frănk'-lin*, an American patriot, and one of the most distinguished of modern philosophers, was the son of a soap-boiler and tallow-chandler in the city of Boston. He was designed for the ministry; but his father requiring his assistance at home, took him from school, when only 10 years old, and set the future philosopher to "the cutting of wicks for the candles, filling moulds," and other duties necessary to his business. Disliking this occupation, however, he was placed under his elder brother, who was a printer in Boston, but with whom he disagreed. He then removed to New York, whence he went to Philadelphia, where, after serving as a journeyman some time, he attracted the notice of Sir William Keith, the governor, who persuaded him to commence business on his own account. With this view he proceeded, in 1725, to England, to procure printing materials; but on his arrival he found that the governor had deceived him by false promises; on which he worked as a journeyman in London, in the establishment now belonging to Messrs. Cox & Wyman, the printers of this work. He now produced his "Dissertation on Liberty and Necessity, Pleasure and Pain," which was the means of introducing him to Mandeville, the author of "The Fable of the Bees." In 1726 he returned to America, and entered into partnership with a person named Meredith, in the printing trade, which he afterwards conducted alone in the city of Philadelphia. In 1730 he was united to a widow lady, whom he had courted before her first marriage; and, about the same time, contributed to the forming of the public library at Philadelphia, and subsequently established an insurance office and other useful institutions in the same town. In 1732 he published his "Poor Richard's Almanack," which became noted for the pithiness of its proverbs, and wherein were inserted those maxims so generally known by the title of "The Way to Wealth." In 1736 he was appointed clerk to the General Assembly at Pennsylvania, and, in the year following, postmaster of Philadelphia. He was now a prominent member of the community. In 1742 he invented what is still called "the Franklin stove;" and, two years later, proposed and carried into effect a plan of association for the defence of Philadelphia. About this time he commenced his electrical experiments, of which he published an account, and had the honour of making several discoveries in this branch of philosophy, the principal of which was the identity of lightning with the electric fluid. Hence he invented the lightning-conductor. In 1747 he was chosen a representative of the General Assembly, in which he distinguished himself by several acts of public utility. By his means a militia bill was passed, and he was elected colonel of the Philadelphia regiment, but the honour of this appointment he declined. In 1757 he was sent to England as agent for Pennsylvania. Whilst in that country he was chosen fellow of the Royal Society, and honoured with the degree of doctor of laws by the universities of St. Andrews, Edinburgh, and Oxford. In 1762 he returned to America, but two years afterwards revisited England, in his former capacity, when he underwent his examination at the bar of the House of Commons concerning the Stamp Act. In 1775 he returned to America, and was elected a delegate to the Congress. In the contest between Great Britain and her transatlantic colonies, he took an active part in the declaration of independence. In 1778 he arrived in France as minister plenipotentiary from America, and signed a treaty offensive and defensive with that power, and which produced a war between France and England. In 1783 he signed the definitive treaty of peace recognizing the independence of the United States, and in 1785 returned to America, where he was triumphantly received, and chosen president of the supreme council. It was on this occasion that he received the following tribute of admiration from an American even still more distinguished than himself in the annals of his country:—"*Mount Vernon, September* 25, 1785.—DEAR SIR,—Amid the public gratulations on your safe return to America, after a long absence, and the many eminent services you had rendered it,—for which, as a benefitted person, I feel the obligation,—permit an individual to join the public voice in expressing his sense of them; and to assure you that, as no one entertains more respect for your character, so none can salute you with more sincerity or with greater pleasure than I do on the occasion.—GEORGE WASHINGTON." From 1785 to 1788, and in 1787, he sat with Washington and Hamilton in the federal Convention, which framed the constitution of the United States. B. in Boston, 1706; D. 1790. His death was sincerely mourned both in Europe and America. Besides his political, miscellaneous, and philosophical pieces, published in 4to and 8vo, he wrote several papers in the American Transactions, and two volumes of essays, with his life prefixed, written by himself, 2 vols. 12mo.

FRANKLIN, Sir John, a distinguished English navigator, who, in 1800, entered the royal navy as a midshipman. In 1806 he was present at the battle of Trafalgar, and in 1814 at that of New Orleans, and in 1819 was appointed to head an overland expedition from Hudson's Bay to the Arctic Ocean. After suffering many hardships, and being frequently on the verge of death, from hunger and fatigue, he reached home in 1822, when, in the following year, he married a Miss Purden, the daughter of an architect, and the authoress of several poetical effusions. In 1825 he submitted to Lord Bathurst a plan "for an expedition overland to the mouth of the Mackenzie River, and thence by sea to the N.W. extremity of America, with the combined object also of surveying the coast between the Mackenzie and Copper-mine rivers." This proposition was accepted, and, six days after he left Liverpool, in the same year, his wife died. In 1827 Captain Franklin arrived at Liverpool, where he was married a second time, and in 1829 had the honour of knighthood conferred upon him. In 1845 Sir John set out on a third expedition with two ships, called the *Erebus* and *Terror*, and spent his first winter in a cove between Cape Riley and Beechy Island. After that period many expeditions were despatched, both from England and America, in search of Sir John, of whom there were no tidings, and not until 1854 did the intelligence reach England that the brave navigator and his heroic companions had, in all probability, perished in the winter of 1850-51. This intelligence, however, wanted confirmation, and Lady Franklin, who deserves all praise for the intelligent persistency of her efforts, resolved to have the mystery cleared up as to whether her gallant husband had really met the fate which it was generally believed he had done. Accordingly, a last expedition was fitted out, and the melancholy news was, in 1859, at length confirmed by the return of Captain McClintock, in the yacht *Fox*, after a persevering search for the lost adventurers. This officer brought with him indisputable proofs of the death of Sir John and the loss of his crew. Several articles belonging to the unfortunate explorers were found at Ross Cairn and Point Victory. At the latter place a record was discovered, wherein it was stated that Sir John Franklin had died on the 11th of June, 1847. Other traces were found on the west coast of King William's Island, as the various survivors of the expedition had strayed from each other, perhaps in search of food, or the means of escaping

from their dreary and desolate situation. To Sir John Franklin, however, belongs the merit of having discovered the north-west passage, the first expedition in quest of which was sent out in 1553, the last being said to have terminated only with the discovery of his remains. B. at Spilsby, Lincolnshire, 1786; D. 1847.

FRANKLIN, the name of several counties in the United States, with populations varying between 8,000 and 30,000. They lie in the states of Maine, Vermont, Massachusetts, Pennsylvania, New York, N. Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, Ohio, Kentucky, Indiana, Missouri, Arkansas, Virginia, and Illinois.

FRANKLIN, the name of several townships in the United States, with populations varying between 2,000 and 5,000.—The name also of numerous villages with small populations.

FRANKLIN ISLAND, an island in the Antarctic Ocean, entirely composed of igneous rocks. *Ext.* 12 miles long. The wild nutmeg has been found upon it, and the Torres Strait rat abounds. *Lat.* 17° 13′ S. *Lon.* 146° 8′ E.—It was discovered by Sir John Ross.

FRANZENSBRUNN, *franz'-ens-broon*, a village of Bohemia, 18 miles from Elbogen, noted for its bath establishments, which annually export about 200,000 jars of mineral water.

FRASCATI, *fras-kat'-te*, a town in the Campagna di Roma, situate on one of the lower Alban hills, 12 miles from Rome. It has a seminary, richly endowed by Cardinal York, who was once bishop of its cathedral, which contains monuments to him and his brother Prince Charles-Edward Stuart, historically called the Pretender, who died here in 1788. *Pop.* 5,000.—Here are the remains of the ancient Tusculum, the birthplace of Cato and residences of Lucullus, Cicero, and Mæcenas. The Romans destroyed it at the end of the 12th century.

FRASERSBURGH, *frai'-sers-burg*, a seaport-town and parish of Aberdeenshire, Scotland, about 18 miles from Peterhead. Its harbour was constructed at a cost of £50,000. *Manf.* Sail-cloth, rope, linen yarn, and kelp. *Pop.* 4,500.

FRAUNHOFER, Joseph, *froun'-ho-fer*, an eminent Bavarian optician, who, in his 20th year, was received into the great manufactory for the construction of mathematical and philosophical instruments, near Munich. Here he distinguished himself by making many experiments on light, and by his reputation, increased the resources of the establishment, which ultimately became his own property. He was a member of several learned societies, and had conferred upon him, by the king of Bavaria, the order of Civil Merit, and, by the king of Denmark, that of Danebrog. B. at Straubing, 1787; D. 1826.

FRAUSTADT, *frou'-stat*, a town of the Prussian states, in the grand-duchy of Posen, 70 miles from Breslau. *Manf.* Morocco leather, woollen and linen fabrics, and hats. It is a place of considerable trade in cattle and corn.—In 1706 the Swedes here defeated the Saxons and Russians.

FRAUWENLOB, Henry, *frou'-ven-lobe*, a German author, who wrote popularly in behalf of the female sex. Anumber of ladies, it is said, attended his funeral, and poured so large a quantity of wine over his grave as to overflow the church. D. 1317.

FRAZER. (*See* LOVAT, Lord.)

FRAZER RIVER is in British Columbia, N. America, and is distinguished for the gold discoveries made on its shores in 1858. It falls into the Gulf of Georgia, opposite the island of Vancouver. *Lat.* 45° N. (*See* COLUMBIA, BRITISH.)

FREDERICIA, *fred'-e-rish'-e-a*, a fortified town of Denmark, in Jutland, on the Little Belt, with a custom-house, 12 miles from Veyle. *Pop.* about 5,000. *Lat.* 55° 35′ N. *Lon.* 9° 44′ E.

### EMPERORS OF GERMANY.

FREDERICK I., *fred'-e-rik*, surnamed Barbarossa, emperor of Germany, the son of Frederick, duke of Suabia, succeeded to the imperial throne on the demise of his uncle, Conrad III., in 1152. He was an energetic and warlike prince, and in the second year of his reign, settled the disputes between Canute and Sweyn, competitors for the Danish crown, the former of whom he held as his vassal. He next marched into Italy to settle the tumults which distracted that country, and was crowned at Rome by Adrian IV., who, dying in 1160, no less than three antipopes were chosen, who were all opposed by the emperor. The Milanese, profiting by these divisions, endeavoured to shake off the imperial yoke, on which Frederick again entered Italy, took Milan, and entering Rome, set Calixtus on the papal throne instead of Alexander. The Venetians, however, maintained the cause of the latter with so much vigour, that Frederick was obliged to make his submission to Alexander. He next embarked against the infidels, obtained some victories, took Iconium, and penetrated into Syria, where he was drowned in 1190. D. 1121.

FREDERICK II., the grandson of the preceding, and son of Henry VI., was elected king of the Romans in 1196, and emperor in 1210, in opposition to Otho. In 1220 he was crowned by Pope Honorius III. at Rome. He afterwards went to the Holy Land, and concluded a truce with the sultan of Babylon, which so provoked Pope Gregory IX., that he anathematized him. In the city of Jerusalem he put the crown on his own head, because no priest would even say the mass. On this, Frederick returned to Europe and laid siege to Rome, which occasioned the famous parties of the Guelphs and the Ghibellines, the former being on the side of the pope, and the other on that of the emperor. Gregory was obliged to make peace, but, in 1236, he again excommunicated Frederick, and the war was renewed, which proved unsuccessful to the emperor, whose German subjects revolted against him. He lost Parma by an insurrection, and was defeated before it; but he afterwards was victorious in Lombardy. B. 1194; D. at Fiorintino, 1250.

FREDERICK III. was the son of Albert I., and was chosen emperor in 1314, by some of the electors, but the majority elected Lewis of Bavaria, who defeated and took prisoner Frederick at Muhldorf, in 1322. The latter then renounced his claim, and D. 1330.

FREDERICK IV., called the 'Pacific,' ascended the throne in 1440, and was crowned at Rome in 1452. His reign was passed in forming plans for the pacification of the empire. He is said to have died of a surfeit of melons, or in consequence of an amputation of his leg. He left it to his son Maximilian to carry out the device inscribed upon his palaces and books, A, E, I, O, U; which characters are generally supposed to represent the motto *Austriæ est Imperare Orbi Universo*. B. at Innspruck, 1415; D. 1493.

---

FREDERICK, king of Sweden, was the eldest son of Charles, landgrave of Hesse-Cassel. He married the sister of Charles XII., on whose death, in 1718, the states of Sweden elected her queen, and in the year following, consented to her resigning the crown to her husband. He had a long and unsuccessful war with Russia, which ended in a disadvantageous peace to Sweden. He then gave his energies to the pursuits of peace, restored the finances, aided agriculture and commerce, and founded an academy at Stockholm. D. without issue, 1751.

### KINGS OF DENMARK.

FREDERICK I., king of Denmark and Norway, succeeded his nephew Christiern, or Christian II., on the deposition of the latter, in 1523, and entered into an alliance with Gustavus I., king of Sweden. After taking Copenhagen, he gained over all the nobility, and introduced Lutheranism into his dominions. B. 1473; D. 1533.

FREDERICK II., the son and successor of Christiern or Christian III., was a great friend of learning, and was a patron of Tycho Brahe and other men of science. He waged a long war with Sweden, which ended in 1570, and received the order of the Garter from Elizabeth, queen of England, and gave his daughter in marriage to James VI. of Scotland and I. of England. B. 1534; D. 1588.

FREDERICK III. succeeded his father Christiern IV. in 1648. The most remarkable event of his reign was his changing the constitution from an elective to an hereditary monarchy. B. 1609; D. 1670.

FREDERICK IV. ascended the throne on the death of Christiern V. in 1699. He leagued against Charles XII.

of Sweden, who forced him to make peace; but when Charles fled to Turkey, Frederick drove the Swedes out of Norway, and concluded a favourable peace, retaining possession of the duchy of Schleswig. B. 1671; D. 1730.

FREDERICK V., grandson of the preceding, came to the throne in 1746. The character of his reign may be inferred from the following remark, which, on his deathbed, he made to his successor Christiern VII.: "It is a great consolation to me, my son, that I have not injured any person, and that my hands are not stained with one drop of blood." He was twice married; first to Louisa, daughter of George II. of England, and then to Juliana, daughter of the duke of Brunswick-Wolfenbuttel. B. 1723; D. 1766.

FREDERICK VI., king of Denmark, ascended the throne in 1808, although, since 1784, he was associated in the government with his father, who had lost his reason. On his accession, he had to repair the damages done by the English in their bombardment of Copenhagen in 1807, and to wage a war with the Swedes, who attempted to possess themselves of Norway. He succeeded in defeating them, and peace was signed at Jon Kœping, in 1809. Allying himself with Napoleon, Norway was, in 1814, given to Sweden, under Bernadotte; Pomerania and the isle of Rugen falling to Denmark. More tranquil times now arriving, Frederick devoted himself to the extension of the internal resources of his kingdom. B. 1768; D. 1839.

---

FREDERICK AUGUSTUS II. (*See* AUGUSTUS FREDERICK II., King of Poland.)

FREDERICK AUGUSTUS III. (*See* AUGUSTUS FREDERICK III.)

### SOVEREIGNS OF PRUSSIA.

FREDERICK WILLIAM I., generally called the *Great Elector* of Brandenburg, succeeded his father, the elector George William, in 1640, and, in 1642, obtained the investiture of Prussia from the king of Poland. He is considered as the founder of the Prussian power, and from his example, much of the military spirit which characterizes that nation is believed to have sprung. He entered on a war with Sweden, but was obliged to make peace in 1655, in which year he assisted that power against Poland. In 1672 he joined the imperialists in opposition to Louis XIV.; but, in 1673, he made a separate treaty with France, and, in the following year, again joined the allies; on which the French prevailed upon the Swedes to attack his dominions. Frederick, however, defeated the invaders, drove them out of Prussia, and took several places from them, which, however, by the treaty of St. Germain, in 1679, he was obliged to restore. He now turned his attention to the improvement of his states, and, by affording protection to the French Protestant refugees, added to the industrial power of his dominions 20,000 manufacturers, and laboured to extend the agricultural arts in every direction. He founded the library at Berlin, and a university at Duisburg; and at his death, bequeathed to his son not only a country enlarged beyond the boundaries in which he found it, but a treasury well supplied. B. 1620; D. 1688.—In order to avoid the possibility of being entrapped in an immoral society, this prince fled from the Hague to the camp of the prince of Orange, then at Breda. The Dutch prince was surprised at this signal instance of self-command, and received him with these words: "Cousin, your flight is a greater proof of heroism than would be the taking of Breda. He who so early knows how to command himself, will always succeed in great deeds." These words remained for ever deeply impressed on his mind.

FREDERICK I., king of Prussia after 1701, but as elector of Brandenburg Frederick III., succeeded to his father's dominions in 1688. The great object of his ambition was to be recognized king of Prussia, and in 1701 he attained his object. On that occasion he put the crown on his own head, and on that of his royal consort. He also founded the order of the Black Eagle, and augmented his dominions by the county of Tecklenburg and the principality of Neufchâtel and Valengin. B. 1657; D. 1713.—This prince founded the university of Halle, the Royal Society of Berlin, and the Academy of the Nobles. His queen Sophia Charlotte, of Hanover, was the sister of George I., and a woman possessed of a fine understanding.

FREDERICK WILLIAM I., son of the above, and father of Frederick the Great, commenced his reign in 1713, after having married a daughter of the elector of Hanover, afterwards George I. of England. In 1715 he declared war against Charles XII. of Sweden, and in conjunction with Denmark took Stralsund; but on the death of Charles, in 1718, he made peace. B. 1688; D. 1740.—The habits of this sovereign were entirely military, and he laboured unwearyingly to promote the discipline of his troops. One of his strongest peculiarities was an extraordinary love for tall soldiers; and in order to procure these sons of Anak, he had agents employed in all parts of Europe. He held science and literature in profound contempt; but money he worshipped, and men of a military character after his own ideal, he respected and encouraged. The consequence was, that he left an abundant treasury and a well-appointed army of 66,000 men.

FREDERICK II., king of Prussia, commonly called 'The Great,' was the son of the preceding, and received but an indifferent education, owing to his father's contempt of letters and predilection for military discipline. On attaining the years of manhood,

FREDERICK THE GREAT.

he evinced so strong an inclination to literature and music, that he incurred the displeasure of his parent, whose treatment induced him, in 1730, to make the attempt of escaping from Prussia. The scheme, however, being discovered, he was confined in the castle of Custrin, his young companion, Katte, being executed before his face. After a confinement of several months, he obtained his pardon, although it seems well authenticated, that his father had resolved to take away his life, and was only saved by the intercession of Charles VI., emperor of Austria. In 1733 he married the princess of Brunswick Wolfenbuttel, in obedience to his father's command, when he employed himself in literary pursuits, and also with the study of music, until his accession to the throne. In 1740 he succeeded to the crown, and taking advantage of the defenceless state of Maria Theresa, queen of Hungary, he marched into Silesia, which was added to his dominions by the treaty of Breslau. In 1744 the war was renewed against the queen of Hungary, and the same year Frederick took Prague, which, however, he was forced to evacuate, on the approach of a Saxon army under the prince of Lorraine. In 1745 he defeated that prince at Friedburg, and then marched into Bohemia, where, at Sorr, he defeated an Austrian army superior to his own. Shortly after, he took Dresden, where, after laying it under heavy exactions, a treaty of peace

was concluded, which enabled Frederick to retain possession of Silesia, and end the second Silesian war. The eleven years of peace which succeeded this event, were devoted by Frederick to the internal administration of his dominions, the composition of some literary works, and the framing of the "Frederician code of laws." In 1750 Voltaire visited Prussia, and was received with the most flattering marks of attention by the king; but the friendship which subsisted between them was at last broken, and the French philosopher quitted Prussia abruptly, and in disgrace. In 1756 a treaty was concluded between England and Prussia, which produced another between France, Austria, and Russia. "The Seven Years' war," as it is called, began by Frederick marching into Saxony, and taking the camp of Pirna. The following year, he gained a great battle at Prague over the Austrians, on which he laid siege to that city, and after reducing it to great straits, he was compelled by Marshal Daun, who defeated him at Kolin, to retire into Saxony. Frederick was now surrounded by enemies: the French entered Hanover, the Russians and Swedes advanced towards Prussia, and the Imperialists pursued him into Saxony. Still undaunted, he attacked and defeated the French and Austrians at Rosbach; then marching into Silesia, beat another army at Lissa, and recovered Breslau. The Russians and Swedes retreated precipitately from Prussia; and the Hanoverians took the field under the prince of Brunswick. In 1758 he received a large subsidy from England; and the same year entered Moravia, where he laid siege to Olmutz, which was relieved by Marshal Daun. He then marched against the Russians, who had laid siege to Custrin, and defeated them, after a bloody battle, at Zorndorf. Not long after this, however, he was surprised and beaten by Daun, at Hockkirchen. The next year the king was defeated, after a very obstinate and doubtful engagement, at Cunnersdorf, by the Russians; and in 1761, the confederates entered Brandenburg, and took Berlin. Frederick, however, by defeating Daun at Torgau, put a new face upon the campaign, and the Russians and Swedes were compelled to quit his territories. In 1762 peace was restored between him and Russia and Sweden, and in 1763 a treaty, much in his favour, was concluded with the empress-queen, by which Silesia was confirmed to Prussia, and which concluded the "Seven Years' war." Still ambitious of extending his dominions, in 1772 the partition of Poland was planned, and he obtained for his share all Polish Prussia, and a large portion of Great Poland. From this period the kingdom of Prussia was divided into East and West Prussia. In 1778 he opposed the design of the emperor Joseph to dismember Bavaria, and marched in person against that monarch; but no action took place, and by the treaty of Teschen, in 1779, the Austrian court renounced its design. In 1786 he concluded a treaty of amity and commerce with the United States of America; but his days were fast drawing to a close, for the same year he died, at his favourite palace of Sans Souci, in the forty-seventh year of his reign. B. 1712.—Frederick was courteous in his manners, and an acute politician. His works, published in his lifetime, are in four vols. 8vo; and since his death, fifteen more have been printed. The principal are, the "Memoirs of the House of Brandenburg;" a poem on the "Art of War;" the "History of his Own Time;" and the "History of the Seven Years' War." While we write, Mr. Carlyle is engaged in completing his "Life and Times of Frederick the Great," the first two volumes of which appeared in 1859.

Frederick William II., king of Prussia, was the nephew of the great Frederick, and succeeded him in 1786. He gave himself up to pleasure, sacrificing his ministers and generals to the caprices of his mistresses. He also allowed himself to be cajoled by the mystical vagaries of the society of the "Illuminati," and under his feeble rule, Prussia soon lost her place amongst nations. After having played a scarcely honourable part in the war which broke out in 1787 between Turkey and Russia, he proposed, in 1792, a coalition against the French republic. Advancing, at the head of 80,000 men, as far as the plains of Champagne, the world was expecting to see him march on Paris, when he suddenly retired, falling back on the Rhine. The following year, he effected, with the aid of Russia, the second division of Poland; made peace with France in 1795, and D. 1797. B. 1744.

Frederick William III., king of Prussia, son of the above, commenced his reign in 1797 by maintaining a strict neutrality in the various alliances with and against France, which resulted from the ambitious designs of Napoleon I. In 1805, however, he yielded to the solicitations of Russia, allying himself with the czar against the French emperor. The rapid campaign of 1806, and the defeat of the Prussians at Jena, opened the gates of Berlin to the enemy, in whose hands it remained till 1809. In 1807 the battle of Friedland led to the humiliating peace of Tilsit, by which Frederick lost half his dominions. Restored to his capital, the king diligently endeavoured to repair the evils of war; but new disasters overtook him, and his kingdom suffered greatly during the struggle from 1812 to 1814. Forced, in the former year, to contribute a force of 30,000 men to Napoleon's army, he subsequently joined his troops with those of Russia. The allies having triumphed over the French at Leipsic, Frederick William, in 1814, entered Paris with the Czar Alexander. He also accompanied the latter to England in the same year. On the return of Napoleon from Elba, he once more joined the allies. After the victory of Waterloo, in which the Prussians, under Blucher (whom *see*), played an important part, Prussia, once more at peace, gradually recovered the losses she had sustained, under the wise and paternal sway of Frederick, whose constant efforts and moderation contributed greatly to the maintenance of peace. D. 1840.—Throughout his life, he was a warm defender of the Protestant religion, and a patron of education. He never redeemed his promise, however, to bestow a representative constitution on his people. The establishment of the provincial estates only affected very slightly the absolute power, which, it is true, he wielded with ability, and with a kind of paternal affection for his people. It may finally be said of him, that, a waverer between the absolutist party and the liberal party, he secured, as is the lot with most undecided men, the respect and adherence of neither.

Frederick William IV., king of Prussia, on the death of his father, succeeded to the throne in 1840. He served, as a simple officer, in the campaigns of 1813 and 1814, and evinced, at an early period of his life, a very great love for the arts, which he preserved throughout his career. During the first years of his reign, his subjects anxiously demanded the reform of *the government*, requiring the liberal *constitution* which had been promised them in 1815, in return for the great sacrifices they had made during the continental war. In 1847, at a general diet of the Prussian states, many of these reforms were granted, and it was thought that the kingdom might escape the troubles of the next year's revolution. In March, 1848, however, the people and the troops came into collision, the king was obliged to change the ministry, to issue a general amnesty, and to commence a war in favour of Schleswig against Denmark, and to salute from his balcony the corpses of the insurgents. These humiliations were somewhat softened by his hopes of becoming emperor of a united Germany, and by the success of his army in putting down an insurrection of the Poles in Posen. The mingled irresolution and absolutism of Frederick, however, led subsequently to other conflicts in June and August of the same year; and it was not until two *coups-d'état* that Frederick, assisted by his army, succeeded in retaining his authority almost unimpaired by the powers he had yielded. In the war between the Western powers and Russia, the king preserved a strict neutrality, although earnestly solicited by each party to espouse its side in the conflict. In his reply to the demands of the czar, he said: "There is hardly anything I will not do for the emperor Nicholas, whom I love; but if I remember that he is my father-in-law, neither do I forget that Prussia is not the sister-in-law of Russia." In 1856, in consequence of an attack on Neufchâtel by some Prussian partisans, war was in danger of breaking out between Switzerland and Prussia; but this was avoided, and a treaty concluded, in May, 1857, in reference to the king's claims on that place. In the complications relative to the Danubian principalities, Prussia followed the lead of France and

Russia as opposed to England and Austria. Towards the end of 1857, a severe illness, resulting in the loss of some of his faculties, caused his brother WILLIAM to be nominated regent.

FREDERICK WILLIAM NICHOLAS CHARLES, nephew of Frederick William IV., and son of William, prince of Prussia, is heir presumptive to the Prussian throne, and married, in 1857, Victoria, the princess royal of England. B. 1831.

FREDERICK, Colonel, son of the unfortunate Theodore, commonly called king of Corsica, was bred to the military profession, and obtained the rank of colonel, with the cross of the Order of Merit, from the duke of Wurtemberg, for whom he acted as agent in England. Being greatly reduced in circumstances, he shot himself in the portal of Westminster Abbey, in 1790. He wrote—1. "Mémoires pour servir à l'Histoire de Corse," 1768, 8vo; 2. "The Description of Corsica, with an Account of its Union to the Crown of Great Britain," &c., 1793, 8vo.

FREDERICK, two counties of the United States. 1. In Maryland. *Area*, 560 square miles. *Pop.* 45,000.—2. In Virginia. *Area*, 480 square miles. *Pop.* 16,000.

FREDERICKSBERG, *fred'-e-riks-berg*, a town of Virginia, U.S., on the S.W. bank of Rappahannock River, 48 miles from Washington. It has several churches, a court-house, gaol, and market-house. *Pop.* 4,500.—In its neighbourhood are the falls of the Rappahannock, which afford a strong motive power to the machinery of some mills. The town is supplied with water conveyed by pipes from the river.

FREDERICKSBORG, *fred'-e-riks-borg*, a citadel of Sweden, 15 miles from Stockholm, the entrance to the harbour of which it defends.

FREDERICKSHALD, *fred'-e-rik-shalt*, a town of Norway, at the influx of the Tistedalself into the Idefiord, 55 miles from Christiania. It is well built, has a good harbour, and an active trade. *Pop.* 6,000.—Charles XII. of Sweden was here killed in the trenches before the fortress of Frederickstein, on 11th December, 1718.

FREDERICKSHAMM, or HAMINA, *fred'-e-rik-sham*, a fortified town of Finland, 52 miles from Wyborg. *Pop.* 1,500.—Here, in 1809, the treaty which ceded Finland to Russia was signed.

FREDERICKSHAVN. (*See* FLADSTRAND.)

FREDERICK'S OORD, *fred'-e-riks ord*, a pauper colony of the Netherlands, on the borders of Overyssel and Friesland, 5 miles from Steenwick. It consists of a large number of paupers, who are here employed in various manual occupations for the benefit of the state.

FREDERICKSTADT, *fred'-e-rik-stat*, a well-built town of Denmark, 18 miles from Schleswig. *Pop.* 2,500.—It was founded by the Arminians, who in 1621 were driven from the Netherlands by the decisions of the synod of Dort.

FREDERICKSTADT, a fortified town of NORWAY, in the Skager-rack, 46 miles from Christiania. *Manf.* Tobacco, and it has an arsenal. *Pop.* 2,700.

FREDERICKTOWN, *fred'-e-rik-town*, the capital of New Brunswick, N. America, 55 miles from St. John's. It is the seat of the provincial assembly, and of King's College, in which the curriculum of education is similar to that pursued at Oxford. *Pop.* 6,000.

FREETOWN, *free'-town*, a post-township of Bristol county, Massachusetts, U.S., on the Taunton, 9 miles from Taunton. *Pop.* 3,000.

FREETOWN, or ST. GEORGE, the capital of the British settlement Sierra Leone, in Upper Guinea, W. Africa. It has various government offices, schools, and a barracks. *Lat.* 8° 29′ N. *Lon.* 13° 14′ W.

FREGOSO, Baptist, *frai-go'-so*, a doge of Venice, in 1478, who was deposed and banished for his arbitrary and oppressive conduct. He wrote on Memorable Actions, the "Life of Pope Martin V.," on Learned Women, &c.—There are others of this family who have played various parts in Italian history.

FREHEL CAPE, *fre'-el*, a promontory of France, in the Côtes-du-Nord, on the English Channel. *Lat.* of lighthouse, 48° 41′ 5″ N. *Lon.* 2° 19′ W.

FREIBERG, a town of Saxony. (*See* FREYBERG.)

FREIBERG-IN-BREISSGAU, a town of Baden. (*See* FREYBERG, &c.)

FREIBOURG. (*See* FRIBOURG.)

FREIBURG. (*See* FREYBERG.)

FREIND, John, *frinde*, an English physician, who, having distinguished himself by some able works, was, in 1704, appointed chemical professor at Oxford, and, in the following year, accompanied the earl of Peterborough in his expedition to Spain, as physician to the army. On his return, in 1707, he published a vindication of the earl's conduct in Spain, which gained him considerable reputation. The same year he took his doctor's degree, and published his Chemical Lectures. In 1711 he was chosen a member of the Royal Society, and, the same year, accompanied the duke of Ormond to Flanders. In 1716 he was elected a fellow of the College of Physicians; and, in 1722, sat in parliament for Launceston. The year following he was sent to the Tower, on suspicion of being concerned in Atterbury's plot, but was soon released on bail. At the accession of George II. he was appointed physician to the queen. D. at Croton, Northamptonshire, 1675; D. 1728.—Amongst other works, he wrote "The History of Physic," 2 vols. 8vo; and all his writings were collected and published in Latin, by Dr. Wigan, 1 vol. folio.—DR. ROBERT FREIND, his brother, was master of Westminster school, and wrote some excellent Latin and English poetry, besides having taken a part in the celebrated controversy regarding the epistles of Phalaris. He also published an edition of "Cicero de Oratore." D. 1764.

FRÉJUS, *frai'-zhoo*, a town of France, in the department of the Var, 40 miles from Toulon. It has an episcopal palace and a cathedral. *Pop.* 3,000.—It was here that Bonaparte landed, on his return from Egypt in the autumn of 1799; and here he also disembarked, after his escape from Elba, in 1814.

FREMONT, John Charles, *fre-mont'*, a modern American politician and traveller, called "the Pathfinder of the Rocky Mountains," greatly distinguished himself by his courage and perseverance in extensive explorations, which opened to America "the gates of the Pacific empire." An account of these explorations was published in 1856, and upwards of 50,000 copies of the work were sold as soon as they were issued. In 1859 the whole of his expeditions were published, superbly illustrated with woodcuts and steel plates. This work was superintended by the colonel, and contains a *résumé* of the first and second expeditions, which he made in the years 1842-43 and 1844, as well as his other four, which embrace a period of ten years, passed amid the wilds of America, and describing his adventures in Oregon, California, the Rocky Mountains of Mexico, and other parts of that distant country. In 1857 he contested the presidency with Buchanan; but the latter was elected by a considerable majority. B. at Savannah, 1813.

FRENCH BROAD RIVER, a river of the United States, one of the sources of Tennessee river. It rises in S. Carolina, and, crossing the western part of N. Carolina, enters Tennessee through a breach in the mountain, and joins the Holston 11 miles above Knoxville. 25 miles from its mouth it receives the Nolachucky, and 6 miles above, Big Pigeon river.

FRENCHMAN'S CAP, a mountain of Tasmania, Van Diemen's Land. *Height*, 5,000 feet above the level of the sea. *Lat.* 42° 18′ S. *Lon.* 145° 42′ E.

FRERE, Right Honourable John Hookham, *frere*, an English diplomatist, who filled several important posts, the most noted of which was his ministry in Spain during the Peninsular war. It is by his literary performances, however, that he is best known. At a very early age he translated the Saxon poem on the victory of Athelstan at Brunenburgh, which was written during the controversy occasioned by the poems attributed to Rowley. It is a work of very high merit, and, at the time of its appearance, elicited warm commendation. He also wrote and published what is called "The Whistlecroft Poem," which is supposed to have suggested the "Don Juan" of Byron. He was considered by Sir Walter Scott a perfect master of the ancient style of composition, and was one of the founders of the "London Quarterly Review," as well as a contributor to the "Etonian" and "Anti-Jacobin." B. in Norfolk, 1769; D. 1846, at his residence in the Pieta, Malta, where he had lived for a number of years.

FRÉRET, Nicholas, *frai'-rai*, a learned Frenchman, who was chosen a member of the Academy of Inscriptions, and afterwards its perpetual secretary. Pre-

senting to this body a dissertation on the origin of the Franks, his opinions were not pleasing to those in authority, and he was sent to the Bastille. On his release, he occupied himself with antiquarian researches, and prepared a very large number of works on the chronology of the Assyrians, Chaldeans, Indians, the old Greeks, and even the Chinese. Some of these have been published in Paris. B. in Paris, 1688; D. 1749.

**Fréron**, Elie Catherine, *frai-rawng*, a French critic, educated among the Jesuits. He was, at first, a professor at the college of Louis le Grand, but subsequently allied himself with Desfontaines, whom he assisted in his literary undertakings, and against the philosophers of the 18th century. In 1749 he commenced his "Letters on certain Writings of the Times," which extended to 13 volumes. He then began his "Année Littéraire," which he continued till it was suppressed, a short time before his death, in 1776. B. at Quimper, 1719.—His critical works were much read; but owing to some strictures which he passed on Voltaire's writings, that writer attacked him with great asperity, and ridiculed him in his satire of the "Pauvre Diable," and in his comedy of "L'Ecossaise." Besides the above works, he wrote—"Miscellanies," "Les Vrais Plaisirs," part of a translation of Lucretius.

**Fresnel**, Auguste Jean, *fres'-nel*, a French scientific writer, who was at first an engineer, connected with the roads and bridges in the department of Drôme, where he remained till 1815. At this period he quitted active employment, and ardently followed scientific studies. Subsequently, he published "Memoirs on the Polarization and Double Refraction of Light," and in 1821 was appointed examiner of the Polytechnic School at Paris. To him are due many improvements in lighthouses, and he was one of the first to introduce lenticular lights. B. at Broglio, Eure, 1781; D. at Paris, 1827, just after the Royal Society had sent him the Rumford medal for his discoveries on light.

**Fresnoy**, Charles Alphonsus du, *frey'-noi*, a French painter and poet, who visited Rome for the purposes of study. Here he copied the works of the best masters, and planned his Latin poem on the "Art of Painting." B. at Paris, 1611; D. there, 1665.—His poem was printed after his death, with a French translation by De Piles. There are three English translations of it; one by Dryden, another by Graham, and another by Mason.

**Fretéval**, *fret'-e-val*, a town of France, in the department of Loir-et-Cher, 10 miles from Vendôme. —Here, in 1194, the army of Philip Augustus was defeated by the English.

**Freudenstadt**, *froi'-den-stat*, a town of Wurtemberg, on the Murg, 24 miles from Strasburg. *Manf.* Prussian blue, white lead, and woollen cloths. *Pop.* 4,130.

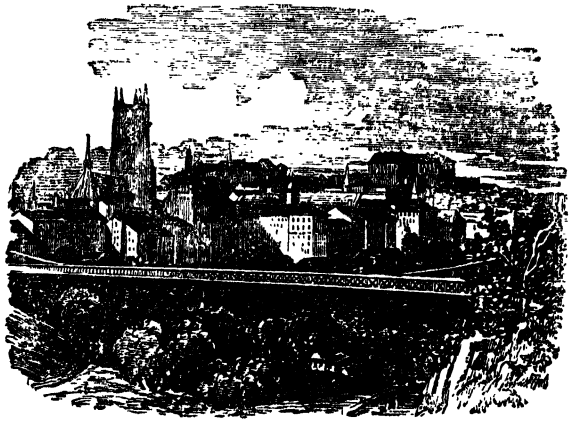
**Freudenthal**, *froi'-den-tal*, a town of Austrian Silesia, on the borders of Moravia, 20 miles from Troppau. *Manf.* Woollens and linens. *Pop.* 4,000.

**Frewen**, Accepted, *froo'-en*, an English prelate, who, in 1622, accompanied Prince Charles, afterwards Charles I., to Spain, as chaplain. In 1631 he obtained the deanery of Gloucester, and, in 1643, the bishopric of Lichfield and Coventry. At the Restoration he was translated to York, and died at Thorpe Castle in 1664. B. in Kent, 1589.

**Frey**, John Cecil, *fri*, a German physician, who boasted of being the first who defended theses in philosophy in the Greek language in Europe. His "Opuscula" was printed after his death by Baledrens. Lived in the 17th century.

**Freyberg**, *fri'-bairg*, a mining-town of Saxony, 19 miles from Dresden. It is the capital of the Erzgebirge, 1,200 feet above the level of the sea, on the Freybergische-Mulda. It has a mining academy, founded in 1765, with thirteen professors, Werner's collection of minerals, and a large library. The neighbouring district is full of mines of silver, copper, lead, and cobalt. *Manf.* Hardware, cloth, lace, white lead, vitriol, gunpowder; and it has extensive smelting-works. *Pop.* about 15,000. It is in communication, by railway, with Breslau and other towns.

**Freyberg**, a walled town of Prussian Silesia, 36 miles from Breslau. *Manf.* Tobacco and linen goods. *Pop.* 4,000.



**Freyberg-in-Breisgau**, *fri'-bairg*, a town of Baden, 75 miles from Carlsruhe. It is the seat of a university founded in 1456, and has a cathedral, with a spire 380 feet high. This edifice is one of the noblest specimens of Gothic architecture in Germany. It has also a grand-ducal palace, an archbishop's palace, a custom-house, hospitals, museum, botanic garden, schools, and Herder's Institute of Arts. *Manf.* Chemicals, chicory, leather, potash, and starch. There are also paper-mills, bleaching and dye works, and a bell-foundry. *Pop.* about 18,000.

**Freytag**, Frederic Gottlieb, *fri'-tag*, was a burgomaster of Nuremberg, and wrote: "Rhinoceros Veterum Scriptorum Monumentis descriptus," 1747; "Analecta Literaria, de Libris varioribus," 1751; "Oratorum et Rhetorum Græcorum quibus Statuæ honoris causa positæ fuerunt," 1752; "An Account of Scarce and Valuable Books," 1776. B. 1725; D. 1776.

**Freytag**, Gustav, a modern German author, who, in 1847, in conjunction with Julian Schmidt, founded a literary journal, which soon arrived at a large circulation. He subsequently published a small collection of poems, and an historic comedy, "Kuntz der Rosen," which was followed by two dramas and another comedy. All these are remarkable for their well-drawn characters, and the lively and natural tone of the dialogue. He is best known, however, in England by his "Soll und Haben," a novel which was translated into English, in 1858, under the title of "Debit and Credit," and which attained a high degree of popularity. B. at Kreuzburg, Silesia, 1816.

**Frezier**, Amedée Francis, *frez'-e-ai*, a French mathematician, who was employed in making a survey of the Spanish colonies of Peru and Chili, in 1711, of which he published an account in 1716. He was afterwards employed in fortifying St. Malo and other places, for which he was rewarded with the cross of St. Louis. B. at Chambéry, 1682; D. 1772. He wrote—"Traité des Feux d'Artifice," "Élémens de Stéréotomie," &c.

**Fribourg**, *fre'-boorg*, the capital of the canton of the same name, on the Sarine, occupies a singularly wild and romantic situation, 16 miles from Berne. The best buildings are the Jesuits' church and the

FRIBOURG.

cathedral of St. Nicholas. It has, besides, a college, town-hall, museum, hospital, public baths, libraries, and several learned societies. *Manf.* Straw hats, earthenware, tobacco, playing cards, tanning, and dyeing. *Pop.* 9,300.

FRIBOURG, FREIBOURG, or FREYBURG, a canton of Switzerland, between the canton of Berne and the Pays de Vaud. *Area*, 560 square miles. *Desc.* Finely diversified with every kind of scenery; comprising wooded or grassy hills, Alpine mountains, and long and beautiful verdant valleys. It lies principally in the basin of the Aar, and in the S. and E. is traversed by branches of the Bernese Alps, the culminating points of which are Mount Moleson, Dent de Folligrau, and Dent de Breulaire, rising respectively to the height of 6,580, 7,710, and 7,720 feet above the level of the sea. *Rivers.* The Broie and the Sarine. *Lakes.* The principal is Marat. *Pro.* Cattle-rearing is the chief occupation, and dairy husbandry is extensively followed. There is scarcely sufficient corn grown for the population; but both peat and timber are important products. The breed of horses is valuable. *Manf.* Straw hats and cheese. *Pop.* 100,000, principally of Gallic descent. This canton is the ninth in the Swiss confederation, to which it was admitted in 1481.

FRICK, LOWER, *frik*, a village of Switzerland, in the canton of Aargau, in the Frickthal, to which district it gives its name. *Pop.* 1,900.—The DISTRICT of Frickthal extends on the south side of the Rhine, from Augst to Botzberg, and has an area of about 100 square miles. *Pop.* 20,000, employed chiefly in cotton-spinning, and trading in wine, cattle, and timber.

FRIEDBERG, *freed'-barg*, a town of Bavaria, 28 miles from Munich. *Pop.* 2,000.

FRIEDBERG, the name of several towns of Prussia, none of them with a population above 5,000.—HIGH FRIEDBERG, 20 miles from Liegnitz, in Silesia, was the scene of the defeat of the Austrians by Frederick II., in 1745.

FRIEDLAND, *freed'-land*, a name common to many German towns, with populations varying between 1,500 and 5,000.

FRIEDLAND, a town of E. Prussia, in the circle of Konigsberg, on the Alle, famous for being the scene of the battle gained by Napoleon I. over the Russians and Prussians, on 14th June, 1807, and which led to the peace of Tilsit. *Pop.* 2,500.

FRIEDRICKSHAM, *free'-der-ik-sham*. (*See* FREDERICKSHAMM.)

FRIENDLY, or TONGA ISLANDS, *frend'-le*, a group in the S. Pacific Ocean, forming an archipelago of very considerable extent, and consisting of more than 150 islands, the greater part of which are either mere rocks or shoals, or desert spots. The most important are,—Tonga, Tongataboo, or Amsterdam as it was called by Tasman, who discovered it in 1643; Eua, called by Tasman, Middleburgh; Annamooka, or Rotterdam according to Tasman; the Hapau islands, namely, Haanno, Foa, Lefooga, and Hoolawa; Mayorga, a group of islands about 100 miles N. of Hapau, discovered, in 1781, by the Spanish navigator Maurelle, and since visited by Captain Edwards in 1791, by whom the group was named Howe's Islands; Nuatobutabo and Kootahe, discovered by Schouten and Lemaire in 1616, and visited by Captain Wallis in 1767, who called them Keppel's and Boscawen's Islands; Toofoa, or Amattafoa; Hamoa, Vavao, and the Feejee Islands, which *see*. To this extensive archipelago Captain Cook gave the name of Friendly Islands, from the firm alliance which seemed to subsist among the natives, and from their courteous behaviour to strangers. The inhabitants live upon yams, plantains, and cocoa-nuts, hogs, fowls, fish, and all sorts of shell-fish; but the lower people eat rats. *Pop.* about 20,000. *Lat.* between 13° and 25° S. *Lon.* between 172° and 177° E.

FRIESLAND, *frees'-land*, a province of the Netherlands, on the N.E. of the Zuyder Zee, being inclosed on the land side by Dreuthe, Groningen, and Overyssel. *Area*, 1,260 square miles. *Desc.* Flat; and being below the level of the sea, its coasts are protected by dykes. Large portions of it consist of sandy heaths; but, in the N. and W., there are some tracts of pasture, where cattle-rearing is carried on. The lakes are numerous, and there are some forests; but peat is the chief fuel made use of by the inhabitants. *Manf.* Linen and woollen fabrics. *Pop.* 250,000.

FRIESLAND, EAST, PRINCIPALITY OF, the N.W. portion of Hanover, occupying the extremity of that kingdom, and nearly equivalent to the present government of Aurich, which *see*. The counts of Friesland becoming extinct in 1744, Frederick II., king of Prussia, seized the country, in consequence of the expectancy granted to the house of Brandenburg, in 1694, by the emperor Leopold. George II., however, king of England, as duke of Brunswick Lunenburg, laid claim to the principality, on account of an hereditary union entered into, in 1691, with Prince Christian Eberhard, making his pretensions known to the regency of E. Friesland, and the Aulic chamber of the empire; but the king of Prussia, denying the authority of the emperor in the regency, and threatening to support his claims by force of arms, he was suffered to remain in possession.

FRISCH, John Leonard, *freesh*, a German naturalist and divine, who was the founder of the silk-manufactory in Brandenburg, and the first who cultivated mulberry-trees in Germany. B. at Sultzbach, 1666; D. at Berlin, 1743.—He was the author of "A German and Latin Dictionary;" "A Description of German Insects;" "Dictionnaire Nouveau des Passagers François-Allemand et Allemand-François," 8vo, &c.

FRISCHEHAFF, *freesh'-e(r)-haf*, a bay of the Baltic Sea, between Elbing and Koningsburg. *Ext.* 58 miles long, with an average breadth of 5. It receives the Passarge and Pregel rivers, and two arms of the Vistula.

FRISI, Paul, *fre'-se*, a Milanese mathematician and philosopher, who obtained the professorial chair of several colleges, and, in 1757, was elected a fellow of the Royal Society of London. He was also a member of several continental learned societies, and published many useful treatises on astronomy, electricity, hydraulics, and other scientific subjects. B. at Milan, 1728; D. there, 1784.

FRITH, or FRYTH, John, *frith*, a Protestant martyr, who became one of the canons in Wolsey's College. Through his acquaintance with Tyndall, he embraced the principles of the Reformation, for which he was imprisoned. In 1528 he obtained his liberty, and went abroad. On his return, he zealously promoted the doctrines of the Gospel, for which he was burned in Smithfield, in 1533. B. at Sevenoaks, Kent.—He wrote several books against popery, collected into 1 vol. folio.

FRITH, William Powell, R.A., an eminent modern English painter, who studied in the schools of the Royal Academy, and, in 1839, began to exhibit on its walls. Until 1844, his efforts were generally confined to representations from Shakspeare, Sterne, Goldsmith, and Scott; but in that year he produced his "Interview between John Knox and Mary, Queen of Scots, respecting the marriage with Darnley." In this effort he was not considered so successful as he had been in the subjects to which he had previously mostly confined himself. He therefore returned to his former walk, and, in 1845, produced his "Village Pastor," which obtained his election as an associate of the academy. His next greatest painting was "An English Merrymaking One Hundred Years ago," which is esteemed a superior work. This was first exhibited in 1846. From that time he kept himself continually before the eye of the public; and, in 1853, exhibited his "Life at the Sea-side," which had the honour of being bought by her Majesty. In this year he was elected an R.A. In 1855 appeared "Maria tricks Malvolio," and, in 1856, "Many Happy Returns of the Day." His most successful picture, however, was that of "The Derby Day," which may be said to have been the most popular painting in the exhibition of 1858. The style of Mr. Frith is equal, whilst his touch is light and graceful. All his performances are finished with the greatest care. B. in Yorkshire, 1819.

FRIULI, *free'-oo-le*, an old province of Italy, formerly divided into Austrian and Venetian, but now forming the circle of Goritz, part of Trieste, and the delegation of Friuli in Lombardy.

FROBENIUS, John, *fro-be'-ne-us*, a German printer, who lived at Basle, and was greatly esteemed by Erasmus, whose works he printed, as he also did those of Augustine and Jerome. D. 1529.

FROBISHER, Sir Martin, *fro'-bish-er*, an enterprising English navigator and naval hero, bred early to the sea. The discovery of a north-west passage to India was an object which constantly exercised his thoughts; and after applying to several merchants to engage in the enterprise, he obtained the patronage of the earl of Warwick and other noblemen, who enabled him to fit out three small vessels, with which, in 1576, he sailed from Deptford. After exploring different parts of the Arctic coast, he entered the strait which bears his name, and then returned to England, bringing with him some black ore, which is said to have contained gold. In consequence of this, he was, in 1577, sent out again to search for ore, with a quantity of which he returned. A third voyage was undertaken the following year, with a number of ships to bring home the riches supposed to exist in the newly-discovered countries; but, on the return of the expedition, it was discovered that the precious metals had no existence where they had been sought. Between that year and 1585, we have no intelligence as to the employment of Frobisher; but in this year we find that he served under Drake in the West Indies, and in 1588 had a share in the defeat of the Spanish armada. The same year he was knighted. B. at Doncaster, Yorkshire; killed in assaulting a fort near Brest, in 1594.—An account of his voyage was printed in Hakluyt's collection.

FROBISHER'S STRAIT, a narrow sea, to the N. of Cape Farewell and W. Greenland, in British N. America. Both sides of its shores are extremely rugged and forbidding. *Ext.* 140 miles long, with an average breadth of 20. *Lat.* 62° to 64° N. *Lon.* 65° to 74° W.—It was discovered by Frobisher, the navigator.

FRODSHAM, *frod'-sham*, a market-town of England, on the Mersey and Weaver rivers, 12 miles from Chester. *Manf.* Cotton goods, and in its neighbourhood are some salt-works. *Pop.* 6,500.

FROILA I., *fro'-e-la*, king of Spain, was the son of Alphonsus I., and began his reign in 757. In 760 he obtained a victory over the Saracens in Galicia, but he sullied his character by the murder of his brother Vimazan. This was avenged by another brother, Aurelius, who slew Froila in 768.

FROILA II. succeeded his brother Ordogno in 923. He was a cruel prince, and his tyranny caused the province of Castile to revolt against him, when he was deposed. D. of a leprosy in 925.

FROISSART, John, *frwois'-sart*, a celebrated French historian and poet, who wrote a work which he called a "Chronicle," and wherein are narrated the transactions of France, Spain, and England, from 1326 to 1400. The best edition, as it is the latest, is that of M. Buchon, published in Paris, 1824. It is esteemed as an authority on the subject of which it treats. B. at Valenciennes, 1337; D. 1410.—Froissart, though an ecclesiastic, was given to gaiety. His Chronicle was translated into old English by Lord Berners, and afterwards by Mr. Johnes of Hafod.

FROME, *frome*, the name of several rivers of England—1. An affluent of the Lugg, in Herefordshire. 2. In the county of Dorset, rising near Beaminster, and falling into the sea at Poole harbour. 3. An affluent of the Avon, which it joins at Bristol. 4. Another of the Severn, which it joins near Berkley. 5. In Somersetshire, rising in the Mendip Hills, flowing past the town of Frome, and, after a course of 20 miles, joining the Avon between Bath and Bradford.

FROME, a town of Somerset, 12 miles from Bath. The river Frome passes through the lower part of it, under a bridge of five arches. The principal church is a large fine structure, highly decorated within; besides which there are other places of worship, a market-house, union workhouse, a grammar-school of the foundation of Edward VI., a charity school, an almshouse, an asylum, and an hospital; together with various Sunday schools. *Manf.* Ale, broadcloths, and kerseymeres, for all of which it has long been noted. *Pop.* 10,300.

FRONTEIRA, *fron-tai-eer'-a*, a town of Portugal, in the province of Alentejo, 14 miles from Estremos. *Pop.* 2,500.—Here, in 1663, the Spaniards were defeated by the Portuguese under Schomberg.

FRONTINUS, Sex. Jul., *fron-ti'-nus*, a celebrated geometrician, who made himself known by the books he wrote on aqueducts and stratagems of war, dedicated to Trajan.

FRONTO, Marcus Cornelius, *fron'-to*, a Roman orator, who was preceptor to Verus and M. Aurelius. The latter appointed him consul, and erected a statue to his honour.

FROST, William Edward, A.R.A., *frost*, commenced his studies as an artist at Sass's academy, Bloomsbury, London, and thence entered the Royal Academy, where he completed them. In 1839 he carried off the gold medal by his picture of "Prometheus bound by Force and Strength." In 1843 he entered the lists of the cartoon competition, and exhibited his "Una alarmed by the Fauns and Satyrs," and obtained by it one of the premiums of £100. In 1843 he also exhibited his "Christ Crowned with Thorns," which attracted marked attention. From this period he continued to produce many beautiful pictures, when, in 1846, he painted his "Diana surprised by Actæon," which procured him the dignity of A.R.A. In the course of the following year his "Una and the Wood-Nymphs" appeared, and was purchased by Queen Victoria. His merits had now become well known, when, year after year, he continued to issue some fine conception, which eminently displayed the many graces of his pencil. B. at Wandsworth, Surrey, 1810.

FROWDE, Philip, *froud*, an English poet, whose Latin effusions in the "Musæ Anglicanæ" are elegant. He also wrote two tragedies: the "Fall of Saguntum," and "Philotas." D. 1738.

FROYEN, or FROJEN, *fro'-yen*, an island of Norway, lying off its W. coast, 50 miles from Drontheim. *Ext.* 20 miles long, with an average breadth of 5. *Lat.* 63° 40′ N. *Lon.* 8° 40′ E.

FROZEN OCEAN, or the ICY SEA, *fro'-zen*, a sea of Asia, extending towards the N. into the unknown regions of the pole, and whose boundaries on the E. and W. are calculated to be Nova Zembla and Fohutski Noss.

FRUMENTIS, St., *froo-men'-tis*, the first who preached the Gospel in Æthiopia, of which country he was ordained bishop by St. Athanasius in 331. B. at Tyre; D. about 360.

FRY, Mrs. Elizabeth, *fri*, was the third daughter of John Gurney, Esq., of Earlham Hall, near Norwich,

MRS. ELIZABETH FRY.

and belonged to the Society of Friends. In 1800 she became the wife of Mr. Joseph Fry, a London merchant, and in 1810 a preacher among the Friends. In 1813 she visited the prisoners in Newgate, and by her active beneficence and judicious conduct, effected great improvement in the condition of the miserable objects who there came under her notice. In 1817 she

was so far successful in her philanthropical projects as to succeed in establishing a ladies' committee for the improvement of the condition of the female prisoners in Newgate, and by energy and perseverance, had the gratification of converting a sink of iniquity into an abode of order and sobriety. A school and a manufactory were instituted within the walls of that dreary abode of sorrow, and comparative happiness took the place of misery. She was examined before the House of Commons on her plans of prison discipline; and, proceeding from one step to another, next turned her attention to the reformation of the characters of convicts. From 1833 to 1836 she occupied herself with visiting Jersey and Guernsey, and between 1837 and 1842 visited many of the principal towns of the continent, with the view of improving the system of prison discipline. B. near Norwich, 1780; D. at Ramsgate, 1845.

FRYXELL, Anders, *fruxe'-el*, a distinguished Swedish historian, who was reared for the Church, but devoted much of his time to the cultivation of literature. After producing an opera, in 1823, he commenced his career as an historian, by the publication of a work entitled, "Narratives from Swedish History," upon a plan similar to that seen in "Tales of a Grandfather," by Sir Walter Scott. From that period he continued to occupy a high place in the literature of Sweden, and greatly extended the plan of the above work. His views of the position of the aristocracy of his country, however, led him into controversy, although it did not withdraw him from his historical studies. He is known to English readers by a translation, made by Mrs. Mary Howitt, of two volumes of his extended "Narratives," published in 1844. B. at Hesselskog, in Dalsland, 1795.

FUCA, STRAITS OF ST. JUAN DE, *fu'-ka*, an inlet on the N.W. coast of N. America, Oregon territory, leading from the Pacific into the Gulf of Georgia, S. of Vancouver's Island, and forming a part of the boundary-line between the United States and Great Britain. These straits were for a long time supposed to lead to some inland sea connected with the Atlantic Ocean, but they were explored to their termination, about 100 miles inland, by Vancouver. In 1859 a dispute arose between some of the officials of the U.S. government and those of Great Britain, as to the precise direction of the boundary-line between their several occupations in reference to the possession of the island of St. Juan. While we write, 1860, the question has not been decided. (*See* SAN JUAN.)

FUCHS, Leonard, *fooks*, a German physician and botanist, who received the honour of knighthood from Charles V., of Spain. His greatest work is "Historia Plantarum," printed at Bâle in 1542. He also wrote several medical books. B. in Bavaria, 1501; D. 1566.

FUCINO, or CELANO LAKE, *foo-chē'-no*, the principal lake of Naples, in the province of Abruzzo Ultra II. It lies between two ranges of the Apennines, and receives several small rivers. In 1855 it was commenced to be drained, and upwards of 30,000 acres of soil have been reclaimed. *Ext.* 10 miles long, by 7 broad.

FUEGOS. (*See* FOGO.)

FUEN-HO, *foo'-en-ho*, a river of China, in the province of Shansi. Little is known of its navigation; but it has several cities upon its banks, and joins the Hoang-ho in *lat.* 35° 30′ N.; *lon.* 110° 28′ E.

FUENTERRABIA. (*See* FONTARABIA.)

FUENTES DE ONORE, *foo-ain'-tais dai o-nor'-ai*, a small town of Spain, 16 miles miles from Ciudad Rodrigo. It was the scene of some sharp fighting in May, 1811, between the French and the British.—The name also of many other towns in Spain, with populations ranging between 2,000 and 6,000.

FUERTE, RIO, *foo-air'-tai*, a river of Mexico, which, after a course of about 200 miles, falls into the Gulf of California, in *lat.* 26° 50′ N.; *lon.* 109° 10′ W.

FUESSLI, John Gaspard, *foosse'-se-le*, an ingenious Swiss artist and author, who wrote a "History of the Artists of Switzerland, or Lives of the Helvetic Painters," which is considered an excellent work. B. at Zurich, 1706; D. 1782.—His son JOHN GASPARD was a bookseller at Zurich, and died there in 1786. He published some esteemed works on entomology.

FUGA, *foo'-ga*, an island of the Asiatic archipelago, 25 miles from Luzon. *Area*, 35 miles in circumference. *Lat.* 19° N. *Lon.* 121° 20′ E.

FUGER, Frederick Henry, *foo'-ger*, an eminent German painter, who first studied his beautiful art in the Dresden Academy; but, proceeding to Vienna, discovered such talents as to induce his patrons to send him as an imperial pensioner to Rome. Here he studied eight years, when he visited Naples, and painted a series of frescoes in the library of Queen Caroline at Coserta. In 1784 he was recalled to Vienna, where he became professor in, and vice-director of, the academy. He was distinguished, not only as a fresco, but also as an oil and miniature painter. Some of his pictures consisted of subjects taken from the mythology of Homer; others from Roman history; and he made twenty illustrations of the "Messiah" of Klopstock. Many of his works have been engraved by German artists. B. at Halbron, Wurtemberg, 1751; D. at Vienna, 1818.

FUGGER, *foo'-ger*, the name of a rich and illustrious family of Suabia, descended from a weaver, who originally lived in the environs of Augsburg, about 1300. They were at first successful in selling cloths, but afterwards extended their dealings, and became merchants, accumulating an immense fortune. Reaching the height of their affluence, at the commencement of the 16th century, they rendered considerable services to the emperors Charles V. and Maximilian, by making them large advances. These princes bestowed titles of nobility on the Fugger family, and they soon became connected with the best blood of Germany. Promoted to the highest dignities of the empire, they did not any the more neglect the pursuit of commerce. Their riches were always forthcoming for the improvement of their birthplace, Augsburg, where they erected some handsome monuments, and founded philanthropical institutions. The best known of them are the three brothers, Ulric, James, and George; and, afterwards, Raymond and Antony, both sons of George. Ulric received, for his loans to Maximilian, the countship of Kirchberg and the seignory of Weissenhorn, which, afterwards, remained in the possession of his family. He was a great encourager of learning.—Antony and Raymond bore, to a great extent, the expenses of the expedition of Charles V. against Algeria, obtaining from him the permission to coin money. One day, at an interview with the emperor, Antony, as a mark of his regard and esteem, threw into the fire all the title-deeds and securities which Charles had deposited with him. Several of this family still exist, and Augsburg owes its position on the continent, as a financial centre, to the energy and talent of the Fuggers.

FULBERT, *fool-bair*, a French bishop, but a native of Italy, and a pupil of Pope Sylvester II. On going to France as a public lecturer, he gained a great reputation, and, in 1007, was presented with the bishopric of Chartres. He was zealous against Berengarius on the Eucharist, and introduced the worship of the Virgin into France. He was one of the most learned men of his time, and his works are extant. D. 1028.—For FULBERT, a canon at Paris, *see* ABELARD.

FULDA, *fool'-da*, a walled town of Hesse-Cassel, on the Fulda, 60 miles from Mentz. Its principal edifice is the episcopal palace. It has, besides, a cathedral, arsenal, prison, and workhouse, a Roman Catholic seminary, a lyceum, a school of industry, and an orphan asylum. *Manf.* Woollen and linen fabrics, earthenware, leather, and tobacco. *Pop.* 10,000.

FULDA, a river of Germany, rising in the Rhongebirge mountains, and, after a course of 90 miles, falling into the Werra near Manden.

FULDA, Charles Frederick, an ingenious Lutheran divine, who wrote a Dictionary of the German Roots, "An Inquiry into Language," "On the Origin of the Goths," "On the Cimbri," "On the Deities of the Germans," and "A Chart of History." He was also an excellent mechanic. B. at Wimpfen, Suabia, 1722; D. 1788.

FULHAM, *fool'-ham*, a parish in Middlesex, on the Thames, 5½ miles from St. Paul's, London. The bishop of London has here a palace on the banks of the river; a residence which has been occupied by the bishops of London since the time of Henry VII. *Pop.* 12,000.

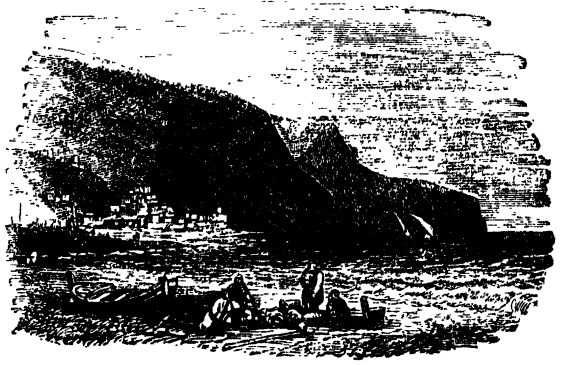
Fulke, William, *foolk*, an English divine, who was made master of Pembroke Hall, and, subsequently, Margaret professor of divinity. B. in London; D. 1589. —Of his works, the most noted is his "Commentary upon the Rhenish Translation of the New Testament," printed in 1580.

Fuller, Nicholas, *fool'-ler*, a learned divine, who obtained a prebend in the church of Salisbury, and the living of Bishop's Waltham, in Hampshire. B. at Southampton; D. 1622.—His "Miscellanea Theologica," printed at Oxford in 1616, is a valuable body of sacred criticism.

Fuller, Thomas, an eminent English historian and divine, who was educated at Queen's College, Cambridge. In 1631 he was chosen fellow of Sidney College, and, after fulfilling his clerical duties in several places, he obtained a prebend of Salisbury. He was also presented to the rectory of Broad Windsor, in Dorsetshire, removed to London, and became lecturer at the Savoy. During the civil war he adhered strenuously to the royal cause, and became chaplain to Lord Hopton, who left him at Basinghouse, which was shortly after besieged by Sir William Waller; but the garrison, being sustained by the courage of Fuller, made so vigorous a resistance, that Waller was obliged to retire. On the ruin of the king's affairs, he was chosen lecturer of St. Bride's, Fleet Street. About 1648 he obtained the rectory of Waltham, in Essex; and between that time and the Restoration, published a number of books, the principal of which is "The Church History of Britain," folio. At the Restoration he was made chaplain-extraordinary to the king, restored to his prebend, and created D.D. B. at Aldwinkle, Northamptonshire, 1608; D. 1661.—Besides the above, he wrote the quaint but valuable work, "The Worthies of England," in folio; "The History of the Holy War," folio; "The Holy State," folio; "Pisgah Sight of Palestine," folio; "Abel Redivivus, or Lives of Eminent Divines," 4to; Sermons and Tracts. He is said to have had so strong a memory as to have been able to tell, in their exact order, the names of the signs then placed over every tradesman's door, after one walk between Temple Bar and the Royal Exchange.

Fuller, Sarah Margaret, Countess of Ossoli. (*See* Ossoli.)

Fuller, Isaac, an English painter in the reign of Charles II. He painted the "Resurrection" at All Souls College, Oxford, another at Magdalen College, and a picture at Wadham College, which is the best. He studied in France under Perrier. D. in 1676.



Fulton, Robert, *fool'-ton*, an American mechanician and engineer, whose name is intimately associated with the improvement of steam navigation. In his eighteenth year he entered, in Philadelphia, upon the duties of life as a painter of landscapes and portraits for subsistence; but in 1746 he visited England, where West, the historical painter, took him by the hand, and for some years kept him in his house. His genius, however, seems to have been less directed to the beautiful in art than the mechanical in science. Accordingly, on quitting the house of Mr. West, he sought the acquaintance of the duke of Devonshire, then engaged with his canals, and in 1794 took out a patent for an inclined plane, designed to set aside the use of locks. He also invented an excavating-machine, a mill for sawing marble, and took out patents for making ropes and spinning flax. With all these projects, however, he seems to have met with little success, when he went to Paris, where he resided seven years, under the roof of Mr. Barlow, the representative of the United States government. Here he directed his attention to other pursuits, but still of a mechanical kind, when, after some experiments made with small steamboats on the Seine, and another visit to England, he proceeded to America, where, in 1807, he commenced the construction of a steam-vessel, with which he succeeded in navigating the Hudson river. His fame was now established; but he did not live to reap the reward which his perseverance deserved. B. at Little Britain, Pennsylvania, 1765; D. at New York, 1815.

Fulton, the name of several counties of the United States—1. In New York. *Area*, 5,000 square miles. *Pop.* 25,000.—2. In Illinois. *Pop.* 25,000.—3. In Indiana. *Area*, 359 square miles. *Pop.* 7,000.—The name also of several towns with populations ranging between 2,000 and 10,000.

Fulvia, *ful'-ve-a*, an ambitious woman of Rome, who, after being twice married, became the wife of Mark Antony. When Cicero's head had been cut off by order of Antony, she ordered it to be brought to her, and, with the greatest barbarity, bored the orator's tongue with her golden bodkin. Antony divorced her to marry Cleopatra; upon which she attempted to persuade Augustus to take up arms against her husband. When this scheme did not succeed, she retired into the East, where Antony received her with great coldness. This totally broke her heart, and she soon after died, about 10 B.C. (*See* Antony.) —A woman who discovered to Cicero the designs of Catiline and his brother conspirators.

Fulvius, *ful'-ve-us*, a name common to some eminent Romans, the most remarkable of whom was a senator, intimate with Augustus. He disclosed the emperor's secrets to his wife, who made them public to all the Roman matrons; and for this he received so severe a reprimand from Augustus, that he and his wife hanged themselves in despair.—Nobilior, Ser., a Roman consul, who went to Africa after the defeat of Regulus. He was successful in several conflicts with the Carthaginians, but was shipwrecked at his return with 200 Roman ships.

Funchal, *foon-shal'*, a seaport in the island of Madeira, of which it is the capital, situate in the centre of a large bay, on the S. coast. It is irregularly built, the streets being narrow, winding, ill-paved, and dirty. Churches and convents are numerous; but there is nothing remarkable in their construction. The country behind Funchal rises rapidly, and consists of black rocks of lava, and these, intermingled with plantations of the most brilliant verdure, and contrasting

FUNCHAL.

with the white houses of the town, compose a splendid landscape. On the sea-side are several batteries. An old castle, which commands the road, stands on the top of a steep black rock, called Loo Rock, surrounded by the sea at high water. On a neighbouring eminence, above the town, is another, called St. John's Castle. The principal trade is done in wine and sweetmeats. *Pop.* 20,000, of whom many are English and French, besides Portuguese, and Mulatto and Negro freemen. *Lat.* 32° 37′ N. *Lon.* 16° 54′ W. (*See* Madeira.)

Fundy, Bay of, *fun'-de*, an inlet of the Atlantic,

was so far successful in her philanthropical projects as to succeed in establishing a ladies' committee for the improvement of the condition of the female prisoners in Newgate, and by energy and perseverance, had the gratification of converting a sink of iniquity into an abode of order and sobriety. A school and a manufactory were instituted within the walls of that dreary abode of sorrow, and comparative happiness took the place of misery. She was examined before the House of Commons on her plans of prison discipline; and, proceeding from one step to another, next turned her attention to the reformation of the characters of convicts. From 1833 to 1836 she occupied herself with visiting Jersey and Guernsey, and between 1837 and 1842 visited many of the principal towns of the continent, with the view of improving the system of prison discipline. B. near Norwich, 1780; D. at Ramsgate, 1845.

FRYXELL, Anders, *fruxe'-el*, a distinguished Swedish historian, who was reared for the Church, but devoted much of his time to the cultivation of literature. After producing an opera, in 1823, he commenced his career as an historian, by the publication of a work entitled, "Narratives from Swedish History," upon a plan similar to that seen in "Tales of a Grandfather," by Sir Walter Scott. From that period he continued to occupy a high place in the literature of Sweden, and greatly extended the plan of the above work. His views of the position of the aristocracy of his country, however, led him into controversy, although it did not withdraw him from his historical studies. He is known to English readers by a translation, made by Mrs. Mary Howitt, of two volumes of his extended "Narratives," published in 1844. B. at Hesselskog, in Dalsland, 1795.

FUCA, STRAITS OF ST. JUAN DE, *fú'-ka*, an inlet on the N.W. coast of N. America, Oregon territory, leading from the Pacific into the Gulf of Georgia, S. of Vancouver's Island, and forming a part of the boundary-line between the United States and Great Britain. These straits were for a long time supposed to lead to some inland sea connected with the Atlantic Ocean, but they were explored to their termination, about 100 miles inland, by Vancouver. In 1859 a dispute arose between some of the officials of the U.S. government and those of Great Britain, as to the precise direction of the boundary-line between their several occupations in reference to the possession of the island of St. Juan. While we write, 1860, the question has not been decided. (*See* SAN JUAN.)

FUCHS, Leonard, *fooks*, a German physician and botanist, who received the honour of knighthood from Charles V., of Spain. His greatest work is "Historia Plantarum," printed at Bâle in 1542. He also wrote several medical books. B. in Bavaria, 1501; D. 1563.

FUCINO, or CELANO LAKE, *foo-chē'-no*, the principal lake of Naples, in the province of Abruzzo Ultra II. It lies between two ranges of the Apennines, and receives several small rivers. In 1855 it was commenced to be drained, and upwards of 30,000 acres of soil have been reclaimed. *Ext.* 10 miles long, by 7 broad.

FUEGOS. (*See* FOGO.)

FUEN-HO, *foo'-en-ho*, a river of China, in the province of Shan-si. Little is known of its navigation; but it has several cities upon its banks, and joins the Hoang-ho in *lat.* 35° 30' N.; *lon.* 110° 28' E.

FUENTERRABIA. (*See* FONTARABIA.)

FUENTES DE ONORE, *foo-ain'-tais dai o-nor'-ai*, a small town of Spain, 16 miles miles from Ciudad Rodrigo. It was the scene of some sharp fighting in May, 1811, between the French and the British.—The name also of many other towns in Spain, with populations ranging between 2,000 and 6,000.

FUERTE, RIO, *foo-air'-tai*, a river of Mexico, which, after a course of about 200 miles, falls into the Gulf of California, in *lat.* 26° 50' N.; *lon.* 109° 10' W.

FUESSLI, John Gaspard, *foosse'-se-le*, an ingenious Swiss artist and author, who wrote a "History of the Artists of Switzerland, or Lives of the Helvetic Painters," which is considered an excellent work. B. at Zurich, 1706; D. 1782.—His son JOHN GASPARD was a bookseller at Zurich, and died there in 1786. He published some esteemed works on entomology.

FUGA, *foo'-ga*, an island of the Asiatic archipelago, 25 miles from Luzon. *Area*, 35 miles in circumference. *Lat.* 19° N. *Lon.* 121° 20' E.

FUGER, Frederick Henry, *foo'-ger*, an eminent German painter, who first studied his beautiful art in the Dresden Academy; but, proceeding to Vienna, discovered such talents as to induce his patrons to send him as an imperial pensioner to Rome. Here he studied eight years, when he visited Naples, and painted a series of frescoes in the library of Queen Caroline at Coserta. In 1784 he was recalled to Vienna, where he became professor in, and vice-director of, the academy. He was distinguished, not only as a fresco, but also as an oil and miniature painter. Some of his pictures consisted of subjects taken from the mythology of Homer; others from Roman history; and he made twenty illustrations of the "Messiah" of Klopstock. Many of his works have been engraved by German artists. B. at Halbron, Wurtemberg, 1751; D. at Vienna, 1818.

FUGGER, *foog'-ger*, the name of a rich and illustrious family of Suabia, descended from a weaver, who originally lived in the environs of Augsburg, about 1300. They were at first successful in selling cloths, but afterwards extended their dealings, and became merchants, accumulating an immense fortune. Reaching the height of their affluence, at the commencement of the 16th century, they rendered considerable services to the emperors Charles V. and Maximilian, by making them large advances. These princes bestowed titles of nobility on the Fugger family, and they soon became connected with the best blood of Germany. Promoted to the highest dignities of the empire, they did not any the more neglect the pursuit of commerce. Their riches were always forthcoming for the improvement of their birthplace, Augsburg, where they erected some handsome monuments, and founded philanthropical institutions. The best known of them are the three brothers, Ulric, James, and George; and, afterwards, Raymond and Antony, both sons of George. Ulric received, for his loans to Maximilian, the countship of Kirchberg and the seignory of Weissenhorn, which, afterwards, remained in the possession of his family. He was a great encourager of learning.—Antony and Raymond bore, to a great extent, the expenses of the expedition of Charles V. against Algeria, obtaining from him the permission to coin money. One day, at an interview with the emperor, Antony, as a mark of his regard and esteem, threw into the fire all the title-deeds and securities which Charles had deposited with him. Several of this family still exist, and Augsburg owes its position on the continent, as a financial centre, to the energy and talent of the Fuggers.

FULBERT, *fool-bair*, a French bishop, but a native of Italy, and a pupil of Pope Sylvester II. On going to France as a public lecturer, he gained a great reputation, and, in 1007, was presented with the bishopric of Chartres. He was zealous against Berengarius on the Eucharist, and introduced the worship of the Virgin into France. He was one of the most learned men of his time, and his works are extant. D. 1028.—For FULBERT, a canon at Paris, *see* ABELARD.

FULDA, *fool'-da*, a walled town of Hesse-Cassel, on the Fulda, 60 miles from Mentz. Its principal edifice is the episcopal palace. It has, besides, a cathedral, arsenal, prison, and workhouse, a Roman Catholic seminary, a lyceum, a school of industry, and an orphan asylum. *Manf.* Woollen and linen fabrics, earthenware, leather, and tobacco. *Pop.* 10,000.

FULDA, a river of Germany, rising in the Rhongebirge mountains, and, after a course of 90 miles, falling into the Werra near Munden.

FULDA, Charles Frederick, an ingenious Lutheran divine, who wrote a Dictionary of the German Roots, "An Inquiry into Language," "On the Origin of the Goths," "On the Cimbri," "On the Deities of the Germans," and "A Chart of History." He was also an excellent mechanic. B. at Wimpfen, Suabia, 1722; D. 1788.

FULHAM, *fool'-ham*, a parish in Middlesex, on the Thames, 5¼ miles from St. Paul's, London. The bishop of London has here a palace on the banks of the river; a residence which has been occupied by the bishops of London since the time of Henry VII. *Pop.* 12,000.

FULKE, William, *foolk*, an English divine, who was made master of Pembroke Hall, and, subsequently, Margaret professor of divinity. B. in London; D. 1589. —Of his works, the most noted is his "Commentary upon the Rhenish Translation of the New Testament," printed in 1580.

FULLER, Nicholas, *fool'-ler*, a learned divine, who obtained a prebend in the church of Salisbury, and the living of Bishop's Waltham, in Hampshire. B. at Southampton; D. 1622.—His "Miscellanea Theologica," printed at Oxford in 1616, is a valuable body of sacred criticism.

FULLER, Thomas, an eminent English historian and divine, who was educated at Queen's College, Cambridge. In 1631 he was chosen fellow of Sidney College, and, after fulfilling his clerical duties in several places, he obtained a prebend of Salisbury. He was also presented to the rectory of Broad Windsor, in Dorsetshire, removed to London, and became lecturer at the Savoy. During the civil war he adhered strenuously to the royal cause, and became chaplain to Lord Hopton, who left him at Basinghouse, which was shortly after besieged by Sir William Waller; but the garrison, being sustained by the courage of Fuller, made so vigorous a resistance, that Waller was obliged to retire. On the ruin of the king's affairs, he was chosen lecturer of St. Bride's, Fleet Street. About 1648 he obtained the rectory of Waltham, in Essex; and between that time and the Restoration, published a number of books, the principal of which is "The Church History of Britain," folio. At the Restoration he was made chaplain-extraordinary to the king, restored to his prebend, and created D.D. B. at Aldwinkle, Northamptonshire, 1608; D. 1661.—Besides the above, he wrote the quaint but valuable work, "The Worthies of England," in folio; "The History of the Holy War," folio; "The Holy State," folio; "Pisgah Sight of Palestine," folio; "Abel Redivivus, or Lives of Eminent Divines," 4to; Sermons and Tracts. He is said to have had so strong a memory as to have been able to tell, in their exact order, the names of the signs then placed over every tradesman's door, after one walk between Temple Bar and the Royal Exchange.

FULLER, Sarah Margaret, countess of Ossoli. (*See* OSSOLI.)

FULLER, Isaac, an English painter in the reign of Charles II. He painted the "Resurrection" at All Souls College, Oxford, another at Magdalen College, and a picture at Wadham College, which is the best. He studied in France under Perrier. D. in 1676.

FULTON, Robert, *fool'-ton*, an American mechanician and engineer, whose name is intimately associated with the improvement of steam navigation. In his eighteenth year he entered, in Philadelphia, upon the duties of life as a painter of landscapes and portraits for subsistence; but in 1786 he visited England, where West, the historical painter, took him by the hand, and for some years kept him in his house. His genius, however, seems to have been less directed to the beautiful in art than the mechanical in science. Accordingly, on quitting the house of Mr. West, he sought the acquaintance of the duke of Devonshire, then engaged with his canals, and in 1794 took out a patent for an inclined plane, designed to set aside the use of locks. He also invented an excavating-machine, a mill for sawing marble, and took out patents for making ropes and spinning flax. With all these projects, however, he seems to have met with little success, when he went to Paris, where he resided seven years, under the roof of Mr. Barlow, the representative of the United States government. Here he directed his attention to other pursuits, but still of a mechanical kind, when, after some experiments made with small steamboats on the Seine, and another visit to England, he proceeded to America, where, in 1807, he commenced the construction of a steam-vessel, with which he succeeded in navigating the Hudson river. His fame was now established; but he did not live to reap the reward which his perseverance deserved. B. at Little Britain, Pennsylvania, 1765; D. at New York, 1815.

FULTON, the name of several counties of the United States—1. In New York. *Area*, 5,000 square miles. *Pop.* 25,000.—2. In Illinois. *Pop.* 25,000.—3. In Indiana. *Area*, 350 square miles. *Pop.* 7,000.—The name also of several towns with populations ranging between 2,000 and 10,000.

FULVIA, *fool'-ve-a*, an ambitious woman of Rome, who, after being twice married, became the wife of Mark Antony. When Cicero's head had been cut off by order of Antony, she ordered it to be brought to her, and, with the greatest barbarity, bored the orator's tongue with her golden bodkin. Antony divorced her to marry Cleopatra; upon which she attempted to persuade Augustus to take up arms against her husband. When this scheme did not succeed, she retired into the East, where Antony received her with great coldness. This totally broke her heart, and she soon after died, about 40 B.C. (*See* ANTONY.) —A woman who discovered to Cicero the designs of Catiline and his brother conspirators.

FULVIUS, *fool'-ve-us*, a name common to some eminent Romans, the most remarkable of whom was a senator, intimate with Augustus. He disclosed the emperor's secrets to his wife, who made them public to all the Roman matrons; and for this he received so severe a reprimand from Augustus, that he and his wife hanged themselves in despair.—NOBILIOR, SER., a Roman consul, who went to Africa after the defeat of Regulus. He was successful in several conflicts with the Carthaginians, but was shipwrecked at his return with 200 Roman ships.

FUNCHAL, *foon-shal'*, a seaport in the island of Madeira, of which it is the capital, situate in the centre of a large bay, on the S. coast. It is irregularly built, the streets being narrow, winding, ill-paved, and dirty. Churches and convents are numerous; but there is nothing remarkable in their construction. The country behind Funchal rises rapidly, and consists of black rocks of lava, and these, intermingled with plantations of the most brilliant verdure, and contrasting with the white houses of the town, compose a splendid landscape. On the sea-side are several batteries. An old castle, which commands the road, stands on the top of a steep black rock, called Loo Rock, surrounded by the sea at high water. On a neighbouring eminence, above the town, is another, called St. John's Castle. The principal trade is done in wine and sweetmeats. *Pop.* 20,000, of whom many are English and French, besides Portuguese, and Mulatto and Negro freemen. *Lat.* 32° 37′ N. *Lon.* 16° 54′ W. (*See* MADEIRA.)

FUNCHAL.

FUNDY, BAY OF, *fun'-de*, an inlet of the Atlantic,

separating New Brunswick from Nova Scotia. It is both deep and dangerous, and comprises the Long Islands and the Grand Manan, and receives the rivers St. Croix and St. John. *Ext.* 100 miles long, with an average breadth of 35.—This bay is remarkable for the highest tides in the world. In 1852 a dispute arose as to the right of the United States fishermen to have access to this and other shores and bays belonging to the colonial possessions of Great Britain. It was ultimately arranged, in 1854, by a treaty, that they should have this right, and that, in return, the United States should admit, free of duty, fish caught on the same coast by British fishermen.

FUNEN, or FUHNEN, *foo'-nen*, a Danish island in the Baltic, separated from Jutland by the narrow passage called the Little Belt. It is the next largest to Zealand. *Area*, 1,123 square miles. *Desc.* Its shores are deeply indented, whilst its interior is undulating, and presents a productive soil, with numerous lakes. *Pro.* Corn, flax, hemp, and fruit. *Exp.* Horses, cattle, fruit, lard, salted meat, leather, and some manufactured goods. The trade is principally carried on with Sweden and Norway. *Pop.* about 175,000. *Lat.* between 55° 4′ and 55° 38′ N. *Lon.* between 9° 41′ and 10° 53′ E.

FUNFKIRCHEN, *foonf'-keer-shen*, a town of Hungary, in the circle of Baranya, between the Drave and the Danube, 140 miles from Belgrade. It is situate at the foot of a hill, in a district that is fertile, particularly in wine. *Manf.* Woollens. *Pop.* 16,000.

FUNG, or FONG, *foong*, a prefix to numerous Chinese cities, the only one interesting to the British reader being FUNG-WAH, 30 miles from Ningpo, taken by the English in 1842.

FUREEDPOOR, *foo-reed-poor'*, a district of British India, in Bengal. *Area*, 2,050 square miles. *Pop.* 860,000. *Lat.* between 23° and 24° N. *Lon.* between 89° and 90° 30′ E.

FURETIÈRE, Anthony, *foo-ret'-e-air*, a learned Frenchman, who deserted the legal profession, and became abbot of Chalivoy and prior of Chuines. In 1622 he was admitted to the French Academy, but twenty-three years afterwards was expelled, upon the charge of having unfairly profited by the common labour of the Encyclopædists to compile the dictionary which bears his name. This was printed in 1690, in 2 vols. folio. D. at Paris, 1620; D. 1688.

FURIÆ, *fu'-re-e*, the three daughters of Nox and Acheron, or, according to some, of Pluto and Proserpine. (*See* EUMENIDES.)

FURINA, *fu-ri'-na*, the goddess of robbers, worshipped at Rome. Some say that she is the same as the Furies. Her festivals were called Furineia.

FURIUS, Bibaculus M., *fu'-re-us*, a Latin poet of Cremona, who wrote annals in Arabic verse, and was universally celebrated for the wit and humour of his expressions. It is said that Virgil imitated his poetry, and even borrowed some of his lines. Horace, however, has ridiculed his verses. Lived in the 1st century B.C.

FURK, *foork*, a castle and village of Persia, 100 miles from the lake of Furrah-rood. This fortress has the character of being the strongest in Khorassan.

FURNEAUX ISLANDS, *foor'-no*, a group in Bass Strait, between Tasmania and Australia, discovered in 1773, by the English navigator Furneaux. The largest is called the Great Island, and has a length of 35 miles and a breadth of 10. *Lat.* 40° S. *Lon.* 148° E.

FURNES, *foorn*, a town of Belgium, in W. Flanders, near the sea, on a canal which goes from Bruges to Dunkirk, 15 miles from Ostend. It is small, but neat, and has an elegant town-house. Its trade is chiefly carried on in cattle. *Pop.* 5,000.

FURNESS, *fur'-ness*, a manorial liberty of England, in the N.W. part of Lancashire. It is mostly a rough region, clothed with wood. Its population are chiefly employed in mines and quarries. It had once an extensive abbey, which is now a picturesque ruin.

FURNIUS, *fur'-ne-us*, a friend of Horace, who was consul, and distinguished himself by his elegant historical writings.

FURRUCKABAD, *fur-ruk-a-bad'*, a fortified town, and capital of a district of the same name, in Hindostan, about a mile from the Ganges. It contains a small citadel, and the palace of the nabob. The government establishments of the district are at Futtehghur.

*Pop.* about 70,000. Here Lord Lake defeated Holkar in 1804.—The DISTRICT has an area of 1,910 square miles, and a population estimated at 855,000. *Lat.* of the city, 27° 33′ N. *Lon.* 70° 33′ E.

FURST, Walter, *foorst*, one of the founders of Swiss freedom and independence. Heading some brave men, he took and destroyed some forts belonging to the Austrians; which was the first step, in 1307, to the restoration of Switzerland as an independent nation. (*See* TELL and MELCHTAL.)

FURSTENBERG, *foors'-ten-bairg*, the name of several towns in Germany, none of them with a population above 2,500.

FURSTENFELD, *foors'-ten-felt*, a town of Lower Styria, 30 miles from Gratz. It has a large tobacco-manufactory. *Pop.* 2,000.

FURSTENWALD, *foors'-ten-valt*, a town of Bavaria, on the Spree, 26 miles from Berlin. *Manf.* Woollens and linens, with an active river trade. *Pop.* 4,500.

FURTH, *foort*, a town of Franconia, between the Regnitz and Pegnitz, 4 miles from Nuremberg. *Manf.* Glass of all kinds, but principally large mirrors: there are also a number of watchmakers, gold-beaters, joiners, saddlers, stocking-weavers, &c. *Pop.* 16,000, many of whom are Jews; but the majority Lutherans.—In 1632 a battle was here fought between Gustavus Adolphus and Wallenstein.

FURY and HECLA STRAIT, in British N. America, separates Cockburn Isle from Melville Peninsula, and forms a communication between the Gulf of Boothia and Fox's Channel. *Length*, about 100 miles; *breadth*, from 15 to 20. It was discovered in 1821, by Captain Parry, who gave to it the names of the ships under his command.

FUSELI, or FUESSLI, Henry, *foosse'-se-le*, the second son of John Gaspard Fuessli, author of "Lives of the Helvetic Painters," was educated for the church, and, in 1761, entered into holy orders. Having written, in conjunction with Lavater, a pamphlet reflecting on the conduct of a magistrate, it was deemed politic that he should leave his country; when, being furnished with letters of introduction from the British minister at Prussia, he visited England, where, for some time, he supported himself by translating works from the German, French, and Italian, into English. Gaining the acquaintance of Sir Joshua Reynolds, he showed some of his drawings to that distinguished artist, who recommended him to devote himself entirely to painting. This recommendation was not lost upon him, and, in 1770, he visited Italy and changed his name into Fuseli, which he ever afterwards retained. After an absence of eight years, he returned, when, with other artists, he was engaged by Alderman Boydell to assist in forming his Shakspeare Gallery. He also employed himself in editing the work of Lavater on Physiognomy, and assisted Cowper, who was then translating Homer, with some remarks and corrections. He subsequently became an associate of the Royal Academy, and, in 1790, was chosen a royal academician. In 1799 he supplied some pictures towards the formation of a Milton Gallery; but the idea did not take with the public. In the same year he became professor of painting to the Royal Academy, and, in 1803, keeper. Meanwhile, he did not neglect his literary pursuits. In 1805 he published Pilkington's "Lives of the Painters," and subsequently was elected a member of the first class in the academy of St. Luke's at Rome. B. at Zurich, 1741; D. in London, and was buried in the crypt of St. Paul's, 1825.

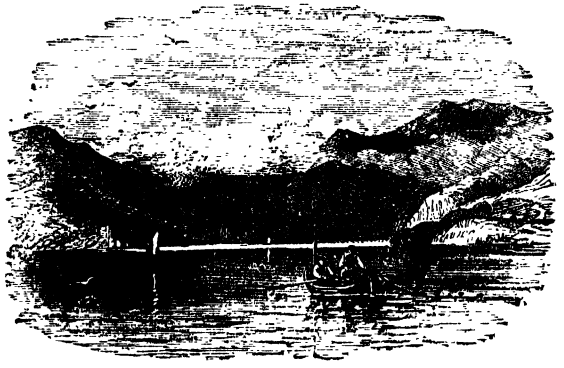
FUST. (*See* FAUST.)

FUTTEHGHUR, or FUTTYGUR, *foot'-te-goor*, a town of Hindostan, and a military encampment, on the Ganges, 3 miles from Furruckabad. It is in a healthy situation, and is well supplied with provisions. *Pop.* Unascertained.

FUTTEHPOOR, or FUTTYPOOR, *foot'-te-poor*, two towns of British India, one in Nagpoor, and the other in Rajpootana. The first is 50 miles from Hosungabad, and the second 90 from Jeypoor.

FUTWA, *foot-wa'*, a town of Hindostan, in the province of Bahar. *Lat.* 25° 30′ N. *Lon.* 85° 28′ E.

FUUR, *foor*, an island of Denmark, in the province of Jutland, 30 miles from Wiborg, in the Linnfiord. *Area*, 11 square miles. *Pop.* 1,000.



FYERS, or FOYERS, *foi'-ers*, a small river of Scotland,

in Inverness-shire, falling into Loch Ness. It is chiefly noted for its fine falls, the upper one being 70, and the lower 207 feet in height.

FYFIELD, *fī'-feeld*, the name of several parishes in England, none of them with a population above 600.

FYLINGDALE, *fī'-ling-dail*, a township of England, in the N. Riding of Yorkshire. *Pop.* 1,702.

FYNE, LOCH, *fine*, a lake, or inlet of the sea, in Argyleshire, Scotland, noted for its excellent herrings.

LOCH FYNE.

It begins between the islands of Arran and Bute, and for about 40 miles, separates the districts of Carral and Kintyre. Its average breadth is 5 miles. Around the town of Inverary, which stands at the upper end of the loch, the scenery is very beautiful, the hills rising steeply from the water. Here, also, in the fishing season, many hundreds of boats stud the loch.

FYVIE, *fī'-ve*, a town and parish of Aberdeenshire, Scotland, 25 miles from Aberdeen. *Pop.* 4,000.

FYZABAD, *fi-za-bad'*, a city of India, in the province of Oude, on the Gogra, 4 miles from the city of Oude. It is somewhat decayed from its former importance, but is still a considerable city. It contains some handsome tombs belonging to the recent reigning family, and its gardens are celebrated for grapes and other fruits. *Pop.* Unascertained, but large.

## G.

[Where *g* is used in the explanatory pronunciation, it is sounded as *g* in *go*.]

GAAL, *gaī'-ăl*, 'contempt,' or 'abomination,' a turbulent man in Israel, supposed to be descended from a Canaanitish prince.

GAASH, *gaī'-ăsh*, 'tempest,' a hill in Mount Ephraim.

GABARET, *gab'-a-rai*, a town of France, in the department of the Landes. *Pop.* 1,000.—This is the former capital of the viscounty of Gabarden.

GABBATHA, *găb'-ba-tha*, 'high,' or 'elevated,' the Hebrew name of the marble-paved gallery in the Roman palace at Jerusalem.

GABEL, *ga'-bel*, a town of Bohemia, circle of Bunzlau, 49 miles from Prague. *Pop.* 1,950.

GABIANO, *ga'-be-a'-no*, a town and parish of Piedmont, on the right bank of the Po, 12 miles from Casale. *Pop.* of town and parish, 3,500.

GABII, *gaī'-be-i*, a city of the Volsci, taken, about 500 B.C., by the artifice of Sextus, the son of Tarquin, who gained the confidence of the inhabitants, by deserting to them, and pretending that his father had ill-treated him.

GABINIUS, *gā-bin'-e-us*, a Roman consul, who made war in Judæa, and re-established tranquillity there. He suffered himself to be bribed, and replaced Ptolemy Auletes on the throne of Egypt. On his return, he was accused of receiving bribes. Cicero, at the request of Pompey, ably defended him. He was banished, however, and D. at Salona, about 40 B.C.

GABLONG, *gab'-long*, a town of Bohemia, in the circle of Bunzlau, on the Neisse. *Manf.* Woollen weaving and spinning, and glass. *Pop.* 3,300.

GABOON, *ga-boon'*, a river of W. Africa. It enters the Atlantic by a wide estuary near the equator. In 1845 the French planted a colony in its vicinity.

GABRIEL, *gaī'-bre-el*, 'strength of God,' an angel of high honour in the service of God.

GABRIEL, Sionita, a learned Maronite, and professor of the oriental languages at Rome and at Paris, at which last place he died, in 1648. He assisted Le Jay in his Polyglot Bible, and published a translation of the Arabic geography, with the title of "Geographia Nubiensis," 1619, 4to.

GACON, Francis, *ga'-kawng*, a French satirist, who attacked, in his writings, Bossuet, Rousseau, and Lamotte. He became a priest of the Oratory, and gained the prize of the academy for poetry, in 1717. B. at Lyons, 1667; D. at his priory of Baillon, in 1725.

GAD, *găd*, a 'band,' or 'troop,' a son of Jacob, who gave his name to one of the twelve tribes of Israel, which was located east of the Jordan.—A prophet and faithful friend of David.

GADAMES, *ga-da'-mes*, an oasis in the African desert, with numerous villages, S. of the main chain of the Atlas. It is the centre of the routes which lead to Tunis, Tripoli, and several oases.

GADARENES, *găd-a-reens'*, 'surrounded,' or 'fenced,' the Gergesenes, people of Gadara, a city of Perea, east of the Sea of Tiberias.

GADDI, *găd'-di*, 'my troop,' one of the spies sent by Moses from Manasseh to explore Canaan.

GADDIEL, *găd'-de-el*, 'God is my happiness,' one of the spies sent from Zebulon to explore Canaan.

GADE, *gaid*, a river of Hertfordshire, which falls into the Colne near Rickmansworth.

GADES, or GADIRA. (*See* CADIZ.)

GADOR, SIERRA DE, *gā'-dor*, a chain of mountains in Andalusia, Spain, ranging nearly parallel with the Sierra Nevada. Its culminating point is nearly 7,000 feet above the level of the sea.

GADSHILL, *găd'-hill*, a place in Kent, 3 miles from Rochester, on the London road. It has been immortalized by Shakspeare, who, in the second act of his "Henry IV.," makes it the scene of a famous rencounter between Prince Henry and Falstaff. Near it is the residence of Mr. Charles Dickens.

GAERTNER, Joseph, *gairt'-ner*, an eminent German naturalist, who, though destined for the church, applied himself to the study of medicine. He travelled through several parts of Europe, and, in 1759, went to Leyden, where he attended the botanical lectures, and applied himself to vegetable anatomy. He subsequently visited England, and communicated some interesting papers to the Philosophical Transactions, the principal of which is a "Memoir on the Fructification and Propagation of Confervæ," &c. Here he gained the friendship of some of the most eminent men of the age, and was made F.R.S. In 1768 he went to St. Petersburg, and was there appointed professor of botany and natural history. After filling that position with great credit, and exploring the Ukraine, making botanical discoveries, he returned to his native land in 1770. In 1778 he went again to London, to make drawings and descriptions of fruits, to illustrate his "Carpology," the first volume of which he dedicated to Sir Joseph Banks. B. at Calw, Suabia, 1732; D. in London, 1791.—He left a number of valuable MSS.

GAETA, *ga-aī'-ta*, a fortified town of Naples, in the province of Terra di Lavoro, on a small promontory to which it gives name, 40 miles from Naples. It is one of the strongest places in the kingdom, and lies along the shore, from the centre of the bay to the point of the promontory. It is a bishop's see, has a cathedral, several churches, convents, an hospital, and a foundling

asylum. The harbour remains nearly as it was in the times of antiquity: the streets are neatly built, and well paved; the general appearance of the town is lively, and the environs extremely picturesque. *Pop.* 15,000, without including its garrison.—In the neighbourhood of this place was the villa of Cicero, who, on its grounds was assasinated, 43 B.C. (*See* Cicero.) In 1799 and in 1806 it was taken by the French, and in 1849, Pope Pius IX. here sought an asylum.

Gaeta, Gulf of, an inlet of the Mediterranean Sea, lying in *lat.* 41° N.; *lon.* 13° 40′ E.

Gage, General Thomas, *gaij*, the commander-in-chief of the British troops in N. America, and the last governor of Massachusetts for the English government. Shut up in Boston after the battle of Lexington, Gage, whom Congress had declared a public enemy, caused martial law to be proclaimed. After the affair at Bunker's Hill, he was forced to embark for England, where he died 1787.

Gagliano, *gal'-ye-a-no*, the name of three villages of Naples, none of them with a population above 3,000.

Gagnier, John, *ga'-ne-ai*, a learned French orientalist, who, bred a Roman Catholic, embraced Protestantism, and settled in England. He was patronized by many eminent persons, and received the degree of M.A. at Cambridge and Oxford. In 1706 he published an edition of Ben Gorion's "History of the Jews," in Hebrew, with a Latin translation and notes. In 1723 he edited Abulfeda's "Life of Mahomet," in Arabic, with a Latin translation and notes, folio. He succeeded Dr. Wallis in the Arabic professorship at Oxford. B. at Paris, about 1670; D. 1725.

Gaillac, *gaï'-yak*, a town of France, in the department of Tarn, 12 miles from Alby. *Manf.* Turnery, tanning, and dyeing. *Pop.* 8,500.

Gainas, *gaï'-i-nas*, a Goth, who became a general in the Roman army under Arcadius. He put Eutropius, the favourite of that emperor, to death, also the prefect Rufinus. Causing himself to be named commander of the cavalry and Roman infantry, he governed the weak Arcadius. At length declared an enemy of the state, he took up arms, was defeated, and perished by the hands of the Huns, with whom he had sought an asylum, 400.

Gainsborough, *gainz'-bur-o*, a seaport market-town of Lincolnshire, on the Trent, 16 miles from Lincoln. It consists almost entirely of one long street, parallel with the river, and is clean, well paved, and lighted. The principal public buildings are the church, a town-hall, union workhouse, and theatre. Over the Trent, an elegant stone bridge, of three elliptical arches, was erected in 1791. At the north-west end of the town stands an ancient and curious edifice, termed the old hall or palace, said, by a vague tradition, to have been the palace of John of Gaunt, but now inhabited by private families. It is a place of considerable trade, exporting Manchester, Birmingham, and Sheffield goods, and importing timber, bones, linseed, and rapeseed. Its canals connect it with the Trent, and steamers ply between it and Hull. *Pop.* 8,500.

Gainsborough, Thomas, an eminent self-taught English landscape-painter, whose early studies were pursued in the woods and fields of Suffolk, rather than in the schools of art. There, from his earliest years, he began to copy a stile, a rock, a tree, or any object which struck his fancy; so that by the time he had attained the age of fourteen, he had ventured upon the art of colouring, and was sent to London. Here he commenced portrait-painting; a path in which he acquired such eminence, as to enable him, in his nineteenth year, to marry a young lady who had a fortune of £200 per annum. In 1760 he went to Ipswich, and thence to Bath; and, in 1774, to London again. He painted some of the portraits of the royal family, and was one of the thirty-six members chosen at the foundation of the Royal Academy. But however he may have excelled in portraits, it has long ago been decided that it is upon his landscapes that his fame rests. In these he is said to have united the brilliancy of Claude with the simplicity of Ruysdel. In both portrait and landscape he has been ranked with Rubens, Vandyke, and Claude; but, however this may be, the great originality of his genius is indisputable. "If ever this nation," says Sir Joshua Reynolds, "should produce genius sufficient to acquire to us the honourable distinction of an English school, the name of Gainsborough will be transmitted to posterity as one of the very first of that rising name." B. at Sudbury, Suffolk, 1727; D. 1788.—His eldest brother was also a good artist; and another, who was a dissenting minister at Henley, in Oxfordshire, was an ingenious mechanic.

Gaius, *gaï'-yus*, 'earthy, or lord,' of Macedonia, a generous supporter of missionary preachers, supposed to have been settled at Corinth to assist Paul, and to have become bishop of the church at Thessalonica.

Gala Water, *gaï'-la*, a river of Scotland, rising in the county of Midlothian, and falling into the Tweed near Galashiels.

Galaga, *gal'-la-ga*, an island in the Indian Ocean, belonging to France. It is fruitful in cocoa-nuts, and exports oil. *Lat.* 10° 29′ 50″ N. *Lon.* 56° 45′ E.

Galanthis, *ga-lăn'-this*, a servant-maid of Alcmena, whose sagacity saved her mistress great pain at the birth of Hercules, and defeated the plots of Juno. She was changed by Lucina into a weasel, and condemned to bring forth her young by the mouth, in great suffering. (*See* Alcmena.)

Galapagos, or Gallipagos, *găl-la-paï'-gos*, a number of islands in the Pacific Ocean, about 200 miles west of the coast of Peru. They comprise 7 small and 6 large islands, of which Albemarle, the largest, is 60 miles long and 15 broad. The whole are volcanic, and abound in lavas insterspersed with fertile oases. They are a great resort of tortoises and turtles, and are frequented by immense numbers of birds. They are mostly uninhabited, and were discovered by the Spaniards. Their situation is near the equator, between *lon.* 89° and 92° W.

Galashiels, *gal-a-sheels'*, a town and parish of Scotland, partly in Roxburgh and partly in Selkirk, on the Gala Water, 5 miles from Melrose. It is irregularly built, and has three churches, a mechanics' institute, and two libraries. *Manf.* Coarse woollen cloth, blankets, plaids, and stockings. *Pop.* of town, 2,600.

Galata, *gal'-a-ta*, a suburb of Constantinople, on the N. side of the Golden Horn. It is inclosed by walls, which have numerous gateways, shut at sunset. It is the principal seat of the foreign trade of the Turkish capital, and is inhabited mostly by European Christians. In it is the custom-house for the port of Constantinople. (*See* Constantinople.)

Galatea and Galathea, *gal'-a-te'-a*, a sea-nymph, daughter of Nereus and Doris. She was passionately loved by the Cyclops Polyphemus, whom she treated with disdain; while Acis, a shepherd of Sicily, enjoyed her unbounded affection. The happiness of these two lovers was disturbed by the jealousy of the Cyclops, who crushed his rival to atoms with a piece of rock, while he sat in the bosom of Galatea. Galatea was inconsolable for the loss of Acis, and as she could not restore him to life, changed him into a fountain. (*See* Acis.)

Galatia, *ga-laï'-she-a*, a country of Asia Minor, between Phrygia, the Euxine, Cappadocia, and Bithynia. It received its name from the Gauls, who migrated there under Brennus, some time after the sacking of Rome. Here St. Paul's labours were successful in gathering churches.

Galatz, or Galacz, *ga-latz'*, a fortified town of Moldavia, on a lake near the confluence of the Pruth and the Danube, 15 miles from Barhilov. It has a good harbour, but is an ill-built place. In 1834 it was made a free port, and, since that time, its trade has greatly extended, various British and Greek merchants having established themselves in it. *Exp.* Hides, tallow, timber, corn, and wool. *Imp.* Manufactured goods from England, colonial produce, and olive oil. *Pop.* Unascertained, but large. *Lat.* 45° 25′ N. *Lon.* 28° E.—This place has regular steam communication with Constantinople and Vienna.

Galba, Servius Sulpicius, *gal'-ba*, a Roman, who, by unremitted diligence, rose gradually to the highest offices of the state. He dedicated the greatest part of his time to solitary pursuits, chiefly to avoid the suspicions of Nero, who, however, because Galba expressed disapprobation of his conduct, ordered him to be put to death. He escaped, however, the executioner, and was publicly saluted emperor. His conduct now greatly displeased the people; and, when he refused to pay the

soldiers the money which he had promised them, after being raised to the throne, they assassinated him, in 60.—The virtues which had shone so bright in Galba when a private man, totally disappeared when he ascended the throne.—There are many others of this name mentioned by ancient writers, but of inferior celebrity.

GALE, Thomas, a learned English divine, who, in 1666, was chosen Greek professor, and in 1672 master of St. Paul's school. He was a member of the Royal Society, of which he became one of the honorary secretaries, and in 1697 was promoted to the deanery of York. He published a collection of the Greek mythologists, "Historiæ Poeticæ Antiqui Scriptores Græcæ et Latinæ;" "Jamblichus de Mysteriis;" "Herodoti Halicarnassensis Historiarum," an edition of Cicero; "Historiæ Anglicanæ Scriptores;" "Historiæ Britannicæ, Saxonicæ, Anglo-Danicæ;" a volume of sermons; "Antonini Iter Britanniarum," &c. B. at Scruton, Yorkshire, 1636; D. at York, 1702.

GALE, Roger, the eldest son of the above, sat in parliament for Northallerton, and became the first vice-president of the Society of Antiquaries, and treasurer to the Royal Society. D. 1744.—He published some valuable books, the principal of which was an edition of his father's "Commentary on Antoninus."—SAMUEL, his brother, was also eminent for his knowledge of antiquities. B. 1682; D. 1754.

GALENA, *gā-le'-na*, a city of Illinois, U.S., on the river Fièvre, 6 miles above its junction with the Mississippi. *Pop.* 7,000, chiefly employed in lead and copper-works.—The surrounding district is extremely rich in lead, and produces large quantities annually.

GALENUS CLAUDIUS, *ga-le'-nus*, Galen, a celebrated Greek physician, who visited the most learned seminaries of Greece and Egypt, and at last went to Rome, where he rendered himself famous by his profession. Many, astonished at his cures, attributed them to magic. He was very intimate with Marcus Aurelius, the emperor, after whose death he returned to Pergamus, where he died in his 90th year, 193 A.D. B. at Pergamus.—He wrote no less than 300 volumes, the greatest number of which were burnt in the Temple of Peace at Rome, where they had been deposited. Galen was second only in merit as a physician to Hippocrates, and to these two medical philosophers of the ancients the moderns are indebted for many useful discoveries.

GALERIUS, C., Valerius Maximianus, *gā-le'-re-us*, a Roman emperor, was a herdsman of Dacia, and entering the army as a private soldier, became, by his valour, a general. Diocletian gave him his daughter in marriage, and in 292 adopted him and Chlorus as his successors. In 296 he commanded in Mesopotamia, where he was, at first, defeated by Narses, king of Persia, but soon retrieved his reputation by a great victory. He instigated Diocletian to persecute the Christians, and on his abdication, in 305, Galerius rose to supreme power. At the close of his life he desisted from persecuting the Christians, and requested their prayers. D. 311.

GALGACUS, *gal'-gā-kus*, chief of the Caledonians, who resisted with uncommon valour the Romans under the command of Agricola. After several skirmishes, the two armies, in 84, came to a pitched battle, in which Galgacus was defeated with prodigious loss, dying on the field. Tacitus puts in his mouth a noble speech made to his troops previous to the battle.

GALIANI, Ferdinand, *gal'-e-a'-ne*, an Italian antiquarian and writer, whose principal work, on Money and Specie, was published in 1750. He was one of the first to discover the archæological riches of Herculaneum. In 1759 he was appointed, by the king of Naples, secretary to the French embassy; and, during his residence at Paris, his company was universally courted. He wrote there "Dialogues on the Corntrade," which, from the strength of their argument and pleasant style, excited considerable notice, though anonymous. In 1779 he returned to Naples, where he filled many high offices of state. Besides the above works, he wrote a Commentary on Horace, a treatise on the Natural Duties of Princes to Belligerent Powers, &c. B. at Chieti, Abruzzi, 1728; D. at Naples, 1787.—It is said of Galiani, that he presented to Pope Benedict XIV. a collection of stones found about Vesuvius; and accompanied them with the inscription, —"Beatissime pater, fac ut lapides isti panes fiant." (Most blessed father, cause these stones to be turned into bread.) This piece of wit had the desired effect, and the holy father presented him with a valuable church preferment.

GALICIA, *ga-lish'-e-a*, a kingdom or province of the Austrian empire, which formerly constituted a part of Poland. It is bounded N. by Poland, Prussia, and Russia; E. by Russia and Moldavia; S. by Transylvania and Hungary; and W. by Silesia. *Area*, 33,540 square miles. *Desc.* It consists of wide and fertile plains, with hardly any elevation, except in the south, where it is intersected by some branches of the Carpathian mountains. *Rivers.* The Vistula, the Dniester, the Bialo, the San, and the Wislocka; besides a considerable number of smaller streams. It has no canals, and no extensive lakes, though ponds are numerous throughout the country. *Climate.* The most severe in the empire. *Pro.* Wheat, oats, barley, maize, flax, hemp, and tobacco. Cattle and horses are largely reared, and, in the south-east part of the kingdom, horses and sheep are the principal stock. Bees are also extensively kept, and both honey and wax are exported. *Minerals.* Iron, coal, copper, zinc, sulphur, marble, alabaster, and fossil salt. There is of this last a bed which stretches from E. to W. along the Carpathians upwards of 270 miles. *Manf.* Spinning and weaving flaxen and hempen fabrics. There are some brandy distilleries, but these are not numerous. *Pop.* 4,556,000.—This country was long in the possession of the Poles; but at the partition of their kingdom, in 1772 and 1795, it was assigned to Austria.

GALICIA, an old province of Spain, forming the N.W. angle of the peninsula, and, since 1833, divided into the separate provinces of Lugo, Corunna, Pontevedra, and Orense. *Area*, about 16,000 square miles. *Desc.* Mountainous, but with a climate generally temperate. *Rivers.* The Minho, Sil, and Ulla. *Forests.* Extensive, and abounding with chestnuts. Large herds of hogs are fed in them, and the timber grown is excellent. *Pro.* Maize, wheat, rye, potatoes, flax, barley; and an inferior kind of wine is produced. Chestnuts are also largely grown, and form a considerable portion of the food of the natives. Sheep and horses are likewise extensively reared. *Minerals.* Copper, lead, tin, antimony marble, and jasper. *Manf.* Unimportant; but consisting of woollens, linens, sailcloth, and other kinds of coarse fabrics. *Pop.* about 2,000,000. *Lat.* between 41° 50′ and 43° 50′ N. *Lon.* between 6° 50′ and 9° 15′ W.

GALILEANS, *gal-i-le'-ans*, a political faction of the Jews, led by Judas of Galilee.

GALILEE, *gal'-i-le*, 'revolution of the wheel,' the northern and largest province of Canaan. It comprised the country west of the Jordan, from Samaria nearly to Sidon, together with both shores of the Lake of Galilee or Tiberias. It now forms the central part of the pashalic of Acre, Asiatic Turkey.

GALILEI, Galileo, *ga-leel'-ai-e*, commonly called *gal'-i-le'-o*, a distinguished Italian astronomer, who may be said to have been the founder of experimental science. He was intended for the medical profession; but, having a strong predilection for the exact sciences, at the age of 25 he became mathematical professor at Pisa, whence, in 1592, he removed to Padua. His first important discovery was the vibrations of a simple pendulum sustained by a fixed point; and, subsequently, he invented an imperfect kind of thermometer, which seems to have answered his purposes. In 1609, having heard that Jansen had invented a glass by which objects at a distance were rendered as visible as if near, he directed his attention to the subject, and constructed the Galilean telescope, by which the science of astronomy has been brought to the utmost perfection. His first instrument was presented to the doge of Venice, who confirmed his professorship for life in the university of Padua, with the largest salary which had ever been there given before to a mathematical professor. By this noble instrument he found that the Via Lactea is an assemblage of fixed stars; and, by assiduous application of his invention, made many other important discoveries in the heavens. His assertion, however, of the earth's motion gave such offence to the inquisitors, that, in 1615, he was cited to Rome, and required to deny

what he had before asserted,—that the sun is the centre of the world, and that the earth is not the centre of the world, but has a diurnal motion. In 1632 he published at Florence his "Dialogues on the Ptolemaic and Copernican Systems of the World,"

GALILEI.

for which he was cited to Rome, his book ordered to be publicly burnt; the author sentenced to be imprisoned, to make a recantation of his errors, and, by way of penance, to recite the seven penitential psalms once a week. A portion of the abjuration of this great man we here transcribe, to show to what extent he was forced by inquisitorial power to deny the truth of the great principles which, through the comprehensive grasp of his own mind, had brought conviction to himself. "With a sincere heart and unfeigned faith, I abjure, curse, and detest the said errors and heresies [namely, that the earth moves round the sun, &c.]. I swear that, for the future, I will never say or assert anything, verbally or in writing, which may give rise to a similar suspicion against me." Rising from his knees after this solemn act, he is said to have whispered to a friend, "It moves, for all that." Galileo now obtained his liberty, and retired to his house near Florence, where he continued his observations till he became blind by intense application. B. at Pisa, 1564; D. near Florence, 1642.—His principal works are, "The Operations of the Compass," "On the Swimming of Bodies," "Mechanics," "Nuncius Sidereus," "On the Trepidation of the Moon," "Discourse of the Solar Spots," "Mathematical Discourses and Demonstrations," "Treatise of the Mundane System."—His son, VINCENZA GALILEI, was the first who applied his father's invention of the pendulum to clockwork. The father of Galilei wrote some esteemed works on music.

GALITA, *ga-lē'-ta*, an island in the Mediterranean, lying off the N. coast of Tunis. *Lat.* 37° 31′ N. *Lon.* 8° 55′ E.

GALITZIN, Basil, *ga-lit'-zin*, a Russian nobleman, who, in 1680, became minister of the czar Fédor Alexowitz, whom he persuaded to abolish the titles of nobility, and to let his subjects rise to dignities by merit. He was in great favour with the regent, Princess Sophia, sister of the czars Peter I. and Ivan, and, during her regency, possessed supreme power. The intrigues of the regent, however, against her brother Peter being discovered, she was confined in a monastery, and Galitzin exiled. B. 1633; D. 1713.

GALITZIN, Michael Michaelowitz, of the same family as the above, served under Peter the Great, both by land and sea. In 1725 he was made field-marshal, and afterwards president of the College of War. B. 1674; D. 1730.

GALL, ST., *gal*, a canton of Switzerland, inclosed by Upper Austria and the cantons of the Grisons, Glarus, Schwytz, and Zurich. *Area*, 749 square miles. *Desc.* Mountainous, but abounding in long and fertile valleys. Near its centre is Mount Sentis, with an elevation of about 8,220 feet above the level of the sea. *Rivers.* The Rhine, Thur, Sitter, Linth, and Seez. *Lakes.* Zurich, Constance, and Wallenstatt, have their coasts within its boundaries. *Forests.* Extensive in the south. *Pro.* Corn, maize, hemp, flax, and fruit. Wine, cider, and kirschwasser, are articles of importance. Cattle-rearing is the principal branch of rural industry. *Minerals.* Iron and coal: large quantities of peat are used. *Manf.* Linen cloth, muslins, and cotton thread. There are, besides, wax-bleaching factories, glass factories, and cotton-bleaching establishments. *Pop.* 170,000.—German is the language spoken in the canton.

GALL, ST., a town of Switzerland, the capital of the above canton, on the rivulet of Steinach, 20 miles from Constance. It is well built, and surrounded with walls and ditches. The objects of curiosity are an old Benedictine abbey, academy, the gymnasium, the cabinets of natural history and coins, and a public library. Of the public buildings, the principal church, the council-house, the arsenal, and the hospital, are worthy of notice. *Manf.* Muslins and cotton yarn. *Pop.* 11,500.

GALL, John Joseph, a distinguished German physician, who founded the science of phrenology, by which the talents and tendencies of the mind are affirmed to be manifested by certain external developments evinced on the surface of the cranium. He settled in Vienna, and afterwards travelled through the north of Germany, Sweden, and Denmark, lecturing upon his system. In 1807 he established himself in Paris, as being the best centre for the dissemination of his opinions, and became physician to Prince Metternich. In 1810 that nobleman guaranteed the expense of publishing the phrenological work of Gall and Spurzheim. B. at Leifenbrunn, Würtemberg, 1758; D. at Paris, 1828.

GALLAND, Anthony, *gal'-la*, a learned French writer, who was sent by the French minister Colbert to the East; and on his return to France was made a member of the Academy of Inscriptions, and professor of Arabic in the Royal College of Paris. He wrote several dissertations on Greek and Roman medals, and other archæological matters; but the work by which he is best known is the translation from the Arabic of the "Arabian Nights' Entertainments." B. in Picardy, 1646; D. at Paris, 1715.

GALLAS, COUNTRY OF THE, *gal'-las*, a territory of Africa, whose savage inhabitants have occupied all the territories to the south of Abyssinia, and seized on some of the finest provinces of that country.

GALLATIN, *gäl'-la-tin*, the name of two counties in the United States.—1. In Kentucky. *Area*, 152 square miles. *Pop.* 6,000.—2. In Illinois. *Area*, 324 square miles. *Pop.* 5,500.—Also the name of two towns in the states of Missouri and New York, neither of them with a population above 2,000.

GALLE, *gäl*, a town and steam-packet station of Ceylon. *Lat.* 6° 1′ N. *Lon.* 80° 14′ E.—The POINT DE GALLE is the first glimpse of Indian land seen by outward-bound passengers to Calcutta; and Sir Emerson Tennent, in his "Ceylon," produces the clearest evidence that this place is the ancient Tarshish, which is mentioned in Scripture as having been visited by the navies of Hiram and Solomon.

GALLES, *gal*, the French name for Wales.

GALLI, *gäl'-li*, the Gauls, a nation of Europe, naturally fierce, and inclined to war. They believed themselves descended from Pluto; and, from that circumstance, always reckoned their time, not by the days, as other nations, but by the nights. Not only the most precious things, but even the favourite animals and most cherished slaves and dependants of the master, were burnt with his corpse on the funeral piles. Children, among them, never appeared in the presence of their fathers, before they were able to bear arms in defence of their country. They seized the city of Rome, invaded Greece in different

ages, and spread themselves over the greatest part of the world. Their Druids were a dominant caste, presiding even over civil affairs; while in religious matters their authority was despotic. Cæsar has given a full account of the Gauls, and was ten years in their country, before he could totally subdue them. (For an admirable sketch of the Gauls and Celts, see the introduction to Motley's "Rise of the Dutch Republic.") —The priests of Cybele, who received that name from the river Gallus, in Phrygia, where they celebrated the festivals. The chief among them was called Archigallus.

GALLIA, *gäl'-le-a*, Gaul, a large country of Europe. The inhabitants were called Galli, Celtæ, Celtiberi, and Celto-scythæ. Ancient Gaul was divided into four different parts by the Romans called Gallia Belgica, Narbonensis, Aquitania, and Celtica. Besides these grand divisions, there is often mention made of *Gallia Cisalpina*, or *Citerior*; *Transalpina*, or *Ulterior*, which refers to that part of Italy which was conquered by some of the Gauls, who crossed the Alps. By Gallia *Cisalpina*, the Romans understood that part of Gaul which lies in Italy; and by *Transalpina*, that which lies beyond the Alps, in regard only to the inhabitants of Rome. Gallia *Cispadana* and *Transpadana* is applied to a part of Italy conquered by some of the Gauls, and then it means the country on the W. side of the Po, or beyond the Po, with respect to Rome.

GALLIENUS, Publ. Lucinius, *gäl'-li-e'-nus*, a son of the emperor Valerian, reigned conjointly with his father for seven years, and ascended the throne as sole emperor 260 A.D. In his youth, he evinced military genius in an expedition against the Germans and Sarmatæ; but when he came to the throne, resigned himself to pleasure and indolence. His time was spent in the greatest debauchery; and two of his officers at length revolted, and assumed the imperial purple. This roused him, and he marched against them, without showing the least favour either to rank, sex, or age, putting all to the sword. These cruelties irritated the people and the army; thirty of his generals, known as the Thirty Tyrants, assuming the purple. Gallienus resolved boldly to oppose his adversaries; but in the midst of his preparations was assassinated at Milan by some of his officers, 268 A.D.

GALLIPOLI, *gal-le'-po-le*, a city of Naples, in the Terra d'Otranto, on the E. side of the Gulf of Tarento, joined to the continent by a bridge, 30 miles from Otranto. It is a bishop's see, is well built and fortified, and has a convenient harbour, with a cathedral, castle, and schools. *Manf.* Muslin, cotton stockings, and other stuffs, and it carries on a considerable trade in olive oil, for the clarifying of which it has cisterns excavated in rocks. Its port is one of the best frequented in the Neapolitan dominions. *Pop.* 11,000.

GALLIPOLI, a seaport-town of European Turkey, in Rumelia, on the STRAIT of Gallipoli, 80 miles from Adrianople. It has two good harbours, and is the chief station of the Turkish fleet. The bazars are very extensive, and furnished with merchandise of every kind. It was taken by the Turks in 1356, and was the first town in Europe that fell into their hands. *Pop.* 17,000, of whom 10,000 are Turks; the rest Greeks and Jews.—In 1854 a portion of the Anglo-French army designed for the protection of Turkey from the encroachments of Russia, was here stationed.

GALLIPOLI, PENINSULA OF, separates the Hellespont from the Ægean Sea and the Gulf of Saros. *Ext.* 62 miles long, with a breadth ranging between 4 and 12. *Lat.* between 40° 3′ and 40° 38′ N. *Lon.* between 26° 10′ and 27° E.

GALLOWAY, *gäl'-lo-wai*, a district of Scotland, comprehending the two counties of Kirkcudbright and Wigton.

GALLOWAY, MULL OF, a cape of Scotland, on the S. coast of Wigtonshire, having a lighthouse 325 feet above the level of the sea. *Lat.* 54° 38′ N. *Lon.* 4° 51′ W.

GALLUS, *gäl'-lus*, a name common to many celebrated Romans, the most distinguished of whom are the following:—Caius, a friend of the great Africanus, famous for his knowledge of astronomy, and his exact calculations of eclipses.—Cornelius, a Roman knight, who rendered himself famous by his poetical as well as military talents. He was passionately fond of the slave Lycoris, or Cytheris, and celebrated her beauty in his poetry. She proved ungrateful, and forsook him, which gave occasion to Virgil to write his tenth eclogue. Gallus was a favourite with Augustus, by whom he was appointed over Egypt; but he forgot the benefits he had received, pillaged the province, and even conspired against his benefactor; for which he was banished by the emperor. This disgrace operated so powerfully upon him, that he killed himself in despair, 26. Some few fragments remain of his poetry. He particularly excelled in elegiac composition.—A Roman, who assassinated Decius, the emperor, and raised himself to the throne. He became indolent and cruel, and beheld with the greatest indifference the revolt of his provinces, and the invasion of his empire by the barbarians. He was at last assassinated by his soldiers, 253.—Flavius Claudius Constantius, a brother of the emperor Julian, raised to the imperial throne under the title of Cæsar, by Constantius, his relation. He conspired against his benefactor, and was condemned to be beheaded, 354.

GALOON, *ga-loon'*, a parish of Ireland, in the county of Fermanagh, Ulster. *Pop.* 7,200.

GALOPARO, or CAPO DI FARO, *gal-o-par'-o*, the Charybdis of the ancients. It forms the whirlpool on the outside of the harbour of Messina, in the strait between Italy and Sicily. Opposite, on the coast of Italy, is the rock Scylla.

GALSTON, *gal'-ston*, a village and parish of Ayrshire, Scotland, 14 miles from Ayr. *Area*, 23 square miles. *Pop.* 4,500, mostly employed as weavers.—It is a station on the South-Western Railway.

GALT, John, *galt*, a Scotchman, who began life as a tradesman in London, but commenced the study of the law, which he forsook for the literary profession. For some time he acted in the capacity of agent to a company for establishing emigrants in Canada, but quarrelled with the government, and was suspended by the Canada company. On his return to England, he devoted himself to literature, and supported himself by the labours of a most prolific pen. The bare enumeration of his works would occupy a considerable space; but the following criticism from the "Gentleman's Magazine" of 1839 will give an idea of his style, and the fields in which he worked:—"There is a thorough quaintness of phrase and dialogue in Mr. Galt's best works, which places him apart from all other Scotch novelists; much knowledge of life, variety of character, liveliness and humour, are displayed in his novels, and render them justly popular. The public will not soon forget his 'Ayrshire Legatees,' his 'Annals of the Parish,' or his 'Entail.' His biographies, and many of his later works manufactured for the booksellers, are of a very different character." B. in Ayrshire, Scotland, 1779; D. 1839.

GALVANI, Lewis, *gal-vä'-ne*, the discoverer of galvanism, was a celebrated Italian physiologist, and, in 1762, became lecturer on anatomy at Bologna, obtaining a considerable reputation. By experiments on frogs, he discovered that all animals are endued with a peculiar kind of electricity; and he followed up this discovery with so much perseverance and success, as to give his name to certain electrical properties, which have excited universal attention. His first publication on this subject was in 1791, and entitled "Aloysii Galvani de Viribus Electricitatis in Motu Musculari Commentarius." The famous Volta followed Galvani in his researches, and discovered further wonders in this branch of science. Galvani, on the death of his wife, in 1790, fell into a state of melancholy, and D. 1790; B. at Bologna, 1737.—Besides the above work, he wrote several memoirs upon professional subjects.

GALVESTON, *gäl-ves'-ton*, a seaport-town of the United States, situate at the extremity of Galveston island, at the entrance to Galveston Bay, in the Gulf of Mexico. *Pop.* 5,000.—The BAY extends 30 miles inland, and receives several rivers.—The ISLAND is 30 miles long, with an average breadth of 2.

GALWAY, *gawl'-wai*, a maritime county of Ireland, in the province of Connaught, bounded W. by the Atlantic Ocean, N. by Mayo, N.E. by Roscommon, E. by the river Shannon, which separates it from King's county and Tipperary, and S. by Clare and Galway Bay. *Ext.* 82 miles long and 42 broad. *Desc.* Extremely diversified, both in soil and aspect, some

parts of it being untilled, while, in other parts, it is fertile and well cultivated. *Rivers.* The principal are the Shannon, Suck, and Blackwater. *Lakes.* Corrile, Mask, Reagh, and Contra. The first is 20 miles long, and 12 at its broadest part. *Pro.* Oats and potatoes; but the land is better adapted for grazing purposes than for tillage. Its breed of cattle is valuable, and the fisheries are important. *Minerals.* Iron, lead, copper, marble, and limestone. *Manf.* Coarse linens and woollens, mostly made for home consumption. *Pop.* 299,000.

GALWAY, a seaport-town of Ireland, and capital of the above county, is situate on a broad and stony river, by which Loughcorrib flows into the sea, 105 miles from Dublin. It was originally a walled town. It consists of four main streets, running parallel to each other, and intersected by cross streets and lanes, nearly at right angles. The collegiate church is very large, and is of Gothic structure. The other public buildings are an exchange, nunneries, friaries, a barracks, a theatre, a charter-school, two court-houses, an infirmary, and a union workhouse. *Manf.* Coarse cloths, linen, paper, flour; and there are both breweries and distilleries. *Exp.* Fish, bacon, corn, and flour. The port is commodious and safe. *Pop.* 24,000.—In 1690 Galway declared for King James, but next year surrendered to General Ginkle. It is connected with Dublin by the Midland Great Western Railway, and a line of steam-vessels was here established in 1859, between Ireland and North America.

GALWAY BAY, on the W. coast of the Atlantic, between the counties of Clare and Galway. *Ext.* 30 miles long, with an average breadth of 10. It is indented by many peninsulas, and opposite its entrance are the S. Arran islands.

GAM, David, *găm*, a brave Welsh officer in the army of Henry V., whom he accompanied to France. Having returned from reconnoitring the enemy on the eve of the battle of Agincourt, he reported that there were enough of the enemy to be killed, enough to be taken prisoners, and enough to run away. He was knighted by Henry on the field, but was killed defending his sovereign when exposed to imminent danger, 1415.

GAMA, Vasco or Vasquez de, *gă'-ma*, an illustrious Portuguese navigator, to whom belongs the merit of having discovered the route to the East Indies by sea. In 1497 Emanuel, king of Portugal, sent him to endeavour to double the Cape of Good Hope, which he accomplished, and then sailed along the eastern coast of Africa, having proceeded as far as Calicut, where he arrived in May, 1498, and was received by the prince of that place with great pomp and ceremony. After an absence of two years, he returned to Lisbon, where he arrived in September, 1499. In 1502 he went out with twenty ships, and returned, the following year, with thirteen, which he had captured in the Indian seas. On this occasion he was created count of Videqueyra. In 1524 he was appointed, by John III., viceroy of Portuguese India, being the first who held that title, and he sailed and took possession of his government, but did not long survive his honours after his arrival at his destination. B. at Sines, Portugal; D. at Cochin, 1525.

GAMALIEL, *gă-mail'-le-el*, 'recompense of God,' or 'camel of God,' a prince of the tribe of Manasseh.—A Jewish doctor of the Pharisees, of the highest reputation.

GAMBIA, *găm'-be-a*, a British colony of W. Africa, at the mouth of the river Gambia. It is settled on the most healthy part in W. Africa, and enjoys a flourishing trade. *Pop.* 5,000. *Lat.* 13° 30′ N. *Lon.* 14° 40′ W.

GAMBIA, a large river of Western Africa, traversing the centre of Senegambia, and, after a course of 1,000 miles, falling into the Atlantic at Bathurst, 110 miles from Cape Verd.

GAMBIER, James, Lord, *găm'-be-er*, a British admiral, who went to sea at an early age, and, in 1778, was appointed to the command of the *Raleigh*, 32. In this frigate he was engaged against the French in 1781, and assisted in the reduction of Charlestown, S. Carolina. He was present at Lord Howe's memorable victory of the 1st June, 1794, commanding the *Defence*, 74; and after filling various posts, was intrusted, in July, 1807, with the command of the fleet despatched to Copenhagen. This city was bombarded for three days, when the enemy capitulated, and 19 sail of the line, 23 frigates and sloops, and 25 gunboats, were taken and conveyed to England. He was now created a baron, and, in 1808, had the command of the Channel fleet. In 1809, Lord Cochrane (afterwards the earl of Dundonald), who was under Lord Gambier's orders, attacked and destroyed with his fire-ships, several French vessels in the inner roads of the Isle d'Aix, and Lord Cochrane was desirous of completing the destruction of the remainder of the enemy's fleet, but the commander-in-chief did not consider the attempt practicable. A court-martial sat on the conduct of the latter, but he was acquitted. In 1814 he negotiated a peace with the United States of America, at Ghent; and, on the accession of William IV., was advanced to the rank of admiral of the fleet. D. at the Bahama Isles, of which his father was lieutenant-governor, 1756; D. at Iver, near Uxbridge, 1833.

GAMBIER ISLANDS, a group of small islands in the South Pacific Ocean, important on account of their being the only known station between Chili and Tahiti where good water can be obtained. They are under the protection of the French. *Lat.* 23° 12′ S. *Lon.* 134° 55′ W.

GAMRU, *găm-ru'*, a maritime parish of Scotland, 7 miles from Banff. *Pop.* 5,300. The coast of this parish is wildly grand, being also pierced with numerous caverns, which are inhabited by immense numbers of sea-birds.

GAND, *ga*, the French name for Ghent, which *see*.

GANDIA, *gan'-de-a*, a town of Spain, at the mouth of the Alcoy, 33 miles from Valencia. *Manf.* Silks, linens; and it has a trade in wine. *Pop.* 6,000.

GANGES, *găn'-jees*, a celebrated river of Hindostan, having its source in two springs near Mount Kentaiffe, in Tibet. *Lat.* 30° 54′ N. *Lon.* 79° 7′ E. These streams, after running 500 miles in a W. direction, inclining to the N., turn to the S., unite their waters at Deoprag (*lat.* 30° 8′ N., *lon.* 78° 39′ E.), and form what is properly called the Ganges, from the Hindoo word *Ganga*, which signifies river. This great body of water now forces a passage through Mount Himalch (a chain or ridge of mountains extending from Cabul along the N. of Hindostan, and through Tibet) and, sapping its very foundations, rushes through a cavern, and precipitates itself into a vast basin, which it has worn in the rock, at the hither foot of the mountains. From this second source, as it may be termed, of the Ganges, it takes a S.E. direction through the country of Sirinagur, until, at Hurdwar, it finally emerges from the mountains, among which it has meandered for about 800 miles. From Hurdwar, where it enters the plain country, it flows with a smooth navigable stream, during the remainder of its course, to the Bay of Bengal, which it enters by several mouths. In its course through these delightful plains, it passes by Furruckabad, Allahabad, Benares, Patna, &c., and receives eleven rivers, some of which are equal to the Rhine, and none smaller than the Thames; besides others of inferior note. In the annual inundation of this immense river, the country is overflowed to the extent of more than 100 miles in width; nothing appearing above water but villages and trees, excepting, very rarely, the top of an elevated spot, the artificial mound of some deserted village, which appears like an island. The river rises at this period, on an average, about 31 feet. The Ganges is a beneficent river, diffusing plenty by means of its living productions, enriching the lands, and affording an easy conveyance for the produce of its banks. The Hindoos hold its waters in high veneration, and it is visited annually by pilgrims from all parts of Hindostan. Happy are those accounted whose lot it is to perish in its streams; its estuary being considered by the Brahminists the termination of the "Sacred Stream." *Length*, 1,557 miles.

GANGPORE, *gang-por'*, a small state of India, on the Bengal frontier. It is tributary to the British, and has a fertile soil, but is ill cultivated. *Area*, 2,490 square miles. *Pop.* 112,000.

GANJAM, *gan-jam'*, a town of Hindostan, on the Bay of Bengal, near the S.W. end of the Chilka Lake. *Pop.* Unascertained. *Lat.* 19° 20′ N. *Lon.* 85° 20′ E. —This town is the capital of a fertile DISTRICT, with an area of 6,400 square miles, and a population of 930,000.

GANTUNG PASS, *gan-toong'*, a mountain-pass in Bussahir, between Chinese Tartary and Koonawar, descending, on the W. side, upon the Sutlej. *Height*, 18,290 feet above the level of the sea. *Lat.* 31° 38′ N. *Lon.* 78° 47′ E.

GAN-WAY, a province of China. (*See* NGAN-HOEI.)

GANYMEDE, *găn'-i-meed*, a young prince of great beauty, the son of Tros, king of Troy, who was taken up to heaven by the eagle of Jupiter to replace Hebe as the attendant of the gods. (*See* HEBE.)

GAP, *gap*, a town of France, the capital of the department of the Upper Alps, 46 miles from Grenoble. It is a mean, ill-built place, with narrow streets and low crowded houses. *Manf.* Silk, woollen, and linen fabrics; and, in its neighbourhood, are marble-quarries. *Pop.* 9,000.

GARACHICO, *gar-ra-che-ko*, a town on the N. coast of Teneriffe, which, till 1705, was one of the most important places in the island. In that year a volcanic eruption nearly destroyed it. *Pop.* 2,500.

GARAMOND, Claude, *gar'-a-mawng*, a French engraver and letter-founder, was the first who superseded Gothic or black-letter printing, substituting in its place the Roman letter. B. at Paris; D. 1561.

GARASSE, Francis, *ga-rass'*, a French Jesuit of considerable talents, but very scurrilous in his writings against many of his contemporaries. In 1625 he published "A Summary of the Principal Truths of the Christian Religion," which was condemned by the Sorbonne. He was also the author of Latin poems, and some controversial works. D. of the plague, which he caught at Poitiers, while visiting the sick in the hospitals, 1631; B. at Angoulême, 1585.

GARBIEH, *gar'-be*, a maritime province of Lower Egypt, in the delta of the Nile.

GARCAO, Pedro Antonio Correa, *gar'-ka-oo*, a Portuguese lyric poet, who is held in the highest estimation by his countrymen. He clothed his odes in the language of the 16th century, and many of them breathe the finest spirit of poetry. His epistles and satires are considered among the best in modern literature, and several plays which he wrote are conceived in excellent taste. He laboured to improve the taste of his countrymen; but an early death prevented the accomplishment of what an earnest ambition might have achieved. B. at Lisbon, 1735; D. 1778.

GARCILASSO, or GARCILASSO DE LA VEGA, *gar'-thelas'-so*, an eminent Spanish poet, who accompanied the emperor Charles V. in his military expeditions, and died of a wound, which he received in Provence in 1536. It is a strange circumstance, that this poet, whose verses told only of the delights of peace and the pleasures of repose, should have lived the life and died the death he did. His poems were translated into English by Wiffen. B. at Toledo, 1503.—His works were printed at Naples in 1664, 8vo.

GARD, *gard*, a department of France, containing part of Languedoc, and bounded on the S. by the Mediterranean, and landward by the departments of the Lozère, the Ardèche, the Rhone, the Herault, and the Aveyron. *Area*, 2,312 square miles. *Desc.* Mountainous in the N.; but in the S. it is interspersed with numerous lakes and marshes. *Rivers.* The Rhone, Herault, Vidorra, Ceze, and Gardon. *Pro.* Fruit, olive oil, and wine. It is deficient in corn; but is noted for its excellent cattle and a breed of white horses. Silkworms are extensively reared. *Minerals.* Coal, iron, lead, sulphur, and zinc. *Manf.* Shawls and gloves; and it exports both dyeing and medicinal plants. *Pop.* 409,000.

GARD, or GARDON, a river of France, which traverses the centre of the department Gard, and, after a course of 55 miles, joins the Rhone 5 miles from Tarascon.—The PONT DE GARD is an aqueduct bridge, 10 miles from Nimes, and is one of the most splendid Roman remains in France. It is supposed to have been constructed by Agrippa, in order to convey to Nimes the water of the spring of Eure.

GARDA, LAKE OF, *gar'-da*, a lake of Italy, lying between Tyrol and the governments of Venice and Milan. *Ext.* About 35 miles in length, and from 2 to 10 wide; the depth varies from 10 to 40 feet where it is narrowest, and its greatest depth is 950 feet. In 1796 the battle of Rivoli was fought near its E. shore, when Bonaparte defeated Wurmser.

GARDA, a small town of Northern Italy, in the Veronese, on the lake to which it gives name, 30 miles from Mantua. *Pop.* with parish, 3,000.

GARDAFUI CAPE. (*See* GUARDAFUI.)

GARDAIA, or GHARDEIA, *gar-dai'-a*, a town in the Sahara, belonging to Algeria, encompassed by walls, and defended by towers. *Manf.* Woollen stuffs, firearms, and gunpowder. *Pop.* Unascertained, but considerable. *Lat.* 31° 58′ N. *Lon.* 2° 50′ E.

GARDELEGEN, *gar'-de-lai'-gen*, a town of Prussian Saxony, 30 miles from Magdeburg. *Manf.* Woollen and cotton goods. *Pop.* 6,000.

GARDINER, Stephen, *gar'-di-ner*, a distinguished English prelate and statesman, the illegitimate son of Dr. Woodville, bishop of Salisbury, and brother to Elizabeth, queen of Henry IV. He was educated at Trinity Hall, Cambridge, whence he went into the family of the duke of Norfolk, and afterwards into that of Cardinal Wolsey, who made him his secretary. In 1527, in company with Edward Fox, he went to Rome for the purpose of persuading the pope to consent to the divorce of Queen Catharine by Henry VIII. Though unsuccessful in his mission, he greatly assisted Henry in the prosecution of his design, and became secretary of state, and in 1531 bishop of Winchester. He wrote "De Verâ Obedientiâ," in defence of the king's supremacy, and drew up articles accusing Henry's last queen, Catharine Parr, of heresy; but the queen avoided the storm, and he fell into disgrace. At the accession of Edward VI. he opposed the Reformation, and was committed first to the Fleet, and afterwards to the Tower, where he remained a prisoner during the remainder of the reign: he was also deprived of his bishopric; but, on the accession of Mary, he was restored to his see, and, in 1553, appointed lord chancellor and prime minister. He had a deep knowledge of human nature; but his conduct towards the Protestants was cruel and sanguinary. B. at Bury St. Edmund's, 1483; D. 1555.—He was a learned man, but of little principle, crafty, and ambitious. Lloyd, in his "State Worthies," says that he was to be traced like the fox, and, like the Hebrew, was to be read backwards.

GAREB, *gar'-reb*, 'a seat,' a mighty captain of David.

GARGANO, *gar-ga'-no*, a town of Italy, on the Lake of Garda, 24 miles from Brescia. *Pop.* 4,000.

GARGAPHIA, *gar-gaf'-fe-a*, a valley near Platæa, with a fountain of the same name, where Actæon was torn in pieces by his dogs.

GARGARIS, *gar'-ga-ris*, a king of the Curetes, who first found out the way of collecting honey.

GARGARUS, *gar'-ga-rus*, a mountain of Anatolia, in Asia Minor, 10 miles from Adramyti. It is the highest summit in the ridge of Ida. *Height*, 4,955 feet above the level of the sea. It may be divided into three zones; the first consisting of cultivated land, the second of forests, and the third of snow.

GARIBALDI, Joseph, *ga'-re-bal'-de*, a modern Italian patriot and general, was brought up at Nice, among sailors and fishermen, and, at an early age, entered the Sardinian navy, soon distinguishing himself by his courage and coolness. Implicated, in 1834, in the Italian insurrectional movement, he was compelled to fly, and take refuge in Marseilles. After passing two years here, chiefly in the pursuit of mathematical studies, he embarked in an Egyptian corvette, to serve as a naval officer in the fleet of the Bey of Tunis. Disappointed in his expectations, however, he set out for Rio Janeiro, and fought, with great bravery and success, in the service of the government of Uruguay against Buenos Ayres. His influence over his troops was something wonderful; and for the bravery he and his Italian followers displayed at Salta, the government of Montevideo decreed, on that day, that the Italian legion should take the right, the post of honour, even when with native troops, in every engagement. The insurrection of the Peninsula, in 1848, brought Garibaldi back to Nice. A portion of his legion accompanied him, and took a prominent part in the war of independence against the Austrians in the Southern Tyrol. At Rome he was the soul of the resistance; and Marshal Vaillant, the French commander, in his report of the operations during the siege of that city, did justice to the energy and skill of his adversary. On May 9, at Palestrina, he defeated the Neapolitan

army, though vastly superior in numbers to his own A few days later, at Velletri, where he was severely wounded, he was still to win the honours of the day. Finally he sustained, by his courage and resources, for a whole month, the attacks of the French army. In the last council of war held at Rome, Garibaldi proposed the employment of extreme measures, but they were not approved. He then left the sacred city with the remnant of his little army, traversed the enemy's lines, and withdrew to the neighbourhood of St. Marin. There his troops disbanded. He reached Genoa with 200 soldiers, who had refused to leave him. At the end of a few months he returned to America, where he engaged energetically in trade and industry. About 1852 he was again actively employed in command of the Peruvian army. When the war ceased, he returned to Nice. For five years he now lived in retirement with his sons on the isle of Caprera, off the Sardinian coast, where he farmed on a large scale. In the Italian war of 1859, he played a conspicuous part against the Austrians, and seemed to be ubiquitous, by the marvellous rapidity of his operations. After the peace, the preliminaries of which were signed at Villafranca, he had the command of the army of Central Italy, but subsequently retired from the field, and laid down his arms. He was, however, soon recalled from his retirement. B. at Nice, 1807.—The wife of Garibaldi was as much a heroine as he was a hero. She had never left him on the battle-field either in America or Italy, and was at last slain at her husband's side by the Austrians.

GARIEP, *ga-reep'*, a river of S. Africa. (*See* ORANGE RIVER.)

GARIGLIANO, *gă'-reel-ye-a'-no*, a river of Naples, which, after a course of 75 miles, falls into the Mediterranean, 10 miles from Gaeta.

GARLASCO, *gar-las'-ko*, a market-town of Piedmont, 21 miles from Novaro. *Pop.* 5,800.—Near this place the Austrians, when invading Italy in 1849, crossed the Po.

GARNET, Henry, *gar'-net*, an English Jesuit, memorable for being concerned in the gunpowder plot, was educated at Winchester school. He took the Jesuit's habit at Rome in 1575, and returned to England in 1586, as provincial of his order. He was executed for high treason in 1606. He confessed the crime for which he suffered, but was placed by the Jesuits among their martyrs.

GARONNE, *ga-ron'*, one of the largest rivers of France. It rises among the Pyrenees, in the Val d'Aran, on the confines of Spain, and, passing by Bordeaux and Blaye, falls into the Atlantic, 47 miles below, by two mouths. At Blaye it assumes the name of the Gironde. *Length*, 300 miles.—The Garonne is connected with the Mediterranean by the Canal du Midi.

GARONNE, UPPER, a department in the S.W. of France, consisting of part of Languedoc and Gascony, and bounded S. by Spain and W. by the department of the Upper Pyrenees. *Area*, 2,490 square miles. *Desc.* Mountainous, and generally elevated, especially in the S., where offshoots of the Pyrenees occupy a considerable portion of its surface. It has, however, many beautiful valleys, and abounds with small plains. *Rivers.* The Garonne and its affluents. *Pro.* Corn, hemp, lint, tobacco, grapes, oranges, and other fruits. In the mountain districts, cattle-rearing is carried on to a great extent, and numbers of mules are also reared. *Minerals.* Important;—iron, copper, lead, zinc, and antimony. Marble is also produced, and there are large salt marshes. *Manf.* Cotton and linen fabrics, iron and steel goods, leather, porcelain, straw hats, and chemicals. *Pop.* 182,000.

GAROO, or GARTOP, *ga-roo'*, a station of the Chinese empire, near a source of the Indus, 16,000 feet above the level of the sea. At it an active trade is carried on in exchanging the products of China and Tibet for those of India and Cashmere. *Lat.* 31° 40′ N. *Lon.* 80° E.

GARRARD, *găr'-rard*, a county of Kentucky, U.S. *Area*, 312 square miles. *Pop.* 16,000.

GARRICK, David, *găr'-rik*, a celebrated English actor, descended from a French family of the name of Garric or Garrique, who fled to England on the revocation of the Edict of Nantes. His father, Peter Garrick, was a captain in the army, and generally resided at Lichfield. David received his education partly at the grammar-school at Lichfield, and partly under Dr. Johnson, with whom, in 1735, he went to London to seek his fortune. He was for some time under Mr. Colson, an eminent mathematician, and afterwards entered into partnership with an elder brother in the wine trade. This business he soon quitted for the stage. His first appearance was at Ipswich, in 1741, where, under the assumed name of Lyddal, he appeared as Aboan, in the tragedy of "Oroonoko." The applause he met with induced him to make his appearance in London, at the theatre in Goodman's Fields, where, in the character of Richard III., he appeared, in 1741, and achieved a decided success. The other theatres were quickly deserted, and Goodman's Fields became the resort of people of fashion, even from the west-end, till that theatre was shut up. He next formed an engagement with Fleetwood, the patentee of Drury-lane, and, in 1742, appeared for three nights as Bayes, Lear, and Richard III. In the summer of 1743 he played in Dublin, with Mrs. Woffington, to such full houses, that the heat of the weather and the crowds occasioned a fever, which was called the Garrick fever. In 1747 he became joint-patentee of Drury-lane theatre, and, in 1749, married Mademoiselle Violetti, an Italian stage-dancer. In 1763 he and Mrs. Garrick made a visit to Italy, and at Paris he saw the celebrated Mademoiselle Clairon, whose future eminence he predicted. He returned to England in 1765, and, in 1766, brought out the "Clandestine Marriage," a comedy written in conjunction with the elder Colman. In 1769 he celebrated a fête in honour of Shakspeare, called the Jubilee, at Stratford-upon-Avon, and afterwards made an entertainment of it at Drury-lane, under the same title, where it had a prodigious run. In 1776 he sold his concern in the theatre for £35,000. The last character he performed was Don Felix in the "Wonder," which he acted in 1776 for the benefit of decayed actors. B. at Hereford, 1716; D. in London, 1779, and was buried in Westminster Abbey, where a handsome monument is erected to his memory by private friendship.—Mr. Garrick was hospitable and generous, but vain and fond of flattery. He wrote several dramatic pieces, prologues, epilogues, songs, and epigrams. In the last he excelled. It is, however, upon his skill in histrionic representation that his fame rests. In this he has never been equalled. "That young man," said Pope, after seeing his Richard III., "never had his equal as an actor, and will never have a rival." In tragedy and comedy he was alike at home, and certainly possessed a matchless versatility of genius for the exhibition of passion. "His appearance," says Schlegel, in his "Lectures on Dramatic Art and Literature," "forms an epoch in the history of the English theatre, as he chiefly dedicated his talents to the great characters of Shakspeare, and built his own fame on the growing admiration of the poet. Before his time, Shakspeare had only been brought on the stage in mutilated and disfigured alterations. Garrick returned, on the whole, to the true originals, though he still allowed himself to make some very unfortunate changes. . . . . Whether he always conceived the parts of Shakspeare in the sense of the poet, I, from the very circumstances stated in the eulogies on his acting, should be inclined to doubt. He excited, however, a noble emulation to represent worthily the great national poet. This has ever since been the highest aim of actors, and even, at present, the stage can boast of men whose histrionic talents are deservedly famous." Mrs. Garrick survived her husband forty-three years, and died at her house in the Adelphi, 1822, in the 98th year of her age.

GARROW MOUNTAINS, *gar'-ro*, a range of Further India, surrounded by the territories of Bengal, Assam, and Jynteah. It is inhabited by an independent people, who carry their produce to the Bengal districts. *Height*, from 3,000 to 4,000 feet.

GARRY, *găr'-re*, a river of Perthshire, Scotland, which, after a course of 20 miles, joins the Tummel.—James Hogg, the Ettrick Shepherd, speaks of it in his beautiful song of "Bonnie Prince Charlie."

"Cam ye by Athol, lad, wi' the philabeg,
Down by the Tummel, or banks o' the Garry."

It flows from a small lake of the same name, in the wild district of Athol Forest.

GARSTANG, *gars'-ting*, a town and parish of Lancashire, 12 miles from Lancaster. *Manf.* Calico-printing and cotton and worsted spinning. *Pop.* 7,500.—It is a station on the Manchester and Preston Railway.

GARTH, Sir Samuel, *garth*, an English poet and physician, who greatly contributed to the establishment of dispensaries; but was opposed by the apothecaries, whom he severely lashed in his poem of the "Dispensary," for their venal spirit. In 1697 he spoke the Harveian oration before the college. On the accession of George I. he was knighted, and appointed king's physician in ordinary, and physician-general to the army. B. in Yorkshire; D. 1719.—His poems do not possess any extraordinary merit.

GASCOIGNE, Sir William, *găs'-koin*, an eminent English judge, who rose to be chief justice of the King's Bench in the reign of Henry IV. He was a man of integrity and independence, refusing to pass sentence on Archbishop Scroope, as a traitor, and sentencing the prince of Wales, afterwards Henry V., to be imprisoned for indecorous conduct before him on the bench. B. at Gawthorpe, Yorkshire, 1350; D. 1413.

GASCOIGNE, George, an old English poet, who served under the prince of Orange in the wars of the Low Countries. He wrote masques of the progresses of Queen Elizabeth, and some of his poems are not without merit. D. at Stamford, 1577.

GASCONADE, *găs'-ko-nad*, a river of N. America, which joins the Missouri from the N., 100 miles from its confluence with the Mississippi.—Also a county of the United States. *Area*, 540 square miles. *Pop.* 5,000.

GASCONY, *găs'-ko-ne*, an old province in the S.W. of France, which, before the Revolution, was one of the great provinces administered by an intendant. It now forms the departments of the Upper Pyrenees, the Gers, the Landes, and part of those of the Lower Pyrenees, the Upper Garonne, and the Lot and Garonne. From 1152 to 1453, Gascony belonged to England. At the latter date it was definitively united to France by Charles VII.

GASKELL, Mrs. Elizabeth, *găs'-kel*, the wife of the Rev. William Gaskell, a Unitarian minister, resident at Manchester, at once made herself popular by her first novel, entitled "Mary Barton," which appeared in 1848. This fiction forcibly depicted the struggles of the working cotton-spinner with the evils of poverty, and contrasted the splendid condition of the mill-owner with that of the other. It also illustrated the evil of strikes, and presented such a vivid image of real life in one particular phase of society, that the authoress was at once raised into fame. After this Mrs. Gaskell became a contributor to "Household Words" and other periodicals, and in 1850 published her Christmas story of "The Moorland Cottage." In 1853 appeared "Ruth," her second novel, and in 1855, "North and South," an almost *verbatim* reprint from "Household Words." She has also published other collections of her writings, all of which have enjoyed great popularity, and given her a prominent place among the writers of fiction of the 19th century. She also wrote a memoir of her friend Miss Brontë (Currer Bell), the author of "Jane Eyre," and contributed to the columns of the "Daily News." Her maiden name was Stromkin. B. about 1822.

GASPAR STRAIT, *gas'-par*, a passage nearly 60 miles wide, in the Eastern seas, between the islands of Banga and Billiton.—There is a small island of the same name in the strait.

GASPE, *găs'-pe*, a district of Lower Canada, on the S. side of the St. Lawrence. *Area*, 7,500 square miles. *Pop.* 12,000, chiefly of French descent. *Lat.* between 48° and 49° N. *Lon.* between 61° 15′ and 67° 56′ W.

GASPE, a bay of the district of Gaspe, in the Gulf of St. Lawrence, lying between Cape Gaspe and Whale Head. *Ext.* 18 miles long, by 6 broad.—Also, a CAPE, in *lat.* 48° 45′ N.; *lon.* 64° 10′ W.

GASSENDI, Peter, *gas-sen'-de*, a celebrated French philosopher and mathematician, who, at a very early age, discovered an acute and inquisitive mind, and made such progress in learning, as to be appointed teacher of rhetoric at Digne before he was 16. Two years afterwards, he became professor of divinity and

philosophy at Aix, when he ventured to oppose the system of Aristotle, and his lectures were published under the title of "Exercitationes Paradoxicæ adversus Aristotelem." This work procured him the friendship of the celebrated Peirese, president of the university of Aix, by whose interest he was preferred to a canonry in the cathedral of Digne. In 1628 he visited Holland, with the avowed object of cultivating the friendship of the philosophers of that country; and, on his return, applied himself ardently to astronomical studies. In 1631 he was the first to observe a transit of the planet Mercury over the disc of the sun, which had previously been calculated by Kepler. In 1615 he was appointed royal professor of mathematics at Paris, where he applied so intensely to his studies and to astronomical observations, that he fell into a consumption, when he was forced to retire to Digne for the restoration of his health. In 1647 he published his principal work, entitled "De Vitâ et Moribus Epicuri." This was, in 1649, followed by his "Syntagma Philosophiæ Epicureæ," which was an attempt to reconstruct the Epicurean system of philosophy out of the remains of its masters. In 1653 he went back to Paris; but his labours brought a return of his disease, of which he died, in 1655. B. at Chautersier, near Digne, 1592.—Gassendi is deservedly ranked among the first mathematicians of his age. He opposed the philosophy of Descartes with success, and obtained a number of followers, who were called after his name. His other works are, the Lives of Tycho Brahe, Copernicus, Purbachius, and Regiomontanus; a Commentary on Diogenes Laertius; astronomical and philosophical pieces, the whole collected into 6 vols. folio, 1658.

GATA, CAPE, *gat'-ta*, a promontory of Spain, on the coast of Granada, bounding the Bay of Almeria. *Lat.* 36° 43′ N. *Lon.* 2° 22′ W.

GATEHOUSE OF FLEET, *gait'-hous*, a neat and flourishing village of Scotland, in Kirkcudbright, on the Fleet, 3 miles from its entrance into Wigton Bay. *Manf.* Soap, cotton; and there are tan-works. *Pop.* 2,000.

GATES, *gaits*, a county of N. Carolina, U.S., bordering on Virginia. *Area*, 312 square miles. *Pop.* 9,000.

GATES, Horatio, an American general, who received his military tuition in England, and served in the West Indies, and also in Ohio, under General Braddock. Being wounded, he retired for some time from the army, and settled on an estate which he purchased in Virginia. When the war of American independence commenced, he espoused the cause of the revolutionists, and received the appointment of adjutant-general in the army. In 1776 he was appointed to the command of the army operating on Lake Champlain; but, in the following year, he was superseded, although, in a few months afterwards, he was again appointed to oppose General Burgoyne, whom he defeated, and, at Saratoga, forced him to capitulate with his whole army. This success surrounded Gates with a halo of popularity, and attempts were made to place him above Washington. These, however, were frustrated, and, in 1780, he was appointed to the command of the southern army. He met Cornwallis at Camden, in S. Carolina, and suffered a complete defeat. For this he was superseded, and his conduct subjected to a court of inquiry; he was, however, honourably acquitted. After this he retired to his estate in Virginia, where he resided till 1800, when he removed to New York, where the freedom of the city was conferred on him. He now became a member of the legislature; but, before he quitted Virginia, he emancipated his slaves, and conferred upon the necessitous and infirm a provision for life. This was a noble act, and redounds more to his glory than the capturing of Burgoyne at Saratoga. B. in England, 1728; D. 1806.

GATESHEAD, *gaits'-hed*, a town and parish in the county of Durham, forming a suburb to Newcastle, with which it is connected by a bridge over the Tyne. It consists chiefly of one long street, built along a steep descent towards the bridge, where it terminates. The church is a large, ancient, and handsome building, with a lofty tower; and there is a free school for grammar, arithmetic, and navigation. *Manf.* Glass; and there are extensive iron and coal works. *Pop.*

25,000.—In 1854 a large portion of the town was destroyed by fire.

GATESHEAD-FELL, a parish adjoining Gateshead, and formerly a part of it, celebrated for its grinding-stones, which are exported to all parts of the globe.

GATH, *gäth*, 'a wine-press,' a principal city of the Philistines, about 32 miles W. of Jerusalem.

GATINAIS, *ga'-te-nai*, an old division of France, now subdivided into the departments Loiret, Seine-et-Marne, Nièvre, and Yonne.

GATO, GATTO, or AGATTON, *gc'-to*, a town of Upper Guinea, on a creek of the Benin river, 16 miles from Benin. *Pop.* Unascertained, but said to be considerable.—Here Belzoni, the traveller, died, in 1823. (*See* BELZONI.)

GAUBIL, Anthony, *go'-beel*, a learned French missionary, who, in 1723, was sent to China, and there acquired the Chinese and Mantchoo languages, becoming interpreter at the court of Pekin. He held this position 30 years, and gained the respect and esteem of the emperor. B. at Gaillac, Languedoc, 1689; D. at Pekin, 1759.—No European, perhaps, was better acquainted with Chinese literature than Gaubil. He wrote an "Historical and Critical Treatise on Chinese Astronomy," and a "History of Gengis Khan." He also translated the "Chou King," which comprises the historical traditions of China and its sovereigns, and produced other works.

GAUBIUS, Jerome-David, *gow'-be-oos*, a celebrated German physician, who contracted an intimate friendship with Boerhaave, and succeeded him as lecturer in botany and chemistry at Leyden, in 1731, and in 1734 obtained the medical professorship. His principal works are a treatise on the "Method of Prescribing, or of Writing Receipts;" "Principles of Nosology;" and "Institutiones Pathologiæ Medicinalis." B. at Heidelberg, 1705; D. at Leyden, 1780.

GAUDEN, John, *gaw'-den*, an English bishop, who, being appointed chaplain to Robert, earl of Warwick, preached before the House of Commons in 1640, and gave so much satisfaction to the members, that they presented him with a silver tankard, and added to it, in the following year, the rich deanery of Bocking, in Essex. In 1643 he was nominated one of the assembly of divines at Westminster, but did not sit among them. He wrote against the "Covenant," but complied with it to keep his preferment. In 1648 he published a pamphlet against bringing the king to trial. He had also committed to his care the collating and publishing of the king's meditations, to which he gave the name of "Εικων Βασιλικη, or the Portraiture of his Sacred Majesty in his Solitude and Sufferings." This book had a wonderful effect upon the public mind; but it has been doubted, and still is, whether it was the production of Gauden or of the monarch himself. Macaulay, however, says:—"In that year (1692) an honest old clergyman, named Walker, who had, in the time of the Commonwealth, been Gauden's curate, wrote a book which convinced all sensible and dispassionate readers that Gauden, and not Charles I., was the author of the 'Icon Basilike.'" In 1659 he became preacher at the Temple; and when Charles II. was restored, he was preferred to the see of Exeter, and in 1662 to that of Worcester, where he passed the remainder of his days. B. at Mayland, Essex, 1605; D. at Worcester, 1662.—Besides the above, he wrote several other works on the hierarchy of the Church of England, and sermons.

GAUDENS, ST., *go'-dens*, a town and parish of France, 54 miles from Toulouse. *Manf.* Serge and tape, with paper and fulling mills, and an active trade in rural produce. *Pop.* 5,000.

GAULTIER, Aloisius Edouard Camille, *gole'-te-ai*, a French abbé and educational writer, who was ordained a priest at Rome, and went, in 1789, to Paris, where he occupied himself entirely with the instruction of the young. In order to diminish, to those of tender age, the difficulty of learning scientific subjects, he reduced the elementary studies to a kind of game, and afterwards adopted the plan of mutual instruction, the same as that used by Lancaster and Bell. During the Revolution he took refuge in England, and his system was very successful there. He returned to France in 1800, where he continued the application of his principles. B. in Italy, of French parents, 1746; D. at Paris, 1818.—He is the author of a complete course of elementary education; amongst which are, "Geographical Lessons by Means of a Game," "A Reasonable and Moral Game for Children," "A Complete Course of Instructive Games for Children."

GAUTIER, Théophile, *go'-te-ai*, a modern French poet and littérateur, who in 1830 produced his first volume of verses. He afterwards became connected with some of the foremost publications in Paris—"Figaro," "Revue de Paris," "Presse," "Revue des deux Mondes," and the "Musée des Familles." Many poems also have been written by him, and he was also engaged on the "History of the Painters." He subsequently became the editor of the literary *feuilleton* of the "Moniteur." B. at Tarbes, 1808.

GAVARNI, *ga-var'-ne*, the name by which one of the most popular of living French caricaturists is known. His real name is Paul Chevalier, and he began life as a mechanical draughtsman, but in 1835 discovered his genius for burlesque, in hitting off the peculiarities of manners and persons. He, at once, rose into fame, and, taking the passing and ever-varying modes of Parisian life for his subjects, has produced an endless variety of caricatures, unequalled for the originality and tone they display. Some years ago he visited England for the purpose of sketching the lower classes in London, and depicting the strange and unsightly scenes in which they, too often, form the most prominent part of the picture; but he altogether failed in his object. Besides illustrating the universally-known pages of "Charivari," and other periodicals, he has lent the aid of his pencil to the works of popular authors. The most successful of these were the designs for the "Wandering Jew" of Eugene Sue, and the "Diable à Paris" of Balzac. A selection from his "Sketches of Parisian Life" was made and published in Paris in 1846. They are comprised in 4 vols. 8vo, to which notes were appended by Théophile Gautier and others. B. at Paris, 1801.

GAVARNIE, *ga-var'-ne*, a hamlet of France, in the department of the High Pyrenees, 35 miles from Tarbes. It stands upwards of 4,300 feet above the level of the sea, on a small stream, which rushes over a height of 11,500 feet, and forms the Fall of Gavarnie.

GAVE, *gav*, 'water,' is the general name of the rivers which flow through the French province of Béarn, and which have their source in the Pyrenees.

GAVESTON, Peter, *gaiv'-ston*, a favourite of Edward II., whose pride and prodigality raised the ire of the English nobility. The king was forced to send him into exile, but recalled him. Beheaded in 1312.

GAY, John, *gai*, an English poet, who received his education under a Mr. Luck, a man of wit and a poet, in the town of Barnstaple. He was afterwards apprenticed to a silk-mercer in London, but disliking the occupation in a few years, he bought the remainder of his time. His first poem, entitled "Rural Sports," appeared in 1711, was dedicated to Mr. Pope, and gained him the friendship of that poet, which lasted till death. In the following year he was appointed secretary to the duchess of Monmouth, and, two years later, produced "The Fair," a poem. About the same time he printed his mock heroic, entitled "Trivia, or the Art of Walking the Streets of London," in the composition of which he was assisted by Swift. In 1714 appeared his "Shepherd's Week," a series of pastorals, intended to ridicule Phillips, but which possess more merit as a genuine picture of rustic life than as a satire. The same year he became secretary to the earl of Clarendon, on his embassy to Hanover. On the death of Queen Anne, he returned to England, but his expectations of preferment from the new court were doomed to disappointment. In 1720 he published his poems by subscription, which produced him £1,000; but embarking in the famous South-Sea bubble, he lost the whole, and was reduced to such a state of despondency as to prove nearly fatal to his health. He next produced the tragedy of the "Captive," which met with a favourable reception, and occasioned his being employed by the princess of Wales to write his fables for the young duke of Cumberland. In 1727 appeared his "Beggar's Opera," which had a success, considered by many, infinitely beyond what it deserved

both in a dramatic and moral point of view. It ran for sixty-three nights, and threw the author and his friends into ecstasies. Though it was a favourite with the town, however, it was not so at court; and when he produced his sequel to it, under the title of "Polly," it was prohibited by the lord-chamberlain. Of the bad effect of the "Beggar's Opera" upon the public morals of the period, there can be no doubt. Indeed, the following fact is one of the strongest attestations of the truth of this that could be given. "In the year 1773 Sir John Fielding told the bench of justices that he had written to Mr. Garrick concerning the impropriety of performing the 'Beggar's Opera,' which never was represented without creating an additional number of thieves; and they particularly requested that he would desist from performing that opera on Saturday evening. Such also were the fears of the Church as to the effect of this play, that Dr. Herring, then archbishop of Canterbury, preached a sermon against it." Whilst these fears were at work, however, Dean Swift was writing in favour of it in the *Intelligencer*. Although the "Polly" was prohibited, Gay was no loser by it; on the contrary, by its publication he put into his pocket about £1,200, and was adopted as a member of the family of the duke and duchess of Queensberry. D. at Barnstaple, Devonshire, 1688; D. 1732, and was interred in Westminster Abbey, where a monument was erected to his memory by his patrons, with an epitaph written by Pope.—Besides the works already mentioned, he wrote some lesser dramatic pieces, ballads, and poems, making 2 vols. 12mo. Hazlitt thus sums up the merits of Gay, in his principal productions:—"His fables are certainly a work of great merit, both as to the quantity of invention employed, and as to the elegance and facility of the execution. They are, however, spun out too long. The description and narrative are too diffusive and desultory, and the moral is sometimes without point. They are more like tales than fables. His pastorals are pleasing and poetical, but his capital work is his 'Beggar's Opera.'" Dr. Johnson says, "he had not in any degree the *mens divinior*, the dignity of genius." Gay, however, was the originator of a new species of composition; for we owe to him the ballad opera.

GAYAH, *gá'-ya*, a town of British India, on an affluent of the Ganges, 40 miles from Bahar. It is a place of great sanctity, and is inhabited by many Brahmins. *Manf.* Silk and cotton, and the town is supplied with numerous stone-cutters. *Pop.* 45,000, which, however, is frequently greatly increased by pilgrims, it being supposed to be the birthplace of Buddha. *Lat.* 24° 39′ N. *Lon.* 85° 5′ E.

GAYANGOS, Pascual de, *ga-yan'-gos*, a distinguished modern Spaniard, who early began to devote himself to the study of Oriental literature, and with a view to realize a complete acquaintance with the mediæval history of his country, applied himself ardently to the Arabic. During a visit to Algiers, he married an English lady, a circumstance which, doubtless, led him to make himself well acquainted with the English language, in which the most important of his works was published. In 1834 he became a contributor to the "Westminster Review," and subsequently to the Edinburgh and other reviews. He also lent his aid to the "Penny Cyclopædia," and wrote some of the articles for the Biographical Dictionary of the Diffusion of Useful Knowledge Society. For several years he resided in England, and there published his "History of the Mahometan Dynasties in Spain," &c., which was a translation from a native work from copies in the British Museum. On his leaving England, he proceeded to Spain, where he became professor of Arabic at the Athenæum of Madrid.

GAY-LUSSAC, Nicholas François, *gai-loos'-sak*, a celebrated French philosopher, who, in conjunction with M. Biot, ascended in a balloon, lent by the government of France for the purpose, to the height of 13,000 feet above the Seine, and ascertained that the influence of terrestrial magnetism there is nearly as great as it is on the earth; that the electricity of the atmosphere increased as they rose, and was always negative; that the hygrometer discovered increased dryness, and that the thermometer sank from 64° Fahrenheit on the earth, to 51°. He made another ascent alone, and attained an elevation of 4½ miles, where he had great difficulty in breathing, and the thermometer fell to 20° Fahrenheit. After sailing six hours through the atmosphere, he descended at a village 20 miles from Rouen. The result of this aërial flight was the discovery that air obtained at the highest point, was composed of the same elements as that found on the surface of the earth. These experiments brought Gay-Lussac greatly into notice, and he rose both in fame and position. In 1804 he became a member of the society of Arcueil, and was introduced to Humboldt, with whom he prosecuted an investigation of the polarization of light and other subjects. He also devoted much of his time to the study of chemistry, and to him we are indebted for the discovery of the hydro-sulphuric and oxy-chloride acids. In 1830 he became a member of the Chamber of Deputies, and, in 1839, was created a peer of France. He enjoyed several official appointments, and was professor of chemistry at the Jardin du Roi. B. at St. Leonard, Haute Vienne, 1778; D. at Paris, 1850.

GAYTON, *gaï'-ton*, the name of several parishes in England, with populations varying between 200 and 1,000.

GAZA, *gaï'-za*, a city of Palestine, 50 miles from Jerusalem. It is an entrepôt for the caravans passing between Syria and Egypt. *Manf.* Cotton fabrics and soap. *Pop.* 15,000. This place is early mentioned in Scripture, and was one of the chief cities of the Philistines.

GAZA, Theodore, a Greek grammarian, who, when his native place was taken by the Turks, in 1430, escaped to Italy, where he studied the Latin language with so much assiduity, that he became an elegant writer and speaker of it. He was, for several years, a professor at Ferrara, and became rector of that university. Thence he went to Rome, under the patronage of Pope Nicholas V. and Cardinal Bessarion. B. at Thessalonica, about 1400; D. in Calabria, 1478.—He wrote a Greek grammar, a treatise on the Grecian months; translated Aristotle on Animals, Hippocrates' Aphorisms, and other works into Latin; and some of Cicero's into Greek.

GÉANT, *zhaï'-a*, one of the chief summits of the Pennine Alps, Savoy, 5 miles from Mont Blanc. *Height*, 13,100 feet above the level of the sea. The Col, or pass, du Géant is upwards of 11,100 feet.

GEB, *geb*, 'mountain,' an Arabic prefix of many heights in Asia and Africa.

GEBER, John, *gé'-ber*, an Arabian, or, according to others, a Greek physician and astronomer, who wrote a commentary on the "Syntaxis Magna" of Ptolemy, and other works which were chiefly on alchemy. Dr. Johnson supposes that the word gibberish is derived from the cant of Geber and his followers. Lived about the 8th century.

GEBIM, *gé'-bim*, 'grasshoppers,' a town of Judah.

GED, William, *ged*, a goldsmith of Edinburgh, who, in 1725, endeavoured to introduce a method of printing with blocks and plates, containing letters for a whole page or sheet, now known as stereotype plates. He entered into an engagement with the university of Cambridge, to print Bibles and Prayer-books by this means; but the project failed. On his return to Scotland, however, he printed an edition of Sallust with his plates. The plan was subsequently successfully adopted by M. Didot of Paris, and is now in universal use amongst printers in England.

GEDALIAH, *ged'-a-lï'-a*, 'greatness of the Lord,' a Jewish prince, who swore allegiance to the Chaldeans, but was assassinated.

GEDDES, Alexander, *ged'-dez*, a Roman Catholic divine, who was educated at an obscure school in the Highlands of Scotland, and, in 1758, removed to the Scottish college at Paris. In 1764 he returned to his native country, and officiated to a congregation in the county of Angus, but, the year following, became chaplain in the family of the earl of Traquair. In 1769 he undertook the charge of a congregation at Auchinhalrig, in Banffshire; and, after various changes, went to London, where, in 1788, he published proposals for a new translation of the Bible. In 1790 he gave a general answer to the queries, counsels, and criticisms communicated to him since the publication of his proposals. In this undertaking he was liberally supported by Lord

Petre. The first volume of this work appeared in 1792, comprising the Pentateuch and the book of Joshua; but the translator had taken such unwarrantable liberties with the text, and treated many important subjects with so much indecency, that he was suspended from his ecclesiastical functions. To these he replied in pamphlets written with coarseness and illiberality. In 1797 appeared the second volume of his version. In 1800 he published "Critical Remarks," in vindication of his work, and about the same time appeared his "Apology for the Roman Catholics of Great Britain," which is now forgotten. B. in Ruthven, Banffshire, 1737; D. 1802.

GEEFS, William, *geefs*, a distinguished modern Belgian sculptor, who studied at Paris, and in 1830 exhibited his first work, entitled "A Young Herdsman of the Early Christian Times strewing Flowers on a Tomb." The performance gave high promise, and he did not disappoint the expectations which had been formed of his genius. He obtained commissions from the Belgian government for several monuments to those who fell in the struggle for Belgian independence, and, by his admirable execution of the works intrusted to him, added to his fame. These are his greatest performances; but he has employed his chisel in a poetical path, and executed a "Group of Sleeping Children," purchased by Queen Victoria; the "Infant St. John;" "Melancholy;" "The Lion in Love," which was greatly admired in the Great Exhibition of 1851; "Paul and Virginia," and several other works. B. at Antwerp, 1805.

GEELONG, *je-long'*, a township of the colony of Victoria, South Australia, 40 miles from Melbourne, with which it is in constant communication. It is built on the harbour of Corio, and is rapidly becoming an important place. Forty miles from it, gold was discovered in 1851, when the place became thronged with "diggers," many of whom have settled in the colony, and increased its industrial resources. *Pop.* 20,000 or 30,000; but it fluctuates.

GEER, Charles de, *geer*, a celebrated Swedish naturalist, who studied at Utrecht and Upsal, at the latter place having Linnæus for his master. Possessing a share in the iron-mines at Dannemora, he improved these works by the application of new machinery. He also invented an apparatus for drying corn by the heat of the smelting-houses; and, gaining great wealth, applied it to the noblest purposes of charity, religion, and education. B. 1720; D. at Stockholm, 1778.—His principal work was "Mémoires pour servir à l'Histoire des Insectes," 7 vols.

GEFLE, or GIAWLE, *yef'-le*, a town of Sweden, on the Gulf of Bothnia, 60 miles from Upsal. The river Gefle flows through the middle of the town, and forms a good harbour. The chief public buildings are a government house, council-house, school, and hospitals. *Manf.* Sail-cloth, and linen and woollen fabrics. It has, besides, shipbuilding-yards, tan-works, and sugar-refineries. *Pop.* 8,500.

GEFLEBORG, *yef'-le-borg*, a government of Sweden, having the Gulf of Bothnia on the E., and on its other sides, the provinces of Upsala, Fahlun, Ostersund, Hernosund, and Westeras. *Area*, 7,560 square miles. *Desc.* Mountainous in the W., and covered with numerous lakes. *Rivers.* The Dal-elf, Liusne, and Wroxna. *Pop.* 125,000. *Lat.* between 60° and 62° 20' N. *Lon.* between 15° and 17° 30' E.

GEHAZI, *ge-hai'-zi*, 'valley,' or 'sight,' a servant of the prophet Elisha; perhaps, also, of Elijah. He became unfaithful.

GEIJER, Erik Gustaf, *yi'-jer*, a Swedish historian, who, for many years, was the principal ornament of the university of Upsal. In 1810 he visited England with strong prejudices against the people of that country; but, in a letter printed in 1855, he says:—"I came to England with strong prejudices against the people .... but there is no honester man in the world than the selfish, industrious Englishman, from the merchant to the day-labourer." He edited several periodicals, in one of which, the "Iduna," appeared his poems of "The Viking" and "The Last Champion," which still hold their place among the best selections of Swedish poetry. In 1817 he became professor of history at the university of Upsal, which situation he held till 1846, when he resigned it. D. in the province of Wermeland, 1783; D. at Stockholm, 1847.—The most important work of Geijer is his "Svenska Folkets Historia." which has been translated into English by Mr. J. H. Turner, and published in London.

GELA, *ge'-la*, a town in the southern part of Sicily, about 10 miles from the sea, built by a Cretan colony, 713 years B.C. The inhabitants were called Gelenses, Geloi, and Gelani.

GELASIUS I., Pope, *je-lai'-se-us*, succeeded Felix III. in 492. He had an acrimonious contest with the patriarch of Constantinople, and condemned the practice of communicating only with bread, as was the custom of the Manichean sect, and made it imperative on the laity to use both bread and wine in the Lord's Supper. D. 496.

GELASIUS II. succeeded Pascal II. as pope in 1118. Cencio, marquis di Frangipani, consul of Rome, aided by the emperor Henry V., drove him from Rome, and Maurice Bourdin, as Gregory VIII., was elected in his stead. Gelasius, after an unsuccessful attempt to regain the pontificate, retired to France. D. at the abbey of Cluny, 1119.

GELDERLAND, or GUELDERLAND, *gel'-der-land*, a province of the Netherlands, bounded on its respective frontier lines by Overyssel, Westphalia, North Brabant, Holland, and Utrecht. *Area*, 1,975 square miles. *Desc.* In general level, but not so flat as the maritime part of the Netherlands. *Rivers.* The Rhine, the Waal, the Yssel, the Leek, and the Maese. It has also several large canals. *Pro.* Along the banks of the rivers, corn, hops, and tobacco are grown, and large quantities of fruit for exportation; but the principal crops are wheat, rye, buckwheat, and potatoes. Many cattle are reared, and some of the waste lands have been planted with the oak and the pine. *Manf.* Linen, paper, leather, and tile-making. Distilling and brewing are largely followed. *Pop.* 376,000.

GELLERT, Christian Furchtegott, *gel'-lert*, a German divine and poet, who supported himself for many years as tutor in private families; but afterwards became professor of philosophy at Leipsic. He is best known by his fables and tales, which are very pleasing. His works have been collected in 10 vols. 8vo. B. at Haynichen, Misnia, 1715; D. 1769.

GELLIUS, Aulus, *gel'-le-us*, a Roman grammarian, who published a work which he called "Noctes Atticæ," because composed at Athens during the winter nights. It was originally composed for the improvement of his children, and abounds with many grammatical remarks. Lived in the second century.

GELO and GELON, *ge'-lo*, the most celebrated of this name is a son of Dinomenes, who made himself absolute at Syracuse, 491 years before the Christian era. He conquered the Carthaginians at Himera, and became very popular by his great equity and moderation. He reigned seven years, and his death was universally lamented at Syracuse. His brother Hiero succeeded him.

GEMBLOUX, *zhaim'-bloor*, a town of Belgium, on an affluent of the Sambre, 9 miles from Namur. *Manf.* Cutlery and hardware goods. *Pop.* 2,500.—Here in 1794 the French gained a victory over the Austrians.

GEMELLI CARRERI, Francis, *jai-mail'-le kar-rair-e*, an Italian traveller, who, from 1680 to 1698, made long and difficult voyages to all parts of the world. He visited Europe, Asia, and Africa, advancing as far as the great wall of China, and travelled through Mexico. In 1699 he published an account of his travels, under the title of "Giro del Mondo," a Tour of the World.' D. at Naples, 1651; D. 1725.

GEMINUS, *jem'-i-nus*, an astronomer and mathematician of Rhodes, who flourished about 70 B.C.

GEMISTUS, George, *je-mis'-tus*, surnamed Pletho, a learned Greek philosopher, who ably defended the followers of Plato against those of Aristotle, and the Greek Church against the Latin. He wrote various controversial and theological works, and D. 1491. B. 1391.

GEMMA, Reinier, commonly called FRISIUS, *gem'-ma*, a Dutch physician and mathematician, who became medical professor at Louvain. He wrote a number of works on mathematics, geometry, and medicine. B. at Dockum, Friesland, 1508; D. at Louvain, 1555.—His son CORNELIUS also wrote on the same subjects.

GEMME and GEMMES, *zhem*, the names of several

villages and towns in France, none of them with a population above 3,000.

GEMMI, *zhem'-me*, a mountain-pass leading into Switzerland, between the cantons Valais and Berne. It is about 25 miles from Thun. *Height*, 8,000 feet above the level of the sea.

GEMUND, *ge-moond'*, a small town in Germany, of considerable antiquity, 24 miles from Stutgard. *Pop.* 5,500.—The name also of a small town of Carinthia, with extensive iron-works, 32 miles from Clagenfurt.—Another 41 miles from Coblentz; and another 60 miles from Vienna. None of these has a population above 4,000.

GENAPPE, *zhe-nap'*, a village of Belgium, on the banks of the Dyle, 18 miles from Brussels. *Pop.* 2,000. Here, in 1815, before and after Waterloo, several military actions took place between the French and the allied forces.

GENESEE, *jen-e-se'*, two counties of the United States.—1. In New York. *Area*, 470 square miles. *Pop.* 25,000.—2. In Michigan. *Area*, 720 square miles. *Pop.* 13,000.—Also a township in New York, 5 miles from Moscow. *Pop.* 1,000.

GENESEE, a river which rises in Pennsylvania, U.S., and after a course of 150 miles falls into Lake Ontario. There are several falls on it, one of which has a height of about 230 feet.

GENEST, ST., *zhe-nest'*, the name of several villages and parishes in France, none of them with a population above 3,500.

GENEVA, *je-ne'-va*, a walled town of Switzerland, and the capital of a small canton, at the western extremity of the lake of the same name, 8½ miles from Berne. The Rhone divides it into three parts, called the City, the Little Town or quarter of St. Gervais, and the Island, which is considered as a part of the latter. The streets, though clean, are irregular, the principal street being encumbered with a row of shops on each side, between the carriage-way and the foot-pavement. The latter is wide, and protected by a pent-house, supported by wooden pillars, with arcades as high as the houses. The upper town is much more attractive, not only commanding magnificent views, but containing a number of elegant houses. The public buildings are the town-hall, arsenal, college, university academy founded by Calvin in 1568, hospital, theatre, and cathedral, which contains several monuments of persons of historical note. Nothing can be more agreeable than the environs of Geneva, or more magnificent than the prospect which it enjoys. Within the city, the principal promenades are the Treille, a sort of terrace, the bastions, and the Place de St. Anthoine, which commands an extensive view of the lake, including Nyon Morges, and Copet, the seat of Neckar, and of Madame de Staël. At a little distance to the west of Geneva is Ferney, the residence of Voltaire:—

"Lausanne! and Ferney! ye have been the abodes
Of names which unto you bequeath'd a name,
Mortals who sought and found by dangerous roads,
A path to perpetuity of fame;
They were gigantic minds, and their steep aim
Was, Titan-like, on daring doubts to pile
Thoughts which should call down thunder, and the flame
Of Heaven again assail'd, if Heaven the while
On men and man's research could deign do more than smile."

*Manf.* Woollen, muslin, chintz, silk, and porcelain, musical instruments, fire-arms, cutlery, and jewellery; but the great occupation of the Genevese is watch-making. *Pop.* 32,000. *Lat.* of observatory, 46° 12′ N. *Lon.* 6° 9′ 5″ E.—Geneva is very ancient, and was well known in the time of the Romans, Julius Cæsar having made use of it as a bulwark against the Helvetians. It was formerly the see of a bishop; but when Calvinism was embraced here, in 1553, on the invasion of the French, the bishop was expelled. In 1794, a revolution took place in the city and state of Geneva; and in 1798 it was taken by the French, and, till 1813, it was the capital of the department Leman, in the French empire, under Napoleon I. In 1814 it joined the Helvetic Confederation. It is the birthplace of Beza, Calvin, Lefort, Lesage, Sue, Neckar, and Rousseau. Here John Knox, the Scotch reformer, long resided, and, from time to time, it has been the adopted place of residence of many learned men.—The CANTON has an area of 90 square miles, with an undulating surface and fertile soil. *Manf.* Watches, leather, woollens, silks, and hats. *Pop.* 64,000.

GENEVA, LAKE OF, or LAKE LEMAN, a celebrated lake of Switzerland, extending in the form of a crescent between that country and Savoy, and occupying a part of the great valley which separates the Alps from the Jura ridge. *Ext.* 45 miles long, with a varying width of between 1 and 10. Its greatest depth is nearly 1,000 feet. It is traversed by the Rhone, and is remarkable for the blue transparency of its waters. Byron calls it "clear placid Leman," and thus describes its scenery, as he saw it:—

"It is the hush of night, and all between
Thy margin and the mountains, dusk, yet clear,
Mellow'd and mingling, yet distinctly seen,
Save darken'd Jura, whose capp'd heights appear,
Precipitously steep; and, drawing near,
There breathes a living fragrance, from the shore,
Of flowers yet fresh with childhood; on the ear
Drops the light drip of the suspended oar,
Or chirps the grasshopper one good-night carol more."

In 1823 steam navigation was introduced upon its waters.

GENEVA, a town in Seneca, Ontario county, New York, U.S., on the W. side of Seneca Lake, 40 miles from Rochester. It has a considerable trade. *Pop.* 6,500.

GENEVESE, or GENEVOIS, *zhen'-e-vais*, a province of the Sardinian states, in the W. of Savoy, with a mountainous surface. *Rivers.* Fier and Ussez. *Lakes.* Annesy. *Pop.* 80,000.

GENEVIEVE, *jen'-e-veev*, a county of Missouri, U.S. *Area*, 400 square miles. *Pop.* 5,500.

GENEVIÈVE, ST., *zhen'-e-ve-aiv*, two towns and parishes in France, neither of them with a population above 2,000.

GENÈVRE, MONT, *zhe-naivr'*, a summit of the Cottian Alps, between the Sardinian province of Susa and the French department of the Upper Alps. It is crossed by a road constructed by Napoleon I., at an elevation of nearly 6,600 feet. *Height* of the summit, 11,615 feet.

GENGIS KHAN, *jen'-gis kan*, the son of a petty Mongolian prince, who, after some years of desultory warfare with various Tartar tribes, in 1205 invaded the Chinese empire, and took its capital by storm. In 1218 he again invaded the empire, and by the success of his arms took the cities of Samarcand and Bokhara, which he pillaged and burned, and destroyed upwards of 200,000 individuals. Continuing his career of savage devastation for several years, in 1225 he went against the sovereign of Tangut, to whom he delivered battle in a plain of ice, formed by a frozen lake, defeated him, and slew 300,000 of his men. Conquering wherever he went, he extended his territory until it not only comprised within its boundaries Northern China, but Eastern Persia, and the whole of Tartary. In achieving the conquest of these "barren acres," it is computed that this warrior destroyed upwards of 5,000,000 of the human race. D. in Tartary, 1163; D. 1227.

GENIÈS, ST., *zhen'-e-ai*, the name of several parishes and villages in France, none of them with a population above 3,300.

GENIL, or XENIL, *zhai'-neel*, a river of Andalusia, Spain, which, after a course of 130 miles, joins the Guadalquiver, 32 miles from Cordova. The city of Granada is on its banks.

GENIS, ST., *zhen'-e*, the name of several parishes and towns in France, none of them with a population above 3,000.

GENLIS, *zhen'-le*, a parish and village of France, in the department Côte-d'Or, 10 miles from Dijon. *Pop.* 1,000.

GENLIS, Félicité Stéphanie, Countess de, celebrated for her literary talents, became, at four years of age, a canoness in the noble chapter of Aix. From this time she was called la Comtesse de Lauz. At the age of seventeen, a letter, which she had written, accidentally came into the hands of Count de Genlis,

who was so charmed with the beauty of its composition, that he made her an offer of his hand and fortune, which she accepted. Through this union she became niece to Madame de Montesson, who was privately married to the duke of Orleans, whose son, the duke of Chartres, in 1782, chose her to superintend the education of his children. About this period she produced "Adela and Theodore," "The Evenings of the Castle," "Annals of Virtue," and "The Theatre of Education," all of which were well received. In 1791 she paid a visit to England with her pupil, Mademoiselle d'Orléans, and on their return to France, were ordered immediately to quit the territory. After a short time they went to Switzerland; but, driven from there, they at length found an asylum in the convent of St. Clair. In 1800 she returned to her native country, and, in 1805, Napoleon I. gave her apartments in the arsenal at Paris, with a pension. On the fall of the empire and the return of the Bourbons, her affection for her former friends returned; and when Louis Philippe ascended the throne, every attention was paid to her wants and comforts. She employed herself almost continually writing, and her works are very numerous, embracing nearly every style of literature. B. near Autun, 1746; D. 1830.

GENNARO, Jos. Aurelius, *jen-na'-ro*, an eminent Neapolitan lawyer, who, after practising at the bar, became the chief magistrate of his native city. He wrote on legal subjects, and his works are remarkable for their purity of style and depth of erudition. His principal production is "Respublica Jurisconsultorum," which ingeniously teaches, in the form of a novel, the dry and intricate system of civil law. B. at Naples, 1701; D. 1761.—Gennaro was one of the commission appointed by the minister Tanucci to prepare a uniform code, called the "Carolin Code," for the whole kingdom.

GENNESARETH, LAKE OF. (*See* TIBERIAS.)

GENOA, *jen'-o-a*, a fortified maritime city in the N.W. of Italy, once a celebrated republic, now the capital of a province of the Sardinian states. It is situate at the N. point of the Gulf of Genoa, 80 miles from Turin. The houses are well built; but the streets are so narrow and irregular, that, in many places, it is almost impossible to pass them in a carriage. Three streets, however, the Strada Balbi, the Strada Nuova, and the Strada Nuovissima, form striking exceptions: they are regular, spacious, and the more impressive to a stranger, from following each other in succession. It is in these streets that are to be found the palaces of the great families; buildings which display the attractions, not only of architecture, but of painting and sculpture. The most remarkable public edifices are the Palazzo della Signora, the ancient residence of the doge; and the palaces Doria-Pamfili, Brignole, Durazzo, Spinola, Serra, Balbi, Pallavicini, which contain numerous choice specimens of art. There are many magnificent churches, among which the Dell' Annunciada, and the cathedral, are the most conspicuous. The elegant church of Carignano was built at the expense of a citizen of the name of Sauli; his grandson erected a monument of equal magnificence, and the bridge of the same name, which is of great height, connecting two hills, and forming one of the favourite resorts of the Genoese. There are several theatres, numerous convents, a university, with a botanic garden and museum; and the great hospital for the sick and infirm, and the Albergo dei Poveri, or poor-house, are magnificent buildings. Besides these there are fifteen female asylums, an exchange, and the bank of St. George. The harbour of Genoa is in the form of a semicircle, with a diameter of about 1,000 fathoms. It is inclosed by two strong moles, the opening between which is 350 fathoms in width; but the entrance is difficult. *Manf.* Velvets, silks, damasks, paper, soap, &c. The city possesses a number of ingenious workmen in articles of jewellery and coral, vases and cups. Genoa exports the products of the adjacent country, such as rice and fruit, and, in particular, olive oil, to a great annual value. *Imp.* The chief articles are corn from Sicily, and occasionally from Barbary; raw silk from Sicily; iron and naval stores from the Baltic; linen and sail-cloth from Germany; tin, lead, hardware, and cottons, from England. To these are to be added wool from Spain, wax and cotton from the Levant, and from the United States different articles of American produce. Fish from Newfoundland is here, as in other Catholic cities, an import of considerable amount. Genoa is the see of an archbishop. *Pop.* 112,000.—From the 11th to the 18th century, Genoa was the capital of a flourishing commercial republic, and planted colonies on the shores of the Black Sea, as well as in the Levant. It was bombarded by the French in 1684, and submitted to the Hungarians in 1746; but a citizen being abused by an Austrian officer, the inhabitants rose and massacred most of the soldiery, and drove away the remainder. The republic, in 1798, assumed the French form of government, with the title of Ligurian republic, which was confirmed by the treaty of Luneville, but not by that of Amiens. In 1815 it was ceded to the king of Sardinia, and in 1859 the French troops landed here on their route to oppose the Austrian army, which had invaded Sardinia. It is connected with Turin by railway. The birthplace of Columbus.

GENOA, THE TERRITORY OF, a maritime province of the Sardinian states, forming a long tract, which extends along the shores of the Gulf of Genoa. *Area*, 3,000 square miles. *Desc.* It is traversed by the Apennines, which yield pasture to numerous herds of cattle; whilst the valleys are fertile, and yield abundance of corn. *Rivers.* The Bisagno, Magra, Polcevera, and Vara. *Minerals.* Marble is the most valuable. *Pop.* 550,000.—This country corresponds nearly to the Upper Liguria of the Romans, and in 1798 was joined to France, under the title of the Republic of Liguria. In 1814 it was assigned to Sardinia, and called the Duchy of Genoa.

GENOA, a post-township in Cayuga county, New York, U.S., on Cayuga Lake, 25 miles from Auburn. *Pop.* 3,000.

GENOVESI, Anthony, *jen'-o-ve-se*, an Italian philosopher, who, for some time, read lectures in philosophy at Naples, with great reputation. He was attacked, however, by numerous enemies, for publishing his "Metaphysics," in which he expressed his admiration of the works of Galileo, Grotius, and Newton. Galliani, archbishop of Tarento, protected him; and Bartolomeo Intieri, a wealthy Italian, established for him a professorship of political philosophy. B. at Castiglione, 1712; D. 1769.

GENSERIC, *jen'-se-rik*, a famous Vandal prince, who passed from Spain to Africa, where he took Carthage. He laid the foundation, in Africa, of the Vandal kingdom, which was composed of Numidia, Mauritania, Carthage, Corsica, Sardinia, and the Balearic Isles. In the course of his military expeditions, he invaded Italy, and sacked Rome in 455. B. at Seville, 406; D. 477.

GENTILESCHI, Horatio, *jen'-te-les'-ke*, an Italian artist, who painted the ceilings in Greenwich Hospital. B. at Pisa, 1563; D. in England, 1747.—His daughter was also a good artist. She lived chiefly at Naples.

GENTILLY, *zhen-til'-le*, a parish and village of France, 4 miles from Sceaux. *Pop.* 14,000.—In this parish is the village of Bicêtre. (*See* BICÊTRE.)

GENTIUS, *jen'-te-us*, a king of Illyricum, who imprisoned the Roman ambassadors at the request of Perseus, king of Macedonia. This offence was highly resented by the Romans, and Gentius was conquered by Anicius, and led in triumph with his family.

GENZANO, *jain-za'-no*, a town of Italy, 20 miles from Rome, where there is held an annual festival, during which the streets are strewed with flowers. *Pop.* 5,000.

GEOFFREY, *jef'-fre*, of Monmouth, a British historian, who was first archdeacon of Monmouth, and next bishop of St. Asaph, which see he resigned, and retired to the monastery of Abingdon, of which he was abbot. His principal work is his "Chronicon, sive Historia Britonum," which, however, is full of legendary tales respecting the early monarchs of Britain. Both Shakspeare and Milton, however, have drawn largely from the work of "The Life and Prophecies of Merlin." Forty-two copies were, in 1830, printed for the Roxburgh Club. Lived in the 12th century.

GEOFFRIN, Madame, *zhef'-frĕ*, a French lady, who married, when fifteen years of age, a wealthy plate-glass manufacturer, who, in a short time left her a widow. Endowed with the graces of person and mind,

her house became the rendezvous of all the most celebrated persons of the age, and to many literary men she rendered important services. Stanislas Poniatowski, who saluted her as his mother, caused her to go to Warsaw, after his accession to the Polish throne. She expended large sums of money to support the "Encyclopædia," and many acts of delicate generosity are recorded of her. B. at Paris, 1699; D. 1777.

GEOIRE, ST., *zhwaw*, a town of France, 18 miles from Grenoble. *Pop.* 4,450.

GEORGE LEWIS I., king of Great Britain, was the son of Ernest Augustus, elector of Hanover, by Sophia, daughter of Frederic, elector Palatine, and grand-daughter of James I. of England. He was created duke of Cambridge in 1706, and succeeded Queen Anne in 1714. In the following year a rebellion broke out in Scotland in favour of the Pretender, which was soon suppressed, and several of its leaders forfeited their lives upon the scaffold. In 1717 a war was threatened with Charles XII. of Sweden, on account of the king of England having purchased from the Danes the duchies of Bremen and Verden, which had been taken from Sweden in 1712. The death of Charles, however, prevented this from taking place. In the previous year parliaments were made septennial. In 1720 the failure of the famous South-Sea scheme occurred, and thousands of families were ruined. This caused disturbances among the people, and the king, who was then on a visit to his Hanoverian possessions, had to be hastily recalled. In 1722 a conspiracy against the government was discovered. It had been planned for the purpose of bringing in the Pretender; and Atterbury, the bishop of Rochester, was involved in it. In 1725 war was rekindled between the king of Spain and the emperor on one side, and England, France, Prussia, and afterwards Sweden, on the other. In 1726 the siege of Gibraltar was commenced; but the dispute was soon terminated by negotiation, when George proceeded on a journey to the continent. He was on his way to his Hanoverian dominions, but had only reached Osnaburg when he was struck down with apoplexy. B. 1660; D. at Osnaburg, 1727.—GEORGE I. was a person of plain and simple tastes, of a grave carriage in public, but sufficiently gay and familiar in his private intercourse. His marriage was unhappy, and his unfortunate queen, Sophia Dorothea, a daughter of the duke of Zell, was immured in the castle of Ahlan, at Hanover, from 1694 till 1726, when she died, on a charge never proved, and generally disbelieved, of an intrigue with Count Koningsmark. He left by her one son, George, by whom he was succeeded, and one daughter, Sophia Dorothea, who, in 1706, was married to Frederick II. of Prussia.

GEORGE AUGUSTUS II., son of George I., married, in 1705, Princess Caroline, of Brandenburg-Anspach, who died in 1737. In 1714 he came to England with his father, and was, previous to his accession to the throne in 1727, created prince of Wales. At this period, the country was in a state of great prosperity; and peace being restored in 1729, the administration of the internal affairs of the kingdom occupied a large share of attention. In 1739, however, war was declared against Spain, when Admiral Vernon was sent with a squadron to the West Indies, where he demolished Porto Bello, but failed in his attempt on Carthagena. In 1743 the king headed his army on the continent, and gained the battle of Dettingen. In 1745 the Pretender's eldest son, Prince Charles-Edward Stuart, landed in the Highlands of Scotland, and was joined by several of the clans; but, after obtaining various successes, his followers were defeated by the duke of Cumberland at Culloden, in 1746. This episode in British history has been a prolific theme with Jacobite lyrists. Whilst it continued, however, the people of England testified their attachment to the Hanoverian dynasty by numerous public demonstrations of attachment and loyalty. In 1748 the war was ended by a treaty of peace, concluded at Aix-la-Chapelle. In 1751 died Frederick, prince of Wales, between whom and his father there never existed any cordiality. In 1755 war broke out between England and France, which was at first very unpromising; Braddock was defeated and killed in North America, and Minorca was taken, in the Mediterranean, for which Admiral Byng, who was sent to relieve it, was shot. About this time, Mr. Pitt, afterwards earl of Chatham, became prime minister, and public affairs began to assume a much more promising aspect. In 1758 a treaty was entered into between England and Prussia, and the French power was nearly destroyed in the East Indies. In America Louisburg was taken, and the capture of Quebec, where Wolfe fell, was followed by the conquest of Canada. Cape Breton had already been recovered; in the East, Clive had captured Calcutta, won the battle of Plassy, and was driving the French from every possession which they held in that quarter. The island of Guadaloupe and the settlement of Senegal were taken. Admiral Hawke defeated the French fleet under Conflans, and the British flag waved triumphant in every part of the world. In the midst of this blaze of glory, George II. died suddenly, at Kensington, by the bursting of the right ventricle of the heart, 1760; B. at Hanover, 1683.

GEORGE III., king of Great Britain, was the grandson of George II. and the eldest son of Frederick, prince of Wales. He was the first sovereign of the Hanoverian dynasty born in England, and ascended the throne on the death of his grandfather, in 1760. At an extraordinary council in the following year, he stated that, "ever since his accession to the throne he had turned his thoughts towards a princess for his consort; and that, after mature deliberation, he had come to a resolution to demand in marriage the Princess Charlotte of Mecklenburg-Strelitz." He was accordingly married in the same year, and the joint coronation of the king and queen took place on the 22nd of September. From this period till 1764, when Lord Bute retired from the administration of the country, the public mind was kept in a constant state of agitation by political squibs, pamphlets, and libels, which, on the whole, may be considered to have been favourable to religious liberty. In that year, however, Mr. Grenville was appointed premier, when he brought in those measures relative to the American colonies, which finally resulted in their independence and the formation of the federal governments of the United States. At this time the king had his first attack of that illness which ultimately obscured his latter days, and led to a legislative enactment, which, by sign manual, empowered the queen, or some other member of the royal family, to assume the guardianship of the heir-apparent, and be regent of the kingdom. This measure caused a change in the administration, when the marquis of Rockingham was placed at the head of the Treasury. His cabinet, however, was dissolved in 1766, and the duke of Grafton succeeded to the head of affairs. In 1770 the duke of Grafton was succeeded by Lord North, and, in 1772, on account of the duke of Cumberland marrying Mrs. Horton, the Royal Marriage Act was passed. This act prevented the members of the royal family from marrying before the age of twenty-five, without the approval of the king, and, even after that age, without the approbation of both houses of parliament. In 1782 Lord North resigned, and the Rockingham party again took office; but this administration enjoyed but a short tenure of power, when Lord Shelburne was placed at the head of affairs, with Mr. Pitt, the son of the earl of Chatham, chancellor of the Exchequer. In the following year the Coalition ministry, respectively headed by Mr. Fox and Lord North, pushed themselves into office; but the king was so averse to them, that when the famous India bill of Mr. Fox was thrown out by the Lords, he sent a message to Mr. Fox and Lord North, commanding them at once to deliver up their seals of office by messenger, as a personal interview with them would be offensive to him. This bold act of the king, with the energy and firmness he displayed, obtained for him considerable popularity. In 1786 a woman named Margaret Nicholson made an attempt with a knife to assassinate his majesty at the garden entrance of St. James's palace. The coolness of the king, on this occasion, was a subject of general admiration. The woman was found to be insane, and was sent to Bedlam. In 1789 he had a return of his mental malady, which lasted for three months, when, with his family, and amid the acclamations of the people, he proceeded to St. Paul's, to return solemn thanks for his recovery. In 1795 another attempt was made to assassinate him whilst proceeding to the House of

Lords to open parliament in person; a small bullet passed through the window of his carriage, but he sustained no injury from it. In 1798 the Irish rebellion broke out, and the distress of the people had reached its height. The dissatisfaction of that country was very great, and another attempt was made upon the life of the king. This occurred in the theatre of Drury-lane. He had just entered his box, and was in the act of bowing to the audience, when a man who sat in the middle of the pit, near the orchestra, fired a pistol at him, and the bullet entered the roof of the royal box. On this occasion the loyalty of the audience rose to the acme of enthusiasm. Amid repeated cheers, "God save the King" was three times sung by the whole house, with the following additional impromptu stanza made by Sheridan:—

From every latent foe,
From the assassin's blow,
God save the King!
O'er him Thine arm extend,
For Britain's sake defend
Our father, prince, and friend,—
God save the King!

The man who perpetrated this act was called Hatfield, had been in the army, had received eight sabre-wounds in the head, was proved to be insane, and was discharged, and admitted an out-pensioner of Chelsea Hospital. He was subsequently, however, transferred to Bethlem Hospital. In 1800 the Act of Union between Great Britain and Ireland was passed; but the sovereign strenuously opposed the admission of Roman Catholics to political power. This caused the retirement of Mr. Pitt from office, when the Addington ministry assumed the government of the country. In 1804 Mr. Pitt again came into power, but in 1806 he died, when the Grenville party, with Mr. Fox, once more entered into office. In the following year this administration endeavoured to effect a change in the sentiments of the king regarding Catholic emancipation; but his majesty remained immovable. "Although I have firmness," said he, "sufficient to quit my throne and retire to a cottage, or place my neck on a block if my people desired it, yet I have not resolution to break the oath I have taken, in the most solemn manner, at my coronation." This led to the downfall of the Grenville and Fox administration, and the accession of Percival to power. In 1809 the king commenced the 50th year of his reign, when a jubilee of great splendour took place. His faculties now rapidly began to decay. In the following year he lost the Princess Amelia, his favourite daughter, an event which seriously affected his spirits, whilst his former malady returned with greatly increased severity. In 1811 a regency bill was passed; and, from that time, the life of the king may be regarded as little more than mere existence. In 1818 his queen died; but, with this event, he was never made acquainted, and the duke of York was appointed to the office of custos to his person. At the close of 1819 his appetite became weak, and every symptom of a coming dissolution began to exhibit itself. He had, however, already been dead to the world, having, for some years, been deprived of intellectual consciousness. B. 1738; D. 1820, in the 59th year of his reign.—George III. was religious and sincere, temperate in his habits, and inflexible in his will. His tastes were of patriarchal simplicity. He loved music, and patronized its professors; he appreciated art, and knighted Sir Joshua Reynolds; he assisted science, and afforded encouragement to Byron and Cook, the navigators. He was a good king, a considerate husband, and a kind father; whilst the morality of his court produced the happiest effects upon the manners and customs of the people over whose destinies he so long swayed the sceptre.

George IV., Augustus Frederick, was the eldest son of the preceding monarch, by Queen Charlotte. Notwithstanding the excellent example of his father, and the strictness with which his education had been conducted, George IV., when prince of Wales, fell early into habits of dissipation, which debased the better parts of his nature and greatly marred the intellectual endowments with which he was gifted. In his eighteenth year he began to associate with the Whig nobility, and formed political connections with Fox, Sheridan, and others, who led him into scenes of gallantry, which soon made his name notorious in the mouths of the people. His first attachment was to a Mrs. Robinson, an actress, with whom he fell in love when she was performing Perdita in the "Winter's Tale." Of this scandalous connection the public prints were full, when, on a sudden, he abandoned this lady for another, and this for another, until he met with Mrs. Fitzherbert, a Catholic widowed lady of good family, with whom he formed a more permanent connection. She, however, was seven years older than himself, and is said to have been privately married to him. (*See* Fitzherbert.) His dissipation, and the building of Carlton House, had now steeped him to the lips in debt, when he was driven into mean expedients for the purpose of putting off, or meeting, the pressing demands of his creditors. These, however, were insufficient for his purposes, when he determined to apply to his father, who, however, was so exasperated at his conduct, that he refused to lend him the smallest assistance. He, therefore, curtailed his expenditure, and for nearly twelve months persevered in his virtuous resolution. He sold off his racing stud, and lived in retirement till 1787, when his circumstances were brought under the notice of parliament. On this occasion the house voted £161,000 to satisfy his creditors, £20,000 to finish Carlton House, and the king added, from the civil list, £10,000 per annum to his son's income. Relieved, for a time, from his pecuniary embarrassments, he once more assumed his habits of extravagance. For Mrs. Fitzherbert he had built a splendid mansion at Brighton, which place he raised from obscurity into a fashionable watering-place, and surrounded himself with many notorious characters; among whom, the most prominent was the countess of Jersey. Under these circumstances the king and his ministers were desirous that the prince should marry; and as he was again weighed down by debt, he consented to an alliance with his cousin, the Princess Caroline Amelia Elizabeth, daughter of the duke of Brunswick. The marriage occurred in the April of 1795, and a place was provided in the household for Lady Jersey. The princess soon discovered the nature of her husband's connections, not only with the countess of Jersey, but also with Mrs. Fitzherbert, which naturally excited her resentment, when scenes of discord, and mutual recrimination and dislike, were the result. In 1796 the princess of Wales gave birth to a daughter, and, shortly afterwards, the prince sent her proposals for a separation. These were at once acceded to, and George III. undertook the guardianship of the young princess, whilst her unhappy mother retired to a private residence at Blackheath. The conduct of the prince had now so effectually estranged the affections of his father from him, that, when Napoleon I. threatened the invasion of England, he allowed him only the colonelcy of a regiment of dragoons; but, when the incapacity of George III. occurred, he was permitted to assume all the rights of royalty. In 1814 the prince received a visit from the emperor of Russia, the king of Prussia, and other foreign potentates, and treated them with truly royal hospitality. In 1816 his daughter, the Princess Charlotte, was married to Prince Leopold, of Saxe-Coburg, afterwards king of the Belgians; but she died in the following year. In 1817 an unsuccessful attempt was made upon the life of the prince-regent, when on his way to open the session of parliament; and in 1820 the Cato-street conspirators were tried and executed for plotting against his life and the lives of the leading members of the administration. On the death of his father, in 1820, he ascended the throne as George IV., and, in the following year, was crowned, with great magnificence, in Westminster Abbey. Previous to this, a process had been instituted in the House of Lords for the purpose of depriving his wife of her rights and privileges as queen of England. This circumstance, for a time, brought him into great unpopularity. In the same year of his coronation, he paid a visit to Ireland and Hanover; and, in the following year, similarly visited Scotland. The great public event of his reign, however, was the passing of the bill for abolishing the political disabilities of the Roman Catholics, which took place in 1829. During the latter part of the king's life, he lived much in retirement, and ultimately held his courts entirely at Windsor. As old

age came upon him, he suffered much from gout and other infirmities, always exhibiting an excessive abhorrence if in the least exposed to the public gaze. B. 1762; D. at Windsor Castle, 1830.—On the same day proclamation was made of the succession of William IV.

GEORGE OF DENMARK, PRINCE, was the husband of Queen Anne of England, and was married to her in 1683. There is little to be said of him. Lord Dartmouth observes, in his notes to Burnet's History, "that his behaviour at the Revolution showed he could be made a tool of upon occasions, but King William treated him with the utmost contempt. When Queen Anne came to the throne, she showed him little respect, but expected everybody else should give him more than his due." Again—"After thirty years living in England, he died of eating and drinking, without any man's thinking himself obliged to him; but I have been told that he would sometimes do ill-offices, though he never did a good one." Anne bore him nineteen children, of whom only five lived to be baptized. B. in Denmark, 1653; D. at Kensington Palace, 1708.

GEORGE, ST., was, according to tradition, a young and handsome prince of Cappadocia, who suffered martyrdom under Diocletian. He has been made a kind of Christian Perseus, and a thousand prodigies are reported of him. He slew an immense and powerful dragon, and saved a king's daughter, as the monster was about to devour her. It is in the performance of this deed that he is represented, on horseback, armed with a lance, and piercing a dragon. He was famous in the East, and it was thence that his fame came to the West. This legendary saint is more particularly honoured in England, Russia, and Genoa. The English and Genoese take him as their patron, whilst the Russians adopt St. George and the Dragon as the principal figure in their arsenals and armories, and have given his name to the first of their military orders.

GEORGE, ST., the largest of the Bermuda islands, strongly fortified, and the principal military depôt of these islands. Its capital is of the same name, and has a handsome church, a library, and town-house. *Lat.* 32° 45′ N. *Lon.* 63° 30′ W.

GEORGE, ST., a cape and islands nearly opposite to the river Appalachicola, on the coast of East Florida. *Lat.* of the cape, 29° 38′ N.—Also, an island of British Honduras, in the Bay of Honduras, opposite the mouth of the river Belize.

GEORGE, ST., IN THE EAST, a parish of Middlesex, and large suburb of London. In 1860 it was disturbed by the introduction into the parish church of certain religious ceremonies which greatly excited the people, and led to most unseemly riots.

GEORGE'S, ST., the capital of the island of Grenada, in the W. Indies. It possesses one of the best harbours in the West Indies. It is built chiefly of brick, and is divided by a ridge, which, running into the sea, forms, on one side, the careenage, on the other the bay. Thus there is the Bay-town, which boasts a handsome square and market, and the Careenage-town, wherein the principal merchants reside. *Lat.* 12° 4′ N. *Lon.* 61° 31′ W.

GEORGE'S, ST., the name of two towns in the United States, neither with a population above 3,500. They are in the states of Maine and Delaware.

GEORGE'S, ST., a river in St. Mary's county, Maryland, U.S., which runs into the Potomac between Piney Point and St. Mary's river. Opposite its mouth are the islets called St. George's Islands.

GEORGE, or GEORGES, ST., the name of numerous parishes and villages in France, with populations varying between 2,000 and 5,000.

GEORGE'S BANK, ST., a fishing bank off the coast of Massachusetts, U.S. It extends between *lat.* 41° 15′ and 42° 22′ N., and between *lon.* 67° 50′ and 68° 40′ W.

GEORGE'S CHANNEL, ST., that part of the Atlantic Ocean which is situate between Ireland and Wales, and extends from the island of Holyhead to St. David's, and from Dublin to Wexford. It is from 40 to 70 miles wide.

GEORGETOWN, the capital of Puloo Penang, or Prince of Wales Island. (*See* PENANG.)

GEORGETOWN, a district in South Carolina, U.S. *Area*, 683 square miles. *Pop.* 22,000, of whom nearly 20,000 are slaves.—Also the name of numerous towns in the United States, with populations varying between 2,000 and 8,500.

GEORGIA, or GRUSIA, *jor'-je-a*, a considerable country of Asia, situate between the Black Sea and the Caspian, to the N. of Armenia, and forming a government of Russia. *Area*, 22,000 square miles. *Desc.* It combines the mountainous character of the Caucasian region with that of the fertile plains of Persia. The hills are covered with forests of beech, oak, ash, chestnuts, walnuts, and elms, encircled with vines, growing spontaneously, and producing vast quantities of grapes. Cotton also grows spontaneously, as well as the finest fruit-trees. *Rivers.* The principal are the Kur and the Araxes, which pour their united streams into the Caspian. *Forests.* Extensive, and consisting mostly of those trees which are common to Europe. *Pro.* From its situation, it unites the products both of tropical and temperate climates. Rice, wheat, millet, hemp, and flax are raised on the plains, almost without culture, whilst the valleys afford fine pasturage, and the rivers are full of fish. *Minerals.* Coal, iron, naphtha, and others; but they are turned to little or no account. *Manf.* Woollen, cotton, and silk fabrics; leather, shagreen, and arms; but all are very inferior. *Inhabitants.* The Georgians are skilled in the use of the bow, and are thought to be the best soldiers in Asia. Their dress resembles that of the Cossacks; but those that are wealthy affect the habit of the Persians. They usually dye their hair, beards, and nails red. The women, who are celebrated for their beauty, stain the palms of their hands of the same colour, and paint their eyebrows black, in such a manner as to form one entire line, while the rest of the face is coated with white and red. Being generally educated in convents, they can read and write, qualifications uncommon with the men, even of the highest rank. The inhabitants are Christians, partly of the Greek, partly of the Armenian church. Here are also Tartars, Ossi, Armenians, and a considerable number of Jews. Of these last, some have villages of their own; others are mixed with the Georgian, Armenian, and Tartarian inhabitants, but never with the Ossi. They pay a small tribute above that of the natives. *Pop.* 875,000. *Lat.* between 38° and 42° 30′ N. *Lon.* between 43° and 47° E.—Georgia was formerly one kingdom, the inhabitants of which were Christians; but, in 1639, when it was conquered by the Persians, the country was divided between two native princes, by themselves called kings, but by the Sophi styled governors. Each of these had a guard of Mahometan horse in their pay. In 1802 it was annexed to Russia.

GEORGIA, one of the original of the United States, bounded N. by North Carolina and Tennessee, N.E. by South Carolina, S. by Florida, E. by the Atlantic Ocean, and W. by West Florida and the Alabama territory. *Area*, 58,000 square miles. *Desc.* It is divided into the two districts of Upper and Lower Georgia; the eastern part, between the mountains and the ocean, and the rivers Savannah and St. Mary's, presenting a tract of country more than 120 miles from N. to S., and from 50 to 80 E. and W. entirely level, and without a hill or a stone. At the distance of about 40 or 50 miles from the coast, the ridges gradually rise one above another into hills, and the hills successively increase in height, until they finally terminate in mountains. The vast chain of the Alleghanies terminates in Georgia, 60 miles south of its northern frontier. *Rivers.* The Alatamaha, Savannah, and the Chattahoochee. *Pro.* Cotton, flax, sugar, honey, wheat, corn, rice, tobacco, potatoes, cattle, and wool. The famous sea-island cotton is raised on a chain of small islands which border the seacoast. Most of the rice-lands lie on rivers, which, as far as the tide flows, are called tide-lands; or on creeks and particular branches of water, flowing in some deeper or lower parts of the lands, which are called inland swamps, and extend back in the country from 15 to 25 miles. The intermediate lands between these creeks and rivers are of an inferior quality. Here and there are interspersed oak and hickory ridges, which are of a better soil. *Minerals.* Gold, silver, copper, iron, coal, limestone, granite, and marble. *Manf.* Cotton, and there are tanneries and iron-works. *Exp.* The chief articles are cotton, which has now become the great

staple of the state; rice, tobacco, indigo, sago, lumber of various kinds, naval stores, leather, deer-skins, snake-root, myrtle, bees-wax, corn, and live stock. *Imp.* W. India goods, teas, wines, various articles of clothing, and dry goods of all kinds. From the southern states are imported cheese, fish, potatoes, apples, cider, &c. *Pop.* about 1,000,000, of whom a third are slaves. *Lat.* between 30° 30′ and 35° N. *Lon.* between 80° 49′ and 81° 41′ W.—Georgia was settled in the year 1733, by about a hundred adventurers under General Oglethorpe. After struggling for about 30 years with the usual obstacle of Indian hostility, the state began at last to flourish, and has ever since increased.

GEORGIA, GULF OF, an inlet on the N.W. coast of America, separating Vancouver's Island from the mainland, in *lat.* 49° N.; *lon.* 124° W. It communicates with the strait of Juan de Fuca on the S.W., and with the Pacific by Queen Charlotte's Sound on the N.

GEORGIA, NEW, or SOUTH GEORGIA, an island in the S. Atlantic Ocean. *Ext.* 90 miles in length, and 30 in breadth. *Lat.* 54° 30′ S. *Lon.* 37° W.

GEORGIAN BAY. (*See* HURON, LAKE.)

GEORGIANA, *jor'-je-a-na*, a county of Eastern Australia, New South Wales, traversed by the Abercrombie river and its affluents. On the banks of the former gold has been found.

GEORGIEVSK, *gai'-or-ge-vesk*, a fortified town in the government of the Caucasus, belonging to Russia, 90 miles from Stavropol. *Pop.* 3,000, mostly Cossacks.

GERA, *ge'r-a*, a walled town of Saxony, on the White Elster, 35 miles from Leipsic. The streets are regular, and it has several churches, hospitals, a gymnasium, orphan asylum, public library, and schools. *Manf.* Woollen and cotton cloths, hats, and leather. *Pop.* 11,500.

GÉRARD, Balthazar, *zhai'-rard*, the assassin of William I., prince of Orange. He meditated this design seven years, and at last shot the prince with a pistol at Delft. He declared he committed the murder "to expiate his sins," the prince being at the head of the Protestants. B. at Villefans, Burgundy; executed 1584.—The reward of Gérard's crime was paid to his heirs by Philip II., of Spain, the duke of Parma informing that sovereign, that though the "poor man" was dead, his parents deserved the payment of that "merced, the laudable and generous deed had so well deserved." The sentence pronounced upon Gérard was that his right hand should be burned off, that his flesh should be torn from his bones in six different places, that he should be disembowelled alive, that his heart should be torn from his bosom and flung in his face, and his head chopped off. This sentence was executed to the letter.

GÉRARD, François Pascal Simon, a celebrated modern painter, who went from Italy to Paris, where he became a pupil of M. David. From 1795 to 1810, appeared his "Belisarius," "Psyche receiving the first Kiss of Love," "The Three Ages," the "Battle of Austerlitz," and "Ossian." All the first men and women of the French empire were painted by him; and, in the space of thirty years, he executed more than a hundred full-length portraits, besides an immense number of less size. Amongst others who sat to him were Moreau, Murat, Letitia Bonaparte, Mesdames Tallien and Récamier, the emperors Napoleon and Alexander of Russia, Prince Talleyrand, Louis Bonaparte, the empress Josephine. He left behind him several unfinished works. B. at Rome, 1770; D. at Paris, 1837.

GERARD, John, *jer'-ard*, an English botanist, who, bred a surgeon, settled in London, and became gardener to Lord Burleigh. He compiled a "Catalogus Arborum, Fruticum, et Plantarum, tam indigenarum quam exoticarum, in horto Joh. Gerardi," and is the author of the "Herbal, or General History of Plants," published first in 1597, and afterwards several times reprinted. B. at Nantwich, Cheshire, 1545; D. 1607.

GERARD, Thom, the founder and first grand master of the order of St. John of Jerusalem, or the Knights of Malta. B. at Amalfi, Naples; or, according to others, at Martigues, Provence, about 1040; D. about 1121.

GERBIER-DES-JONCS, *zhair'-be-ai*, one of the Cevennes mountains, in the department of Ardèche,

France, 20 miles from Privas. *Height* of summit, 5,120 feet above the level of the sea.

GERBILLON, Jean François, *zhair-bee'-yawng*, one of the most celebrated of the French Jesuit missionaries in China. He wrote "Historical Observations on Great Tartary;" and accounts of some of his travels are inserted in Du Halde's "History of China." He was in great favour with the Chinese emperor, to whom he was appointed mathematical instructor, and wrote two books on geometry, which were printed at Pekin in the Chinese and Tartar languages. B. at Verdun, 1654; D. at Pekin, 1707, superior-general of the French missions in China.

GERMAIN, ST., *zhair'-mā*, the name of numerous parishes, villages, and towns of France, with populations varying between 1,000 and 4,000.

GERMAIN-EN-LAYE, ST., a well-built town of France, on the Seine, 10 miles from Paris. The houses are in general good; the streets wide, regular, and well paved. Here are also several handsome squares; but the object of greatest interest to the traveller, is the magnificent terrace on the side of the river, upwards of two miles long, and affording a delightful view, of nearly 15 miles in circuit. The ancient castle, built by Charles V. of France, is a spacious but heavy building, chiefly of brick; and there is a house of education of the Legion of Honour. *Manf.* Woollen goods, horsehair-cloth; and there are some tanneries. *Pop.* 12,500.—In the château of this place James II. of England died, in 1701.

GERMAN OCEAN, or NORTH SEA, *jer'-man*, an extensive sea on the N.W. coast of Europe, bounded S. by the Straits of Calais, and N. by the Orkney and Shetland islands. By the Danes it is called the West Sea, in consequence of their position. It receives the Thames, Rhine, Scheldt, Ems, Elbe, Eider, Glommen, and Weser.

GERMANIA, *jer-mai'-ne-a*, an extensive country of Europe, situate E. of Gaul, from which it was separated by the Rhine. Its inhabitants were warlike and uncivilized, and always proved a watchful enemy against the Romans. Cæsar first entered their country; but he rather checked their fury than conquered them; and his successors, or their generals, also attempted to chastise their insolence. The ancient Germans were very superstitious, and, in many instances, their religion was the same as that of their neighbours, the Gauls. Tacitus has delineated their manners and customs with the greatest nicety, and has accompanied his description with the reflections of a philosopher.

GERMANIC CONFEDERATION. (*See* GERMANY.)

GERMANICUS, Cæsar, *jer-măn'-i-kus*, son of Drusus and Antonia, niece of the emperor Augustus. He was adopted by his uncle Tiberius, and was married to Agrippina, daughter of Agrippa and grand-daughter of Augustus. He was raised to the most important offices of the state, and, when Augustus died, had the command of the army in Germany; and the affection of the soldiers led them to unanimously salute him emperor. He refused this honour, continued his wars, defeated the celebrated Arminius, and was rewarded with a triumph at his return to Rome. Tiberius declared him emperor of the East, and sent him to appease the seditions of the Armenians. But the success of Germanicus here was soon looked upon with an envious eye by Tiberius; and he was secretly poisoned at Daphne, by Piso, A.D. 19, in the 34th year of his age.—The news of his death was received with the greatest grief. He had had nine children by Agrippina, a woman of eminent virtue. One of these, Caligula, disgraced the name of his illustrious father. Germanicus has been commended, not only for his military accomplishments, but also for his learning, humanity, and extensive benevolence.

GERMANY, *jer'-ma-ne* (German, DEUTSCHLAND, *doitch'-land*), the name given to a large portion of Central Europe, bounded N. by Denmark and the Baltic, E. by Poland, S. by Hungary and Italy, and W. by Switzerland, France, Belgium, and Holland. *Ext.* 695 miles long, from N. to S., and 638 broad, from E. to W. *Area*, 241,635 square miles. *Political Divisions.* The following table gives the name and designation of the various states which comprise the Germanic confederation, with the number of votes which each has in the Diet. Their areas and popula-

tions are given under their respective headings in this work.

| STATES. | DESIGNATION. | VOTES. |
|---|---|---|

The vote belonging to the extinct line of Saxe-Gotha is given by the three existing Gotha lines, and makes a total of sixty-nine votes. Of the above states, twenty-nine belong to the Zollverein, or Customs League. *Desc.* Germany is divided by very marked outlines into two great portions, the N. and S. The line of separation is along the great line of mountains, beginning with the Westerwald, in Westphalia, and traversing Hesse-Cassel, the S. of Saxony and Silesia, until it ends in the Carpathians, on the frontiers of Poland and Hungary. This is called the Sudetic chain. Almost all the country to the N. of this is flat, and all the rivers have a northerly direction, without meeting with any formidable impediment, until they reach the level of the German Ocean or Baltic. S. Germany is much more diversified; consisting in part of extensive

plains, but traversed also by vast ranges of mountains. Indeed, the surface of Germany might not inappropriately be divided into four regions: 1. A mountainous region in the S.E. 2. A hilly region in the central part. 3. An extensive plain in the N., stretching to the Baltic and North seas. 4. A table-land, much more limited than any of the other regions. This part forms the plain of S. Bavaria. *Rivers.* It is computed that there are no less than fifty navigable rivers; while seven, viz., the Danube, the Rhine, the Main, the Weser, the Elbe, the Ems, and the Oder, rank among the noblest and largest in Europe. There are, besides these, the tributaries to the Rhine, as the Neckar, Lahn, Ruhr, Moselle, and Lippé. The Rhine is one of the most rapid of the European rivers, and the Oder one of most sluggish. Byron describes the exhibition which "Maternal Nature" makes of herself on the banks of the Rhine as beautiful in the extreme. There, he says, is to be seen,—

"A blending of all beauties, streams and dells,
Fruit, foliage, crag, wood, cornfield, mountain, vine,
And chiefless castles, breathing stern farewells,
From gray but leafy walls, where Ruin greenly dwells."

*Lakes.* Not numerous; but it contains upwards of 1,000 mineral springs and baths. The most noted of these, in Europe, are at Aix-la-Chapelle, in the Rhine provinces; Toeplitz and Carlsbad, in Bohemia; Baden-Baden; Wiesbaden and Selters, in Nassau; and Baden, in Austria. *Forests.* Extensive on all the mountain-ranges; more than a third of the country being covered with wood. *Zoology.* The bear, the lynx, wolf, fox, marten, and weasel, and the chamois in the Alpine regions; the hamster in Saxony, and game of every description in most parts: waterfowl are especially plentiful in the north, and fish abound in the rivers. Domestic animals of every kind are abundant. *Climate.* Temperate and healthy; but it varies greatly in different parts. In the N.W. the cold of the long winters is so severe that the rivers and lakes are, for months together, covered with ice strong enough to bear loaded waggons. *Pro.* The latitude of the N. of Germany being similar to that of Britain, a considerable resemblance obtains between them in regard to their natural products. This more especially applies to wheat, barley, oats, and other kinds of corn; to flax, madder, rape-seed, and hops. Buckwheat is largely grown, but agriculture is very backward, particularly in the south. Wine, though less generally made in Germany than in France, is very good in particular districts. The vine was introduced by the Romans, and is cultivated mostly in the valley of the middle Rhine, and on the Danube, in Lower Austria, and in the valleys of the Main, Moselle, and Neckar. Aniseed, liquorice, coriander, sugar, and beet-root, are also cultivated. The fruit-trees comprise the apple, pear, apricot, walnut, almond, and chestnut. *Minerals.* Abundant; iron, copper, tin, lead, silver, cobalt, bismuth, quicksilver, salt, coal, and turf. Bavaria has not only mines of metal, but is, as well as the duchy of Saltzburg, very rich in salt-mines. The mines of Idria, in Carniola, yield annually large quantities of quicksilver. Fullers' earth and porcelain clay are also found. Marble is quarried in various parts of Germany; coal in Westphalia, Saxony, and other provinces. The iron of Styria, sometimes called native steel, is the best in Europe, and turf in the N. is inexhaustible. *Manf.* Linen, in Silesia, Saxony, and Westphalia, not only for home consumption, but for export to the S. of Europe, and to America. It is the most important of the manufactures of Germany. The others consist of cotton and woollen goods, hardware, glass, musical instruments, leather, wooden clocks, and toys. Great ingenuity is displayed in making articles of wood, ivory, and steel, toys, and trinkets. Saxony, the Rhine province, and Bohemia, are the principal seats of manufacture. *Imp.* The great imports of Germany are colonial produce from America and the E. Indies; wine from France and Spain; cotton and hardware from England. With the exception of the United States, Germany takes more English manufactures than any other country. The chief trading cities are Vienna, Hamburg, Lubeck, Bremen, Frankfort-on-

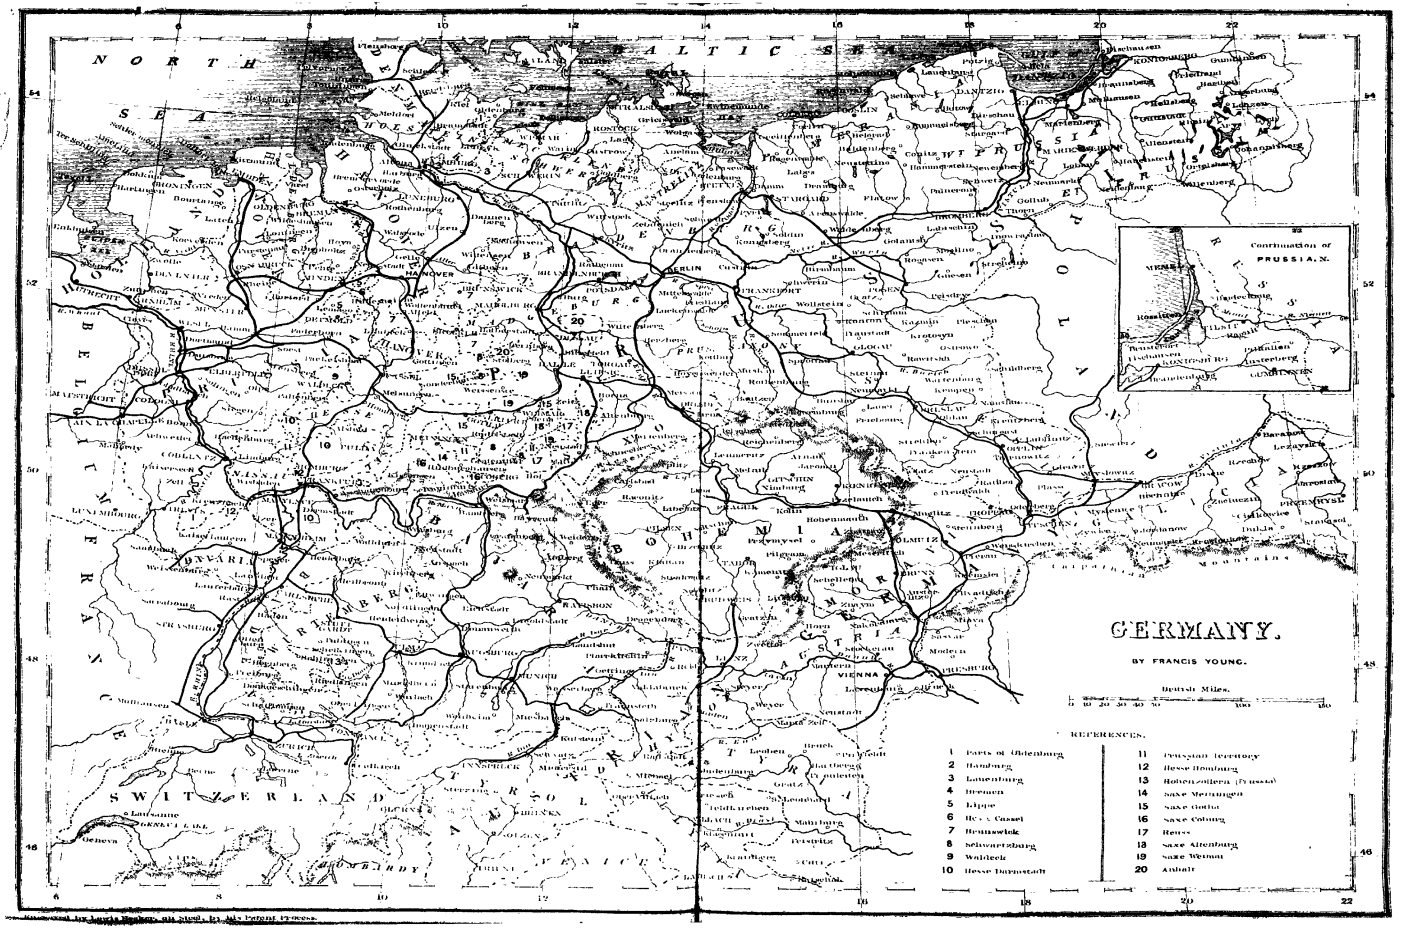
the-Main, Breslau, Leipsic, Augsburg, and Nuremburg; to these are to be added, in the second class, Stralsund and Stettin, on the Baltic, and in the interior, Magdeburg, Ulm, and Naumburg. *Exp.* Wool, timber, corn, and linen. *Language and Literature.* The language of Germany is a dialect of the Teutonic, and the country has been called the fatherland of thought. No people apply themselves more closely to their studies than the Germans; and the Hebrew is nowhere so generally learnt, or better understood. Printing is most extensively encouraged—every man of letters is an author; they multiply books without number; thousands of suppositions and disputations are annually published, with which they overstock the fairs of Frankfort and Leipsic; for no man can be a graduate in their universities who has not published one disputation at least. Germany, among its multitudes of authors, has produced many learned men in every department of literature. *Rel.* Catholic and Protestant. Of Jews there are about 400,000. *Army*, about 400,000. Each state is bound to furnish one soldier for every 100 of its inhabitants. *Navy.* None. *Gov.* The empire of Germany is a federal state, on a very large scale. It is governed by an assembly, called the Diet, consisting of representatives from all the states. The Diet is permanent, always sitting at Frankfort; but each state, in the management of its own affairs, is entirely independent. *Pop.* 41,000,000. *Lat.* between 44° 46′ and 55° 53′ N. *Lon.* between 6° and 20° E.—For a long time known under the name of Germania, this vast country was, after the invasion of the barbarians and the destruction of the Roman empire, divided between a number of independent races,—the Alemanni, Franks, Saxons, Slaves, Avari, and others. Charlemagne (whom *see*) conquered these various tribes, and incorporated them in his vast empire; but on his death, in 814, all these diverse elements, forcibly brought together, soon separated, and the treaty of Verdun, signed in 843 by the sons of Louis-le-Débonnaire, gave birth to the kingdom of Germany. Separated from France and Italy after the dethronement of Charles the Fat, in 887, Germany was governed by princes of the Carlovingian dynasty. On the extinction of this family, the monarchy became elective, and the crown was conferred, in 912, on Conrad I., duke of Franconia. Henry the Fowler succeeded in 919, and was the head of the house of Saxony, which gave five sovereigns to Germany, and renewed, in the person of Otho the Great, the empire of Charlemagne. Dating from this reign, the imperial crown, which had alternately been worn by the kings of France, Germany, and Italy, belonged exclusively to Germany, which now took the name of "The Holy Roman Empire of the German Nation." The Saxon dynasty added to the empire Lotharingia, Bohemia, and Italy; and to this family succeeded that of Franconia, which reigned from 1024 to 1125, and added the kingdom of Arles to the possessions of the empire, and especially signalized itself by its quarrels with the pope. The house of Suabia next succeeded, and, of this line, Conrad III. and Frederick Barbarossa, from 1138 to 1190, raised the imperial power to its utmost height. After them, their successors, assailed by their powerful vassals and the popes, and frequently deposed, fell into the lowest depths of weakness. It was at this period that the internecine struggles of the Guelphs and Ghibelines occurred. On Conrad IV.'s death commenced the long interregnum from 1254 to 1273, which ended in delivering Germany from anarchy. Rudolph of Hapsburg, from 1273 to 1291, began the establishment of the authority of the imperial crown; but under his successors, the influence of the grand feudatories and electors of the empire sensibly increased. Their rights were publicly sanctioned by the famous Golden Bull, or charter, granted by Charles IV. in 1356. In 1438 Albert of Hapsburg was elected emperor, and became the chief of the present house of Austria. Charles V., the 4th sovereign of this dynasty, was elected in 1519, and gloriously resuscitated the grandeur of the empire. Ferdinand, his brother, reigned after him with wisdom; and, until the reign of Ferdinand II., no change of importance occurred. Under him the "Thirty Years' War" began, which, lasting from 1618 to 1648, resulted in the humiliation of Germany, the supremacy of France, and the confirmation of the Lutheran religion. The reigns of Leopold I., Joseph I., and Charles VI. were occupied with long wars with Louis XIV. and XV. of France; and the death of Charles, in 1740, gave rise to the "War of the Austrian Succession," which secured the throne to the husband of Maria Theresa, Charles's daughter, and thus placed on the throne a member of the house of Lorraine, in the person of Francis I. Finally, in 1806, the empire of Germany ceased to exist, on the abdication of Francis II., who only preserved his hereditary estates, assuming the title of the emperor of Austria. Most of the small states which had formerly comprised the empire, were united at this time by the title of the "Confederation of the Rhine," under Napoleon I.; but the treaties of 1815 changed this arrangement. In place of this confederation, there was then substituted the "Germanic Confederation," which was placed under the protectorate of the emperor of Austria. Each of the German states now became independent, as far as concerned its internal government, and German unity existed only in regard to its intercourse with foreign powers. The functions of the Diet are reduced to three principal points—1. The maintenance of the independence of the federal states. 2. The maintenance of peace between the federal states. 3. Intervention to re-establish order and peace, when serious disputes occur in any of the federal states between the sovereign and the people.

GERONA, *jai-ro'-na*, a strong town of Spain, in Catalonia, at the confluence of the Oña and the Ter, the latter of which flows through the town, 50 miles from Barcelona. It is built in the form of a triangle, at the foot of a steep mountain, and is surrounded by walls, flanked with fortifications, and covered by two forts erected on the mountain. Besides these, it is otherwise fortified. The streets are narrow and winding, the houses tolerably good. It has a seminary of education on a large scale, and its cathedral is rich. *Manf.* Woollen and cotton goods, hosiery, paper, and soap. *Pop.* 8,300.—It was taken by the French under Augereau, in 1809.—The PROVINCE of Gerona is fertile, and has an area of 4,400 square miles, and a population of 263,000.

GERS, *zhair*, a department in the S.W. of France, in the old province of Gascony, lying between the departments of the Upper Garonne and the Landes. *Area*, 2,416 square miles. *Desc.* Mountainous, being traversed by branches of the Pyrenees. *Rivers.* The Gers, Gimone, Baise, Adour, and Save. *Pro.* As a large portion of the soil consists of heaths and waste land, the products are not considerable. The usual cerealia are grown, and a grape is produced, from which a wine is made and converted into Armagnac brandy. Hogs and poultry are plentiful, and many mules are reared. *Manf.* Unimportant. *Pop.* 308,000.

GERS, a river of France, rising in the Pyrenees, and, after a course of about 80 miles, uniting with the Garonne at Agen.

GERSAU, *zhair'-so*, a town in the Swiss canton of Schwytz, on the Lake of Lucerne. *Pop.* 1,500.—The small territory belonging to this town formed an independent state from about the close of the 14th to that of the 18th century.



GERSHOM, *ger'-shom*, 'a stranger here,' the eldest son of Moses, born in Midian.

GERSHON, *ger'-shon*, 'a stranger,' the eldest son of Levi.

GERSON, or CHARLIER, John, *zhair'-sawng*, an eminent French divine, who was educated in the college of Navarre, and became chancellor and canon of the church of Paris. He was deputed to go to the council of Pisa, where he largely contributed to the election of Pope Alexander V. He energetically denounced the murder of the duke of Orleans by the powerful duke of Burgundy, and distinguished himself at the council of Constance. B. at Gerson, Champagne, 1363; D. 1429. —His works, amongst which are "Consolations of Theology" and "Mystical Theology," are highly and deservedly valued. They were published in 1706, in 5 vols. folio.

GERVAIS, ST., *zhair'-vai*, the name of numerous parishes and villages of France, none of them with a population above 3,000.

GERVAIS, ST., a town of Savoy, on the Arve, 20 miles from Bonneville. *Pop.* 500, parish inclusive.

GERSTÄCKER, Friedrich, *ger'-stek'-er*, a modern German writer, the son of an actor, was apprenticed to a merchant at Cassel. Having been used, however, to a more exciting life, he resolved to emigrate to America, and having studied agriculture for two years, embarked at Bremen for New York. After some months' stay in this city, he found it necessary to put his hand to anything that offered, and was by turns a stoker in a steamboat, sailor, farmer, silversmith, woodcutter, and innkeeper. Returning to Germany, after an absence of six years, he published several books recounting his experience in the United States, many of which were translated both into English and French. In 1849 he undertook a new voyage, with the twofold object of collecting information for emigrants, and new material for his writings. This time he visited Rio Janeiro, Buenos Ayres, Valparaiso, and California, and went back to his "Vaterland" in 1852, after having touched at the Sandwich and Society Islands, and seen a great deal of Australia. These new travels were published, first in the journals, and afterwards in a collected form, under the title of "Voyages." B. at Hamburg, 1816. — Gerstäcker is one of the closest observers and most interesting writers of Germany; his tales and travels have met with universal favour, and translations of his best productions have appeared, from time to time, in the "Boy's Own Magazine," and other popular periodicals.

GERVAISE, Nicholas, *zhair'-vaise*, a French missionary, who went to Siam, and, on his return, published the Natural and Political History of that country. About 1724 he visited Rome, and was appointed bishop of Horren. He then set out for Guiana, where, with all the other members of the mission, he was murdered by the natives, 1729; B. at Paris, 1662.—His brother, ARMAND FRANCIS, was abbot of La Trappe, and wrote, amongst other biographical and theological works, the "Lives of Abelard and Heloise." B. at Paris, 1660; D. 1751.

GERYON and GERYONES, *jer'-i-on, je-ri'-o-nees*, a celebrated monster, represented by the poets as having three bodies and three heads. He lived in the island of Gades, where he kept numerous flocks, which were guarded by a two-headed dog called Orthos, and by Eurythion. Hercules, by order of Eurystheus, destroyed Geryon and his attendants, and carried away all his herds to Tiryntlus.

GESECKE, *ge-seck'-e(r)*, a town of Prussian Westphalia, 25 miles from Arnsberg. *Manf.* Linen. *Pop.* 3,300. It is a station on the Westphalian Railway.

GESHUR, *ge'-shur*, 'a walled valley,' a city of Bashan, in Syria.

GESNER, Conrad, *ges'-ner*, an eminent German physician and naturalist, whose parents were too poor to give him an education, which he acquired by the liberality of some of his fellow-citizens. After studying at Stutgard, he went to Paris, and supported himself by teaching grammar. He subsequently became Greek professor at Lausanne, and at Basle took his doctor's degree in physic, and then returned to Zurich, where he practised as a physician, and gave lectures in philosophy. His fame as a naturalist circulated over Europe, and he maintained a correspondence with learned men of all countries. B. at Zurich, Switzerland, 1516; D. 1565.—He wrote on the Collection of Plants, a work of great merit; "Historia Animalium," which is considered his greatest performance, and procured him the name of the 'Modern Pliny;' "Bibliotheca Universalis," which has gone through several editions; and produced other works on botany and medicine.

GESNER, Solomon, a Swiss poet and painter, whose father was a bookseller and printer, and brought him up to the same business. In 1753 he published a short poem, in poetic prose, entitled "Night," which was followed by the pastoral of "Daphnis." His next work was the "Idylls;" and his reputation was increased and extended by his poem of the "Death of Abel," which has been translated into several languages. Besides his great merit in poesy, he was a good painter and engraver, and, in 1765, published ten landscapes, engraved by himself from his own designs. These were followed by others. He was also the author of a "Letter on Landscape-Painting," Poems, &c. B. at Zurich, 1730; D. 1781.

GESNER, John Matthias, a profound German scholar and critic. On the recommendation of Buddæus, he was appointed rector of the school at Weimar, which situation he filled eleven years. Thence he removed to Leipsic, and lastly to Gottingen, where, on the foundation of its university, he was made professor of rhetoric, librarian, and inspector of public schools. B. at Roth, Anspach, 1691; D. 1761. His most esteemed works are,—editions of some of the classics, and an excellent Latin "Thesaurus," 4 vols. folio.

GETA, *ge'-ta*, a son of the emperor Severus, brother to Caracalla. After his father's death, in 211, he reigned at Rome, conjointly with his brother; but Caracalla, envious of his virtues, murdered him in the arms of their mother Julia, 212 A.D.

GETHIN, Grace, *ge'-thin*, an ingenious English lady, was early married to Sir Richard Gethin, of Ireland. Soon after her marriage she died, in 1697, and her remains were interred in Westminster Abbey, where a beautiful monument was erected to her memory.—After her death appeared a work entitled "Reliquiæ Gethinianæ; or, some Remains of the most ingenious and excellent Lady Grace Gethin, lately deceased," &c. 1700, 4to. Provision was made for a sermon to be preached in the abbey, annually, on Ash-Wednesday, to commemorate her memory, and Mr. Congreve wrote a poem to her honour.

GETHSEMANE, *geth-sem'-a-ne*, 'a very fat valley,' a village at the foot of Mount Olivet, near Jerusalem.

GÉVAUDAN, *zhai'-vo-da*, an old division of France, in the province of Languedoc, now comprised in the departments of Lozère and Upper Loire.

GEX, *gex*, a town and parish of France, in the department Ain, 10 miles from Geneva. It lies on the E. side of the Jura mountains, and is now annexed to Switzerland. It has an active trade in corn, wool, and Gruyères cheese. *Pop.* 3,000.

GEYER, *gi'-er*, a town of Saxony, in the circle of the Erzgeburge, 20 miles from Zwikau. *Manf.* Cotton goods, and, in its neighbourhood, there are some mines. *Pop.* 3,500.

GEYSER, *gi'-ser*, a name given to some remarkable hot springs in Iceland, which *see*.

GHADAMES. (*See* GADAMES.)

GHARA, GORRA, or GURRA, *gar'-a*, the name given to the united streams Beas and Sutlej, in the Punjab, Hindostan, from their union with the Endrusa to their joining the Chenaub, in *lat.* 29° 16′ N.; *lon.* 71° 8′ E. *Length*, 300 miles.

GHARMY, *gar'-me*, a village in the Libyan desert, Egypt, supposed to overlook the site of the ancient temple of Jupiter Ammon.

GHAUT, WESTERN and EASTERN, *gawt*, a term signifying a pass through mountains, and especially applied to two ranges of hills which run nearly N. and S. through the peninsula of India. The Western have peaks which rise to a height of 6,000 or 7,000 feet; the Eastern preserve an average height of 1,500 feet above the level of the sea.

GHAZEEPORE, *gaz-e-por'*, a district of British India, with a fertile soil, which yields two crops a year. *Area*, 2,190 miles. *Pro.* In June, the crops, consisting of maize, rice, pulse, indigo, and oil-seed, are sown; in the rainy season the crops, consisting of wheat, barley, sugar, opium, tobacco, and cotton, are sown, and gathered in summer. *Pop.* about 1,000,000. *Lat.* between 25° 17′ and 26° N. *Lon.* between 83° 8′ and 84° 40′ E.—In 1775, the annexation of this district to British India took place.—The TOWN of the same name is 45 miles from Benares, and contains the ruined Saracenic palace of Cossim Ali Khan. *Pop.* 7,000.—Here is the mausoleum of the Marquis Cornwallis, who in 1805 died in this town.

GHEEL, *geel*, a town of Belgium, 25 miles from Antwerp. *Manf.* Lace, and there are some large distilleries. *Pop.* 7,000.

GHELENDJIK, *ge-len-jik'*, a bay and seaport of Circassia, on the Black Sea. There is a good harbour, and the bay is a mile wide at its entrance. *Lat.* 44° 30′ N. *Lon.* 38° 3′ E.

GHENT, *gent* (in French, GAND, *gang*), a fortified city of Belgium, the capital of East Flanders, situate on the Scheldt, where that river is joined by the Lys, 30 miles from Brussels. These rivers, with two smaller streams (the Lievre and the More), and a number of

navigable canals, divide the town into no less than 26 islands, which are joined together by 309 small wooden bridges. The circuit of the walls within which the town is inclosed, is about eight miles, entered by seven gates. A large proportion, however, of this space is occupied, not by buildings, but by gardens, orchards,

GHENT.

and corn-fields, as well as by the canals and rivers. Most of the canals are bordered by magnificent quays; some of them with beautiful rows of trees, forming convenient promenades. The streets are in general wide and straight; but some of them are narrow, and do not admit of two carriages passing abreast. The houses are large, but not elegant. Among the objects of curiosity are the ramparts, which occupy a prominent place, from their great extent, and the delightful promenades which they afford. The public squares are thirteen in number, and the principal one contains a pedestrian statue of the emperor Charles V. Among the public buildings, the cathedral is highly worthy of attention, not so much on account of its external appearance, as for the splendour and richness of its interior; the church of St. Michael, which contains a famous "Crucifixion," by Van-Dyk; also the Benedictine abbey of St. Peter. The inside of several of the churches in Ghent is of marble. Besides these, there are the town-hall, presenting a mixture of ancient and modern architecture, but still a grand building; the public library, the botanic garden, the citadel, cavalry barracks, theatre, hospitals, and the Grand Béguinage, a convent of great extent. It has several academies for drawing and the fine arts, and a great provincial school. The citadel was built by Charles V., and is one of the largest in Europe. Ghent is the see of an archbishop, and the residence of the military commandant for Flanders. *Manf.* Lace of great fineness, cotton, linen, and, in a more limited degree, silk and woollens, soap, gold and silver stuffs, chemicals, cutlery, machinery, and leather. There are also several tanneries, sugar-refineries, and paper-mills; but the great branch is cotton-weaving. A brisk corn trade is likewise carried on; and it has a very active transit trade, being connected with Bruges and Tremonde by ship canals. *Pop.* 115,000. *Lat.* 51° 3′ 12″ N. *Lon.* 3° 43′ 51″ E.—Ghent is the birthplace of Charles V.; but the inhabitants have no reason to respect his memory, as he repeatedly loaded them with heavy exactions, and built the citadel to awe them. Here, in 1576, was concluded the famous treaty called the Pacification of Ghent, the first commencement of the separation of seven provinces from the seventeen which then formed the Austrian Netherlands. The town has been often taken; the last time by the French, in 1793; from which period to 1814 it was the capital of the department Scheldt. In 1814 a treaty between the United States and England was concluded at this place.

GHERIAH, *ge-re-a'*, a town of British India, in the presidency of Bombay. It was the principal port of Angria, a famous piratical prince, whose fort here was taken, and his whole fleet destroyed, by Admiral Watson and Colonel Clive, in conjunction with the Mahrattas, in 1756. *Pop.* Unascertained. *Lat.* 16° 45′ N. *Lon.* 73° 7′ E.

GHILAN, *ge-lan'*, a beautiful province of Persia proper, extending along the S.W. coast of the Caspian Sea, and supposed to be the Hyrcania of the ancients. It has Schirvan to the N., Aderbeitzan and part of Irac-Agemi to the W., and Mezanderan to the S.E. *Ext.* About 200 miles long, and 150 broad. *General Desc.* The sea forms its boundary on one side, and, on the other, are high mountains, covered with various sorts of fruit-trees. In the highest parts of them are deer, bears, wolves, leopards, and tigers, which last, the Persians have, it is said, a method of taming, and hunt with them as with dogs. It is extremely fertile, producing silk, oil, wine, rice, tobacco, mulberry, box, walnut-trees, and excellent fruits in abundance. *Pop.* Unascertained. This province was ceded to Russia in 1723, but not formally annexed to the Russian dominions till 1780.

GHIR, or GHER, CAPE, *gir*, a headland in Morocco, 62 miles from Mogadore. *Lat.* 30° 37′ 30″ N. *Lon.* 9° 52′ 30″ W.

GHIRLANDAJO, Domenico, *geer'-lan-da'-jo*, a Florentine painter, was intended for a goldsmith, but, having a strong passion for painting, cultivated that art with success. At Florence, in the church of Santa Maria Novella, is his picture of the "Massacre of the Innocents," and in the gallery of the Louvre at Paris, "The Visitation of St. Ann to the Virgin;" but, perhaps, he deserves most to be celebrated for being the tutor of Michael Angelo. B. 1449; D. 1493.—His two brothers, Benedetto and David, and his son Ridolfo, equally distinguished themselves as painters.

GHIZEH, *gi'-ze(r)*, a town of Egypt, on the W. bank of the Nile, 3 miles from Cairo. Near here is the great pyramid, covering 13 acres, and having a height of 460 feet.

GHIZNI, or GHUZNEH, *giz'-ne*, a fortified city of Affghanistan, built on a hill at the extremity of a mountain-range 7,720 feet high, and 80 miles from Cabul. It was the capital of a powerful empire of the same name. It is called the second Medina, from the great number of illustrious persons who have been interred there. *Pop.* Probably 8,000. *Lat.* 33° 34′ N. *Lon.* 68° 18′ E.—The old town of Ghuznee was destroyed in the 12th century, and the modern one stands on a site about 3 miles from the ruins of the other. It was stormed and taken by the British under Lord Keane in 1839. In 1842 its garrison gave it up to the Affghans, from whom, in the same year, it was retaken by the forces under General Nott.

GHIZNI, or GHUZNEH RIVER, rises about 10 miles from the above town, and after a course of 60 miles falls into a lake called Ab-istada.

GHOGRA, or GOGRA, *go'-gra*, a river of India and a tributary of the Ganges. It rises in *lat.* 30° 28′ N., *lon.* 80° 40′ E., at a height of nearly 18,000 feet above the level of the sea, and joins the Ganges in *lat.* 25° 46′ N., *lon.* 84° 40′ E. *Total length*, 600 miles.

GHORE, *gor*, a town and independent district in Affghanistan, 115 miles from Herat. It was the original possession of Mahmoud of Ghore, who, in the 12th century, founded the Affghan dynasty.

GHUZEL-HISSAR, *goo'-zel his'-sar*, a town of Anatolia,

Asia Minor, 55 miles from Smyrna. *Pop.* Unascertained, but considerable.

GIANT'S CAUSEWAY, a remarkable natural promontory of basaltic rock, running out into the sea, on the N. coast of Antrim, Ireland, about 123 miles from Dublin. *Lat.* 55° 20′ N. *Lon.* 6° 50′ W.

GIARRETTA, or SIMETO, *je-ar-ret'-ta*, a river of Italy, which, with its affluents, waters the plain of Catania and the country W. of Mount Etna. It rises in the mountains, about 15 miles S.E. of Caronia, and, after a course of 50 miles, falls into the Mediterranean, 6 miles from Catania.

GIAT, *je'-a*, a town and parish of France, 30 miles from Riom. *Pop.* 2,300.

GIAVENNO, *je-a-ven'-no*, a town of Piedmont, at the foot of the Cottian Alps, 16 miles from Turin. *Manf.* Linen, leather, and silk. *Pop.* 9,000.

GIBBON, Edward, *gib'-bon*, one of the most distinguished of English historians, was descended from an ancient family of Kent. He was first placed at a private school at Kingston, and next at Westminster school, whence he was removed to Magdalen College, Oxford. While there, he read books of controversial divinity, particularly those between the Papists and Protestants, and conceived that the truth lay on the side of the Romanists. Accordingly, in 1753, he renounced heresy at the feet of a Roman Catholic priest in London. His father was greatly concerned at this, and to reclaim him sent him to Lausanne, in Switzerland, under the care of Mr. Pavilliard, a Calvinist minister, by whose instructions he was convinced of the errors of the Romish church, and on the Christmas-day of 1754, just eighteen months after his conversion to Romanism, received the sacrament according to the Reformed communion. While at Lausanne he pursued his classical studies with ardour, labouring to acquire, at least, a creditable acquaintance with the Greek, Latin, and French languages. He here fell in love with the daughter of a minister, a charming creature, called Susan Carchod, but was dissuaded from entering into the married state by the force of paternal remonstrance; and he lived single the remainder of his life. The lady afterwards became the wife of the famous Necker and the mother of Madame de Staël. In 1758 he returned to England, where he began to collect a noble library; and in 1761 published, in French, a small volume entitled "Essai sur l'Etude de la Littérature." This production was not much noticed in England at the time; but he says in his "Autobiography,"—"The publication of my history, fifteen years afterwards, revived the memory of my first production, and the essay was eagerly sought for in the shops; but I refused the permission of reprinting it, and when a copy has been discovered at a sale, the primitive value of 2*s.* 6*d.* has risen to the fanciful price of 20 or 30 shillings." He was, at this time, a captain in the Hampshire militia, which he resigned at the peace of 1763, when he visited Paris, and thence went again to Lausanne. He next travelled into Italy; and, while sitting amid the ruins of the Capitol at Rome, conceived the idea of writing the decline and fall of that mighty empire. In 1767 he assisted M. Deyverdun in writing the "Mémoires Littéraires de la Grande Bretagne." Of these memoirs he says, "I will presume to say that their merit was superior to their reputation; but it is not less true that they were productive of more reputation than emolument." In 1770, he published in English a pamphlet, entitled "Critical Observations on the Sixth Book of the Æneid;" the design of which was to refute Bishop Warburton's hypothesis on the descent of Æneas. The same year, by the death of his father, he came into the possession of the family estate; but it was much involved. In 1774 he was returned to parliament for Liskeard; but though he sat eight years, he never distinguished himself as a speaker, always giving a silent vote for the minister. In 1776 appeared the first volume of his great work, the "Decline and Fall of the Roman Empire," which was afterwards extended to six volumes 4to. "It was at Rome," he tells us, "on the 15th October, 1764, as I sat musing amidst the ruins of the Capitol, while the barefooted friars were singing vespers in the temple of Jupiter, that the idea of writing the decline and fall of the city first started to my mind." Splendid, however,

as is this history, it must be observed that its author opened a masked battery against Christianity in several places, but especially in two chapters of the first volume, on the growth and progress of that religion. Several writers attacked the historian, to one of whom only, Mr. Davis, who had charged the author with want of fidelity, Mr. Gibbon vouchsafed a reply. He was employed by ministers in writing a memoir in justification of this country's going to war with France, for the part taken by that court in the American contest. This piece was written in French, and was greatly admired. For this he obtained a seat at the Board of Trade, which he lost on the abolition of that board by Mr. Burke's bill. In 1783 he returned once more to Lausanne, where he employed himself in completing his history. When he had concluded a work so grand in its subject, and so majestic in its treatment, he thus beautifully describes his emotions:—"It was on the day, or rather night, of the 27th of June, 1787, between the hours of eleven and twelve, that I wrote the last lines of the last page in a summer-house in my garden. After laying down my pen, I took several turns in a bureau, or covered walk of acacias, which commands a prospect of the country, the lake, and the mountains. The air was temperate, the sky was serene, the silver orb of the moon was reflected from the waters, and all nature was silent. I will not dissemble the first emotions of joy on the recovery of my freedom, and, perhaps, the establishment of my fame. But my pride was soon humbled, and a sober melancholy was spread over my mind by the idea that I had taken an everlasting leave of an old and agreeable companion, and that, whatsoever might be the future fate of my history, the life of the historian must be short and precarious." The French revolution now began to disturb the neighbouring states, and Mr. Gibbon returned to England, and died in London, 1794. B. at Putney, 1737. After his death appeared his posthumous works, with his memoirs, written by himself, and finished by his friend Lord Sheffield, 2 vols. 4to.

GIBBONS, Grinling, an eminent English carver in wood, was the son of a Dutchman who settled in England. Grinling was appointed by Charles II. to a place under the Board of Works, and he was employed in ornamenting several of the royal palaces. He carved the foliage in the chapel at Windsor, the choir of St. Paul's Cathedral, and the admirable font in St. James's Church, Westminster. There is some of his carving in St. James's Church, Piccadilly; but his principal performance is said to be at Petworth. D. 1721.

GIBBONS, Orlando, an eminent English musician, who became organist of the Chapel Royal at the age of 21; and, in 1622, was created doctor of music by the university of Oxford. B. at Cambridge, 1583; D. at Canterbury, 1625.—He was the best church music composer of his time, and also published madrigals. His two brothers and son were likewise good musicians.

GIBBS, James, *gibs*, a Scotch architect, who designed the churches of St. Martin's and St. Mary le Strand, London; the senate-house, and the improvements of King's College, Cambridge, and other works. B. at Aberdeen, 1683; D. 1754.

GIBEON, *gib'-e-on*, 'a hill,' a city allotted to Judah.

GIBRALTAR, *jib-ral'-tar*, a fortified seaport-town and garrison, occupying a promontory in the S. of Spain, at the entrance from the Atlantic into the Mediterranean, 60 miles from Cadiz. It consists of a high rocky mountain, the ancient "Mons Calpe," and one of the "pillars of Hercules," running from N. to S., about three miles in length, from half a mile to three-fourths in width, and 1,600 feet high. On the N. side is a sandy isthmus, about a mile and a half in length, and half as much in breadth, which connects the "rock" with the continent. The N. front of the rock is almost perpendicular; the E. side is full of frightful precipices; while the S., being narrow and abrupt, presents hardly any possibility of approach, even to an enemy in command of the sea. On none of these sides has the garrison ever been attacked. There remains only the W. front, which is almost as abrupt as the others, but which may be approached by shipping from the bay, and presents a kind of *pied à terre* in the level spot on which the town is built. Here, accordingly,

have the efforts of assailants been directed, and here are the great batteries and works of defence. The zoology of the rock comprises monkeys without tails, the only species of that animal to be found native in any part of Europe. There are also rabbits, woodcocks, and snakes. The TOWN stands at the foot of

GIBRALTAR.

the promontory, on its N.W. side. Though fortified in itself, its chief protection is derived from the batteries on the neighbouring heights, which sweep both the isthmus and the approach by water. The houses have flat roofs and large bow windows; they are generally painted black, with a white strip to mark each story or floor; the black is intended to blunt the dazzling rays of the sun. One large street traverses almost the whole town; it is nearly half a mile in length, and full of shops. The chief public buildings are the navy hospital, the victualling office, the Admiralty, the barracks, and the house of the lieutenant-governor. The places of worship are an English church, a Catholic chapel, and several synagogues; here are also a small but elegant theatre and a garrison library. The place is a general *entrepôt* for the manufactures of England, and other produce, such as sugar, rum, tobacco, rice, flour, wine, fruits, silk, and WAX. *Pop.* 15,000, exclusive of the garrison. *Lat.* 36° 7′ 3″ N. *Lon.* 5° 21′ 2″ W.—One of the important features of Gibraltar is the BAY, which is of great extent, and forms a convenient naval station, being protected from the more dangerous winds. The "rock" was first fortified in the modern style in the reign of Charles V. It was surprised by the English, under Sir George Rooke, in 1704, soon after the commencement of the war of the Spanish succession: it has since been repeatedly besieged; first in 1705, next in 1727, and lastly in 1782, when, under General Eliot (*see* ELIOT), it withstood a terrific siege by the French and Spaniards for upwards of three years.

GIBRALTAR, STRAITS OF, form the passage between the Atlantic and the Mediterranean, having Spain on the N., and Morocco in Africa on the S. *Ext.* 50 miles long, with a breadth of from 18 to 23. A strong current always runs through these straits, from the ocean into the Mediterranean.

GIBSON, Edmund, *gib'-son*, a learned prelate, who, being sent to Queen's College, Oxford, applied himself particularly to the study of the northern languages. In 1691 he published a new edition of Drummond's "Polemo-Middiana," and James V. of Scotland's "Cantilena Rustica," with curious notes. The next year he published a Latin version of the "Chronicon Saxonicum," with notes. These works were followed by another volume, entitled "Librorum Manuscriptorum in duabus Insignibus Bibliothecis, altera Dugdaliana Oxonii, Catalogus," dedicated to Bishop Tenison, which procured him the patronage of that prelate, who appointed him his chaplain. Three years afterwards, his edition of Camden's "Britannia" appeared, with considerable additions; and in 1713 he published his "Codex Juris Ecclesiastici Anglicani," in folio, which procured him the applause of the friends of the church, and much censure from those opposed to it. In 1715, Dr. Gibson was made bishop of Lincoln, and in 1723 translated to London. B. at Bampton, Westmoreland, 1669; D. at Bath, 1748.

GIBSON, Richard, known by the name of the "dwarf," an English painter, who studied the manner of Sir Peter Lely. In his youth he was servant to a lady at Mortlake, who, perceiving his taste for painting, put him under De Cleyn for instruction. He subsequently became page to Charles I., and when he married Mrs. Anne Shepherd, who was also a dwarf, the king honoured the wedding with his presence, and gave away the bride. The bride and bridegroom were of equal stature, each measuring three feet ten inches. They had nine children, five of whom arrived at years of maturity, and were of the usual stature. Gibson died in his 75th year, and his wife in 1709, at the age of 89.

GIBSON, John, R.A., an eminent English sculptor, who, at the age of 14, was apprenticed to a cabinet-maker, but afterwards became a wood-carver. At the age of 16, however, he quitted this employment, for the marble-works of Messrs. Francis, in Liverpool, who purchased the remaining portion of his time at the wood-carving for £70. He was now in a congenial atmosphere, and commenced modelling, and working with the chisel. His genius soon began to develop itself, when he was sent, by means of a private subscription, to Rome, for the purpose of studying the works of the great masters. In 1817 he arrived at the "ancient Capitol," with letters of introduction to Canova, who gave him a kind reception. He entered the studio of this great artist, and, in 1821, took a studio for himself. From that period he has resided in Rome, making few visits to his native country. His first work was a group of "Mars and Cupid," which brought him a commission for it to be executed in marble for the duke of Devonshire. It now forms one of the principal features in the Chatsworth collection. From this time his fame rose; but, to render it the more certain and lasting, he took lessons from Thorwaldsen, the great Danish sculptor. Having, by close application, completely mastered his art, he worked most in the poetical field of sculpture, and produced many fine pieces. He has, however, executed several portrait statues of great merit; among which may be noticed one of Sir Robert Peel for Westminster Abbey, another of George Stephenson, and another of her Majesty Queen Victoria for Buckingham Palace. He has been the first modern sculptor to introduce the use of colouring into his statues, an innovation which has occasioned much discussion, but which he defends by instancing Grecian precedents. In 1833 he was elected an A.R.A., and in 1836 an R.A. Liverpool is especially rich in his works, which are too numerous to admit of recapitulation here. B. at Conway, North Wales, 1791.

GIBSON, the Right Honourable Thomas Milner, M.P., a modern English statesman, who, in 1837, entered the house of parliament for Ipswich, as a supporter of the government of Sir Robert Peel. In 1839 he became a convert to liberal opinions, and resigned his seat. He then devoted himself to the cause of free trade, and in 1841 was returned for Manchester. In 1846 he became a member of the Privy Council, and vice-president of the Board of Trade. In 1848 he quitted office, and once more

became an effective independent member of the House of Commons. It is to his persevering efforts that the country is chiefly indebted for the remission of three great duties, which considerably tended to circumscribe the dissemination of knowledge throughout the country. These were the stamp on newspapers, the tax on advertisements, and the paper duty, the remission of which Mr. Gladstone announced in his budget of 1860. B. 1807.

GIBSON, two counties in the United States.—1. In Indiana, on the Wabash. *Area*, 512 square miles. *Pop.* 11,000.—2. In Tennessee. *Area*, 660 square miles. *Pop.* 20,000.

GIBSON PORT, a thriving place of the United States, situate on the Bayou Pierre, one of the channels through which the overflowing waters of the Mississippi are conveyed to the Gulf of Mexico.

GIDEON, *gid'-e-on*, 'he that bruises,' a famous judge of Israel.

GIENGEN, *geeng'-en*, a town of Wurtemberg, on the Brenz, 22 miles from Eillwangen. *Manf.* Linen and woollen goods and cutlery. *Pop.* 2,000.—In its vicinity are the baths of Wildad.

GIESSEN, *gees'-sen*, a town of Hesse-Darmstadt, on the Lahu, 36 miles from Mentz. It has a castle, an arsenal, town-hall, observatory, and university. This last, under Baron Liebig, has become famous as a school of organic chemistry, and is attended by students from every part of Europe. *Manf.* Woollen goods, leather, and tobacco. *Pop.* about 10,000.—It has a station on the railway from Frankfort to Cassel.

GIFFARD, William, *gif'-fard*, a modern English writer, was the son of poor parents, and was left an orphan before he had reached his 13th year. He was apprenticed to the sea; but, disliking that occupation, he was put to shoemaking, at which employment he continued till he was 20 years of age. By that time he had disclosed some qualities of genius, when a Mr. Cookesley, a surgeon of Ashburton, sent him to Oxford. After leaving college, he made the tour of Europe, as the travelling companion of Lord Belgrave; and, on his return to England, settled in London as a literary man. In 1794 he published his "Baviad," a poetical satire, which annihilated the Della Crusca school of poets, of which Mrs. Piozzi formed a leading member. In the following year his "Mæviad" appeared, and showed the low state to which dramatic authorship had then fallen. In 1797 he became the editor of the "Anti-Jacobin," established by Mr. Canning and other gentlemen, and got entangled in a quarrel with Dr. Wolcott, to whom, as Peter Pindar, he wrote a poetical epistle. In 1802 he published his translation of Juvenal, which Sir Walter Scott says "is the best version ever made of a classical author." In 1804 his edition of Massinger appeared, and, in 1816, that of Ben Jonson. Subsequently, editions both of Ford and Shirley were published, but not entirely edited by him, his death having taken place before he had completed them. In 1809 he became the editor of the London "Quarterly Review;" and it is in this capacity, that he is best known. As a critic, he has been much censured for his severity, with which he mingled no inconsiderable degree of injustice. "He was a man with whom I had no literary sympathies," says Southey; "perhaps there was nothing upon which we agreed, except great political questions. . . . He had a heart full of kindness for all living creatures except authors; *them* he regarded as a fishmonger regards eels, or as Isaac Walton did worms, slugs, and frogs. I always protested against the indulgence of that temper in his Review." Scott says he was good "as a commentator;" but, as a critic, the "fault of extreme severity went through his critical labours; and, in general, he flagellated with so little pity, that people lost their sense of the criminal's guilt in dislike of the savage pleasure which the executioner seemed to take in inflicting punishment." He held the editorship of the Review till 1824. B. at Ashburton, Devonshire, 1756: D. 1826.

GIFFORD, Andrew, *gif'-ford*, an English dissenting minister and learned antiquarian, who was assistant librarian of the British Museum many years. He formed a good library, and bequeathed it to the Baptist academy at Bristol. B. 1700; D. 1784.

GIFFORD, a village of Scotland, 4 miles from Haddington. *Pop.* 550.—Here, in 1505, John Knox, the great reformer, was born.

GIGANTES, *ji-gän'-tees*, 'the giants,' the sons of Cœlus and Terra. (*See* CŒLUS.) They are represented as men of uncommon stature, with proportionate strength. Some of them, as Cottus, Briareus, and Gyges, had fifty heads and a hundred arms, and serpents instead of legs. The defeat of the Titans incensed them against Jupiter, and they all conspired to dethrone him. The god was alarmed, and called all the deities to assist him. The giants heaped Mount Ossa upon Pelion, so as to more easily scale the walls of heaven. The gods then fled with consternation into Egypt, where they assumed the shape of different animals, to screen themselves from their pursuers. Jupiter, however, by the advice of Pallas, armed his son Hercules in his cause, who soon defeated them.

GIGGLESWICK, *gig'-gels-wik*, a township and parish of the W. Riding of Yorkshire, near Settle. Near it is Giggleswick Tarn, or lake. *Pop.* 4,000.

GIGHA, *gig'-ha*, one of the Hebrides, lying 3½ miles off the W. coast of Kintyre, in Argyleshire. *Ext.* 7 miles long and 2½ broad. *Pop.* about 500.

GIGLIO, ISOLA DI, *geel'-ye-o*, a mountainous and fertile island in the Mediterranean, on the coast of Tuscany, 10 miles from Mount Argentaro. *Ext.* 5 miles long. *Pop.* 2,000.

GIHON, *gi'-hon*, 'valley of grace,' a river of Edon, and a fountain of Jerusalem.

GIJON, *ge'-jone*, a town of Spain, in the province of Asturia, 18 miles from Oviedo. *Manf.* Linen fabrics, stone wares, and hats. It has a considerable trade in fruit and nuts. *Pop.* 6,500. *Lat.* 41° 55′ N. *Lon.* 5° 44′ W.

GILA, RIO, *je'-la*, a river of the United States, in New Mexico, rising in the Sierra Mimbres, and, after a course of 400 miles, discharging itself into the Gulf of California, in *lat.* 33° N.

GILBERT, Sir Humphrey, *gil'-bert*, an English navigator, whose mother becoming a widow, married a Mr. Raleigh, by whom she had the celebrated Sir Walter. Humphrey served with reputation in Ireland, and, for his services there, was knighted. In 1576 he published a discourse to prove a passage by the N.W. to Cathay and the East Indies. Two years afterwards, he obtained a patent for establishing settlements in North America, and, in 1583, took possession of Newfoundland, where he thought to find silver-mines. On his return from a second voyage thither, the vessel foundered, and all on board perished. B. at Dartmouth, 1539.

GILBERT, William, a physician, who discovered several of the properties of the loadstone. He was elected a fellow of the College of Physicians, and became physician to Queen Elizabeth. In 1600 he published a work, entitled "De Magnete, Magneticisque Corporibus, et de Magno Magnete Tellure, Physiologia Nova," in which are many important suggestions for the improvement of navigation. Indeed, this work contains the history of all that had been written on the subject of the magnet before his time, and forms the first regular system upon it. It may be viewed as the parent of all the improvements that have been therein since made. Lord Bacon, in his "Advancement of Learning," calls it "a painful and experimental work." B. at Colchester, 1540; D. 1603.

GILBOA, *gil-bo'-a*, 'a revolution of inquiry,' a range of mountains in Samaria.

GILDAS, *gil'-dăs*, a British monk, of whose works there is nothing extant but an epistle on the depravity of the Britons, the best edition of which is that by Gale, in 1691. Lived in the 6th century; but his history is involved in doubt and obscurity. Bishop Bale mentions another Gildas, who was a native of Wales, and flourished about 820. He was a monk, and wrote a calendar of saints, yet extant in MS.; and Leland notices a poet of the name, who drew up the prophecies of Merlin in Latin verse.

GILDAS, ST., *chil'-da*, two parishes and villages in France, neither with a population above 1,500. One of them, ST. GILDAS DE RUIS, was the retreat of Abelard, in 1125.

GILEAD, *gil'-e-ad*, a district of country to the east of the river Jordan.

GILES, *jiles*, two counties of the United States. 1. In the west part of Virginia. *Area*, 584 square miles. *Pop.* 7,000.—2. In West Tennessee, on Elk river, bordering on Alabama. *Area*, 600 square miles. *Pop.* 26,000, of whom a third are slaves.

GILES, ST., IN THE FIELDS, a parish of Middlesex, about the centre of London. *Pop.* 38,000.

GILFILLAN, George, *gil-fil'-lan*, a modern English critic and author, was the son of a minister of the Free Church of Scotland, and being educated for the church, was, about 1837, appointed to the parish of Dundee. In 1851 he published, under the title of "A Gallery of Literary Portraits," a series of critical sketches, which had formerly appeared in the *Dumfries Herald*. Besides this, he produced a volume of "Poems and Songs," "The Bards of the Bible," "Martyrs and Heroes of the Scottish Covenant," "The History of a Man," &c. B. at Comrie, Perthshire, 1813.

GILGAL, *gil'-gal*, a 'wheel,' or 'revolution,' a city near the Jordan, where the Israelites passed the river into Canaan.

GILIMER, *gil'-i-mer*, the last king of the Vandals in Africa, was the descendant of Genseric, and took possession of the throne in 530, having deposed his cousin, the feeble Hilderic. Justinian, the emperor of the East, wishing to avenge his ally, or make use of this pretext to attack the Vandals, sent Belisarius against the usurper. This general took possession of Carthage, defeated Gilimer in 534, at the battle of Tricameron, and captured the king, who was conducted in triumph to Constantinople, repeatedly exclaiming, as he was led along, "Vanity of vanities, all is vanity." Justinian made of the kingdom of the Vandals a province of his empire, but gave Gilimer a large domain in Galicia. Lived in the 6th century.

GILL, Alexander, *gil*, a famous English schoolmaster, who, in 1608, became master of St. Paul's school, where he educated many eminent persons, and among the rest, the celebrated Milton. He was the author of several religious treatises and commentaries. B. in Lincolnshire, 1564; D. 1635.

GILLES, Peter, *zheels*, a French naturalist, one of the first who made useful researches into the natural sciences. He visited the shores of the Adriatic and Mediterranean, was sent to the Levant by the order of Francis I., explored the ruins of Chalcedon, and returned from Constantinople with the French ambassador in 1550. B. at Alby, 1490; D. at Rome, 1555.—He wrote "De Vi et Naturâ Animalium," "De Bosphoro Thracio," and "De Topographiâ Constantinopoleos."

GILLIES, John, LL.D., *gil'-les*, was educated at the university of Glasgow, and was for some time a travelling tutor to the sons of the earl of Hopetoun. On the death of Dr. Robertson, however, he was appointed historiographer for Scotland, and distinguished himself by his literary labours. His principal work is a "History of Greece," which, in point of style, has been pronounced superior to that of Mr. Mitford. His other works are a translation of the "Ethics and Politics of Aristotle," "A View of the Reign of Frederick II. of Prussia," and the "Orations of Isocrates and Lysias." B. at Brechin, Scotland, 1747; D. 1836.

GILLINGHAM, *gil'-ling-ham*, a town in Kent, 2 miles from Chatham, and inhabited principally by persons belonging to the dockyard. The streets are wide, and, from their declivity, remarkably clean. *Pop.* 8,000.—It is noted in history, for being the place where 600 Norman gentlemen, who came over in the retinue of the princes Alfred and Edward, were barbarously murdered, in the beginning of the 11th century, by Earl Godwin.—The name, also, of several parishes in England, none of them with a population above 4,000.

GILLIS, ST., *zhil'-le*, a town of Belgium, E. Flanders, 20 miles from Ghent. *Pop.* including the parish, 3,500.

GILLSLAND, *gils'-land*, a small town in Cumberland, 18 miles from Carlisle. It is resorted to as a watering-place, and has several medicinal springs. A station on the Carlisle and Newcastle Railway.

GILOLO, or HALMAHERA, *ge-lo'-lo*, one of the Molucca Islands, in the Malay Archipelago. *Area*, estimated at about 6,000 square miles. *Desc.* It is of an extremely irregular form, consisting of a long mainland, with two large peninsulas, which are divided from each other by a deep bay, projecting from its E. side. On the N. and S. of these bays, the land again forms two peninsulas; so that the island may be said to consist of four peninsulas, which are separated from each other by deep bays. It is mountainous and densely wooded. *Pro.* Nuts, fruits, spices, sago, cocoa, birds-nests, and gold dust. Horses, sheep, and cattle are reared. *Pop.* Unascertained. *Lat.* 0° 45′ N. *Lon.* of the principal town, Ossa, 128° 22′ E.

GILPIN, Bernard, *gil'-pin*, an English divine, who, from perusing the works of Erasmus, was one of the first who embraced the principles of the Reformation. Having travelled on the continent for some time, he returned to England in 1556, and was presented by his uncle, Bishop Tonstal, to the archdeaconry of Durham and the rectory of Easington. Being next presented to the rectory of Houghton-le-Spring, his labours there, in promoting the reformed religion, became so notorious, that Bishop Bonner gave orders for him to be arrested and sent to London. Gilpin prepared himself for the stake, but before he reached London, news came of Mary's death; on which he returned to his parish, to the great joy of his people. Queen Elizabeth subsequently offered him the bishopric of Carlisle, which he refused. B. in Westmoreland, 1517; D. 1583.

GILPIN, William, an English divine and writer, who was the master, for many years, of a school at Cheam, in Surrey, and afterwards became vicar of Boldre, in Hampshire, and prebendary of Salisbury. Amongst other works, he wrote "The Life of Bernard Gilpin," his ancestor, above mentioned; "The Lives of Latimer, Wickliffe, Huss, and Archbishop Cranmer;" "Exposition of the New Testament," "A Tour to the Lakes," "Remarks on Forest Scenery," "Observations on the River Wye," and "Picturesque Remarks on the Western Parts of England." B. in Westmoreland, 1724; D. 1804.

GINGEE, *gin'-ge*, a strong town on the coast of Coromandel, once the capital of a kingdom of the same name, 80 miles from Madras. It stands on a mountain, whose top is divided into three points, on each of which is a castle. *Pop.* Unascertained. Towards the end of the 18th century, the Great Mogul unsuccessfully besieged this place for a period of three years.—In 1750 it was taken by the French, who, in 1761, ceded it to the British.

GIOCUNDO, Fra Giovanni, *jo-koon'-do*, an Italian architect and writer, constructed several buildings at Verona, where he had formerly kept a school, and had Julius Cæsar Scaliger for a pupil. In 1499 he was invited to Paris by Louis XII., and built the bridge of Notre Dame, Chamber of Accounts, &c. He also assisted Michael Angelo in the works of St. Peter's, at Rome, and published an edition of Vitruvius, and another of Cæsar's Commentaries. B. at Verona, 1435; D. 1521.

GIOJA, Flavio, *jo'-e-a*, an Italian pilot or sea-captain, to whom is ascribed the invention of the compass, which he first used, it is said, in 1302 or 1303. He marked the north with a fleur-de-lis, in honour of the sovereigns of Naples, who were a branch of the royal family of France. B. at Pasitano, near Amalfi, at the end of the 13th century.

GIOJOSA, *jo'-e-o-sa*, a town of Naples, in the province of Calabria Ultra. *Pop.* 8,500.—Also a town of Sicily, 5 miles from Patti. *Pop.* 4,000.

GIORDANO, Luca, *jor-da'-no*, an Italian painter, who was in high favour with Charles II. of Spain, who conferred on him the honour of knighthood. B. at Naples, 1632; D. 1705.

GIORGIO, SAN, *jor'-je-o*, the name of numerous villages and towns of Italy, with populations ranging between 1,300 and 5,000.

GIORGIONE, or GEORGIO BARBARELLI, *jor-jo'-nai*, one of the earliest painters of the Venetian school, who executed a great number of frescoes, which time has destroyed. It is said that Titian worked under him to obtain his manner of colouring; but Giorgione perceiving his design, dismissed him. His finest work is a painting of "Christ carrying his Cross," at Venice. B. at Castel Franco, 1478; D. 1511.

GIOTTO, *jot'-to*, an Italian painter, sculptor, and architect, was in his youth a keeper of sheep, but

Cimabue (*see* CIMABUE) discovered his talent, and took him as a pupil. Giotto, following his master in the study of nature, clothed her in more noble forms than he, and was thus the precursor of Rafaelle. Amongst the numerous works of this painter, may be mentioned a mosaic representing "Peter walking on the Water," in St. Peter's at Rome, and a "St. Francis," in the Louvre at Paris. In 1334 he superintended the erection of the fortifications at Florence. B. at Vespignano, 1266; D. 1334.—Giotto was the friend of Dante, and has transmitted the features of the poet in a little picture. In return, the author dedicated to the painter some verses in his "Divina Commedia." One of the Medici family erected a tomb to his memory in a church at Florence, and at the foot of his bust placed this line of Poliziano:—

"Ille ego sum per quem pictura extincta revixit, &c."
(I am he through whom the extinct art of painting revived, &c.)

GIOVANNI, SAN, *jo-van'-ne*, the name of numerous villages and towns in Italy, with populations varying between 1,400 and 9,000.

GIOVENAZZO, *jo'-vai-nat'-so*, a seaport-town of Naples, in the province of Bari, and 10 miles from Bari. It is defended by a castle, and contains several churches and convents. *Pop.* 8,000.

GIRALDI, Gigio Gregorio, *je-ral'-de*, an eminent Italian writer, the most esteemed of whose works are, "Syntagma de Diis Gentium," which is the first treatise on "Mythology" ever written, and "A History of the Greek and Latin Poets." B. at Ferrara, 1479; D. 1552.

GIRALDI, John Baptist Cintio, an Italian poet and physician, who became secretary to the duke of Ferrara, and professor of rhetoric at Pavia. He wrote tragedies, poems, and histories; but his principal work is entitled "Ecatomiti; or, A Hundred Novels." B. at Ferrara, 1504; D. 1573.

GIRALDUS CAMBRENSIS, *ji-răl'-dus kăm-bren'-sis*, an old English writer, whose real name was Gerald Barry. He was appointed to several rich benefices under Henry II. and Richard I., and administered the bishopric of St. David, which he vainly endeavoured to obtain for himself. When Richard Cœur-de-Lion was setting out on his crusade, Giraldus was named governor of the kingdom in his absence. His principal works are, "Topographiæ Hiberniæ," "Itinerarium Cambriæ," "De Rebus a se gestis," which is a journal of his life, and displays no inconsiderable amount of vanity; "Ecclesiæ Speculum," in which he censures the manners of the monks. B. at Mainarpor, near Pembroke, 1146; D. 1220.

GIRARD, Gabriel, *zhe-rard'*, a French abbé and grammarian, author of "Synonymes François," a work which has been reprinted, with additions, many times. He was almoner to the duchess de Berry, and the king's interpreter for the Russian and Sclavonian languages. Besides the above, he wrote other works; among which the best known is "Principes de la Langue Françoise." B. at Clermont, Auvergne, 1647; D. 1748.

GIRARD, Stephen, an American millionaire, who came of poor French parents, and being driven from his home, embarked as a cabin-boy at Bordeaux, and landed at New York. Thence he went to Philadelphia, where he got into business, and by his industry and intelligence, combined with his avaricious habits, amassed an immense fortune. He left behind him nearly £3,000,000 sterling; and, by his will, did not leave his fortune to his family, but to found a college at Philadelphia, from which all ministers of religion were to be excluded. B. at Périgueux, 1750; D. at Philadelphia, 1831.

GIRARDIN, Émile de, *zhe'-rar-dă*, a celebrated modern French publicist, who was, up to his 25th year, known as Émile Delamothe. In 1827, however, he claimed the name by which he was afterwards to be known, and, in the same year, produced his first essay in literature, under the title of "Émile." This was followed, in the next year, by "Au Hasard, Fragmens sans Suite d'une Histoire sans Fin." This is the romance of his birth and his early years. Soon after, he founded two journals,—"Le Voleur," and "La Mode." After 1830, M. de Girardin published successively the "Journal des Connaissances Utiles," which attained, in a few months, a circulation of 120,000; the "Journal des Instituteurs Primaires," the "Musée des Familles," "L'Almanach de France," of which more than a million copies were sold; an "Atlas de France," and a "Universal Atlas," at a halfpenny a map. All these were published as emanating from "A National Society for Intellectual Freedom," and had considerable influence on the progress of popular education. All this, however, did not suffice for his restless activity; and, in 1836, "La Presse" was started, as an organ of conservative policy. The appearance of this paper caused a complete change in Parisian journalism, and, attacked on all sides, M. de Girardin fought a duel with Armand Carrel (*see* that name), the editor of the "National," which ended fatally for the latter. In 1834 he was elected deputy by the college of Bourganeuf (Creuze), and was accused of electoral corruption. In 1839 he supported the minister Molé against the coalition, and, during the greater part of his career, Guizot had the support of the "Presse." In 1846 this great journalist was excluded from the French chamber, under the pretext that he was not a Frenchman. In February, 1848, he urged a revolution, and, penetrating into the Tuileries, presented to Louis Philippe a notice demanding his abdication and the regency of the duchess of Orleans. After the revolution, M. de Girardin was returned to the Assembly for the Lower Rhine, and voted with the "Mountain" party. To him is due, it is said, the gaining over of Victor Hugo to the republican cause; the poet being, with him, the principal editor of "L'Avènement." After Louis Napoleon's *coup d'état* of December 2, 1851, M. de Girardin was banished from France; but, two months after, was allowed to return. He again undertook the management of his journal, which he retained till the end of 1856, when he parted with his portion of the property for a sum which amounted to nearly £33,000 sterling. B. in Switzerland, 1802.—In 1828 he married Mdlle. Delphine Gay (*see* MADAME DE GIRARDIN), who died in 1855.—M. de Girardin has left no trace behind him in chamber or assembly; for he is neither the leader of a party, and still less is he an orator; he is a publicist, a journalist, a great mover of ideas, and his place was in the journal which he created and rendered formidable to every party. There, in "La Presse," one saw M. Guizot, as well as the provisional government, each in their turn, supported and opposed. So, too, were the reactionists' movements and the republicans. General Cavaignac was savagely treated in its columns; Louis Napoleon's candidature for the presidency was there proposed, and supported by every means that could be brought to bear; and once more there was a change in the journal's tone, and it fought hard in the ranks of the socialists and revolutionists. Thus did he raise against himself violent animosities in every party, which he repays, it is said, by a great contempt for men. In spite, however, of all these changes of opinion, the "Presse" was no less read; and it remained, with all its varying shades, during the twenty years of his direction, one of the best-edited journals of Paris, and, so to speak, a field of battle open to all comers.

GIRARDIN, Delphine Gay, Madame Émile de, a French poetess, the wife of the above, received a literary education, and, at 17, produced some poems, the patriotic character of which procured her the surname of the "Muse of the country." In 1822 she obtained a prize from the French Academy for her "Sœurs de Saint Camille;" and, during the three or four following years, she published many pieces on the Greeks, Romans, Franks, General Foy, Napoleon, and Charles X.; the latter allowing her, from his privy purse, a pension of 1,500 francs. After several other effusions, she went, in 1827, with her mother, Sophie Gay, to Italy, where quite an ovation attended her. In 1828 she married M. de Girardin, and, after this, wrote several fugitive pieces, elegies, and satires. But what, above all, contributed to the reputation of this lady, and to the success of her husband's journal, were her "Lettres Parisiennes," a series of sparkling, gossiping letters, published in "La Presse," with the signature of the Vicomte de Launay. B. at Aix-la-Chapelle, 1804; D. 1855.—Madame de Girardin was

also the author of several tragedies, comedies, and farces, many of which were eminently successful.

GIRARDON, Francis, *zhe'-rar-dawng*, a French sculptor and architect, who, after studying under Anguier, was sent to Rome by Louis XIV., to perfect himself in his art. He succeeded Le Brun, on the death of that artist, as inspector-general of sculpture. His chief works are the mausoleum of Richelieu, in the church of the Sorbonne; the equestrian statue of Louis XIV., which formerly stood in the Place Vendôme, but was destroyed in the Revolution; and the "Rape of Proserpine," standing in the gardens of Versailles. B. at Troyes, 1630; D. at Paris, 1715.

GIRDLENESS, *gir'-del-ness*, a promontory on the E. coast of Scotland, 2 miles from Aberdeen. It has a lighthouse in *lat.* 57° 8′ N.; *lon.* 2° 3′ W.

GIRGASHITES, *gir'-ga-shites*, 'who arrive from pilgrimage,' a clan of the ancient Canaanites.

GIRGEH, *gir'-ge*, a large town in Upper Egypt, about a quarter of a mile from the river Nile, and 60 miles from Thebes. It has several mosques, and a government cotton factory. *Pop.* about 6,000. *Lat.* 37° 22′ N. *Lon.* 31° 5′ 2″ E.

GIRGENTI, or GERGENTI, *jeer-jain'-te*, a city of Sicily, and the capital of a district of the same name, in the Val di Mazzara, nearly three miles from the coast. It adjoins the site of the ancient Agrigentum, the magnificent ruins of which are still to be seen. The modern town, however, is not flourishing. It stands on a high hill, and commands a beautiful prospect; but it is neither clean nor regularly built. The harbour is at a considerable distance, and was formed by a very fine mole, erected at the public expense in 1752. It is, however, the principal port in Sicily for the shipment of sulphur. *Pop.* 20,000. The DISTRICT has an area of 1,200 square miles, with a population of 214,000. It is fertile in corn, wine, and oil. Its minerals consist of sulphur, salt, agates, naphtha, and bitumen.

GIRONDE, *zhe-rond'*, a department in the S.W. of France, having on its W. the Bay of Biscay, and inclosed on its other sides by the departments Landes, Lot-et-Garonne, Charente-Inférieure, and Dordogne. *Desc.* In general flat, and interspersed with lagoons, but fertile on the banks of the Garonne, along which it extends. *Rivers.* The Garonne and Dordogne. *Pro.* Corn, fruit, hemp, timber, and turpentine. Most of the grapes which produce claret wine, are grown in this department. Its fisheries are important. *Manf.* Various, with a general trade. *Pop.* 615,000.—The political party called Girondists take their name from this department, as it was principally formed of deputies from this part of France.

GIRONDE, an estuary in the W. of France, formed by the union of the rivers Dordogne and Garonne. *Ext.* 45 miles long, with a breadth of from 2 to 6.

GIRONDE, a town of France, in the department of the Gironde. *Pop.* 1,100.

GIRONS, ST., *zhe'-rawng*, a town and parish of France, in the department Ariége, 22 miles from Foix. *Manf.* Linens, woollens, and paper. *Pop.* 4,000.

GIRVAN, *gir'-van*, a town and parish of Ayrshire. The town is pleasantly situate on the Girvan, at its confluence with the Irish Sea, and has a commodious harbour. *Pop.* of the parish, 8,600.—The RIVER rises in the parish of Straiton, and falls into the Irish Sea opposite Ailsa Craig.

GISBURN, *giz'-burn*, a township and parish of Yorkshire, on the river Ribble, 12 miles from Skipton. *Pop.* 2,000.—GISBURN PARK is in the neighbourhood, and contains a herd of wild cattle.

GISCO, *giz'-ko*, son of Himilco, the Carthaginian general, was banished from Carthage by a cabal, but was afterwards recalled. He was then allowed to revenge himself on his enemies in any manner he thought fit, and contented himself with seeing them prostrate themselves on the ground, and placing his foot on their neck, to show them that their lives depended on his will. Soon after, he had the command in Sicily against the Corinthians, led by Timoleon, and made an advantageous peace with them. Lived in the 3rd century B.C.

GISORS, *zhe'-sors*, a town of France, department of the Eure. *Manf.* Woollens, calico, lace, and cotton yarn. *Pop.* 3,600.

GITTITH, *git'-tith*, 'a wine-press,' relating to Gath, as a harp or tune of Gath, intimated in the title of Psalms viii. and lxxxi.

GIUGLIANO, *joo'-le-a'-no*, a town of Naples, 6 miles from the city of Naples. It is the capital of a circle. It has a fine castle, four churches, and an hospital. *Pop.* 9,500.

GIULIANO, SAN, *joo'-le-a'-no*, a town of Sicily, in the Val di Mazzara, 5 miles from Trapani. It has several convents, a great many churches, an hospital, and a *mont-de-piété*. *Pop.* 10,500.—On the summit of a hill in the neighbourhood, are the ruins of the temple of Venus, celebrated by Polybius, Virgil, Diodorus Siculus, and other ancient writers. The hill is called Mons Eryx.

GIULIANO, SAN, a town of Piedmont, 25 miles from Urbino. *Manf.* Principally straw hats. *Pop.* 3,000.

GIURGEVO, *ge-oor'-ge-vo*, a town and river-port of Wallachia, opposite Rutschuk, and about 40 miles from Bucharest, of which it is the port. It has a citadel, connected with the town by a bridge, and although a mean-looking place, is the most important town on the Wallachian side of the Danube. *Pop.* 7,000.—In 1773 the Turks were here defeated by the Russians, who took it in 1811, and again in 1829, when its defences were levelled with the ground. In 1854 the Russians were, in its neighbourhood, defeated by the Turks.

GIVET, *zhe'-vai*, a fortified town of France, in the department Ardennes, 25 miles from Mazières, on the Belgian frontier. *Manf.* Glue, sealing-wax; and it has some breweries and tanning-works. *Pop.* 6,000.—The citadel of this place was fortified by Vauban, and consists of Charlemont, Notre Dame, and St. Hilaire.

GIVORS, *zhe'-nor*, a town of France, in the department of the Rhone, 14 miles from Lyons. It is the centre of a coal trade, and has numerous tile-fields in its neighbourhood, and window-glass works. *Pop.* 9,000.

GIZEH. (*See* GHIZEH.)

GLACIERS, *glüs'-i-ers*, a name given to the extensive fields of ice found among the Alps of Switzerland, and divided into Lower and Upper. The first occupy the deep valleys situate in the bosom of the Alps, and are termed by the natives Valley of Ice; the second, which clothe the summits and sides of the mountains, are called the Upper Glaciers. The Lower are by far the most considerable in extent and depth. Some stretch several leagues in length, and are bordered at the higher extremity by inaccessible rocks, and at the other, extend into the cultivated valleys. The thickness of the ice varies in different parts. M. de Saussure found its general depth in the Glacier des Bois from 80 to 100 feet, but does not question the information of those who assert that, in some places, its thickness exceeds even 600 feet. These immense fields of ice usually rest on an inclined plane of more or less acclivity. Where the plain is only gently inclined, the surface of the ice is nearly uniform; the chasms are but few and narrow, and the traveller crosses on foot, without much difficulty. The surface is not so slippery as that of frozen rivers, but rough and granulated, and only dangerous to the passenger in steep descents; it is extremely porous, and full of small bubbles, and, consequently, not so compact as common ice. The Upper Glaciers may be subdivided into those which cover the summits, and those which extend along the sides of the Alps. Those which cover the summits, owe their origin to the snow, which falls at all seasons of the year, and which remains nearly in its original state, being congealed into a hard substance, and not converted into ice. The substance which clothes the sides of the Alps is neither pure snow, like that of the summits, nor ice, which forms the Lower Glaciers, but is an assemblage of both: it contains less snow than the summits, because the summer heat has more power to dissolve it; and more snow than the Lower Glaciers, because the dissolution of the snow is comparatively less. In a word, there is a regular gradation from the snow on the summits to the ice of the Lower Glaciers, formed by the intermediate mixture of snow and ice. (*See* ALPS.)

GLADBACH, *glad'-bak*, a town of Rhenish Prussia, on the small river Niers, 16 miles from Düsseldorf. *Manf.* Linen, cotton, and woollen goods. It has both dyeing and bleaching fields. *Pop.* 4,000.

GLADIATORII, *glăd'-i-ai-tor'-i-i*, 'gladiators,' were those who engaged in combats originally exhibited on the grave of deceased persons, and first introduced at Rome by the Bruti, upon the death of their father, A.U.C. 488. Their origin arose from the supposition that the ghosts of the dead were rendered propitious by human blood; and hence, at funerals, it was usual to murder slaves in cool blood. In succeeding ages, this barbarity was covered by the specious show of pleasure and voluntary combat, the slaves being permitted to kill one another. Originally, captives, criminals, or disobedient slaves were trained up for combat; but when the diversion became more frequent, and was exhibited on every opportunity, for the purpose of obtaining popular favour and applause, many of the Roman citizens enlisted themselves among the gladiators; Nero, at one show, exhibiting no less than 400 senators and 600 knights. It is supposed that there were no more than three pair of gladiators exhibited by the Bruti. Their numbers, however, increased with the luxury and power of the city; and under the emperors, not only senators and knights, but even women, engaged in combat as gladiators, and seemed to forget the inferior strength of their sex. These cruel sports, after a continuance of 600 years, were abolished by Constantine the Great. They were revived under Constantius and his two successors; but Honorius succeeded in finally putting an end to them.

GLADOVA, *glad'-o-va*, a town of Servia, situate immediately below the "Iron Gate" on the Danube, 12 miles from New Orsova. It is a mean place, but is the principal station of the Danube Steam-Navigation Company. From 2 to 3 miles below it are the remains of a bridge built by Trajan across the Danube.

GLADSMUIR, *glădz'-muir*, a parish of Scotland, in the county of Haddington, in which the battle of Gladsmuir, or Prestonpans, was fought. *Pop.* about 2,000.

GLADSTONE, the Right Honourable William Ewart, *glăd'-stone*, the third son of a wealthy Liverpool merchant, was educated at Eton and Christ Church, Oxford, and, in 1832, returned to the House of Commons as a member for Newark, in the Conservative interest. In 1834 he was appointed by Sir Robert Peel to a seat in the Treasury, and, in the following year, became under-secretary for colonial affairs. In the same year he retired, with his great leader, from office, and, till 1841, continued with Sir Robert Peel in opposition, when he became a privy-councillor, and was appointed vice-president of the Board of Trade and master of the Mint. In this position he greatly distinguished himself by his masterly defence of the commercial policy of the government he represented, and which it was his duty to explain. In 1843 he became president of the Board of Trade, which office he resigned in 1845. In the following year he became secretary of state for the colonies, and adhered to Sir Robert Peel's measure, which proposed a modification of the corn-laws. In 1847 he was chosen to represent the university of Oxford, in which position he found himself so frequently at variance with his friends on the bill for repealing the last of the Jewish disabilities, that, in 1852, he seceded from the Conservative party, and refused to take office under the administration of the earl of Derby. In the same year he was again returned for the university of Oxford, and chiefly contributed to the overthrow of the short-lived Derby government by his masterly speech on the budget introduced by Mr. Disraeli. On the accession of the Aberdeen ministry, he became chancellor of the Exchequer; and under the Palmerston administration, which succeeded it, held the same post; but resigned it in a few days, in consequence of Mr. Roebuck's determination to persevere in his resolution of having a committee of inquiry into the state of the British army before Sebastopol. For some time he remained out of office; but, in the June of 1859, he was again appointed chancellor of the Exchequer, under the Palmerston ministry. In the early part of 1860 he brought in his budget, which carried out the principles of free trade in the path of Sir Robert Peel, and which, while we write (March), is being debated in the house of parliament. Besides his active political life, Mr. Gladstone has written several works. The best of those upon political subjects may be regarded as that entitled "The State, in its Relations with the Church," which was first published in 1838, and again, in an enlarged form, in 1841. He also wrote a "Letter to Lord Aberdeen," published in 1851, in which he painted a vigorous picture of the political persecutions exercised against the Neapolitans by the government, and produced, throughout the whole of Europe, an immense sensation. In 1858 his "Homeric Studies" appeared; and, the same year, he went on a mission to the Ionian Isles, as lord high commissioner extraordinary, with a view to settle the existing differences between the inhabitants and the British government in its capacity of protector. B. at Liverpool, 1809.

GLAMMIS, *glăm'-mis*, a village and parish of Scotland, 5½ miles from Forfar. Near this place is Glammis Castle, in which is still shown the apartment in which Malcolm II. was assassinated in 1034. *Manf.* Brown linen goods. *Pop.* 2,100.

GLAMORGANSHIRE, *glă-mor'-gan-sheer*, the most southern county of Wales, being bounded on the W. and S. by the Bristol Channel, and on its other sides by Carmarthen, Brecon, and Monmouth. *Area*, 792 square miles. *Desc.* The S. district, which comprehends the low land along the seacoast, and some miles into the interior, is termed the Vale of Glamorgan, which is one of the most fertile pieces of soil in Wales. From this base, however, the land rises rapidly towards the N., forming itself into mountains of considerable elevation. *Rivers and Canals.* The principal rivers are the Romney, Taff, Ely, Tame, Avon, Neath, and the Loughor, which divides the county from Carmarthenshire. The principal canals are the Cardiff to Merthyr Tydvil, the Neath, the Swansea, and the Aberdare. *Pro.* The usual crops are wheat, barley, and oats, with a rotation of the common green crops. Grazing is practised to a great extent, and the horned cattle are much esteemed. The horses are handsome, strong, and active, and the sheep vie in form and quality with some of the best English breeds, and afford excellent wool. In the uplands, large quantities of cheese and butter are produced; but mineral riches have, within the last century, raised Glamorganshire to its consequence. *Minerals.* Ironstone, coal, limestone, and small quantities of lead and copper. The coal not only supplies the numerous iron-works of the county, but furnishes an important article of export trade, and draws also, to its neighbourhood, immense establishments for the smelting of copper, the ore being transported for this purpose from Cornwall, North Wales, and Ireland: the iron is again exported in great quantity, and affords, at the same time, the materials for extensive tin-plate manufactories, the tin being also brought from Cornwall. The principal iron-works are at Merthyr Tydvil, Aberdare, Hermain; and there are large smelting-works in the vales of Neath and Swansea. Round these places are vast collieries, accompanied also with iron and copper works. *Manf.* Besides its iron-works, &c., these consist of earthenware, woollen goods, soap, and others. *Pop.* 232,000, but greatly increasing.

GLANVIL, Joseph, *glăn'-vil*, an English divine, who, at the Restoration, became a member of the Royal Society, being a zealous advocate for the new philosophy. In 1666 he was presented to the rectory of the abbey church at Bath, at which time he published his "Considerations on the Being of Witches and Witchcraft," in which he certainly betrays a puerile credulity. In 1678 he obtained a prebendal stall in the cathedral of Worcester. B. at Plymouth, 1636; D. at Bath, 1680.—Besides the above, he wrote several pieces in defence of revealed religion and experimental philosophy. After his death, his discourses and remains were published.

GLAPHYRE, and GLAPHYRA, *glăf'-i-re*, a daughter of Archelaus, the high-priest of Bellona, in Cappadocia, celebrated for her beauty and intrigues. She obtained, from M. Antony, by her wantonness, the kingdom of Cappadocia for her two sons.—Her grandaughter bore the same name. She was a daughter of Archelaus, king of Cappadocia, and married Alexander, a son of Herod, by whom she had two sons. After the death of Alexander, she married her brother-in-law, Archelaus.

GLARUS, or GLARIS, *gla'-roos*, a canton of Switzer-

land, inclosed by St. Gall, the Grisons, Uri, and Schwytz. *Area*, 280 square miles. *General Desc.* Cold and mountainous, yet affording cattle, cheese, butter, orchards, and a prodigious variety of uncommon plants, metals, crystals, medicinal springs, petrifactions, and large slates. It consists of the valley of the river Linth and its affluents, and, except on the N., is inclosed by high mountain-ranges; the Dodi, at its S. extremity, attaining an elevation of 11,900 feet, which is the highest summit in E. Switzerland. *Pop.* 32,000, of whom about 27,000 are Protestants.

GLARUS, the capital of the above canton, is situate near the Linth, about 30 miles from Lucerne. It has a townhall, free-school, hospital, and public library. *Pop.* 5,000.

GLASGOW, *glas'-go*, a city of Scotland, situate in the lower ward of Lanarkshire, and chiefly built on a gentle declivity, which slopes towards the river Clyde, 43 miles from Edinburgh. It is one of the most ancient towns in Scotland, its origin being generally attributed to St. Mungo, or St. Kentigern, who is said to have here founded, in 560, a bishopric, which, in 1484, was afterwards erected into an archiepiscopal see. The principal part of the city occupies a plain on the N. side of the Clyde. Its length is ascertained by a long line of streets which run E. and W., and are termed respectively the Gallowgate, Trongate, and Argyll Street. The town contains several large and elegant squares, and has many public buildings, of which the most celebrated is the cathedral of St. Mungo, at the N. end of the High Street, a splendid edifice, and perhaps the most entire specimen of Gothic architecture that is to be found in Scotland. It was begun by John Achaius, bishop of Glasgow, in 1123, and was continued by successive bishops, until it was finished in the manner in which it at present remains. The original plan of this cathedral was in the form of a cross, though the transverse part has never been built. It is 284 feet long, 65 broad, and 90 feet high within the walls, with two large towers, on one of which a spire was built about the year 1420, making the whole 220 feet in height. Immediately behind the cathedral is the Necropolis, laid out with great taste and elegance. Besides the cathedral, there are many other churches, of which the most remarkable are St. George's and St. Andrew's, both of which have very elegant fronts, with fine steeples. The College Church is a plain building, partaking of the Gothic, with a small steeple in front, containing a clock and bell. The Tron Church was built in 1794, on the site of the old one, which was destroyed by fire in 1793. Besides these, there are the North-west Church, of an oblong form, with a transverse aisle, and a steeple 140 feet high; St. Enoch's Church, with a lofty and handsome steeple; the Barony Church; the Episcopal Chapel, immediately behind St. Andrew's Square; about 40 free churches, and numerous places of worship for dissenting denominations; besides 4 Catholic churches. In the High Street, not far from the cathedral, are the university or college buildings, and the houses for the accommodation of the professors. This celebrated seminary was founded in 1450, by William Turnbull, bishop of Glasgow, and is well endowed, with an annual income of about £20,000, and consists of a chancellor, rector, dean, principal, 8 professors, 14 regius professors, with an average number of 1,000 students. It has a library of 60,000 volumes, and possesses the valuable museum of Dr. William Hunter, one of the best collections in Europe, of natural history, paintings, medals, anatomical preparations, books, &c. &c.; the medals alone being estimated at £30,000. Besides these, there are an Anderson university, the faculty of physicians, a high school, mechanics' institute, Athenæum, gaol, court-house, bridewell, numerous banks, an exchange, a chamber of commerce, club-houses, barracks, and many charitable institutions; various hospitals for the sick and infirm, a lunatic asylum, a Magdalene asylum, besides charity schools. It also possesses two theatres, and several statues and monuments are erected in various parts of the city. Of the former, there is an equestrian statue of the queen, and another of the duke of Wellington. There are three large suburbs connected with the city—Gorbals, on the S.; Calton, on the E.; and Anderston, on the W. These are boroughs of barony.

*Manf.* Extensive. Those consisting of linens, lawns, cambrics, and other articles of similar fabric, were introduced about the year 1725, and superseded in 1787 by the introduction of muslins. In 1730, the manufacture of green bottles was introduced; and flint glass and cud-bear in 1777; in 1732 manufactories for inkles and delft were established; in 1785 the dyeing of cottons in turkey-red colour was begun; and a manufactory of bandana handkerchiefs subsequently established, which raised the character of that branch of trade all over Europe. The West-India trade afforded another outlet to the increasing capital of the city, and it is now celebrated for its great establishments for the cotton manufacture. It is also noted for its shipbuilding and engineering establishments, its chemical-works, its type-foundries, and for almost every other kind of production in the mechanical arts. The city having extended into large suburbs both to the N. and S., or Gorbals side of the Clyde, these are connected with the body of the city by three handsome stone bridges and a wooden suspension one. The Clyde is navigable for vessels drawing seven or eight feet water, as far as the lowest bridge, where commences the Broomalaw Quay, which extends W. from the foot of Jamaica Street along the river, which now admits ships of 2,000 tons burthen. The wharfs and docks afford extensive accommodation for vessels of every description. *Pop.* (in 1851) 329,097.—About the year 1172, Glasgow was erected into a burgh by William (surnamed the Lion), king of Scotland. In 1450, James II. erected its city and barony into a regality, in favour of the bishop. In 1611, James VI. granted the city a very ample charter, by which it was erected into a royal burgh, to be holden under his majesty in free burgage. In 1636, Charles I. granted further privileges, which were confirmed, with additional privileges, by an act in 1690. The communication of Glasgow with other parts has been greatly aided by the supply of an immense number of magnificent steamboats. It was here that Watt first commenced to improve the steam-engine; and on the Clyde, the *Comet*, the first boat in Europe successfully propelled by steam, was launched in 1812. The city is in railway communication with all parts of the United Kingdom, besides being supplied with canals, which carry her traffic into the surrounding parts. It is the birthplace of many eminent men; among whom may be noticed Sir John Moore, Lord Clyde, and Thomas Campbell, the poet.

GLASGOW, PORT, is situate on the left bank of the Clyde, in Renfrewshire, on a branch of the Glasgow and Paisley Railway, 16 miles from Glasgow. The town is neatly built, and surrounded with many pleasant villas, with their gardens. The harbour is judiciously planned, and the graving-dock is the first of the kind that was constructed in Scotland. The town was founded before the deepening of the Clyde, by the magistrates of Glasgow, to be the seaport of that city, as its name implies; and its trade was long in the hands of Glasgow merchants. Much of the trade, however, is now in the hands of its own inhabitants. Besides the parish church, there are several other places of public worship, public libraries, endowed and other schools, and branch banks. *Manf.* Coarse linens, sail-cloth, and sugar-refining. Shipbuilding is extensively carried on, and it is the principal port on the Clyde for the import of N. American timber. *Pop.* of town, about 7,000.

GLASGOW, the capital of Barren county, Kentucky, U.S., 145 miles from Lexington. *Pop.* 400.

GLASNEVEN, *glas-ne'-ven*, a parish of Ireland, in Leinster, 4 miles from Dublin. It has a botanic garden belonging to the Dublin Royal Society. *Pop.* 1,500.—In its cemetery rest the remains of the celebrated J. P. Curran.

GLASS, John, *glass*, a Scotch Presbyterian divine, who founded a sect, called in Scotland Glassites, and in England Sandemanians. In 1727 he published a work to prove that the civil establishment of religion is inconsistent with Christianity, for which he was deposed. He subsequently became the founder of his sect, and wrote several controversial tracts in 4 vols. 8vo. B. at Dundee, 1698; D. 1773.

GLASTONBURY, *glas'-ton-ber'-re*, a town of Somersetshire, 25 miles from the city of Bath. It consists

principally of two streets, in both of which are many houses, either entirely built, or patched up, with stones from its abbey, formerly the most magnificent in the world, and covering an area of 60 acres. Its domains and revenue were immense. It was anciently called Avalonia, or the Isle of Avalon, into which no person whatever, not even a bishop or prince, was allowed to enter without leave from the abbot, to whom this power was granted by Canute the Dane. There were 61 abbots, who sat among the barons in parliament, and governed it successively for nearly 600 years. Richard Withing, the last, for refusing to surrender his abbey to Henry VIII., and acknowledge his supremacy, was condemned at Wells, and carried, with two of his monks, on a hurdle, to the Tor, or St. Michael's Tower, a high hill in the neighbourhood, where he was hanged in his robes. Extensive ruins of the abbey, an interesting memorial of bygone ages, still remain; but they have been much diminished for the sake of the stones, as every cottage in the neighbourhood has part of a pillar, door, or window adorning or sustaining its own meanness or fragility. The curious structure called the Abbot's Kitchen is, however, yet entire, and is of a very unusual contrivance, being built of stone, without any combustible material, as are also some fragments of the church and St. Joseph of Arimathea's chapel. There are also other structures of especial interest to the lover of antiquity; as an ancient market-cross; St. George's Inn, formerly the hospitium; the tribunal; the gate-house, now also an inn; and the hospital of St. John, founded in 1246. *Manf.* Chiefly silk; but it has an export trade in slates, tiles, timber, and agricultural produce, by a canal connecting it with Bristol. *Pop.* 3,200.—The old walls that remain are overgrown with ivy, and the aspect of the whole place is, at once, melancholy and venerable.

GLASTONBURY, a township of Hartford county, Connecticut, U.S., on the E. side of Connecticut river, 8 miles below Hartford. *Manf.* Cotton, and it has iron-works. *Pop.* 4,500.

GLATZ, or KLADSKO, *glatz*, an ancient country of the empire, now belonging to Prussia, and in the central part of Germany, surrounded by Silesia, Moravia, and Bohemia. *Area*, 248 geographical square miles. *Desc.* Hilly, with a thin stony soil, possessing little fertility. *Rivers.* The Neisse and its affluents. *Pop.* about 90,000.

GLATZ, the capital of the above country, on the Neisse, lies in a narrow valley between two lofty hills, 50 miles from Breslau. It is strongly fortified, has several churches, a town-house, arsenals, barracks, gymnasium, several schools, and an infirmary. It is the seat of several courts and public offices, and is connected by two bridges over the Neisse. *Manf.* Linen, cotton, and woollen goods; leather, carpets; and it has distilleries, mills, and tile-works. *Pop.* 10,000.—Glatz surrendered to the Prussians in 1742, was taken by the Austrians in 1759, but restored at the peace of 1763. The celebrated Baron Trenck was confined in it, but made his escape by leaping from the walls.

GLAUBER, John Rodolph, *glou'-ber*, a German chemist, who, after considerable travelling, settled in Holland. He was a great follower of alchemy, and expended much of his time in the search after the philosopher's stone. His researches were not altogether valueless, for he made some useful discoveries; amongst others, that of Glauber's salts, or sulphate of soda, a neutral purgative. His works are in one volume, an English translation of which was published in 1689. D. at Amsterdam, 1668.

GLAUCE, *glaw'-se*, the wife of Actæus, daughter of Cychræus.—A daughter of Creon, who married Jason.

GLAUCHAU, *glow'-chou*, a town of Saxony, on the Mulde, 54 miles from Dresden. It is well built, and contains a large castle. *Manf.* Woollen and linen cloths, leather; and there are some print-fields and dye-works. *Pop.* 11,000.

GLAUCUS, *glaw'-kus*, a son of Hippolochus, the son of Bellerophon. He assisted Priam in the Trojan war, and had the simplicity to exchange his golden suit of armour with Diomedes for an iron one; whence came the proverb of *Glauci et Diomedis permutatio*, to express a foolish purchase. He behaved with much courage, and was killed by Ajax.—A fisherman of Anthedon, in Bœotia, son of Neptune and Nais, or according to others, of Polybius, the son of Mercury. As he was fishing, he observed that all the fishes which he laid on the grass received fresh vigour as they touched the ground, and immediately made their escape by leaping into the sea. Having touched the grass himself, he instantly desired to inhabit the sea, and accordingly leaped into it, and was made a sea deity by Oceanus and Tethys, at the request of the gods. After this transformation, he became enamoured of the Nereid Scylla, whose ingratitude was severely punished by Circe. He is represented with a long beard, dishevelled hair, and shaggy eyebrows, and with the tail of a fish.—A son of Sisyphus, king of Corinth, by Merope, the daughter of Atlas, born at Potnia, a village of Bœotia. Having a desire to make his mares swifter than others in such a manner as to irritate Venus, that goddess inspired them with such fury that they tore his body to pieces as he returned from the games which Adrastus had celebrated in honour of his father. He was buried near Potnia.—A son of Minos II. and Pasiphae, who was smothered in a cask of honey, and miraculously brought to life by means of an herb, which had previously been seen by a soothsayer, named Polyidus, to re-animate a serpent.—A son of Epytus, who succeeded his father on the throne of Messenia, about ten centuries before the Augustan age. He introduced the worship of Jupiter among the Dorians, and was the first who offered sacrifices to Machaon, the son of Æsculapius.

GLEIWITZ, *gli-itz*, a town of Prussian Silesia, on the Klodnitz, 42 miles from Oppeln. Working in the royal iron-foundries forms the principal occupation of its inhabitants. *Pop.* 9,000.

GLEN, *glen*, the name of two rivers in England. 1. In Northumberland, rising in the Cheviot hills, and joining the Till at Fenton.—2. In Lincolnshire, taking its rise among the fens, and entering Fosdyke Wash.

GLENCOE, *glen'-ko*, a valley in Argyleshire, Scotland, noted for the military execution of its unsuspecting inhabitants, the Macdonalds, by a party of English soldiers, in 1692, in consequence of an order, signed by William III. in council, for that purpose, and contrary to the faith of a royal proclamation. Many of the inhabitants had been in arms for the abdicated James II. Its bed is swept by Ossian's "Dark torrent of Cona." There is but one solitary farmhouse within a distance of 10 miles; and no portion of the Highlands presents a scene of such gloomy, silent grandeur.

GLENDALAGH, *glen'-da-la*, 'the seven churches,' a beautiful valley in Wicklow, Leinster, 5 miles from Rathdrum. It is nearly surrounded by inaccessible mountains, and contains two lakes and extensive ruins of the city of Glendalagh, which was formerly a bishopric, with an episcopal jurisdiction, extending to the walls of Dublin.—There are several other places in Ireland prefixed with the word GLEN, but of which there is nothing remarkable to record.

GLENDERMOT, or CLONDERMOT, *glen'-der-mot*, a parish of Ireland, in Ulster, and lying partly within the bounds of the town of Londonderry. *Pop.* 10,000.

GLENDOWER, or GLENDWR, Owen, *glen'-door*, a celebrated Welshman, lineally descended from Llewellyn, the last prince of Wales. For 14 years he opposed Henry IV., declaring him a usurper of the English throne. B. 1350; D. 1415.—In the opening scene of the third act of the First Part of Shakspeare's "Henry IV." occurs an interesting interview between Hotspur and this fiery Welshman, who there describes himself as

> "Not in the roll of common men;"

and further tells us that—

> "Three times hath Henry Bolingbroke made head
> Against my power; thrice from the banks of Wye,
> And sandy-bottom'd Severn have I sent him
> Bootless home and weather-beaten back."

GLENELG RIVER, *gle-nelg'*, a stream of considerable size in Victoria, South Australia. It enters the Southern Ocean near *lat.* 30° S., *lon.* 141° E.

GLENFINNAN, *glen-fin'-nan*, a valley of Scotland,

through which runs the river Finnan, from which it takes its name.

GLENLIVET, *glen-liv'-et*, a valley of Banffshire, in Scotland, noted for its whisky. It lies 20 miles from Huntly, and contains lead and iron ore.

GLENROY, *glen'-roi*, a valley of Scotland, in Inverness-shire, Lochaber. It is famous for its "parallel roads," supposed to have been the shores of a former lake which had several distinct epochs of subsidence.

GLENSHEE, SPITAL OF, *glen'-she*, a noted pass into the Grampian mountains, in Scotland, 20 miles from Cupar-Angus, and S. of the point where the counties of Perth, Angus, and Aberdeen meet.

GLENSHIEL, *glen'-sheel*, a parish of Ross-shire, Scotland, where, in 1719, the Jacobites were defeated. *Pop.* 500.—There are several other places in Scotland to which is attached the prefix GLEN, but of which there is nothing remarkable to record.

GLOCKNER (Gross), *glok'-ner*, a mountain of Austria, in the Tyrol, and the highest point of the Noric Alps. *Height*, 12,420 feet above the level of the sea.

GLOGAU, *glo'-gou*, a strongly-fortified town of Silesia, the capital of a circle, standing on the left bank of the Oder, 60 miles from Breslau. Its chief edifices are the garrison church, the Lutheran church and school, the synagogue, two hospitals, and a Catholic academy. On an island formed by the Oder, and separately fortified, is the cathedral. *Manf.* Sugar, beetroot, tobacco, straw hats, cotton and woollen fabrics. *Pop.* 16,000, garrison inclusive.—The Circle is a flat, watered by the Oder and several small streams. *Area*, 276 geographical square miles. *Desc.* Fertile in corn, and rearing many cattle. *Pop.* 73,000.

GLOMMEN, *glom'-men*, the principal river of Norway, rising in the Dovrefield tableland, and, after a course of 270 miles, falling into the Cattegat at Frederickstadt.

GLOSSOP, *glos'-sop*, a parish of England, in Derbyshire, 14 miles from Manchester. *Manf.* Cotton, of which it is the principal seat in Derbyshire. It has, besides, woollen-mills, dyeing, bleaching, paper-works, and iron-foundries. *Pop.* 30,000.

GLOUCESTERSHIRE, *glos'-ter-sheer*, one of the western counties of England, situate along the vale of the Severn, bounded on the N.W. and N.E. by the counties of Hereford, Worcester, and Warwick; on the E. by Oxfordshire; on the S. by Berks, Somerset, and Wilts; and on the W. by the estuary of the Severn. *Area*, 1,268 square miles. *Desc.* The county is diversified by hill, vale, and forest. The Severn and the Avon mark out an extensive vale of the richest soil, the most genial climate, and every way adapted to the raising of corn and fruit, and the grazing of cattle. This district is divided into Upper and Lower, or the vales of Gloucester and Berkeley. On the west of the Severn, and entirely detached by it from the rest of the county, rises to some elevation, a district occupied principally with the Forest of Dean; while on the east of the Severn, and parallel with it to the distance of 6 to 10 miles, runs through the whole of the county, from Bath, on the Lower, nearly to Eversham, on the Upper Avon, the range of the Cotswold Hills, chiefly devoted to the pasture of sheep. *Rivers.* The Severn, Wye, Isis, and Upper and Lower Avon. *Pro.* The vale of Berkeley is chiefly devoted to the produce of the dairy and the rearing of cattle. In the vale of Gloucester a good deal of corn is raised. Here all the Gloucester cheese is produced, with excellent butter; and, in the vale of Berkeley, all the double Gloucester or double Berkeley, which is much superior in quality. The produce of the orchard forms also a capital object with the vale farmers; great quantities of cider and of perry are made annually, and this manufacture extends into the other districts. *Minerals.* Coal, iron, and limestone are the principal. The coal supplies the immense consumption of the Bristol manufactories, and even Bath in some degree. There are, besides, blue clay-stone, freestone of excellent quality, with stone tiles, on the Cotswold Hills, and paving-stones and grits in the forest. The mineral waters of Cheltenham and of Clifton have been long noted. *Manf.* Tin-plate, edge-tools, brass wire, wire cards, pins, and nails; but the most important are those of superfine broad-cloths, of Spanish wool, thin worsted stuffs and carpets at Cirencester, stockings at Tewkesbury, rugs and blankets at Dursley, cotton at Stroud, and felt hats in some of the villages. One navigable canal connects, by means of the tunnel of Sapperton, the navigation of the Severn with that of the Thames. There are other canals in the county, which is by railway connected with Birmingham, Forest of Dean, and London. *Pop.* 459,000.

GLOUCESTER, or GLOSTER, the capital of the above county, stands on the Severn, about 30 miles above its junction with the Bristol Channel, and 8 miles from Cheltenham. The Severn here divides itself into two branches, and forms the island of Alney, which is connected with both sides of the river by two bridges. The city consists chiefly of four spacious streets, meeting each other in the centre. The public buildings are handsome; but the chief object of interest is the cathedral of St. Peter, originally one of the finest Benedictine abbeys in the kingdom. It is remarkable for combining, in itself, the architecture of successive ages, the Norman and Saxon, with some of the finest examples of the Gothic or English. It is the place where a triennial musical festival is held alternately with Hereford and Worcester. There are several handsome parish churches, meeting-houses, and a synagogue; schools, hospitals, commodious market-houses, a custom-house, a theatre, a county gaol, built on the site of the ancient castle, and a shire-hall; a house of industry, a county infirmary, and a pump-room over a spa. *Manf.* Pins, cutlery, and soap. It has a considerable trade in timber, by the Berkeley canal through Bristol. The town is the see of a bishop. *Pop.* 18,000.—During some restorations effected in 1859, in the chapter-house at Gloucester, discoveries were made possessing considerable antiquarian interest. Leland states that several persons of great eminence were buried in the chapter-house, and mentions the names of six persons painted in black letter on the walls. Leland died in 1552, and, in 1859, judicious and careful restoration not only confirmed the truth of his statements, but even added to their importance. On the north wall, in one of the niches, by the removal of the calcareous crust, there can now be traced, though very faintly, the following inscriptions:—"Hic jacet Rogerus Comes de Hereford." On the south wall, in a panel or niche, "Hic jacet Barnardus de Novo Mercato. Hic jacet Paganus de Caducis." In the adjoining panel, "Hic jacet Robart Cortus. Hic jacet Adam de Caducis." Of these inscriptions only three are to be found in the old record; but additional ones contain the most interesting name of all—we mean that of Robart Cortus, most likely a contraction for Robert Curthose, or Robert, duke of Normandy, son of William the Conqueror. Tradition is uncertain as to his place of burial. His effigy, in Irish oak, however, used to stand before the high altar; and, taking the authority of Leland as correlative testimony, we may reasonably infer that Robert, duke of Normandy, was interred in the chapter-house of Gloucester cathedral.

GLOUCESTER, the name of two counties in the United States. 1. In New Jersey. *Area*, 287 square miles. *Pop.* 17,000.—2. In Virginia. *Area*, 243 square miles. *Pop.* 12,000.—It is also the name of several townships with populations varying between 2,000 and 15,000.

GLOUCESTER, Robert of, the oldest of our English poets. Camden quotes many of his old English rhymes, and speaks highly of him. Lived in the 12th century.

GLOVER, Richard, *gluv'-er*, an English poet, educated at Cheam school, where, at 16, he wrote some verses to the memory of Sir Isaac Newton, prefixed to Dr. Pemberton's view of that great man's philosophy. On leaving school, he entered the mercantile house of his father, who was engaged in the Hamburg trade. In 1737 he married a lady of fortune, and the same year published his "Leonidas," an epic poem. The whole plan and purpose of this effusion was to display the superiority of freedom over slavery, and how greatly preferable is the practice of virtue, and the evidence of public spirit, and the love of liberty, over riches and luxury. It acquired, in its day, extraordinary popularity. His poem of "London, or the Progress of Commerce," appeared in 1739. The same year he published his popular ballad, entitled "Hosier's Ghost," intended to rouse the national spirit against the Spaniards. About this time he distinguished himself

as a city politician, in taking the lead of the oppositions at elections. His credit was so great, that he was appointed to manage an application to parliament in behalf of the London merchants, and his speech, at the bar of the House of Commons, was printed. In 1753 was acted, at Drury-lane, his tragedy of "Boadicea," which had but indifferent success, although it ran for nine nights. His next tragedy, "Medea," in 1761, was better received, although it was written on the Greek model, and therefore not suited for modern representation. The same year he was elected a member parliament for Weymouth. B. in London, 1712; D. 1785.—Another epic of his, entitled the "Athenaid," was published in 1788, in 3 vols. 12mo, and is a continuation of "Leonidas," with which it ought always to be accompanied. Glover wrote also "Jason," a tragedy, and several other things, which have long ago passed into oblivion.

GLUCHOV, *gloo'-chof*, a town of European Russia, government of Tchernigov, on the Jesmen, 40 miles from Novgorod Sieverskoi. *Lat.* 51° 40′ 30″ N. *Lon.* 34° 20′ 15″ E. *Pop.* 8,000. This was formerly the residence of the Cossack hetman and the governors of Little Russia.

GLUCK, Christopher, *glook*, an eminent musician, who, after studying in Italy, visited England, and composed for the opera-house. He next went to Vienna, where he acquired great eminence; in 1774 he went to Paris, and his pieces were performed with such applause that he obtained a pension. His principal operas are, "The Fall of the Giants," "Orfeo," "Alceste," "Iphigénie en Aulide," "Echo et Narcisse," and "Armide." B. on the borders of Bohemia, in the Upper Palatinate, 1714; D. at Vienna, 1787. Besides his operas, he wrote "Letters on Music."

GLUCKSTADT, *glook'-stat*, a town of Denmark, in the duchy of Holstein, on the Elbe, 28 miles from Hamburg. It is a regular and well-built place, with a harbour, a magazine, an arsenal, a foundry, a house of correction, a workhouse, and a navigation-school. Since 1830 it has been made a free port. *Pop.* 6,500. It is in communication by railway with Altona, Kiel, and Rendsburg.

GLYCERA, *glis'-e-ra*, a beautiful woman, celebrated by Horace.—A courtesan of Sicyon, so skilful in making garlands, that some attributed to her the invention of them.

GLYN, *glin*, a county of the United States, in Georgia. *Area*, 625 square miles. *Pop.* 5,000.

GMELIN, John George, *me'-lin*, a German botanist and physician, who became member of the academy at Petersburg, and was employed by the Russian government to explore, with others, the boundaries of Siberia. The result of his labours was his "Flora Siberica, seu Historia Plantarum Siberiæ," 4 vols. 4to. B. at Tubingen, 1709; D. 1755.

GMELIN, Samuel Gottlieb, nephew of the preceding, took his degree in medicine at his native place, and, after travelling in France and Holland, went to Petersburg. The empress of Russia appointed him to travel in Astrakan, in 1768. He next explored the coast of the Caspian Sea; but, on his journey to Russia, was seized by the Tartars, and died in confinement in 1774. B. at Tubingen, 1743. He wrote, "Historia Fucorum;" "Travels through Russia."

GMELIN, John Frederick, an eminent physician and chemist, who became professor of chemistry and natural history at Gottingen. He published numerous pieces on the Materia Medica, chemistry, mineralogy, and every part of natural history. One of the most celebrated is his edition of the "Systema Naturæ" of Linnæus. He was also the author of a "History of Chemistry;" and the world is indebted to him for the discovery of several excellent dyes from mineral and vegetable substances. B. at Tubingen, 1748; D. at Gottingen, in 1805.

GMUND, *gmoond*, the name of several towns in Germany, with populations varying between 160 and 7,000.

GMUNDEN, *gmoon'-den*, a town of Upper Austria, in the circle of Traun, situate among the finest scenery in Austria. It stands on the Lake of Traun, 7 miles from Linz. *Pop.* 3,500.

GNESEN, *gne'-sen*, a town of Prussia, in the government of Bromberg, 30 miles from Posen. It contains eleven churches, several convents, with a theological seminary, and is the see of the archbishop-primate of Prussian Poland. *Pop.* 7,500.

GNOSSIS, and GNOSSIA, *nos'-sis*, an epithet given to Ariadne, because she lived, or was born, at Gnossus. The crown which she received from Bacchus, and which was made a constellation, is called *Gnossia stella*.

GOA, *go'-a*, a district of India, belonging to the Portuguese. It lies in the province of Bejapoor, on the western coast. *Area*, 1,100 square miles. *Desc.* Fertile. *Pro.* Pepper, rice, betel-nuts, cocoa-nuts, and salt. *Pop.* 315,000, of whom two-thirds are Roman Catholics. *Lat.* between 14° 54′ and 15° 45′ N. *Lon.* between 73° 45′ and 74° 26′ E.

GOA, a maritime city of India, and formerly the capital of the Portuguese settlements in that country. It is situate on an island of about 24 miles in circumference, at the mouth of the Mandova river. It, in fact, consists of two cities,—Old Goa and New Goa. The former, however, is now nearly deserted, but it still contains many magnificent churches and excellent specimens of architecture. The viceroy and principal inhabitants reside in the new city, or Panjim, which is at the mouth of the river, within the forts. It possesses two harbours, well defended by various castles and batteries, mounting very heavy cannon. It still carries on an inconsiderable trade with the mother country, with China, and the coast of Africa; but it is fast falling to decay. *Pop.* Unascertained. *Lat.* 15° 30′ N. *Lon.* 73° 57′ E.

GOALPARA, *go-al-pa'-ra*, a district of British India, in the presidency of Bengal. *Area*, 3,500 square miles. *Desc.* Fertile, and producing cotton, sugar, tobacco, and mustard. *Pop.* 400,000. *Lat.* between 25° 40′ and 26° 31′ N. *Lon.* between 89° 42′ and 91° 8′ S.

GOAR, ST., a fortified town of Germany, in the circle of Upper Rhine, 15 miles from Coblentz. It is seated on the W. bank of the Rhine, under the stupendous rock and castle of Rheinfels, with which it surrendered to the French in 1794. On the opposite side of the river is the small town of St. Goarshausen, and on a mountain near it, is the strong castle called Katz. St. Goar has a considerable trade in wines and hides. *Pop.* 1,500.

GOAT ISLAND, *gote*, occupies the centre of the falls of Niagara, in N. America. *Ext.* about 80 acres, connected by a bridge with the U.S. side of the country.—Another desolate island in the Pacific Ocean, about 4 miles from Juan Fernandez.—Also a small island in the Eastern Archipelago.

GODAIN, *go'-bā*, a town of France, in the department of the Aisne, 10 miles from Laon. It has a large looking-glass manufactory. *Pop.* 1,500.

GOBELIN, Gilles, *gobe'-lī*, a French dyer, who is famous for having invented the fine scarlet which goes by his name. He resided in the faubourg of St. Marcel, in Paris, where his house still bears his name. Lived in the 16th century.

GOBI, or COBI, *go'-be*, a range of country in Central Asia, comprising a large part of Chinese Turkestan and Mongolia. *Ext.* 1,300 miles long, with a varying breadth of from 400 to 800 miles. *Desc.* Mostly a sandy desert, bounded by rocks, and interspersed by a few oases. *Lat.* between 40° and 50° N. *Lon.* between 90° and 120° E.

GOBRYAS, *go'-bre-as*, a Persian, one of the seven noblemen who conspired against the usurper Smerdis.

GODALMING, *god'-al-ming*, a town of Surrey, on the Wey, here crossed by a bridge 5 miles from Guildford. *Manf.* Fleecy hosiery, blankets, worsteds, cotton cloths, stockings, gloves; with a trade in hops, coals, timber, and bark. *Pop.* 5,000.

GODAVERY, *go-da'-ve-re*, a river of India, which rises on the eastern side of the Western Ghauts, about 70 miles to the north-east of Bombay. On reaching Rajamundry, in the Northern Circars, it divides into two main branches, the left falling into the Bay of Bengal, in *lat.* 16° 48′ N., *lon.* 82° 23′ E., and the right into the bay, in *lat.* 16° 18′ N., *lon.* 81° 46′ E.—In 1846 the directors of the East-India Company sanctioned the forming of a dam to command the delta of the river for the purpose of irrigation. *Length*, about 900 miles.

GODDARD, Jonathan, *god'-dard*, an English physician and chemist, who was educated at Oxford, but took

his degrees in physic at Cambridge. He was one of the first members of the society afterwards called the Royal, fellow of the College of Physicians, and physician to Cromwell, by whom he was appointed warden of Merton College, Oxford. At the Restoration he lost that situation, on which he removed to Gresham College, of which he was medical professor. Bishop Ward says he was the first Englishman who made a telescope. B. at Greenwich, 1617; D. 1674.—He wrote on the abuses of the apothecaries, and several papers in the "Philosophical Transactions."

GODEFROI, Denys, *god'-frwaw*, an eminent jurist, and a counsellor in the parliament of Paris. Being a Protestant, he was obliged to quit France, on which he settled first at Geneva, and afterwards at Strasburg, where he died in 1622. B. 1549. His works are, "Corpus Juris civilis, cum Notis," 4to; "Notæ in IV. Libris Institutionum," "Opuscula Varia Juris," &c.—His eldest son, THEODORE, became a Catholic, and counsellor of state in France. D. at Strasburg, in 1642. He wrote on the genealogical history of France.—JAMES, another son of Denys, adhered to the religion of his father, and became professor of law at Geneva, and a member of the council. D. 1659. He wrote several learned works, and edited Cicero and other ancient authors.—DENYS, son of Theodore, wrote "Mémoires et Instructions pour servir dans les Négotiations des Affaires concernant les Droits du Roi," folio. D. 1681.—JOHN, son of the last-mentioned, D. in 1732. He edited Philip de Commines's Memoirs, 5 vols. 8vo; and wrote the Memoirs of Queen Margaret, &c.

GODFREY, Sir Edmundbury, *god'-fre*, a magistrate, who was active in the discovery of the popish plot in 1678, and was made remarkable by the manner of his death. His body was found pierced by his own sword, and with many marks of violence; on which account his death was imputed to the papists, and his funeral was performed with great pomp. Lived in the 17th century.

GODFREY OF BOUILLON. (*See* BOUILLON, GODFREY DE.)

GODIVA, *go-di'-va*, a lady celebrated for an uncommon instance of generosity, the wife of Leofric, earl of Mercia. (*See* COVENTRY.)

GODMANCHESTER, *gum'-ces-ter*, a large village of England, parted from Huntingdon by the river Ouse. It is seated in a rich and fertile soil, which yields great plenty of corn. When James I. came through it from Scotland, the inhabitants met him with seventy new ploughs, drawn by as many teams of horses; for they held their land by that tenure. It has a school, called the free grammar-school of Queen Elizabeth. *Pop.* 2,300.

GODOLPHIN, Sidney, *go-dol'-phin*, a poet, born of an ancient family in Cornwall, was educated at Exeter College, Oxford. In 1640 he was elected member of parliament for Helston, where he took the part of the earl of Strafford. He afterwards joined the king's army, but was slain in an action with the rebels at Chagford, in Derbyshire, in 1643. B. 1610. He wrote several poems, and translated "The Passion of Dido for Æneas," from Virgil, printed in 1658, 8vo. He was very intimate with Hobbes, who, in his "Leviathan," thus speaks of him: "I have known clearness of judgment and largeness of fancy, strength of reason and graceful elocution, a courage for the war and a fear for the laws, and all eminently in one man, and that was my most noble and honoured friend, Mr. Sidney Godolphin." Lord Clarendon says, that, great as this eulogy is, it was deserved.—

> "Thou'rt dead, Godolphin, who lov'dst reason true,
> Justice and peace;—soldier beloved, adieu!"

GODSTONE, *god'-stone*, a parish of Surrey, 27 miles from London by the S.E. Railway, on which it has a station. *Pop.* 1,700.—It has valuable sandstone-quarries.

GODTHAAB, *god'-thobe*, a village of S. Greenland, in Davis Strait. *Pop.* of the district, 800.—The first Danish colony in Greenland was established here in 1721.

GODWIN, William, *god'-win*, was the son of a dissenting minister, and was himself educated in a dissenting college, and in 1778 became minister of a congregation in London; but soon afterwards took charge of a meeting-house at Stowmarket, Suffolk. In 1783 he determined to quit the ministry, and, in order to pursue literature as a profession, he removed to London as a permanent residence. His first work appeared in 1793, and was entitled "Political Justice," which brought to its author much public notoriety and £700. "Whatever may be its mistakes," says Sir James Mackintosh, in noticing the work in the "Edinburgh Review," "it is certain that works in which errors equally dangerous are maintained with far less ingenuity, have obtained for their authors a conspicuous place in the philosophical history of the 18th century." In the following year appeared his novel of "Caleb Williams," which, whatever may be its merits as a novel, has certainly a political tendency: "a general review of the modes of domestic despotism, by which man becomes the destroyer of man." For this production he received only £84, although there is hardly another fiction in the English language so intensely interesting. His next work worthy of notice was his "St. Leon," which appeared in 1799, and for the copyright of which he received 400 guineas. It is a supernatural tale, and has none of the merits of his "Caleb Williams;" unless it be where he describes Bethlem Gabor. In 1801 he produced "Antonio; or, the Soldier's Return," a tragedy, which Serjeant Talfourd pronounced "a miracle of dulness," a judgment which was amply proved at its representation; for it was hooted from the stage in the presence of its unhappy author. He next published a "Life of Chaucer," which can claim no pretensions to merit of any kind, except it be the dreariness of prolixity, if such be merit. In 1805 appeared his "Fleetwood; or, the New Man of Feeling," which, in 1807, was succeeded by his "Faulkner; a Tragedy." This met a similar fate to that which befell his "Antonio." Several other works continued to flow from the prolific pen of Godwin; such as his "Essay on Sepulchres," a "Life of Chatham," the "Lives of the Nephews of John Milton," and one or two others of a passing kind, till 1817, when his novel of "Mandeville" appeared. This effort was generally pronounced inferior to his former productions in the same path. In 1820 his "Essay on Population" was brought out, in answer to the theory propounded by Malthus, and this, in 1824, was succeeded by his "History of the Commonwealth of England," &c., which was well received. In 1830, when 74 years old, he produced his novel of "Cloudesley;" in 1831 his "Thoughts on Man;" and in 1834 his last work, the "Lives of the Necromancers." He had now filled up the measure of his existence, and laid down his pen to look around him and to die. B. at Wisbeach, Cambridgeshire, 1756; D. 1836.—Godwin married Mary Woolstoncraft, who wrote "Thoughts on the Education of Daughters," a "Moral and Historical View of the French Revolution," and several other works, which enjoyed considerable popularity in their day. Her character, however, is pronounced by the "Gentleman's Magazine" to have been "grossly irreligious, indelicate, and dissolute." She was the mother of the future wife of Percy Bysse Shelley, the poet. B. either in Norfolk or Yorkshire, 1759; D. 1797.

GODWIN, a powerful Saxon lord and earl of Kent, who, in 1017, accompanied Canute in an expedition against Sweden, where he behaved with such valour as to receive the daughter of that monarch in marriage, and large grants of land. On the death of Canute, he sided with Hardicanute against Harold, but afterwards espoused the cause of the latter. He was charged with murdering Alfred, one of the sons of Ethelred II., from which he vindicated himself by oath. On the death of Hardicanute, he joined Edward, who married his daughter; but afterwards he rebelled against his sovereign, and being unsuccessful, fled to Flanders. Having gathered fresh forces, he sailed up the Thames, and appeared before London, which threw the country into such confusion, that the king was obliged to negotiate peace with Godwin, who was restored to his estates. D. suddenly, while dining with the king at Winchester, in 1053.

GODWIN, Mary Woolstoncraft. (*See* GODWIN, William.)

GODWIN or GOODWIN SANDS lie off the coast of Kent, between the N. and S. Foreland. They run parallel with the coast for 9 miles. the roadstead

termed the Downs lying between them and the mainland. These sands occupy a space that was formerly a large tract of ground belonging to Godwin, earl of Kent, father of King Harold. It afterwards was given to the monastery of St. Augustine, at Canterbury; but the abbot, neglecting to keep in repair the wall that defended it from the sea, the whole tract was submerged in the year 1100, leaving these sands, upon which many ships have been wrecked.

GOES, *goos*, a town of the Netherlands, in the island of South Beveland, with a harbour, on the Scheldt, 10 miles from Flushing. It has shipbuilding-docks, and an active trade in salt, hops, and corn. *Pop.* 5,500.

GÖTA-ELF, or GOTHA, *ge(r)-ta-elf*, a river of Sweden, rising in Lake Werner, and, after a course of 50 miles, entering the Cattegat. Near its origin are the falls of Trolhætta, to avoid which the canal of that name was cut.

GOETHE. (*See* GÖTHE.)

GOG, *gog*, a symbolical name of certain enemies of the people of God.

GOGMAGOG HILLS, *gog'-ma-gog*, are situate 3 miles from Cambridge. On their topmost summit are the remains of an ancient camp, with a triple intrenchment.

GOGUET, Anthony-Yves, *go'-goo-ai*, a French author, who wrote "Origines des Loix, des Arts, des Sciences, et de leur Progrès chez les Anciens Peuples," 3 vols. 4to, which has been translated into English. B. at Paris, 1716; D. 1758.

GOHILWAR, *go-hil-war'*, a district of India, in the province of Guzerat. It is tributary to Britain, and is within the jurisdiction of the British district of Ahmedabad. *Desc.* Fertile, and yielding most of the grains and fruits of India. *Pop.* 248,000. *Lat.* between 20° 50′ and 22° N. *Lon.* between 71° 12′ and 72° 11′ E.

GOHUD, *go-hood'*, a town of India, in the territory of Gwalior, 55 miles from Agra. It is inclosed by walls, and has a citadel with lofty towers. *Pop.* Unascertained.

GOIL, LOCH, *goil*, a branch of Loch Long, in Argyleshire, Scotland, running for 4 miles N. to Lochgoilhead.

GOJAM, *go-jam'*, a province of Abyssinia, lying to the S. of Lake Tsana. *Desc.* In some parts mountainous, and in others diversified by hill and dale, covered with grass and watered by affluents of the Abai. *Pop.* Unascertained, but small. *Lat.* 10° to 11° N. *Lon.* 37° to 38° E.

GOLBORNE, *gol'-born*, a township of England, in Lancashire, 2 miles from Newton. *Pop.* 2,000.—It is a station on the London and North-Western Railway.

GOLCAR, *gol'-kar*, a township in the West Riding of Yorkshire, 3 miles from Huddersfield. *Pop.* 4,500.

GOLCONDAH, *gol-kon'-da*, a town of Hindostan, strongly fortified both by nature and art, standing on a hill, 3 miles from Hyderabad. It was once noted for its diamonds. The black merchants usually buy parcels of ground, in which they search for these precious stones. They sometimes fail in meeting with any, and at others they find immense riches. There are also mines of salt and fine iron, and manufactures of curious calicoes and chintzes; but the city is now in a partially ruinous state. *Pop.* Unascertained.

GOLDAU, *gol'-do*, a village of Switzerland, 6 miles from Schwytz. It is at the foot of the Rossberg mountain, a landslip from which, in 1806, buried the former village of the same name, with several other villages.

GOLDBERG, *gold'-bairg*, the name of two towns in Germany.—1. In Prussian Silesia, on an affluent of the Oder, 12 miles from Leignitz. *Manf.* Woollens, gloves, and hosiery. *Pop.* 7,500.—Near this place, in 1813, the French were defeated by the Prussians.—2. In Mecklenburg-Schwerin, on the Lake of Goldberg, with baths in high reputation. *Pop.* 3,000.

GOLD COAST, a maritime country of Guinea, in Western Africa, stretching along the coast from the river Volta on the E. to Cape Lahu on the W., and bounded on the N. by Ashantee, where the Europeans have several forts and settlements. It includes several districts, in which are two or three towns or villages, lying on the seashore. The negro inhabitants are generally very rich, as they carry on a great trade with the Europeans in gold; and many of them are employed in fishing and cultivating rice, which grows in incredible quantities. This they exchange for maize, yams, potatoes, and palm oil. This country was discovered by the Portuguese, who, at Fort Elmina, founded a settlement, in 1482. The English established themselves in it in 1664, and the Danish settlements in it were ceded to England in 1850.

GOLDONI, Charles, *gol-do'-ne*, an Italian writer, who, at an early age, discovered a propensity to the drama, when his father caused a theatre to be built for him in his house. The Italian stage was reformed by him; and his comedies, which are numerous, are exceedingly humorous and natural. About 1761 he went to Paris, and became composer to the Italian theatre, besides which he had an appointment at court. B. at Venice, 1707; D. 1792.—His works were printed at Leghorn, in 31 vols. 8vo.

GOLDSMITH, Oliver, *gold'-smith*, one of the most distinguished ornaments of English literature, was the son of a clergyman of the established church, who held the living of Kilkenny West, in Ireland. Oliver, at an early age, was consigned to the charge of the village schoolmaster, one Thomas Byrne, a retired quartermaster of an Irish regiment, whose peculiarities are commemorated in the poem of "The Deserted Village," and form one of the finest poetical portraitures in the language. Subsequently, he was sent to Trinity College, Dublin, and thence to Edinburgh, to study physic. Here he entered into all the convivialities of the social inhabitants of that city; but, having become security for the debt of a fellow-student, he was obliged to escape to England; but was arrested at Sunderland, and released by two college friends whom he there accidentally met. He was next sent to Leyden, in Holland, through the generosity of an uncle, Contarine, whose exhaustless goodness and kindheartedness to the wayward and thoughtless Oliver do honour to his species. Leaving Leyden, poor but adventurous, Goldsmith, in February, 1755, set out to travel over Europe on foot. On this occasion, and for this enterprise, he was furnished exactly with "one guinea in his pocket, a shirt on his back, and a flute in his hand." He partly "disputed his way," by accepting university challenges; and when weary of this, he betook himself to his flute; and "whenever I approached a peasant's house towards nightfall," he beautifully says, "I played one of my most merry tunes, and that procured me not only a lodging, but subsistence for the next day." The remembrance of the festive joy which his merry pipe produced at such times is finely recalled in his poem of "The Traveller." At Louvain he took the degree of bachelor of physic, the highest degree he ever attained. He returned to England in 1756. Being reduced to a low state, he became usher in a school at Peckham, where, however, he did not remain long, but settled in London, and subsisted by writing for periodical publications. One of his first performances was an "Inquiry into the State of Polite Learning in Europe." He next commenced a weekly periodical called "The Bee," but it failed; when, in 1760, he contributed to the "Public Ledger" of Mr. Newberry, his celebrated "Chinese Letters." He, at the same time, became a contributor to various other publications; but he emerged from obscurity in 1764, by the publication of his poem entitled "The Traveller; or, a Prospect of Society;" of which Dr. Johnson said "that there had not been so fine a poem since Pope's time." The year following appeared his beautiful novel of "The Vicar of Wakefield." His circumstances were now respectable, and he took chambers in the Temple; but the liberality of his disposition, and a propensity to gaming, involved him in frequent difficulties. In 1768 he brought out his comedy of "The Good-Natured Man" at Covent Garden; but its reception was not equal to its merits. In 1770 he published "The Deserted Village," a poem which, in point of description and pathos, is beyond all praise. As a dramatic comic poet, he appeared to great advantage in the play of "She Stoops to Conquer; or, the Mistakes of a Night," which was produced in 1773, and which is still a favourite with the public. Besides these performances, he produced a number of others; as, a "History of England, in a Series of Letters from a Nobleman to his Son," 2 vols. 12mo. This useful and pleasing work was, for a long time, at-

tributed to Lord Lyttleton. "A History of England," 4 vols. 8vo; "A Roman History," 2 vols. 8vo; "A Grecian History," 2 vols.; "A History of the Earth and Animated Nature," 8 vols. 8vo; and other works, all bearing the impress of an original and truly gentle and beautiful genius. B. at Pallas, near Ballymahon, Ireland, 1728; D. in London, 1774; and was buried in the Temple churchyard. A monument was erected to his memory in Westminster Abbey, with a Latin epitaph by Dr. Johnson.

GOLGOTHA, *gol'-goth-a*, 'a heap of skulls,' a part of the hill of Calvary.

GOLIATH, *go-li'-a*, 'passage,' or 'discovery,' a giant of the Philistines, slain by David.

GOLIUS, James, *go'-le-oos*, a learned Orientalist, who was educated at Leyden, after which he went to France, and taught the Greek language at Rochelle. In 1622 he accompanied the Dutch ambassador to the emperor of Morocco, who was highly pleased with his conversation. After his return, he succeeded to the Arabic professorship. In 1625 he went to the Levant, and made excursions into Arabia, and, in 1629, returned to Leyden, where he was chosen professor of mathematics, which station he filled with great honour till his death, in 1667. B. at the Hague, 1596.—He published an Arabic Lexicon, a Persian Dictionary, the Saracen History of Elmacin, the Life of Tamerlane, the Astronomical Elements of Alfregan, &c.

GOLIUS, Peter, an elder brother of the preceding, was the author of several works, both in Greek and Latin, and founded a monastery of the Barefooted Carmelites on Mount Libanus. He was afterwards employed on a mission to the East Indies, and died at Surat, about 1673. B. at Leyden.—He had a considerable share in editing the grand Arabic Bible printed at Rome in 1671. He also translated some religious manuals into that language.

GOLNITZ, *golt'-nitz*, a town of Upper Hungary, in the county of Zips, 20 miles from Eperies. It is the seat of a mining council, and has large iron-foundries, and factories of wire and cutlery. *Pop.* 5,500.

GOLYDDAN, *go-lid'-dan*, the bard of Cadwallader, the last nominal king of the Britons. Flourished in the latter part of the 7th and beginning of the 8th century.

GOMAR, Francis, *go'-mar*, a zealous defender of the Calvinistic doctrines, who studied at both the English universities, and, in 1594, became professor of divinity at Leyden. When Arminius was chosen as his colleague, in 1603, a difference arose between them on the subjects of grace and predestination, and Gomar conducted himself in the controversy with great bitterness. In 1611 he resigned his professorship, and went to Middleburg, whence, in 1614, he removed to Saumur, and afterwards to Groningen. He distinguished himself by his ardour against the Arminians at the synod of Dort. His works are almost wholly polemical. B. at Bruges, 1563; D. at Groningen, 1641.

GOMBAULD, John Ogier de, *gom'-bolt*, a French poet, and one of the first members of the French Academy. His works are tragedies, pastorals, romances, sonnets, and epigrams. D. in 1666.

GOMBROON, called also BUNDER ABBAS, *gom-broon'*, a seaport-town of Persia, on a bay of the Gulf of Ormus. It is the port of Schiras, and of all the south of Persia, but is now greatly decayed. *Lat.* 27° 18′ N. *Lon.* 56° 12′ E.

GOMER, *go'-mer*, 'to finish,' or 'a consumer,' the eldest son of Japnet, whose descendants peopled Asia Minor and Europe.

GOMER, *go-'mair*, a town of Hungary, on the Sajo, capital of a county of the same name, 180 miles from Vienna. It has a trade in wine and tobacco. *Pop.* 1,000.—The COUNTY has an area of 1,700 miles, with a population of 161,000.

GOMERA, *go-mair'-a*, one of the Canaries, consisting properly of one high mountain, in winter covered with snow, 18 miles from Teneriffe. *Ext.* 12 miles long, by 9 broad. *Desc.* Fertile in the valleys, and producing corn, cotton, sugar, fruits, and wine. *Pop.* 12,000.

GOMERSALL, *gom'-er-sal*, a township of the West Riding of Yorkshire, 6 miles from Bradford. *Manf.* Principally woollen cloths. *Pop.* 10,000.

GOMORRAH, *go-mor'-rah*, 'a rebellious people,' a city of ancient Canaan, destroyed with Sodom, on account of the wickedness of its inhabitants.

GONAIVE, LA, *go-naiv'*, an island lying to the W. of Hayti, in the W. Indies, in the Bay of Leogane. *Ext.* 36 miles long, with an average breadth of 8.

GONDAR, *gon'-dar*, a city of Abyssinia, situate on a hill of considerable height, 30 miles from Lake Tezana. The houses are only of one story, built of clay, with the roofs thatched in the form of cones. *Pop.* Unascertained. *Lat.* 12° 30′ N. *Lon.* 37° 40′ E.

GONDEBAUD, or GUNDOBALD, *gon'-de-bo*, third king of Burgundy, who ascended the throne on the death of his brother Chilperic in 491. He ravaged Italy, and in 499 called a council at Lyons to reconcile the Catholics and Arians, but without success. Soon after this he was defeated by Clovis, king of the Franks, and his brother Godesil; but on becoming tributary to the former, he recovered his dominions. Gondebaud then put his brother to death. He afterwards reigned in peace, civilized his country, and introduced a system of laws still extant by the title of "La Loi Gourbette." D. in 516.

GONDWANA, *gond-wa'-na*, a wild tract of Southern India, covered with jungle, and inhabited by a wandering cruel race, who live in a state of nudity. *Lat.* between 19° 50′ and 24° 30′ N. *Lon.* between 77° 38′ and 87° 20′ E.

GONSALVA, Hernandez de Cordova, *gon-sal'-va*, surnamed the Great Captain, a Spanish commander, was descended of a noble family, and distinguished himself in the conquest of Granada, under Ferdinand and Isabella. Afterwards, he was sent to Naples, which he recovered almost entirely from the French. He next conquered Apulia and Calabria, and captured Taranto in 1501. Two years afterwards, he entered Naples in triumph, and, for his services, was made a constable of that kingdom and duke of Terranova. Ferdinand, however, being jealous of the Great Captain, recalled him, and banished him to his estate in Granada, where he died in 1515. B. 1443.

GONZAGA, *gon-za'-ga*, a town of Northern Italy, Lombardy, 14 miles from Mantua. *Manf.* Silk goods, and there is a large fair held for cattle and agricultural produce. *Pop.* 15,000.

GOOD HOPE. (*See* CAPE OF GOOD HOPE.)

GOODRICH, Samuel Grisnold, an American author. (*See* PARLEY, Peter.)

GOOLE, *gool*, a river-port town in the West Riding of Yorkshire, on the Ouse, 3 miles S. from Howden. It has docks for coasting and merchant vessels, and an active trade in coal. *Pop.* 3,000.

GOOMTY, or GOOMTEE, *goom-te'*, a river of Hindostan, rising in a morass, in *lat.* 28° 30′ N., *lon.* 80° 10′ E., and entering the Ganges 16 miles below Benares. There are so many of the dead thrown into it, that its waters may be accounted unfit for use, otherwise than for the purposes of navigation and irrigation. *Length*, 480 miles.

GOONASS PASS, *goo'-nas*, a pass in Bussahir, across the S. range of the Himalaya. *Height*, 16,000 feet above the level of the sea.

GOOSE ISLAND, *goose*, in the river St. Lawrence, 12 miles below the island of Orleans. Also a rocky islet in Bass Strait, Australia, on which a lighthouse is erected.

GOOTY, *goo'-te*, a strong fort and town of British India, in the presidency of Madras, 50 miles from Bellary. They stand on a mountain upwards of 2,000 feet above the level of the sea. *Pop.* Of civilians, 5,000.

GOPPINGEN, *gop'-ping-en*, a neat town of Wurtemberg, 28 miles from Ulm. *Manf.* Woollen stuffs, pottery-ware, and paper. *Pop.* 5,000.

GORBALS, *gor'-bals*, a parish of Scotland, and suburb of Glasgow, on the S. side of the Clyde. *Pop.* 61,000.

GORDIANUS, M. Antoninus Africanus, *gor-di-ai'-nus*, a son of Metius Marcellus, descended from Trajan, by his mother's side, was an example of piety and virtue. He composed a poem in thirty books, upon the virtues of Titus Antoninus and M. Aurelius. Having been promoted to the prætorship, and subsequently elected consul, he took the government of Africa in the capacity of pro-consul. After he had attained his 80th year, he was roused from a tranquil reign by the tyranny of

the Maximini, and was proclaimed emperor by the rebellious troops of his province. He long declined to accept the imperial purple, but the threats of immediate death forced his compliance. Maximinus marched against him with the greatest indignation; and Gordian sent his son, with whom he shared the imperial dignity, to oppose the enemy. Young Gordian was killed in battle the 25th of June, 236 A.D., and the father strangled himself at Carthage, before he had been six weeks at the head of the empire, 236 A.D. He was universally lamented by the army and people.—M. Antoninus Pius, grandson of the first Gordian, was but 12 years old when he was honoured with the title of Cæsar. He was proclaimed emperor in his 16th year, and his election was attended with universal approbation. In his 18th year he married Furia Sabina Tranquillina, daughter of Misitheus, a man celebrated for his eloquence and public virtues. Gordian conquered Sapor, king of Persia, who had invaded the Roman provinces, and took many flourishing cities in the East. In this success the senate decreed him a triumph, and saluted Misitheus, his father-in-law, as the guardian of the republic. Assassinated in the East, 244 A.D.

GORDIUS, *gor'-de-us*, a Phrygian, who, though originally a peasant, was raised to the throne, in consequence of an oracle having told the Phrygians to give the crown to the first man they met going to the temple of Jupiter, mounted on a chariot. The famous Gordian knot took its origin from this chariot. The knot which tied the yoke to the draught-tree was made in such an artful manner, that the ends of the cord could not be perceived. From this circumstance, a report was spread, that the empire of Asia was promised, by the oracle, to him who could untie the Gordian knot. Alexander, in his conquest of Asia, passed by Gordium, and as he wished to inspire his soldiers with courage, and make his enemies believe that he was born to conquer Asia, he cut the knot with his sword, and asserted that the oracle was then fulfilled, and that his claims to universal empire were fully justified.

GORDON, George, *gor'-don*, commonly called Lord George Gordon, was the son of Cosmo George, duke of Gordon. At an early age he entered the navy, but subsequently quitted it on account of some dispute with Lord Sandwich. He afterwards sat in parliament for Luggershall, and brought himself into notice by his opposition to the bill for granting further toleration to Roman Catholics. His intemperance on this occasion proved the cause of the riots in 1780, for which he was tried and acquitted. In 1786 he was excommunicated for not appearing as a witness in a cause. In 1788 he was found guilty of publishing a libel against the queen of France, on which he fled to Holland. A little after this he returned to England, and was taken in the disguise of a Jew, which profession he had adopted, and committed to Newgate, where he died in 1793. B. 1750.

GORDON, a county of Georgia, U.S. *Area*, 302 square miles. *Pop.* 6,000.

GORE, *gor*, a district of Upper Canada, in British N. America, bounded an the S. and W. by the districts London and Niagara, N. by York and Home, and E. by Lake Ontario. It is rich in minerals. *Pop.* 45,000.

GORE, Mrs. Catharine Grace, a distinguished English novelist, who, by her works, did more to familiarize the public mind with the tone of fashionable manners and conversation than any other writer of her day. Her novels and other works extend to upwards of 150 volumes. B. in Nottinghamshire, 1799.

GOREE, a town and small island, or rather rock, off the coast of Africa, little more than a mile from Cape Verd. It produces nothing, and its importance is solely derived from its inaccessible situation, on a naked rock of black basalt, rising to the height of 300 feet. *Pop.* 3,000, comprising 20 or 30 Europeans. *Lat.* 14° 36′ N. *Lon.* 17° 22′ W.—This island was first occupied by the Dutch, and afterwards was taken by the French, to whom it was finally ceded by the treaty of Nimeguen. It is now the bulwark of the possessions of the French in Africa. It is the entrepôt for all the French trade with the opposite coast of Africa.

GORGEI, Arthur, *gor'-ge*, a Hungarian, who, in 1837, entered the Hungarian life-guards, and, in 1842, was attached to the hussars of the Palatinate; but, in 1845, quitted the army and retired to his own estates, where he lived a quiet life, devoting himself principally to the study of the sciences. In 1848 he appeared as a volunteer in the field, in defence of his country against the Croatians and Sclavonians, and was invested with the rank of captain. His time was, at first, chiefly occupied in organizing the Hungarian forces; and, having been sent to operate in the neighbourhood of Pesth, on the Danube, he obtained full powers from the Hungarian prime-minister, Count Batthiany, to adjudicate upon cases of treason and other crimes in a court-martial. This power was first exercised upon Count Eugene Zichy, who had been found guilty of communicating with Jellachich, and upon whom the sentence of death was passed and carried into execution. Gorgei was subsequently called upon to act against General Roth, and was so far successful, as to cause that general to lay down his arms. For this Gorgei obtained the rank of colonel. Subsequently he was defeated at the battle of Schwechat, notwithstanding which, he was appointed by Kossuth as commander-in-chief of the Hungarian armies. Fortune, however, did not smile upon him in the field, and he was shortly afterwards superseded in the command, but had it again conferred upon him. He then won the battle of Nagy-sarlo, and relieved the garrison of Komorn. Hungary was now declared an independent state, with Kossuth for its governor, and Gorgei for its minister-at-war. He next took Buda, but was subsequently forced to retreat before General Haynau. He next rose to be dictator of Hungary; but disaster attended the arms of the patriots, and he received the pardon of the emperor of Austria, and retired to Klagenfurt. B. at Toporaz, 1818.

GORGIAS, Leontinus, *gor'-je-as*, a celebrated orator of the school of Empedocles, was a native of Leontinum, in Sicily. A golden statue was erected to his honour at Delphi. Plato has given his name to one of his dialogues. Lived 417 B.C.

GORGONA, *gor-go'-na*, a small island in the Mediterranean, 16 miles from the coast of Tuscany, near which large quantities of anchovies are taken. It is nothing more than a wooded rock. *Ext.* 2 miles long, by about the same breadth.—Other two islands off the coast of S. America.

GORGONES, *gor-go'-nees*, three celebrated sisters, daughters of Phorcys and Ceto. Their names were Stheno, Euryale, and Medusa, all immortal except Medusa. According to the mythologists, their hairs were entwined with serpents, their hands were brass, their body was covered with impenetrable scales, and their teeth were as long as the tusks of a wild boar. They were so frightful that they turned to stone all those on whom they fixed their eyes. Mythologists differ in their accounts of them. They were conquered by Perseus, who, it is said, was furnished, by different deities, with weapons which he afterwards returned to them. The head of Medusa remained in his hands; and after he had finished all his laborious expeditions, he gave it to Minerva, who placed it on her ægis, with which she turned into stone all such as fixed their eyes upon it. It is said, that, after the conquest of the Gorgons, Perseus took his flight in the air towards Ethiopia, and that the drops of blood which fell to the ground from Medusa's head, were changed into serpents, which have, ever since, infested the sandy deserts of Libya. The horse Pegasus also arose from the blood of Medusa, as well as Chrysaor with his golden sword. Hesiod fixed the residence of the Gorgons in the west, Æschylus in Scythia, and Ovid in Libya, near the lake Triton.

GORGOPHONE, *gor-gof'-o-ne*, a daughter of Perseus and Andromeda, who married Perieres, king of Messenia. After the death of Perieres, she married Œbalus. She is the first whom the mythologists mention as having had a second husband.

GORGOPHORA, *gor-gof'-o-ra*, a surname of Minerva, from her ægis, on which was the head of the Gorgon Medusa.

GORING, *gor'-ing*, the name of two parishes in England.—1. In Oxford. *Pop.* 1,000.—2. In Sussex. *Pop.* 600.

GORIO, Antony Francis, *go'-re-o*, a learned Italian antiquary, the author of "Musæum Florentium," or a description of the cabinet of the grand duke of Florence, 11 vols. fol.; "Musæum Etruscum," 8 vols. folio; "Musæum Cortenese," folio; "Ancient Inscrip-

tions in the Towns of Tuscany," 3 vols. folio. B. in Florence. D. 1757.

GORITZ, *go'-ritz*, a town of Illyria, on the Izonzo, 20 miles from Trieste. It is built in the form of an amphitheatre, and occupies a site extremely picturesque. *Manf.* Chiefly leather, earthenware, confectionary, and rosoglio. *Pop.* 11,000.—Here Charles X. of France died in 1836.

GORKUM, *gor'-kum*, a town of the Netherlands, in the province of S. Holland, 22 miles from Rotterdam. *Pop.* 9,000.

GORLITZ, *gor'-litz*, a town of Prussian Silesia, on the Neisse, 50 miles from Dresden. It is surrounded by walls, entered by eleven gates, and has three suburbs. *Pop.* 20,000.

GORT, *gort*, a market-town of Ireland, in the county of Galway, Connaught, 16 miles from Ennis. It has a barracks, and a large market is held in it. *Pop.* 5,200.

GORTON, *gor'-ton*, a township of Lancashire, 4 miles from Manchester, which it supplies with water from a reservoir near it. *Pop.* 4,500. A station on the Manchester and Sheffield Railway.

GORTSCHAKOFF, *gort'-sha-kof*, the name of three Russian brother princes, two of whom distinguished themselves as military commanders, and one as a diplomatist.—Prince PETER, a military commander, took part in the Russian wars against Turkey, and, in 1839, was made governor of Eastern Siberia. In 1843 he became general of infantry, and, in 1851, retired from service. B. 1790.—Prince MICHAEL played a prominent part in many of the Russian wars, and, in 1855, succeeded Prince Menschikoff in the command of the Russian forces in the Crimea. He superintended the defence of Sebastopol, which, however, he was at last forced to evacuate, making a masterly retreat. B. 1795.—Prince ALEXANDER, the diplomatist, represented Russia at various European courts, and, in 1855, negotiated the peace between Russia and the western powers. B. 1800.

GORUCKPORE, *gor-uk-por'*, a district of British India, in the presidency of Bengal, inclosed by Nepaul, Oude, Sarun, and Azimghur. *Area*, 7,346 square miles. *Desc.* Generally level, with a fertile soil, producing the usual cerealia, with maize, oil-seeds, tobacco, indigo, and cotton. *Pop.* 2,400,000.—The capital town of the district is of the same name, and stands on the Raptee, 420 miles from Calcutta. *Pop.* 46,000.

GOSHEN, *go'-shen*, the name of several towns in the U. S., none of them with a population above 4,000.

GOSHEN, 'approaching,' or 'nearness,' a frontier city of Egypt, on the eastern bank of the Nile, from which the "Land of Goshen" was named; a fertile district of Judah.

GOSLAR, *gos'-lar*, a town of Hanover, principality of Hildesheim, on the Gosse, 28 miles from Brunswick. It is an old place, with crowded streets and mean houses. *Manf.* Vitriol, carpets, leather, shot, and hardware goods. *Pop.* 8,000. This place was formerly a frequent residence of the German emperors, as it was also a seat of the German diets.

GOSPORT, *gos'-port*, a fortified seaport-town of England, in Hampshire. It is situate on a projecting point of land at the W. side of the entrance to Portsmouth harbour, and is connected with Portsmouth by a floating bridge. On the S.W. is a commodious bay. It has numerous government works and magazines for supplying the wants of the navy; also extensive barracks for the accommodation of the military. The principal street extends W. from the harbour to the works, and contains many handsome houses. In the town is an extensive iron-foundry, for the manufacture of anchors and other articles required for shipping. To the S. of the town stands Haslar Royal Hospital, for sick and wounded seamen. *Pop.* 7,500, mostly engaged in government navy works.

GOTHA, *go'-ta*, a town of Central Germany, capital of the duchy of Saxe-Gotha, 14 miles from Erfurt. It stands on the declivity of a hill crowned by the palace of Friedenstein, which is the usual residence of the sovereigns of Saxe-Coburg and Gotha. Here also are a valuable library, an arsenal, and an extensive cabinet of natural history, artificial curiosities, and medals, with a suitable library; also several charitable establishments. *Manf.* Porcelain, woollen, and cotton stuffs. *Pop.* 14,500. Since 1764, the "Almanach de Gotha" has been published here.—The DUCHY of Gotha forms part of Saxe-Coburg, and lies on the N. side of the Thuringian forest. *Pop.* 106,000. (*See* SAXE-COBURG-GOTHA.)

GOTHA CANAL, Sweden, unites the lakes Wener and Wetter and the Baltic Sea with the Cattegat. *Length*, about 25 miles.

GOTHARD, ST., *go'-tard*, the name of an elevated tract in the central part of Switzerland, between the cantons of Uri, Valais, Tessin, and the Grisons. It consists properly of a circular plain, surrounded on all sides, by some of the loftiest summits of the Alps. *Height*, from 8,000 to 11,000 feet above the level of the sea. Not far from the hospice, the rivers Rhine, Rhone, Reuss, and Tissin have their sources. The PASS OF ST. GOTHARD is one of the best and most frequented routes across the Alps. At its summit, 6,976 feet high, is the hospice, where travellers may commodiously find repose. On the N. slope is the celebrated Devil's Bridge across the Reuss. Here, in 1799, the French and Russians had several combats. The group of St. Gothard lies in *lat.* 46° 33′ N., *lon.* 8° 35′ E.

GÖTHE, John Wolfgang von, *ge(r)-te(r)*, the most distinguished name in the modern literature of Germany, was, in his fifteenth year, sent to the university of Leipsic, where, however, he rather indulged in a desultory than a regular course of study. In 1768 he left the university of Leipsic, and went to that of Strasburg, with a view to the legal profession; but chemistry, anatomy, and other kindred sciences commanded more of his attention than the law. In 1771, however, he took the degree of doctor of jurisprudence, and went to Wetzlar, where love for a betrothed lady, and the suicide of a young man named Jerusalem, supplied him with subjects for speculation, which resulted in the production of "Werther." This work appeared in 1774, and immediately fixed public attention upon its author. In 1782 he entered the service of the duke of Saxe-Weimar, to whom he had been introduced, and who loaded him with honours. He was made president of the council-chamber, and ennobled. He took up his residence at Weimar, where he was surrounded by some of the first minds of Germany, and where the direction of the theatre was confided to his care. Here he brought out the *chefs-d'œuvre* of Schiller, with splendid effect, and also produced several of his own dramatic poems. Of these we may mention his "Faust,"—his greatest work; "Goetz de Berlichingen," "Tasso," "Iphigenia in Tauris," "Stella," and "Count Egmont." In 1786 he left Weimar for Italy, and was absent two years, visiting Sicily, and remaining a considerable time in Rome. In 1792 he was, with his prince, in the campaign in Champagne, and was afterwards created minister. In 1807 he received from the emperor Alexander of Russia the order of Alexander Nevsky, and, from Napoleon I., the grand cross of the Legion of Honour. His writings are too voluminous to be enumerated here; but we must not forget to mention his "Wilhelm Meister," a moral fiction; and his "Herman and Dorothea." The lyrics of Göthe are especially beautiful; but his "Faust" is a poem pre-eminently philosophical. B. at Frankfort-on-the-Main, 1749; D. at Weimar, 1832.

GOTHLAND, *goth'-land*, a former division of Sweden, comprising all the country to the southward of the Lake Wener, having the Cattegat, the Sound, and the Baltic for its maritime boundaries. It is now divided into 12 districts.—The province of EAST GOTHLAND is now generally identical with the district Luckoping; that of WEST GOTHLAND with the districts Mariestadt, Gothenborg, and Wenersborg. (*See* SWEDEN.)

GOTHLAND, an island of the Baltic, near the south-east coast of Sweden, and belonging to that crown. It forms, along with some very small islands that surround it, the district of Wisby. *Area*, 1,227 square miles. *Desc.* The island is hilly on the coast, but level and fertile in the interior. *Pro.* Corn, and there is excellent pasturage. Wisby is the capital. *Pop.* 42,000. *Lat.* 56° 54′ to 57° 56′ N. *Lon.* 18° 6′ to 19° 6′ E.

GOTTENBURG, or GOTHENBURG, *got'-ten-boorg*, a seaport-town in the south-west of Sweden, situate near the mouth of the large river called Gotha-Elf, immediately opposite the N. extremity of Denmark. The town is divided into Upper and Lower, the former

built upon adjacent rocks, rising to the height of from 100 to 300 feet, and the latter standing in a marshy plain. Though perfectly level, the houses are all built upon piles. The principal street runs from east to west, and divides the town into two nearly equal parts. The Upper town, from its situation, is built with less regularity; but it has an imposing appearance, the houses rising one above another in the form of an amphitheatre. The only considerable public edifices of Gottenburg are the exchange, the extensive buildings belonging to the East-India Company, an hospital, and a magnificent church, built since 1812, with stones from Scotland; several other churches, a theatre, barracks, and hospital. It has, besides, several learned societies, a college, a public library, orphan asylum, and schools. The only curiosities of the place are a few private collections of paintings. The harbour is commodious for vessels of moderate size, and is defended by three forts. *Manf.* Coarse linen and woollen stuffs, leather, sail-cloth, ropes, silk and cotton goods, soap, tobacco; also sugar-refineries. Iron and steel, furnished by the rich mines of Warmeland, form the principal articles of export; and, after these, herrings, linen, timber, tar, train oil, and alum. *Pop.* 30,000.

GOTTHI, *goth'-i*, a celebrated nation of Germany, called also Gothones, Gutones, Gythones, and Guttones. They were warriors by profession, and extended their power over all parts of the world, but chiefly directed their efforts against the Roman empire. Their first attempt was on the provinces of Greece, whence they were driven by Constantine. They plundered Rome, under Alaric, one of their most celebrated kings, A.D. 401, and finally introduced disorders, anarchy, and revolutions in the west of Europe.

GOTTINGEN, *got'-ting-en*, a town in the south of Hanover, and capital of the province of Gottingen, 60 miles from Hanover. It stands in a pleasant valley, on a canal branching from the Leine. It was formerly fortified; but the walls are now demolished, and their site laid out in public walks. Gottingen is a place of antiquity, and was, some centuries ago, included in the list of Hanse towns; but its chief title to notice arises from its celebrated university, founded by George II. in 1734, which embraces all the great departments of literature and science, and, till 1831, was the principal of the German universities. To the university is attached a library, consisting of 320,000 volumes and 5,000 MSS. In 1751, an academy of sciences was connected with the university, besides a museum, botanic garden, and various other institutions. To it is also attached the *Spruch Kollegium*, a judicial society, for whose decision questions are brought from all parts of Germany. Gottingen has also a female high school. Its religious edifices consist of several Lutheran and Calvinist churches, and a Roman Catholic chapel. *Manf.* Woollen and linen stuffs, coloured paper, musical instruments, and steel-ware goods. *Pop.* 10,300. *Lat.* 57° 31′ 48″ N. *Lon.* 9° 56′ 45″ E.—Under the French empire, 1807-14, Gottingen was the capital of the department Leine.

GOTTLIEBRN, *got-tle'-ben*, a small town of Switzerland, on the Rhine, 3 miles from Constance. Its castle was successively the prison of the reformers John Huss, Jerome of Prague, and Malleobus.

GOTTSCHED, John Christopher, *got'-shed*, a German poet, and philosophical writer, who became professor of philosophy, logic, and metaphysics, at Leipsic. He greatly improved the German language by his works, the principal of which are, "Essay towards a Critical History of Poetry for the Germans;" the "Death of Cato," a tragedy; "Collections towards a Critical History of the German Language, Poetry, and Eloquence;" "the First Principles of General Philosophy;" "the German Theatre;" "the Principles of the German Language;" "Poems," &c. B. at Konigsberg, 1700; D. at Leipsic, 1766.—Madame Gottsched was also a good dramatic writer. D. in 1762.

GOUDA, or TER-GOUW, *gow'-da*, a town of the Netherlands, on the Yssel, 12 miles from Rotterdam. Its church of St. John the Baptist, at Gouda, is one of the handsomest and largest in the country. The great market-place is of a triangular form, with a handsome town-house, built in 1449, standing in the centre. *Manf.* Woollens, tobacco, sail-cloth, and cordage. *Pop.* 15,000.

GOUDELIN, or GOUDOULI, Peter, *goo'-de-lā*, a Gascon poet, whose verses have great sprightliness and a delicate simplicity. His works, which are much admired by his countrymen, have gone through numerous editions. B. at Toulouse, 1579; D. there, 1629.

GOUGH, Hugh, Viscount, G.C.B., *gof*, entered the army in 1794, and, in the following year, was sent with his regiment to the Cape of Good Hope, which he assisted to capture, and subsequently served in the West Indies. In 1809, as major of the 87th regiment, he was dispatched to the Peninsula, where he commanded his corps at the battles of Talavera, Barossa, Vittoria, Nivelle, Cadiz, and Tarifa. For his bravery in these engagements, his armorial bearings were augmented by an additional heraldic device. At Talavera he was wounded, and had a horse shot under him; but his gallantry was so conspicuous that, on the recommendation of the duke of Wellington, he received brevet rank for services performed in the field, and became lieutenant-colonel. In 1830 he was made a major-general, and, in 1837, took command of a division of the Indian army. He had not been long at his post, however, when he was ordered to China, where he took the command of the British troops, when his conduct in the attack on Canton caused him to be made a G.C.B. On the close of the Chinese war, in 1842, he was created a baronet, and received the thanks of both houses of parliament. Returning to India, he became commander-in chief of the British forces, and entered on the Mahratta war. After gaining the battle of Maharajpore, and terminating the war, he in 1845 encountered the Sikhs, whom, with the assistance of the governor-general, Lord Hardinge, he successively defeated at Moodkee, Ferozeshah, and Sobraon. For his services in this war he again received a vote of thanks from both houses of parliament, and, in 1846, was raised to the peerage as Baron Gough. In 1848-49 he was once more engaged against the same enemy, and finally defeated them at Goojerat, though at a great sacrifice of life. For this victory he was again thanked by both houses of parliament, created a viscount, with a pension of £2,000 per annum from the legislature, and a like sum from the East-India Company. In 1849 he returned to England, and retired from active service. In 1854, on the death of the marquis of Anglesey, he became colonel of the Royal Horse-guards. B. near Limerick, Ireland, 1779.

GOUGH, John B., a celebrated lecturer upon temperance, who, in his twelfth year, emigrated to America, and became a bookbinder. Having fallen into habits of intemperance, however, he sank to the lowest state of degradation, from which he was ultimately rescued by taking the total-abstinence pledge. He now devoted himself to the dissemination of those principles by which he had felt himself benefitted; and acquired a wide-spread fame, both in America and Great Britain, by the dramatic style of advocacy which he adopted in setting forth, upon the platform, the principles he had espoused. B. at Sandgate, Kent, 1817.

GOUKEKA, GOUKCHA, or SEVAN, LAKE OF, *gou-ke'-ka*, lies in Georgia, 24 miles from Erivan. *Ext.* 48 miles long, with a varying breadth of from 5 to 20. This lake furnishes fine fish, and contains the island of Sevan. *Height*, 5,300 feet above the level of the sea.

GOURNAI, Mary de Jars, *goor'-nai*, a French lady, celebrated for her wit and talents. She was adopted by the celebrated Montaigne, for whose works, which she edited, she had an enthusiastic admiration. B. at Paris, 1566; D. there, 1645. Her writings were published in one volume 4to.

GOUROCK, *goo'-rok*, a town of Scotland, on the Firth of Clyde, in Renfrewshire, 3 miles from Greenock. *Pop.* 2,500.

GOVAN, *go'-van*, a parish of Scotland, partly in Lanarkshire, and partly in Renfrewshire, with a village of the same name on the Clyde, 3 miles from Glasgow. *Pop.* 15,000.

GOVERDHUN, *go-verd-hun'*, a town of British India, in the N.W. provinces, 20 miles from Muttra. It is famous for its Hindoo mythological legends. *Pop.* Unascertained.

GOVERNOR'S ISLAND, *guv'-er-nors*, belongs to the United States, and lies in the harbour of New York, about 1 mile S. of the battery. *Area*, 70 acres. It is strongly fortified, with a garrison of 1,000 men.

GOWER, John, *gour*, an early English poet, became eminent as a professor of law in the Inner Temple, and is supposed to have been chief justice of the Common Pleas. He was a liberal benefactor to the church of St. Saviour, Southwark, where his monument still remains. B. in Yorkshire, 1325; D. in London, 1402. His works are of the grave kind; whence his friend Chaucer styles him the "Moral Gower." They consist of three parts,—"Speculum Meditantis," "Vox Clamantis," "Confessio Amantis." They were printed first by Caxton in 1483. The "Confessio Amantis" is said to have been written by command of Richard II., who, "meeting our poet Gower rowing in the Thames, near London, invited him into the royal barge, and, after much conversation, requested him to 'book some new thing.'" Gower, although hardly a poet by nature, had some effect in exciting a taste for verse. According to himself, Chaucer was his disciple, but far excelled him in the true spirit of poesy.

GOWER, or GWR, *goor*, a peninsula of S. Wales, projecting into the British Channel, and forming the W. part of Glamorganshire. *Ext.* 15 miles long, with an average breadth of 5. *Desc.* High and precipitous on the coast, with shores deeply indented. Since the time of Henry I., it is said a colony of Flemings have occupied the S.W. of this extremity.

GOYANNA, *go-yan'-na*, a city of Brazil, in the province of Pernambuco, on the Goyanna river, 40 miles from Olinda. *Pop.* 13,000.

GOYAZ, *go'-yaz*, the central province of Brazil, surrounded by the provinces San Paulo, Minas Geraes, Pernambuco, Maranham, Para, and Matto-Grosso. *Area*, estimated at 320,000 square miles. *Desc.* Mountainous, and watered by the Toncantins. In the valleys the soil is fertile, and produces maize, cotton, tobacco, sugar, and manioc. The fruits are the same as those grown in the south of Europe. Horned cattle are reared in innumerable herds. *Pop.* 190,000, mostly Indians. *Lat.* between 8° and 20° S. *Lon.* between 46° and 52° W.

GOYAZ, a city of Brazil, capital of the province of the same name, situate near the centre of the empire, 1,300 miles from Balem. It was formerly called Villa Boa, and is the seat of the legislative assembly of the province. *Pop.* about 8,000.

GOZAN, *go'-zan*, 'fleece,' or 'pasture,' a river or province of Media.

GOZO, *go'-zo*, a small island in the Mediterranean, a little to the north-west of Malta. *Ext.* 9 miles long, with a breadth of 5. *Desc.* Rocky, but fertile. *Pop.* 16,500.—There is, in this island, a Cyclopean giants' tower, which is an object of great interest. On the S.E. coast is Fort Chambray.

GRAAF REINET, *graf*, the most eastern district in the territory of the Cape of Good Hope. *Area*, 8,000 square miles. *Desc.* Mountainous, consisting almost entirely of the Sneeuwberge (Snow Mountains). It is well watered, fertile in the valleys, and the climate is healthy. *Pop.* 9,000.

GRADOW, *gra'-bo*, the name of several towns in Germany, the largest 24 miles from Schwerin, on the railway between Berlin and Hamburg. *Pop.* 6,000.

GRACCHUS, T. Sempronius, *grăk'-kus*, father of Tiberius and Caius Gracchus, was twice consul and once censor. He made war in Gaul, and met with much success in Spain. He married Sempronia, of the family of the Scipios, a woman of great virtue.—Their sons Tiberius and Caius, under the watchful eye of their mother, rendered themselves famous by their attachment to the interests of the populace, which, at last, proved fatal to them. With a winning eloquence, and uncommon popularity, Tiberius began to renew the agrarian law, which, by the means of violence, was enacted. (*See* AGRARIA LEX.) Being himself appointed one of the commissioners for carrying the law into execution, he was assassinated in the office by Pub. Nasica; and Caius, after his death, with more vehemence but less moderation, endeavoured to carry what he left unaccomplished into effect. This, in the end, increased the sedition, and he was murdered by order of the consul Opimius, 121 B.C., about 13 years after the unfortunate end of Tiberius. His body was thrown into the Tiber. Caius has been accused of having murdered Scipio Africanus the younger.—Sempronius, a Roman, banished to the coast of Africa for his adulteries with Julia, the daughter of Augustus. He was assassinated by order of Tiberius, after he had been banished 14 years. Julia also shared his fate.—There were others of this name, but they are of inferior note.

GRACIAS-A-DIOS, *gra'-the-as-a-de'-ose*, a town of Central America, in the state of Honduras. *Pop.* Unascertained.—Also the name of a CAP: on the Mosquito Coast. *Lat.* 14° 59′ N. *Lon.* 83° 12′ W.

GRACIOSA, *gra-se-o'-sa*, one of the Azore islands, in the Atlantic. *Ext.* 20 miles long and 6 broad. *Pop.* 12,000.—Its principal town is Santa Cruz.—Also one of the Canary Islands, small, and of little note.

GRADISKA, or BERBIR, *gra-dis'-ka*, a strong fortress of European Turkey, in Lower Bosnia, 20 miles from Banalynka. *Pop.* 2,000.—Also a small but strongly-fortified town of Austrian Friuli. *Pop.* 1,000.

GRADIVUS, *gra-di'-vus*, a surname of Mars among the Romans, perhaps from *kradainein*, 'brandishing a spear.'

GRÆCI, *gre'-si*, the inhabitants of Greece.

GRÆCIA MAGNA, *gre'-she-a măg-na*, a part of Italy, where the Greeks planted colonies; whence the name. Its boundaries are uncertain.

GRAFFENBERG, *graf'-fen-bairg*, a village of Austrian Silesia, in the circle of Troppau, famous for the hydropathic establishment of Priessnitz.

GRAFTON, *graf'-ton*, the name of several parishes in England, none of them with a population above 500.

GRAFTON, a county of the United States, in New Hampshire, on the Connecticut river. *Area*, 1,440 square miles. *Pop.* 43,000.—Also several towns, none of them with a population above 4,000.

GRAGNANO, *gran-ya'-no*, a town of Naples, in the province of Napoli, standing in a plain 2 miles from Castel-a-Mare. It contains several churches, one of them collegiate, and a convent. *Manf.* Woollen cloths. *Pop.* 9,000.

GRAHAM, Right Honourable Sir James Robert George, Bart., *grā'-ham*, is the eldest son of Thomas Graham, Esq., of Netherby, who, in 1782, was created a baronet. The present Sir James received his education at Westminster, and at Queen's College, Cambridge, where he displayed considerable ability, and, at an early age, especially distinguished himself by that kind of practical business capacity for which he has since been celebrated. He entered public life as secretary to Lord Montgomerie, in Sicily, which situation he continued to hold under Lord William Bentinck, and was the principal in negotiating an armistice with Murat at Naples. In 1818 he was returned member of parliament for Hull, upon extreme liberal principles, but did not long retain his seat. In 1823 he succeeded to his father's baronetcy, and in 1826 was returned member for Carlisle. In 1830 he took office under Earl Grey, as first lord of the Admiralty; in 1831 he assisted in framing the Reform Bill of Earl Grey: and, in 1834, resigned, on account of disagreeing with his colleagues on the appropriation clause in the Irish Church Temporalities Bill. For some years he now held an independent position; but, when Sir Robert Peel, in 1841, came into power, he accepted the home secretaryship. In 1844 he suffered greatly in public opinion, by ordering letters addressed to M. Mazzini to be opened and copied at the General Postoffice. His popularity, however, soon rose again by the active and firm part he took with Sir Robert Peel in carrying the repeal of the corn-laws. Shortly afterwards, the government were driven from office on the Irish Coercion Bill. Sir James continued out of place till 1853, when he became again, under the administration of Lord Aberdeen, first lord of the Admiralty, which he retained till the close of the following year. In 1855 he held the same office for a few days under Lord Palmerston, but finally resigned. B. in Cumberland, 1792.

GRAHAM, George, an eminent mechanic, who was journeyman and successor to Tompion, the celebrated clockmaker. He distinguished himself not only by the accuracy of his timepieces, but by the invention of several valuable instruments for astronomical observations. The great mural arch in the observatory of Greenwich was made under his inspection, and divided by his own hand. He invented the sector, with which Dr. Bradley discovered two new motions in the fixed

stars. He furnished the members of the French Academy, who were sent to the north to measure a degree of the meridian, with the instruments for that purpose, and was a member of the Royal Society, to which he communicated several useful discoveries. B. in Cumberland, 1675; D. in London, 1751, and was interred in Westminster Abbey.

GRAHAM LAND, a large extent of continuous land in the Antarctic Ocean, discovered by Biscoe in 1832. *Lat.* 65° S. *Lon.* 60° W.

GRAHAM'S TOWN, a town in the east province of the Cape Colony, S. Africa, in a valley 25 miles from the sea. *Pop.* 4,000. *Lat.* 33° 19′ S. *Lon.* 26° 30′ E.

GRAHAME, James, was educated at the university of Glasgow, and became curate of Shipton, in Gloucestershire, and also of Sedgefield, in Durham. He wrote "The Sabbath," a poem variously criticised; but, however heavy it may be to some, none can dispute the excellent spirit in which it is composed. He also wrote "Biblical Pictures," "British Georgics," and several other poems. Lord Jeffrey, in the "Edinburgh Review," treated his effusions with considerable severity, and Lord Byron calls him "sepulchral Grahame;" but equal judges of true poetry have pronounced different verdicts upon his muse. Thus Professor Wilson:—

> "Such glory, Grahame! thou . . . . . .
> With loftier aspirations and an aim
> More worthy man's immortal nature, thou,
> That holiest spirit, that still loves to dwell
> In the upright heart and pure, at noon of night
> Didst fervently invoke; and, led by her
> Above the Aonian mount, send from the stars
> Of heaven such soul-subduing melo'y
> As Bethlehem shepherds heard when Christ was born."

B. in Glasgow, 1765; D. 1811.

GRAINGER, James, *grain'-jer*, a poet and physician, who served his apprenticeship to a surgeon at Edinburgh. He afterwards acted in that capacity in the army, and, in 1748, took his doctor's degree, and settled in London. His practice, however, was not considerable, and he engaged as tutor to a young gentleman, whom he accompanied to the island of St. Kitt's, in the West Indies, where he died in 1767. B. at Dunse, Scotland, 1724. He wrote—an "Ode on Solitude," "Bryan and Pereene," a ballad, the "Sugar-cane," in blank verse, and translated the "Elegies" of Tibullus into English verse. His medical works are, —"Historia Febris Anomalæ Batavæ, an. 1764;" and a treatise on the West-India diseases, 8vo.

GRAMMONT, *gram'-mont*, a town of Belgium, in the province of East Flanders, on the Dender, 15 miles from Oudenarde. It is divided by that river into Upper and Lower. *Manf.* Linen, carpeting, and paper. *Pop.* 7,500.

GRAMONT, Anthony, duke of, marshal of France, an illustrious warrior and courtier of the reign of Louis XIV., was descended from the noble family of Gramont in Navarre, and related to Cardinal Richelieu by marriage. D. 1678. He wrote two volumes of "Memoirs," which are still popular.

GRAMPIANS, *grăm'-pe-ans*, a chain of mountains in Scotland, which, stretching along the southern front of the Highlands, extends across the island, from the district of Cowal, in the shire of Argyle, on the Atlantic, to Aberdeenshire, on the German Ocean. It then forms another ridge in a north-westerly direction, extending to the county of Moray and the borders of Inverness. Its loftiest summits are Ben Lomond in Dumbartonshire, Ben Ledi, Ben More, Ben Lawers, Schechallion, and Ben Voirlich, which are mentioned under their respective heads.

GRAMPIANS, a mountain-range in Australia, Victoria. Its loftiest summit is Mount William, 4,500 feet above the level of the sea. *Lat.* of the range, between 36° 52′ and 37° 39′ S. *Lon.* between 141° 20′ and 142° 45′ E.

GRAN, *gran*, a considerable river of Upper Hungary, rising in the Carpathians, 8 miles from Dobsnia, and, after a course of 130 miles, falling into the Danube, opposite Gran.

GRAN, or ESZTERGOM, a free town of Hungary, at the conflux of the Danube and the Gran, and the capital of a county of the same name, 25 miles from Buda. It has a castle standing on the banks of the Danube, an archbishop's palace, chapter-house, an hospital, and gymnasium. *Manf.* Weaving and dyeing. *Pop.* 12,100.

GRANADA, or GRENADA, *grăn'-a-da*, an old maritime province in the south of Spain, Andalusia. It is bounded on the E. by Murcia, on the S. by the Mediterranean, and on the other sides by Cordova, Jaen, and Seville. *Area*, 9,700 square miles. *Desc.* Mountainous, the Sierra Nevada traversing its centre, and in Mulahacca rising to the height of nearly 11,700 feet above the level of the sea. It is now divided into the provinces of Almeria, Granada, and Malaga. *Pop.* 430,000.—The kingdom of Granada was the last possession of the Moors in Spain, and was conquered by Ferdinand and Isabella in 1492.

GRANADA, a city in the south of Spain, and capital of a province of that name. It was the ancient metropolis of the Moors in Spain, and stands on the Genil, 120 miles from Seville. The town exhibits the form of a half-moon, its streets rising above each other, with a number of turrets and gilded cupolas, the whole crowned by the Alhambra, or palace of the ancient Moorish kings, and in the back-ground the Sierra de Nevada, covered with snow. It is built on two adjacent hills, and divided into four quarters. The river Darro runs between the two hills, and traverses the town, after which it falls into the larger stream of the Genil, which flows outside the walls. The principal buildings

GRANADA.

are the cathedral, the archbishop's palace, the mansion occupied by the captain-general of the province, the university, and several hospitals. But the grand ornament of Granada is the Alhambra: though now, like the town, in a state of decay, its remains sufficiently evince its original splendour. It commands a beautiful prospect; but a still finer is afforded by another Moorish palace, called the Generaliffe, built on an opposite hill, and the retreat of the court during the heat of summer. *Manf.* Silk and woollen stuffs, gunpowder, saltpetre, paper, hats; and there is an oil-trade carried on. *Pop.* 70,000. *Lat.* 37° 16′ N. *Lon.* 3° 45′ 40″ W.

GRANADA, or GRENADA, NEW, one of the republics of S. America, called the New Kingdom of Granada. It is bounded on the N. by the Caribbean Sea and the province of Costa Rica, E. by Venezuela, W. by the Pacific Ocean, S. by Ecuador. *Area*, 370,000 square miles. *Desc.* Diversified, and traversed in the W. by the lofty ridges

of the Andes. *Rivers.* The Alrato, Magdalena, and Cauca; besides many streams of considerable size. On the summits of the mountain-ranges are extensive table-lands, called *parannos*, nearly destitute of vegetation; whilst in the S.E. are wide *llanos*, upon which innumerable herds of wild cattle and horses pasture and roam at large. *Lakes.* Maracaybo, and numerous others situate among the mountains. *Forests.* Immense, and abounding with all kinds of tropical vegetation. *Pro.* Wheat, and other cerealia; maize, cotton, plantains, tobacco, cacao, sugar. Among the trees are cedar, mahogany, fustic, and other dye-woods. The plains yield large quantities of hides and jerked beef. *Minerals.* Gold, silver, platinum, coal, copper, iron, tin, lead, rock-salt, and emeralds. *Manf.* Woollen and cotton stuffs, chiefly made for home consumption. *Pop.* 1,500,000. *Lat.* between the equator and 12° N. *Lon.* between 68° and 82° W.—This country was discovered by the Spaniards in 1499, and first settled at the Gulf of Darien in 1510. It became a republic in 1811, and, in 1841, the provinces of the Isthmus of Darien separated from the rest. In 1854 a civil war agitated the country and suppressed the constitution.

GRANADA, a city of the province of Nicaragua, on the shore of the lake of that name. *Pop.* estimated at 8,000. *Lat.* 10° 12′ N. *Lon.* 87° 40′ W.

GRANARD, *grăn'-ard*, a neat town of Ireland, in the county of Longford, 11 miles from Longford. It has a barracks and market-house. *Manf.* Coarse linen. *Pop.* 8,500.

GRAND ISLAND is 3 miles above the falls of Niagara, in the United States. *Ext.* 9 miles long, by 5 broad, mostly woodland.

GRAND RIVER, a river of the United States, in Louisiana, which enters the Missouri about 250 miles from its mouth.—2. Of Louisiana, which enters the Arkansa about 700 miles from the Mississippi.—3. In the Michigan territory, which, after a course of 150 miles, falls into Lake Michigan.—4. In Ohio, which falls into Lake Erie.—Also the name of several rivers of Canada.

GRANDE, *grand*, a river of Peru, joins the Guapiri.—2. Of Brazil, province of Bahia, falling into the Rio Francisco, *lat.* 11° 35′ S.—3. Of Brazil, falling into the Atlantic, *lat.* 15° 20′ S.—4. Of Zanquebar, in Eastern Africa, entering the eastern seas *lat.* 2° S.

GRANGEMOUTH, *grainj'-mouth*, a seaport-town of Scotland, in Stirlingshire, situate on the angle which is formed by the river Carron and the great canal which joins the firths of Forth and Clyde, 12 miles from Stirling. It has a custom-house, and carries on a considerable trade in corn, wool, iron goods, hemp, timber, flax, and tallow. *Pop.* 1,500.

GRANGER, James, *grainj'-jer*, an English divine, who published a valuable work, entitled "The Biographical History of England," in 4 vols. 8vo. He was vicar of Shiplake, in Oxfordshire, and was seized with an apoplectic fit while administering the Lord's Supper in his church, and died the next morning, 1776.

GRANICUS, *grā-ni'-kus*, a river of Bithynia, famous for a battle fought there between the armies of Alexander and Darius, 334 B.C., when 600,000 Persians were defeated by 30,000 Macedonians.

GRANT, Francis, R.A., *grant*, an artist who spent his fortune of £10,000, and then devoted himself to his art. He became one of the best portrait-painters of fashionable life, and was warmly patronized by Sir Walter Scott. At the commencement of his career he applied himself to the painting of sporting pieces, some of which were engraved and extensively patronized by sporting men; but he subsequently abandoned this branch of art, and applied himself to portrait-painting, and became, *par excellence*, the artist of "good society." In 1842 he was chosen an A.R.A., and, in 1851, an R.A. In 1843 he exhibited an equestrian portrait of her majesty Queen Victoria. B. at Kilgraston, Scotland, about 1800.

GRANT, Anne, Mrs., of Laggan, was the daughter of Duncan Macvicar, an officer in the British army. She married the Reverend James Grant, minister of Laggan, who left her a widow with eight children in 1801. She, after this, resided on a small farm near Laggan, but subsequently removed to Edinburgh, where Sir Walter Scott drew up a memorial which procured her an annual pension of £100 from 1826 till the time of her death. She wrote the "Highlanders, and other Poems," which appeared in 1803, by which she respectably assisted in sustaining the honours of the Scottish muse. In 1773 her celebrated "Letters from the Mountains" appeared, and were well received, notwithstanding the "affectation of the title," of which Lord Jeffery speaks, and her "gross inaccuracy," according to Macaulay, in her account of the massacre of Glencoe. Besides these works, she produced "Memoirs of an American Lady," "Essays on the Superstitions of the Highlanders of Scotland," "Eighteen Hundred and Thirteen," a poem, and several other works. B. in Glasgow, 1755; D. in Edinburgh, 1838.

GRANT, Robert Edmund, M.D., a celebrated zoologist and comparative anatomist, who was educated at the High School, Edinburgh, where he distinguished himself in Greek and geometry. In 1808 he entered the literary classes of the university, and, in 1812, was elected president of the Medico-Chirurgical Society of Edinburgh. In 1814 he became president of the Royal Medical Society, and, in the same year, graduated as M.D. His father having now died, he passed some time in visiting the principal capitals of the continent, and, after his return, commenced the practice of his profession in Edinburgh, in 1820. In 1824, in conjunction with Dr. Barclay, he delivered lectures on comparative anatomy, and, during his vacations, devoted himself to original researches upon the animals of the coasts of Scotland. The result of these appeared in the "Transactions of the Wernerian Society." In 1827 he was admitted a licentiate of the Royal College of Physicians at Edinburgh, and, in the following year, was called upon to fill the post of lecturer on comparative anatomy and zoology at University College, London. From that time he continued to lecture at that institution, and has been a large contributor to zoological literature. He is a fellow of the Royal, Linnæan, Zoological, Geological, and Entomological Societies. B. at Edinburgh, 1793.

GRANTA, *grăn'-ta*, a river of England. (*See* CAM.)

GRANTHAM, *grănt'-hum*, a borough and market-town of Lincolnshire, on the Witham, 24 miles from Lincoln. The town is neat and clean, and consists of four principal streets. The chief buildings are the church, lighted with pointed windows, and celebrated for its spire, 273 feet high; several dissenting chapels, the gaol, theatre, union workhouse, guildhall, rebuilt in 1787, with the addition of a large assembly-room. The town has derived much benefit from a canal, begun in 1794, and extending from Grantham to the Trent. The chief trade consists of malting, importing coal, and exporting corn. *Pop.* 11,000.—At the free grammar-school of this town, Sir Isaac Newton received his education, previous to his being sent to Trinity College, Cambridge; and in 1858 a statue of the philosopher was here erected.

GRANTON, *grănt'-on*, a village of Scotland, on the Firth of Forth, 3 miles from Edinburgh. Here is a pier 1,700 feet long, and a breakwater, with a ship-building-dock, and a patent slip, capable of drawing up vessels of 1,400 tons. In 1842, her majesty Queen Victoria landed and re-embarked here, on the occasion of her first visit to Scotland.

GRANVILLE, *gran'-veel*, a fortified seaport of France, in the department of La Manche, on a rocky peninsula, 12 miles from Avranches. Its principal buildings are a citadel, church, hospital, and public baths. There is a mole, which incloses a harbour; a school of navigation, and it is the residence of a commissary of marine. *Pop.* 11,000, mostly engaged in oyster, cod, and whale fisheries. In 1695 this place was burned by the English, and, in 1793, besieged by the Vendeans. It has a considerable traffic, particularly with the neighbouring island of Jersey, and many English reside here.

GRANVILLE, *grăn'-vil*, a county of Carolina, U.S. *Area*, 624 square miles. *Pop.* 21,000, of whom nearly a half are slaves.—Also, the name of several townships, none of them with a population above 4,000.

GRANVILLE, John Carteret, Earl of, was the eldest son of George, Lord Carteret, and succeeded to this title at the age of 5 years. He received his education at Westminster School and Christchurch College, Oxford, and, in 1711, took his seat in the House of Lords. Here he distinguished himself by his earnestness for the succession of the Hanover family, which recom-

mended him to George I., who gave him several important places. In 1719 he was sent ambassador to Sweden, and mediated the treaty between that power and Denmark. In 1721 he became secretary of state, and, in 1724, was appointed viceroy of Ireland, where his administration, in a trying season, was generally applauded. He was again nominated to that office, after the accession of George II., and governed that kingdom with great wisdom till 1730. He was the enemy of Walpole's administration, and moved, in 1741, for the removal of that minister. When this was effected, Lord Carteret became secretary of state, and in 1744, on the death of his mother, succeeded to the titles of Viscount Carteret and Earl Granville. D. 1763.—He was a pleasant companion, and a great encourager of learned men.

GRANVILLE, Granville George Leveson Gower, earl of, educated at Eton and Christchurch, Oxford, took his degree in 1834. In the following year he was attached to his father's embassy in Paris, and in 1836, and also in 1837, on a new election, was returned member of parliament for Morpeth. He was now on the high road to power, and, in a short time, was appointed under-secretary for foreign affairs. In 1840 he was attached to the Russian embassy, and at the subsequent general election, was, in 1841, returned member for Lichfield. In 1846 he was summoned, by the death of his father, to the House of Peers, and, in the administration of Lord John Russell, became master of her majesty's buckhounds. He subsequently became vice-president of the Board of Trade, and, in 1851, took a large share in "getting up" the Great Exhibition. Under Lord Aberdeen, he became president of the Board of Trade, and under Lord Palmerston, in 1855, filled the same post. He also held several other important posts. In 1856 he represented her majesty at the coronation of the emperor of Russia, and, under the Palmerston administration of 1859, held the office of president of the council. In politics he is both a liberal and a free-trader. B. 1815.

GRANVILLE, George, Baron Lansdowne, a nobleman of considerable talents. In 1685 he wrote some poetical pieces on the accession of James II. After the Revolution, he lived retired for a considerable time, amusing himself with literary composition. In 1686 was acted, with great applause, his tragedy of "Heroic Love," which was followed by the dramatic poem of "The British Enchanters." On the accession of Queen Anne, he obtained a seat in parliament, and, in 1710, was made secretary-at-war. The same year, he married a daughter of the earl of Jersey, and was soon after created a peer, by the title of Lord Lansdowne, baron of Bideford. The accession of George II. deprived him of his place, and in 1715 he was sent to the Tower, on suspicion of being concerned in a plot against the government. He obtained his release in 1717, and afterwards went to France, where he resided some years. B. in Cornwall, 1667; D. 1735.—His works were published in 2 vols. 4to, 1732, and included, besides those mentioned above, several other plays and poems.

GRAS'LITZ, *gras'-litz*, a mining town of Bohemia, 88 miles from Prague. *Pop.* 5,000.

GRASSE, *grass*, a neatly-built town of France, in the department of the Var, 20 miles from Nice. It has a traffic in silk, leather, and soap, also in liquors of different kinds; and large quantities of perfumery are made. *Pop.* 11,500.

GRASSMERE, *grass'-meer*, a parish of England, in Westmoreland, 3 miles from Ambleside. Its village stands at the head of a lake of the same name, remarkable for its picturesque beauty. *Pop.* 2,200.

GRAVILLE, or GRAVILLE, *gra'-veel*, a parish and village of France, in the department of the Lower Seine, 3 miles from Havre. *Pop.* 13,000.

GRATIÆ, the Graces. (*See* CHARITES.)

GRATIAN, *grai'-she-an*, a Roman emperor, whose father took him as his associate in the empire, when he was only eight years old. In his 17th year, on the death of his father, he succeeded to the throne, and the army elected as his partner, Valentinian II., his younger brother. The beginning of his reign was distinguished by several cruelties, particularly the murder of his general, Theodosius. Gratian defeated the Goths, and exerted himself with energy and success in defending the empire; but was put to death in a revolt in Gaul, A.D. 383. B. 359.

GRATIANUS, *grai'-she-ai-nus*, a native of Pannonia, father to the emperor Valentinian I., was raised to the throne, conjointly with his father, though only eight years old. Afterwards, he became sole emperor, in the 16th year of his age. He took, as his colleague, Theodosius, whom he appointed over the eastern parts of the empire. His courage in the field was as remarkable as his love of learning and philosophy. He slew 30,000 Germans in a battle, and supported the tottering state by his prudence and intrepidity. His enmity to the pagan superstition of his subjects ultimately proved his ruin. He was forsaken by his troops in the field of battle, fighting against Maximinus in Gaul, and murdered by the rebels, 383 A.D., in the 24th year of his age.—A Roman soldier invested with the purple by the rebellious army in Britain, in opposition to Honorius. He was assassinated four months after, by those very troops to whom he owed his elevation, 407 A.D.

GRATIUS FALISCUS, *grai'-she-us fă-lis'-kus*, a Latin poet, contemporary with Ovid. He wrote a poem on coursing, called "Cynegeticon," much commended for its elegance and perspicuity.

GRATTAN, Right Honourable Henry, *grăt'-tan*, was educated at Trinity College, Dublin, where he distinguished himself by his ability, and, after taking his degree, went to London, for the purpose of following the profession of the law. In 1772 he was called to the Irish bar, and, in 1775, was returned to the Irish parliament, where his fervid eloquence not only procured him the admiration but the love and veneration of his countrymen, whose enthusiasm he raised to the highest pitch. The first public benefit which he was instrumental in conferring on his countrymen, was the partial opening of the Irish commerce, which had hitherto been greatly trammelled by vexatious restrictions. In 1780 he obtained from the Irish parliament the resolution "that the king's most excellent majesty, and the lords and commons of Ireland, are the only power competent to make laws to bind Ireland." His speech on this occasion, especially its closing passages, is a fine specimen of eloquence. The Irish nation now voted him £100,000, "as a testimony of its gratitude" for national services; but, at Grattan's own request, it was made £50,000, which he received. After the union of Ireland with Great Britain, he was chosen member for Malton, and subsequently sat in the imperial parliament as the representative for Dublin. He is only now remembered for his eloquence; but Lord Brougham, in a speech delivered in the House of Commons in 1823, says:—"He was a man of singular candour, and of great moderation; and from his entrance into public life, to the close of his illustrious career, gave signal proofs of his moderation, of his extreme forbearance, nay, of his gentleness." "The purity of his life was the brightness of his glory," says Sir James Mackintosh. B. in Dublin, 1750; D. in London, 1820, and was buried in Westminster Abbey.

GRATZ, or GRAZ, *gratz*, a town of Styria, Austria, on both sides of the river Mur, 100 miles from Vienna. This town owes its origin to the strength of its citadel, which is built on a very steep hill on the banks of the Mur. It has a lyceum, an academy, a large school, theatre, council-house, and observatory. The houses are of stone, and the town is generally well built. It has twenty-two churches and chapels, great and small: the cathedral was formerly the parish church. The most striking edifices in the place is a mausoleum erected to the emperor Ferdinand II., and the Johanneum, which was founded by the Archduke John, in 1812, for the encouragement of the arts and manufactures in Styria. *Manf.* Cotton, woollen, and silk fabrics, leather, iron, steel wares, rosoglio, &c. *Pop.* 56,000. *Lat.* 47° 4′ N. *Lon.* 15° 26′ E. It has railway communication with Vienna, Trieste, and Cilly.

GRAUDENTZ, *grou-dents'*, a fortified town of West Prussia, at the confluence of the Vistula and the Ossa, here crossed by a bridge of boats, 55 miles from Dantzic. It has both Lutheran and Roman Catholic churches, a gymnasium, and a strong fortress. *Manf.* Woollen goods and tobacco. *Pop.* military inclusive, 10,000.

GRAULHET, *gro'-lai*, a parish and town of France,

in the department Tarn, 10 miles from Lavaur. *Manf.* Linen goods, hemp, and leather. *Pop.* 5,500.

GRAVELINES, *grav'-leen*, a fortified seaport-town of France, in the department Nord, 12 miles from Calais. It stands in a marshy plain protected from the sea by sand-hills or *dunes*, which can easily be laid under water. It is a military town. *Pop.* 6,000, mostly employed in the cod, herring, and mackerel fisheries.—In 1558 a battle took place between the French and Flemish, when the latter, under Count Egmont, obtained a decisive victory.

GRAVESEND, *graivs'-end*, a market-town of Kent, on the south side of the river Thames, 20 miles from London. On the E. side of the town is a battery, and the numbers of vessels which usually lie at anchor in the channel, keep up a constant influx of seamen and strangers. It has also bathing-houses, which draw additional visitors in the summer season; and, from these circumstances, this town presents a continued scene of bustle and activity. The inhabitants are much engaged in seafaring employments. The principal buildings are a custom-house, town-hall, union workhouse, bazars, theatre, and concert-room. *Manf.* Rope-making, and a little shipbuilding is carried on. *Pop.* with Milton, 17,000. It is connected with London by railway and steamboats, and there is a ferry across the Thames to Tilbury Fort.

GRAVESEND, a township of the United States, in King's county, Long Island, New York, 9½ miles from New York. *Pop.* 1,000.

GRAVINA, *gra-vē'-na*, an episcopal city of Naples, on a river of the same name, 35 miles from Bari. It has a cathedral, several more churches, a college, and some convents. *Pop.* 11,000.

GRAY, *grai*, a town of France, in the department of the Upper Saone, 27 miles from Dijon. It has a college, public library, and several public fountains. Its trade is active with Lyons in corn, wood, and iron. *Pop.* 7,300.

GRAY, Thomas, an English poet, was the son of a money-scrivener in London, and was educated at Eton, whence he removed to Peter-house, Cambridge. In 1738, he entered of the Inner Temple, but never engaged much in the study of the law. The year following, he accompanied Mr. Horace Walpole in the tour of Europe; but a difference arising between them, they parted in Italy, in 1741, and Mr. Gray returned to England, where his father died soon after. He now took up his residence chiefly at Cambridge, where, in in 1768, he became professor of modern history. B. in London, 1716; D. 1771, and was buried with his family at Stoke Pogeis, in Buckinghamshire.—The odes of Gray possess uncommon merit, and his "Elegy in a Country Churchyard" has long been considered one of the finest poems in the language. General Wolfe, the night before he made his attack on Quebec, where he fell, declared to his fellow-soldiers, "Now, gentlemen, I would rather be the author of that poem than take Quebec." "I know not," says Sir Egerton Brydges, "what there is of spell in the following simple line,—

'The rude forefathers of the hamlet sleep;'

but no frequency of repetition can exhaust its touching charm." There are other lines in this delightful poem which we could point out equally charming. "Had Gray written nothing but his Elegy," says Byron, "high as he stands, I am not sure that he would not stand higher. It is the corner-stone of his glory. . . . Gray's Elegy pleased instantly and eternally."

GRAYSON, *grai'-son*, the name of three counties in the United States.—1. In Kentucky. *Area*, 700 square miles. *Pop.* 7,000.—2. In Virginia. *Area*, 495 square miles. *Pop.* 8,000.—3. In Texas. *Area*, 910 square miles. *Pop.* 3,000.

GRAZALEMA, *gra-tha-lai'-na*, a town of Spain, in Granada, 49 miles from Cadiz. Its trade is chiefly done in bacon. *Pop.* 5,000.

GREATHAM, *grait'-hăm*, the name of several parishes in England, none of them with a population above 700.

GREAT ISLAND, an island on the coast of Ireland, county of Cork. *Ext.* 5 miles long, by 3 broad.

GREAT ISLAND, in Bass's Straits, between Australia and Tasmania. *Ext.* 40 miles long, with a breadth of 12.

GREAT SALT LAKE, North America. (*See* UTAH.)

GREAT SOUTH BAY, a bay in the United States, on the south side of Long Island.

GREAVES, John, *greeves*, a mathematician and antiquary, who, after receiving a grammatical education in his native county, was removed to Balliol College, Oxford. In 1621 he was chosen fellow of Merton College, and, in 1628, took the degree of M.A. In 1630 he became professor of geometry in Gresham College, and was, soon afterwards, sent by Archbishop Laud to the East, where he made a large collection of oriental MSS., coins, and medals. He also took a careful survey and measurement of the Egyptian pyramids, and made many astronomical observations. After his return, in 1640, he was chosen Savilian professor of astronomy at Oxford; but was obliged to resign his situation, from the persecution of the parliamentary visitors. B. in Hampshire, 1602; D. 1652.—He wrote "Pyramidographia; or, a Description of the Pyramids in Egypt;" "A Discourse on the Roman Foot and Denarius;" and other valuable works.

GREECE, or HELLAS, KINGDOM OF, *greece*, the ancient Græcia, a maritime country in the south-east of Europe. It is bounded on the N. by European Turkey, W. by the Ionian Sea and Islands, S. by the Mediterranean, and E. by the Ægean Sea. *Ext.* 210 miles long, by 160 broad. *Area*, 15,000 square miles, islands inclusive. *Coastline.* Extensive; consisting as Greece does of the Morea, the country called Hellas, N. of the gulfs of Lepanto and Ægina, all the Cyclades, and some of the Sporades, it necessarily must have not only a great extent, but an irregular line of coast; for it may be regarded as nothing more than a series of islands and peninsulas. *Capes.* Marathon and Colouna, or Sunium, in Attica; Malea, Matapan, Gallo, and Klarenza, in the Morea. *Seas and Gulfs.* The Archipelago on the E., including the channels of Talanti, Negropont, and the gulfs of Nauplia and Ægina: the Ionian Sea on the W., including the gulfs Arta, Arcadia, Lepanto, Argolis, Patras, Koron, and Kolokythi. *Islands.* Andro, Negropont, Naxia, Milo, Santorini, Zea, Paros, Antiparos, Salamis, Syra, Skyra, Hydra, Ægina, and Spezzia. *Desc.* Mountainous, and intersected, particularly in the north, by continued ranges, several of which are interesting from their scenery, but more from their classical recollections. These ranges are connected with those of Turkey, Mount Pindus traversing both countries. Between the extremity of Oeta and the sea is the celebrated pass of Thermopylæ, 5 miles long, and about 50 yards wide at its narrowest part. Here Leonidas and his 300 Spartans devoted themselves to their country, 480 B.C. The possession of this pass, in a military point of view, is extremely important, as it is difficult to enter Greece by any other way from the north. Although the mountains are numerous, there are none of them above the snow-line. Mount Guiona, in Doris, is the culminating point, and has an elevation of 8,240 feet above the level of the sea. *Rivers.* The principal are the Achelous, now called the Aspropotamo, the Peneus, the Alpheus, the Eurotas, the Iris, and the Pamisos. All the rest are insignificant streams. *Lakes.* Numerous; but none remarkable. Topolias is the largest, lying between Thebes and Bœotia. *Climate.* Temperate, and, on the whole, healthy, excepting in the neighbourhood of marshes, which, from the neglected state of cultivation, have become numerous. *Zoology.* The bear, wolf, jackal, wild boar, and deer. The domestic animals are neither numerous, nor of good breeds. Asses are almost the only beasts of burden employed; and the only animals from which dairy produce is made, are the sheep and goat. *Forests.* Considerable. They consist mostly of pine, with a mixture of hardwood, including the oak, in the upper regions; and in the lower, the chestnut and walnut are frequently met with. *Pro.* Corn, cotton, silk, wool, rice, and tobacco. Bees are still kept, and their honey is the finest in the world. Agriculture is generally in a very backward state, and it is only in Thessaly and the south of Macedon, that the vestiges of ancient industry are to be discovered. The Morea, though susceptible of the highest degree of cultivation, is almost entirely neglected. Of fruits, it abounds with figs, almonds, dates, oranges, citrons, and currants. Melons are largely cultivated; but the olive takes precedence of every

other article in Greece, and is much attended to. *Minerals.* Rich and varied, but little worked. *Manf.* Unimportant, the inhabitants being almost entirely a commercial maritime people. *Imp.* Cotton, and other manufactures, colonial produce, and coffee. *Exp.* Olive oil, wool, silk, figs, currants, and raw agricultural produce. *Army,* about 1,500, cavalry inclusive. *Navy.* Small. *Rel.* Greek Church. *Gov.* Limited monarchy. The country is divided into ten governments, called nomarchies. Three of these are in Hellas—Attica and Bœotia, Ætolia and Acarnania, Locris and Phocis. Five are in the Morea—Achaia and Elis, Argolis and Corinth, Arcadia, Laconia, and Messina. Two in the islands—Cyclades and Eubœa. The king exercises the power of the executive, and commands the army and the navy. *Pop.* about 1,000,000. *Lat.* between 36° 23′ and 39° 30′ N. *Lon.* between 20° 45′ and 26° E.—This country has been considered superior to every other part of the earth, on account of its salubrity and temperature, and also an account of the learning and arts of its inhabitants. The Greeks have severally been called Achæans, Argeans, Danai, Dolopes, Hellenes, Ions, Myrmidons, and Pelasgi. The most celebrated of their cities were Athens, Sparta, Argos, Corinth, Thebes, Sicyon, Mycenæ, Delphi, &c. In the first ages, the Greeks were governed by monarchs; but the monarchical power gradually decreased, and the love of liberty established the republican government. No part of Greece, except Macedonia, remained in the hands of an absolute sovereign. The expedition of the Argonauts first, and, in the succeeding age, the wars of Thebes and Troy, gave opportunity to their heroes and demigods to display their valour in the field of battle. The establishment of the Olympic games, and the reward of the conqueror, which was a laurel crown, contributed not a little to their aggrandisement. The austerity of their laws, and the education of their youth, particularly at Lacedæmon, rendered them brave and active, insensible to bodily pain, fearless and intrepid in the time of danger. The celebrated battles of Marathon, Thermopylæ, Salamis, Platææ, and Mycale, sufficiently show what superiority the courage of a little army can obtain over millions of undisciplined barbarians. After many signal victories over the Persians, they became elated with their success, and then began to turn their arms one against the other. While the Greeks rendered themselves so illustrious by their military exploits, the arts and sciences were highly cultivated. The labours of the learned were received with admiration, and the merit of a composition was determined by the applause or disapprobation of a multitude. Their generals were orators, and eloquence seemed to be connected with the military profession; their language became almost universal, and their country was the receptacle of the youths of the neighbouring states, where they imbibed the principles of liberty and moral virtue. They planted many colonies, and entirely peopled the western coasts of Asia Minor. In the eastern parts of Italy, there were also many settlements made. The spirit of Greece, however, was crushed by the Romans; and, in 1718, she became a Turkish province. In 1821 the ancient spirit seemed to have revived in the modern Greeks, and they determined to be free. The struggle was severe and protracted; but, by the interference of the great European powers, the Turks were forced to acknowledge Greece an independent state in 1829. (*See* ATHENS.)

GREEN, Robert, *green,* an English poet, was a man of wit and talents, but noted alike for his good advice and bad example. He is said to have been the first Englishman who wrote for bread; but whether this be the case or not, he had great vivacity of mind, and a fertile imagination, which he had increased by extensive reading. He crowded simile upon simile, and wrote in accordance with the Euphean sect, fashionable in his time. The criticism of Hallam, in his "Literary History of Europe," is, that "Green succeeds pretty well in that florid and gay style, a little redundant in images, which Shakspeare frequently gives to his princes and courtiers, and which renders some unimpassioned scenes in his historic plays effective and brilliant." The same critic speaks of his novels, however, as "deplorable specimens." B. at Ipswich, 1560; D. in London, 1592.

GREEN, Matthew, an English poet, who was bred a dissenter, which sect he quitted, and ridiculed in his poem of "The Spleen." He obtained a place in the Custom-house. B. in London, 1696; D. 1737.—His poems, which possess great merit, were published in Dodsley's collection, and together, in 1 vol., in 1796.

GREENBUSH, *grene'-boosh,* a town of the United States, New York, 1 mile from Albany. *Pop.* 4,300.

GREENE, *green,* the name of numerous counties in the United States, with populations ranging between 5,000 and 33,000.—They are in the states of New York, Pennsylvania, Virginia, Carolina, Georgia, Alabama, Mississippi, Tennessee, Kentucky, Ohio, Indiana, Illinois, Missouri, and Wisconsin. Also the name of numerous townships, none of them with a population above 4,000.

GREENE, Maurice, Mus. Doc., a celebrated composer of English church music, who received his education in St. Paul's choir, under Brind, the organist. He first became organist of St. Dunstan's in the West, and subsequently succeeded his former master as organist of St. Paul's Cathedral. On the death of Dr. Croft, he became organist and composer to the Chapels Royal, and, in 1736, was appointed master of his majesty's band. Previous to this appointment, he had the degree of Doctor of Music conferred on him at Cambridge, for his exercise on Pope's "Ode on St. Cecilia's Day." The fame of Doctor Greene rests on his "Forty Anthems, for one, two, three, four, five, six, seven, and eight voices." These place him at the top of English ecclesiastical music composers. B. in London at the end of the 17th century; D. 1755.

GREENFIELD, *green'-feeld,* the name of several townships in the United States, none of them with a population above 3,000.

GREENHITHE, *green-hithe',* a hamlet of England, in Kent, on the banks of the Thames, 3 miles from Dartford. *Pop.* about 1,300, mostly employed in lime-works.

GREENLAND, *green'-land,* an extensive country of N.E. America, to the north of Davis's Straits. It is the most northern land of the western hemisphere. On the W. it is bounded by Davis's Straits and Baffin's Bay; on the N. by some unknown ocean, or by the north pole; on the E. by the Arctic Ocean; and on the S.E. by the Atlantic Ocean. *General Desc.* High, rocky, and sterile. A central ridge of lofty mountains, covered with perpetual snow, stretches from north to south, and divides it into East and West Greenland. The coasts are surrounded by many thousand islands of different sizes, on which the inhabitants frequently fix their residence, on account of their good situation for sea game. In the inlets and bays which intersect the coast, immense masses of ice are accumulated during a series of years, which, being loosened during the heat of summer, lose their points of support from the shore, and being set adrift by the currents, embarrass the navigation of the polar seas, and become the terror of the mariner. Those masses of ice are formed both of fresh and of salt water, and sometimes rise more than 500 feet above the surface of the water. *Climate.* Owing to its northern position, Greenland is exposed to all the rigours of the frozen zone. During summer, the heat, particularly in the islets, is very great; insomuch that, in the month of July, Fahrenheit's thermometer sometimes rises to 84° in the shade. *Zoology.* The animals which are most abundant are white hares, reindeer, dogs resembling wolves, Arctic foxes, and white bears, which are very fierce and mischievous. Ravens are plentiful, and eagles of a very large size, falcons, with other birds of prey. The seas abound in whales, seals of different kinds, sea-cows, swordfish, porpoises, halibut, turbot, cod, haddock, with various other sorts of white fish. *Inhabitants.* The Greenlanders, or Esquimaux, of both sexes are generally short, or under the common size, but well-proportioned, fat, and plump. They are allied to the Mongolian race, and are miserably poor, depending on hunting and fishing for their subsistence. In their houses and manner of living they have the general habits of savages. In the S. they grow a little corn, some potatoes, and kitchen herbs. *Pop.* estimated at 8,000 or 9,000. *Lat.* between 59° 49′ and 78° N. *Lon.* between 20° and 75° W.—Greenland was first discovered

by a Norwegian, between the 8th and 9th century. A colony was established, which continued to increase and thrive; and, in a little time, the country contained twelve parishes, 190 villages, one bishop's see, and two convents, under the jurisdiction of the archbishop of Drontheim. A colony had also been settled in West Greenland, which maintained a constant intercourse with Europe, and increased to four parishes, containing a hundred villages. Davis re-discovered the country in 1587, and the Danes re-established communication with the lost colony. The commerce of Greenland is principally carried on with Denmark. It consists mostly of seal and whale oil, fox-skins, and eider-down.

GREEN MOUNTAINS, a range of mountains in North America, extending through Massachusetts and Connecticut, and terminating in New Haven. The highest summits are 4,000 feet above the level of the sea.

GREENOCK, *gren'-ok*, a seaport-town of Scotland, in Renfrewshire, on the Firth of Clyde, 23 miles from Glasgow. It contains many neat and well-built houses; but its streets are irregular and narrow, and its general appearance is far from being elegant. In the centre of the town is a square, on the south side of which is a neat church, with a spire 146 feet high. There are other two established churches,—the West and the East church, besides places of worship for other denominations. The other public buildings consist of an infirmary, a bridewell; and, in the Commercial Buildings, there is a large room appropriated to newspapers and nautical intelligence, and open, without introduction, to all strangers. There is another apartment, exclusively for underwriters and insurance-brokers. Under the same roof is a suite of apartments for balls and concerts, and immediately attached, forming as it were a part of the same building, is a neat theatre. The Custom-house is a splendid edifice, being in front 120 feet broad, and each end upwards of 50 feet. It includes also the excise. *Manf.* Sugar-houses, rope-works, soap and candle works, tan-works, potteries, bottle and crystal works, breweries, a sailcloth manufactory: to these may be added shipbuilding to a considerable extent. The herring-fishery is the oldest, and still the greatest branch of local industry in Greenock. Prior to 1097 it was an inconsiderable fishing-station; but on the 12th of March in that year, the directors of the Scottish, Indian, and African Company came to a final resolution to erect salt-works in the firth; and out of circumstances that occurred in the deliberations of that sitting, the attention of the superior, Sir John Shaw, was directed to the maritime advantages of the situation. The harbour is very spacious and commodious. *Pop.* about 38,000.—It is connected with Glasgow by railway.

GREENOUGH, Horatio, *green'-uf*, a distinguished American sculptor, who, at an early age, displayed a talent for drawing and modelling, and adopted sculpture for his profession. With the view of studying his art at its source, he proceeded to Rome, where he remained for some years; but his health giving way, he was forced to revisit his native country. He soon returned to Europe, however, and, fitting up a studio at Florence, devoted himself to his art. Here he produced his colossal statue of Washington, now in the grounds of the Capitol at Washington, and the "Pioneer's Struggle," now in the Capitol itself. In 1851 he returned to America to erect his group of the "Rescue," but his health was such as gave no prospect of his being able to continue his professional studies. B. at Boston, Massachusetts, 1805; D. 1852.

GREENVILLE, *green'-vil*, a county of the United States, in Virginia. *Area*, 448 square miles. *Pop.* 6,000.—A district in S. Carolina. *Area*, 724 square miles. *Pop.* 21,000.—Also the name of several townships, none of them with a population above 4,000.

GREENVILLE, Sir Richard, a gallant English officer, who served in the imperial army in Hungary, against the Turks, and, on his return, engaged in the reduction of Ireland. In 1551 he represented Cornwall in parliament, about which time he received the honour of knighthood. In 1585 he undertook an expedition to America, and, in 1591, was appointed vice-admiral of a squadron sent out to intercept a rich Spanish fleet. He proceeded as far as the Western Islands, and while there, a powerful squadron was sent from Spain to escort the Plate fleet. On their approach, the English admiral, Thomas Howard, proceeded to sea; but Greenville, in the *Revenge*, staying to take on board some of his sick crew, was surrounded by the whole Spanish fleet. He defended his ship with the utmost bravery, and, after receiving several wounds, was about to sink her, but was carried on board the Spanish admiral's ship, where he died, three days after. B. in Devonshire, 1540.

GREENWICH, *grin'-ij*, a market-town of England, in Kent, on the Thames, immediately below Deptford, 4 miles from London bridge. It was formerly the seat of a palace, in which the kings of England used occasionally to reside, and is now celebrated for the splendid hospital into which this was converted in the reign of William III. It is also distinguished in the history of science for its observatory. Greenwich Hospital consists of four extensive piles of building or wings, entirely detached from each other, into the four corners nearly of a great square, but, at the same time, so connected, by the conformity of their dimensions, their figures, and the general arrangement of their decorations, as still to constitute a complete whole. The principal front of this structure, which is nearly all of Portland stone, is toward the Thames on the north. The north-west angle is occupied by King Charles's building, the north-east by Queen Anne's, both of them lying next the river; and the posterior wings, towards the south, are formed of King William's building on the west, and Queen Mary's on the east. The two northern wings are separated by a square, in the middle of which is a statue of George II., sculptured by Rysbrach, out of a single block of white marble. Extending 865 feet along the front, the intervening bank of the Thames is formed into a terrace, with a double flight of steps to the river in the middle. King Charles's building contains apartments for the governor and lieutenant-governor, the council-room, fourteen wards for the pensioners, and various other chambers. Queen Anne's building is occupied with officers' apartments, and twenty-four wards. King William's contains the great hall, vestibule and dome, designed and erected, between 1698 and 1703, by Sir Christopher Wren. This building contains eleven wards. Queen Mary's building comprises the chapel, built from the designs of Stuart, on the site of a former edifice, destroyed by fire in 1779. One of the highest efforts of West, the "Shipwreck of Paul," forms the altar-piece; and the hall is also adorned with representations of sea-fights, statues and portraits of naval heroes. The pensioners to be received into the hospital must be aged and maimed seamen of the navy, or of the merchant service, if wounded in battle, and marines and foreigners who have served two years in the navy. It contains dormitories and dining-halls for about 2,700. In 1732 the forfeited estates of the earl of Derwentwater were made over to the hospital. *Pop.* including the parishes of Deptford and Woolwich, 106,000.—The manor of Greenwich was acquired by the crown, at the time of the Conquest, and has ever since remained in the hands of the royal family. Greenwich was the residence of Edward I.; the palace was built in 1433, by the duke of Gloucester. Edward IV. enlarged and improved it; Henry VII. resided much in it; and here Henry VIII., Queen Mary, and Queen Elizabeth, were all born. It was a favourite residence of Queen Elizabeth and other succeeding sovereigns; and the buildings were gradually enlarged and improved, until they attained their present state of magnificence.—GREENWICH PARK was detached from the palace when this became part of the hospital, and is still in the hands of the crown. The ranger's lodge now forms the centre of the naval asylum, designed for the support and education of the orphan children of seamen. On a rising ground in the park, and commanding one of the most varied prospects that can well be conceived, stands the Royal Observatory, for ever celebrated by the great names with which it is associated.

GREENWICH, the name of several townships in the United States, none of them with a population above 6,000.

GREGORY THE GREAT, *greg'-o-re*, Pope, was appointed prefect of the city of Rome, and held other civil dignities; but, being inclined to a religious life, he retired to the monastery of St. Andrew, of which

he became abbot. On the death of Pelagius, in 590, he was elected pope. B. 544; D. 604.—He sent Austin the monk to convert the English to Christianity.

GREGORY II., ST., succeeded Constantine in the pontificate in 715, and died in 731.

GREGORY III., a native of Syria, succeeded to the pontificate in 731, and died in 741.—He sent legates to Charles Martel to demand succour against the Lombards, which embassy is considered to be the origin of the apostolic nuncios in France.

GREGORY IV., a native of Rome, succeeded to the pontificate in 827, and was greatly esteemed for his learning and piety. D. 844.

GREGORY V., a native of Germany, and a kinsman of the emperor Otho, was elevated to the pontificate in 996. An anti-pope, named John XVII., was set up against him by Crescentius, consul of Rome, but was expelled by the emperor. D. in 999.

GREGORY VI., a native of Rome, was elected pope in 1044. Finding the lands and revenues of his church greatly diminished by usurpations, and the roads infested by robbers, he acted with such vigour, that a powerful party was raised against him by those who had been accustomed to live by plunder. At a council, held at Sutri in 1046, Gregory abdicated the pontificate.

GREGORY VII. was the son of a carpenter of Soano, in Tuscany, and succeeded to the pontificate in 1073. This pope formed vast projects for the reform of the Church, and, in attempting to execute them, assumed unexampled powers. But he was embroiled with the emperor Henry IV., and, after a violent struggle, retired to Salerno, where he died in 1085.

GREGORY VIII. succeeded Urban III. in 1187, and died the same year, after having exhorted the Christian princes to undertake a new crusade. He is not to be confounded with the anti-pope Bourdin, who assumed the same name. B. at Benevento.

GREGORY IX. was nephew of Innocent III., of the family of the counts of Segni. He was elected pope in 1227, and caused a new crusade to be undertaken, in which the emperor Frederick II. engaged, notwithstanding which he twice excommunicated that prince. D. 1241.

GREGORY X., of the illustrious family of Visconti, was elected pope in 1271, at which time he was in the Holy Land. He assembled a council at Lyons, to promote a union between the Eastern and Western churches, and other objects. D. 1276.

GREGORY XI., Peter Roger, a native of Limousin, in France, was a nephew of Clement VI., and son of the count of Beaufort. He was elevated to the pontificate in 1370, was a patron of learning, and endeavoured to reconcile the princes of Christendom, and to reform the religious societies. He transferred the papal see from Avignon to Rome, where he died, 1377.

GREGORY XII., Angelo Corario, a native of Venice, was raised to the pontificate in 1406, during the schism in the East; Benedict XIII. being the other pope. Both were deposed by a council held at Pisa, and Alexander V. elected in their stead. Gregory submitted, and laid aside the pontifical dignity. D. 1417.

GREGORY XIII., a native of Bologna, succeeded Pius V. in 1579. He embellished Rome with many fine buildings; but that which more particularly marks his government, is the reform of the calendar, which goes by his name. He contributed greatly to correct and amend Gratian's "Decretals," which he enriched with learned notes. D. in 1585.

GREGORY XIV., Nicholas Sfondrate, succeeded Urban VII. in 1590. He was the son of a senator of Milan, and involved himself in an unsuccessful war against Henry IV. of France. D. in 1591.

GREGORY XV., Alexander Ludovisi, a Bolognese, descended of an ancient family, was elected pope in 1621. He wrote several works, among which is one entitled "Epistola ad Regem Persarum, Schah Abbas, cum Notis Hegalsoni," 8vo, 1627. D. 1623.

GREGORY XVI., Mauro Capellari, was elected pope in 1831. He was a man of respectable character, but bigoted and exclusive. D. 1846, and was succeeded by Pius IX.

GREGORY, George Florence, commonly called Gregory of Tours, a Romish saint, was chosen bishop of Tours in 573, and, in 578, distinguished himself in a council at Paris. He is said to have converted Chilperic from Pelagianism. B. at Auvergne, 573; D. 595. —Gregory was the author of a History of the Franks, in 10 books; and other works.

GREGORY NAZIANZEN, bishop of Constantinople, wrote poems to furnish the Christian youth with subjects for study, when Julian prohibited Christians from reading the books of the Gentiles. In 378 he was appointed by the council of Antioch, to go to Constantinople to suppress Arianism, and was there chosen bishop. He afterwards resigned that see and retired to his native country, where he died, in 389. B. 324, near Nazianzum, in Cappadocia.

GREGORY NYSSEN, the younger brother of St. Basil, was bishop of Nyssa, in Cappadocia, but was deposed by the Arian faction. He drew up the Nicene creed, by order of the council of Constantinople. D. about 400. His works were published at Paris in 1615, in 2 vols. folio.

GREGORY, John, a physician, the son of Dr. James Gregory, professor of medicine in King's College, Aberdeen. After studying at his native place, he removed to Edinburgh, and thence to Leyden. In 1745 he obtained the degree of doctor of physic, and became professor of philosophy at Aberdeen, which he exchanged in 1749 for that of physic. About 1751 he settled in London, and was chosen a fellow of the Royal Society. In 1764 he removed to Edinburgh, where, in 1766, he also became professor of physic. B. at Aberdeen, 1724; D. at Edinburgh, 1773.—His works are, on the "Duties and Offices of a Physician," 8vo; "Elements of the Practice of Physic," 8vo; "A Father's Legacy to his Daughters," 12mo. All his productions have been collected into four volumes.

GREGORY, James, a celebrated mathematician, who, at an early age, discovered a genius for the mathematics, which he cultivated with eagerness in the Marischal college of Aberdeen. In 1663 he published his "Optica Promota," in which he announced the invention of the reflecting telescope, which spread his name over Europe. Soon after this he made a tour to Italy, and resided some years at Padua, where he published his "Vera Circuli et Hyperbolæ Quadratura," &c., in which appeared an account of his discovery of an infinitely converging series for the areas of the circle and hyperbola, and the mode of computing them. Soon after his return to England he was chosen a fellow of the Royal Society, and engaged in a controversy with Huygens on the subject of his treatise on the quadrature of the circle. In 1668 he was appointed professor of mathematics in the university of St. Andrew's. He had an amicable controversy with Newton concerning the reflecting telescope; in the course of which he suggested the idea of a burning concave mirror, which came into universal repute. In 1674 he became professor of mathematics at Edinburgh, where he died in the year following, after being struck with sudden blindness as he was lecturing. B. at Aberdeen, 1638. His "Optics" were translated into English by Dr. Desagulieres, and several of his papers are in the "Philosophical Transactions."

GREGORY, David, nephew of the above, completed his education at Edinburgh, where he took the degree of M.A., and in 1684 became professor of mathematics in that university. In 1691, by the recommendation of Newton, he was chosen a member of the Royal Society, and elected Savilian professor of astronomy at Oxford. In 1695 he published his "Catoptricæ et Dioptricæ Sphericæ Elementa," 8vo. His demonstration of the curve, called the *catenarian*, appeared in 1697, in the "Philosophical Transactions;" but his greatest work was published in 1702, and entitled, "Astronomiæ Physicæ et Geometricæ Elementa," folio. It was afterwards translated into English in 2 vols. 8vo. In 1703 he published a splendid edition of Euclid's works in folio. B. at Aberdeen, 1661; D. while engaged in superintending an edition of "Apollonius's Conics," in 1710.—After his death appeared a treatise on Logarithms, and another on practical geometry. His brother James became professor of mathematics at Edinburgh, which he held thirty-three years. His other brother, Charles, was professor of mathematics at St. Andrew's thirty-two years, and was succeeded by his son David, who published a system of arithmetic and algebra in Latin. D. in 1763. Of this family, sixteen have held British

professorships. There are few names, therefore, more illustrious in the annals of science and literature.

GREIFENBERG, *grife'-en-bairg*, the name of several towns in Prussia, none of them with a population above 5,000.

GREIFENHAGEN, *grife-en-ha'-gen*, a town of Prussian Pomerania, on the Oder, 12 miles from Stettin. *Manf.* Woollen cloths and leather. *Pop.* 6,000.

GREIFSWALDE, *grifes-val'-de(r)*, a town of Prussian Pomerania, on the Rick, 18 miles from Stralsund. It is inclosed by walls, and has a public library of 20,000 volumes. *Pop.* 13,500, military inclusive.

GREITZ, *gritze*, a town of Central Germany, 50 miles from Leipsic. It is inclosed by walls, and is the residence of a sovereign prince. *Manf.* Woollens and cottons. *Pop.* 7,000

GRENADA, *gren'-a-da*, an island in the West Indies, belonging to the Windward group. *Area*, 140 square miles. *Desc.* Mountainous, a ridge of high land crossing it from N. to S.; but, on the whole, it is fertile in a great degree, and, by the variety as well as excellence of its soil, is adapted to every tropical production. The climate, however, is unhealthy. *Pop.* with dependencies, 29,000. *Lat.* 12° 2′ N. *Lon.* 61° 18′ W. —Grenada was discovered by Columbus, in the year 1498. It was originally settled by the French, and in 1762 was taken by the British, to whom it was confirmed by the peace of 1763.

GRENDON, *gren'-don*, the name of several parishes in England, none of them with a population above 700.

GRENELLE, *gre-nel'*, a parish and village of France, comprised within the fortifications of Paris, and celebrated for the artesian well. 1,704 feet deep, which supplies the upper part of Paris with water. *Pop.* 8,000.

GRENOBLE, *gren'-obl*, a fortified town of France, in the department of the Isère, and divided by the river Isère into two parts, which are joined by two bridges, 60 miles from Lyons. The streets are tolerably wide and regular, but the houses are ill-built, and part of the town is exposed to inundations from the Isère. The town is surrounded with ramparts. The public buildings are the ancient Hôtel de Lesdiguières, now the town-house, the court-house, the cathedral, and, on an eminence near the middle of the town, stands the ruins of a once strong citadel, called the Bastile. There are, besides, a university, a great provincial school, an academy of arts and sciences, societies of medicine and agriculture, schools of surgery and midwifery, and the artillery school. To these institutions belong a library, a museum, a botanical garden, a cabinet of natural history, and a small cabinet of antiquities. *Manf.* Gloves, cotton articles, hemp, and different kinds of liquors. *Pop.* 32,000.—This was the first place which, in 1815, openly received Napoleon I. on his escape from Elba.

GRENVILLE, William Wyndham, Lord, *gren'-vil*, was the third son of the Right Honourable George Grenville, and studied at Eton College and Oxford University. In 1782 he became a member of the House of Commons; and Mr. Pitt, subsequently, gave him the office of paymaster of the army. In 1789 he was elected speaker of the House of Commons, and the following year, became secretary of state for the home department. At the same time he was created Baron Grenville. In 1791 he became secretary of state for foreign affairs. For some years he was now out of office; but, on the death of Mr. Pitt, he became first lord of the Treasury. In 1809 he was chosen chancellor of the University of Oxford, and, up to 1815, usually acted in conjunction with Earl Grey. Towards the latter part of his life, he retired from the public eye, and died at Dropmore Lodge, Buckinghamshire, 1834; B. 1759.

GRESHAM, Sir Thomas, *gresh'-dm*, was a merchant of the days of Queen Elizabeth, and amassed a large fortune. In 1559 he received the honour of knighthood from his sovereign queen, and was frequently consulted by her in her political and commercial concerns. He founded the Royal Exchange, and in January, 1570, the queen dined at his house, and caused the building to be so named, and had it proclaimed by sound of trumpet. The original structure was burned in the great fire of 1666; but it was rebuilt on a larger scale. It was, in 1838, again destroyed by fire; but was replaced by the present building, which was opened by Queen Victoria in 1844. B. in London, 1519; D. 1579.

GRETNA, or GRAITNEY, *gret'-na*, a parish and village of Scotland, in Dumfriesshire. The village of Graitney, or Gretna Green, is famous for the marriages of fugitive lovers from England, which were wont to be generally celebrated here. *Pop.* 1,945.

GRÉTRY, André Ernest Modeste, *grai'-tre*, a French musical composer, who, in early youth, discovered a great passion for music, and went to study in Italy. Returning thence, he brought with him the knowledge of a pure and simple melody, lively but graceful. The

GRÉTRY.

true comic accent was given by him to the language of music, and he deserved his surname of the "Molière of Music." Amongst his numerous operas may be named the "Huron," which commenced his reputation, and of which the words were written by Marmontel; "L'Amant Jaloux," "La Caravane," "Richard Cœur de Lion." Grétry also produced an essay on music, in which he described his method. B. at Liège, 1741; D. at Rousseau's hermitage at Montmorency, which had become his property, 1813.—He came of a family of musicians; and his nephew, André Joseph, wrote some comic operas, comedies, and romances, which had, however, little success. B. at Boulogne, 1774; D. 1826.

GRETSCH, or GRECH, *gretch*, an eminent Russian *littérateur*. He edited several influential periodicals, among which may be named the "Northern Bee" and the "Circulating Library." In 1835 he started the great Russian Encyclopædia, but seceded from it in its 7th volume. In 1822, he published a "History of Russian Literature," which is one of the best works of the kind that has yet appeared. He also published some grammars of the Russian language, which, for practical purposes, are esteemed the best. B. at St. Petersburg, 1787.

GREVILLE, Fulke, Lord Brooke, *grev'-il*, a patron of letters and an ingenious writer, was in great favour with Elizabeth. He was created Lord Brooke by James I., who gave him Warwick Castle. He founded a history lecture at Cambridge. B. at Beauchamp Court, Warwickshire, 1554; stabbed by a servant whom he had reprimanded for an insolent expression, 1628. The man put an end to himself with the same weapon.—*After his lordship's death, appeared several of his poetical works, and the life of Sir Philip Sydney, written by him. Hallam calls him "of all our poets the most obscure."*

GREY, Jane, *gray*, a celebrated and unfortunate English lady, was the daughter of Henry Grey, marquis of Dorset, by Frances Brandon, daughter of the duke of Suffolk and Mary, queen dowager of France and sister to Henry VIII. From her childhood she evinced an intelligent and amiable turn of mind, and was so far advanced in her education at the age of fourteen, that when the learned Ascham visited her family, he found her reading Plato's "Phædon" in Greek. She was also well acquainted with several modern languages.

Her religious principles were those of the Reformation, and her virtue and modesty equalled her other accomplishments. When the health of Edward VI. began to decline, Dudley, duke of Northumberland, persuaded him, from a pretended concern for the interests of religion, to bequeath his crown to Lady Jane; thus setting aside his sisters Mary and Elizabeth. About the same time, the duke effected a marriage between his son, Lord Guildford Dudley, and Lady Jane Grey. On the death of Edward, her father and the duke of Northumberland, much against her own wishes, paid homage to her as queen, and had her proclaimed in London with the usual formalities. This pageantry, however, lasted only a few days; for Mary proved successful, and the duke of Northumberland was beheaded, and Lady Jane and her husband sent to the Tower. After being confined some time, the council resolved to put these innocent victims of their father's ambition to death. Lord Guildford suffered first, and as he passed her window, his lady gave him her last adieu. Immediately afterwards, she was executed on the same scaffold, suffering with calm resignation, and a firm attachment to the Protestant faith, 1554. B. 1537.—Fuller, in his "Holy State," says, "she had the innocency of childhood, the beauty of youth, the solidity of middle, the gravity of old age. . . . the birth of a princess, the learning of a clerk, the life of a saint, yet the death of a martyr, for her parent's offences."

Grey, Charles, Earl, was educated at Eton and Cambridge, after which he proceeded on a tour to the continent, and on his return, in 1786, became a member of parliament for the county of Northumberland. He took the liberal side, and, in 1792, was one of the founders and most active members of the "Society of the Friends of the People." In 1797 he brought forward a motion for parliamentary reform, for which he continued to labour strenuously, although he was, for many years, unsuccessful in carrying the object of his wishes. When Lord Grenville, in 1806, came into office, he, as Lord Howick, from the elevation of his father to the peerage, became first lord of the Admiralty, and, as one of the leaders of the House of Commons, carried the act for the abolition of the slave-trade. In the following year, the cabinet was broken up, and he, in the same year, succeeded to the title, by the death of his father. In the House of Lords he became one of the leaders of the opposition. For many years he remained out of office; but, in 1830, he was called upon by William IV. to form a new cabinet, after the fall of the Wellington administration. He accordingly became prime minister, and announced "peace, retrenchment, and reform" as the objects of his policy. In 1831 the Reform Bill was introduced by Lord John Russell into the House of Commons; but, in the following year, the ministers resigned, on account of a motion of Lord Lyndhurst. They were restored to power, however, and, in the same year, the bill was passed. In the succeeding year, Earl Grey resigned, and, after about a couple of years, retired from public life. B. at Fallowden, near Alnwick, 1764; D. at Howick House, Northumberland, 1845.

Grey, Henry George, third earl, the eldest son of the above, received his education at Trinity College, Cambridge, and, in 1829, entered parliament as member for the disfranchised borough of Winchelsea. In 1831 he represented the county of Northumberland, and, in the previous year, filled the office of under-secretary of state for the colonies. In 1834 he became under-secretary for the home department, and in the following year, under the Melbourne administration, was appointed secretary-at-war. In July, 1845, his father died, when he was called to the House of Lords, and became colonial secretary in the administration of Lord John Russell. At this period the colonies were demanding a representative government, which Earl Grey opposed, and which led to considerable misunderstandings in the colonial office. In 1852 he retired from his post, and vindicated his administration in a treatise of considerable length. In 1853 he declined to serve under Lord Aberdeen, and has ever since continued out of office. B. 1802.

Grey, Sir George, K.C.B., entered the army, and rose to the rank of captain, when, in 1836, he offered himself, in conjunction with Lieutenant Lushington, to Lord Glenelg, then colonial secretary, to undertake a journey of discovery in Australia. In the following year, he proceeded on his expedition, and, after an absence of four years, arrived in England, and published the journals of his discoveries. He was now appointed lieutenant-governor of South Australia, and produced "A Vocabulary of the Dialect of South-Western Australia." In 1846 he became governor of New Zealand, and published a work entitled "Polynesian Mythology, and Ancient Traditional History of the New Zealand Race." In 1848 he was created a knight-commander of the Bath, and in 1854 he was appointed governor and commander-in-chief at the Cape of Good Hope, where he won golden opinions. B. in Ireland.—There are many others of this name, known as legislators and administrators, connected with the English government.

Grey, Dr. Zachary, an English divine, well known for his edition of "Hudibras," accompanied with a great number of curious and entertaining notes, 2 vols. Of these notes, Warburton says, that "he hardly thinks there ever appeared, in any learned language, so execrable a heap of nonsense, under the name of commentaries, as hath lately been given us on this satiric poet." He also published notes on Shakspeare, 2 vols.; and an answer to Neale's "History of the Puritans," in 3 vols. 8vo. B. 1687; D. 1766.

Griesbach, John James, *grees'-bak*, a distinguished German theologian, who studied successively at Frankfort, Tubingen, Halle, and Leipsic. He subsequently became rector of the university of Jena, and ecclesiastical privy councillor to the duke of Saxe-Weimar. His works are very numerous; but the principal is an edition of the Greek Testament, with various readings. B. at Butzbach, 1745; D. 1812.

Griffin, *grif'-fin*, prince of Wales, was the last sovereign of that country previous to its being subjugated by England. He was put to death by order of Edward the Confessor, at London, in 1060.

Griffith, Ralph, *grif'-fith*, a man of letters, who was born in Shropshire, settled in London as a bookseller. In 1749 he commenced the "Monthly Review," the success of which was very slow for a considerable time; but it made its way gradually to the height of periodical journals. Of this work he was both proprietor and editor, being powerfully assisted, from time to time, by men of first-rate talents. D. 1803.

Grignan, *green'-ya*, a town of France, in Provence, 34 miles from Valence. *Pop.* 2,000.—Madame de Sevigné died here in 1696.

Grignols, *green'-yole*, the name of two towns in France, neither of them with a population above 1,800.

Grimm, Jacob Ludwick Carl and Wilhelm Carl, *grim*, two brothers, whose devotion to German literature was distinguished by a rare communion of fellowship between them. The nature of their labours is, perhaps, sufficiently indicated in the following quotation made by a contemporary from the works of Jacob: "All my labours," he says, "have been, either directly or indirectly, devoted to researches into our ancient language, poetry, and laws. These studies may seem useless to many; but to me, they have always appeared a serious and dignified task, firmly and distinctly connected with our common fatherland, and calculated to foster the love of it. I have esteemed nothing trifling in those inquiries, but have used the small for the elucidation of the great,—popular traditions for the elucidation of written documents. Several of my books have been published in common with my brother William. We lived, from our youth up, in brotherly community of goods, money, books, and collectanea, belonging to us in common; and it was natural to combine our labours." These brothers have been some time employed in the publication of a large German dictionary, which is expected to be valuable when completed. Jacob B. at Hanau, 1785; William, at Hanover, 1786.

Grimma, *grim'-ma*, a town of Saxony, on the Mulda, 15 miles from Leipsic. It is inclosed by walls, and has a gymnasium. *Manf.* Woollens and cottons. *Pop.* 5,500.

Grimsby, Great, *grims'-be*, a market, borough, and seaport town of Lincolnshire, on the Humber, 15 miles from Hull. It has a large and handsome

church, and contains many ancient monuments. The steeple affords an excellent specimen of the pointed, or Gothic architecture. It is a busy place, with extensive docks and shipbuilding-yards. *Pop.* 9,000. It is a terminus of the East Lincolnshire and Lancashire Railways.

GRINDAL, Edmund, *grin'-dal*, archbishop of Canterbury, was educated at Cambridge, where he obtained a fellowship in Pembroke Hall. Being attached to the principles of the Reformation, he became chaplain to the king, and prebendary of Westminster; but on the accession of Mary, he retired to Germany, and settled at Strasburg. When Elizabeth ascended the throne, he returned, and ultimately, in 1575, was made archbishop of Canterbury; but lost the royal favour, and was suspended for a time. B. in Cumberland, 1519; D. at Croydon, 1583. He contributed to Fox's "Acts and Monuments."

GRINSTEAD, EAST. (*See* EAST GRINSTEAD.)

GRIS-NEZ, CAPE, *gre'-nai*, a headland of France, in the department of Pas-de-Calais, 10 miles from Boulogne. *Lat.* of lighthouse, 50° 52′ N. *Lon.* 1° 23′ E.

GRISONS, COUNTRY OF, *gre'-sawng*, a canton in the east of Switzerland, inclosed by Upper Austria, Venetian Lombardy, and the small cantons of Ticino, Uri, Glarus, and St. Gall. *Area*, 2,980 square miles. *Desc.* The natural division of the country is into five great valleys; viz. those of the anterior and posterior Rhine; that of the Engadine, or valley of the Inn; that of the Albula; and lastly, that of the Prettigau. The surface is mountainous throughout, the country being intersected by several lofty ranges of the Alps, some of them of great elevation, and covered with glaciers. In the highest ranges, winter reigns throughout the year; in the elevated plains and meadows, the summer continues for only three months; but in the lower valleys the climate is mild and pleasant during a considerable part of the year. *Pro.* Fruits, corn, hemp, flax; but cattle are the principal source of wealth to the inhabitants. *Minerals.* Iron, lead, and zinc; but few of the mines are worked. *Manf.* Cotton and linen fabrics, mostly for domestic use. *Pop.* 90,000. This canton comprises a great number of petty republics united into three jurisdictions, called "God's House," "Grey," and "Ten Jurisdiction" Leagues.

GRODNO, *grod'-no*, an extensive government of Russia, forming part of Lithuania, and adjacent to the governments of Wilna and Minsk. *Area*, 14,706 square miles. *Desc.* Level in general, but the S. is covered, in some places, with marshes. *Rivers.* The Niemen, Bug, and Narew. *Pro.* Rye and other grains, flax, hemp, and hops. Large herds of sheep are reared, and wool is the principal export. *Forests.* Extensive. *Minerals.* Iron, nitre, chalk, and building-stone. *Manf.* Leather and woollen cloths. *Pop.* 908,000. *Lat.* between 52° and 54° N. *Lon.* between 24° and 26° E.

GRODNO, a town of Russia, on the Niemen, 90 miles from Wilna. It consists of a mixture of wooden huts, and of houses once the residence of noblemen, but now neglected and in ruins. It is the seat of an academy, and has a gymnasium and a botanic garden. *Manf.* Woollens, linen, and fire-arms. *Pop.* Unascertained.

GRONINGEN, *gro'-ning-en*, a province of the Netherlands, bounded by the German Ocean on the N., by Hanover on the E., and by the Dutch provinces of Drenthe and Friesland on the S. and W. *Area*, 886 square miles. *Desc.* The surface is level, and the whole province is intersected by canals and wet ditches. Its chief wealth lies in its pastures, which are uncommonly rich, and raise an excellent breed of cattle. *Pop.* 190,000.

GRONINGEN, a fortified town of the Netherlands, capital of the province of the same name, 96 miles from Amsterdam. It has several squares and handsome public buildings; in particular, the prince's palace, the meeting-house of the provincial assembly, the arsenal, and the custom-house. The church of St. Martin is in the Gothic style, with a tower of great height. The university of Groningen, founded in 1614, and endowed with the revenues of several monasteries, has long borne a respectable character. The harbour is commodious, and accessible to vessels by means of a canal. *Manf.* Paper, butter; and it has shipbuilding-docks and an extensive trade in cattle. *Pop.* 34,000.

GROOTE EYLANDT, *groot i'-land*, the largest island in the Gulf of Carpentaria, N. Australia. *Lat.* 14° S. *Lon.* 136° 40′ E.

GROSE, Francis, *grose*, an eminent English antiquary, who illustrated the antiquities of England and Wales in 4 vols., and those of Scotland in 2 vols. He was executing a work of the same kind relative to Ireland, when he died in Dublin, in 1791. B. at Greenford, Middlesex, 1731. Besides the above, he published a "Classical Dictionary of the Vulgar Tongue;" also, a volume of "Miscellanies," 8vo, and Military Antiquities," 4to.

GROSSETESTE, GROSTÊTE, or GROSTHEAD, Robert, *grose-tait*, an English prelate, who received his education at Oxford and Paris. After enjoying several preferments with great reputation, he was chosen bishop of Lincoln in 1234. He successfully resisted the encroachments of the papal power, and was a great encourager of learning. B. at Stradbrook, Suffolk, 1175; D. 1253. —His "Opuscula Varia" were published at Venice in 1514, and his "Compendium Sphæræ Mundi" in 1503. Some of his discourses and letters are extant. "He was a very learned man, and had a knowledge of Greek; but by a knowledge of Greek," says Hallam, "when we find it asserted of some mediæval theologian like Grostête, we are not to understand an acquaintance with the great classical authors, who were latent in Eastern monasteries, but the power of reading some petty treatise of the fathers (or, as in this instance, a translation of the Testament of the twelve patriarchs from Greek into Latin), an apocryphal legend, or, at best, perhaps some of the later commentators on Aristotle. Grostête was a man of considerable merit, but has had his share of applause."

GROSSWARDEN, *gros-var'-den*, an episcopal city of Hungary, 135 miles from Buda. It consists of eight suburbs, and has a fortress, a cathedral, and other churches. *Pop.* 22,000.

GROTE, George, *grote*, the historian of Greece, was the son of Mr. Grote, a banker, and was for some time a clerk in his father's banking-house. He began to devote himself to literature and politics, and, in 1832, became member of parliament for the city of London. In 1841 he resigned his seat, to apply himself exclusively to his great work, "The History of Greece," which has received universal commendation. Besides his History, Mr. Grote has been a contributor to several of the Reviews. B. near Beckenham, Kent, 1794.

GROTIUS, Hugo, *gro'-she-us*, an illustrious writer, was the son of a burgomaster of Delft, and, at the age of eight years, composed Latin verses of great merit. In his twelfth year, he was sent to Leyden, and, in 1598, accompanied the ambassador Barnevelt to the court of Henry IV. of France, who was so pleased with Grotius, that he gave him his picture and a gold chain. While in France he took the degree of doctor of laws. The year following, he commenced practice as an advocate, and pleaded his first cause at Delft. Soon afterwards, he published an edition of Martianus Capella, which was followed by a translation of a work of Stevinus, on finding a ship's place at sea. His edition of the "Phenomena" of Aratus appeared in 1600, and, about the same time, he composed Latin tragedies on sacred subjects. He was now appointed historiographer of the United Provinces, and advocate-general of the treasury for Holland and Zealand. In 1613 he accepted the post of pensioner of Rotterdam, by which means he obtained a seat in the States of Holland, and was sent to England to settle a dispute on the subject of the Greenland fishery. During the contests which arose in Holland on account of religion, Grotius sided with the Arminians, for which he was condemned to perpetual imprisonment in the castle of Louvestein, whence he was delivered by his wife in 1621. He found his way to Antwerp, and afterwards to France, where he obtained a pension. In 1622 he published his "Apology," which so stung the States, that they ordered it to be burnt, and the author to be seized wherever he could be found. In 1625 he finished his famous book "De Jure Belli et Pacis," which greatly extended his reputation. In 1613 he accepted an invitation from Count Oxenstiern, and went to Stockholm, where he was appointed counsellor of state and ambassador to the court of France. He filled this important station, amidst circumstances of

extreme difficulty, with honour to himself and satisfaction to the court which he represented. In 1645 he quitted France, and went to Holland, where he was honourably received. From Amsterdam he sailed to Sweden, and was welcomed in a cordial manner by Queen Christina. B. at Delft, 1583; D. on his journey to Holland, at Rostock, 1645. His remains were interred at Delft.—The works of Grotius are too many to be enumerated here; but we must mention his treatise on the "Truth of the Christian Religion," which has become a standard book in all universities for students in divinity; his "Annales et Historiæ de Rebus Belgicis;" and his "Commentaries on the Scriptures:" these last are an immortal monument of learning. In his religious sentiments he coincided with the church of England, and advised his wife to join in communion with it. His sons Cornelius and Diodoric entered into the army; Peter was bred to the law, and became pensionary of Amsterdam: his brother William was a learned man, and wrote some books on legal subjects.

GROTTAMARE, *grot'-ta-ma'-rai*, a town of the Pontifical States, Italy, 14 miles from Fermo. It is noted for its manufactories of liquorice-juice and refined sugar, of which large quantities are annually produced. *Pop.* 4,000.

GROTTA MINARDA, *me-nar'-da*, a town of Naples, in the Principato Ultra, 6 miles from Ariano. *Pop.* 3,500.

GROVE, *grove*, the name of several parishes in England, none of them with a population above 600.

GRUBENHAGEN, *groo'-ben-ha'-gen*, a principality in the kingdom of Hanover, on the east side of the Leine. *Area*, 280 square miles. This principality forms part of the province of Gottingen, and is divided by the Hartz Mountains. *Pop.* 88,000.

GRUNBERG, *groon'-bairg*, a town of Silesia, 14 miles from Geissar. *Manf.* Woollen and linen fabrics. *Pop.* 3,000.—Another, 20 miles from Grossen. *Manf.* Woollens, leather, cottons, and straw hats. *Pop.* 10,500.

GRUTER, or GRUTERUS, John, *groo'-tair*, a distinguished philologist, whose father was a burgomaster of Antwerp, and fled to England, on account of his religion, taking his son, who was an infant, with him. Here he was educated at Cambridge, and afterwards went to Leyden, where he took his degrees in law. He became a professor at Heidelberg, but lost his valuable library when that city was sacked in 1622. B. at Antwerp, 1560; D. at Heidelberg, 1627.—His principal works are, "A Collection of Ancient Inscriptions," folio, 1601; "Thesaurus Criticus," 6 vols. 8vo; "Delicæ Poetarum Gallorum, Italorum, &c.," 18 vols.

GRUYÈRES, *groo'-yair*, a town of Switzerland, 22 miles from Lausanne. It is noted for its cheese. *Pop.* 1,000.

GRYLLUS, *gril'-lus*, a son of Xenophon, who killed Epaminondas, and was himself slain at the battle of Mantinea, 363 B.C. His father, upon receiving the news of his death, observed that it ought to be celebrated with every demonstration of joy, rather than of lamentation.

GRYNÆUS, Simon, *gri-ne'-us*, a learned German, and the son of a peasant in Suabia. He became Greek professor at Vienna, and afterwards at Heidelberg. In 1531 he visited England, where his classical acquirements procured him many friends. The learned are indebted to him for editions of several of the ancients, enriched with prefaces and commentaries. B. at Veringen, in Hohenzollern, 1493; D. at Basle, 1541.

GRYPHIUS, Andrew, *gri'-fe-us*, a German dramatic writer, whose tragedies were greatly admired. He also wrote a critique, in which he ridiculed the ancient comedies of the Germans. B. at Glogau, 1616; D. 1664.

GRYPHIUS, Christian, son of the preceding, and a man of great erudition, became professor of eloquence at Breslau, principal of the college of Magdalen, and librarian. His works are "German Poems," "History of the Orders of Knighthood," "Treatise on the German Language," &c. B. 1649; D. 1706.

GUADALAVIAR, *goo-a-da'-la-ve-ar'*, a large river of Spain, rising in the Sierra Albarracin, and, after a course of 130 miles, falling into the Gulf of Valencia, in *lat.* 39° 25′ N.

GUADALAXARA, *goo-a-da-la-char'-a*, a province of Spain, in New Castile. *Area*, 1,050 square miles. It forms an elevated plain, intersected by mountains, and traversed by the Tagus. *Pop.* 120,000.—A town of the same name. *Pop.* 5,300.

GUADALAXARA, a province of the Mexican Confederation, bounded N. by the provinces of Sonora and Durango; E. by Zacatecas and Guanaxuato; S. by the province of Valladolid; and W., for a length of 309 miles, by the Pacific Ocean. *Ext.* Its greatest length is 350 miles, and its greatest breadth is 300 miles. *Pop.* 700,000.

GUADALAXARA, a city of the Mexican Confederation, 270 miles from Mexico. It is both large and handsome, containing several squares, many convents, and two colleges for education. *Manf.* Cigars; and the natives make a sort of jars of a fine scented earth, which are in much request. *Pop.* 50,000; consisting of Spaniards, mulattoes, and mestizoes.

GUADALOUPE, *ga'-da-loop*, an island of the West Indies, and one of the largest and most valuable of the Leeward group. *Area*, 534 square miles. *Desc.* It is divided into two parts by a channel about 40 yards wide. This channel runs north and south, and communicates with the sea by a large bay at each end, of which that on the north is called Grand Cul-de-Sac, and that on the south Petit Cul-de-Sac. The east part of the island is called Grandeterre, and is about 57 miles from Antigua Point; the west part, which is properly Guadaloupe, is subdivided by a ridge of mountains into Grandeterre on the east, and Basseterre on the west. Both parts would be joined by an isthmus 6 miles in breadth, were it not cut through by the river. In many parts the soil is rich. *Pro.* Sugar, coffee, rum, ginger, cocoa, logwood, &c. The island is well stored with horned cattle, sheep, horses, &c. *Pop.* with its dependencies, 133,000. *Lat.* 16° 20′ N. *Lon.* 62° W.—This island was first discovered by Columbus. It was taken possession of by the French in 1635, who drove the natives into the mountains. In 1759, it was taken by a British squadron, and was restored to France at the peace of 1763. It was again taken by the British in 1794; but was retaken by the French in 1795. In 1810, the British once more took possession of it, and, in 1814, restored it to the French, to whom it now belongs.

GUADALOUPE, a river of the United States, rising in Texas, and, after an estimated course of 160 miles, entering the Gulf of Mexico.

GUADALQUIVIR, *goo'-a-dal-quiv'-ir*, *i. e.* the 'great river,' one of the largest rivers in Spain, rising in the Sierra Cazorla, 15 miles from Ubeda, and, after traversing Andalusia, and passing by Andujar, Cordova, and Seville, falls into the Mediterranean, about 20 miles from Cadiz.

GUADIANA, *goo-a-de-a'-na*, the ancient Anas, a large river of Spain, rising in La Mancha, and, running westward, passes by Ciudad Real, Merida, and Badajos, and entering Portugal, falls into the sea between Ayamonte and Castel Marim, in *lat.* 37° 10′ N.; *lon.* 7° 26′ W.

GUADIX, *goo'-a-de*, 'river of life,' a town of Spain, 42 miles from Granada. It has several churches and convents, is inclosed by old walls, and surrounded with mulberry-plantations. *Manf.* Hemp, flax, and silk. The climate is temperate, owing to the elevation of the town among the mountains. *Pop.* 1,100.

GUAIRA, *goo'-a-eer'-a*, a town of the Caraccas, in the province of Venezuela, 7 miles from the Caraccas. It has a celebrated port, defended by a castle, which is, however, open to the swell of the ocean. The town of Guaira is so surrounded by mountains, that there is no visible horizon, and its climate is in consequence hot and unhealthy. The town is defended by regular batteries. *Pop.* 6,000.—On the 26th March, 1812, this place was laid in ruins by an earthquake.

GUAM, or GUAHON, one of the Marianne islands, in the Pacific Ocean. *Ext.* About 100 miles in circumference. *Desc.* The coasts are high and shelving on the east side, and fenced with steep rocks, opposed to the perpetual beating of the sea. As the climate is very fine, vegetables and fruits are in great profusion, particularly guavas, bananas, cocoas, oranges, and limes. The inhabitants are dispersed in hamlets or villages, chiefly situate along the coast; for the in-

terior is yet overrun with woods and in a state of nature. All pursue agriculture; and the facility of obtaining other subsistence, induces them to neglect the fishery. The Spaniards have a settlement on the island, which is defended by two Spanish forts. *Pop.* Unascertained. *Lat.* 27° N. *Lon.* 145° E.

GUAMACHUCO. (*See* HUAMACHUCO.)

GUANARE, *goo'-a-na'-rai*, a town of the Caraccas, province of Venezuela, on a river of the same name, 50 miles from Truxillo. The streets are straight and wide, and the houses, without being sumptuous, are neatly built. There is an hospital, and a parish church adorned in a superior style. The inhabitants chiefly depend on the produce of their pasture-lands. *Pop.* 12,000.

GUANAXUATO, *goo'-a-nax'-oo-a-to*, a state of the Mexican Confederation, wholly situate on the ridge of the cordillera of Anahuac. *Area*, 8,000 square miles. It is chiefly noted for the riches of its mines, which exceed those of Potosi. *Manf.* Woollen and cotton fabrics, leather and sugar. *Pop.* 500,000.

GUANAXUATO, the capital of the above state, stands on the Sierra de Santa, 150 miles from Mexico. It has numerous mining-works and a mint. The ground on which it is built is 6,836 feet above the level of the sea. *Pop.* 34,000. *Lat.* 21° 0′ 15″ N. *Lon.* 101° 54′ 45″ W.

GUAPY, and GUAPORÉ, *goo'-a-pe*, two rivers in S. America, tributary to the Mamore.

GUARDA, *goo'-ar-da*, a fortified town of Portugal, in the province of Beira, 69 miles from Coimbra. *Pop.* 2,300. The heights near this place were abandoned by the French in 1811.

GUARDIA, *goo'-ar-de-a*, the name of several towns of Naples, the largest with a population of 8,000. It is in the province of Abruzzo Citra, 12 miles from Chieta.

GUARDIA, LA, several towns in Spain, none of them with a population above 4,000.

GUARINO, surnamed Veronese, *goo-a-re'-no*, an eminent reviver of learning, and the first who introduced Greek into Italy. He became professor of the learned languages at Ferrara, and translated Plutarch's "Lives," part of Strabo, and other works. B. 1370; D. 1460.—His son BATISTA was also a learned man, and became an eminent professor at Ferrara. He translated into Italian some of Plautus's comedies, and wrote Latin poems and other works.

GUARINI, Batista, *goo-a-re'-ne*, an Italian poet, great-grandson of the preceding, passed the greatest part of his life in courts, being in the service of Alphonso II., duke of Ferrara, and other princes. In these situations, however, he seems to have been a prey to continual disgusts. He wrote several poems, and a pastoral piece called "Pastor Fido," which gained him considerable reputation. He, however, contemned the title of poet, which he thought beneath the dignity of a gentleman. B. at Ferrara, 1537; D. at Venice, 1612.

GUASTALLA, *goo'-as-tal'-la*, a fortified town of Italy, capital of a district of the same name, at the confluence of the Crostola and the Po, 22 miles from Mantua. *Manf.* Silk fabrics and twist. *Pop.* 3,000.—The DISTRICT has an area of 40 square miles, and a population of 23,000.

GUATIMALA, *gat'-e-ma'-la*, one of the republican states of Central America. It extends, according to its political limits, on the narrow part of the continent of America, from the provinces of Oaxaca and Vera Cruz, in Mexico, southward to Veragua, on the Isthmus of Darien, and includes various districts but little known. *Area*, 75,000 square miles. *Desc.* Diversified with mountains, plains, and table-lands. In it are several active volcanoes, and earthquakes are of frequent occurrence. *Climate.* In the valleys hot and unhealthy. The country exports indigo, cigars, silver, cochineal, mahogany, cocoa, dye-woods, and sarsaparilla. *Pop.* 500,000. *Lat.* between 14° and 17° N. *Lon.* between 89° and 94° W.

GUATIMALA, NEW, the capital of the above province, is situate 105 miles from San Salvador. It was twice destroyed by an earthquake. The city, now rebuilt, stands 25 miles to the south of the old town. It is a magnificent place, adorned with churches and monasteries, and a university, considered one of the best in the empire. It has a flourishing trade with Vera Cruz and Mexico. *Pop.* 40,000. *Lat.* 14° 37′ N. *Lon.* 90° 30′ W.

GUAVIARI, *goo'-a-ve-ar'-e*, a river of the Andes of Quito, which falls into the Orinoco, *lat.* 4° 20′ N.; *lon.* 67° 30′ W. *Length*, 450 miles.

GUAYAQUIL, *gwe'-a-kcel*, a department of the republic Ecuador, in South America, bounded on the W. by the Pacific, and, on the other sides, inclosed by Assuay and Quito. *Area*, 14,400 square miles. *Desc.* Level along the coast, and producing cotton, maize, cocoa, tobacco, and various fruits. *Pop.* 75,000.

GUAYAQUIL, the capital of the above, is situate on both sides of the river of the same name, over which is a wooden bridge, 150 miles from Quito. It is built of good houses; but these being mostly of wood, it is liable, in consequence, to conflagrations, by which it has frequently suffered. It has a celebrated commercial port in the river Guayaquil, and an excellent dock to the south, on the shore of the same river. *Pop.* 18,000. *Lat.* 2° 11′ 21″ S. *Lon.* 79° 40′ W.

GUAYAQUIL, a river of S. America, rising in the Andes, and entering the sea in the gulf of the same name, in *lat.* 2° 27′ S.

GUAYRA, LA, *goo'-air-a*, the chief seaport-town of the republic of Venezuela, in S. America, on the Caribbean Sea, 16 miles from Caraccas. *Pop.* 6,000.

GUAY-TROUIN, René du, *goo'-ai troo'-it*, a French naval officer, who commanded a privateer when he was only 18, but afterwards entered the navy, in which he served with success. He took Rio Janeiro, one of the richest colonies of Brazil; and when ennobled, it was stated in his patent, that he had taken more than 300 merchant vessels and 20 ships of war. He was made lieutenant-general of the naval forces of France, and commander of the order of St. Louis. His Memoirs, partly written by himself, were printed at Paris in 1 vol. 4to, 1740. B. at St. Malo, 1673; D. at Paris, 1736.

GUBBIO, *goob'-be-o*, a town of Italy, at the foot of the Apennines, 34 miles from Spoleto. It has a cathedral, numerous churches, a ducal palace, several schools and other institutions. *Manf.* Woollen and silk stuffs. *Pop.* 17,000.—Near this place the famous Eugubian marbles were discovered, in a temple of Jupiter Apenninius, in 1446.

GUBEN, *goo'-ben*, a town of Prussia, on the Neisse, 28 miles from Frankfort. *Manf.* Cloth; and it has a considerable trade in flax and linen. *Pop.* 11,500.

GUERCHE, LA, *goo-airsh*, the name of several parishes and small towns in France, none of them with a population above 2,000.

GUERICKE, Otho, *ger'-ik-e(r)*, a German philosopher, who was counsellor to the elector of Brandenburg, and burgomaster of Magdeburg. He invented the air-pump and weather-glass, and published some treatises on experimental philosophy. B. 1602; D. 1686.

GUERNSEY, *gern'-se*, an island in the English Channel, near the coasts of Brittany and Normandy. It lies in the spacious gulf termed Mount St. Michael's Bay, 15 miles from Jersey. It has a coastline of about 30 miles in circumference, and is deeply indented with bays. *Desc.* The soil, especially in the low part of the island, is rich and fertile, and yields very fine pasture. Vegetables are in great variety, and of an excellent quality. Timber is neither plentiful nor lofty; and the hedges are chiefly composed of stone, or furze sown on banks of turf. Most kinds of fruit grow in profusion; and so genial is the climate, that myrtles and geraniums flourish in the open ground, and even the orange-tree will fructify, with very little shelter in winter. The fig-tree attains great luxuriance, and sometimes reaches a remarkable size. One of the most useful vegetables is a marine plant, called by the generic name of vrac, which is used both for fuel and manure; but, to prevent the indiscreet destruction of it by the inhabitants, two seasons, midsummer and Michaelmas, are appointed for its collection. Most of the natives have a greater resemblance to the French than to the English nation. All their domestic utensils and implements of husbandry are after the French fashion, as also their dress, speech, and mode of living. These, however, among the higher ranks, are receiving great modifications, from their continual intercourse with England. Both the judicial and executive authorities are exercised by a convention of several different bodies, collectively designated the Assembly of the States. *Pop.* 30,000.—Steamers ply between

Guernsey and London, Southampton, Plymouth, and Weymouth. The island has a well-organized militia, and is strongly fortified.

GUERNSEY, a county of the United States, in Ohio. *Area*, 656 square miles. *Pop.* 33,000.

GUERRE, Martin, *gair*, a Frenchman, rendered famous by an extraordinary imposture, practised by Arnaud du Thil, his friend. Martin married Bertrande du Rols, and, after living with her about ten years, left her, and entered into the service of Spain. Eight years after, Du Thil presented himself to Bertraude as her husband, and so imposed upon her, by relating various facts, that he lived with her. An uncle of Martin prosecuted Du Thil, and he was condemned to be hanged. Du Thil appealed to the parliament of Toulouse, the members of which were greatly divided, when Martin returned home; on which his treacherous friend was hanged and burned, in 1560.

GUESCLIN, Bertrand du, *ges'-lă*, constable of France, and an illustrious warrior. He gained many victories over the English, and defeated the troops of the king of Navarre. He was very strong, and also very unprepossessing. "I am very ugly," he would say, "and shall never be a favourite with the ladies; but, by the enemies of my king, I shall be held in terror." B. in Brittany, 1311; D. in besieging Randam, 1380.

GUEVARA, Louis Valez de, *gwai-va'-ra*, a Spanish comic poet, who wrote many comedies, and a celebrated work entitled "El Diabolo Cojuelo," which furnished the foundation for "Le Diable Boiteux" of Le Sage. He was a native of Andalusia, and died 1646.

GUIANA, *ge-a'-na*, an extensive country of S. America, on the coast of the Atlantic, lying between the rivers Oronoko and Oreilana. *Ext.* 1,100 miles long, with a breadth varying between 300 and 600. The French possess one part of the coast, and the Dutch another. Dutch Guiana contains the settlements of Surinam, Berbice, Essequibo, and Demerara; all which take their names from different rivers. French Guiana goes by the name of Equinoctial France, or Cayenne, from the territory so called, and extends from the river Marawina to the river Oyapoco S.E. The internal parts of the country are but little known; they are inhabited, however, by different tribes of Indians, some of whom make their houses on trees, to be secure from the inundations of the rivers. *Pro.* Sugar, cotton, silk, tobacco, Brazil-wood, aloes, natural balsam, oranges, and citrons, made into sweetmeats or otherwise. These form articles of commerce. *Lat.* between 3° and 8° N. *Lon.* between 50° and 63° W.

GUIANA, BRAZILIAN, comprises the N. part of the Brazilian dominions. *Area*, estimated at 430,000 square miles. *Desc.* It is traversed by the Rio Branco and numerous other rivers, and is covered with a dense vegetation. *Lat.* between 3° 30′ and 4° 20′ N. *Lon.* between 59° and 68° W.

GUIANA, BRITISH, a colonial territory on the N.W. coast of S. America. *Area*, 76,000 square miles; but much of this extent has been disputed by Venezuela and Brazil. *Desc.* Densely covered with vegetation, and producing sugar, cotton, coffee, maize, wheat, cocoa, vanilla, tobacco, and cinnamon. *Pop.* 150,000, Indians inclusive. *Lat.* between 0° 40′ and 8° N. *Lon.* between 57° and 61° W.

GUIANA, VENEZUELAN, the N.W. subdivision of Guiana. *Area*, 188,000 square miles. *Pop.* 20,000, mostly consisting of wandering tribes of Indians. *Lat.* between 2° and 6° N. *Lon.* between 60° and 68° W.

GUIBERT, James Antony Hypolite, *ge-boir'*, a writer on military affairs, who served in Germany, and afterwards in Corsica, where he was made a colonel. In 1770, he published his great work, "Essai Général de Tactique." Afterwards he directed his attention to dramatic composition, and produced several tragedies. He also wrote the "Eulogies of Catinat and L'Hopital." The French Academy elected him a member, in the room of M. Thomas. B. at Montauban, 1743; D. 1790. Besides the above works, he wrote the "Eulogy of the King of Prussia."

GUICCIARDINI, *goo-eetch-e-ar-de'-ne*, an eminent historian, who was descended from a noble family of Florence. He practised in early life as a lawyer, and filled several high offices in his profession. Afterwards he was employed in affairs of state for his native city. From this situation he passed into the service of Leo X. and the two immediate successors of that prince, and was raised by them to the highest civil and military dignities. His "History of Italy," in 4 vols. 4to, is a valuable performance. B. in Florence, 1482; D. at his country seat at Alectri, 1540. When the courtiers of Charles V. complained of the favour he showed to Guicciardini and other Florentines, he said, "I can make a hundred Spanish grandees in a minute, but I cannot make one Guicciardini in a hundred years."

GUICCIARDINI, Lewis, nephew of the preceding, wrote, among other works, a "Description of the Low Countries," folio. B. at Florence, 1523; D. at Antwerp, 1589.

GUIDO D'AREZZO, *ge'-do da-ret'-so*, an Italian musician, who invented the lines and spaces, or staff, reformed the scale, suggested the mode of notation, and the art of solmisation. Lived in the 11th century.

GUIDO, Reni, an illustrious Italian painter, whose father was a musician, and who intended him for the same profession; but Reni conceiving an early attachment for painting, was placed under Dennis Calvert, a Flemish master. He afterwards studied under the Caracci, and soon rose to higher fame than any of his contemporaries. Honours were heaped upon him by several crowned heads, and riches flowed upon him in abundance. He was unfortunate only in an immoderate love of gaming, which reduced him to such distress, that a languishing disease ensued, of which he died. His heads are beautiful, and considered by many to equal those of Rafaelle. His draperies are also much admired. His ideal of female beauty was founded on the antique, as he took the "Venus de' Medici" and the "Daughters of Niobe" for his standard. B. at Bologna, 1575; D. 1642.—The greatest work of Guido is the "Penitence of St. Peter after denying Christ," in the Zampieri palace, at Bologna.

GUIDOTTI, Paul, *ge-dot'-te*, an Italian painter, sculptor, and architect, who made wings with which he imagined he could fly; but, in making the attempt at Lucca, he fell, and received great injury. B. at Lucca, 1569; D. 1629.

GUIENNE, or GUYENNE, *ge-en'*, an old province in the south-west of France, to the north of Gascony, and, in general, separated from it by the great river Garonne. The modern division of this extensive tract is into the following departments; viz., the Gironde, the Lot-and-Garonne, the Dordogne, the Lot, and the Aveyron, Ariége, and Lower Pyrenees. This country was possessed by the English for three centuries, and in 1453 was united to France by Charles VII.

GUIGNES, Joseph de, *gween*, a learned French writer, who studied the Oriental languages under Stephen Fourmont, and was appointed interpreter to the king in 1741, and member of the Academy of Belles Lettres in 1753. He particularly applied himself to the study of the Chinese characters, and had, for 35 years, a principal interest in the "Journal des Savans." The Revolution reduced him to poverty. B. at Pontoise, 1721; D. at Paris, 1800.—He wrote the life of Fourmont, "General History of the Huns, Turks, Moguls, and Tartars," 5 vols. 4to; Memoir proving that the Chinese were an Egyptian colony; "Le Chon-King," 4to; "The Military Art of the Chinese," "Historical Essay upon the Oriental and Greek Typography," "Principles of Typographical Composition," "Memoirs in the Academy of Inscriptions," &c.

GUILDFORD, *gil'-ford*, a market and borough town in Surrey, on the Wye, which is here navigable for barges from the Thames, 17 miles from London. Guildford is one of the best inland towns of its size in the kingdom, large, clean, and well built; consisting chiefly of one spacious street, which, running along the declivity of a considerable chalk-hill, presents a very striking appearance. It contains three parish churches, and various other public buildings; but is chiefly noted for its castle, situate about 300 yards southward of the High Street, and supposed to have been a palace of several early Anglo-Saxon kings. The other principal buildings are an hospital, a free grammar-school, a guildhall, a gaol, a theatre, and several meeting-houses for dissenters of different denominations. It has a considerable trade in corn, malt, and coals. *Pop.* 7,000.

GUILFORD, a county of the United States, in North Carolina. *Area*, 6,000 square miles. *Pop.* 192,000.—Also the name of several townships, none of them with a population above 4,000.

GUIMARAENS, *ge'-ma-ra-ains*, an inland town of Portugal, on the Ave, 12 miles from Braga. The streets are wide and clean, and the houses neat. *Manf.* Damask linen for table-cloths, and cutlery. *Pop.* 6,000.

GUINEA, *gin'-e*, a geographical division of W. Africa, of which little is known, except the coast, thence called the coast of Guinea. Its coast-line extends from Cape Negro, in *lat.* 15° 41′ S., to Cape Verga, 10° 20′ N. It is divided into the Lower and the Upper. The Lower part is commonly called Congo; the Upper comprehends the districts of Sierra Leone, the Grain Coast, or Malagueta, the Gold Coast, the Slave Coast, and Benin. It is unhealthy for Europeans, though the natives live to a considerable age. The latter in general go almost naked, and are said to be an innocent, inoffensive, and hospitable people, except such as have been corrupted by the Europeans. Two or three European settlements are formed in Guinea, under the governments of Great Britain and Denmark, for the purpose of carrying on an honest and advantageous trade with the natives, and for promoting their civilization. *Pro.* Every variety of rich tropical fruits, gums, hard woods, grain, gold, ivory, wax, &c. *Pop.* Unascertained. This country was discovered in 1487 by the Portuguese, and they have retained nominal possession of the S. district.—The GULF OF GUINEA is formed by the Atlantic Ocean on the coasts of North Guinea, between *lat.* 6° 20′ and 1° S.; *lon.* 7° 30′ W. and 10° E.

GUINEA, NEW. (*See* PAPUA.)

GUIPUZCOA, *gee'-poos-ko-a*, a province of Spain, bordered partly by the sea, partly by the French frontier. *Area*, 620 square miles. *Desc.* Hilly, but fertile. *Rivers.* The Deva, Urolo, and Oria. Its principal source of wealth are its iron-mines. *Pop.* 142,000.—The borders of this province have been long defended by numerous fortresses, and, from time to time, they have been the scene of many conflicts.

GUISBOROUGH, *giz'-bur-o*, a town of England, in the N. Riding of Yorkshire, 50 miles from York. *Pop.* 2,000. The earliest alum-works in England were established here about 1600.

GUISCARD, *gees'-kar*, a famous Norman knight, and son of Tancred de Hauteville, one of the warriors who conquered Naples from the Saracens, and acquired the dukedom of Apulia and Calabria. D. in the island of Corfu, 1085.

GUISCHARD, Charles Gottlieb, *ge'-shar*, a Prussian officer, who fought with great reputation in the service of the stadtholder, and afterwards in that of Frederick II. of Prussia, who gave him the name of Quintus Icilius, and a regiment. B. at Magdeburg, 1742; D. 1775.—His works are "Mémoires Militaires sur les Grecs et les Romains," 4to; "Mémoires Critiques et Historiques sur plusieurs Points d'Antiquités Militaires," 4 vols. 8vo.

GUISE, Claude de Lorraine, duke of, *gees*, was the fifth son of René II., duke of Lorraine. He settled in France, where he married Antoinette de Bourbon, a princess of the blood, in 1513. At the battle of Marignan, when he was but 22 years of age, he received more than twenty wounds. D. 1550.

GUISE, Francis de Lorraine, duke of, eldest son of the above, was a man of great talents and valour, and, during the greater part of his life, enjoyed almost unbounded power in France. With him began the famous factions of Condé and Guise. The duke of Guise was at the head of the Catholic party, and a great zealot. Killed by a pistol-shot, in 1563, by a Protestant gentleman, named Poltrot de Méré. B. 1519.

GUISE, Henry, duke of, eldest son of the preceding, was a good soldier, but of a turbulent temper, and formed the association called the League, on the pretence of defending the Catholic religion, and the liberty of the state. With its aid, the duke of Guise long controlled Henry III., and even was in open rebellion against him. On the celebrated day of the barricades, the king, having escaped from the duke to Blois, convened the states there, where Guise was assassinated, in 1588. B. 1550.

GUISE, Charles, duke of, eldest son of the above. On his father's death, he was shut up in the castle of Tours, from which he escaped in 1591. Proceeding to Paris, he was received with the greatest joy by the partisans of a league which had been formed against Henry IV. He afterwards became governor of Provence; but, under the reign of Louis XIII., he was forced to leave France, on account of the jealousy of Cardinal Richelieu. He went into Tuscany, where he died, in 1640. B. 1571.—His son, HENRY II., was brought up to the church, which, on the death of his father, he quitted, and assumed the title of duke of Guise. He conspired against Cardinal Richelieu, and, in 1647, put himself at the head of the revolted Neapolitans, but was taken prisoner by the Spaniards. On being set free, he returned to France, where he died, without issue, in 1664.—His younger brother, Louis, left a son, Louis Joseph, of Lorraine, duke of Guise, who died in 1671, leaving an infant son, who died in 1675, and in whom the line of the Guises became extinct.

GUIZOT, François-Pierre Guillaume, *ge'-zo*, was the son of an eminent French advocate, who was executed in 1794. Young Guizot and another brother were taken by their mother to Geneva, where they were educated in the Gymnasium, and where François acquired a knowledge of the Latin, Greek, English, German, and Italian languages. In 1805 he went to Paris for the purpose of studying law, but entered as tutor the family of the Swiss ambassador, and, through his means, was introduced to many distinguished literary men. In 1809 he published his "Dictionary of Synonymes," which was succeeded by "Lives of the Poets," "Gibbon's Roman Empire," and other works. In 1812 he became assistant professor of history in the Faculty of Letters, and, shortly afterwards, was appointed professor of modern history. In the same year he married Mademoiselle Pauline de Meulin, a lady who was considerably older than himself, and who supported herself and family by the ability of her pen. In 1814, under Louis XVIII., he became secretary-general; but, on the return of Napoleon I. from Elba, he was driven from his office, and once more resumed his duties as professor of history. On the overthrow of the empire, he became secretary-general to the minister of justice, adopting the principles of a constitutional royalist. He now produced several political and educational pamphlets, and in 1818 was chosen a counsellor of state. In 1820 he was expelled from office, and once more entered the field as a pamphleteer. He also gave lectures at the Sorbonne; but the freedom of his expressions caused them to be suppressed. Between 1822 and 1827 he produced his "History of the English Revolution," "Essays on the History of France," and his "Historical Essays on Shakspeare." He also established the "French Review," and assisted in founding the society called "Assist thyself, and Heaven will assist thee," designed to secure the freedom of elections. In 1828 he was permitted to resume his lectures at the Sorbonne, and, in the same year, married the niece of his first wife, who recommended the union on her death-bed. In the following year he was reappointed a counsellor of state, and became one of the editors of the "Journal of Debates," and of "The Times." In 1830 he was elected a member for the Chamber of Deputies, and assisted in accomplishing the revolution which expelled Charles X. from his throne. He now became successively minister of public instruction and minister of the interior; but, in the same year, was driven from office. In 1832 he returned to office, as minister of public instruction, under the administration of Marshal Soult, and continued to hold his place till 1836, when he was appointed on an embassy to England. Here he concluded the treaty of 1840, which filled France with dissatisfaction. In that year, however, he was appointed minister of foreign affairs, which he held till the abdication of Louis-Philippe, in 1848. At that time he fled from France in the disguise of a workman, but returned in the following year, and again entered the political arena. He now became active with his pen, and produced many more works; among which we may notice his "History of Civilization," "History of Oliver Cromwell," "History of Richard Cromwell and the Restoration of Charles II.," "Shakspeare and his Times," and "Studies of the Fine Arts in General." B. at Nives, in the department Gard, 1787.

GUJERAT, or GUZERAT, *goo-je-rat'*, a large province of Hindostan, comprising several petty states. It is bounded N. by the province of Ajmeer, E. by Malwah and Candeish, S. by Aurungabad and the sea, W. by a sandy desert, the Gulf of Cutch, and the sea. *Area*, 41,500 square miles. *Desc.* Mountainous in the interior, and elevated along the coast. The chief range is the Western Ghauts, which have an average height of 1,500 feet. *Pro.* Rice, wheat, barley, sugar, tobacco, cotton, maize, opium, castor-oil, fruits, and an extremely varied flora. *Minerals.* Iron only. *Pop.* 3,000,000. *Lat.* between 20° and 24° 45′ N. *Lon.* between 69° and 74° 26′ E.

GUMBINNEN, *goom-bin'-nen*, a town of E. Prussia, on the Pissa, 65 miles from Konigsberg. It is neatly built, and has a gymnasium, schools of architecture, a public library, and two hospitals. *Manf.* Woollens, linen, and leather. *Pop.* 7,000.

GUMRI, *goom'-re*, a ruined town of Russian Armenia, 54 miles from Erivan. On its site have been built the fortress and city of Alexandropol. *Pop.* 10,000. The height of this place is nearly 6,000 feet above the level of the sea, and the cold is sometimes so intense that men are found frozen to death in the fields.

GUNDERMUK, *goon-der-mook'*, a village of Afghanistan, 28 miles from Jellalabad. Here the remnant of the British force, consisting of 100 soldiers and 300 camp-followers, were, whilst retreating from Cabool, massacred in 1842, only one man escaping.

GUNDLING, Nicholas Jerom, *goond'-ling*, a German writer on jurisprudence, history, and politics, who was successively professor of philosophy, eloquence, and civil law at Halle. B. at Nuremberg, 1671; D. at Halle, 1729.

GUNDUCK, *goon-dook'*, a river of Hindostan, which, after a course of 400 miles, falls into the Ganges opposite Patna.

GUNNERUS, John Ernest, *goon'-ne-roos*, a Norwegian divine, who was made bishop of Drontheim in 1758, where he founded the Royal Norwegian Society, principally for the encouragement of the study of natural history. Linnæus gave the name of Gunnera to a plant in his vegetable system. B. at Christiana, 1718; D. at Christiansund, 1773.—He published "Flora Norwegiæ," &c.

GUNS, or KOESZEG, *goons*, a town of Hungary, 58 miles from Vienna. *Manf.* Silk and woollens. *Pop.* 8,000. This town successfully resisted an attack of the Turks under Solyman, in 1532.

GUNTER, Edmund, *gun'-ter*, an English mathematician, whose genius led him to the study of mathematics, and he became professor of astronomy in Gresham College. He invented a portable quadrant, which goes by his name, and a scale used by navigators. He also discovered the variation of the magnetic needle. B. in Herefordshire, 1581; D. in Oxford, 1626.—He published "Canon Triangulorum, sive Tabulæ Sinuum Artificialium," &c. His works were collected into one volume 4to, 1673.

GUNTOOR, *goon-toor'*, a maritime district of British India, on the western side of the Bay of Bengal, called the Northern Circars. *Area*, 4,050 square miles. *Desc.* Mountainous in the west, but, in other parts, sandy and low. *Pro.* Dry grains, cotton, sugar, and paddy. *Pop.* 570,000.

GUNTOOR, the capital of the above district, and station of the civil establishment. *Lat.* 16° 20′ N. *Lon.* 80° 30′ E.

GURIEL, *goo'-re-el*, a province of Asia, at the east extremity of the Black Sea. It is shared between the Russian and Turkish dominions. *Desc.* Fertile; producing maize, millet, honey, tobacco, cotton, silk, and wine. *Pop.* Unascertained.

GURWHAL, *goor-wal'*, a hill state of India. *Area*, 4,500 square miles. *Desc.* Mountainous; comprising a portion of the S.W. declivity of the Himalaya. It has several valleys drained by affluents of the Ganges. *Pro.* Rice, sugar, sweet potatoes, wheat, barley, hemp, cotton, ginger, and oil-seeds. The territory is held from the British by the rajah. *Pop.* 100,000. *Lat.* between 30° and 31° 20′ N. *Lon.* between 77° 55′ and 79° 20′ E.

GURWOOD, John, *gur'-wood*, entered the British army in 1808, and served in the Peninsular war under the duke of Wellington. At the storming of Ciudad Rodrigo, in 1812, he volunteered to lead the forlorn hope, and took General Barrie, the governor, prisoner, whom he carried to the duke of Wellington. "Did you take him?" asked the duke. "Yes," was the reply. "Then it is to you that the sword of the general should belong," said the duke, at the same time handing to Gurwood Barrie's sword. This weapon he wore ever afterwards, and he became a distinguished officer. About 1830 he became private secretary to the duke of Wellington, and, in 1834, commenced issuing "The Despatches of Field-Marshal the Duke of Wellington, K.G., during his various campaigns in India, Denmark, Portugal, Spain, the Low Countries, and France, from 1799 to 1818, compiled from Official and Authentic Documents by Lieutenant-Colonel Gurwood." This work was a decided success, notwithstanding that it extended to thirteen volumes. In 1841, Gurwood was made a full colonel, and subsequently became deputy-governor of the Tower. B. 1790; D. by his own hand, in a fit of insanity, arising from a wound in his head, received at Ciudad Rodrigo, 1845.

GUSTAVUS I., *gus-ta'-vus*, king of Sweden, known by the name of GUSTAVUS VASA, was the son of Eric Vasa, duke of Gripsholm, who was descended from the ancient kings of Sweden, and who was beheaded by the Danish tyrant, Christian II. This sovereign also got Gustavus into his hands, and, in the war in which he reduced Sweden, kept him, several years, a prisoner at Copenhagen. At length he made his escape, and, having prevailed on the Dalecarlians to throw off the Danish yoke, in May, 1521, he found himself at the head of 15,000 men. After various fortunes, he recovered the whole of Sweden from the tyranny of Christian. In 1527 he was crowned king of Sweden, and the crown made hereditary in his family. Lutheranism was established as the national religion of Sweden in his reign. B. at Ockestadt, near Stockholm, 1490; D. in 1559.—His name is still revered by every Swede.

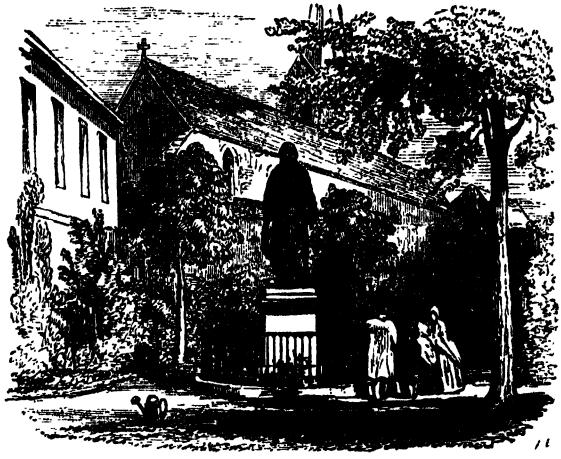
GUSTAVUS ADOLPHUS, king of Sweden, ascended the throne in 1611, when only in his seventeenth year.

GUSTAVUS ADOLPHUS.

Notwithstanding his youth, he displayed great discernment in the choice of able ministers, and distinguished himself in the field, in a war with Denmark, Russia, and Poland. He subsequently rendered his name immortal, by his illustrious achievements in the war he carried on at the head of the German Protestants against the house of Austria. He penetrated from the Vistula to the Danube, and twice defeated the celebrated Tilly. He was a patron of the sciences, enriching the university of Upsal, founding a royal academy at Abo, and a university at Dort, in Livonia. This great prince fell in the battle of Lutzen, in 1632,

not without suspicion of having been assassinated by the hand of Lawenburg, one of his generals. B. at Stockholm, 1594.—There is something sublime in the conduct of Gustavus immediately before his engaging in battle at Lutzen. He himself sang a hymn of Luther's, and was followed in chorus by the whole of his troops. After this, he led the attack in person, and slew the foremost of the enemy with a lance; thus giving promise of the victory which his army obtained, although at an immense sacrifice, over the forces of Wallenstein, one of the most extraordinary men of his time.

GUSTAVUS III., king of Sweden, was the son of Adolphus Frederick and Louisa Ulrica, sister of Frederick II., king of Prussia. He was educated under Count Tessin, whose letters to his royal pupil are well known. He succeeded his father in 1771, at which time a corrupt senate, composed of two aristocratic factions, called the Hats and Caps, possessed the government, and held the king as a mere cipher. Gustavus, in the following year, effected a revolution without bloodshed, and established a new constitution. He abolished the practice of torture, and introduced other good regulations in the administration of justice. He also formed a college of commerce, reformed his army and navy, caused a new translation to be made of the Bible, and greatly encouraged agriculture, arts, and literature. In 1777 he paid a visit to the empress of Russia, and was entertained in a magnificent manner. In 1783 he made a tour for his health to France and Italy, and was absent ten months. He afterwards entered into a war with Russia and Denmark. He headed his army himself, and stormed the defences of Fredericksham, where he took and destroyed a great number of vessels. Encouraged by this success, he made an attack on the Russian squadron and arsenal of Revel, but was obliged to retire. He was equally unfortunate in an attempt on Wyburg; but, on July 9, 1790, the Swedish fleet, commanded by the king, gained a victory over the Russians, who lost 45 vessels and a great number of men. This was followed by an immediate peace. On the breaking out of the French revolution, a coalition was formed between the northern powers and Spain, by which it was agreed that Gustavus should march against France at the head of a considerable army; but while preparations were making, he was shot at a masquerade, by Ankarstroem, a disbanded officer of the army. B. 1746; assassinated 1792.—Gustavus wrote some plays, and political pieces of merit.



GUSTAVUS IV., king of Sweden, after the assassination of his father, ascended the throne, in 1792. His reign was remarkable for the caprice with which he was permitted to govern, for several years, a brave people. His hatred to Napoleon I. was of the most intense description, and his avowed attachment to the principles of legitimacy led him to endeavour to restore the Bourbon dynasty to the crown of France. In 1809 he was arrested as a traitor in the name of the nation, and forced to abdicate his crown in favour of Duke Charles of Sudermania, who ascended the vacant throne as Charles XIII. B. 1778; D. at St. Gall, Switzerland, 1837. After abdicating his throne, he retired to St. Gall, where he mostly lived afterwards, supporting himself by his writings as an author and his pension as a colonel. He refused all assistance from his family and the people over whom he had reigned.

GUSTROW, *goos'-tro*, a town of N. Germany, 35 miles from Schwerin. It is inclosed by walls, and contains about sixty different kinds of factories. *Pop.* 9,000.

GUTENBERG and GUTENBRUN, *goo'-ten-bairg*, two small villages in Germany, in the dominions of Austria and Wurtemberg.

GUTHRIE, William, *guth'-re*, a native of Scotland, and educated at Aberdeen. His most esteemed work is his geographical grammar. B. 1701; D. 1769.—He also wrote a "History of Scotland," "A History of the Peerage," "The Friends," a novel; "Remarks on English Tragedy," and several other works.

GUTTENBURG, or GUTENBERG, John, *goot'-ten-bairg*, one of those to whom the invention of the art of printing is attributed, was descended of a noble German family. If he did not invent printing, it is probable he was the first who conceived the idea of printing a book, which he executed, first with blocks of wood engraved, and afterwards with separate letters cut in wood. He took, for a partner, John Faust, from whom he separated, and then printed for himself. There are few particulars

GUTTENBURG.

of his life and habits, further than that he seems to have been frequently in litigation, and to have been a man of considerable ingenuity. B. at Mentz, about 1400; D. there, 1468.—In 1837 a splendid monument in bronze was erected to his memory in Mentz, and the Guttenburg Society, with which the writers of the Rhenish provinces are connected, hold an annual meeting in Mentz, to celebrate his great discovery, and in honour of his memory.

GUY, Thomas, *gi*, the humane and charitable founder of Guy's Hospital, was the son of Thomas Guy, lighterman and coal-dealer in Horseleydown, Southwark. He was bred a bookseller, and began trade with only £200. The bulk of his fortune, however, was made by purchasing seamen's tickets, during Queen Anne's wars, and by speculations in South-Sea stock, in the memorable year 1720. Besides the well-known hospital, he erected an almshouse at Tamworth. B. 1643; D. 1724, worth £300,000.

GUYARD, De Berville, *ge'-yar*, a French writer, who, after a life of extreme distress, died in the prison of the Bicêtre, at the age of 73. B. 1697.—He wrote the lives of Bertrand du Guesclin and of the Chevalier Bayard.—He is not to be confounded with ANTHONY GUYARD, a Benedictine monk, who died at Dijon in 1770. He wrote "Political Observations on the Administration of Benefices," &c.

GUYON, Johanna Mary Bouvières de la Mothe, *ge'-yawng*, a famous enthusiast, who, at 16, married, and became a widow at the age of 28. She afterwards devoted herself to religious meditation, and imbibed all the mystical conceits of quietism, till she worked herself up into the belief that she was the pregnant woman in the Apocalypse, and the destined foundress of a new church. Having gained many followers, she was confined in a convent; but was released, at the instance of Madame Maintenon. After this, she proselytized the illustrious Fenelon; but was treated with great severity by Bossuet of Meaux, by whose means she was sent to the Bastille, whence she was liberated

in 1702. B. at Montargis, 1648; D. at Blois, 1717.—Her works are numerous, and still admired by those who are fond of mysticism.

GUYON, General Richard Debaufre, a distinguished English general in the Hungarian service. In 1848 he became major of the Houveds, or national guards of Hungary, and at the battle of Schwechat, fought near Vienna, he was, for his gallantry, made a colonel on the field. Subsequently, at Delereczin, he was raised to the rank of general. He continued to fight in the cause of Hungary, against the Austrians, throughout the war of 1848-49; but when Gorgei made an unconditional surrender, he, with Bem, Dembinski, and Kmetz, took refuge in Turkey. Here he remained, protected by the sultan, and accepted service under his government. He rose to the rank of lieutenant-general on the staff, and received the title of Kourschid Pasha. In 1853 he was sent to Damascus, and thence proceeded to Kars, where he organized the army, and constructed the defences which subsequently formed a basis for the operations of General Williams in that place. B. near Bath, Somersetshire, 1813.

GWALIOR TERRITORIES, *gwaw'-le-or*, a district of Central Hindostan, in the dominions of Scindia, inclosed by Bundelcund, Chumbal, Dhar, Rajgurh, and Kotah. *Area*, 33,100 square miles. *Desc.* Level in the N., but traversed in the S. by the Vindhya mountains. *Pro.* Rice, wheat, maize, sugar, opium, cotton, tobacco, and oil-seeds. *Manf.* Silks, and there is a cannon-foundry. *Pop.* 3,230,000. *Lat.* between 26° and 27° N. *Lon.* between 78° and 79° E.

GWALIOR, a fortress of Hindostan, situate on an affluent of the Jumna, 65 miles from Agra. It is on a hill, at the bottom of which stands the town, which is large and populous, and carries on a considerable trade between the Mahratta and British territories. *Pop.* Unascertained. *Lat.* 26° 18′ N. *Lon.* 78° 14′ E.

GWENNAP, *gwen-năp'*, a parish of Cornwall, 3 miles from Redruth. In it are some of the most productive copper-mines in Cornwall. *Pop.* 10,500.

GWILT, Joseph, *gwilt*, an eminent English architect, who wrote largely on his profession, and published, with other works, "An Encyclopædia of Architecture, Historical, Theoretical, and Practical." He also wrote "Rudiments of the Anglo-Saxon Tongue," and the article on music in the "Encyclopædia Metropolitana." He held, for thirty years, the appointment of architect to the Grocers' Company, and was, for forty years, one of the surveyors of the sewers in Surrey. B. in Surrey, 1784.

GWYNN, Nell, *gwin*, an actress, famous for the circumstance of her rising from the lowest situation to be patronized by Charles II. In the early part of her life she entertained companies at taverns by singing; and, previous to her winning the affection of the "Merry Monarch," she had formed various questionable connections. D. 1687.

GYARMATH, *jă'-ar-math*, the name of several market-towns in Hungary, none of them with a population above 4,000.

GYERGYOO ST. MIKLOS, *je'-er-joo*, a market-town of Transylvania, 95 miles from Klausenburg. *Pop.* with district, 6,000.

GYGES, or GYES, *ji'-jees*. The most celebrated of this name are,—a son of Cœlus and Terra, represented as having a hundred hands. He, with his brothers, made war against the gods, and was afterwards punished in Tartarus.—A Lydian, to whom Candaules, king of the country, showed his wife naked. The queen was so incensed at this instance of imprudence in her husband, that she ordered Gyges either to prepare for death himself, or to murder Candaules. He chose the latter, married the queen, and ascended the vacant throne, about 718 years before the Christian era. He was the first of the Mermnadæ who reigned in Lydia. He reigned 38 years, and distinguished himself by the immense presents which he made to the oracle of Delphi.

GYGES, a shepherd, who possessed a ring which rendered him invisible when he turned the stone towards his body.

GYLIPPUS, *ji-lip'-pus*, a Lacedæmonian, sent by his countrymen to assist Syracuse against the Athenians. He obtained a celebrated victory over Nicias and Demosthenes, and obliged them to surrender. After the capture of Athens by Lysander, he was intrusted by the conqueror with the money taken in the plunder, to convey it to Sparta; but he stole from it three hundred talents. His theft was discovered, and, to avoid the punishment which he deserved, he fled from his country, and tarnished the glory of his victorious actions. This, since the establishment of the laws of Lycurgus, was the first instance of any Spartan being infected by a corrupt desire for money. Lived in the 5th century B.C.

GYMNASIUM, *jim-nai'-se-um*, from *gumnos*, 'naked,' because the athletes were usually naked, was a place among the Greeks, where all the public exercises were performed, and where, not only wrestlers and dancers exhibited, but also philosophers, poets, and rhetoricians rehearsed their compositions. The laborious exercises of the Gymnasium were running, leaping, throwing the quoit, wrestling, and boxing, which was called by the Greeks *pentathlon*, and by the Romans *quinquertia*.

GYMNOSOPHISTÆ, *jim-nos-o-fis'-te*, a certain sect of philosophers in India, who, according to some, placed their *summum bonum* in pleasure, and their *summum malum* in pain. They lived naked, as their name implies, and, for 37 years, exposed themselves in the open air to every variety of the seasons. Alexander visited them, and was astonished at the sight of a sect who despised bodily pain, and inured themselves to suffer the greatest tortures. The Brachmans were a branch of the sect of the Gymnosophistæ.

GYNDES, *jin'-des*, a river of Assyria, falling into the Tigris. When Cyrus the Great marched against Babylon, his army was stopped by this river, in which one of his favourite horses was drowned. This so irritated the monarch, that he ordered the river to be conveyed into 360 different channels by his army; so that, after this division, it hardly reached the knee.

GYÖNGYÖS, *je'-on-je-os*, a town of Hungary, 43 miles from Pesth. The fine Vissoutaer vine is raised in its neighbourhood. *Pop.* 13,500.—Here the Austrians were defeated by the Hungarians, in 1849.

GYULA, or JULIA, *je-oo'-la*, a market-town of Hungary, near the Körös, 35 miles from Arad. It is divided by the Körös into two portions, in one of which only German is spoken, and in the other only Hungarian. It has several churches and oil-mills. *Pop.* 16,000.

GYULAI, Count, *je'-oo-lai*, commander-in-chief of the Austrian army in Italy, at the commencement of the campaign of 1859, and whose incapacity, it was said, caused serious disasters to the troops under his own command. He was superseded by Field-Marshal Hess.

## H.

HAA, *ha*, a small island of Scotland, in the county of Sutherland, 4 miles from Far-out Head.

HAARLEM, or HAERLEM, *har'-lem*, a city of the Netherlands, in the province of N. Holland, 12 miles from Amsterdam, with which and Leyden it communicates by railway and several navigable canals. It was formerly a place of great strength, but the ramparts are now converted into public promenades. A number of canals traverse the town in different directions, some of them bordered with trees. Among the public edifices are the Stadthouse, containing a valuable collection of pictures, a royal mansion or palace, and several charitable institutions. The number of churches is considerable, the cathedral of St. Bavon being the largest in Holland, and containing a collection of antiquities of the time of the crusades, with the famous Haarlem organ. The other objects of interest are the town library, the Anatomical Theatre, the Botanical Garden, the Academy of Sciences, founded in 1753, and to which a valuable museum is attached; and the Horticultural Society. *Manf.* Jewellery; cotton, linen, and silk stuffs; thread, and ribbons. Haarlem has long been celebrated for its bleaching-grounds, and carries on an extensive traffic in flowers, particularly tulips. *Pop.* 26,000.—It is the birthplace of the painters Berghem, Ostade, Ruisdael, Vanderhelst, and the Wynants. L. Coster, the reputed inventor of movable printing-types, was also a native of this place, and he has a statue erected to his memory in the market-square.

HAARLEM, LAKE OF, an extensive lake of the Netherlands, 2 miles from Haarlem. It was formed by an inundation in the 16th century, but has, recently, been drained by steam-engines of British construction. It is estimated that 45,000 acres of land have thus been gained to the community.

HAAS, William, *hawz*, a Swiss type-founder and printer, who was the first in Germany and Switzerland to successfully engrave a French type in the style of Baskerville. He invented a new printing-press, also the art of printing geographical charts with movable characters. B. at Basle, 1741; D. in the canton of Lucerne, 1800.

HABAKKUK, *hăb'-ăk-kuk*, one of the twelve lesser Jewish prophets, who is supposed to have been contemporary with Jeremiah, and to have prophesied in the reign of Josiah, 609 B.C. His style is grand and beautiful.

HABERGHAM-EAVES, *hăb'-er-gam eeves*, a township of Lancashire, 2 miles from Burnley. *Manf.* Cotton and woollen goods; and in its neighbourhood are coal-mines. *Pop.* 7,500.

HABERSHAM, *hăb'-er-sham*, a county of the United States, occupying a portion of the N. part of Georgia. *Area*, 709 square miles. *Pop.* 9,000.

HABINGTON, William, *hăb'-ing-ton*, an English writer, who was educated in France. He wrote some poems, a play called "The Queen of Aragon," and the history of Edward IV. B. in Worcestershire, 1605; D. 1654.—The poetry of Habington has both great elegance and poetical fancy: it exhibits the author to have been possessed, according to Hallam, of "a pure and amiable mind, turned to versification by the custom of the day, during a real passion for a lady of birth and virtue, the Castara whom he afterwards married."

HABSBURG, or HAPSBURG, *haps'-burg*, a village of Switzerland, with the ruins of a castle, which was the original seat of the house of Austria, of which Rudolph, who lived in the 13th century, was the founder. (*See* RUDOLPH.)

HACKAERT, John, *hak'-art*, a Dutch artist, who greatly excelled in landscape-painting. B. at Amsterdam, about 1635.

HACKERT, Philip, *hak'-airt*, a celebrated German landscape-painter, whose works are not remarkable for any specialty in his art. B. at Prenzlau, 1737; D. at Florence, 1807.

HACKET, John, D.D., *hăk'-et*, an English divine, who was educated at Trinity College, Cambridge. In 1661 he became bishop of Lichfield and Coventry, and wrote a Latin comedy, twice acted before James I.; a life of Archbishop Williams, and "Christian Consolations." "What a delightful and instructive book Bishop Hacket's 'Life of Archbishop Williams' is!" exclaims Coleridge; "you learn more from it of that which is valuable towards an insight into the times preceding the civil wars, than from all the ponderous histories and memoirs now composed about that period." B. in London, 1592; D. 1670.

HACKNEY, *hăk'-ne*, a parish of Middlesex, 3 miles from St. Paul's cathedral, London, of which it is a suburb. It contains a parish church, several chapels for dissenters, a free school, a charity school, and almshouses. It has also a receptacle for lunatics. St. John's Palace, an ancient house in Wells Street, is believed to have been the residence of the prior of the order of St. John of Jerusalem. *Pop.* 60,000.—Hackney-coaches took their name from this parish.

HADDINGTON, or EAST-LOTHIAN, *hăd'-ding-ton*, a county of Scotland, bounded E. by the German Ocean, N. by the Firth of Forth, W. and S.W. by the county of Edinburgh, and S. and S.E. by Berwickshire. *Area*, estimated at 280 square miles. *Desc.* Along the coast is a shelving or sloping tract of land, affording a fertile soil. The interior consists of a ridge of ground N. of the Tyne, sloping partly to that river, and partly to the coast land. There is also a large tract, of varied breadth, elevated above the midlands, and continuing along the base of the mountains nearly the whole extent of the county. The whole represents an extensive range of mountains, which commences at the S.W. extremity of the county, and terminates at a high promontory called St. Abb's Head, on the E. shore. *Rivers.* The principal is the Tyne; but, in general, it is well watered. *Pro.* Being one of the most fertile counties in Scotland, it produces, in large quantities, wheat and other grains, beans, turnips, and grasses. The farms are generally large; and immense numbers of Highland cattle are fattened. *Minerals.* Coal and limestone. *Manf.* Pottery-wares and salt; and there are some linen and woollen manufactures carried on. There are, besides, extensive distilleries. *Pop.* 37,000.—The North British Railway traverses the county.

HADDINGTON, a royal burgh and parish of Scotland, and the capital of the county of Haddington, on the Tyne, 18 miles from Edinburgh. It consists of four streets, which cross each other at right angles. Of the public buildings, the parish church is the most remarkable. It is a large and venerable structure, 210 feet long from E. to W., 110 feet broad in the transept, and 65 feet broad in the choir. It has, besides, a town-house and county hall, corn exchange, mechanics' institute, and several public libraries. There are two bridges over the Tyne. There are four fairs annually, none of them of much importance; but there is a weekly market on Friday, reckoned the largest in Scotland, and at which all kinds of grain are sold. *Pop.* of town, about 3,000; of parish, about 6,000.—This town disputes, with Gifford, the honour of having given birth to the reformer John Knox.

HADELN, *had'-eln*, a district of Northern Germany, Hanover, extending for 12 miles along the mouth of the Elbe. *Area*, 110 square miles. *Desc.* Marshy; but, on the whole, fertile, and protected from inundations by dykes. *Pop.* 20,000.

HADERSLEBEN, *ha'-ders-lai'-ben*, a town of Schleswig, on a bay of the Little Belt, 50 miles from Schleswig. *Pop.* 6,000.

HADLEIGH, *hăd'-le*, a market-town and parish of Suffolk, on the Bret, 10 miles from Ipswich. *Manf.* Silks; but most of the inhabitants are engaged in agriculture. *Pop.* about 4,000.

HADLEY, John, *hăd'-le*, is the author of several philosophical papers which appeared in the "Transactions of the Royal Society," and the reputed inventor of the sextant which bears his name. Being on intimate terms with Sir Isaac Newton, it is generally believed that he borrowed the idea of the sextant from that great man, an account of which was communicated by Hally to the "Philosophical Transactions" for 1731. Hadley became a member of the Royal Society in 1717, and died in 1744.

HADLOW, *hăd'-lo*, a parish in Kent, 4 miles from Tunbridge Wells. *Pop.* 2,500.

HADRAMAUT, *had'-ra-mawt*, a large province of Arabia, occupying the greater part of the S. coast, upon the Indian Ocean, along which it extends from Yemen to Oman. It formed a part of the ancient Arabia Felix, and is guarded by mountains along the coast, with an elevation of 5,000 feet.

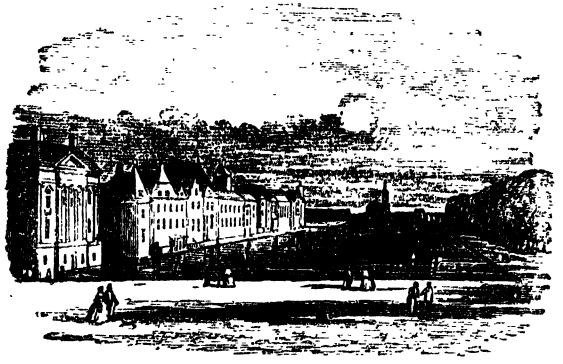
HADRIAN. (*See* ADRIAN.)

HÆMON, *he'-mon*, a Theban youth, son of Creon, who was so captivated with the beauty of Antigone, that he killed himself on her tomb when he heard that she had been put to death by his father's orders.

HÆMUS, *he'-mus*, a mountain which separates Thrace from Thessaly. It receives its name from Hæmus, son of Boreas and Orithyia, who was changed into this mountain for aspiring to divine honours. It belongs to the Balkan chain, in European Turkey.

HAFF, *haf*, an extensive bay or gulf of Pomerania, 10 miles from Stettin, and separated from the Baltic by a strip of land.—2. Of East Prussia, which communicates with the Baltic.—3. A very extensive bay of the Baltic, on the coast of East Prussia.

HAFIZ, Mohammed-Shems-Eddin, *haf'-fiz*, a celebrated Persian poet, whose muse delighted to depict the pleasures of love and wine. He was invited to the court of the sultan of Bagdad, but he seems to have passed the greater portion of his life in his native town. His effusions principally consist of odes and elegies, and were, after his death, given to the world under the title of "The Divan." B. at Shiraz, about the beginning of the 14th century; D. about 1388.



HAGEN, *ha'-gen*, a town of Prussia, in the county of Mark. *Pop.* 1,850.

HAGGAI, *hăg'-gai*, one of the twelve minor prophets, whose predictions form a portion of the Old Testament. Lived 520 B.C.

HAGHE, Louis, *hag*, a distinguished Belgian litho-

grapher, who went to London, and, in connection with Mr. Day, under the firm of Day and Haghe, issued many superior works. Among these may be noticed "Roberts' Sketches in the Holy Land, Syria, Arabia, Egypt, and Nubia." Subsequently, Mr. Haghe devoted himself to water-colour painting, and became a leading member of the New Society of Water-colour Painters. Many of his works consist of the antique interiors of Flemish town-halls and churches, which have received well-merited admiration. B. in Belgium, 1802.

HAGUE, THE, *haig*, a town of the Netherlands, and capital of the province of Holland, 10 miles from Leyden, and nearly 3 from the seacoast. It yields to few cities in Europe in the beauty of its streets, the stateliness of its buildings, and the pleasantness of its situation. The largest street is called the Voorhout, and contains a succession of elegant edifices; but the

THE HAGUE

most fashionable part is one of the public squares, in the N. quarter of the town, called the Vyverburg. It is of an oblong form, with a beautiful walk and an avenue of trees on one side, while the other is bordered by a large basin of water and superb edifices. Of the public buildings, the old palace, the mansion of the family of Bentinck, that of Prince Maurice, the new palace begun by William III., and the National Museum, where is the celebrated "Bull" of Paul Potter, are all deserving of attention. There are a number of churches, several charitable institutions, an orphan asylum, a theatre, numerous schools, and a prison. The greatest drawback to the town arises from the neglect of the canals, several of which are stagnant, and emit a disagreeable effluvium, forming a strange contrast to its otherwise general cleanliness. The environs of the Hague contain a number of villas; but the principal ornament is the rural palace belonging to the Orange family, a mile to the N. of the town. To the west of the Hague is Scheveling, a neat fishing-village of about 300 houses. On the opposite side of the Hague, and at a distance of about a mile and a half in a S.E. direction, is the castle of Ryswic, which gave name to the well-known treaty of 1697. *Manf.* Porcelain, and the printing of books, particularly French books. *Pop.* 74,000. *Lat.* 52° 4′ 20″ N. *Lon.* 4° 18′ 40″ E.—The Hague became, in 1250, the residence of the governors or counts of Holland. It is the usual residence of the court and the States-general, and has railway communication with both Rotterdam and Amsterdam.

HAGUE, CAPE LA, *hag*, a headland of France, frequently incorrectly termed Cape La Hogue. It is on the peninsula of Cotentin, opposite the island of Alderney. *Lat.* 49° 43′ N. *Lon.* 1° 57′ W.

HAGUENAU, *hag'-no*, a parish and fortified town of France, on the Moder, 16 miles from Strasburg. *Manf.* Tobacco, madder, earthenware, woollen and cotton fabrics, soap; and it has both breweries and metal-foundries. *Pop.* 11,500.

HAHNEMANN, Samuel, *han'-man*, a German physician, the founder of the system of medicinal practice to which he gave the name of the "Homœopathic," and, after years of study, succeeded in establishing himself at Leipsic, where he was successful in gaining numerous adherents to his system. As he was ruining the apothecaries, however, they rose against him, and in a court of law, it was decided, by an old decree, that no physician could dispense his own prescriptions. Accordingly, he quitted Leipsic, and found an asylum in the dominions of the duke of Anhalt-Cöthen, where, at Cöthen, he obtained a new practice. In 1829 his disciples, in this place, struck a medal in honour of him. In 1835 he married a French lady, with whom he removed to Paris, where, to commemorate his arrival in the French capital, another medal was struck, in gold, silver, and bronze. Here he enjoyed a wide reputation up to the time of his death. B. in Saxony, 1755; D. at Paris, 1843.

HAINAN, *hai'-nan*, an island belonging to China, in the province of Quang-tong. *Area*, estimated at 12,000 square miles. *Desc.* Rocky along the coasts, mountainous in the centre, and generally fertile. It is watered by large rivers, and produces great quantities of timber. It also exports sugar, coral, pearls, wax, gold, and silver. *Pop.* 1,000,000, exclusive of some wild tribes in the interior. *Lat.* between 18° 10′ and 20° N. *Lon.* between 108° 25′ and 111° E.

HAINAULT, or HAINAUT, *hai'-nault*, an extensive frontier province of Belgium, bounded on one side by the French frontier, and on the other sides by Flanders, South Brabant, and the province of Namur. *Area*, 1,400 square miles. *Desc.* Generally level. *Rivers.* The Scheldt, Sambre, and Haine. *Pro.* Agriculture is followed; but cattle-rearing and mining are the principal occupations of the inhabitants. *Manf.* Linen and woollen fabrics, lace, leather, glass, and hardware goods. *Pop.* 725,000.

HAINAUT, *hai'-no*, an old division of France, in French Flanders, now comprised in the department Nord.

HAINBURG, *hain'-boorg*, a town of Austria, on the Danube, 28 miles from Vienna. It has a royal tobacco-manufactory. *Pop.* 3,500.—Here the Magyars gained a great victory over the Germans, in 907.

HAITI, an island in the West Indies. (*See* HAYTI.)

HAJI, or HADJI, *ha'-je*, a prefix to the names of numerous villages in Armenia and Turkish Kurdistan.

HAKLUYT, Richard, *hāk'-lut*, an English divine, who was distinguished for his skill in cosmography, and published a curious collection of voyages, in 3 vols. folio. In 1605 he was made prebendary of Westminster, besides which he had the benefice of Wetheringset, in Suffolk. B. in London or its vicinity, 1553; D. 1616. His countrymen, out of respect to his labours, named a promontory on the coast of Greenland Hakluyt's Headland. Of Hakluyt's Voyages it has been said that they redound as much to the glory of the English nation as any book that ever was published in it. In the first edition is a map, says Hallam, which "represents the utmost limit of geographical knowledge at the close of the sixteenth century, and far excels the maps in the edition of Orrelius, at Antwerp, in 1588."

HAL, *hal*, a town of Belgium, in the province of South Brabant, 10 miles from Brussels. *Pop.* 6,500. A station on the Mons Railway.

HALAS, *ha'-las*, a market-town of Hungary, 75 miles from Pesth. It stands on Lake Halasto. *Pop.* 13,000.

HALBERSTADT, *hal'-ber-stat*, a city of Prussian Saxony, 30 miles from Magdeburg, with which it communicates by railway. It is a place of great antiquity, built chiefly in the Gothic style. The principal buildings are, the cathedral, the Jewish synagogue, and the ancient palace, now converted into the town-house and excise-office; it has also numerous Protestant churches, two Catholic chapels, several public libraries, Gleim's Institute, private museums, and picture-galleries.

*Manf.* Woollen, linen, leather, gloves, paper, wax, and cobalt. *Pop.* 20,000.

HALDENSLEBEN, NEW, *hal'-dens-lai'-ben*, a town of Prussia, on the Ohre, 14 miles from Magdeburg. *Pop.* 5,000.—OLD HALDENSLEBEN is an adjacent town, with nearly 2,000 inhabitants.

HALE, Sir Matthew, *hail*, an English judge, who was educated at Magdalen Hall, Oxford, whence he removed to Lincoln's Inn, where he followed the study of the law with great application. He was one of Archbishop Laud's counsel, and acted in the same capacity for Charles I. He took, however, the Covenant and Engagement, and accepted of a judge's place on the common bench, from Cromwell. On the death of Oliver, he refused to act under his son Richard. In the parliament which recalled Charles II. he sat for his native county, and after the Restoration was, in 1660, made chief baron of the Exchequer; whence, in 1671, he was advanced to the chief-justiceship of the King's Bench. He resigned his office in 1675, and died the same year. B. at Aldersley, Gloucestershire, 1609. Cowper, in his "Task," speaks of him as—

> "Immortal Hale! for deep discernment praised
> And sound integrity, not more than famed
> For sanctity of manners undefiled."

His writings are numerous on theological, philosophical, and legal subjects.

HALE, Mrs. Sarah, an American authoress, who has written several novels, and other works of merit. She edited "The Ladies' Magazine," at Boston; "The Ladies' New Book of Cookery;" and produced "Nomar's Record, or, Sketches of distinguished Women, from the Beginning till 1850 A.D." B. at Newport, New Hampshire.

HALE, the name of several parishes in England, none of them with a population above 1,000.

HALESHUR, *ha-le-shur'*, a town of British India, on the Hoogly, in the presidency of Bengal: it has numerous Sanscrit colleges. *Pop.* Unascertained. *Lat.* 22° 25' N. *Lon.* 88° 23' E.

HALES, Stephen, *hails*, an English divine and natural philosopher of great eminence, was brought up at Benet College, Cambridge, of which he became fellow in 1703. He ardently entered upon the study of botany and experimental philosophy, and invented a machine for demonstrating the motions of the planets, nearly similar to the orrery. In 1741 he published his invention of ventilators. He had bestowed on him the rectory of Teddington, near Hampton Court, and the livings of Portlock and Farringdon; was greatly esteemed by Frederick, prince of Wales, and was almoner to the princess. B. in Kent, 1677; D. 1761. His communications to the "Philosophical Transactions" were numerous; besides which he published two volumes of "Statical Essays," &c., and was an early advocate of temperance. His "Friendly Admonition to the Drinkers of Gin" was first published in 1734, and has frequently been reprinted.

HALESIUS, *ha-le'-se-us*, a mountain and river near Ætna, where Proserpine was gathering flowers when she was carried away by Pluto.

HALESOWEN, *hails'-o-en*, a market-town and parish of Worcestershire, 8 miles from Birmingham. The parish church is a fine structure, much admired for its spire, supported by four curious arches. *Manf.* Nails, and various sorts of hardware. *Pop.* of town, 2,600; of parish, 23,500.

HALESWORTH, *hails'-werth*, a market-town of Suffolk, on the river Blyth, 26 miles from Ipswich. It is of considerable antiquity, and has a handsome Gothic church. *Manf.* Spinning and weaving yarn from hemp. *Pop.* 2,800.

HALFORD, Sir Henry, M.D., *hâf'-ford*, was the physician of four successive British sovereigns,—George III., George IV., William IV., and Queen Victoria. He was president of the Royal College of Physicians from 1820 till the time of his death. In 1831 a collective edition of his essays and orations was published, and pronounced by the "London Quarterly Review" to be "a delightful compound of professional knowledge and literary taste. Handled with skill and feeling such as his, subjects of medical research have not only nothing dry or repulsive about them, but are of deep and universal interest and attraction." The original name of Sir Henry was Vaughan, which, on coming into the possession of a large fortune by the death of Sir Charles Halford, his mother's cousin, he exchanged for that name. B. at Leicester, 1766; D. 1844.

HALIBURTON, Thomas Chandler, *hâl'-i-bur-ton*, popularly known by the name of Sam Slick, was for a long time a judge of Nova Scotia. In 1835 he contributed a series of essays to a weekly paper in that country, professing to paint the peculiarities of Yankee character. These were well received, and, in 1837, they were collected and published under the title of the "Clockmaker; or, the Sayings and Doings of Samuel Slick of Slickville." A second series appeared in 1838, and a third in 1840. In 1842 he visited England as an attaché to the American legation, and, in the following year, embodied, in a work called "The Attaché," the results of his observations made in that country. This went through several editions. Besides these works, Mr. Haliburton has published "Bubbles of Canada;" "An Historical and Statistical Account of Nova Scotia;" "The Old Judge; or, Life in a Colony;" "Traits of American Humour;" "Yankee Stories;" "Nature, and Human Nature;" and a few others. In 1859 he was returned to the House of Commons, as member for Launceston. B. in Nova Scotia, about the end of the last century.

HALIBUT ISLAND, *hâl'-i-but*, lies in the N. Pacific Ocean, near the S.W. extremity of the peninsula Aliashka. Circumference, 22 miles. *Lat.* 54° 48' N. *Lon.* 164° 15' W. This island received its name from Captain Cook, from the immense number of halibuts taken off its shores.

HALICARNASSUS, *hâl-e-kar-nas'-sus*, a maritime city of Caria, in Asia Minor, where stood the Mausoleum, one of the seven wonders of the world. It was erected by Artemisia, queen of Caria, to the memory of her husband, Mausolus. It is celebrated for having given birth to Herodotus, Dionysius, and Heraclitus.

HALIFAX, *hâl'-i-fax*, a market-town and parish of the West Riding of Yorkshire, on the river Calder, 14 miles from Leeds. The town stretches along a gentle declivity, and the houses, in general, are well built, mostly of stone, and many of them large and handsome. The parish church is a spacious and handsome Gothic building. There are, besides, places of worship for Methodists, Independents, Quakers, and other denominations. It also has a blue-coat hospital, a free school, a theatre, assembly-rooms, literary-society hall, mechanics' institute, public baths, a gaol, and an infirmary. There is a vast building, called the Piece-Hall, containing upwards of 300 rooms or warehouses, in which the manufacturers expose their cloth for sale. *Manf.* Shalloons, calimancoes, moreens, shags, serges, baize, narrow and broad cloths, coatings, carpets, figured vestings, kerseys, cottons, and silks. Excellent wool-cards are also manufactured, and great quantities of freestone, with which this neighbourhood abounds, are sent to London. *Pop.* of parish, 150,000; of town, 34,000.—It is a station on the Manchester and Leeds Railway, and the river Calder is a means of communication being kept up with Liverpool on the one side, and Hull on the other.

HALIFAX, the capital of Nova Scotia, N. America, is situate on the west side of a spacious bay, and is laid out in oblong squares, on the declivity of a hill, with the streets parallel and at right angles. At the north extremity of the town is the king's naval yard, completely built, and supplied with stores of every kind for the royal navy. There are, besides, the residences of the military commandant and admiral, two sets of barracks, Dalhousie College, a military hospital, assembly-rooms, prison, exchange, theatre, and various churches. The bay or harbour is capable of containing an immense fleet of the largest ships with ease and safety. The port engrosses nearly all the foreign trade of the colony. *Manf.* Leather, snuff, paper, soap; and there are several distilleries. *Pop.*, exclusive of the army and navy, 25,000. *Lat.* 44° 39' N. *Lon.* 63° 37' W.—By a canal, this town communicates with the Bay of Fundy, and by steam mail-packets with Liverpool in England, and Boston in the United States.

HALIFAX, a county of Virginia, U.S., bordering on N. Carolina. *Area*, 765 square miles. *Pop.* 26,000.—2. A county in N. Carolina, inclosed by the counties

of Northampton, Edgecombe, Bertie, and Warren. *Area*, 545 square miles. *Pop.* 17,000.—Also the name of several townships in the United States, none of them with a population above 3,000.

HALIFAX, George Saville, Marquis of, an eminent English statesman, who was created marquis in 1682. Charles II. made him a privy councillor, and lord privy seal. He was also offered the post of secretary of state, and that of lord-lieutenant of Ireland, but declined both. On the accession of James II., he was appointed president of the council, from which he was dismissed for refusing his consent to a repeal of the tests. In the Convention Parliament he was chosen speaker of the House of Lords, and, at the accession of William and Mary, was made lord privy seal. In 1689 he resigned that office, and became an opponent of the government. B. 1630; D. 1695.—His lordship wrote an excellent piece, entitled "Advice to a Daughter." Macaulay says of Halifax, that at the inroads made by James on the constitution, when opposition first appeared in the cabinet, Halifax courageously gave utterance to those feelings which, as it soon appeared, pervaded the whole nation.

HALIFAX, George Montagu, Earl of, a statesman in the reigns of William III. and Anne. He assisted Prior in the composition of the "Story of the Country Mouse and the City Mouse," designed to ridicule Dryden's "Hind and Panther." He also wrote several other pieces. B. in Northamptonshire, 1661; D. 1772.

HALKET, Lady Anna, *hăl'-ket*, an English lady, the daughter of Robert Murray, preceptor to Prince Charles, afterwards Charles I. In 1656 she married Sir James Halket. She produced twenty-one volumes, in folio and 4to, on religious subjects. From these, a volume of Meditations was printed at Edinburgh, in 1701. B. in London, 1622; D. 1699.

HALL, *hal*, the name of several towns of Germany, the largest of which is 34 miles from Stutgard. *Pop.* 6,500.

HALL, Joseph, *hawl*, an English prelate and distinguished scholar, was educated at Emmanuel College, Cambridge, where he obtained a fellowship. In 1597 he published his "Virgidemiarum," or Satires, in six books, which were reprinted at Oxford in 1753. Of this work Pope said, "it was the best poetry and the truest satire in the English language." He professed himself to be the first English satirist, as is evident by the following egotistic couplet:—

> "I first adventure; follow me who list,
> And be the second English satirist."

Hallam, however, questions his claim to be the first English satirist, and puts Gascoigne before him. About 1603 he was presented to the rectory of Hawsted, in Suffolk, which he resigned on obtaining Waltham, in Essex. Henry Prince of Wales appointed him his chaplain, and had a great regard for him. In 1616 he obtained the deanery of Worcester, and two years afterwards was appointed one of the English divines at the synod of Dort. In 1627 he was promoted to the bishopric of Exeter, whence, in 1641, he was translated to Norwich. B. at Ashby-de-la-Zouch, 1574; D. near Norwich, 1656.—His works have been published in three volumes folio, and abound in fine thoughts, expressed in excellent language. He has been generally called the English Seneca. A great authority, speaking of the works of this writer, says—"His 'Art of Divine Meditation,' his 'Contemplations,' and, indeed, many of his writings, remind us frequently of Taylor. Both had equally pious and devotional tempers; both were full of learning; both fertile of illustration; both may be said to have strong imagination and poetical genius, though Taylor let his predominate a little more. Taylor is also more subtle and argumentative. . . . I do not know that any third writer comes close to either."

HALL, Captain Basil, R.N., was the son of Sir James Hall, the fourth baronet, of Dunglass, and, in 1802, entered the British navy. For many years he was actively engaged in various parts of the globe, but is principally known by his popular books of voyages and travels, the names of the most esteemed of which are "Voyage to the West Coast of the Corea and the Great Loo-Choo Island," which was favourably received; "Travels in North America;" "Fragments of Voyages and Travels," of which appeared several series, and which met with general favour. These, however, are but a few of his numerous writings, which embrace a considerable variety of subjects. These works extend to numerous volumes; but, as a general estimate of his talents as a writer, the following criticism appeared in the "London Quarterly Review:"—"Few writers lay themselves more open to quizzing; few can prose and bore more successfully than he does now and then; but the captain's merit is real and great; he imparts a freshness to whatever he touches, and carries the reader with untiring good-humour cheerily along with him. Turn where we will, we have posies of variegated flowers presented to us, and we are sure to find in every one of them, whether sombre or gay, a sprig of Basil." He wrote with great facility. Some time before his death he was deprived of the use of his reason. B. in Edinburgh, 1788; D. in confinement, 1844.

HALL, Robert, one of the most distinguished of modern divines in the Baptist connection. His ministerial duties were performed during life in Cambridge, Leicester, and Bristol, where he died, 1831. B. at Arnsly, Leicestershire, 1764. As a preacher, Mr. Hall had a great reputation. "In the eloquence of the pulpit," says Lord Brougham, "Robert Hall comes nearer Massillon than either Cicero or Æschines to Demosthenes." As a writer, he stands equally high. "Whoever wishes to see the English language in its perfection," says Dugald Stewart, "must read the writings of that great divine, Robert Hall. He combines the beauties of Johnson, Addison, and Burke, without their imperfections."

HALL, Samuel Carter, a modern littérateur and lecturer, successfully edited several periodicals; among which we may mention "The New Monthly Magazine," "The Amulet," "The Book of Gems," and "The Art Journal." He is best known, however, by his share in an illustrated work on Ireland, written in conjunction with his wife. B. at Topsham, Devonshire, 1800.—Mrs. S. C. HALL was a native of Ireland, and is well known by her admirable delineations of many of the peculiarities of her countrymen. She has been a voluminous writer in the realms of fiction, and has also written several minor dramas, besides being a large contributor to the periodical literature of the day. B. at Wexford or Dublin.—In the writings of Mrs. Hall, we find that she never tries to enlist our sympathies on the side of vice.

HALLAM, UPPER and NETHER, *hăl'-lam*, two townships of Yorkshire, the former 3 and the latter 2 miles from Sheffield. *Pop.* of Upper, 1,500; of Nether, 9,000.

HALLAM, Henry, LL.D., one of the most distinguished of modern writers, was educated at Eton and Oxford, after which he took up his residence in London, where he ever afterwards principally lived. He was the esteemed friend of Sir Walter Scott, and, about the same period, was engaged with him as a contributor to the pages of the "Edinburgh Review." He greatly assisted in achieving the abolition of the slave-trade, and became a foreign associate of the Institute of France. In 1830 he received one of the two fifty-guinea gold medals awarded by George IV. for eminence in historical composition, whilst Washington Irving, the American writer, received the other. He wrote three great works, of which it is unnecessary to say more than that either of them is sufficiently meritorious to confer literary immortality upon the author. They are entitled—1. "A View of the State of Europe During the Middle Ages;" 2. "The Constitutional History of England from the Accession of Henry VII. to the Death of George II.;" 3. "An Introduction to the Literature of Europe in the Fifteenth, Sixteenth, and Seventeenth Centuries." While we write (April, 1860), a subscription is being made to erect a monument to this great writer's memory. B. 1778; D. 1859.—Henry Hallam was singularly unfortunate in seeing his two sons, young men of great promise, die before the hand of death was laid upon the father. It is to the memory of one of these loved friends that Tennyson wrote his poem of "In Memoriam."

HALLAR, or HALLAWAR, *hal-la-wur'*, a district of India, in the province of Guzerat. *Area*, 4,950 square

miles. *Desc.* Fertile in some parts, but generally the soil is light. *Pro.* Wheat, maize, millet, and cotton. *Pop.* 360,000.

HALLE, *hal*, a town of Prussian Saxony, on both sides of the Saale, over which it has five bridges, 55 miles from Magdeburg. It is built in the form of an irregular square, and has several suburbs. Its university, founded in 1694, is of high literary reputation, and had, in 1815, that of Wittemberg united to it. There are, besides, several libraries, a cabinet of natural history and mechanics, an apothecaries' hall, various museums, and a botanic garden. The Lutherans have several parish churches, and the Jews a synagogue. On the outside of the walls of the town is a monument erected to the memory of the Germans who fell in the battle of Leipsic. *Manf.* Woollens, stockings, silk, leather, buttons, hardware; but the principal is starch. It has salt-works in its vicinity. *Pop.* 34,000.—Here, in 1806, the Prussians were overcome by the French. Handel and Michaelis were natives of this place. It is connected with Leipsic, Weimar, and Magdeburg by railway.

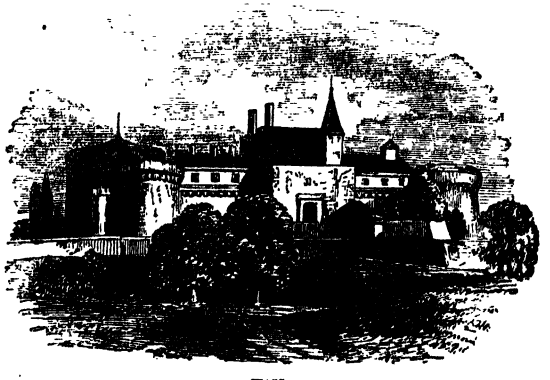
HALLER, Albert, *hal'-ler*, a celebrated physician, who, at a very early age, discovered the possession of considerable genius, particularly for poetry. His reputation procured him a medical professorship at Gottingen, where he afterwards became president of the academy. He was also a member of most of the learned societies in Europe. B. at Berne, 1708; D. there, 1777. The poems of the elder Haller are descriptive and elegant. Besides these, he published a number of works on medical subjects. His son, who followed in his father's footsteps, produced an esteemed work, entitled "A Literary Biography of the Swiss." D. 1786.

HALLEY, Edmund, LL.D., *hăl'-le*, a celebrated English astronomer, educated at St. Paul's School, whence he was sent to Queen's College, Oxford, where he applied himself principally to the study of mathematics and astronomy. He made a number of observations, and having formed the design of completing the scheme of the heavens by the addition of the stars near the south pole, he went to St. Helena in 1676, and finished his catalogue. On his return he was chosen a fellow of the Royal Society, and in 1679 went to Dantzic, to confer with Hevelius about the dispute between him and Dr. Hooke, respecting the preference of plain or glass sights in astronomical instruments. In 1680 appeared the great comet, known as Halley's comet, and which he first observed in his passage from Dover to Calais. He afterwards completed his observations upon it at the Royal Observatory at Paris. In 1686 Sir Isaac Newton committed to his care the publication of his "Principia," to which Halley prefixed some Latin verses. In 1698 he sailed along the coasts of Africa, America, &c., for the purpose of trying his theory of the variation of the compass. The year following he made another voyage with the same design, and, from his observations, constructed his general chart, exhibiting the variation of the compass in most parts of the ocean. He was subsequently sent on a third voyage to ascertain the course of the tides in the British Channel; and of these he also published a chart. Soon after he went, at the request of the emperor of Germany, to survey the Adriatic, and to examine two ports which the emperor intended to establish there. On his return, in 1703, the degree of doctor of laws was conferred on him by the university of Oxford. He was also appointed Savilian professor of geometry at Oxford, and had the half-pay of a captain in the navy settled on him. In 1713 he was chosen secretary to the Royal Society, and in 1719 made astronomer royal. B. in London, 1656; D. 1742. Dr. Halley published several papers in the "Philosophical Transactions," a set of Astronomical Tables, and an edition of Apollonius's works, folio, 1710. He excelled in many departments of learning and scientific research.

HALLIWELL, James Orchard, *hăl'-li-wel*, an eminent English author, who has produced and edited many valuable works, chiefly illustrative of past ages. Their number is too great to be enumerated here, but his greatest work is a grand edition of Shakspeare, with a new collation of the early editions, and with all the original tales and novels on which the plays are founded. Copious archæological illustrations accompany each play, and a life of the poet is given. A copy of this work is to cost £63. The edition is limited to 150 copies. B. in Surrey, 1821.

HALMSTADT, *halm'-stat*, a town of Sweden, on the Cattegat, at the mouth of the Nissa, 96 miles W.N.W. of Carlscrona. It is the capital of a district of the same name. *Manf.* Woollen goods, and it has a salmon-fishery. *Pop.* 2,000. The DISTRICT has an area of 1,950 square miles, but is not very fertile. Cattle-rearing, fishing, and linen-weaving, are the principal occupations of the inhabitants. *Pop.* 106,000.

HALSTEAD, *hăl'-sted*, a town and parish of Essex, with a handsome church and spacious streets. *Manf.* Velvets, silks, and straw plait. *Pop.* 7,000.



HALTON, *hal'-ton*, the name of several parishes in England, none of them with a population above 1,600.

HALTWHISTLE, *halt'-whis-el*, a market-town and parish of Northumberland, 35 miles from Newcastle. The town lies in a valley of the Tyne, which is here crossed by a bridge. *Manf.* Coarse baize. *Pop.* of parish, 5,500; of town, 1,500. A station on the Newcastle and Carlisle Railway.

HALYS, *hal'-lis*, a river of Asia Minor, rising in Cappadocia, and falling into the Euxine Sea, on the banks of which Crœsus, king of Lydia, was defeated by Cyrus the Great.

HAM, *hăm*, the name of several parishes in England, the largest being West Ham, on the Lea, 5 miles from London. *Pop.* 19,000; none of the others have a population above 1,600.

HAM, a parish and town of France, in the department of the Somme, 14 miles from Peronne. It has an old fortress, which is used as a state prison. *Pop.* 2,400. In the citadel, Prince Polignac and three of the other ministers of Charles X. were confined for having signed the ordinances of the *coup d'état* of 1830. Napoleon III., the present emperor of the French, was also imprisoned here for six years, for an attempt to seize the government of France, which a more successful *coup d'état* subsequently gave to him, in 1851.

HAM.

HAMADAN, or AMADAN, *ham'-a-dan*, a city of Irak, in Persia, 160 miles from Teheran. It was taken and destroyed by Timur, and is famed for the manufacture of leather. *Pop.* estimated at from 30,000 to 40,000. *Lat.* 34° 50′ N. *Lon.* 48° 32′ E. This place is an entrepôt for the commerce carried on between Bagdad and Teheran. It was formerly called Ecbatana.

HAMADRYADES, *hăm'-a-drī'-a-dees*, nymphs who presided over trees, and lived and died with the trees to which they were attached.

HAMAH, *ha'-ma*, a flourishing town of Syria, on the Orontes, 62 miles from Aleppo. It is surrounded by walls, has many mosques, baths, bazars, and a governor's palace. *Manf.* Cotton, woollen, and silk fabrics. *Pop.* 40,000. This is the Hameth of Scripture.

HAMBATO. (*See* AMBATO.)

HAMBLEDON, *hăm'-bel-don*, the name of three parishes in England, none of them with a population above 2,500. They are situate in Bucks, Hants, and Surrey.

HAMBURG, *hăm'-berg* (Ger. *ham'-boorg*), the chief commercial city of Germany, on the N. bank of the Elbe, about 75 miles from its mouth. The city is inclosed by elevated walks, and is much intersected by water communication, formed partly by the Elbe and partly by the Alster, a tributary of the Elbe. The ground on which it stands is rather elevated, except in the insulated parts, and the streets are narrow, crowded, and irregular. The houses are, in general, of great height, and built of brick and wood. In the quarter called the New Town, many of these are neat in their appearance, and some streets elegant, particularly on the Alster. Hamburg has several suburbs; but a great fire, which took place in the May of 1842, consumed 1 streets and 120 passages and courts, leaving nearly 20,000 of the inhabitants without a home: many of the public buildings on this occasion also suffered. Of these the principal are five parish churches, especially those of St. Michael and St. Peter, both of which are remarkable for their spires; the exchange, townhall, senate-house, arsenal, Eimbeck House, prison, workhouse, theatres, college, numerous libraries, museums, learned societies, chapels, and hospitals. *Manf.* Sugar-refining is carried on to a great extent, and the printing of cotton, linen, and handkerchiefs; also dyeworks, and machinery for twisting tobacco, making whalebone, jewellery, soap, wax, whale-oil, silk stuffs, gold and silver lace, needles, cards, sailcloth, and stockings. Hamburg has long been a commercial place of great importance, being the entrepôt for European goods of all descriptions, with which it supplies all the countries lying along the Elbe, different districts on the Rhine and the Lower Maine, and a part of the Prussian and Austrian dominions. *Pop.* with suburbs, about 165,000, of whom there are 100,000 Jews. *Lat.* 53° 32′ 51″ N. *Lon.* 9° 50′ 33″ E. It communicates with Lubeck by canal, and with Berlin, Brunswick, Hanover, and Kiel, by railway. Hamburg was founded in the reign of Charlemagne. In 1241 it concluded with Lubeck a treaty which formed the basis of the Hanseatic league. The kings of Denmark, in the quality of counts of Holstein, claimed a sovereignty over the city, till 1768, when it received a full confirmation of its rights as an independent city of the German empire. In 1810 it was incorporated with the French empire, and declared the capital of the department of the Mouths of the Elbe. The city, after being occupied by the French armies, was evacuated in May, 1814, when Hamburg regained, under the allied powers, its independence.—The territory of Hamburg hardly exceeds 150 square miles. It consists of a small district lying around the city, of the town and bailiwick of Cuxhaven, at the mouth of the Elbe, and some villages scattered in the duchy of Holstein. Its surface is level and well watered. The Vierlanden, and marsh-lands in the river, are exceedingly productive, being converted into market- and fruit-gardens. *Pop.* exclusive of the city, 40,000.

HAMELN, *ha'-meln*, a town and fortress of Hanover, at the confluence of the Weser and the Hamel, 25 miles from Hanover. *Manf.* Tobacco, hats, and woollens. There are, besides, tanneries, distilleries, and a salmon-fishery. *Pop.* 6,500.

HAMILCAR, Barcas, *ha-mil'-kar*, a celebrated Carthaginian general, who commanded the Carthaginians in the 18th year of the first Punic war. Fell in a battle against the natives of Spain, 229 B.C.

HAMILTON, *hăm'-il-ton*, a town and parish of Lanarkshire, near the confluence of the Clyde and Avon, 10 miles from Glasgow. It is irregularly built, and has a parish church, other places of worship, two hospitals, a mechanics' institute, a cavalry barracks, and the ducal palace of the house of Hamilton. *Manf.* Lace, imitation cambrics, black silk veils, check shirts, and hempen fabrics. *Pop.* of town, about 10,000.—This town was erected into a burgh of barony in 1456, and in 1548 it was erected by Queen Mary into a royal burgh, but its rights yielded up to the duke of Hamilton, who, in 1670, restored to the community its former privileges, and erected it into a burgh of regality, dependent on him and his successors.

HAMILTON, the name of several counties in the United States, with populations varying between 3,000 and 138,000. They lie in New York, Tennessee, Ohio, Florida, Illinois, and Indiana. Also the name of several townships, none of them with populations above 4,000.

HAMILTON, a city of British N. America, Upper Canada, at the W. end of Lake Ontario. *Pop.* 10,000.

HAMILTON, Anthony, Count, an ingenious writer, descended from a Scotch family. He attached himself to the fortunes of the house of Stuart, and wrote fairy tales and poems; but his best work is the "Memoirs of the Count de Grammont," a romance. B. in Ireland; D. at St. Germain's, 1720.—Speaking of these memoirs, in his "History of England," Macaulay says that Hamilton is "the artist to whom we owe the most highly-finished and vividly-coloured picture of the English court in the days when the English court was gayest."

HAMILTON, James, first Duke of, was the son of James, marquis of Hamilton, and, in 1625, succeeded his father, and gained the favour of Charles I. In 1631 he went with an army to the assistance of Gustavus Adolphus, king of Sweden, and returned to England in the following year. He afterwards accompanied the king to Scotland, and, on the breaking out of the disturbances in that country, respecting episcopacy, was appointed commissioner, and raised forces in defence of the royal cause, for which he was created duke of Hamilton and earl of Cambridge. After distinguishing himself greatly in behalf of the king, he was defeated by Cromwell at Preston, and was brought to trial and beheaded, in 1649. B. 1606.

HAMILTON, William, an ingenious poet, and a man of fortune and family. He is the author of "The Braes of Yarrow," a poem which suggested to Wordsworth his three pieces of "Yarrow Unvisited," "Yarrow Visited," and "Yarrow Re-visited." B. in Ayrshire, 1704; D. 1754.—His works were printed at Edinburgh, in 12mo, 1760.

HAMILTON, Sir William, K.B., was, for 36 years, English ambassador at the court of Naples. He explored the volcanic mountains of Vesuvius and Etna, his observations on which were published. His "Campi Phlegræi," 2 vols. folio, is also an interesting performance. He greatly promoted the publication of the magnificent and elegant work, "Antiquités Etrusques, Grecques, et Romaines, tirées du Cabinet de Mr. Hamilton," the editor of which was D'Hancarville. In 1782 he lost his first wife, and, in 1791, married Emma Harte, the Lady Hamilton so well known in connection with Lord Nelson. (*See* NELSON.) The "Philosophical Transactions" were enriched by many of his communications, and also the British Museum by his presents of antiquities and other curiosities. B. in Scotland, 1730; D. in London, 1803.

HAMILTON, Sir William, Bart., one of the most eminent of modern metaphysicians, was educated at Balliol College, Oxford, where he obtained first class honours. In 1813 he was called to the Scottish bar, but did not court extensive practice. In 1820 he competed with John Wilson for the moral philosophy chair in the university of Edinburgh, without success; but, in the following year, he became professor of univeral history in that institution. In 1836 he was summoned to the chair of logic and metaphysics, which he retained up to the time of his death. He also held the appointment of solicitor of Teinds for her majesty in Scotland, and was a member of the Institute of France and of many other learned bodies. B. at Glasgow, 1788; D. at Edinburgh, 1856.—This profound thinker contributed largely to the literature of mental philosophy, edited the works of Reid, and, at the time of his death, was engaged in editing an edition of the works of Dugald Stewart. His principal essays have been translated into French and Italian. On the European continent the intellectual calibre of Sir William was very highly estimated. M. Cousin calls him "le plus grand cri-

tique de notre siècle;" and M. Brandis, "le grand maître du Péripatétisme." In his own country he was equally appreciated. The "British Quarterly Review" observes that "the slightest perusal of Sir William Hamilton's writings will be sufficient to convince the reader that he is in intercourse with a mind of the most extraordinary comprehension and acuteness. He combines, in a degree unequalled since the time of Aristotle, the power of analysis and generalization. . . . . The degrees in which these two counter-powers exist in any mind, together with their relative proportion, determine a man's philosophical character."

HAMLET, *hăm'-let*, the name of a celebrated Danish prince, whose story is told by Saxo-Grammaticus, and rendered familiar to all acquainted with the English tongue by the admirable play written by Shakspeare.

HAMM, *ham*, a town of Prussian Westphalia, near the confluence of the Ahse and the Lippe, 20 miles from Arensberg. It is noted for its excellent hams. *Pop.* 6,000.

HAMME, *ham*, a trading town of Belgium, in the province of East Flanders, adjoining a canal which communicates with the Scheldt, 20 miles from Ghent. *Pop.* 8,400.

HAMMERFEST, *ham'-mer-fest*, the most N. town of Europe, in Norway, in the province of Finmark, of which it is the principal port. *Pop.* 500. *Lat.* 70° 40′ 7″ N. *Lon.* 23° 35′ 43″ E.

HAMMERSMITH, *hăm'-mer-smith*, a town and parish of Middlesex, on the N. bank of the Thames, here crossed by a suspension-bridge, 4 miles from London. The houses are well built, and along the Thames are a number of handsome seats and villas. *Pop.* about 18,000.

HAMMOND, Henry, *hăm'-mond*, a learned English divine, who, in 1632, obtained the rectory of Penshurst, in Kent, whence he was ejected in the rebellion. In 1643 he was made archdeacon of Chichester, and was with the king at the treaty of Uxbridge, to confer with the parliamentary commissioners on church government, on which subject he disputed with Vines, a Presbyterian minister. In 1645 he was appointed canon of Christ Church, Oxford, and chaplain in ordinary to the king, whom he attended in the Isle of Wight. In 1653 he published his "Annotations on the New Testament," a work of great merit. B. at Chertsey, 1605; D. as he was about to be made bishop of Worcester by Charles II., in 1660.—Besides the above, he wrote "A Commentary on the Psalms," "A Practical Catechism," sermons, and controversial pieces, all collected into 4 vols. folio. To the works of this writer Dr. Johnson was extremely partial, and sometimes gave them as a present to young men going into orders. He also bought them for the library at Streatham.

HAMMOND, James, M.P., an English gentleman, who cherished an unfortunate but unavailing passion for a Miss Dashwood, and wrote love elegies to unburden his woes. On these elegies Dr. Johnson thus generalizes:—"Where there is fiction, there is no passion. He that describes himself as a shepherd, and his Neæra or Delia as a shepherdess, and talks of goats and lambs, feels no passion. He that courts his mistress with Roman imagery deserves to lose her; for she may, with good reason, suspect his sincerity." B. 1710; D. 1742.

HAMPDEN, John, *hăm'-den*, a celebrated English patriot, descended of an ancient family in Buckinghamshire. In 1636 he distinguished himself by his resistance to the crown, and his objection to the payment of ship-money, by which he acquired great popularity. This case was argued twelve days in the court of Exchequer, before the twelve judges; and, although the decision was given in favour of the crown, the popularity of Hampden by no means suffered. He became a leading man in the House of Commons, and, at the commencement of the civil war, took up arms against the king; but fell in an engagement with Prince Rupert on Chalgrove Field, Oxfordshire, 1643; B. in London, 1594.—Lord Clarendon observes of him, that "he had a head to contrive, a tongue to persuade, and a heart to execute any mischief." But others are of a different opinion from his lordship, in reference to Hampden's powers of contriving *mischief*. In fact, he was one of England's noblest worthies. He spoke, acted, fought, and fell for the liberties of his country; and what more can be allotted for man to do? In private life he was amiable and affectionate; in public debate, eloquent yet temperate; in counsel, sagacious; in action, vigilant; in enterprise, courageous. His last moments were spent in prayer, [illegible] for the welfare of his country.

HAMPDEN, Renn Dickson, D.D., was educated at Oriel College, Oxford. In 1829 he became public examiner in classics; in 1832, Bampton lecturer; the following year, principal of St. Mary's Hall; 1834, White's professor of moral philosophy; 1836, regius professor of divinity; and, in 1847, bishop of Hereford. He was an able contributor to the "Encyclopædia Britannica" and the "Encyclopædia Metropolitana." Hallam says that no Englishman has gone so far into the wilderness of scholasticism. B. in Barbadoes, 1792.

HAMPDEN, a county of the United States, in Massachusetts. *Area*, 585 square miles. *Pop.* 52,000.

HAMPSHIRE, HANTS, more properly SOUTHAMPTONSHIRE, *hămp'-sheer*, one of the southern counties of England, including also the Isle of Wight, is bounded S. by the English Channel and the Sound, which cuts off the Isle of Wight; N. by Berkshire, E. by Surrey and Sussex, and W. by Wiltshire and Dorsetshire. *Area*, including the Isle of Wight, 1,625 square miles. *Desc.* Hampshire is distinguished as an agricultural, though its seacoast has also rendered it of considerable importance, as a maritime and commercial county. It is traversed by the ranges of the N. and S. Downs, and the S.W. division of the county is extensively occupied by the New Forest; but generally the county is well wooded. *Rivers and Harbours.* The Auburn and Loddon, falling in the Thames; the Anton, the Itchin, the Avon, and the Bolder Water, which empties itself near Lymington. These rivers are navigable for a considerable distance. There are, besides, various convenient canals, which greatly aid the communications of the county, whilst the South-western Railway has stations at its most important towns. Along the coast also, and in the Sound, which divides it from the Isle of Wight, are numerous excellent harbours and roadsteads, of the former of which Portsmouth is the principal. *Pro.* Hampshire is famous for the breeding of cattle, especially hogs and sheep, its bacon being reckoned the best in the kingdom. It also produces excellent wheat, abundance of hay, very fine honey; and large quantities of cider are made. *Manf.* Woollen goods, cloths, shalloons, serges, &c. Malt and leather are made at Basingstoke. Silk, straw hats, paper, vast quantities of common salt, and of Epsom and Glauber salts, are also manufactured. *Pop.* 405,370.

HAMPSHIRE, two counties of the United States. 1. In Massachusetts, on both sides of Connecticut river, and inclosed by Franklin, Worcester, Hampden, and Berkshire counties. *Area*, 532 square miles. *Pop.* 36,000.—2. In Virginia, inclosed by the Potomac, and the counties of Berkley, Frederick, and Hardy. *Area*, 838 square miles. *Pop.* 15,000.

HAMPSHIRE, NEW, one of the United States, bounded N. by Lower Canada, E. by the district of Maine, S. by Massachusetts, and W. by Connecticut river, which separates it from Vermont. *Area*, 9,280 square miles. *Desc.* This state has only about 18 miles of seacoast, at its S.E. corner; but, in this extent, there are several coves for fishing-vessels, and a harbour for ships at the entrance of Piscataqua river. The shore is mostly a sandy beach, adjoining to which are salt marshes, intersected by creeks; but the soil of the lower hills, valleys, and banks of the rivers, is fertile. To the distance of 20 or 30 miles inland from the sea, the country is generally level, after which it rises gradually, swelling into hills, and lastly into a chain, called the White Mountains, which form an elevated ridge, rising, in some parts, to the height of 7,000 feet above the level of the sea. *Rivers.* The principal are the Connecticut, Merrimack, and Piscataqua, besides many other smaller streams. *Lakes.* Winnipiseogee, Umbagog, Sunapee, Squam, and Great Ossipee. *Climate.* Extreme, both in heat and cold. *Zoology.* The animals are the moose deer, the black bear, which commits great ravages among the sheep, the racoon, the wild cat, the beaver, &c. The birds are the partridge, quail, wild pigeon, and wild turkey. The

bays and rivers abound with cod, salmon, shad, eels, trouts, &c. *Pro.* Agriculture being the chief occupation of the inhabitants, beef, pork, mutton, poultry, wheat, rye, Indian corn, barley, pulse, butter, cheese, hops, esculent roots and plants, flax, hemp, &c., are raised in immense quantities, both for home consumption and exportation. Apples and pears are the fruits most generally cultivated. The hills and mountains are covered with pine, oak, walnut, cedar, hemlock, fir, beech, maple, balsam, poplar, and butternuts. *Minerals.* Few, and not of great importance. *Manf.* This state is gaining in the manufacturing arts, the principal of which consist of woollen and cotton fabrics, iron wares, and paper. *Pop.* 320,000. *Lat.* between 42° 40′ and 45° 20′ N. *Lon.* between 70° 30′ and 72° 35′ W.

HAMPSTEAD, *hăm'-sted*, a parish and town of Middlesex, 4 miles N.W. from London. It is situate on the declivity of a high hill, from which there is a beautiful prospect of the metropolis and adjacent counties. *Pop.* 12,000.—According to tradition, this was a hunting-seat of James II., and in the last century was a fashionable place of resort.

HAMPTON, *hămp'-ton*, a village of Middlesex, near which is the magnificent palace of Hampton Court, founded by Cardinal Wolsey, some time the favourite of Henry VIII., and afterwards extended and improved by William III., whose favourite residence it was. It contains a magnificent collection of historical portraits, and seven cartoons by Raffaelle. Its ceiling was painted by Verrio, and its garden is laid out in the Dutch style. Its grape-house contains a vine said to be the largest and most productive in Europe. *Pop.* 5,000.—The name of several other parishes in England, none of them with a population above 3,500.

HAMPTON, the name of several towns in the United States, none of them with a population above 2,000.

HANAU, *hă'-nou*, a town of Germany, in Hesse-Cassel, on the Kinzig, 12 miles E. from Frankfort-on-the-Main. It is divided into the Old and New town, and contains a magnificent castle, the seat of the Wetteravian Society of Natural History, a college, council-house, theatre, academy of arts, several Calvinistic churches, and a large hospital. *Manf.* Watches, jewellery, camlets, hats, silk stuffs, carpets, leather, gloves, and hosiery. Wood, iron, corn, and flour form articles of traffic. *Pop.* 15,500.—In 1792, Hanau was attacked by the French, and in 1796 and in 1797 was entered by them, and also in 1805.

HANCOCK, *hăn'-kok*, the name of a number of counties in the United States, with populations varying between 4,000 and 35,000. They are situate in Maine, Mississippi, Georgia, Ohio, Kentucky, Illinois, Indiana, and Tennessee.—Also the name of two towns, neither with a population above 2,000.

HANDEL, George Frederick, *hăn'-del*, an illustrious German musician, whose father intended him for the law, and, perceiving his propensity to music, prohibited all instruments from his house. The son, however, contrived to have a small clavichord concealed in the garret, where he used to amuse himself when the family were asleep. At the age of seven he went with his father to the court of the duke of Saxe-Weissenfels, who induced his father to allow his boy to pursue the bent of his genius; and accordingly a master was provided for him. His progress was now so rapid, that, at the age of ten, he composed a set of sonatas, which were in the possession of George III. In 1698 he went to Berlin, where he was greatly noticed by the king of Prussia. Thence he went, in 1703, to Hamburg, and had a duel with Mattheson, another musician, who made a lunge at him, and whose weapon was prevented from penetrating his heart by its being broken against a music score, which Handel happened to have buttoned under his coat. Shortly after this, he composed, at the age of fourteen, his opera of "Almeria," which had a run of thirty nights. In the following year he produced "Florinda" and "Nerone," and, shortly afterwards, revisited Italy. At Florence he produced the opera of "Rodrigo," for which he received a service of plate and £50. His fame had now spread far and near, and in 1710 he visited England; but, being under an engagement to the elector of Hanover, afterwards George I. of England, his stay was short. In 1712 he returned, and obtained a pension of £200 a year for a "Te Deum" and his "Jubilate," written by command of Queen Anne, to celebrate the peace of Utrecht. This pension was subsequently doubled. Some of the nobility now projected a plan

HANDEL.

for erecting an academy in the Haymarket, to secure a supply of operas composed by Handel, and under his direction. This was carried into effect, and succeeded for about ten years, but fell to the ground, when the rage for Italian music prevailed, Handel finding it impossible to stay the progress of the delusion. In 1742, however, his popularity returned, and he retained his glory to the last. B. at Halle, Saxony, 1684; D. in London, 1759, and was buried in Westminster Abbey, where there is an elegant monument to his memory. But his greatest monument is in his works, a complete edition of which was published by Dr. Arnold.—This great musician composed much, and all that he composed is valuable. His original MSS. are in the Queen's Library, and consist of 82 large folio volumes. Among these are 23 oratorios, 32 Italian operas, 8 volumes of anthems, and other compositions. In every style of music he excelled, but more especially in sacred music of the choral kind. Wherever his works are now heard performed, admiration is the meed which is universally conceded to them. In 1859 the centenary of his birth was commemorated by a festival in many of the principal places of Europe, America, and even Australia we believe, in token of the universal appreciation in which his compositions are now held.

HANGO HEAD, *hăn'-go*, a promontory on the N. coast of the Gulf of Finland, with a harbour and custom-house. *Lat.* 59° 49′ N. *Lon.* 22° 58′ E.—Here, in 1855, during the war with Russia, an unarmed English boat's crew, although with a flag of truce flying, was treacherously fired upon by Russian grenadiers, all the British sailors being either killed or wounded.

HANKER, Naclaw, *hăn'-ker*, a modern Bohemian poet, more celebrated from his having accidentally discovered, in a vault of the church of Kralodvar, the Bohemian manuscript of a poem known as "The Queen's Court," than for the excellence of his own muse. He was, however, an ardent labourer in the field of Bohemian literature, and is said to have been master of eighteen different languages. B. 1791.

HAN-KIANG, *hăn'-ke-ang*, a river of Corea, which, in E. Asia, enters the Straits of Corea, after a course of 180 miles.—Another in China, which, after a course of 500 miles, unites with the Yang-tze-kiang at Hanyang.

HANLEY, *hăn'-le*, a market-town of Staffordshire, 2 miles from Newcastle-under-Lyne. It has a principal share in the manufacture of the potteries. *Pop.* 11,000. It is a station on the North-western Railway.

HANMER, Sir Thomas, *hăn'-mer*, an English writer, educated first at Westminster School, and, afterwards,

at Christchurch, Oxford. He was chosen speaker of the House of Commons in 1713, and held this office for thirty years. He published an edition of Shakspeare, with notes, in 6 vols. 4to. B. 1676; D. 1746.

HANNIBAL, *han'-ni-bal*, a celebrated Carthaginian general, the son of Hamilcar. He was brought up in his father's camp, although, from his earliest years he was accustomed to the labours of the field. He passed into Spain when nine years old, and, at the request of his father, took a solemn oath that he never would be at peace with the Romans. After his father's death, he was appointed over the cavalry in Spain, and before his 25th year, some time after, was invested with the command of all the armies of Carthage. In three years of continual success, he subdued all the nations of Spain which opposed the Carthaginian power, and took Saguntum, after a siege of eight months, 535 A.U.C. This city was in alliance with the Romans, and its fall was the cause of the second Punic war, which Hannibal prepared to support with all the courage and prudence of a consummate general. He levied three large armies, one of which he sent to Africa, he left another in Spain, and marched, at the head of a third, towards Italy. With this army he crossed the Alps, hitherto deemed impassable, and since accomplished by Napoleon I. under similar military circumstances. He no sooner had entered Italy, than he was opposed by the Romans, and after he had defeated the consul, P. Corn. Scipio, on the banks of the river Ticinus (Ticino), he crossed the Apennines, and invaded Etruria. He defeated the army of the consul Flaminius, near the lake Trasimenus, and soon after met the two consuls, C. Terentius and L. Æmilius, at Cannæ, in Apulia. His army consisted of 40,000 foot and 10,000 horse, when he here engaged the Romans, and the slaughter was so great, he sent to Carthage three bushels of gold rings, which had been taken from the Roman knights slain in the battle. Had he now marched his army to the gates of Rome, it is usually asserted that it must have yielded amidst the general consternation. After hovering for some time round the city, he retired to Capua, where his soldiers soon forgot to conquer, in the pleasures and riot of this luxurious town. From this circumstance it has been said, and with propriety, that Capua was a Cannæ to Hannibal. After the battle of Cannæ, the Romans became more cautious; and when the dictator, Fabius Maximus, had defied the artifice as well as the valour of Hannibal, they began to look for better times. Marcellus, who succeeded Fabius in the field, first taught the Romans that Hannibal was not invincible. After many important debates in the senate, it was decreed that war should be carried into Africa, in order to cause Hannibal to withdraw from the gates of Rome; and Scipio, who was the first proposer of the plan, was empowered to carry it into execution. When Carthage saw the enemy on her coasts, she recalled Hannibal from Italy; and he is said to have left, with tears in his eyes, a country which, during sixteen years, he had kept under continual alarms, and which he could almost call his own. He and Scipio met near Carthage, and, after a parley, in which neither would give the preference to his enemy, they determined to come to a general engagement. The battle was fought near Zama, where he suffered a great defeat, 202 B.C. This battle ended the second Punic war. Hannibal, after he had lost the day, fled to Adrumetum, and afterwards to Syria, to King Antiochus, whom he advised to make war against Rome, and lead an army into the heart of Italy. Antiochus distrusted the fidelity of the noble refugee, and was conquered by the Romans, who granted him peace on condition of his delivering their greatest enemy into their hands. The Carthaginian general, being apprised of this, left the court of Antiochus and fled to Prussias, king of Bithynia. He encouraged him to declare war against Rome, and even assisted him in weakening the power of Eumenes, king of Pergamus, who was in alliance with the Romans. The senate received intelligence of the country in which he had taken shelter from their vengeance, when they immediately sent ambassadors, amongst whom was L. Q. Flaminius, to demand him of Prussias. The king was unwilling to betray Hannibal, and violate the laws of hospitality; but, at the same time, he dreaded the power of Rome. Hannibal, however, extricated him from his embarrassment by swallowing a dose of poison, which he always carried with him in a ring on his finger. As he breathed his last, he exclaimed—"Solvamus diuturnâ curâ populum Romanum, quando mortem senis expectare longum censet." B. 247 B.C.; D. 183 B.C. In the same year, Scipio and Philopœmen died. The Romans entertained such a high opinion of Hannibal as a commander, that Scipio, who conquered him, calls him the greatest general that ever lived, and gives the second rank to Pyrrhus the Epirot, and places himself the next to these, in merit and abilities.

HANNO, *hăn'-no*, a Carthaginian general, who made great geographical discoveries in the interior of Africa, an account of which is extant.—There was another of this name, who tamed a young lion, which used to attend him like a dog. The Carthaginians, fearing his power, banished him.

HANOVER, *hăn'-o-ver*, a kingdom in the N. of Germany, comprehended in the Germanic confederation. Its form is irregular, and it is divided by Brunswick into two principal separate portions. It has the Elbe along its N.E. side; the German Ocean on the N.W.; Dutch Friesland, with Prussian Westphalia, on the S.W.; and Saxony on the S.E. *Political Divisions.* These consist of seven provinces, which are again subdivided into principalities, and are named Hanover, Hildesheim, Stade, Luneburg, Osnabruck, Aurich, and the Mining District. *Area*, 14,810 square miles. *Desc.* It consists of an immense plain, with gentle undulations, but hardly any one that can be called a mountain, with the exception of the Harz range and other elevated tracts in the south. In the south the valleys are fertile, but in the north are many barren heaths and moors; the most productive parts being those along the banks of the rivers, which have been reclaimed from a marshy state. The mountain tract of the Harz is covered with vast forests, which are particularly valuable, as affording fuel for the supply of the numerous mines, which are still more valuable than its forests. *Rivers.* The Elbe, joined by the Jetze; the Ilmenau, the Oste, the Weser, which receives the Leine, the Ocker, the Innerste, the Ruhme, and the Ems. *Lakes.* Steinhude and Dummer. *Climate.* Neither warm nor equable, but mild and healthy; and, except in the loftier mountain districts, not unfavourable to vegetation. *Pro.* The Harz is altogether a mining district. The duchy of Luneburg contains immense heaths, which are turned to account as sheep-walks, and, in some degree, as affording nourishment to bees. Wheat, barley, and oats, with a considerable proportion of rye and buckwheat, peas and beans, are very generally raised: agriculture, which was formerly in a very backward state, is now pursued with considerable skill and industry. *Minerals.* Mines of silver were discovered as early as 968, and are supposed to have been the first opened in Europe. Iron, copper, and lead are wrought to a great extent; also zinc and sulphur, with green, blue, and white vitriol. *Manf.* Thread and linen manufactures, coarse woollens, paper, leather, and glass, carried on in a number of places, but generally on a small scale. COMMERCE.—The trade is chiefly transit, and the navigable rivers and well-selected lines of railway have made it of importance. Four fairs are held annually at Hanover, and two at Osnabruck. *Imp.* English manufactures and colonial produce; linen from Friesland and Prussia; broad-cloth, silk, and jewellery, from France. *Exp.* The chief are coarse linen, iron, and copper, from the Harz; timber cut into planks; with horses and black cattle, from various parts of the country. *Pop.* about 2,000,000. *Lat.* between 51° 17′ and 53° 50′ N. *Lon.* between 6° 40′ and 11° 30′ E. Hanover was originally peopled by the Cherusci and the Lombards. In the time of Charlemagne it was occupied by Saxon tribes, and continued, even after its conquest by that monarch, to be governed by Saxon dukes. After being divided into separate duchies, Henry the Superb, duke of Bavaria, extended, by marriage, his dominion over nearly the whole of Hanover; but Otho, his grandson, having been put under the ban of the Church, was despoiled of his estates, with the exception of those which formed the duchy of Brunswick. After his death, the duchy was divided between the different branches of the house. Finally, Ernest Augustus reunited a great portion of the do-

mains of the duchy, and was, in 1692, elevated to the dignity of an elector, under the title of elector of Hanover. This prince had married the daughter of the elector-palatine, grand-daughter of James I., king of England; and thus his family acquired eventual rights to the British throne. George Louis, his son, added to his dominions the remainder of the duchy of Brunswick, by a marriage, in 1698, with Sophia Dorothea, heiress of the other branches of the house of Brunswick; and subsequently Hanover, Bremen, and Verden were joined. The nearest heir to Queen Anne, George Louis, succeeded to the crown of England in 1714, under the title of George I. From that period till 1837, Hanover was governed by the kings of England, without, however, forming a part of that kingdom. Under Georges II. and III. it received further acquisitions of territory. In 1803 the French occupied Hanover; but, two years afterwards, ceded it to Prussia. In 1807, however, they again took possession of it, and retained their hold till 1813. In that year the electorate was restored to its former masters, and, in 1815, erected into a kingdom. Various minor changes being made at this period in its territory, the duke of Cambridge, seventh son of George III., was, in 1816, named governor-general of the kingdom, and afterwards viceroy; but in 1837, after the death of William IV., Hanover fell to Ernest Augustus, duke of Cumberland, the fifth son of George III. and younger brother of William IV.; Queen Victoria, by the operation of the Salic law, which excludes females from the throne, not being able to succeed William IV. in his rights over Hanover. The new king abrogated the constitution which had been promulgated in 1833, and opposed the liberal tendencies of the nation. Several important modifications, however, took place in the government, in consequence of the revolutionary movements of 1848.

Hanover, the capital of the above kingdom, on the Leine, 85 miles from Hamburg, is separated by the river, which here joins the Ihme, into two parts, called the Old and New Town, which communicate by 11 bridges. These were formerly surrounded by walls and ditches; but in 1780, part of the ramparts were levelled, and laid out into streets, and the rest formed into an esplanade, where a very elegant monument has been erected to Leibnitz. The city is meanly built, though it has a handsome square, called Waterloo, and some of its streets are fine; but it has an antiquated aspect. This is particularly the case in what is called the Old Town; but improvements are going on with greater spirit in Hanover than in most continental cities. The New Town, which stands on the right side of the river, is built in a much better style than the Old. The principal buildings are the elector's palace, the public library, founded by Leibnitz, containing the archives of the kingdom, and a good collection of books. There are several Lutheran churches; the Calvinists and the Catholics have each their chapels, and the Jews a synagogue. The charitable institutions are an orphan-house, hospitals, and poor-houses. For the purpose of education, there are a gymnasium, a female school of industry, and various other seminaries. The other objects of note are the mews, the church of the castle, the gardens of the Baroness Deken and of Count Walmoden, the wood of Ellenztied, the Lutheran burial-ground, a large field surrounded by a parapet, the Waterloo monument, nearly 160 feet high, and the new theatre. Another remarkable object is Herrenhausen, a country mansion of the royal family, at some distance from the town. The inhabitants of Hanover derive their chief support from the presence of the court, and the residence of the gentry of landed property. *Manf.* Gold and silver lace, the printing of cotton and linen, the preparation of chicory for coffee, brewing, making of vinegar, &c.; all, however, on a somewhat limited scale. *Pop.* 42,590. *Lat.* 52° 22′ N. *Lon.* 9° 44′ E.—Herschel, the astronomer, was born here, in 1738. It is also the birthplace of the two Schlegels and of Iffland the actor.

Hanover, a county of Virginia, U.S., between Chickahominy and Pamunky rivers. *Pop.* 15,000, of whom half are slaves.—The name, also, of several townships.

Hanse Towns, *hăns*, certain towns of Germany and the Netherlands, which were associated for the purposes of mutual protection against piracy and robbery, and the arbitrary exactions of existing governments. The Hanse or Hanseatic league was first formed in 1241, by a treaty between Hamburg and Lubeck, with the view of protecting their commerce against the Baltic pirates, and their rights against the encroachments of the neighbouring princes. The advantages gained by this arrangement were so great, that many other towns sought admission into the league, and ultimately it was composed of the principal commercial cities of Europe. Amongst these may be named Bremen, Bruges, Bergen, Novogorod, London, Cologne, Brunswick, Dantzic, and, subsequently, Dunkirk, Antwerp, Ostend, Dort, Rotterdam, Amsterdam, &c. For a long period this league existed and flourished; but, at the beginning of the 15th century, the discovery of America, and the maritime commerce which resulted from it, caused it rapidly to decline. It was consequently dissolved in 1630, and the only towns now existing, known as Hanse Towns, are Hamburg, Bremen, and Lubeck.

Hants, *hănts*, the contracted name of Hampshire, which *see*.

Hanwell, *hăn'-wel*, a parish of Middlesex, 7 miles from London. *Pop.* 1,547.—It is a station of the Great Western Railway. Here is situate the lunatic asylum of the metropolitan county, containing, as an average number, 800 lunatics.

Haramuk, *har-a-mook'*, one of the Himalaya mountains, to the N. of Cashmere. *Height*, 13,000 feet. *Lat.* 34° 26′ N. *Lon.* 74° 43′ E.

Harborough, Market. (*See* Market Harborough.)

Harburg, *har'-boorg*, a town of Hanover, at the confluence of the Seeve with the Elbe, opposite Hamburg. It has two churches and a palace, and is defended by a citadel and other fortifications. *Manf.* Tobacco, wax, linen, sailcloth, starch, and gunpowder. It carries on an active general and transit trade. *Pop.* 5,500.

Hardanger-Field, *hard'-an-ger feeld*, a portion of the great Scandinavian chain of mountains, about 70 miles from Bergen. *Average height*, 4,000 feet.

Hardenberg, Charles Augustus, prince of, *har'-den-burg*, a famous statesman, who several times represented the elector of Hanover at the English court. In 1790 he entered the service of the king of Prussia, whose minister for foreign affairs he became in 1800. At the close of the wars of the first French empire, he signed the treaty of peace at Paris, in 1814. B. at Hanover, 1750; D. at Genoa, 1822.

Harderwyk, *har'-der-vike*, a town in the province of Gelderland, Holland, on the Zuyder Zee, 30 miles from Amsterdam. It is a place of some strength, with several churches, an Athenæum, town-hall, and different schools. Its environs are beautifully cultivated. *Manf.* Dye-works. It has a trade in grain, timber, and fish. *Pop.* 5,538.

Hardicanute, or Hardacanute, *har-di-ka-nute'*, eldest son of Canute the Great, king of England, Denmark, and Norway. On the death of his father, whose viceroy he was in Denmark, Harold, a younger son, by Canute's marriage with Alfgiva, daughter of the earl of Northampton, assumed the crown of England, and a bloody struggle was only prevented by the eldest son accepting the sovereignty of the whole country south of the Thames; thus forming the ancient kingdom of Wessex. The chief characteristic of his bachelor life was an inordinate love of eating and drinking; and long after his death, by apoplexy, his subjects continued to celebrate the event, under the title of Hog's Tide, or Hock Wednesday. B. 1018; D. at Clapham, 1042.

Harding, *har'-ding*, James Duffield, an English artist, distinguished no less as a teacher of and writer on his art than for his practice of it. At the age of 15 he took lessons of the celebrated Prout; and at 18, won the silver medal from the Society of Arts. He was among the first to employ tinted lithography as a vehicle for producing fac-similes of elaborate sketches and studies. His "Elementary Art; or, the Use of the Lead-pencil advocated and explained," "The Principles and Practice of Art," "Lessons on Trees," are considered the best text-books for students of drawing extant. For a series of years he has continued to adorn the exhibitions of the Royal Academy and

the Water-colour Society with his exquisite productions. For facility and certainty of touch he has no living superior. B. at Deptford, Kent, 1798.

HARDINGE, Henry, Viscount, *har'-ding*, a brave and accomplished English soldier, a field-marshal, and, for some time, commander-in-chief of the British army. He was third son of the Rev. Henry Hardinge, rector of Stanhope, in the county of Durham; became ensign in an infantry regiment in 1798, lieutenant in 1802, and captain in 1804. He served throughout the whole of the Peninsular war, under the duke of Wellington, who early took him under his patronage. At the battle of Vimiera he was severely wounded, and at Corunna, he stood beside Sir John Moore when that hero received his mortal wound. After taking part under the duke of Wellington, in the first and second sieges of Badajoz, he was once more severely wounded, at Vittoria. At the battles of the Pyrenees, Nivelle, Nive, and Orthes, he was present. Returning to England at the close of the Peninsular campaign, he was hailed as one of the bravest English officers. On the renewal of hostilities, he was again in the field, and served upon the duke's staff. He was wounded in the left arm at Ligny, while acting as a brigadier-general of the Prussian army; whereupon his arm was amputated. This skirmish taking place only two days before the battle of Waterloo, he was thus prevented from sharing in that glorious victory. He was created a K.C.B., with a pension of £300 a year. When the duke of Wellington was made premier, in 1828, he selected Sir Henry Hardinge as his secretary-at-war, a post which, two years after, he exchanged for the chief-secretaryship for Ireland, but retired from it a few months after. From 1835 to 1841 he had no official appointment; but, in the latter year, he resumed his former post in Ireland, and continued in it till 1844. In this year he was made governor-general of India, and to his firmness and military skill were chiefly due the successes of the English arms over the Sikhs. When the Sikhs crossed the Sutlej and invaded English territory, they were met by 32,000 British soldiers and 68 guns, and Moodkee and Ferozeshah witnessed the complete rout of the Sikhs. At the latter battle, the governor-general, waiving his title to command, fought under Sir Hugh Gough, and, at the head of the 80th regiment, carried and spiked the Sikh guns. Still acting as second in command, he led the left wing of the British to victory at Sobraon and Aliwal, upon which the Sikhs sued for peace. British troops now garrisoned Lahore, the capital of the Punjab. On the ratification of the treaty which annexed the fertile Punjab to the English dominions, he received the thanks of both houses of parliament, a pension of £3,000 a year, and was made Viscount Hardinge, of Lahore. The East-India Company further increased his pension by a grant of £5,000 a year. Under Lord Derby's administration, in 1852, he was made master-general of the ordnance, and, in September of the same year, commander-in-chief, on the decease of the duke of Wellington, never speaking in the House of Lords, save on military matters. In October, he was promoted to the rank of field-marshal. Being seized by a paralytic attack, in July, 1856, he resigned the office of commander-in-chief. B. at Wrotham, Kent, 1785; D. 1856.

HARDOUIN, John, *har'-doo-ă*, known as "Father Hardouin," a learned French Jesuit, who devoted his life to the study of the dead languages, history, divinity, and philosophy. He is famous for his paradoxical attempts to prove that Virgil's "Æneid," the "Odes" of Horace, and other great works of antiquity, were forgeries of the monks during the middle ages. B. at Quimper, 1646; D. at Paris, 1729.

HARDWICK, Philip, R.A., *hard'-wik*, a distinguished architect and designer of the warehouses and large buildings of the St. Catherine's Dock Company, the new hall of the Goldsmith's Company, the entrance of the Euston station of the London and Birmingham Railway, and, in conjunction with his son, of the New Hall and Library at Lincoln's Inn. He was, for many years, architect to the duke of Wellington and to the Greenwich Hospital; has received the gold medal of the Institute of British Architects; is a fellow of the same, and has been a vice-president; is a fellow of the Royal Society, and has been awarded the gold medal of the Paris Exhibition of 1855. B. in London, 1792.—

CHARLES PHILIP, son of the above, has been the joint designer of all the edifices erected by his father since 1842; his best work is the Great Western Hotel at Paddington; the latest additions to the London and North-western Euston station have also been designed by him.

HARDWICK, the name of several parishes in England, none with a population above 300.

HARDWICKE, Philip Yorke, first earl of, *hard'-wik*, a great English lawyer and judge, distinguished for his justice and skill as lord chancellor. In 1718 he was elected into parliament for Lewes, in Sussex; after serving the offices of solicitor and attorney-general, he was, in 1733, appointed chief justice of the King's Bench, and created a peer. In 1736 he was made lord chancellor, which situation he held twenty years. In 1754 he was created earl of Hardwicke. In all his offices, particularly the last, he so conducted himself, as to acquire the esteem of all parties, and the veneration of posterity. B. at Dover, 1690; D. 1764.

HARDY, Peter, *har'-de*, a distinguished English actuary, known for his valuable contributions to statistical and mathematical literature, applied to the contingencies of life-assurance. B. at Jamaica, 1814.

HARDY, Sir Charles, an English admiral, and the grandson of an eminent naval commander of the same name, in the reign of Queen Anne. He had the command of the Channel fleet in 1779. D. 1779.

HARDYNG, John, *har'-ding*, an old English historian, who, entering in his youth the service of Sir Henry Percy, eldest son of the duke of Northumberland, surnamed Hotspur, fought under his banner at the battles of Homildon and Cokelawe. In 1405 he was made constable of Warkworth Castle, in Northumberland; in 1415 he accompanied King Henry to Harfleur; and his account of the march which preceded the battle of Agincourt, forms one of the most striking episodes in his metrical "Chronicle;" the composition of which was the sole occupation of his old age. It has been edited by Sir Henry Ellis. B. 1378; D. about 1465.

HARE, Julius Charles, *hair*, a distinguished English divine and essayist, and one of the leaders of that section of the Church called "Broad Church." In conjunction with his brother Augustus William, and others, he wrote "Guesses at Truth," a book which has strongly affected thinkers and scholars. He assisted Bishop Thirlwall in translating Niebuhr's "History of Rome." In 1848 he edited the remains of John Sterling, and was fellow of Trinity College, Cambridge, rector of Hurstmonceux, and chaplain to the queen. His life was spent in earnestly searching after truth, many short works on philosophy, divinity, sermons, &c., attesting his industry. B. 1795; D. 1855.

HAREFIELD, *hair'-feeld*, a parish of Middlesex, 3 miles from Uxbridge. *Pop.* 1,498.

HAREWOOD, *hair'-wood*, a town of Yorkshire, 8 miles from Leeds. It has a handsome church, and the fine seat of the earl of Harewood is in its vicinity.

HARFLEUR, *har'-flur*, a town of France, in the department of the Seine Inférieure, situate at the confluence of the Seine and the Lesarde, a mile from the sea, and 4 miles from Hâvre. It has an ancient Gothic church, with a fine spire, and a harbour, which was once good, but is now nearly filled up. *Manf.* Sugar-refining and stoneware. Oyster-fishing is also carried on. *Pop.* 1,800.—Harfleur was formerly fortified, and an important place. It has been twice taken by the English, the most important siege being that undertaken by Henry V., who succeeded in gaining possession of it after being before it forty days.

HARGRAVES, Edmund Hammond, *har'-graivs*, an English traveller, celebrated for having first pointed out the existence of gold in Australia, served for some time on board a merchant vessel, but emigrated to Australia in 1839. In 1849 he went to California, where, while searching for "placers," he was struck with the similarity of the Californian soil to that which he had left. Strongly impressed with the idea, he, on his return to Sydney, in 1851, set out towards the Blue Mountains. Accompanied by a young guide, he reached the Macquarie river, and there saw traces of the precious metal. Returning to Sydney, he induced the authorities to organize an expedition to search for gold. Hardly had it reached the place he had pointed out, when a large quantity of gold was disco-

vered. The gold fever immediately set in. The colony he had enriched by his sagacity and disinterested perseverance has marked its gratitude by conferring on him a handsome pension. He is the author of "Australia and its Gold-Fields." B. at Gosport, Sussex, about 1816.

HARGREAVES, James, *har'-graives*, a celebrated English mechanician, who, while working as a poor weaver at Stanhill, in Lancashire, conceived the idea of imitating, by machinery, the action of the spinner seated at her wool-wheel; by means of which, the "roving" of wool could be extended indefinitely; and, after having been twisted, wound on the cope or spindle. This was the origin of the celebrated "spinning jenny;" and even at the period of its first construction (1768), it produced more work than the combined efforts of thirty spinners with the old wheel. Arkwright and others have since completed the invention; the machinery of cotton-spinning being, at the present day, among the very best and simplest of all mechanical contrivances. The cotton-spinners, who had hitherto worked by hand, imagining that their trade would be ruined by the new machine, besieged the house of the inventor, and endeavoured to destroy his "jennies." He removed to Nottingham, and very shortly after, his invention was superseded by the improvements effected by Richard Arkwright; and he died in poverty, about 1770.

HARIPOOR, *har-i-poor'*, the name of several Punjab towns, Hindostan.

HARLAW, *har'-law*, a township of Aberdeen, near where the Ury and Don join, memorable for a sanguinary battle, fought in 1411, between the Highlanders under Donald, the Lord of the Isles, and the royal forces under the earl of Mar.

HARLEM. (*See* HAARLEM.)

HARLESTON, *harl'-ston*, a market-town in Norfolk, 7 miles from Bungay. *Pop.* 1,500.—Also the name of two small parishes in England.

HARLEY, Robert, earl of Oxford, *har'-le*, a distinguished statesman, during the reign of queen Anne, whose weak mind was alternately swayed by him and the celebrated duchess of Marlborough. He was a patron of literature, as well as a great collector of literary treasures. His collection of MSS., which was purchased for the British Museum for £10,000, contains sources of information on almost every subject, and has been freely referred to in Macaulay's History of England. Impeached for treason by the Whig party, in the year 1715, he was confined in the Tower during two years; but on the Commons declining to prosecute, on his own petition, he was released, in 1717, and retired into privacy, when he brought together the splendid collection known as the "Harleian Collection." B. in London, 1661; D. 1724.

HARLING, EAST, *har'-ling*, a parish and market-town of Norfolk, 22 miles from Norwich. *Pop.* 1,200.—WEST HARLING has a *pop.* of 106.

HARLINGEN, *har'-ling-en*, a fortified town of Holland, on the Zuyder Zee, 15 miles from Leenwarden. It has several churches and a synagogue; a harbour which communicates with several canals, and where an active trade is carried on with the Baltic. *Pop.* 8,000.

HARLOW, George Henry, *har'-lo*, an English portrait and historical painter, who possessed a remarkable facility for drawing and colouring. He worked for some time in Sir Thomas Lawrence's studio, which was all the training he received in his art. When at Rome, he finished a copy of Raffaelle's "Transfiguration" in eighteen days; Canova said it looked more like the work of eighteen weeks. The most celebrated of his historical pieces is "The Trial of Queen Catharine," in which Mrs. Siddons is drawn as the queen, and all the principal characters are portraits of the Kemble family. Although he died almost as soon as he had reached manhood, he achieved a very great deal in his profession. B. in London, 1787; D. 1819.

HARLOW, a parish of Essex, 6 miles from Bishop's Stortford. *Pop.* 2,322.—It is a station on the Eastern Counties Railway.

HARMERSBACH, *har'-mers-bak*, a well-populated valley in Baden, about 18 miles long, near Zell. *Pop.* 4,000, engaged in working saw-mills, granite-quarries, and iron-forges.

HARMODIUS. (*See* ARISTOGITON.)

HARMONY, *har'-mo-ne*, the name of several townships in the United States.

HARO, *ha'-ro*, a town of Old Castile, Spain, near the Ebro, 25 miles from Logrono. It is not a well-built place, but possesses two churches, a town-house, theatre, and hospital. *Manf.* Linen, woollen, and earthenware. *Pop.* 5,928.

HAROLD I., *har'-old*, surnamed Harefoot, king of England, was the son of Canute I.; but his legitimacy being questioned, Alnot, archbishop of Canterbury, refused to consecrate any but the sons of Emma. Harold, however, seized upon the throne in 1035, and divided the kingdom with his brother Hardicanute (*see* HARDICANUTE), and, in 1037, he was crowned king of all England. D. 1040.

HAROLD II., second son of Godwin, earl of Kent, who had been the favourite during the preceding reign. On the death of Edward the Confessor, in 1066, he seized on the throne. His younger brother, Tostig, at the head of the king of Norway's army, invaded the kingdom; he met him, however, in 1066, when a battle ensued on the Derwent, and Tostig was killed. Scarcely had he disposed of this foe, when his kingdom was invaded once more by William of Normandy, known as William the Conqueror, and, in the celebrated battle of Hastings Harold fell, pierced through the head by an arrow. B. a few years before the close of the 10th century; D. 1066.

HAROUN-AL-RASCHID, *ha'-roon al rash'-id*, ('the dispenser of justice'), a celebrated Eastern caliph, who was the great patron of arts and letters in his time, and the magnificence of whose court is constantly referred to in Eastern literature to this day. B. 765; D. 809.

HARPALUS, *har'-pa-lus*, a Grecian astronomer, who corrected the cycle of eight years, which was invented by Cleostratus, and adopted one of nine, which was afterwards improved by Meton. Lived in the 5th century B.C.

HARPALUS, a Macedonian chieftain, to whom Alexander committed the charge of the treasures at Babylon, when he went to the East. He squandered away a large part of the riches, and fled with the remainder. Assassinated at Crete 325 B.C.

HARPE, John Francis de la, *harp*, a celebrated writer and critic, who, after publishing some lesser pieces, brought forth, in 1764, his tragedy of "The Earl of Warwick," which was received with applause. This was followed by a number of dramatic pieces of great merit, also poems, which gained prizes from different academies. His elogies of Fenelon, Racine, Catinat, and Charles V., were also greatly admired; but his principal work is a "Complete Course of Literature," in 12 vols. B. 1730; D. 1808.

HARPENDEN, *har'-pen-den*, a parish of Hertfordshire, 3 miles from Redburn. *Pop.* 2,000. Here are held races yearly, which are well attended by Londoners.

HARPER'S FERRY, *har'-pers fer'-re*, a village of Virginia, U.S., at the junction of the Sherandrah with the Potomac, 50 miles from Washington. It has several churches, iron-foundries, and a national armory, containing nearly 100,000 stand of arms. *Pop.* 2,000. Here, in 1859, a disturbance took place in the interest of the slaves; but it was soon repulsed, and the leader, John Brown, hanged.

HARRINGTON, *har'-ring-ton*, a small port in Cumberland, on the Irish Sea, 5 miles from Whitehaven. It has a shipbuilding-yard, chemical works, and carries on some trade with Ireland. *Pop.* 2,200.

HARRINGTON, Sir John, an English poet, wit, and satirist. He published a translation of Ariosto's "Orlando Furioso," and received the honour of knighthood in the field, from the earl of Essex; and, in the reign of James I., was made a knight of the Bath. B. 1561; D. 1612.

HARRINGTON, James, a political writer. On leaving Trinity College, Oxford, he at first joined the parliamentary forces against Charles I., but afterwards became an attendant on his majesty. On the king's death, he devoted his time to study, and composed his "Oceana," a political romance, in which he defended republicanism. This work occasioned a great controversy, and the author formed a society upon its principles. In 1661 he was sent, on a charge of treason, to the Tower; whence he was removed to St. Nicholas's

Island, near Plymouth, but was afterwards released on bail. B. 1611; D. 1677.

HARRIOT, Thomas, *hăr-re-ot*, an eminent astronomer and mathematician, who accompanied Sir Walter Raleigh to Virginia, which country he surveyed and mapped. Documents, found after his death, prove him to have discovered the solar spots prior to their being described by Galileo: he is also said to have first observed the satellites of Jupiter, although this discovery has been assigned to Galileo. B. at Oxford, 1560; D. 1621.

HARRIS, or HERRIES, *hăr'-ris*, a peninsula of Inverness, forming the S. portion of Lewis Island, in the Hebrides. *Pop.* 4,250.

HARRIS, John, an English divine and mathematician, who was secretary to the Royal Society. He published a translation of Pardie's "Elements of Geometry," but he is best known by having first projected a cyclopædia, or dictionary of sciences. This work appeared in 1710, in 2 vols. fol., entitled, "Lexicon Technicum:" a supplementary volume was added to it in 1736. D. about 1667; D. 1719.

HARRIS, James, a philological writer, who, after leaving Wadham College, Oxford, sat in Parliament for Christ Church, Hampshire, and in 1763 was appointed commissioner of the Admiralty, but, afterwards, was removed to the Treasury board. In 1774 he was made secretary and comptroller to the queen. He wrote three treatises concerning Art, Music, Painting, Poetry, and Happiness, 8vo; "Hermes, or a Philosophical Inquiry concerning Universal Grammar;" and several other philological works. B. 1709; D. 1780.

HARRIS, Sir William Snow, a distinguished natural philosopher and electrician, during the last five-and-twenty years has introduced an improved form of lightning-conductor throughout the British navy; has also invented a new steering-compass; has received one of the gold medals of the Royal Society, of which he is a fellow, and was knighted in 1847 for his eminent scientific services. He is the author of several volumes and pamphlets on electricity and magnetism, a large work on thunderstorms; and many valuable reports by him are included in the Transactions of the learned societies. B. at Plymouth, 1791.

HARRISBURG, *hăr'-ris-berg*, a town of Pennsylvania, U.S., on the Susquehanna, 100 miles from Philadelphia. It is well built on a fine site, and has a handsome state-house, numerous churches, a court-house with a cupola. *Manf.* Brewing, tanning, and there are some potteries. It carries on a large trade in timber. *Pop.* 8,173.

HARRISON, *hăr'-ri-son*, the name of several counties and townships in the United States. The counties have populations ranging between 12,000 and 22,000, and lie in the states of Kentucky, Virginia, Ohio, Indiana, Mississippi, and Texas. The townships are small.

HARRISON, John, an eminent mechanician, who, though he began life as a carpenter, displayed such great mechanical powers, that a wooden clock he had constructed was universally admired for its accuracy. Encouraged by his success, he constructed a time-keeper, with which he, in 1735, travelled from Lincolnshire to London. Halley, Graham, and other eminent astronomers admitted its excellence, and procured him a passage to Lisbon in a man-of-war, with the view of correcting the longitude by its means. An act had been passed in 1714, offering £20,000 for a method of ascertaining the longitude within 30 miles. By means of his instrument he had ascertained the longitude within 18 miles, and he accordingly claimed the reward. After a long delay, and considerable discussion, he received the whole of the £20,000 in 1767. Though he possessed the greatest scientific abilities, he was almost incapable of communicating his knowledge clearly in writing or speaking. B. near Pontefract, 1693; D. in London, 1776.

HARRISON, John, one of the members of the High Court of Justice which sat in judgment on Charles I., and condemned him to death. He was the son of a butcher, and rose by bravery and merit to the rank of colonel in the parliamentary army. He was executed, with nine others of those who signed the king's death-warrant, at the Restoration, 1660.

HARRISON, William Henry, one of the presidents of the United States, who, by reason of his military and civil services, acquired great popularity, and was elected president in 1840, but who died only one month after his installation, being the first president who died in office. He communicated a valuable essay on the "Aborigines of the Ohio Valley" to the Philosophical Society of Ohio. B. in Virginia, 1773; D. at Washington, 1841.

HARROGATE, *hăr'-ro-gate*, a town of Yorkshire, 20 miles from York, partly situate on an elevated flat, and partly in a valley. Its mineral springs attract numerous visitors, and make it one of the most fashionable watering-places in the N. of England. *Pop.* 3,678.

HARROW-ON-THE-HILL, *hăr'-ro*, a parish of Middlesex, 10 miles from London, situate on the most elevated spot in the county, and overlooking a fine expanse of country. It has an old church, with a lofty and conspicuous spire, and is celebrated for its school, where there are usually 400 or 500 "boys," and at which many men noted in the history of their country, have been educated. *Pop.* 5,000.

HARRY, BLIND, *hăr'-re*, as he is generally called, or Henry the Minstrel, whose poem on the adventures of Wallace, in eleven books, is celebrated for its animated descriptions of war and the deeds of soldiers. Blind Harry is the modern parallel to Homer, who, according to some accounts, is said to have travelled from one Greek state to another reciting his Iliad. He lived and sang about the close of the 15th century.

HART, Solomon Alexander, R.A., *hart*, and professor of painting in the Royal Academy, began his career as a miniature-painter, but, in 1828, abandoned it for oil-painting, on meeting with some success in the latter walk. The first work which attracted general notice was "The Elevation of the Law," a representation of a circumstance of Jewish worship. He has since painted several pictures of the same nature. His style is marked by carefulness and correct drawing. He has also painted many large portraits. B. at Plymouth, 1806.

HARTFELL, *hart'-fel*, a mountain between the passage Tweedsmuir and Moffat, in Peeblesshire, Dumfriesshire. *Height*, 2,635 feet.—In a ravine of this mountain is the chalybeate spring of Moffat.

HARTFORD, *hart'-ford*, a town of Connecticut, on the Connecticut river. It is regularly built, has a state-house, city hall, college, several churches and asylums. *Manf.* Firearms, machinery, boots and shoes. It has an extensive trade, and carries on a large traffic by rail and river. *Pop.* 25,000.

HARTINGTON, *hart'-ting-ton*, a parish of Derbyshire, 8 miles from Bakewell. *Pop.* 2,200.

HARTLAND, *hart'-land*, a town of Devonshire, situate in a bleak district, 19 miles from Barnstaple. *Pop.* 2,183, chiefly engaged in fishing.

HARTLEBURY, *hart'-tel-ber'-re*, a parish of Worcester, 4 miles from Kidderminster. *Pop.* 2,100.

HARTLEPOOL, *hart'-tel-pool*, a town in Durham, 18 miles from Durham. It has many fine houses and shops, a handsome parish church, with several dissenting chapels, a guildhall, public baths, fine harbour and docks, and a very extensive export of coals. Steamers sail regularly for Scotland, Antwerp, Rotterdam, and Hamburg. It is connected by railway with Durham and Stockton. *Pop.* 10,000.

HARTLEY, *hart'-le*, a small town of Northumberland, on the North Sea, 4 miles from North Shields. It has a harbour capable of holding vessels of 200 or 300 tons. *Pop.* 1,600, engaged in colliery, glass, and bottle works.

HARVEY, William, *har'-ve*, a celebrated physician, who received his education at Cambridge, and then went to Padua, where he took his doctor's degree in physic. In 1607 he was admitted fellow of the College of Physicians, and in 1615 anatomical reader. This appointment was probably the more immediate cause of the publication of his great discovery of the circulation of the blood, which he made known to the world in his treatise "On the Circulation of the Blood," published in 1628. This discovery effected a revolution in medical science, was for a long time opposed in the most violent manner, and, even when its truth was admitted, many foreign practitioners endeavoured to rob the author of his due honour, by ascribing it to other persons; but the right of Harvey to the discovery has long since been fully established.

In 1632 he was made physician to Charles I., and, it is stated, frequently exhibited to him and his courtiers the motions of the heart and other phenomena

HARVEY.

upon which his doctrines were based. In 1645 he was chosen warden of Merton College, Oxford; but, when the parliamentary party were in the ascendant, he left it for London, and was elected president of the College of Physicians, but declined the office on account of his infirmities. After his death, he left his estate to the college, for which he had built a library and museum. A handsome edition of his works, all of which were composed in correct and elegant Latin, was published by the College of Physicians in 1766. D. at Folkstone, Kent, 1573; D. 1657.

HARVEY, Gideon, an English physician and writer on medicine, who, after completing his studies at Leyden, became a fellow of Exeter College, Oxford, and was physician to Charles II. in his exile, and to the English army in Flanders. D. about 1700.

HARVEY, William, a clever English designer, principally on wood. At the age of 14 he was apprenticed at Newcastle to the celebrated Thomas Bewick, called "the reviver of wood-engraving," he having renewed the practice of it after it had almost become a lost art. Besides becoming one of Bewick's cleverest engravers, he drew many of the designs upon wood, of the celebrated "Fables" published by his master. In 1817 he came to London, and entered the studio of Haydon, where, in company with the Landseers, Lance, and others, he received instruction in drawing and anatomy, maintaining himself by working as an engraver and designer on his favourite material, though at this time there was little demand for wood-engravings, almost the only ones required being for the illustration of primers and elementary schoolbooks. In 1824 he began his career as a designer on wood, and has continued, to the present time, to be one of the most skilful and prolific workers in this department of an art which has now reached extraordinary excellence, and has grown to be one of the most universal elements of delight and instruction. Like his master Bewick, he made engravings, almost at the outset of the renewed practice of wood-engraving, which are hardly excelled even in the present day. One of these, a copy of Haydon's picture of "Dentatus," is constantly referred to by modern engravers as a work remarkable for its size, breadth, and finish. Among his best works are "The Tower Menagerie," "The Zoological Gardens," "Northcote's Fables," and, later, "The Pilgrim's Progress." His designs for Mr. Lane's translation of "The Thousand and One Nights" stamp him as a true artist, whose luxuriant fancy and skilful graver have embellished a standard work. Many of the best designs in Charles Knight's "Pictorial Shakspere" owe their origin to his facile pencil. B. at Newcastle-upon-Tyne, 1796.

HARWICH, *hăr'-idj*, a town of Essex, on the German Ocean, at the extremity of a point of land near the estuary of the Stour and Orwell, 12 miles from Ipswich. It consists of three main streets, and has a handsome modern church, several chapels, a town-hall, custom-house, theatre, &c. It also possesses one of the best harbours on the E. coast of England, which is defended by two forts, and is much used for refuge in easterly winds. *Pop.* 4,451. *Lat.* 51° 56′ N. *Lon.* 1° 17′ E.—Harwich is a favourite resort for the inhabitants of Ipswich and Suffolk generally, and on the picturesque river Orwell ply several steamboats.

HARWOOD, *har'-wood*, a township of Lancashire, 2 miles from Bolton. *Pop.* 2,100, mostly engaged in cotton-mills. — GREAT HARWOOD is 4 miles from Blackburn. *Pop.* 2,700.

HARZ, or HARTZ, *hartz*, an isolated mountain-mass in N. Germany (*see* HANOVER), which does not form a continued chain, but rises in terraces, attaining, in the Brocken, its culminating point, at a height of 3,740 feet. (*See* BROCKEN.) It stretches partly through Prussia, Hanover, Brunswick, and Anhalt-Bernburg, having a length of about 70 miles with a breadth of 20, and it separates the basins of the Elbe and Weser. Its geological composition, in its higher parts, is silurian rocks and granite, whilst its lower slopes are principally composed of red sandstone. Metals abound here, principally lead, with some silver, copper, and iron. *Lat.* between 51° 35′ and 51° 57′ N. *Lon.* between 10° 10′ and 11° 30′ E.

HASSALL, Arthur Hill, *hăs'-sal*, an eminent English physician and experimental philosopher, who, after studying medicine at Dublin under his uncle, Sir James Murray, and during the period of his studentship, contributing several papers to the "Annals of Natural History," became a member of the Royal College of Surgeons in 1839. Shortly after, he received his diploma as Doctor of Medicine. His first works were "A History of the British Fresh-water Algæ," "The Microscopical Anatomy of the Human Body in Health and Disease," the latter being embellished with about 500 coloured plates. His enfeebled health compelling him to abandon this arduous line of research, he commenced an investigation of the chemical properties of the articles of food. He was requested by the editor of the *Lancet* to communicate a series of articles on the "Adulterations of Food" to that journal. In 1855 he republished these articles under the title of "Food and its Adulterations." This was followed by another in 1856,—"Adulterations Detected." His labours, and those associated with him, have proved a great boon to the British public, he having analyzed and pointed out the means of detecting the adulterations to be found in almost every article of an alimentary nature, as well as in drugs and pharmaceutical preparations. B. at Teddington, 1817.

HASSE, Adolph, *hass*, a celebrated musical composer, who in his youth had been an excellent tenor vocalist. After studying in Italy under the best masters, he produced his opera "Sesostrate," at Naples, in 1725. In 1733 he was chosen by a section of the English nobility hostile to Handel, to compose an Italian opera in opposition to that great master; but, after meeting with some success in London, he retired to Dresden, in 1745, and became the favourite composer of Frederick of Prussia. B. 1705; D. at Vienna, 1783.

HASTINGS, Warren, *hais'-tings*, a remarkable English statesman, who, after receiving his education at Westminster School, went out, in 1750, as writer in the service of the East-India Company. Having mastered the Persian and Hindustani languages, which, till his time, had been generally neglected, he was sent on more than one diplomatic and commercial mission into the interior, and, in fourteen years, he returned to England with a competent fortune, intending, henceforth, to live a life of retirement. In 1769, however, he was appointed second in the council of Madras, and, in 1772, was advanced to the highest civil post in the Company's service,—president of the Supreme Council of Bengal. An act of parliament altering the constitution of the Indian government, made Hastings

governor-general. The territories of the Company, although greatly enlarged by the victories of Clive and others, were, at this time, in a very disorganized condition, and were in imminent danger from the persevering enmity of Hyder Ali, rajah of Mysore, supported by the Mahrattas and other native powers. But he vanquished the enemies of the Company, consolidated its power, and increased its revenue; but the English people were informed that all this had been accomplished by cruelty, corruption, and unlimited aggression, while the Court of Directors deemed that he acted in too independent a manner. The Court of Proprietors, however, supported him, and he commenced to wield absolute and irresponsible power, overruling the authority of the council, and refusing to obey orders, from whatever source transmitted. In 1785 he resigned, and on arriving in England was impeached, after long preparation, before the House of Lords, in Westminster Hall. Edmund Burke, in a speech which lasted more than three days, charged him with injustice and oppression towards the native princes, in illegally receiving presents himself, and with enriching his dependents and followers, by bribery and a wasteful expenditure of the Company's revenue. Three sessions were consumed in stating the case for the prosecution, and in the fourth several of the charges were abandoned, in order to bring the trial to a close. His defence was not finished till the 17th of April, 1795, whereupon he was acquitted on each charge brought against him. The historians of India, without palliating the vices of his administration, have sought an apology for his conduct in the difficulties of his situation, and the lax tone of morality prevalent among Indian officials at that period. It is universally admitted that his talents were remarkable, and services great. The law expenses of his defence amounted to £76,080. In 1796 the Company granted him a pension of £4,000 per annum for 28 years, and lent him £50,000 for 18 years without interest. He retired to Daylesford, an estate which his family had formerly owned, and which he had repurchased. B. 1733; D. 1818.

HASTINGS, a borough and market-town of Sussex, 36 miles from Tunbridge, and one of the Cinque Ports.

HASTINGS—BATTLE ABBEY.

It formerly had a good trade, which has now declined; but the prosperity of the town has, of late, received a new impulse, from its being greatly resorted to as a watering-place. Its situation is beautiful, and the environs abound with picturesque scenery. A walk, called the Marine Parade, has been formed on the west of the town. The public buildings are two very ancient churches and a modern church, the town-hall, the custom-house, free schools, and a barrack. The remains of an ancient castle are still to be seen. *Pop.* 17,011.—Here, in 1066, was fought the decisive battle of Hastings, which wrested the crown of England from the Saxon, and gave it to the Norman dynasty. Two miles from the town is the stone on which a repast is said to have been prepared for William when he landed here; it is still called the Conqueror's Stone. (*See* BATTLE.)

HATFIELD, or BISHOP'S HATFIELD, *hăt'-feeld*, a town of Hertfordshire, on the Lea, 19 miles from London. *Pop.* 3,862.—Here is Hatfield House, the handsome seat of the marquis of Salisbury.—This is the name of several other places in England.

HATTERAS, *hăt'-te-răs*, a cape on the coast of N. Carolina, at the extremity of a sandy island, Panchico Sound. The heavy sea, produced here by storms, makes this headland formidable to navigators. *Lat.* 35° 15′ N. *Lon.* 75° 30′ W.

HAUPUR, *ho-pur'*, a town of British India, the capital of a district of the same name, 20 miles from Meerut. *Pop.* 14,000.—Here the English have a breeding stud for cavalry horses.

HAUTEFEUILLE, John, *hote'-fe (r)-e*, a French abbé and ingenious mechanic, the son of a baker at Orleans. He was the inventor of pendulum watches, an invention afterwards improved by Huygens. He wrote some treatises on clockmaking. B. at Orleans, 1647; D. 1724.

HAUY, René-Just, *ho'-e*, a French abbé, who discovered and promulgated the geometrical law of crystallization, and is the author of many treatises on natural philosophy and crystallography. B. at St. Just, Picardy, 1743; D. at Paris, 1822.

HAVANA, or THE HAVANNAH, *ha-văn'-na* (Spanish, HABANA, 'the harbour'), the capital of the island of Cuba, on its N. coast, at the mouth of the river Lagida. The harbour is one of the best in the world, being capable of holding commodiously 1,000 ships; but has so narrow a channel, that only one vessel can enter at a time. This channel is strongly fortified; the city is also surmounted with works, all furnished with heavy artillery. A square citadel, of great strength, is erected near the centre of the town; and here is the captain-general's palace, where the treasure is deposited. The city contains a number of fine churches, two hospitals, a dockyard, lazaretto, and numerous public buildings. An aqueduct supplies the shipping with water, and turns the saw-mills in the dock-yard. The town stands in a plain on the W. side of the harbour; and the houses, which are elegant, are mostly of stone. There are several convents, and the great square is a fine ornament of the place. *Manf.* Cigars, which are celebrated throughout the world; chocolate, straw hats, and woollen fabrics. The trade of this port is chiefly carried on with the United States, Great Britain, Germany, and Spain. *Pop.* 130,000, of whom half are slaves. *Lat.* 23° 10′ N. *Lon.* 82° 20′ W.—This city has been frequently attacked: it was taken in 1536, by a French pirate, but ransomed for 700 dollars; was subsequently taken by the English, by the French, and by the buccaneers. In 1762 the British took possession of it, but restored it in 1763.

HAVEL, *ha'-vel*, a navigable river in the N. of Germany, which, after a course of 180 miles, falls into the Elbe.

HAVERFORDWEST, *hăv'-er-ford-west*, a town of Pembrokeshire, on the Cleddy, 17 miles from Pembroke. It is situate on the declivity of a steep hill, its site being very uneven, and the streets narrow. There are, however, many good houses, and it has several neat and clean streets. The principal public building is the Guildhall; there are also three churches, handsome chapels for dissenters, a town and county gaol, and a corn-market. Several fairs for cattle are held in it. *Pop.* 6,580.—Here are the ruins of a castle, belonging to the earl of Pembroke, which, when perfect, must have been a large and magnificent structure. The keep is the only portion that now remains entire.

## Havre de Grace

HAVRE DE GRACE, or LE HAVRE, *havr*, an important commercial and strongly-fortified town of France, at the influx of the Seine into the English Channel, 110 miles from Paris. It consists of long and narrow streets, composed of lofty houses. The harbour, which has a long pier, but is narrow at its entrance, is capable of containing 300 or 400 vessels. Its principal public buildings are the churches, theatre, Francis I.'s tower at the entrance of the harbour, the museum, and the public library. It is a place of great bustle and activity, being the seaport of Paris, and numerous steamers sail regularly to the chief ports of England, France, and the United States. *Manf.* Sail-cloth, cordage, tobacco, lace, and earthenware. Here are also several building-docks and a sugar-refinery. The fortifications of Havre were considerably increased and strengthened by Napoleon I., who also improved the harbour and docks, and erected two light-houses. *Pop.* 25,618.—Havre was taken by the British in 1562, and bombarded by them in 1759, 1794, and 1795.

HAWARDEN, *haw'-ar-den*, a town in Flintshire, situate on a small river, 7 miles from Chester. Here are iron-foundries and considerable potteries. It has an ancient parish church and a free grammar-school, and near the town are the remains of the strong castle of Peny Llwch. *Pop.* 6,203.

HAWES, *haws*, Stephen, an English poet, well versed in French and Italian poetry, and groom of the privy chamber to Henry VII. His works are, "The Temple of Glass," which is a copy of Chaucer's "House of Fame;" "The Passetyme of Pleasure," which was finished in 1506, and printed in 1517, 4to, by Wynkyn de Worde, with woodcuts.

HAWICK, *how'-ik*, a town and parish of Roxburgshire, 35 miles from Edinburgh, at the confluence of the rivers Tiviot and Slitridge, the latter dividing it into two parts, which are connected by two stone bridges. It has a church, and an excellent public library and school of arts. *Manf.* Carpets, Scots blankets, lambwool stockings, thongs, gloves, and leather. *Pop.* 6,683.—During the border raids, it suffered from the frequent inroads of the English.

HAWKE, Edward, Lord, *hawk*, a gallant English admiral, the son of a barrister, who entered the navy at an early age. In 1734 he obtained the command of a ship, and distinguished himself in the famous battle of 1744, when the English fleet was commanded by Matthews, Lestock, and Rowley. In 1747 he was made rear-admiral of the white, and in the same year defeated a large French fleet, and captured five sail of the line. For this he was created a knight of the Bath. In 1759 he defeated Conflans, and was rewarded with a pension of £2,000 a year. In 1765 he was made vice-admiral, and first lord of the Admiralty, and, in the following year, was created a peer. B. 1715; D. at his seat of Shepperton, in Middlesex, 1781.

HAWKESWORTH, John, *hawks'-werth*, an able writer in the 18th century, who succeeded Dr. Johnson in compiling the parliamentary debates. He is stated to have been brought up a watchmaker, but afterwards applied himself to literature with considerable success. "The Adventurer," which he wrote with Dr. Johnson and others, is his principal work, and which caused him to obtain the degree of LL.D. He published the life and works of Swift, and was employed to compile an account of the discoveries made by Captain Cook and others in the South Seas, for which he received the sum of £6,000. He afterwards became an East-India director. He translated "Telemachus," wrote "Almoran and Hamet, an Oriental Tale," and other pieces of a like kind, very popular in their day. B. between 1715 and 1719; D. at Bromley, Kent, 1773.

HAWKINS, Sir John, *haw'-kins*, a gallant admiral, of the Elizabethan age, who came of a good family, and went early to sea in the merchant service. In 1562 he sailed with three ships from London for the coast of Africa, where he procured a cargo of slaves, which he disposed of in the West-India islands. He made several other voyages to Guinea and the West Indies, and experienced a variety of adventures, which are detailed in Hakluyt's Voyages. In 1588 he was appointed rear-admiral and knighted, for his services in the defeat of the Spanish armada. B. at Plymouth, 1520; D. off Porto Rico, 1590.—Sir John Hawkins founded an hospital at Chatham.

## Hay

HAWKINS, Sir Richard, son of the above, distinguished himself in the engagement with the invincible armada, and in 1593 obtained a commission under the great seal to attack the Spanish settlements in South America, where, after an obstinate conflict with a superior force, the English were beaten and taken prisoners. Sir Richard, who was severely wounded in the action, was detained a prisoner in America a considerable time, and was then sent to Spain, where he remained some years. On his return to England, he employed himself in writing the history of his own life. B. at Plymouth, about 1560; D. 1622, of an apoplexy while attending the privy council.

HAWKINS, Sir John, a writer and magistrate, and the historian of music, was apprenticed to an attorney, and acquired a considerable knowledge of the law. At the same time he did not neglect other studies. He formed an early intimacy with Dr. Johnson, which lasted through life. He wrote several pieces in various publications, particularly the "Gentleman's Magazine," and, in 1760, printed a good edition of Walton's "Angler." In 1772 he received the honour of knighthood, for suppressing a riot in Spitalfields. In 1776 he published his "History of Music," 5 vols., after having spent 16 years in its composition. His "Life of Dr. Johnson" was written at the request of the booksellers, but not to the satisfaction of the public. B. in London, 1719; D. 1789.

HAWKINS, a county of Tennessee, U.S. *Area*, 750 square miles. *Pop.* 13,370.

HAWORTH, *hai'-worth*, a chapelry of the West Riding of Yorkshire, 10 miles from Bradford. *Pop.* 7,000.

HAWTHORNE, Nathaniel, *haw'-thorn*, a distinguished American novelist, who, a few years after leaving Bowdoin College, Massachusetts, published an anonymous novel, which he has never thought proper to claim. In 1837 he published a volume of sketches and tales, which had formerly appeared in the American periodicals, under the title of "Twice-told Tales." In 1845 he edited the "Journal of an African Cruiser," the MS. of which was supplied to him by an officer of the U S. navy. His retired habits led him to take up a residence in an old manse at Concord, where, for three years, he occupied himself in composing some charming tales and sketches, which he afterwards published under the title of "Mosses from an Old Manse," and in the introduction to which, some interesting autobiographical passages are to be found. In 1846, while his friend Mr. Bancroft was at the head of the Boston custom-house, he acted as surveyor to the department, and his mode of life therein forms the introduction to his extraordinary romance of "The Scarlet Letter," published in 1850. In 1851 "The House of Seven Gables," and in 1852 "The Blithedale Romance," were produced, the chief incidents in the latter work being founded upon his experience as a member of the "Brook Farm Community." A third collection of his contributions to the periodicals, under the title of "The Snow Image," and a "Life of General Pierce, President of the United States," were his next productions. He has written some excellent works for the young, the chief of which are "True Stories from History and Biography," "The Wonder-Book," "Tanglewood Tales." In 1853 he obtained the post of American consul at Liverpool, a post he still continues to fill. His last work is the romance at present dividing the attention of the English reading public with the best works of fiction, called "Transformation," in which a luxuriant imagination and an unusual graphic power are displayed. His modesty and retiring disposition have caused very little to be known of his life or character. B. at Salem, Massachusetts, about 1807.

HAY, James, *hai*, earl of Carlisle, came to England with James I., and was the first Scotchman created an English peer. His first title was Baron Hay; he was afterwards made Viscount Doncaster, and, lastly, earl of Carlisle. James I. employed him in several embassies, particularly to France, to mediate on behalf of the Protestants, and to negotiate a marriage between the prince of Wales and Princess Henrietta Maria. D. 1636.

HAY, David Ramsay, a distinguished decorative artist and writer on art. He began life as a reading-boy in a printing-office, but was afterwards apprenticed

to a house-painter in Edinburgh. He occupied all his leisure moments in copying and painting pictures, one of which met the eye of Sir Walter Scott, who engaged him to paint a portrait of his favourite cat, and advised him to devote himself to decorative house-painting, promising him the painting of his house at Abbotsford, then being built. In 1828 he commenced business as a decorative painter, and published his first work,—"The Laws of Harmonious Colouring." This was followed by "An Essay on Ornamental Design," "A Nomenclature of Colours," and numerous other works on art, full of suggestion and practical knowledge. He decorated the hall of the Society of Arts in London, in 1846. B. in Edinburgh, 1798.

HAYDN, Joseph, *haidn*, a celebrated musical composer, of a most original and prolific genius, was the son of a small wheelwright of the village of Rohau, 45 miles from Vienna, his mother having been cook to the chief man of the village previous to her marriage. Both were musical, and being early taught to sing, he was heard by the chapel-master of St. Stephen's Cathedral at Vienna, who immediately engaged him as chorister for that church. At the age of 17 his treble voice broke, and he was left without any means of obtaining a livelihood; but a friendly wigmaker took him into his house, and he was thus enabled to pursue his studies as a composer. After a time, he married the daughter of his hospitable friend; but the union was an unhappy one, and separation soon followed. Fortune conducted him to the house of the Italian poet laureate, Metastasio, whose niece he instructed in music. His connection with the court poet led him to become acquainted with the wealthy Prince Esterhuzy, who, in 1761, made him his chapel-master, an office he held to the end of his life. Comfortably located in the prince's palace in Hungary, he, for thirty years, composed and played over his magnificent works. In 1791 he was induced to visit London, where he produced six of his twelve "Grand Symphonies," causing the utmost possible excitement among the English musical public. In 1794 he again visited England, meeting with a most flattering reception, receiving for his services a sum amounting to £1,550, and becoming a Doctor of Music of the Oxford university, and the guest of royalty. In his 64th year he composed his greatest work, "The Creation;" and two years later, "The Seasons." Like Handel, he was remarkable for his fertility: besides smaller works, he wrote 116 symphonies, 83 violin quartets, 15 masses, 4 oratorios, a Te Deum, Stabat Mater, and 14 Italian and German operas. His death is said to have been due to the shock caused by the bombardment of Vienna, although Napoleon gave orders that the great musician's house should be respected; and when the French troops entered the city, a guard was placed at his door to protect him. B. at Rohau, 1732; D. at Vienna, 1809.

HAYDON, Benjamin Robert, *hā'-don*, a great but unfortunate English historical painter and writer on art. He was educated at the Plympton grammar-school, where Sir Joshua Reynolds had previously been a scholar. His father was a bookseller, and apprenticed his son to the same business; but he was greatly averse to it, and at the same time displayed a strong predilection for art. His father's opposition to his son becoming an artist was at length overcome, and Haydon started for London in May, 1804, to enter as a student of the Royal Academy. It was at this period that enthusiasism for the grand "high art," as it is called, was first awakened in his breast. It caused him to become a great painter; but his inflexible pursuit of this line of art, rather than paint what was more popular and remunerative, caused him many troubles through life, and greatly contributed to bring about his melancholy end. Although he was a student with such men as Wilkie and Jackson, he was regarded as a young man of great promise. In 1807 he exhibited his first painting at the Royal Academy: its title will show the young painter's ambition—"Joseph and Mary resting with our Saviour after a day's journey on the road to Egypt." It was sold; and next year he exhibited the celebrated "Dentatus," which he considered badly hung by the Royal Academicians, and forthwith proceeded to make enemies of those forty potentates of art,—a most imprudent step for so young a man to

take. Lord Mulgrave bought the "Dentatus," and it was shown at the British Institution, and gained the prize of the committee, and became very popular. The sanguine and ambitious young painter's prospects were

HAYDON.

now of the most encouraging nature. The Elgin marbles arriving in England about the same time, he wrote and talked about them enthusiastically and eloquently, and mainly contributed to get them purchased for the nation. He painted the "Judgment of Solomon," and sold it for 700 guineas; and the "Alexander returning in Triumph," which produced him 500 guineas: but his second application for admission to the Royal Academy was refused. In 1814 he commenced another great work,—"Christ's Entry into Jerusalem," which was exhibited by himself in Bond Street, in 1820, but could not find a purchaser; he, however, added two more works of the same class to his list,—"Christ in the Garden," and "Christ Rejected." In 1821 he married; and in 1823 painted the "Raising of Lazarus," now hanging in the Pantheon. A few years before, he had opened a school for the purpose of "establishing a better and more regular system of instruction than even the Academy offered;" and had for pupils Edwin, Charles, and Thomas Landseer, Lance, Harvey, and others of our best living draughtsmen and painters. He also continued to contribute to "The Annals of the Fine Arts" criticisms upon the Royal Academy; but this made him unpopular in his profession, and his large pictures being often left on his hands, caused him to become involved in pecuniary difficulties, which still increasing, he was incarcerated in the King's Bench prison for debt. Here he was witness of a scene which he afterwards reproduced in a popular picture, "The Mock Election," which George IV. purchased for 500 guineas. A continuation of the same subject,—"Chairing the Members," was sold for 300 guineas. About this time his friends procured his release, and he painted "Pharaoh dismissing Moses," which sold for 500 guineas. A great failure and a great success followed: the first was "The Great Banquet at Guildhall, after the passing of the Reform Bill;" the second, "Napoleon musing at St. Helena." A second picture of the same character,—"The Duke on the Field of Waterloo," was unsuccessful, and his debts again overpowering him, he was, once more, an inmate of the King's Bench. On his release, he commenced lecturing on the fine arts, at the mechanics' institutions in the metropolis and in the provinces, meeting everywhere with the greatest success. Perhaps the severest blow he ever received was now awaiting him. For a long time he had been petitioning, writing, and lecturing for having the interiors of our large public buildings decorated with paintings. The government decided to embellish the interior of

the new houses of parliament with cartoons. He set to work, prepared his design, and the judges left his name out of the list of successful competitors, not even giving it a place among the third class. It is said he never completely recovered the shock this disappointment caused him. His last works were "Uriel and Satan," "Curtius leaping into the Gulf," "Alfred and the Trial by Jury," "The Burning of Rome." In 1846 he exhibited this last work, and "The Banishment of Aristides," at the Egyptian Hall, "General Tom Thumb" holding his levees at the hall at the same time. The degree of success which awaited each of the exhibitors is thus chronicled by Haydon in his diary:—"Tom Thumb had 12,000 people last week; B. R. Haydon, 133½ (the ½ a little girl). Exquisite taste of the English people!" The exhibition was a failure, and Haydon's mind gave way under his accumulated embarrassments. He ended his life by his own hand, 1846; B. at Plymouth, 1786. Though far from being generally admitted to be a great historical painter, it must be allowed that he did much, both by his works and writings, to elevate the character of English art. His quick temper, love of controversy, and readiness to charge every person that differed from him in opinion with mean motives, combined with his obstinate refusal to paint, as other and wiser artists have been forced to do, for the popular taste, marred the character, the career, of a virtuous, earnest, and eloquent lover of his art, and brought his life to a sad termination, after causing him long years of embarrassment.

Hayle, *hail*, a seaport of Cornwall, on the British Channel, 3 miles from St. Ives. It has an active trade, and there are large iron-foundries and steam-engine factories.

Hayley, William, *hai'-le*, the friend and biographer of Cowper, and philosophical essayist. Abandoning the profession of the law, for which he had been educated, he retired to his estate in Sussex, and spent his life in lettered ease. Among his best works are, "Essays on Painting, Sculpture, and Epic Poetry;" "Life and Poetical Works of Milton," "Life of Cowper." B. at Chichester, 1745; D. 1820.

Hayti. (*See* St. Domingo.)

Haywood, Elizabeth, *hai'-wood*, an ingenious writer. She published "The Female Spectator," 4 vols.; "Epistles for the Ladies," 2 vols.; "Fortunate Foundling," "Adventures of Nature," "Jemmy and Jenny Jessamy," 3 vols.; "Invisible Spy," 2 vols.; "Husband and Wife," 2 vols.; "Betsy Thoughtless," and "A Present for a Servant-maid," B. 1693; D. 1756.

Hazebrouk, *haz'-brook*, a town of France, in the department of Le Nord, 24 miles from Lille. It is well built, and has a handsome old parish church, town-hall, college, and hospital, with a tall spire. *Manf.* Thread, linen, &c. *Pop.* 7,539.

Hazlitt, William, *haz'-litt*, a distinguished English essayist and critic of literature and the fine arts, who was the son of a Unitarian minister, who, in 1783, emigrated with his family to the United States, but returned two years later, and fixed his residence in Shropshire, where William commenced his education. In 1793 he was sent to the Unitarian college at Hackney, to be educated for the profession of his father, but neglected theology for moral and political philosophy. From an early age he had shown a great predilection for drawing, and, in the year 1802, visited Paris for the purpose of copying the pictures in the Louvre, and, on his return, met with some success as portrait-painter in London and the provinces; but abandoned the pursuit for that of literature, in 1803, displaying great industry and talent in the latter profession. In 1813 he delivered a course of lectures on the history of English philosophy, at the Russell Institution, and afterwards, on the "Comic Poets" and the "Poets of the Elizabethan Age." He also wrote for the *Morning Chronicle*, the *Examiner*, and, in the latter part of his life, for the "Edinburgh Review" and the "Encyclopædia Britannica." His principal works are "The Round Table," "The Table-Talk," "Characters of Shakspeare's Plays." The articles "Fine Arts" and "The Life of Titian," in the "Encyclopædia Britannica," are from his pen. B. at Maidstone, 1778; D. 1830.

Head, Sir Edmund Walker, *hed*, governor-general of Canada, and author of some excellent handbooks of English and foreign schools of painting. He received his appointment as governor-general of Canada in September, 1854, at a salary of £7,000 per annum.

Head, Sir Francis Bond, a clever and humorous writer of books of travel, began his career in the British army, but went out to South America in the year 1825, at the head of a mining association. Leaving his party at the foot of the Andes, he returned alone, on horseback, across the Pampas to Buenos Ayres, a distance of 1,000 miles, and performed several journeys in the same manner, riding over upwards of 6,000 miles, living on dried beef and water, and sleeping on the ground. On his return to London, he published "Rough Notes of some Rapid Journeys across the Pampas," in 1826. In 1835 he was made lieutenant-governor of Upper Canada, during which appointment the Canadian insurrection broke out and was suppressed. He resigned in 1837, and on his return to England, in 1838, published a "Narrative" justifying his conduct. In 1850 he produced a pamphlet on "The Defenceless State of England," which excited a great deal of interest. He has since principally employed his leisure by composing light, humorous, and graphic sketches of tours made in the United Kingdom and on the continent. "A Faggot of French Sticks," "A Fortnight in Ireland," "Hokers and Pokers," have been among his latest productions, as "The Bubble from the Brunnen of Nassau" formed one of his earliest. B. at Rochester, Kent, 1793.

Head, Sir George, a knight, and author of several interesting books of travel. After having served as captain in the West Kent militia in 1802, he joined the British army in the Peninsula, and served as commissariat clerk at Badajoz, and afterwards rose to the rank of deputy-assistant commissariat-general to the Peninsular army, with which he served throughout the campaign. He was sent to superintend the commissariat department in Canada, where he remained for several years. He has described his adventures and experience there, in his "Forest Scenes and Incidents in the Wilds of North America," and his "Residence on the Borders of Lakes Huron and Simcoe." In 1851 he was knighted. He has written many other excellent books; among the chief of which is "A Home Tour through the Manufacturing Districts." He also wrote several articles for the "Quarterly Review." B. 1782; D. in London, 1855.

Heanor, *he'-nor*, a township of Derbyshire, 9 miles from Derby. *Pop.* 6,000, engaged in lace manufactures and collieries.

Hearne, Thomas, *hern*, a learned antiquary and editor of old MSS. He had been a domestic servant to Mr. Cherry, of Shottesbrooke, who took him into his family, and gave him a liberal education. In 1695 he entered of Edmund Hall, Oxford, where he applied himself to the study of antiquities. In 1703 he took his degree of M.A., and in 1714 was appointed under-librarian of the university. He edited and published several ancient MSS. and old books; among others, the "Life of Alfred," by Spelman; Leland's "Itinerary," 9 vols. 8vo; a collection of curious Discourses written by eminent antiquaries. B. at Little Green, Berkshire, 1678; D. 1735.

Heaton, *he'-ton*, a township in the W. Riding of Yorkshire. *Pop.* 1,637.—This is the name of several other unimportant townships in England.

Heaton Norris, a chapelry in Lancashire, forming a suburb of Stockport, from which it is separated by the Mersey. *Pop.* 16,000, mostly employed in cotton-mills and bleaching-factories. — The river is here crossed by a viaduct of the Manchester and Birmingham Railway.

Heavitree, *hev'-i-tre*, a parish of Devonshire, 1 mile from Exeter, of which it is a suburb. *Pop.* 3,112.

Hebden, *heb'-den*, a village in the W. Riding of Yorkshire, 8 miles from Halifax. It is a station of the Leeds and Manchester Railway. *Pop.* 400.

Heber, Reginald, *he'-ber*, bishop of Calcutta, a learned, pious, and accomplished divine. After a brilliant career at college, he composed his prize poem, "Palestine," which, unlike similar productions, has found a permanent place in English literature. In 1805, he set out on an extended continental tour, and visited Russia, the Crimea, Hungary, Austria, &c. He took holy

orders in 1807, contributed during the few subsequent years to the "Quarterly Review," and worked at a Dictionary of the Bible, which, however, was never published. He had long considered that devotional poetry stood in need of improvement, and, with a view to raise the standard of this department of sacred literature, he composed a volume of "Poems and Translations for Weekly Church Service." In 1819 he edited Jeremy Taylor's works, and in 1822 was made preacher of Lincoln's Inn. After twice refusing the appointment, he was ordained, in June, 1822, bishop of Calcutta, which diocese, in his day, extended over the whole of India, Ceylon, and Australasia. In June, 1824, he began the visitation of this immense diocese, and travelled through Bengal, and, after an eleven months' journey, arrived at Bombay, sleeping, for the most of the time, in a tent or cabin. His journal was published in three 8vo volumes, and now forms two volumes of Murray's Home and Colonial Library. In it he describes, with the utmost clearness and picturesqueness, the strange provinces he visited, and graphically details the manners and customs of the natives of India. After having visited Ceylon, he left Calcutta on a journey to Madras, and reached Trichinopoly, where, after confirming a number of the natives, he retired to take a cold bath, in which he was found dead a short time afterwards. His life has been published by his widow. B. at Malpas, Cheshire, 1783; D. at Trichinopoly, 1826.

HEBER, the son of Saleh, and father of Phaleg. The name of "Hebrews," given to the Jewish nation, is derived from him. B. 1281 B.C.; D. at the age of 464.

HEBRIDES, or WESTERN ISLANDS, *eb'-ri-dees*, a cluster of islands situate on the W. coast of Scotland, in the Atlantic Ocean, extending about 180 miles in length, from the Butt of Lewis, their N. extremity, to the small island of Sunday, on the coast of Kintyre, and being from 10 to 30 miles in breadth. *Area*, about 2,750 square miles. The principal are Lewis and its adjacent islands, belonging to Ross-shire; Harris, North Uist, Benbecula, South Uist, Skye, Barra, Eig, and the smaller neighbouring islands, attached to Inverness-shire; and Rum, Muck, Canna, Coll, Tiree, Mull, Lismore, Staffa, Luing, Scarba, Colonsay, Oronsay, Jura, Isla, Gigha, Cara, &c., belonging to the shire of Argyle. To these we may add those islands which lie in the Firth of Clyde, to the eastward of the peninsula of Kintyre; viz. the isles of Bute, Arran, Cumbrays (Greater and Lesser), and Inchmarnock, which form the shire of Bute. The various tracts of ground and clusters of rocks, thus detached from the mainland, are estimated to amount to 300, of which 86 are inhabited. *Desc.* For the most part rugged and mountainous, with large tracts of moorland. Pasture-land predominates, as the soil is little adapted for the growth of crops. *Manf.* Kelp, distilling, and cotton stuff. *Pop.* about 100,000. *Lat.* between 55° 35′ and 58° 34′ N. *Lon.* 5° to 8° W.—The ancient history of these islands is involved in obscurity. It appears certain, however, that they were ruled by their own independent princes until the 8th century, when the Pictish kingdom was overthrown by Kenneth II. They continued, during the 10th, 11th, and 12th centuries, the haunts of pirates who infested the neighbouring countries; and, when they came under the dominion of the kings of Scotland, their chieftains were long lawless and turbulent; but, by the gradual increase and consolidation of the royal power, and by the progress, also, of regular order and good government, they were slowly brought within the control of the supreme power. The act of parliament of 1748, abolishing all heritable jurisdictions, gave the final blow to the influence of the independent chieftains of the Western Isles.

HEBRIDES, NEW, a group of islands in the S. Pacific Ocean, discovered by Quiros in the year 1606. In 1773 Captain Cook surveyed this group, and he, considering them to be the most western islands of the Pacific, gave them the name of New Hebrides. They extend for a distance of 125 leagues, and the principal of them are St. Bartholomew, Isle of Lepers, Aurora Island, Whitsuntide Island, Mallicollo, Erromango, and Tanna. *Area*, 4,200 square miles. *Desc.* Most of the islands are mountainous, and some have active volcanoes; but the soil is generally fertile. *Climate.* Though the heat is extreme, it is modified by sea-breezes. *Pop.* who are Papuans, 110,000. *Lat.* 13° to 20° S. *Lon.* 166° to 170° E.

HEBRON, *he'-bron*, an ancient town of Palestine, in the tribe of Judah, 18 miles from Jerusalem, was built shortly after the Deluge. It is celebrated from David having reigned in it 7 years before he became master of the whole of Israel; by John the Baptist having been born in it; and for Abraham, Sara, Isaac, Rebecca, Jacob, and Leah, having been buried in its vicinity. Helen, the mother of Constantine, built a church in it; but at the present day the place is in a miserable condition. *Pop.* 4,000.

HECLA, *hek'-la*, a volcanic mountain in the S. of Iceland, near the coast, surrounded by higher mountains. It forms three peaks, and contains numerous craters, the largest of which is about 150 feet deep. There are nearly fifty recorded eruptions of this volcano, the one of 1783 being the most terrible; the matter then thrown out filled up mountain-glens 600 feet deep, as well as many lakes and river-courses. In the eruption of 1845-6, a stream of lava from the large crater was 50 feet deep and 1 mile wide; stones of an enormous size were ejected, and the ashes borne as far as the Orkney Isles. *Height*, 5,110 feet. (*See* ICELAND.)

HECQUET, Philip, *hek'-ai*, a French physician, who was a great advocate for the use of warm water and bleeding, and, in consequence, was ridiculed by Le Sage, in his novel of "Gil Blas," under the name of Dr. Sangrado. He was, however, a man of skill and piety. He wrote several medical books. B. at Abbeville, 1661; D. 1737.

HECTOR, *hec'-tor*, the bravest of the Trojans, the son of Priam and Hecuba, and husband to Andromache. During the Trojan war, he fought gloriously against the most redoubtable of the Greek warriors, Ajax and Diomede, and killed a number of their best leaders; among others Patroclus, the friend of Achilles, who was roused into activity in order to avenge his death, and, after chasing him three times round the walls of Troy, pierced him with his spear. His body was thrown to the dogs to be devoured, but his father supplicating Achilles, it was given up to him, and was buried in Troy, where funeral sacrifices were offered to him as a hero.

HEDJAS, EL, *hed'-jas*, a province of Arabia, consisting of an unproductive plain, which extends along the Red Sea from Mount Sinai to the frontier of Yemen. It contains the famous capitals of Mecca and Medina.

HEEMSKERK, James, *heems'-kerk*, a Dutch admiral, who sailed with Barentien to discover a north-east passage to Asia, in which voyage the commander died, but Heemskerk brought the ships safe to Holland. In 1607 he was made vice-admiral, and sent against the Spaniards in the Mediterranean, where he defeated a superior force, and took the Spanish admiral prisoner, but was himself slain in the action in 1607.

HEEREN, Arnold Hermann Ludwig, *heer'-en*, an eminent German philologist and historian, who, after travelling in Germany, France, and Italy, was appointed professor of philosophy at Göttingen in 1787, when he devoted the remainder of his life to learning and research. His "Manual of Ancient History," "Handbook of Modern History," and "Essay on the Influence of the Crusades," are considered to rank among the best productions of their class. He was elected a member of nearly every European learned society. B. near Bremen, 1760; D. at Göttingen, March, 1842.

HEERLEN, *heer'-len*, a town of the Netherlands, 14 miles from Maestricht. *Pop.* 4,160. *Manf.* Needle-making, linen-bleaching, brewing; a trade in cattle also is carried on.

HEGEL, George William Frederick, *hai'-gel*, a celebrated German philosopher. He studied with Schelling at Tübingen, and afterwards at Jena, where Fichte taught. He at first embraced the doctrines of that philosopher, but afterwards those of Schelling, and finally proceeded to propound a system of his own. In 1806 he became professor at Jena, and from 1808 to 1816 was director of the college of Nuremburg. In 1818 he replaced his former master Fichte in the chair of philosophy at Berlin, where he taught till the time of his death. An account of his system of metaphysics, and a comparison of his philosophy with that of Fichte and Schelling, would be out of place here.

It will be sufficient to say that he ranks among the German philosophers very high. His works, comprised in nineteen 8vo volumes, were published at Berlin between the years 1832-45, and have been translated in part both into French and English. B. at Stuttgart, 1770; D. of cholera, at Berlin, 1831.

HEIBERG, Johan Ludwig, *hi-bairg*, an eminent Danish metaphysician and comic dramatist, who, after receiving a good education, was undecided, at the age of 27, as to his choice of a profession; but the Danish government granted him a travelling pension; whereupon he went to London, and afterwards spent three years in Paris in the society of his father, who had been banished thither, and mixed in the best French society. On returning to his native country, he was made professor of the Danish language at the university of Kiel, in Holstein. After spending some years in this occupation, he commenced writing for the stage, and endeavoured to introduce among the Danes pieces written upon the model of the lighter French comedies. "King Solomon and the Hatter" was his first production, which met with the greatest success. "The Danes in Paris" succeeded; and in 1829 he was appointed royal dramatic poet and translator, and soon after married a lady, who, as Madam Heiberg, was accounted the most brilliant Danish actress of her time. Many other dramas, and some philosophical works, were next published by him. In 1827-28 he edited the "Copenhagen Flying Post," in which appeared the "Everyday Story," considered as one of the best Danish novels, and which was long thought to be his composition, but which has been ascertained to be the production of his mother. B. at Copenhagen, 1791.

HEIDEGGER, John James, *hi-deg'-ger*, a native of Zurich, in Switzerland, who went to England in 1708, and by his address and ingenuity, became the leader of fashion among the English upper classes, and manager of the opera-house, by which means he contrived to gain £5,000 a year. He was an amiable and liberal man. B. about 1678; D. 1749.

HEIDELBERG, *hi'-del-bairg*, a city of Germany, on the Neckar, which is here crossed by a stone bridge, 10 miles from Mannheim. The chief buildings are the town-hall, hospitals, several churches, and the university. It consists principally of a long street, the other streets being narrow and gloomy. From the summit of the Königstuhl, a hill 2,000 feet high above the town, a view is obtained of the most charming German scenery. On the lower parts of this hill stands the castle, perhaps the most picturesque ruin in Europe, if we except the Alhambra of Spain. It was once the abode of the elector-palatine, and in its cellar is the famous Heidelberg tun, holding 800 hogsheads. *Manf.* Tobacco, wax tapers, saffron, leather, musical instruments, &c. There is a fishery, and a trade is carried on in corn, hops, fruit, and wine. *Pop.* 13,430.—This town has been besieged several times,—by Tilly in 1622; by Turenne in 1674.

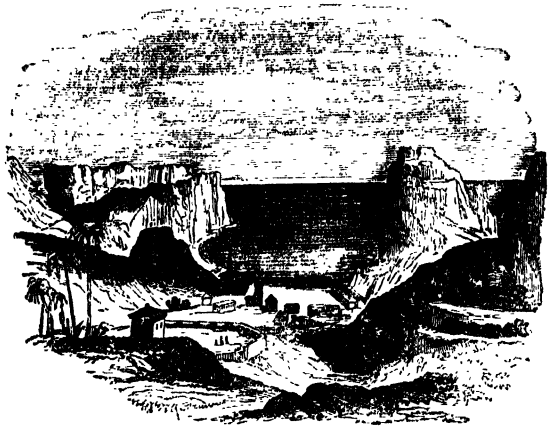
HEILBRONN, *hile'-bron*, a town of Wurtemberg, on the Neckar, 25 miles from Stuttgart. Its market-place is large, and is adorned with fine fountains; it also has a handsome church, town-hall, palace, hospital, gymnasium, schools, and a shot-foundry. *Manf.* Carpets, woollens, silver-ware, white lead, oil, and paper. *Pop.* 8,477.

HEILIGENSTADT, *hi'-le-gen-stat*, a town of Saxony, Prussia, on the Leine, at its junction with the Geirlade, 47 miles from Erfurt. It is surrounded by walls, and has a castle, churches, gymnasium, and academies. *Manf.* Ribbons and woollens; and it has a trade in corn and cattle. *Pop.* 5,240.

HEIN, Peter, *hine*, an obscure sailor, who rose by his bravery to the command of the Dutch fleet, with which he defeated the Spaniards off the coast of Brazil, in 1626. He was slain in fighting with the French off Dunkirk, in 1629. When the news arrived, the States sent a deputation to condole with his mother on the melancholy occasion; but the old woman only replied, "Ah, I always said Peter was an unlucky dog, and would come to an untimely end."

HEINE, Heinrich, *hine*, a celebrated French-German poet, essayist, and satirist. He was born of Jewish parents, at Dusseldorf, on the 1st of January, 1800, "Which makes me," he wrote, "the first man of my century." He embraced the Protestant faith in 1825, to prevent, he said, "M. de Rothschild's treating him with familiarity." He studied jurisprudence successively at Bonn, Berlin, and Göttingen, in which latter city he received the degree of Doctor of Laws, and while resident there, in 1824, made a tour in the Harz Mountains, an account of which he published at Hamburg. England, South Germany, and Italy, were next visited; and a description of these countries was written by him, and published under the title of "Reisebilder" (Pictures of Travel), between the years 1826-31, a French translation of which, by himself, under the title of "Impressions de Voyages," made him as celebrated in France as he already was in Germany. The brilliant wit, combined with the bold political addresses to the sovereigns of Germany and the whole of Europe, contained in this volume, established his fame. His "Book of Songs," published at Hamburg in 1827, placed him at the head of that political and literary section of his countrymen called "The Young German School," and, from its satirical humour, caused him so many enemies in Germany, that he withdrew to Paris, where he became, as much from temperament as from the natural bent of his genius, more a Frenchman than a German. During the last 25 years of his life, he continued to reside in the French capital, making only a few furtive visits to his native land. In 1847 he was attacked with paralysis, by which he lost the sight of one eye; and, in the following year, he had a second attack, which, although it left his mental faculties unimpaired, deprived him of the use of his other eye, and made him a cripple for life, besides subjecting him, at intervals, to intense bodily suffering. Though he was never again able to quit his chamber, he continued to embody in prose and verse the rich and fertile creations of his brain, by the aid of an amanuensis. A translation of his poems into French was made by Gerard de Nerval, under his superintendence, in 1855. In addition to the works we have quoted, he wrote many volumes of poetry, sketches, and satirical pieces. As a satirical wit, he is worthy to be classed with Cervantes, Swift, and Voltaire, while his poems are characterized by tenderness, originality, and rare beauty of versification. B. 1800; D. at Paris, 1856.

HEINSIUS, Daniel, *hine'-se-us*, an eminent Dutch philologist and critic. He was made Greek professor at Leyden when he was but 18, and, afterwards, succeeded his master, Joseph Scaliger, in the professorship of politics and history. Besides annotating several of the classic authors, he wrote some excellent works in prose and verse. B. at Ghent, 1580; D. 1655.



HEINSIUS, Nicholas, son of the preceding, was an eminent Latin poet, and editor of several editions of Virgil, Ovid, Claudian, and other classic authors. B. 1620; D. 1681.

HELDER, *hel'-der*, a town of N. Holland, on the North Sea, at the mouth of the Mars-diep, which separates it from the island of Texel. It is well fortified, and contains several churches, a synagogue, town-hall, and orphan hospital. *Manf.* Beer, leather, and gunpowder. *Pop.* 2,950. Near here was fought a naval battle between the English and Dutch, in which Van Tromp was killed. It was taken by the English, under Abercrombie, in 1799, and was afterwards retaken by Brewe, and was subsequently rendered a first-class fortress by Napoleon I. With Amsterdam it communicates by the famous Helder Canal. (*See* AMSTERDAM.)

HELEN, *hel'-en*, a Grecian princess, celebrated in the Greek mythology for her beauty, and for causing the siege of Troy, who selected Menelaus for her husband; but, during his absence from Sparta, she fled with the Trojan prince Paris, to Troy. The siege of Troy by the Greeks ensued, and was only terminated by the destruction of the city. Paris having been killed in the siege, she became the wife of Deiphobe, his brother; but, after the taking of the city, she betrayed him to the Greeks, and was conducted by Menelaus back to Sparta, which state she was forced to quit on his death, retiring to Rhodes, where she was put to death by Polyxo, wife of Tlepolemus, who had perished at the siege of Troy.

HELENA, SAINT, *he-le'-na*, a lone island in the Atlantic Ocean, 800 miles from Ascension Isle, 1,200 from the coast of S. Africa, and 2,000 from that of S. America.

*Ext. and Cir.* It is 10½ miles long by 7 broad, and about 28 miles in circumference. *Area*, 47 square miles. *Desc.* This island presents to the sea, throughout its whole circuit, an immense wall of perpendicular rock, from 600 to 1,200 feet high. In exploring it, however, verdant valleys are found interspersed with the

SAINT HELENA.

dreary rocks, of which the culminating point is called Diana's Peak, situate nearly in the centre of the island, and attaining a height of 2,700 feet. There are other rocks and hills thrown together in the wildest confusion; and the rugged surface presents a number of fantastic peaks, the most remarkable of which are two basaltic columns, 160 and 197 feet high respectively. The principal opening is St. James's, or Chapel Bay, and here the town of St. James is built. There are three other openings, all of which are strongly fortified. *Climate.* Heavy and moist, but not liable to the extremes of heat or cold. It is visited by strong gusts of wind, but is exempt from thunder and lightning, storms and hurricanes. The sky, in consequence of the superabundance of moisture, is often clouded; and only about one day in three is supposed to be illumined by sunshine. *Pro.* Of the small portion of ground fit for cultivation, a part is exceedingly fertile. Potatoes are the principal object of culture, and have, in fourteen years, produced, on an average, more than two crops in the year. At its first discovery, the island presented an immense forest, its chief indigenous trees being ebony, redwood, and gum-wood. About 1720, the plain was nearly stripped of trees, and, in their place, there began, in a few years, to spring up a species of wire-grass, which covered the ground with excellent pasture. After that time, the rearing of sheep and goats became the principal object of agricultural industry. *Pop.* about 6,000, of whom half are whites. *Lat.* 15° 55′ S. *Lon.* 5° 44′ W.— Saint Helena was discovered by the Portuguese in 1502, and belonged to the Dutch from 1610 to 1650, when it fell into the hands of the British. It derives its principal importance from its being on the direct route from the E. Indies to Europe, and is, consequently, a valuable possession for England. Its chief celebrity, however, is due to its having been selected for the place of exile for Napoleon I. by the allied powers. Here he lived at Longwood, from November, 1815, till his death, in 1821. His remains lay here, also, till 1840, when, by the permission of the English government, they were conveyed to France.—An island of N. America, on the coast of S. Carolina.

**Helena, St.**, a native of Bithynia, of obscure origin, but of an accomplished mind and handsome person. She became the wife of Constantine Chlorus, and was the mother of the emperor Constantine. When her husband espoused the daughter of Maximilian-Her-

cules, in 292, he divorced Helena; but, on the accession of her son, she was recalled to court, and treated with the honours due to her rank. She visited the Holy Land, where she is said to have discovered the true cross. She founded several churches, and bestowed immense sums in charity. B. about 247; D. 327.

**Helen's, Saint**, *hel'-ens.*—1. A town and chapelry of Lancashire, on a branch of the Mersey, 11 miles from Liverpool. It has rapidly risen from a mere village to be a populous town, and has a church, chapel, town-hall, market-house, &c. *Manf.* Plate-glass, bottles, watch-movements, chemicals, and earthenware. *Pop.* 14,866.—2. A parish at the E. extremity of the Isle of Wight, 8 miles from Newport. Its road-stead is the E. entrance to Spithead. *Pop.* 2,000.—3. One of the Scilly Islands, about a mile from Fresco.

**Helensburg**, *hel'-enz-berg*, a watering-place in Dumbartonshire, on the N. of the Firth of Clyde, opposite Greenock. The houses, which have gardens attached to them, are not numerous, but they are comfortably and pleasingly built, and are occupied in the summer season by the Glasgow citizens, of whom Helensburg is a favourite resort. *Pop.* 2,841.

**Helicon**, or **Zagora**, *hel'-i-kon*, a mountain of Bœotia, Greece, celebrated in the songs of many Greek poets. It is composed of a series of peaks, deep ravines, and beautiful valleys, whilst its vegetation is luxuriant. *Height*, 4,963 feet.

**Helier's, Saint**, *hel'-yers*, a parish, and the capital of the island of Jersey, situate on its S. coast, and on the E. side of St. Aubin's Bay. The town was formerly an insignificant village, but now consists of several streets diverging from a square, on one side of which is the court-house, and, not far from it, the government-house. It has a parish church, workhouse, public hospital, prison, theatre, and a public library. It is defended by a fine citadel, called Fort Regent, which overlooks the inner harbour, and was built at a cost of about £800,000. A strong fortress, called Elizabeth Castle, stands on a rocky island in St. Aubin's Bay, of which it defends the entrance. *Manf.* Shipbuilding, stone-works; and it has a fine harbour, commodious quays and docks, and carries on a large trade both with England and France. *Pop.* about 30,000, including soldiers. *Lat.* 49° 11′ N. *Lon.* 2° 6′ W. (*See* Jersey.)

**Heligoland**, *hel-e-go-land'*, a small island in the North Sea, situate about 8 miles from the mouths of the Elbe and the Weser. It consists of a rock about 200 feet high, and on the summit of which is a low plain, with a village and lighthouse. It has two good harbours, and near it is a roadstead, where vessels may anchor in 48 feet of water. The encroachments of the sea have led some observers to fear that the island will entirely disappear. *Pop.* 2,230, subsisting chiefly by fishing and acting as pilots.—It was taken from the Danes by the British, in 1807, and became a depôt for merchandise intended to be smuggled into the continent during Napoleon's continental blockage. At the peace of 1814, it was retained by this country, and is of importance as an outpost of England in war time. The Germans have visited it of late years as a watering-place.

**Heliogabalus, M. Aurelius Antonius**, *hel'-le-o-gab'-a-lus*, a Roman emperor, so called because he had been a priest of the sun. He was, at the age of 14, chosen emperor, after the death of Macrinus, and associated with himself in the government his grandmother Mœsa, and his mother Sæmias, and chose a senate of women, over whom the latter presided. He afterwards fell into every kind of cruelty and debauchery, raised his horse to the consular dignity, and caused divine honours to be paid to himself. He was assassinated in 222.

**Hell, Maximilian,** *hel*, an eminent German Jesuit, who, at twenty-five years of age, was engaged as an assistant in the Jesuits' observatory at Vienna. In 1751 he was made professor of mathematics in Transylvania; but, after some years, he returned to Vienna, and there became head of an observatory, erected after his own designs. He left Vienna for Lapland in 1768 to observe the transit of Venus across the sun's disc. His observation was conducted under very favourable atmospheric conditions, and his report of the phenomena was so accurate and complete, that astronomical science was greatly advanced by it. His report also contained some valuable information relating to the natural history, the geography, and meteorology of Lapland. He wrote many excellent mathematical and astronomical works, as well as editing the astronomical observations made by the Jesuits at Pekin, between the years 1717 and 1752. B. in Hungary, 1720; D. at Vienna, 1792.

**Hellada,** *hel'-la-da*, a river of Greece, which, after a course of 50 miles, enters the Gulf of Zeitoun.

**Hellanicus,** *hel-lăn'-i-kus*, an early Greek prose writer, who wrote a "History of Argos," and other works which have been quoted by ancient authors. B. at Mitylene, 496 B.C.; D. 411 B.C.

**Hellas,** *hel'-las*, a name for Greece. (*See* Greece.)

**Hellespont.** (*See* Dardanelles.)

**Hellin,** *hel'-leen*, a town of Murcia, Spain, 35 miles from Albacete. It is built on a height, irregularly but substantially, and has an elegant church, the ruins of an ancient castle, and mineral baths. *Manf.* Hats, woollens, and linens. *Pop.* 9,814.

**Helloro,** *hel-lor'-o*, the ancient Othrys, a range of mountains to the N. of Greece, being a spur of the Pindus. *Height*, 5,570 feet.

**Hellot,** John, *hel'-lo*, a French chemist, who was a member of the Academy of Sciences of Paris, and of the Royal Society at London. He wrote some treatises on dyeing, and several dissertations in "The Memoirs of the Academy of Sciences;" besides other chemical works of merit. He also conducted, for many years, the "Gazette de France." D. 1766.

**Hell's Skerries,** *hels sker-res*, a cluster of small islands belonging to the Hebrides, 10 miles from Ouin, with an extremely rapid current running between them.

**Helme,** *helm*, a river of Thuringia, Saxony, rising in the Harz mountains, and, after a course of 15 miles, falling into the Unstrut, near Artern.

**Helmers,** Jan Fredirik, *hel'-mers*, a Dutch poet, chiefly remarkable for his hyperbolical laudation of his native country. After stating that the Dutch nation left every other immeasurably behind in morality, heroism, science, and the fine arts, he makes a comparison between Vondel, a Dutch poet, and Shakspere, to the disadvantage of the latter, who is pronounced to be "barbarous." B. at Amsterdam, 1767; D. 1813.

**Helmont,** *hel-mawng'* a town of North Brabant, Netherlands, on the Aa, 21 miles from Bois-le-Duc. *Manf.* Linen-weaving, &c. *Pop.* 1,900.

**Helmsdale,** *helmz'-dail*, a river of Sutherlandshire, which falls into the German Ocean 3 miles from Ord-of-Caithness; and, at its mouth, is a village of the same name, with a good harbour, and having productive herring and salmon fisheries.

**Helmsley,** *helmz'-le*, a parish and picturesque town of Yorkshire, near the Rye, 12 miles from Thirsk. It has a church and the ruins of an ancient castle. *Manf.* Cotton and linen. *Pop.* 3,483.—In the vicinity are the remains of Rivaulx Abbey.

**Helmstadt,** *helm'-stat*, a town of the duchy of Brunswick, 21 miles from Brunswick. It has churches, hospitals, gymnasium, and the buildings of a university, suppressed in 1809. *Manf.* Soap, alum, vitriol, chicory, and tobacco-pipes. *Pop.* 6,400.

**Helmund,** *hel-moond'*, a river of Afghanistan, which rises 35 miles from Cabul, at a height of 11,500 feet, and enters the lake Hamoon by several mouths, after a course of 650 miles. Its banks are fertile, and discover traces of ancient cultivation, but a barren waste is exhibited by the inland country.

**Heloise.** (*See* Abelard.)

**Helps,** Arthur, *helps*, a distinguished living English essayist and historian. His first work was published anonymously, in 1841, under the title of "Essays written in the Intervals of Business." "Catherine Douglas," a tragedy, and "King Henry the Second," an historical drama, followed, in 1843. Two short works on "The Claims of Labour," and on "The Means of Improving the Health, &c., of the Labouring Classes," were his next productions. "Friends in Council," a work which has been extensively read, was published by him in 1845. "Companions of my Solitude," a sequel to the former, appeared in 1851, and, like its predecessor, was universally admired. He published all these works anonymously; but it was well known in literary circles that he was the author of them. After having graduated B.A. at Cambridge, in 1835, he entered one of the chief departments of the civil service; but, after some years, retired to his patrimonial estate near Bishop's Waltham, in Hampshire, intending to enjoy a learned and philosophical ease. Since his retirement, he has published his greatest work,—"The Spanish Conquest in America, and its Relations to the History of Slavery," upon the title-page of which he has placed his name. This work is an elaborate amplification of one formerly published,—"The Conquerors of the New World and their Bondsmen," and is an admirable contribution to English literature. He is distinguished as an essayist, by his pure, calm, and graceful style,—rare qualities in this kind of literary effort in the present day. B. about 1817.

**Helsingborg,** *hel'-sing-borg*, a seaport of Sweden, on the Sound, opposite Elsinore, 33 miles from Malmo. It is well built, has a good harbour, and a large trade. *Manf.* Earthenware and iron goods. *Pop.* 2,850.—The width of the Sound is about 3 miles, and here is the principal ferry from Sweden to Denmark. At this place the Swedes, in 1709, obtained a victory over the Danes.

**Helsingfors,** *hel'-sing-fors*, the seaport capital of Finland, on a peninsula in the Gulf of Finland, 100 miles from Abo. It has a good harbour, wherein can lie line-of-battle ships, and it is defended by the almost impregnable citadel of Sweaborg, standing on a number of rocky islands. The town is regularly built, and possesses a university, brought here from Abo in 1827, a library of 80,000 volumes, also brought from Abo; a museum, observatory, statehouse, churches, and botanical gardens. *Manf.* Sailcloth and linen; and it carries on a trade in corn, timber, &c. *Pop.* 16,000. *Lat.* 60° 11′ N. *Lon.* 24° 57′ E.—This town was founded by Gustavus I., and was burnt in 1741, during the war between Sweden and Russia. In 1855, Sweaborg was bombarded for two days by the allied English and French fleets, when considerable damage was done to the interior defences of the place.

**Helsingland,** *hel'-sing-land*, a former province of Sweden, now included in Gefleborg.

**Helstone,** *hel'-stone*, a parish, borough, and town of Cornwall, picturesquely situate near the mouth of the Love, 9 miles from Falmouth. It is neatly built, and has a handsome guildhall, several churches and chapels, a good harbour, and carries on a considerable trade in exporting tin, copper, and shoes, and importing iron, coal, and timber for the use of the surrounding mining district. *Pop.* 7,328.—The ancient May games, or Floralia, are still continued here, and on the 8th of May a universal holiday prevails, and floral processions and dances are held.

**Helvellyn,** *hel-vel'-lin*, one of the highest mountains in England, on the borders of Westmoreland and Cumberland. *Height*, 3,313 feet.—The ascent is not difficult, and, from the summit, a magnificent view is obtained of the beautiful lake district.

**Helvetius,** Claude Adrien, *hel-ve'-she-us*, in 1758, produced his celebrated work entitled, "De l'Esprit," which for its atheistical principles, was condemned by the parliament of Paris. On this he went to England, and thence to Prussia, where he was well received by Frederick the Great. On his return to France, he led a retired life, and wrote "Le Bonheur," a poem, and a philosophical work on "Man," of the same nature as his first performance. B. at Paris in 1715; D. there, 1771.

**Helvoetsluys,** *hel-vet-sloos'*, a fortified town of Holland, on the S. shore of the island of Voorn. It is well built, and has an excellent harbour, much used by the Dutch navy. It possesses also extensive magazines and dockyards for the construction and repair of ships

*of war*; also a government naval school. Steamers sail regularly hence to English ports. *Pop.* 2,843.—At this port the Prince of Orange, afterwards William III., embarked for England in 1688. It was taken by the French in 1795, and evacuated by them in 1813.

HEMANS, Mrs. Felicia Dorothea, *he'-mans*, a distinguished English poetess, was the daughter of Mr. Browne, who, dying while she was quite young, left her with her mother, an inmate of a solitary old mansion in North Wales. She commenced writing verses when but nine years of age, and printed a volume of poems, called "Early Blossoms," before she was fifteen. In 1812 she was married to Captain Hemans, of the 4th regiment, whose health had, however, become so shattered by his service in the Peninsular war, and in the ill-fated Walcheren expedition, that, in a few years, he was compelled to leave his young wife and five sons for Italy, with a view to its recovery. Shortly after arriving there he died. Strongly imbued with a love of poetry and literature, she studied Latin, Italian, Spanish, Portuguese, and German; made translations from Horace, Herrera, and Camoens, and wrote a series of articles on foreign literature for the "Edinburgh Magazine." She published "The Restoration of the Works of Art to Italy," in 1815; "Tales and Historic Scenes," in 1819; and obtained the prize from the Royal Society of Literature, for her poem of "Dartmoor" in 1821. Becoming acquainted with Bishop Heber, she wrote, at his suggestion, the "Vespers of Palermo," a drama, which was produced at Covent Garden theatre in 1823, when it was unsuccessful, but was afterwards more popular at the Edinburgh theatre, upon which occasion Sir Walter Scott wrote an epilogue for it. In 1825 she contributed her "Lays of Many Lands" to the "New Monthly Magazine," then edited by the poet Thomas Campbell. "The Forest Sanctuary," and "The Records of Women," followed. The "Songs of the Affections" were published in 1830. In the spring of 1831, her health being very weak, she changed her residence to Dublin, where, while preparing a collected edition of her poems, she died. B. at Liverpool, 1794; D. 1835.

HEMEL HEMPSTEAD *hem'-el hem'-sted*, a parish and town in Hertfordshire, 23 miles from London. It is well built, on a pleasant site, and has an old Norman church, chapels, workhouse, infirmary, and various schools. *Manf.* Straw-plaiting and paper-making. *Pop.* 7,268.

HEMINGBOROUGH, *hem'-ing-bro'*, a parish of Yorkshire, 4 miles from Selby, possessing a very handsome church. *Pop.* 1,953.

HEMINGFORD, Walter de, *hem'-ing-ford*, canon of Austin priory, Yorkshire, an English chronicler of the 14th century, whose history extends from the Norman conquest to the reign of Edward II. D. 1347.

HEMPSTEAD, *hem'-sted*, a parish of Essex, 5 miles from Thaxsted, noted for the fine timber in its vicinity. It has a very ancient hall, and, in its churchyard, lies Dr. Harvey, the celebrated discoverer of the circulation of the blood. *Pop.* 900.—There are other small parishes of this name in England.

HEMPSTEAD, a township of New York, U.S., 70 miles from Albany. Here is Rockaway Beach, on the Atlantic, with a heath of 15,000 acres lying behind it. It is much frequented by the Americans for the purposes of sea-bathing. *Pop.* 10,000.

HEMSKERCK, Martin Van, *hems'-kerk*, a Dutch painter, surnamed the "Raffaelle of Holland." He was the son of a mason, who brought him up to the same trade, but evincing a talent for design, he left his father's house and travelled to Italy. On his return he enriched his native country with his productions, most of which were destroyed by fire on the taking of Haarlem by the Spaniards in 1572. B. at Hemskerck, 1498; D. 1574.

HENBURY, *hen'-ber-e*, a parish of Gloucestershire, 4 miles from Bristol. *Pop.* 2,525.

HENDERSON, John, *hen'-der-son*, a celebrated English actor, who, evincing in his youth a taste for drawing, was placed under Mr. Fournier, an artist of ability, but of an eccentric character, with whom he did not continue long. He next lived with a silversmith, on whose death he devoted himself to theatrical studies. His first appearance was in 1772, at Bath, under the name of Courtney, in the character of Hamlet, which he performed with great applause. His fame increased; but it was not till 1777 that he made his appearance on the London stage, when he was engaged by Mr. Colman, at the Haymarket theatre, and made his first appearance in Shylock. After this he distinguished himself as a most excellent representative of Falstaff, Richard III., and other strong characters, which he personated with unbounded applause at Drury Lane, and at different provincial theatres. B. in London, 1747; D. 1785.

HENDERSON, Thomas, an eminent Scottish astronomer, who, after completing his education as an attorney, became secretary to Lord-Advocate Jeffrey, in whose service he remained till 1831. For several years previously, he had been an earnest student of astronomy; and, although his health was delicate and his eyes weak, he continued to make himself so proficient therein, that he became the correspondent of Dr. Thomas Young, whom he assisted in the calculations for the "Nautical Almanack." On the death of Dr. Young, a paper was left by him, informing the Admiralty that Mr. Henderson was the most proper person to fill the post left vacant; but though the Admiralty did not act upon this suggestion, it appointed him to the charge of the observatory at the Cape of Good Hope in April, 1832. While thus engaged, he communicated upwards of seventy papers of the greatest value to different scientific publications. In 1834 he was made astronomer royal for Scotland, and, while fulfilling the duties of his office, he voluntarily imposed upon himself the task of reducing to order the mass of observations he had brought home from the Cape. His writings and his observations have caused him to be reckoned among the best of modern astronomers. B. at Dundee, 1798; D. at Edinburgh, 1844.

HENDERSON, the name of several counties and townships in the United States.

HENDON, *hen'-don*, a parish of Middlesex, 9 miles from London, in the vicinity of which are many handsome mansions. *Pop.* 4,000.

HENGIST, *hen'-jist*, the first Saxon king of Kent, towards the end of the 5th century, was a descendant of Woden, whom the Saxons deified. Hengist and his brother Horsa, being called in by Vortigern, king of the Britons, to assist him in expelling the Picts, took with him his daughter Rowena, with whom Vortigern became enamoured, and married her. Hengist then obtained the kingdom of Kent, one of the seven of the Saxon heptarchy, and in which were included Kent, Middlesex, Essex, and Surrey. D. 489.

HENG-KIANG, *heng-ke'-ang*, a river of China, a large affluent of the Yang-tse-kiang, which, in its course of 300 miles, has several large cities on its banks.

HENLEY, Rev. John, *hen'-le*, commonly called "the Orator," was educated at St. John's College, Cambridge, after which he entered into holy orders, and became a preacher in London; but, disappointed in obtaining preferment, he commenced lecturing, not only on theology, but on politics, &c., on Sunday evenings, near Lincoln's-Inn Fields. Pope satirized, and Hogarth caricatured him. He published a translation of Pliny's "Epistles," and other works. B. 1692; D. 1756.

HENLEY-IN-ARDEN, a town of Warwickshire, at the confluence of the Arrow and Alne, 8 miles from Warwick. It is situate in the district which formed the ancient forest of Arden, and contains an antique church, with many old houses and the remains of an ancient market-cross. *Manf.* Needles and nails. *Pop.* 1,223.

HENLEY-ON-THAMES, a town of Oxfordshire, on the Thames, here crossed by a handsome bridge, 35 miles from London. The richly-wooded Chiltern Hills rise above the town, which consists of two main streets, and has a fine church, town-hall, market-house, and a valuable library and theatre. It carries on a considerable trade in corn, malt, and timber, and is much visited by the lovers of the sport of fishing. *Pop.* 4,000.

HENLOPEN, CAPE, is at the S.W. point of the entrance of Delaware Bay, 17 miles from Cape May, which forms the N.E. point. *Lat.* 36° 47′ N. *Lon.* 75° W.

HENNEBON, *hen'-bawng*, a town in the department of

Morbihan, France, on the Blavet, 5 miles from L'Orient. *Pop.* 4,729. This was formerly a very strong place, and Charles de Blois, in 1342, unsuccessfully besieged it, when defended by the countess de Montfort.

HENRICO, *hen'-ri-co*, a county of Virginia, U.S. *Pop.* 33,076, nearly half of whom are slaves.

HENRIETTA OF FRANCE, *hen-ri-et'-ta*, wife of Charles I., king of England, was daughter of Henry IV. and Marie de Medici. During the struggle between the king and the people, in 1644, she was forced to fly to France. On the death of Charles, in 1649, she retired into a convent which she had founded at Chaillot, where she died in 1669, Bossuet pronouncing her funeral oration. B. at Paris, 1609.

### SOVEREIGNS OF ENGLAND.

HENRY I., *hen'-re*, king of England, surnamed, for his learning, Beauclerc, or the scholar, was the youngest son of William the Conqueror, and was the first monarch of the Norman line who was English by birth. He succeeded his brother Rufus in 1100, at which time his brother Robert was in Normandy. Robert soon after invaded the kingdom, but agreed with Henry, for a yearly tribute, to renounce his right. The two brothers again resorted to arms, and Henry invaded Normandy, deposed Robert, and brought him prisoner to England, where he died in Cardiff Castle. Though the personal character of Henry was cruel and licentious, his reign was marked by some substantial benefits conferred on the English people. He restored the university of Cambridge, forgave all debts owing to the crown prior to his accession; reformed the court, and conquered Wales; abolished the curfew-bell, established a standard for weights and measures, and signed the charter which proved the origin of the English liberties. B. at Selby, Yorkshire, 1068; D. at Rouen, 1135.

HENRY II., eldest son of Geoffrey Plantagenet, so named from *planta genista*, Latin for a sprig of broom, which he wore in his cap, and Maud, empress of Germany, succeeded Stephen as king of England, in 1154. He added the provinces of Anjou, Touraine, Maine, Poitou, Saintonge, Guienne, and Gascony, to the English crown. His reign was troubled by disputes between him and Becket, archbishop of Canterbury, who being murdered in 1171, the pope obliged the king to undergo penance for it at Becket's tomb at Canterbury. In 1170 he caused his eldest son Henry to be crowned king of England; in 1172 he conquered Ireland, and, in the following year, his sons, instigated by their mother, rebelled against him, on account of his attachment to the Fair Rosamond. The kings of France and Scotland gave them assistance; but peace was concluded between all parties in the following year. In 1182 his son Henry died, in his 20th year. Richard, his third son, revolted against his father, and was supported by the king of France. Henry, being defeated in Normandy, was obliged to submit to disgraceful terms. B. at Le Mans, Normandy, 1133; D. at Chinon, France, 1189.

HENRY III. succeeded his father, John, in 1216, when only 10 years of age. When he reached the age of 16, he was declared of age; but his feeble character caused him to relinquish Normandy, Anjou, Poitou, Touraine, and Maine to the king of France. A civil war broke out in England, and he was taken prisoner by the barons, after a severe battle at Lewes, in Sussex. The tide of affairs turned in his favour after the battle of Evesham, in which the barons were totally defeated, chiefly through the brilliant skill and courage of his son Edward; whereupon he deprived several of these lords of their estates, and gave them to his friends. He cancelled the Great Charter, and suffered the pope to appoint an archbishop of Canterbury, and to collect tithes in England. B. at Winchester, 1206; D. at Westminster, 1272.

HENRY IV., eldest son of John of Gaunt, duke of Lancaster, and third son of Edward III., after some time spent in exile at Paris, invaded England at the head of a few followers, deposed his cousin, Richard II., and seized the throne, in 1399. This usurpation gave rise to the civil war between the houses of York and Lancaster, which broke out under the sway of Henry VI. After a short reign of only fourteen years, he died, [illegible] while king. B. at Bolingbroke, Lincolnshire, 1366 D. 1413.

HENRY V., surnamed Monmouth, from the place of his birth, was eldest son of Henry IV., and was educated at Oxford, under the guidance of his half-uncle. Cardinal Henry Beaufort. On commencing his reign, in 1413, he displayed many noble traits, although, in his youth, he had been very irregular; but, on coming to the crown, he discarded his evil companions, and conducted himself with a dignity becoming his station. Having formed the project of conquering France, he left his kingdom in the hands of a regency, and invaded that country, where he displayed uncommon courage. With 15,000 men he gained the battle of Agincourt, though the French amounted to 52,000. He then returned to England; but, three years afterwards, went again to France, where he married Catharine, the daughter of the French king. He was a brave and energetic monarch, and the most popular ruler that had hitherto sat upon the throne of England, not a single instance of insurrection or discontent being manifested throughout his reign. B. at Monmouth, 1388; D. at Vincennes, 1422.

HENRY VI., the only son of the above, was but ten months old at the death of his father, and was proclaimed king on the day after that event. His grandfather Charles, king of France, died soon after, and the duke of Orleans, encouraged by the minority of Henry, assumed the title of king, by the name of Charles VII. This renewed the war between England and France, and the English, for a while, were successful. Henry was crowned at Paris, and the great duke of Bedford, his guardian, obtained several important victories. But the raising of the siege of Orleans by Joan of Arc gave a new turn to affairs, and the English power declined, and was, in the end, quite subverted. The death of the duke of Bedford was a fatal blow to the cause of Henry; and, to add to his misfortunes, the York party in England grew strong, and involved the country in a civil war. They adopted the white rose as their badge of distinction, and the Lancastrians the red. Hence the title given to the struggle,—"the War of the Roses." After various contests, the king was defeated and taken prisoner. However, his wife, Margaret of Anjou, carried on the war with spirit, and for some time, with considerable success. Richard, duke of York, was slain at Wakefield, and Henry recovered his liberty; but Edward, earl of March, son of Richard, laid claim to the crown, and routed the queen's forces at Ludlow, but was himself afterwards defeated at St. Alban's. At length the York party prevailed, and Henry was sent to the Tower, where, it is believed, he was slain by Richard, duke of Gloucester. D. at Windsor, 1421; found dead in the Tower, 1471.

HENRY VII. was the son of Edmund, earl of Richmond, and of Margaret, of the house of Lancaster. By the assistance of the duke of Brittany, he landed in Wales with some troops, and laid claim to the crown in 1485. The people, disgusted at the cruelties of Richard III., joined him in such numbers that he was enabled to give the usurper battle at Bosworth Field, where Richard was slain, and Henry crowned on the spot. He united the houses of York and Lancaster by marrying Elizabeth, daughter of Edward IV. His reign met with little disturbance, except from two impostors, set up by Lady Margaret, sister to Edward IV. One was a joiner's son, called Lambert Simnel, who personated Richard, duke of York, who had been murdered by the duke of Gloucester in the Tower. On being taken prisoner, Henry made him a turnspit in his kitchen. The other was Perkin Warbeck, who pretended to be Edward V.; but he was soon taken, and hanged at Tyburn. Henry reigned 24 years, and greatly increased trade and commerce; but his avarice was excessive. B. at Pembroke Castle, 1456; D. at Richmond, 1509. Buried in Henry the Seventh's chapel, built by him in Westminster Abbey.

HENRY VIII. succeeded his father, the preceding monarch, at the age of 19. The first years of his reign were very popular, owing to his great generosity; but at length his conduct grew capricious and arbitrary. The emperor Maximilian and Pope Julius II., having leagued against France, persuaded Henry to join them, and he, in consequence, invaded that king- [illegible]

same time, James IV., king of Scotland, invaded England, but was defeated and slain at Flodden Field. Cardinal Wolsey succeeded in bringing Henry over from the imperial interests to that of the French king. When Luther commenced his reformation in Germany, Henry wrote a book against him, for which he was complimented by the pope with the title of Defender of the Faith. But this attachment to the Roman see did not last long; for, having conceived an affection for Anne Boleyn, he determined to divorce his wife, Catharine of Aragon, to whom he had been married eighteen years. His plea for the divorce was, that Catharine was his brother Arthur's widow. The divorce being refused by the pope, Henry assumed the title of supreme head of the English church, put down the monasteries, and alienated their possessions to secular purposes. His marriage with Anne Boleyn followed; but he afterwards sent her to the scaffold, and married Lady Jane Seymour, who died in childbed. He next married Anne of Cleves; but she not proving agreeable to his expectations, he put her away, and caused Cromwell, earl of Essex, the projector of the match, to be beheaded. His next wife was Catharine Howard, who was beheaded for adultery; after which he espoused Catharine Parr, who survived him. He was a man of strong passions and considerable learning; but it is truly said of him, "that he never spared man in his anger nor woman in his lust." B. at Greenwich, 1491; D. 1547.

### Sovereigns of France.

Henry I., king of France, succeeded his father Robert in 1031. His mother, Constance of Provence, excited a revolt against him, in favour of her second son Robert, but without success. He had the reputation of a valiant commander and a good king. B. about 1004; D. 1060.

Henry II., the son of Francis I., succeeded his father in 1547, at which time France was at war with England. In 1550 peace was restored, and Boulogne ceded to the French for a large sum. The year following, a league was entered into between him and the Protestant princes of Germany against Charles V., which produced a ruinous war to France. In 1556 a truce was concluded for five years: but the emperor having resigned his crown to his son Philip, the war was renewed. In 1557 the French army was defeated by the Spaniards at St. Quintin. In 1559 Henry concluded a dishonourable peace. The same year he was accidentally wounded in the eye, at a tournament, by a lance, of which he died in 1559. B. 1518.

Henry III., third son of the above, succeeded his brother, Charles IX., in 1573. While he was duke of Anjou, the Poles elected him to their throne, on the death of Sigismund Augustus; but he renounced it on taking possession of that of France. The same year he gained the battle of Dormans, and concluded a peace with the Huguenots, in which toleration was granted them. But this was revoked in 1585, and the Protestant princes, of whom Henry, king of Navarre, was the chief, had recourse to arms. The king of Navarre defeated the Catholic army in 1587. The duke of Guise, on the other hand, obtained a signal advantage over the Huguenots and their allies; but on his marching to Paris, the gates were shut against him. The people, however, were attached to Guise, and the king was obliged to retire from his capital, which was commanded by the head of the Catholic league. France was then divided into three parties; the Royalists, the Guises, and the Huguenots. At length the two first became apparently reconciled, but Henry caused the duke, and his brother the cardinal, to be assassinated soon after. Civil war again broke out with additional fury; the pope excommucicated Henry, and the parliament instituted a criminal process against him. In this exigency, he had recourse to the king of Navarre, who set out on his march to Paris; but the face of affairs was suddenly changed by the death of the king, who was assassinated by a monk, named James Clement, at St. Cloud, 1589. B. at Fontainebleau, 1551.

Henry IV., surnamed the Great, king of France and Navarre, was the son of Antoine de Bourbon, king of Navarre, and Jeanne d'Albert. Being descended from Louis IX. of France, he became the heir to that kingdom; but, as he was educated a Protestant, his claim was resisted. Born a mountaineer, he was early trained to activity of body, and soon distinguished himself by feats of arms. After the peace of St. Germain, in 1570, he was taken to the French court, and, two years afterwards, married Margaret, sister of Charles IX. At the rejoicings on this occasion happened the infamous massacre of St. Bartholomew, and his life was only spared on condition of his becoming a Roman Catholic; but, in 1576, he escaped from Paris, and put himself at the head of the Huguenots. In 1587 he gained the battle of Coutras. In 1572 he succeeded to the throne of Narvarre, and in 1589 to that of France; but his religion proving an obstacle to his coronation, he again consented to abjure it in 1593. In 1595 he issued the edict of Nantes, granting toleration to the Protestants. The same year, he entered into a war with Spain, which lasted till 1598, after which his country enjoyed uninterrupted peace till his death. His abjuration was very disagreeable to the Protestants, and did not prove quite satisfactory to the opposite party, who doubted his sincerity. His greatest enemies were the Jesuits, one of whose pupils wounded him in the mouth in an attempt upon his life, which was finally taken by Francis Ravaillac. The wisdom, generosity, and talent displayed by him throughout his reign, have truly merited the title of Great, which is applied to his name; and he is the only king of the old monarchy who remains popular with the French nation. B. at Pau, in Béarne, 1553; assassinated, 1610.

### Sovereigns of Germany.

Henry I., surnamed the Fowler, emperor of Germany, was the son of Otho, duke of Saxony, and elected to the imperial dignity in 919 or 920. He reunited the German princes, and subdued the Hungarians, formed good laws, and built several cities. He vanquished the Bohemians, the Sclavonians, and the Danes, and conquered the kingdom of Lorraine. B. 876; D. 936.

Henry II., surnamed both the Saint and the Lame, and great-grandson of the preceding, was elected emperor in 1002. He re-established Benedict VIII. in the papal chair, and was crowned by that pontiff in 1014 at Rome. He tranquillized Italy, and expelled thence the Saracens and Greeks. B. 972; D. near Gottingen, 1024.

Henry III., surnamed the Black, or Bearded, son of Conrad II., succeeded his father in 1039. He was crowned at Rome by Clement II., and governed with a firm hand the people over whom it was his destiny to rule. B. 1017; D., supposed by poison, in 1056.

Henry IV. was son of Henry III., whom he succeeded at the age of 6 years. Agnes, his mother, governed with ability during his minority. The Saxons rebelled against him, and accused him of simony and other crimes, to Pope Gregory VII., who took from him the right of presenting to benefices. Henry then called a diet at Worms, in 1076, for the purpose of deposing the pope, who excommunicated the emperor. The German princes deposed Henry, who went to Italy, and made his submission to the pontiff; but Gregory was not to be appeased, and Henry resolved on vengeance. The electors chose Rodolphus, duke of Suabia, and Gregory confirmed his title; but Henry, after defeating his competitor, put him to death. He then called a council, which deposed the pope, and elected in his room the archbishop of Ravenna. In 1106 his son Henry assumed the title, and being supported by the princes of the empire, the emperor was obliged to renounce his crown; after which he became a wanderer, and supplicated the archbishop of Spires to give him a prebend in his church, which he refused. B. 1050; D. in poverty, at Liege, 1106.

Henry V., surnamed the Young, deposed his father in 1106. In 1110 he forced Pope Pascal II. to restore to him the right of nominating to ecclesiastical benefices, which Gregory VII. had wrested from his father. Pascal afterwards called two councils, and excommunicated Henry. He was the last emperor of the Franconian line. B. 1081; D. 1125.

Henry VI., surnamed the Cruel, was son of Frederick Barbarossa, and succeeded his father in 1190, at the age of 25. This prince behaved treacherously to

Richard I., king of England, who, in his journey from the crusade, through Germany, was arrested by Leopold, duke of Austria, and sent to the emperor, who exacted from him an enormous ransom. His wife, Constance, is said to have poisoned him. B. 1165; D. at Massena, 1197.

HENRY VII., son of Henry, count of Luxembourg, was elected emperor in 1308, at the age of 45, and soon after went into Italy, at that time distracted with the contentions between the Guelphs and Ghibellines. He was crowned at Rome in 1312, and died in the following year.

HENRY RASPON, landgrave of Thuringia, was elected emperor by the ecclesiastical princes in 1246, when Pope Innocent IV. deposed Frederick II.; but died the year following, of a wound received in fighting against his rival.

HENRY, prince of Wales, and the eldest son of James I., of England, was an amiable and accomplished prince, and a great patron of learning and science. His death caused great grief to the nation, which had formed of him the highest expectations. B. at Stirling, Scotland, 1594; D. 1612.

HENRY OF HUNTINGDON, an English historian, was canon of Lincoln and archdeacon of Huntingdon. He wrote a "History of England to the Year 1154;" and was also author of a Latin work, entitled, "Contempt of the World." Lived in the 12th century.

HENRY, Matthew, an eminent non-conformist divine and biblical commentator. He received his education under his father, and having made a considerable progress in learning, entered at Gray's Inn; but renounced the study of the law, and became a dissenting minister at Chester, where he resided many years, and then removed to Hackney. His chief work is "The Exposition of the Old and New Testament," in 5 vols. folio, still considered one of the best commentaries upon the Bible; he wrote also many other theological works. B. in Flintshire, 1662; D. whilst travelling between Chester and London, 1714.

HENRY, Robert, a Scotch divine, who, in 1776, was chosen one of the ministers of the Old Church at Edinburgh: he is the author of a valuable History of Great Britain to the reign of Henry VII. B. 1718; D. 1790.

HENRY, Patrick, a celebrated American orator and statesman, who, by the display of a great natural eloquence, became a leader of the American people in their struggle against the mother country. Jefferson says of him, that "he gave the earliest impulse to the ball of the revolution." In 1769 he became the leader of the democratic party in Virginia, and in 1775 was one of the first to make an appeal to arms. He said, "Of peace there is no longer any hope. If we wish to be free, we must fight." He became the first governor of Virginia, on the declaration of independence, and was re-elected the three following years. He was offered the secretaryship of state in 1765 by Washington, but declined the appointment. B. 1736; D. 1799.

HENRY, the name of several counties in the United States, with populations varying between 9,000 and 20,000..

HEPHÆSTION, *he-phes'-ti-on*, the favourite of Alexander the Great, and the companion of his campaigns and festivities, married one of the daughters of Darius. D. at Ecbatana, 324 B.C.

HEPTONSTALL, *hep'-ton-stall*, a township of Yorkshire, 8 miles from Halifax. *Pop.* 4,791, employed in worsted and cotton manufactories.

HEPTARCHY, *hep'-tar-ky*, 'seven kingdoms,' was the title given to the seven Anglo-Saxon monarchies of Britain. These were—1. Kent, founded about 455 by Hengist. 2. Sussex, by Alla in 491. 3. Wessex, by Cirdic in 516. 4. Essex, in 526. 5. Northumberland, in 547. 6. East Anglia, in 571. 7. Mercia, in 584. After many struggles with each other, these small monarchies became united under Egbert, king of Sussex, into one kingdom,—the kingdom of England.

HEPWORTH, *hep'-worth*, a township of Yorkshire, 7 miles from Huddersfield. *Pop.* 1,500.

HERACLITUS, *he-ra-cli-tus*, a celebrated philosopher of Ephesus, who flourished about 500 B.C. He was fond of solitude, and obtained the appellation of "the mourner," from his custom of weeping at the follies of men. He supported the doctrine of fatalism, and maintained that the world was made of fire, which element he deified. He died in the 60th year of his age.

HERACLIUS, *her-ac'-li-us*, emperor of Rome, was the son of Heraclius, governor of Africa, who dethroned Phocas in 610, and caused himself to be crowned in his stead. Chosroes, king of Persia, having ravaged Palestine, and committed dreadful cruelties on the Christians, Heraclius marched against him, forced him to sue for peace, and to deliver up the holy cross. The end of his reign was disturbed by ecclesiastical disputes and the inroads of the Saracens. D. 641.

HERACLIUS-CONSTANTINE, son and successor of the above, was associated in the throne with his brother Heracleonas, agreeably to the will of Heraclius. He reigned only a few months, being poisoned, it is said, by his mother-in-law, Martina. B. at Constantinople, 612.

HERACLIUS, patriarch of Jerusalem, was a debauched and scandalous prelate, and showed great enmity to Henry II., king of England, for not going to Jerusalem in person, agreeably to the terms of his penance, on account of the murder of Thomas à Becket. Lived in the 12th century.

HERAT, *he'-rat*, a city of Afghanistan, the capital of an independent state, situate in a plain near the Hury river, 360 miles from Cabul. It is well fortified, and surrounded by a wet ditch, mound, and bastioned wall. It contains a number of caravanserais, public baths, reservoirs, and numerous mosques: a strong citadel is built. To the N. of the city are the ruins of a magnificent religious edifice, an immense mound raised by one of its many rulers,—Nadir Shah. The prince's residence is not a handsome building, and the interior of the town is exceedingly dirty, although the vicinity is beautiful and the ground irrigated by numerous canals. Herat is the emporium of the commerce carried on between Cabul and Bokhara, Hindostan and Persia, and is a grand central mart for the products of India, China, Tartary, Afghanistan, and Persia. *Manf.* Carpets, leather, caps, cloaks, shoes, &c. *Pop.* about 40,000, of various nations. *Lat.* 34° 50′ N. *Lon.* 62° 30′ E.—This place has often been ravaged by various conquerors, disputing the empire of Asia: it was taken by Ghenghis Khan, then by Tamerlane, who made it the seat of government. It was subsequently united to Persia; but the Afghans took possession of it in 1715. Nadir Shah retook it in 1741, and Ahmed Khan, one of Nadir's generals, in 1749. After that date it became a quasi-independent state, and formed a portion of Afghan-Khorassan, in the kingdom of Cabul. In 1829 Herat was independently governed by Khamran Mirza, an Afghan prince, who, with a view of obtaining protection against his neighbour, the king of Cabul, agreed to pay an annual tribute to the shah of Persia. This obligation was, however, disregarded, and, after a few years, the Afghan acted as entirely independent. Some pretext for hostilities having occurred, Mahomet Shah marched against Herat in 1836, and, after a long siege, the Persians were forced to withdraw. The position of Herat is one of the greatest possible importance, and has been well described as the gate of India; for within the limits of the Heratee country all the great roads leading to India converge. By the Herat route alone could a formidable and well-equipped army march upon the Indian frontier from the north-west regions. In 1855 the Persians again made an attempt to get possession of Herat; but, after a short war with England, desisted. (*See* AFGHANISTAN.)

HÉRAULT, *haï'-rolte*, a maritime department in the S. of France, formerly comprised in Languedoc. It is bounded along its S.E. side by the Mediterranean. *Area*, 2,444 square miles. *Desc.* Its surface is mountainous in the N. and W., fine valleys, however, intervening; the coasts are low, and exhibit extensive lagoons and salt marshes. *Climate.* Mild and genial, and generally healthy, with the exception of the swampy localities. *Rivers.* Lez, Hérault, and Orbe. *Pro.* Wine, olives, mulberries, fruits, drugs, and dyes. *Minerals.* Coal, copper, iron, and various others. *Manf.* Cloths, cottons, silks, and woollens, paper, steel, brandy. It has, besides, a large transit trade. *Pop.* 389,286.

HÉRAULT, a river of France, which rises in the Cevennes Mountains, and, after a course of 100 miles, falls into the Mediterranean at the port of Agdes.

HERBART, John Frederick, *hair'-bar*, an eminent German metaphysician and philosophic writer, was appointed professor of philosophy at Königsberg, while fulfilling the duties of which he greatly assisted in the organization of the Prussian educational system. He composed a number of works on metaphysics, wherein it would appear that he was a follower partly of Fichte and partly of Kant. B. at Oldenburg, 1776; D. 1841.

HERBELOT, Bartholomew d', *dair'-be-lo*, a learned French orientalist. He obtained a pension from the king, and the place of regius professor of the Syriac language. Ferdinand II., grand-duke of Tuscany, made him a present of a large library of Oriental manuscripts. His great work, entitled "Bibliothèque Orientale," containing whatever relates to the knowledge of the Eastern world, is universally known. The best edition is that of Paris, in 4 vols. 4to, 1782. He also compiled a Turkish and Persian Dictionary. B. at Paris, 1625; D. 1695.

HERBERT, Mary, *her'-bert*, countess of Pembroke, was the sister of Sir Philip Sidney. She translated from the French a tragedy called "Annius," 1595, 12mo, and rendered into English some of David's Psalms. D. 1621. Ben Jonson wrote the following elegant epitaph for her:—

> "Underneath this sable hearse
> Lies the subject of all verse;
> Sidney's sister, Pembroke's mother;—
> Death! ere thou hast kill'd another,
> Fair and good and learn'd as she,
> Time shall throw a dart at thee."

HERBERT, Edward, lord Herbert of Cherbury, an English statesman and philosopher, was educated at Oxford, after which he travelled on the continent. On his return, he was made one of the king's counsellors for military affairs, and soon after was sent ambassador to France, to intercede on behalf of the Protestants. In 1625 he was made a peer of Ireland, and, in 1631, an English peer. At the breaking out of the rebellion, he sided with the parliament. Lord Herbert was the author of some singular books: the most remarkable is entitled "De Veritate," in which he espouses deism. He also wrote "The History of Henry VIII.," a treatise in Latin on the Religion of the Gentiles, and his own memoirs, which are the first instances of autobiography in the English language, and which were edited by Horace Walpole, and printed by him at his own press at Strawberry Hill. B. 1581; D. 1648.

HERBERT, George, an English poet and divine, was brother of the above. He received his education at Westminster school, whence he was elected to Trinity College, Cambridge, where he became acquainted with Lord Bacon, and where he was chosen fellow. He was also appointed orator to the university. On taking orders, he obtained the rectory of Bemerton, in Wilts, and a prebend of Lincoln. His poems, of the same school as Donne and Herrick, were published under the title of "The Temple." B. 1593; D. 1632.—He also wrote a prose sequel to "The Temple," wherein he lays down some very excellent rules for the life of a country clergyman. He also translated Cornaro "On Temperance."

HERBERT, John Rogers, R.A., a distinguished English historical painter, who, after completing his studies at the Royal Academy, began his artistic career as a portrait-painter. His first work which attracted attention was "The Appointed Hour," wherein a young Italian gentleman lies dead, from the dagger of a bravo, at the bottom of a flight of steps, while his mistress, unconscious of the act, is descending to meet him. This was one of the most popular prints of its day. After having travelled in Italy, he produced a series of Venetian pictures, among the best of which were "The Brides of Venice," and "Pirates of Istria bearing off the Brides of Venice." On embracing the Roman Catholic faith, his style underwent a very marked change; henceforth he painted only scriptural or ecclesiastical subjects, all of which were wrought in the mediæval manner; "The First Introduction of Christianity into Britain," "Christ and the Daughter of Samaria," and "Our Saviour and his Parents at Nazareth," being among his best works at this period. He was elected an R.A. in 1846, whereupon his style became again modified. He now painted "King Lear," "Lear Disinheriting Cordelia," which, with some others, were executed in fresco for the new palace at Westminster. He has since been engaged to paint nine more frescoes for the same building. B. at Maldon, Essex, 1810.

HERBERT, Right Hon. Sydney Herbert, an eminent English politician, who, after receiving an education at Harrow and Oriel College, Oxford, at which latter place he graduated in classical honours in 1831, entered on his public life as member of parliament for the southern division of Wilts. His first speech in parliament was delivered in 1831, upon which occasion he seconded a resolution for the exclusion of Dissenters from the college of Oxford. In 1838 he opposed Mr. Grote's motion in favour of the ballot. But, soon after this period, more enlightened and broader political views appear to have replaced his first somewhat narrow and illiberal opinions as a member of parliament. In 1841 he followed Sir Robert Peel, as a convert to free trade, and, on his accession to the office of premier, he became his secretary to the Admiralty. In 1846 he supported Sir Robert in all his measures tending to pave the way for the repeal of the corn-laws, and the introduction of free trade as the principle of English commerce. During the premiership of Lords John Russell and Derby, he was in opposition; but on Lord Aberdeen's accession to power, he accepted the post of secretary at war, but resigned it in 1845. He was colonial secretary for a very short time under Lord Palmerston, but, on the appointment of a committee of inquiry into the state of the army before Sebastopol, he, conceiving it to imply a censure upon the Aberdeen administration, a member of which he had been, relinquished the post. Since that period he has retired from politics, devoting his leisure to schemes of social benevolence and utility. He is second son of the earl of Pembroke by a daughter of Count Woronzoff, of Russia. B. 1810.

HERCULANEUM, *her-cu-la'-ne-um*, an ancient city of Italy, 5 miles from Naples, situate at the base of the W. declivity of Mount Vesuvius, near where the modern Portici now stands. It was destroyed by an eruption of the volcano of 79; and its site had long been a matter of doubtful discussion, as it had been completely buried under volcanic substances to a depth of 70 feet. At last a peasant, in the year 1711, digging a well in his garden, found some pieces of fine marble. The ground was subsequently excavated, and the ancient city discovered, in the exact state in which it was when buried under the volcanic eruption. Many valuable antiquities were found, calculated to convey a most accurate idea of some of the domestic manners of its ancient inhabitants.

HERCULES (in Greek Heracles), *her'-cu-les*, the most celebrated hero of the Grecian mythology, and, according to the myth, the son of Jupiter and Alcmena, daughter of Electryon and wife of Amphitryon. Juno, out of jealousy, sent two serpents to devour him; but the infant strangled them in his cradle. He early distinguished himself by feats of strength and valour; he slew the lion of Cithæron, and delivered Thebes from paying tribute to Erginus, king of Orchomenos. Obliged by his destiny to serve Eurystheus, king of Mycenæ, he performed, under his commands, a number of perilous adventures, the principal of which are known under the name of the "Twelve Labours of Hercules." He was, first, to bring the skin of the Nemæan lion; secondly, to kill the hydra; thirdly, to catch the hind of Artemis; fourthly, to bring the Erymanthian boar alive to Eurystheus; fifthly, to cleanse the Augean stable; sixthly, to drive away the water-fowl of Lake Stymphalis; seventhly, to bring the Cretan bull; eighthly, to fetch the mares of Diomedes; ninthly, to take from Hippolyta, the queen of the Amazons, her girdle; tenthly, to bring the oxen of Geryon from the island of Erythea; eleventhly, to obtain the golden apples of the Hesperides; twelfthly, to conduct Cerberus from the infernal regions. He, moreover, delivered Hesione from a marine monster; separated the mountains of Calpe and Abyla, which formerly were a single mountain, and thus formed

the "Pillars of Hercules;" killed the centaur Nessus; delivered Prometheus from his chains on Mount Caucasus; took Troy, to punish King Laomedon for his perjury, and performed a host of other brilliant exploits. Having carried off Iole, daughter of Eurytus, king of Œchalia, he was about to wed that princess, when Dejanira, his wife, finding herself about to be forsaken, sent him a tunic dyed with the poisoned blood of the centaur Nessus, thinking to regain his affection by that means. Hercules had no sooner put on the garment, than it adhered to his skin and caused him the most cruel torments. To end these he kindled an immense fire on Mount Œta, and burnt himself alive. Philoctetes, his friend, collected his ashes, and Jupiter placed them in heaven, and gave him Hebe for his wife. Hercules had several wives, the principal of whom were Megara, whom he killed in a fit of passion; and Dejanira, who was the mother of Hyllus. (*See* HYLLUS.) He loved Omphale, and spun at her feet to obtain her favours. He had been driven from his hereditary dominions by Eurystheus, and after his death, his descendants, the Heraclidæ (*see* HERACLIDÆ) made numerous attempts to reconquer them, but were unsuccessful till the year 1190 B.C. The great number of exploits which have been attributed to Hercules have led to the belief that there were many heroes of that name. Varro enumerates so many as 44; Diodorus says there were three, and Cicero counts six; but some modern scholars consider him an allegory of the sun, his twelve labours representing, according to their version, the twelve months, or the twelve signs of the zodiac.

HERACLIDÆ, *her-a-klī'-de*, the name of the sons, grandsons, and descendants of Hercules (*see* HERCULES), who, after the death of that hero, had been driven from the Peloponnesus by Eurystheus. They took refuge in Attica, whence, with the assistance of Theseus, they marched upon Eurystheus, whom they defeated; but, a pestilence breaking out, they retired again to Attica. They were defeated soon after, on making a second attempt, and Hyllus, the eldest son of Hercules, was slain. Upon this they promised not to invade the Peloponnesus again for a hundred years; but made several fresh attempts, till they at length succeeded; whereupon the land was divided among themselves and their Dorian followers. Such is the tradition of that important event in Grecian history known as the "Return of the Heraclidæ."

HERCYNIAN FOREST, *her-sin'-e-an*, a name of the Harz Mountains.

HEREFORD, *her'-e-ford*, the capital of Herefordshire, on the Wye, which is here crossed by a stone bridge of six arches, 19 miles from Monmouth. It is situate in a beautiful and richly-cultivated valley, and has broad streets and well-built houses, although many of them are old. The charitable institutions, hospitals, and almshouses are numerous. The principal public buildings are the cathedral, bishop's palace, county gaol, theatre, town-hall, guildhall, and shire-hall. The plan of the cathedral, built in William the Conqueror's time, is that of a cross with a small transept towards the E., and a chapel; the N. porch is particularly admired; but the incongruous W. front, rebuilt in 1786, impairs the general effect of its beauty. There are an infirmary, a lunatic asylum, and free grammar-school. The town was anciently fortified with a wall and ditch, and defended by a large castle. Only a small part of the wall remains; and the site of the castle, called the Castle-green, forms now an agreeable promenade, and is much admired. A musical festival is held triennially in the cathedral. *Manf.* Gloves, hats, flannels, and cutlery, all to a small extent. *Pop.* 12,108.—During the Saxon era, the Welsh inflicted considerable damage on this city; it also suffered greatly in the wars of the barons, and under the Plantagenets. During the civil war, it held loyally to the cause of the king, and was one of the last places to yield to the parliament. The house of Bohun took their title of earl from Hereford, and the Devereux family now take that of viscount. Nell Gwynn and David Garrick were born here.

HEREFORDSHIRE, *her'-e-ford-sheer*, one of the western counties of England, on the borders of Wales. It is bounded N. by Shropshire, S. by the counties of Gloucester and Monmouth, E. by Worcester, and W. by Brecknock and Radnor. *Ext.* 38 miles long, by 33 broad. *Area*, 836 square miles. *Desc.* The aspect of the county is throughout rich, beautiful, and picturesque in the extreme; gentle eminences rising in every direction, with intervening valleys, everywhere covered with plantations, orchards, and meadows, inclosed with hedges and rows of trees, and the soil in the highest state of cultivation. *Climate.* Remarkably healthy. *Rivers.* The chief are the Wye, Frome, Lug, Arrow, and Munnow. The inland navigation has not been much improved artificially. The soil of Herefordshire is everywhere of uncommon fertility, arising partly from the subsoil of limestone on which it chiefly rests: it is mostly clay, mixed with marl and calcareous matter. In some parts the limestone passes into variegated marble. *Pro.* Wheat and barley, apples, pears, and hops, all of excellent quality. The apple crop, which is larger than that of any other county, produces 20,000 hogsheads of superior cider. The cattle are held in the highest estimation, and the breed of sheep is also famous. *Minerals.* Red and yellow ochres, and tobacco-pipe clay. Fullers' earth is dug near Stoke, and iron-ore occurs on the borders of Gloucestershire. *Manf.* Unimportant. *Pop.* 115,849.

HERISAU, *her'-e-so*, a town of the canton of Appenzel, Switzerland, 10 miles from Appenzel. It has an arsenal, court-house, orphan-asylum, public library, and an ancient church-tower. The heights are traversed by fine public walks, and on the summits are the ruins of old castles. *Manf.* Cotton, linen, and muslins. *Pop.* 7,150.

HERISTAL, the House of, *hair'-is-tal*, whence sprang the Carlovingian dynasty. It was founded by Pepin the Young, lord of Heristal, steward of the palace under Thierry III., and afterwards duke of the Francs. (*See* FRANCE.)

HERITIER DE BRUTELLE, Charles Louis l', *hai-rit'-e-ai*, a French government official, who devoted himself to botanical researches. In 1786, Dombey having brought from Peru and Chili an inestimable collection of plants, L'Heritier undertook to publish a description of them, which was executed at London, under the title of "The Flora of Peru." On his return to Paris, he published a work with the singular title of "Flora of the Place Vendôme." He was assassinated in 1801, but his murderers were never discovered. B. 1745.

HERKIMER, *her'-ki-mer*, a county of New York, U.S., through which run the Erie Canal and the Utica and Schenectady Railway. *Pop.* 37,477.

HERMANGARDE, *her'-man-gard*, the name of several princesses during the middle ages.—1. The second wife of Charlemagne, daughter of Didier, king of the Lombards, who was divorced in 771, after being married a year.—2. The first wife of Louis le Debonnaire.—3. A queen of Provence.

HERMANNSTADT, *hair'-man-stat*, a town of Transylvania, situate in a picturesque valley on the Zibin, an affluent of the Aluta, 73 miles from Klausenburg. It is composed of an upper and a lower town, which communicate by flights of steps. The streets are spacious, and the houses handsome. It has a convent and monasteries, several churches, an orphan-hospital, a barracks, and theatre. *Manf.* Woollens, linens, hats, leather, paper, &c.; and a large trade is carried on, particularly with Turkey. *Pop.* 19,000. *Lat.* 45° 47' 4" N. *Lon.* 24° 4' 13" E.

HERMAS, *her'-mās* ('pastor,' or, 'the shepherd'), a father of the Church during the 1st century, who is said to be the same mentioned by St. Paul in his epistle to the Romans. He is supposed to have died at Rome, about the year 81. "The Shepherd," the work after which he is named, is still extant, and was translated into English by Archbishop Wake, in 1693.

HERMES, *her'-mees*, the Grecian name of Mercury, who was regarded as the god of speech and eloquence. (*See* MERCURY.)

HERMES TRISMEGISTUS, 'the thrice grand,' an Egyptian priest and philosopher, who instructed his countrymen in the cultivation of the olive, in language, writing, geometry, arithmetic, astronomy, and medicine. Many translations of his works have been published, but they are generally considered to be apocryphal.

HERMITAGE, *her'-mi-taj*, a celebrated French vine-

yard, on the banks of the Rhone, 10 miles from Valence, where the famous Hermitage wine is produced.

HERMOGENES, *her-moj'-e-nees*, of Tarsus, surnamed Xyster, a rhetorician, who, at 15 years of age, is said to have taught Greek oratory at Rome, and whose lectures had been attended by the emperor Marcus Aurelius. He wrote several works on oratory, which were edited and translated into Latin, by Heeren, in 1812. At 20 he is said to have become a lunatic, and to have lingered in this condition to an advanced age. Lived in the 2nd century.

HERNE BAY, *hern bai*, a watering-place in Kent, 8 miles from Canterbury, near the mouth of the Thames. It has a fine church, handsome houses, hotels, and baths. A pier 3,000 feet long runs out into the river. *Pop.* 2,000.

HERNHUT, *hairn'-hoot*, a village of Saxony, 12 miles from Zittau. *Manf.* Cotton goods, hats, knives, steel, tobacco, and sealing-wax. *Pop.* 1,500. It was founded in 1722 by Count Zinzendorf, who welcomed here the persecuted Moravians, who thence obtained the name of Hernhutters.

HERNOSAND, *hair'-no-sand*, a province in the north of Sweden, comprising the ancient provinces of Angermannland, Jemptland, and Medelpad. *Area*, 9,500 square miles. *Pop.* 85,875.

HERNOSAND, the capital of the above province, on the W. coast of the island of Hernö, in the Gulf of Bothnia, joined to the mainland by a bridge, 240 miles from Stockholm. It has an ancient church, gymnasium, and botanical garden. *Manf.* Flax, salt, deals; and it has fisheries. Shipbuilding is also carried on. *Pop.* 3,000.

HERO, NORTH and SOUTH, *he'-ro*, two islands in Lake Champlain, U.S., and forming together GRAND ISLAND.

HEROD, *her'-od*, the name of several Jewish princes.—HEROD THE GREAT was the son of Antipater, the Idumean, who appointed him governor of Galilee. Antony appointed him tetrarch, and Augustus made him king of the Jews. He governed with savage cruelty, and sacrificed his wife Mariamne, her grandfather Hyrcanus, and brother Aristobulus. At the birth of our Saviour he caused all the infants of Bethlehem to be massacred, in hopes that He would fall among the number. He also put to death his sons Alexander and Aristobulus, so that Augustus said "It was better to be Herod's hog than his son." He rebuilt the temple of Jerusalem, and, in a time of famine, sold his curiosities to relieve the sufferers. B. at Ascalon, in Judea, 70 B.C.; D. at the age of 70, in the same year as the birth of Jesus Christ.—HEROD ANTIPAS, the son of the above, succeeded his father as tetrarch of Galilee. He divorced his wife, the daughter of Aretas, king of Arabia, and espoused Herodias, the wife of his brother Philip, on which Aretas declared war against him. Herod sacrificed John the Baptist to the cruelty of Herodias, and his conduct occasioned the Jews to revolt. Being called to Rome to justify his conduct, he died on the road. This is the Herod to whom our Saviour was sent by Pilate.

HERODIAN, *he-ro'-di-ăn*, a Greek historian, who was a native of Alexandria, but lived the greatest part of his life at Rome. He wrote a Roman history in Greek, in eight books, which was edited by Bekker, and published at Berlin, 1826. Lived in the 3rd century.

HERODOTUS, *he-rod'-o-tus*, a celebrated Greek historian, surnamed "the Father of History," who in his youth, while his country was oppressed by the tyrant Lydamis, travelled in Greece, Africa, Asia, and Europe, gathering materials for his great work, and noting the manners and customs of the people whom he visited. On his return, he assisted in expelling the tyrant; but meeting with ingratitude from his countrymen, he retired into exile, and occupied himself with the composition of his great work. He is said to have read the commencement of it at the Olympic games, 456 B.C., when it was received with universal applause. His History is comprised in nine books, to which his countrymen, in their admiration, gave the names of the nine Muses. Its principal subject is the internal struggles of the Greeks; but he has introduced episodical narratives of the histories of the Persians, Medes, Egyptians, and other peoples. He is universally considered as the most reliable of all ancient historians, a love of the marvellous being his only drawback; his elegant and harmonious style approaches poetry. The principal editions of it are Larcher's French translation; the German translation by Lange; and the English reproduction of it by the Rev. H. Cary, published in Bohn's Classical Library. B. at Halicarnassus, 484 B.C.; D., it is uncertain when.

HEROPHILUS OF CHALCEDON, *he-rof'-i-lus*, an ancient physician, who was an accurate anatomist, and is said to have discovered the lacteal vessels. He was also a good botanist. Lived 570 B.C.

HERRERA, Ferdinand de, *hair-rai'-ra*, a celebrated Spanish poet, surnamed by his contemporaries "the Divine." He was a voluminous writer of songs, odes, elegies, &c. A collected edition of his works was published at Seville, in 1582. B. at Seville about 1516; D. about 1595.

HERRICK, Robert, *her'-rik*, a celebrated English poet, of whom very little is known, except that he was vicar of Dean Prior, in Devonshire, for twenty years, from which he was ejected by Cromwell, but reinstated by Charles II. He wrote sacred and amatory verses, displaying in both a luxuriant fancy, with an elegant quaintness. His poems were collected and published in 1648, under the title of "Hesperides," and have been since many times reprinted. B. 1591; D. 1674.

HERSCHEL, William, *hersh'-el*, a great astronomer, was the son of a clever musician of Hanover, and followed, for some time, the profession of his father. In 1759 he went to London, and, for several years, gained a scanty livelihood by giving lessons in his art. Becoming organist at Halifax in 1765, and of a chapel in Bath in 1766, his condition was much improved. In the latter place he began to turn his attention to astronomy, and attained to a considerable degree of proficiency in its pursuit. Being unable to purchase a telescope, he, in 1774, proceeded to make one for himself. After many disappointments, he at length succeeded in constructing a Newtonian telescope of five feet focal length. This instrument was a most valuable adjunct to his studies, and, in 1781, he announced his discovery of a comet, but which soon turned out to be a planet. This discovery made him famous, and he was appointed private astronomer to George III., at a salary of £400 a year. He removed to Slough, near Windsor, and henceforth his abode "became one of the remarkable spots of the civilized world." His labours were shared by his sister, Miss Caroline Herschel, who assisted him in his observations and calculations. After having finished more than one large instrument, he constructed the most powerful telescope then known, and, after four years' labour with these instruments, he made the most unexpected and important discoveries. A new planet,—Uranus, in 1781; its satellites in 1787; two new satellites of Saturn in 1789; the rotation of Saturn's ring, and that of Jupiter's satellites, are among the principal of his invaluable discoveries. More than seventy of his memoirs on astronomical subjects are contained in the Transactions of the Royal Society; and his papers on the construction of telescopes remain unsurpassed even at the present day. He became an F.R.S., and afterwards president of that learned body. He was also knighted, and received the degree of doctor of laws from the university of Oxford. B. at Hanover, 1738; D. 1822.

HERSCHEL, Caroline Lucretia, was sister of the above. She came to England in order to reside with her brother, while he was engaged as organist at Bath. From the first commencement of his astronomical pursuits, she attended him in both his daily and nightly studies. In the intervals of her labours under her brother's direction, she observed the heavenly bodies on her own account. She discovered seven comets, and, in 1798, published, with her brother, "A Catalogue of Stars, with a Correction of Flamsteed's Observations." On the decease of her brother, she returned to Hanover, where, for twenty years longer, she continued to labour at her scientific pursuits. The Royal Society voted her their gold medal, and she was also an honorary member of the same. She lived to the age of 98 years. B. at Hanover, 1750; D. 1848.

HERSCHEL, Sir John Frederick William, is the son and worthy inheritor of the fame of William. From his earliest years he was distinguished for his great mathematical powers, as well as his love for physical science. He became a B.A. of St. John's College, Cam-

bridge, in 1813; and, on the death of his father, continued in the path of discovery pointed out by him. In 1825 he commenced observing the heavenly bodies, with his father's instruments and after his method. This pursuit, in which he was assisted for some time by Sir James South (*see* Sir James South), lasted during eight years, and produced the most brilliant results. In his work, observations of 2,306 nebulæ and clusters are contained. The Royal Astronomical Society voted him its gold medal for his observations of the double stars. In 1830 he published a "Treatise on Sound," and a "Treatise on the Theory of Light," as well as the "Preliminary Discourse on the Study of Natural Philosophy," published in Lardner's Cyclopædia, for which series he also contributed his excellent treatise on Astronomy, in 1836. In 1834 he sailed for the Cape of Good Hope, in order to make observations of the southern heavens; and for four years, at his own expense, uninterruptedly watched the skies, and nine years after his return, he, in 1847, published the results of his labours. His honourable career has been appreciated by the learned men of all nations; the Royal Astronomical Society voted him, a second time, its gold medal; he has been made D.C.L. of Oxford; and, in 1848, he became president of the Royal Astronomical Society. His "Outlines of Astronomy," "Manual of Scientific Inquiry," have made the profound science he adorns popular with a large section of the reading public, and have been translated into most of the European languages. In 1850 he was made master of the mint, an appointment he was compelled to resign in 1855, on account of ill health. B. at Slough, near Windsor, 1790.

Herstal, or Heristal, *hair'-stal*, a town of the Netherlands, on the Maese, 3 miles from Liége. *Manf.* Iron and steel goods. *Pop.* 5,000.—It was formerly a strong place, and from it Pepin d'Heristal, the progenitor of Charlemagne, took his title.

Hertford, *har'-ford*, the capital of Hertfordshire, on the Lea, which is here navigable for barges, 21 miles from London. It contains a castle, two churches, several chapels, a sessions-house, town-hall for the quarter sessions and county courts, gaol and penitentiary-house, and market-house. Two and a half miles distant stands the East-India College, founded in 1806, to co-operate with the college at Calcutta in training young men for the Company's service. (Upon the change made in 1859 in the government of India, this college was suppressed.) It has also a preparatory school belonging to Christchurch Hospital, London, and a grammar-school. *Pop.* 6,605.—Hertford is a very ancient town; the castle was founded in 909, and some portions of it exhibit great antiquity. In the reign of John it was seized by the French dauphin, and, under Edward III., the kings of France and Scotland were secured in it.

Hertford, a county of N. Carolina, U.S. *Pop.* 7,484, nearly half of whom are slaves.

Hertfordshire, *har'-ford-sheer*, a midland county of England, bounded S. by Middlesex, N. by Cambridge and Bedford, E. by Essex, from which it is partly divided by the river Lea, and W. by Buckingham and Bedford. Its boundaries are chiefly artificial, and extremely irregular. *Area*, 611 square miles, or 391,141 acres. *Desc.* The soil of Hertfordshire is naturally barren; but its vicinity to the metropolis has contributed to fertilize and enrich it; so that it is a very considerable agricultural county, while the mildness and uncommon healthiness of the climate, with an agreeable diversity of surface, have made it a favourite county to reside in. A ridge of chalk hills skirts the northern boundary. It has an elevation of 800 or 900 feet above the level of the sea, and divides the waters of the Ouse on the north, from those which flow southward through the county to the Thames. *Rivers.* The principal are the Ouse, the Lea and its branches, the Maran, Beane, Rib, and part of the Stort; the Colne, Ver, and New River. The London and North-western Railway traverses the county, and the Grand Junction Canal passes through its southern extremity. The prevailing soils are loam and clay. *Pro.* Wheat, barley, oats, turnips, hay for the London market, in return for which manure is procured. The woodlands of Hertfordshire are extensive. Hertfordshire carries on a great trade in malt. *Manf.* Straw-plaiting and paper are the most considerable. *Pop.* 167,298.

Hertsberg, Ewald Frederick Von, *hairts'-bairg*, an eminent statesman, whose merit recommended him to a situation in the department of foreign affairs at Berlin, and he afterwards became secretary to the Prussian embassy at Vienna. The king made him counsellor of legation, in which capacity he distinguished himself as a profound politician. In 1752 his essay on the population of the Marche of Brandenburg obtained the prize from the Academy of Sciences at Berlin. He was employed to draw up every state paper and memorial of consequence, and was gradually advanced to the first offices in the kingdom, and to the rank of nobility. B. 1725; D. 1795.

Hervey, James, *her'-ve*, a writer of numerous popular books on theological subjects, with a Calvinistic leaning. In 1746 he published his "Meditations among the Tombs," and "Reflections in a Flower-Garden," which being well received, he added another volume. In 1755 appeared his "Theoron and Aspasia; or, Dialogues and Letters on Important Subjects," in 3 vols. 8vo, well written, but Calvinistic. The profits of his works, which were considerable, he applied to charitable purposes. B. 1714; D. 1758.

Herzen, Alexander, *hairts'-en*, an eminent Russian politician and political writer. After leaving the university of Moscow, in 1834, he was charged with having assisted at a seditious meeting of students, and, although he was not present at it, he was condemned, after some imprisonment, to banishment under surveillance at Viatka. On the death of his father, in 1846, he became possessed of considerable estates, and was granted leave to travel in 1848. In Italy, and afterwards in Paris, he openly expressed his republican ideas, and shared in the acts of his party at the latter place. Soon after, he found it expedient to take up his residence in England, where he has ever since remained, and where he has published his memoirs, under the title "My Exile," and has set up a journal in Russian, called "The Polar Star," in which the suppressed poems of the Russian poet Pushkin, as well as the opinions of the exiled republican leaders of the continent, are put forth to the northern world. B. at Moscow, 1812.

Hesdin, *hes'-di*, a strongly-fortified town of France, in the department of the Pas de Calais, beautifully situate on the Canche, 27 miles from Arras. *Manf.* Stockings, soap, and tanning. *Pop.* 3,450.—The modern town was founded by Charles V. of France, at some distance from the old one, which Philibert Emmanuel, general of the emperor, had taken the preceding year, and destroyed.

Hesiod, *he'-si od*, an ancient Greek poet, the date of whose works is uncertain; some placing them before, and others after Homer. He was the first who wrote on agriculture; his poems being entitled "The Works and Days." His "Theogony" is valuable as affording an account of the ancient mythology; his "Shield of Hercules" is only a fragment of a larger work. The best edition of Hesiod is that of Ruhnken, 1796; and his poems have been translated into English by Thomas Cooke. Lived in the 10th century B.C.

Hesione, *he-si'-o-ne*, daughter of Laomedon, king of Troy, and sister of Priam. Neptune, in his anger against her father for having failed in a promise towards him, sent a monster to ravage his country. The oracle consigned her, as an expiatory victim, to it; Hercules delivered her as she was about to be devoured by the monster; but not obtaining the reward promised by her father, he carried her off, and gave her in marriage to his friend Telamon. The abduction of Hesione became the Trojan pretext for the carrying off of Helen by Paris.

Hesperides, *hes-per'-i-dees*, the daughters of Atlas and Hesperis,—Eglea, Arethusa, and Hypeathea, who possessed a beautiful garden, filled with apples of gold, and guarded by a dragon with a hundred heads. Hercules, by order of Eurystheus, killed the dragon, and brought away the golden fruit. (*See* Hercules.)

Hesse, William, Prince of, *hes'-se*, celebrated as a patron of learning, and for his studies and observations, during many years, of the heavenly bodies. For this purpose he built an observatory at Cassel, and called to his assistance two scientific men, Rothman and Byrge. His observations were printed at Leyden in 1619. B. about 1545; D. 1597.

HESSE-CASSEL, or ELECTORAL HESSE, *hes'-se kas'-sel*, a district in the west of Germany, bounded by Hanover and Rhenish Prussia on the N.; by Prussian Saxony and Bavaria on the E.; by Frankfort, Bavaria, and Hesse-Darmstadt on the S.; and by Nassau, Hesse-Darmstadt, and Waldeck on the W. It is composed of six detached or isolated portions, of which Hesse proper is the largest, and is embraced within the above boundaries. The other two principal portions are Schmalkalden and Schaumburg. The others are Dorheim, Barchfield, and Katzenberg. *Area*, 4,350 square miles. *Desc.* In general the surface of the country is hilly, and even mountainous; and about three-fourths of it are covered with woods. *Rivers.* The Werra, the Fulda, the Diemel, the Maine, the Edder, the Schwalm, and the Lahn. *Pro.* Oats, wheat, maize, rye, barley, potatoes, lint, and tobacco. Fruit of every description is abundant, and the pasturage is good. Cattle-rearing, therefore, forms the most important branch of rural industry. *Minerals.* Abundant; copper, silver, iron, cobalt, salt, vitriol, alum, pitcoal, marble, and basalt, all enter into the long list of substances obtained from the bowels of the earth. Turf is also plentiful, and is mostly used for fuel. *Manf.* Considerable; they mostly consist of Osnaburgs, flannels, cotton and silk velvets, carpets, iron and steel goods, paper, pottery, beetroot-sugar, chemicals, wooden wares, and jewellery. *Rel.* Protestantism prevails. *Gov.* A constitutional monarchy. *Pop.* about 800,000. *Lat.* between 49° 50′ and 52° 20′ N. *Lon.* between 8° 25′ and 10° 8′ E.—At the close of 1813, the elector, who had been driven from his throne by Napoleon I., returned, and was acknowledged by the allied powers. In 1832, this state, with Hesse-Darmstadt, united with Prussia to form the German Customs Union.

HESSE-DARMSTADT, or the GRAND-DUCHY OF HESSE, *darm'-stat*, an extensive territory of Germany, lying to the W. and S. of Hesse-Cassel, by a part of which territory, and that of Frankfort-on-the-Main, it is divided into two nearly equal proportions. *Area*, 3,760 square miles. *Desc.* A large portion of the country, especially in the N., is mountainous; but along the banks of the Rhine, where extensive level tracts exist, great fertility appears. *Rivers.* The principal, after the Rhine and the Maine, are the Lahn, the Nidda, the Ohen, the Schwalm, and the Itter, all to the north of the Maine. *Pro.* Wheat, buckwheat, oats, millet, potatoes, fruit, flax, hemp, hops, and tobacco. The country is essentially agricultural, and cattle-rearing forms an important branch of rural industry. *Minerals.* Coal, iron, copper, and salt are the principal. In Dorheim the coal is mostly mined; in the Oldenwald and Upper Hesse, the iron; and at Wimpfen, the salt. *Manf.* Linen and hempen fabrics, silk, paper, hardware goods, and chemicals. *Rel.* Protestant. *Gov.* A constitutional monarchy, with two chambers. *Pop.* about 900,000. *Lat.* between 50° and 51° 45′ N. *Lon.* between 7° 50′ and 9° 30′ E.

HESSE-HOMBURG, LANDGRAVIATE OF, *hom'-boorg*, consists of two detached portions,—Meissenheim and Homburg, the former inclosed by Rhenish Prussia and Bavaria, and the latter lying between Hesse-Darmstadt and Nassau. *Area*, 200 square miles. *Desc.* Fertile; and the people greatly inclined to industry. The forests abound with excellent timber, and the vine is, in Meissenheim, extensively cultivated. *Minerals.* Iron and coal. *Gov.* A constitutional monarchy. *Pop.* 25,000.

HESSE, LOWER and UPPER, two adjoining provinces of the electorate of Hesse-Cassel, inclosed by the territories of Hesse-Darmstadt, Prussia, Hanover, and the Saxon duchies, and on the S.E. by the province of Fulda. *Area* of Lower Hesse, with Schaumburg, 2,000 square miles. *Pop.* 380,000.—*Area* of Upper Hesse, 880 square miles. *Pop.* 125,000.

HESSE, RHENISH, is the most S. province of Hesse-Darmstadt, and is one of the most fertile portions of Germany. *Area*, 530 square miles. *Pop.* 230,000.

HESSE, UPPER, the most N. province of Hesse-Darmstadt, has a mountainous surface, covered, to a great extent, with wood. *Area*, 1,540 square miles. *Pop.* 310,000.

HESTON, *hes'-ton*, a parish of Middlesex, near the Southall station of the Great Western Railway. *Area*, 3,720 acres. *Pop.* 5,500.

HETTON-LE-HOLE, *het'-ton*, a township of Durham, 6 miles from the city of Durham, with which it is connected by railway. *Pop.* 6,000.

HEVELIUS, John, *he-ve'-le-us*, an eminent astronomer, came of a distinguished family. He studied mathematics with great ardour, but devoted himself chiefly to astronomy, and built an observatory for the purpose of making accurate observations, the result of which he published in 1647, under the title of "Selenographia; or, a Description of the Moon;" to which he added the phases of the other planets, as observed by the telescope. This work was followed by many others, the most distinguished of which was his "Cometographia," published in 1668. Besides the above works, he was the author of "Uranographia," 1690, folio; "De Naturâ Saturni." B. 1611; D. at Dantzic, 1688.

HEVERSHAM, *hev'-er-sham*, a parish of Westmoreland, 6 miles from Kendal. *Pop.* 5,000.

HEWORTH, HIGH and LOW, *hu'-orth*, two townships of the county of Durham, 3 miles from Gateshead. The inhabitants are mostly employed in shipbuilding. *Pop.* 9,000.

HEXHAM, *hex'-ham*, a market-town of England, in Northumberland, situate a little below the junction of the North Tyne with the South, 21 miles from Newcastle. This town is chiefly remarkable for the antiquities with which it is surrounded, and the historical events connected with it. The neighbourhood abounds with ruined castles, monuments of battles and heroes; with Roman relics, altars, inscriptions, &c. The cathedral church of Hexham was founded in 674, and was destroyed by the Danes. Another was begun in the reign of Henry I., part of which still remains. Near this are also two stone towers, which appear to be of high antiquity. *Manf.* Coarse worsteds, hats, and "tan gloves." *Pop.* about 5,000.—In 1463, a battle was fought in the neighbourhood between the houses of York and Lancaster, in which the Yorkists gained the victory. As an interesting historical event, it may be remarked, that it was in flying from this field that Queen Margaret threw herself on the protection of a robber; and the cave in which she concealed herself is still pointed out.

HEYLYN, Peter, *hai'-lin*, a learned divine, who obtained a fellowship of Magdalen College, where he read cosmographical lectures. In 1621 he published his "Description of the World," which he afterwards enlarged under the title of "Cosmography." In 1628 he was appointed chaplain in ordinary to the king, and in 1631 obtained a prebend of Westminster, which was followed by the living of Houghton, in the diocese of Durham. In 1633 he took his degree of D.D. He obtained some other preferments, of which he was deprived by the parliament, and voted a delinquent; his goods were also confiscated, and his person endangered. At the Restoration he was restored to his prebend. He was a man of great abilities and uncommon industry. His principal works, besides the above, are, "The History of the Reformation in England:" "History of the Presbyterians;" "Life of Archbishop Laud." B. 1600; D. 1662.

HEYNE, Christian Gottlob, *hine*, a distinguished German classical scholar and critic, who published a number of valuable works illustrating ancient literature. He published copiously-annotated editions of Homer, Virgil, Tibullus, Pindar, &c., and contributed many valuable essays to the Transactions of the University of Gottingen, where he was professor of eloquence and poetry. B. at Chemnitz, Saxony, 1729; D. 1814.

HEYST-OP-DEN-BERG, *histe'-op-den-bairg*, a town on the Great Nethe, 17 miles from Antwerp. *Manf.* Chiefly linen goods; and it has a trade in hops. *Pop.* 7,000.

HEYTESBURY, *haits'-ber-e*, a town of Wiltshire, where the manufacture of woollen cloths was formerly carried on to a considerable extent; but it has greatly declined. *Pop.* 1,300.—The town stands on the borders of Salisbury Plain.

HEYWOOD, John, *hai'-wood*, one of the earliest English poets and dramatists. He is also said to have been well skilled in music, and as a player on the virginals. He was a great favourite with Henry VIII.

and Queen Mary, but on the accession of Elizabeth he went to Mechlin. One of his principal works is entitled "The Spider and the Fly, a Parable." B. about 1500; D. 1565.

HEYWOOD, Thomas, an actor and dramatic writer, who is said to have written 220 plays, of which only 24 are now extant, and those of little merit, except one, called "A Woman killed with Kindness." Lived in the 17th century.

HIDGELLEE. (*See* HIJELLEE.)

HIELMAR, *heel'-mar*, a lake in the central part of Sweden. It lies between the districts Nykoping, Orebro, and Westeras. On its N. side it has communication with Lake Maelar, and contains several islands. *Ext.* 40 miles long, by 14 broad.

HIERES, or HYERES, ISLES OF, *hi'-air*, a cluster of small islands in the Mediterranean, near the south coast of France, occupying a position in the front of the bay of the same name. They are fortified, but are mostly infertile and uncultivated. The principal of the group are Bagneau, Port Cross, Porquerolles, and Litan.

HIÈRES, or HYERES, a town of France, in the department of the Var, 9 miles from Toulon. The vicinity is marshy, and the air unhealthy. From a salt lake in the neighbourhood, a large quantity of salt is obtained, and exported; oil, wine, and fruit are also exported to Toulon and Marseilles. *Pop.* 10,000. *Lat.* 43° 7′ 2″ N. *Lon.* 6° 7′ 55″ E.—This is the birthplace of Massillon, the celebrated preacher.

HIERO I., *hi'-e-ro*, king of Syracuse, who rendered himself odious in the beginning of his reign by his cruelty and avarice. He made war against Theron, the tyrant of Agrigentum, and took Himera. D. 467 B.C., leaving the crown to his brother Thrasybulus.

HIERO II. was unanimously elected king by all the states of the island of Sicily, and appointed to carry on the war against the Carthaginians; but afterwards joining them in besieging Messina, was beaten by Appius Claudius, the Roman consul, and obliged to retire to Syracuse, where he was soon blocked up. Seeing all hopes of victory lost, he made peace with the enemies of his country, and proved faithful to all his engagements. He liberally patronized the learned, and employed the talents of Archimedes for the good of his country. D. 216 B.C.

HIEROCLES, *hi-er'-o-klees*, the name of several Greeks.—1. A professor of rhetoric at Alabanda, in Caria: he is said to have excelled in what Cicero called "the Asiatic" style of eloquence. Lived in the 1st century before the Christian era.—2. A writer on the veterinary art, of whose work three chapters have been preserved.—3. A Stoic philosopher, who is said to have flourished about the time of Hadrian.—4. A writer of a work, which, under the title of "Travelling Companion," gave a description of the provinces of the Eastern empire. This work was edited and printed by Wesseling, at Amsterdam, in 1735. He is supposed to have lived in the 6th century.—5. A persecutor of the Christians, who was president of Bithynia, and afterwards governor of Alexandria, where he committed numberless cruelties. He wrote some books against the Christians, mentioned by Lactantius and Eusebius. The remains of his writings were published by Bishop Pearson in 1654, with a curious discourse upon them. Lived in the 4th century.—6. An Alexandrine Platonic philosopher, who wrote seven books on Providence and Destiny, and a commentary on the Golden Verses of Pythagoras; the latter of which is extant, also fragments of the former. A book entitled "Asteia," ridiculing the works and manners of pedants, is sometimes attributed to him; but it is probably the work of another author of the same name. It was translated into English in 1741, and published in the "Gentleman's Magazine." Lived in the 5th century.

HIERONYMUS, *hi-e-ron'-i-mus*, a tyrant of Sicily, who rendered himself odious by his oppression and debauchery. He abjured the alliance of Rome, which Hiero had enjoyed with so much honour and advantage. He was assassinated, and all his family extirpated, 214 B.C.—A Christian writer, commonly called St. Jerome, born in Pannonia, distinguished for his zeal against heretics. He wrote Commentaries on the Prophets, St. Matthew's Gospel, &c. D. 420.

HIFFERMAN, Paul, *hif'-fer-man*, an Irish dramatist, who, after being educated for the practice of medicine in France, pursued that profession in Dublin for some time; but went to London in 1759, and commenced writing for the stage, and compiling works for booksellers. He met with little success as an author, and lived chiefly by contributions from the purses of his friends. B. at Dublin, 1719; D. 1777.

HIGGINS, John, *hig'-gins*, an English divine and schoolmaster, who lived at Winsham, near Ilminster, in Somersetshire. He published some school-books, a treatise on Christ's descent into hell, and part of the "Mirrour for Magistrates." B. about 1544. D. 1603.

HIGHAM FERRERS, *hi'-am fer'-rers*, an ancient market-town in Northamptonshire, 15 miles from Bedford. Its principal buildings are a church and almshouses. A castle, which formerly stood here, is now in ruins. *Pop.* 1,100. It is a station on the Peterborough branch of the London and North-western Railway.

HIGHGATE, *hi'-gait*, a populous village of Middlesex, 5 miles N.W. of London, and 450 feet higher than St. Paul's Cathedral. It has a spacious and beautiful cemetery. *Pop.* 4,500.—In this village the last days of Coleridge were passed, and his remains rest in the burial-ground of the old church.

HIGHLAND, *hi'-land*, a county of the United States, in the state of Ohio. *Area*, 468 square miles. *Pop.* 26,000. There is a town of the same name in the state of Indiana. *Pop.* 2,000.

HIGHLANDS, *hi'* or *he'-lands*, a natural division of Scotland, comprehending the mountainous part of the country to the north and north-west, in contradistinction to the Lowlands, which comprehend the south and south-east districts. (*See* SCOTLAND.)

HIGHLANDS, a district in N. America. (*See* ARCTIC HIGHLANDS.)

HIGHMORE, Joseph, *hi'-mor*, an English historical painter. He painted the portraits of several eminent persons, also a set of pictures, the subjects of which were taken from Richardson's "Pamela." At the foundation of the Royal Academy, he was chosen one of the professors. His best pictures are "Hagar and Ishmael," at the Foundling hospital; the "Finding of Moses;" and the "Good Samaritan." He was also eminent for his literary abilities, and published "A Critical Examination of the Two Paintings by Rubens, on the Ceiling of the Banqueting-house at Whitehall," &c.; "The Practice of Perspective on the Principles of Dr. Brooke Taylor;" "Observations on a Pamphlet entitled Christianity not founded on Argument;" and two volumes of Essays. B. in London, 1692; D. 1780.

HIGHWORTH, *hi'-werth*, a market-town in Wiltshire, 4 miles from Shrivenham station, on the Great Western Railway. It has an ancient Gothic church of the reign of Henry VI. *Pop.* 4,000, mostly employed in agricultural pursuits.

HIJELLEE, *hi-jel-le'*, capital of a district of the same name in Bengal, on an island near the western bank of the Hoogly, and the first town to be seen after entering that river, 50 miles from Calcutta. It has an extensive salt-manufactory belonging to government. The DISTRICT is inclosed by the Bay of Bengal, the Hoogly, Balasore, and Midnapore. *Area*, 1,000 square miles. *Desc.* Low and level, and abounding with swamps, which swarm with loathsome alligators. Little is known of the district; but turtles, crabs, oysters, and prawns are plentiful in the surrounding seas. *Prod.* Millet, rice, pulse, tobacco, potatoes, sugar-cane, and palms. The climate is humid and unhealthy.

HILAIRE, St., *he'-lair*, the name of numerous parishes and towns of France, none of them with a population above 5,000.

HILARION, *hi-lair'-e-on*, the founder of the monastic life in Palestine. He visited St. Anthony the anchorite in Egypt, and on his return to his own country, followed his example, and obtained a number of followers. B. 291; D. in the island of Cyprus in 371.

HILARY, St., *hil'-a-re*, a father of the Church in the 4th century, who embraced Christianity when far advanced in life. On being instructed in the principles of religion, he was baptized with his wife and daughter. In 355 he was made bishop of Poictiers, and the year following was sent by Constantius to defend Athanasius at the synod of Beziers against Saturninus, which he did with such zeal that Saturninus prevailed on the emperor to banish him to Phrygia, where he wrote his

books on the Trinity. He was also the author of a treatise on Synods. D. 367.

HILARY, a saint of the Roman calendar. He succeeded Honoratus in the bishopric of Arles, and presided in a council at Rome, in 441. His works are,—1. Homilies, under the name of Eusebius of Emesa; 2. "The Life of St. Honoratus;" 3. "Opuscula." B. 401; D. 449.

HILDBURGHAUSEN, SAXE, *hilt'-boorg-how-sen*, once a duchy of Germany, but now united to Saxe-Meiningen.

HILDBURGHAUSEN, a town of Central Germany, on the Werra, 20 miles from Coburg. It has a gymnasium, a Jews' school, and lunatic asylums. *Manf.* Papier mâché, woollen and linen cloths, dolls, and tobacco. *Pop.* about 5,000. Here, till 1826, when the line of Gotha became extinct, the dukes of Saxe-Hildburghausen used to reside. It was formerly the capital of the duchy of the same name.

HILDEBRAND, *hil'-de-brând*, king of the Lombards, ascended the throne in 736, and shared power with his uncle Luitprand; but his tyranny became insupportable to his subjects, who deposed him in 744, electing in his stead the duke of Frioul.

HILDESHEIM, *hil'-des-hime*, the most S. province into which the kingdom of Hanover is divided. *Area*, 680 square miles. *Desc.* Mountainous in some parts, being partially overrun with ramifications of the Harz. *Rivers.* The Innerste, an affluent of the Leine, which, in general, waters a fertile soil. *Pop.* 160,000.

HILDESHEIM, an old city of Hanover, and the chief town of the above province, near the river Innerste, and 20 miles from the town of Hanover, with which it is connected by railway. Its walls have been demolished, and converted into public promenades. The town is divided into old and new. The cathedral is a large Gothic building of the 11th century, with bronze gates 16 feet high, covered with bas-reliefs, and supposed to have originally supported an idol of the Saxons. There are numerous other churches, a consistory, a Lutheran college, schools, the council-house, the arsenal, the public stables, and the mint. *Manf.* Linen cloths and yarn; and it has large cattle-fairs. *Pop.* 15,000.

HILL, Aaron, *hil*, an English poet and dramatist. At the age of 15 he went to Constantinople to visit his relation, Lord Paget, who was ambassador there, and whom he accompanied to England, in 1703. He next travelled with Sir William Wentworth over Europe. In 1709 he became manager of Drury-lane Theatre, for which he wrote his "Elfrid; or, the Fair Inconstant." The following year he became manager of the Opera-house, and wrote the opera of "Rinaldo," the first for which Handel composed the music in England. About 1718 he published a poem, called "The Northern Star; or, a Panegyric on Peter the Great," for which the empress Catharine sent him a gold medal. B. in London, 1685; D. 1750.

HILL, Sir John, a voluminous English writer, who commenced life as an apothecary, in St. Martin's Lane. His first publication was a translation of Theophrastus' tract on Gems, which procuring him some reputation, he undertook a natural history, in 3 vols. folio. He afterwards became a general writer on almost all subjects. He published a supplement to Chambers's "Cyclopædia," and conducted a magazine, and a daily paper under the title of the "Inspector." At this time he obtained his degree of M.D. from Scotland, and set up as a vender of quack medicines. Under the patronage of the earl of Bute he commenced a voluminous work, called "The System of Botany," which he sent to the king of Sweden, who invested him with one of his orders of knighthood. Besides the above works, he wrote, among others, "Mrs. Glasse's Cookery," "A Review of the Works of the Royal Society," some novels, and a few farces. These last brought him into a controversy with Garrick, who wrote the following epigram on him:—

"For physic and farces, his equal there scarce is,
His farces are physic, his physic a farce is."

B. at Peterborough, 1716; D. 1775.

HILL, Sir Rowland, the distinguished author of the cheap postage system, and secretary to the Post-office. In early life he supported himself by teaching mathematics in his father's school and in private families at Birmingham. His talent for organization was displayed, even at this period, by his improvements in his father's academy, as well as in originating schemes of education. Hard work so shattered his weak health, that, in 1833, he retired from his scholastic duties. Shortly after, he was appointed secretary of the South-Australian commission. Early in 1837 he turned his attention to postal reform, and published a number of pamphlets upon the subject. From these, it will be sufficient to name one,—"State and Prospects of Penny Postage," in which he demanded that letters should be charged by weight and not by distance, and that a uniform tax of one penny on all letters of a certain weight should be imposed. In the same year, the House of Commons appointed a committee to examine his project, and this committee strongly recommended it, as eminently favourable to commerce, while it served as a valuable aid in developing the intellect of the lower classes. In the course of the following session, more than 10,000 petitions were presented to parliament, praying for a uniform rate of postage. In 1839 the penny postage system was adopted, and he was nominated to the task of directing its early growth. After many vexatious struggles with the officials, he retired in 1843, and received, in 1846, a testimonial of public gratitude, the sum of £1,300 being collected by subscription. The progress of postal communication became very rapid throughout the United Kingdom. In 1837 it rose to 75,000,000, which number, in 1842, was increased to upwards of 360,000,000. Mr. Hill was reinstated as secretary of the Post-office in 1847, where he has since unceasingly laboured to improve the organization of the establishment, and to perfect the postal system in the United Kingdom, and between the mother country and her colonies, as well as with foreign nations. B. 1795.

HILLAH, or HELLAH, *hil'-la*, a town of Asiatic Turkey, in the pashalic of Bagdad. It lies about 60 miles to the south of Bagdad, on the western bank of the river Euphrates, and on the borders of the great Syrian desert. The town is well built, and has an extensive and well-regulated bazar, several stately caravanserais built of Babylonian brick, and a number of coffee-houses. A quarter of the town is situate on the eastern bank, and is connected with the other by a bridge of boats, but is not nearly so considerable as the western quarter. The Euphrates enlarges considerably as it approaches Hillah, where it is about 200 paces wide, and is navigable for flat-bottomed vessels not exceeding fifty tons burden, during six months in the year. *Pop.* 10,000 or 12,000. In the neighbourhood of this place are the ruins of Babylon.

HILLIARD, Nicholas, *hil'-yard*, goldsmith and portrait-painter to Queen Elizabeth, whose miniature portraits were highly esteemed. He painted Mary, queen of Scots, and Queen Elizabeth several times. B. 1547; D. 1619.

HILLINGDON, *hil'-ling-don*, a parish of Middlesex, comprising the town of Uxbridge. *Pop.* 10,000.

HILLSBOROUGH, *hils'-bur-o*, a town of Ireland, in the county of Down, 20 miles from Belfast. It is of modern date, is neatly built, and has a magnificent church with a lofty spire. *Manf.* Principally linen. *Pop.* 1,500.

HILLSBOROUGH, the name of two counties in the United States.—1. In New Hampshire. *Area*, 844 square miles. *Pop.* 60,000.—2. In Florida, in the W. part of its peninsula. *Pop.* 3,000.—Also the name of several townships, none of them with a population above 4,500.

HIMALEH, or HIMALAYA MOUNTAINS, *him-a-lai'-ya*, a stupendous range, which separate Hindostan from Tibet and Tartary. (*See* ASIA and HINDOSTAN.)

HINCHINBROOK ISLAND, *hinch'-in-brook*, an island on the west coast of North America, in Prince William's Sound. *Lat.* 60° 24′ N. *Lon.* between 213° 50′ and 214° 24′ E.

HINCKLEY, *hink'-le*, a town of Leicestershire, 13 miles from Leicester. It is the head of a poor-law union, and has a church and several meeting-houses. *Manf.* Coarse cotton stockings, thread, and worsted. It is also noted for its fine ale. *Pop.* 7,300.

HIND, John Russell, *hinde*, an eminent modern astronomer, is the son of a Nottingham lace-manufacturer, who was among the first to introduce the Jacquard loom. His education was conducted with the view of

fitting him for commercial pursuits; but, from his earliest youth, he evinced a strong predilection for astronomical studies. In 1840 he was sent to London, where he became assistant to a civil engineer. His love for scientific pursuits, however, led him to apply to Professor Wheatstone for a situation more in accordance with the bent of his genius. Through the interest of this gentleman, he obtained a situation under Professor Airy in the Royal Observatory at Greenwich, where he remained for four years, making the best use of his time in studying the valuable astronomical works in the library, by which a solid foundation of scientific knowledge was obtained. In 1843 he was sent to Valentia, near Dublin, to settle the longitude of the place; and, in 1844, he left the Royal Observatory to take charge of Mr. Bishop's private observatory in Regent's Park; when, soon after his appointment, he became a member of the Royal Astronomical Society. Applying himself assiduously to the observation of the heavens, he has discovered, since his appointment, ten new planets—Iris, Flora, Victoria, Irene, Melpomene, Fortuna, Calliope, Thalia, Euterpe, and Urania; three comets, several stars, as well as having calculated the orbits of a number of planets and comets. He has been chosen member and correspondent of nearly all the great continental learned societies; has received the gold medal of the Royal Astronomical Society, besides being appointed its assistant secretary. The government has granted him a pension of £200 per year, and has appointed him superintendent of the Nautical Almanac. Besides his many valuable contributions to the Transactions of the Royal Astronomical, and other English and foreign societies, he has published a pamphlet "On the expected Return of the Great Comet of 1264 and 1556;" "An Astronomical Vocabulary; being an Explanation of the Terms in use among Astronomers at the present day;" "The Solar System," a description of the sun, moon, and planets; "An Account of all the Recent Discoveries;" "An Illustrated London Astronomy, for the use of Schools and Students;" in addition to several others, some calculated for the more learned in science, and others fitted for the popular exposition of that science in which he has laboured with so much industry and success. B. at Nottingham, May, 1823.

HINDERWELL, *hin'-der-wel*, a township of the North Riding of Yorkshire, 8 miles from Whitby. *Pop.* 1,947.

HINDLEY, *hinde'-le*, a township of Lancashire, 3 miles from Wigan. *Manf.* Chiefly cotton goods. *Pop.* 6,000.

HINDOEN, *hind'-o-en*, an island on the Norway coast of the Loffoden group. It has productive fisheries. *Ext.* 50 miles long, with a mean breadth of 30.

HINDON, *hin'-don*, a river of Hindostan, which, after a course of 160 miles, joins the Jumna, in *lat.* 28° 25′ N.; *lon.* 77° 30′ E.

HINDOO COOSH, *hin-doo koosh*, a mountain-chain of Central Asia. (*See* ASIA.)

HINDOOR, *hin'-door*, a hill state of India, on the S.W. declivity of the Himalaya Mountains. It is inclosed by Kuhloor, Bahgul, Muhlog, and Sirhind. *Area*, 230 square miles. *Desc.* It is traversed throughout by a range of steep hills, and is drained by the Gumber and the Sursa. Its soil is, in general, fertile, yielding rice, millet, barley, wheat, opium, cotton, hemp, and tobacco. *Pop.* about 20,000.

HINDOSTAN, *hin'-do-stân*, the 'country of the Blacks' (from *hindoo*, 'black,' and *stan*, 'country'), is an extensive region of Asia, bounded on the N. by Tibet, W. by Afghanistan and the Indian Ocean, S. by the Indian Ocean, and E. by the Bay of Bengal and the Eastern Peninsula. *Ext.* Its extreme breadth, reckoning from the northern boundary of Cashmere to Cape Comorin, is about 1,800 miles long, by about 1,600 broad. *Area.* Variously estimated from 1,160,000 to about 1,280,000 square miles. *Divisions.* This country must be considered under the three grand divisions of Hindostan Proper, or N. Hindostan; the Deccan, or Central Hindostan; and the Peninsula. Hindostan Proper includes all the provinces that lie to the N. of the river Nerbudda, inclusive of Bahar and Bengal. The principal of these are Agmere, or Rajpootana, Agra, Cashmere, Delhi, Gujerat, Lahore, Malwa, Mooltan, Oude, Rohilcund, Sinde, Allahabad, Nepaul, Cutch, Kumaon, and Gurhwal. The Deccan has been extended to the whole region S. of Hindostan Proper; but, in its most proper sense, it means only the countries situate between Hindostan Proper, the Carnatic, the Western Sea, and Orissa. Its chief provinces are Candeish, Aurungabad, Berar, Beeder, Hyderabad, Gundwana, Orissa, the Northern Circars, and a part of Bejapoor. The tract S. of these, or the river Kistna, is generally called the Peninsula, although its form is far from justifying that appellation. Its chief provinces are Canara, a part of Bejapoor, Balaghaut, Salem, Mysore, Malabar, Coimbatoor, Travancore, Madura, and the Carnatic. Since the conquest of Hindostan by Europeans, most, if not all, of these subdivisions have undergone further change, and the whole of the country, with the exception of Nepaul, is now included in the British presidencies. *Islands.* Ceylon, Maldives, Laccadives, Nicobar, and the Andamans. *Gulfs.* Cutch, Cambay, Manaar, and the Bay of Bengal. *Cape.* Comorin. *General Desc.* Much which specially applies to this country has already been described under the articles ASIA and others connected with that continent. It will here, therefore, be necessary only to indicate, in as brief and comprehensive a form as possible, the more prominent features and general characteristics of the region. In the N. the Himalaya Mountains present a stupendous frontier; the Ghauts, on the E. and W., form an extended and steep barrier parallel to each coast; while the central chain of the Vindhyas follows the course of the Nerbudda. A series of craggy mountains reaches to Sutta from the confines of Mooltan, and a series of sandy hills from Cutch to the Sutlej. The province of Scinde is, in many parts, covered with immense deserts of sand; and in Delhi, between Rooderpore and Almora, there is another desert, 20 miles in extent. In the northern provinces there are many savannahs, and marshes generally occur at the mouths of the rivers. With all these defects, however, Hindostan possesses many charms, being in numerous parts adorned with luxuriant harvests, which are gathered twice in the year. *Rivers.* The principal are the Indus, Jumna, Ganges, Gogra. Brahmapootra, Soane, Nerbuddah, Taptee, Godavery, Kistna, Hoogly, and Sutlej. *Climate.* With the exception of the provinces of Cashmere, Kumaon, and Nepaul, where the seasons occur in their more agreeable vicissitudes, the climate is diversified only by dry and rainy months. These changes are caused by the monsoons, which happen regularly at different periods of the year on the opposite coasts of Malabar and Coromandel. *Zoology.* Elephants, camels, horses, oxen, buffaloes, sheep, deer, lions, tigers, and all kinds of wild beasts and game. The sheep have hair instead of wool, and the cattle are distinguished by a hunch on the shoulders. There is a great plenty of fish and fowl. Serpents, scorpions, mosquitoes, locusts, and monkeys also abound. *Pro.* Indigo, cotton, opium, sugar, millet, barley, and maize. In fruits, the principal are the palm, cocoanut, tamarind, guava, mango, plantain, pineapple, orange, lemon, pomegranate, and the melon. These arrive at the greatest perfection. Rice and wheat are grown in immense quantities; and although in Bengal the former constitutes the principal article of diet to the inhabitants, this is not the case generally throughout the country. Pepper, spices, and almost every kind of garden vegetables are produced. *Minerals.* Diamonds, rubies, amethysts, and other precious stones. These are found in various provinces; but the diamonds of Orissa and Golconda are the most celebrated. *Manf.* These principally consist of muslins, calicoes, and silks. In working in ivory and metals, the Hindoos especially excel. *Inhabitants.* As it might be expected in a country of such extent, inhabitants of various complexions, manners, and religions would be comprised. In the northern parts, which are possessed chiefly by Mahometans, the people are white or swarthy; towards the south, and the middle parts, through the country, they are quite black; whilst along the sea-coasts, in general, they are of an olive complexion. Many of their institutions are remarkably singular, especially those of the natives. These may be divided into two classes,—the Hindoos and the Mussulmans; the former being the legitimate descendants of the aborigines, and the latter the offspring of the successive generations of Mahomedan conquerors. In addition to these great classes, of which the Hindoos are in the proportion of four to

one of the Mussulmans, many other tribes have established themselves in the country, originally as traders, or have found shelter there from foreign persecution, and are now become part and parcel of the gross population. Such are the Parsees, descendants of the ancient Guebres, or fire-worshippers; the Armenians, formerly refugees from Persian persecution; the Arabs, Jews, Persians, chiefly traders from the Red Sea and Persian Gulf; the Portuguese, coloured descendants of the early conquerors; the Eurasians, or offspring of English, Dutch, French, and Danish connection with the Hindoo, Mussulman, or Portuguese females; the Chinese, settlers; Burmese, chiefly employed in menial pursuits; Seikhs and Afghans, merchants from the neighbouring states; the English, soldiers, civil officers, merchants, and agriculturists; with a few Americans and others from the Western world. *Rel.* Idolatry; but the greater proportion of the Hindoos are separated into four great castes, or religious divisions, —Brahmins, Rajpoots, Vaisyas, and Soodras. To the Brahmins are intrusted the performance of religious ceremonies and the instruction of the people; the Rajpoots are of royal and military descent; the Vaisyas or Banians are the trading classes; and the Soodras comprehend the labourers and artificers. These four castes are subdivided into an infinite number of smaller tribes or sects, with a fifth great class called Pariahs, or Chandalas, which comprehends all who have violated some leading principle in the religion of the other four, and all who follow the lowest professions in the scale of Indian society. The Mussulmans, who are for the most part traders, soldiers, police officers, menial servants, seamen, &c., profess the religion of Mahomet. All the other races in India adhere to the religion of their ancestors, the most perfect toleration being extended by the government to every persuasion. The sacred writings called the "Vedas" are written in the present language of Hindostan,—the Sanskrit. The temples are called pagodas, and are sometimes of immense size. *Army.* Uncertain at present, perhaps 300,000. *Gov.* Transferred in 1858, after the mutiny of the sepoys, from the hands of the East-India Company to a responsible minister of the British crown. *Pop.* Variously estimated at from 140,000,000 to 160,000,000. *Lat.* between 8° 4′ and 35° *N.* *Lon.* between 67° 30′ and 91° E. (*See* AGRA, ASIA, INDIA, and other articles relative to HINDOSTAN.)

HINDS, *hindes*, a county of the United States, in Mississippi. *Area*, 850 square miles. *Pop.* 30,000, of whom more than half are slaves.

HINGHAM, *hing'-ham*, a post township of the United States, in Massachusetts, 14 miles from Boston. It contains several churches, and a well-endowed academy. *Pop.* 4,000, chiefly engaged in fisheries.

HINIESTA, *he'-ne-ais'-ta*, a town of Spain, 50 miles from Cuarca. *Manf.* Woollen fabrics. In its neighbourhood there are some jasper-quarries.

HINOJOSA, *he'-no-ho'-sa*, a town of Spain, in Cordova, 38 miles from the town of that name. It has several convents and hospitals. *Manf.* Woollens. *Pop.* 8,000.

HINSDALE, *hainz'-dail*, several townships of the United States, none of them with a population above 2,000.

HINTON, *hin'-ton*, the name of several parishes in England, none of them with a population above 5,000.

HIPPARCHUS, *hip-par'-kus*, son of Pisistratus, tyrant of Athens, after whose death, 528 B.C., he reigned with his brother Hippias; both of whom had a great love of letters, and protected learned men. Hipparchus was slain by Harmodius. Hippias reigned tyrannically about three years after his brother's death, and was then expelled. D. 513 B.C.

HIPPARCHUS, a celebrated Greek astronomer, and father of the modern system, who was the first to reduce astronomy to a regular science; and whose catalogue of stars is still preserved in Ptolemy's "Almagest." He foretold the course of the sun and moon for 600 years, calculated according to the different manners of reckoning the months, days, and hours, in use among several nations, and for the different situations of places. He also formed the lunar period which bore his name; invented the planisphere, or method of describing the stars upon a plane; and was the first to mark the positions of places upon the earth in the same manner as that of the stars, by circles drawn from the poles perpendicularly to the equator, in other words, by latitudes and longitudes; he was also the author of the projection by which maps of the world and the best geographical maps are made. Lived between 160 and 125 B.C.

HIPPERHOLME, *hip'-per-home*, a town of the West Riding of Yorkshire, 2½ miles from Halifax. *Pop.* 6,300. It is a station on the Leeds and Manchester Railway.

HIPPIAS, *hip'-pi-ăs*, a philosopher of Elis, who maintained that virtue consisted in not being in want of the assistance of men.—A son of Pisistratus, who became tyrant of Athens, after the death of his father, with his brother Hipparchus. He wished to revenge the death of his brother, who had been assassinated, but was driven from his country. He fled to King Darius in Persia, and was killed at the battle of Marathon, fighting against the Athenians, 490 B.C.

HIPPOCRATES, *hip-pok'-ra-tees*, the father of medical science, who flourished during the epoch of the Peloponnesian war, and before whose time the art of healing consisted of mystical jugglerics and superstitious practices, pursued by the priests as a source of profit. He was born of a family called the Asclepiadæ, who for 300 years had followed the pursuit of medicine. He taught the necessity of closely observing the signs of diseases, and prescribed only the most simple remedies; always insisting that the physician should follow nature. He is said to have been the first to recognize the value of diet as an adjunct to the physician in the treatment of disease, and wrote a treatise on the subject; he practised both as physician and surgeon; but, owing to the great respect paid to the remains of the dead among the Greeks, he had few opportunities to study anatomy, of which he is said to have possessed but a scanty amount of knowledge. A large number of medical works are attributed to him; but it is believed that many are the composition of some other members of his family. The most valuable of his treatises are essays on Air, Water, Locality, Epidemics, Wounds of the Head, and Diet in Acute Diseases; all of which have been edited, translated, and annotated by the most learned men in modern times. A complete edition of his seventy-two essays has been published in Germany. B. at Cos, 460 B.C.; D. about 361 B.C.

HIPPOCRENE, *hip'-po-kre'-ne*, a fountain of Bœotia, near Mount Helicon, sacred to the Muses. It first rose from the ground when struck by the feet of the horse Pegasus, whence the name *hippou krene*, 'the horse's fountain.'

HIPPODAME, and HIPPODAMIA, *hip-pod'-a-me*, a daughter of Œnomaus, king of Pisa, in Elis, married Pelops, son of Tantalus. Her father, according to an oracle, refused to marry her except to one who could overcome him in a chariot-race. As the beauty of Hippodamia was celebrated, many accepted her father's conditions. Thirteen had already been conquered, and laid down their lives, when Pelops came from Lydia. He previously bribed Myrtilus, the charioteer of Œnomaus, and insured himself the victory. Œnomaus, mounted on a broken chariot, was killed in the course, and Pelops married Hippodamia, who became mother of Atreus and Thyestes.

HIPPOLYTE, *hip-pol'-i-te*, a queen of the Amazons, given in marriage to Theseus by Hercules, who had conquered her, and taken away her girdle by order of Eurystheus. She had a son by Theseus, called Hippolytus. (*See* HERCULES.)

HIPPOLYTE, ST., *hip'-po-leet*, the name of several towns and parishes in France, none of them with a population above 6,000.

HIPPOLYTUS, *hip-pol'-i-tus*, a son of Theseus and Hippolyte, famous for his continence. His stepmother, Phædra, fell in love with him, and when he refused to pollute his father's bed, she accused him of offering violence to her person before Theseus, who, believing the accusation, entreated Neptune to punish his son. Hippolytus fled from the resentment of his father, and, as he pursued his way along the seashore, his horses were so frightened at the noise of sea-calves, which Neptune had purposely sent there, that they ran about the rocks till his chariot was broken, and his body torn to pieces. Upon this myth, Euripides founded his play entitled "Hippolytus."

HIPPOLYTUS, a bishop and father of the Church,

chiefly remarkable as the presumed author of a work on "Heresies," hitherto attributed to Origen. The Chevalier Bunsen, a few years since, wrote a work called "Hippolytus," in which, while giving the arguments on both sides, he pronounced himself an advocate for the claims of Hippolytus to the authorship of the work in question. Lived during the 3rd century.

HIPPONA, *hip-po'-na*, a goddess who presided over horses. Her statues were placed in horses' stables.

HIPPONAX, *hip-po'-nax*, a Greek satirical poet, of whose writings only a few fragments remain. He was so deformed that two sculptors made ridiculous representations of him, for which he retaliated upon them with such severity in his satires, that they are said to have hanged themselves. B. 540 B.C.

HIRAM, *hi'-ram*, king of Tyre, the friend of David and Solomon, the latter of whom he greatly assisted in the building of the temple, by furnishing him with timber, gold, and silver, also with able workmen. The letters that passed between these two monarchs on this occasion are extant. He died 1000 B.C., after reigning 60 years.

HIRAM, a Tyrian architect, who was sent by the above to Jerusalem to superintend the building of Solomon's temple, which he performed in an admirable manner. A tradition says that he was killed by some of his fellow-workmen. Lived about 1032 B.C.

HIRE, Philip de la, *heer*, a celebrated mathematician, who, after studying painting under his father, having a turn for mathematics, quitted that profession and went to Italy, where he applied himself diligently to his favourite science. On his return to France, he was made a member of the Academy of Sciences, and employed by Colbert in constructing the great map of the kingdom, with Picard and Cassini. His principal works are, "Treatise on Mechanics," "New Method of Geometry," and an essay on "Conic Sections." B. at Paris, 1640; D. 1711.

HIRSCHBERG, *heersh'-bairg*, a well-built town of Prussian Silesia, in the principality of Jauer, at the confluence of the Bober and the Zacke, 28 miles from Liegnitz. It carries on a trade in linen and lawn; it has also some woollen manufactures. *Pop.* 8,000.

HIRSCHBERG, a town of Saxony, in the county of Reuss, on the Saale, 9 miles from Lobenstein. *Pop.* 1,800.

HIRSON, *heer'-sawng*, a town of France, in the department of the Aisne, on the Oise, 12 miles from Virvins. *Pop.* 3,500.

HIRSOWA, *heer'-so-wa*, a fortified town of European Turkey, on the Danube, 64 miles from Ismail. *Pop.* 4,000.

HISPANIOLA, or SAN DOMINGO. (*See* SAN DOMINGO.)

HIT, *hit*, a town of Asiatic Turkey, 140 miles from Hillah. It consists of about 170 clay-built houses, and is remarkable for the bitumen and naphtha in its neighbourhood.

HITCHIN, *hitch'-in*, a well-built market-town of Hertford, 16 miles from Bedford. It carries on a trade in malt. The church is a handsome structure of stone, and there are several meeting-houses, a free and a charity school, and almshouses. *Pop.* 7,500.

HITTEROE, *hit'-te-ro*, an island on the coast of Drontheim, in Norway. *Ext.* 30 miles long, by 10 broad. *Pop.* about 4,000, including several small adjacent islands, mostly employed in fishing.

HOADLEY, Benjamin, *hode'-le*, a celebrated English bishop, who was educated at Catherine Hall, Cambridge, of which he became fellow. In 1706, he commenced his polemical career by remarks on one of Dr. Atterbury's funeral sermons; and in 1708 he answered another sermon of the same author, on the power of charity to cover sin. The year following, he had another controversy with Atterbury on the doctrine of non-resistance, which recommended Hoadley to the notice of the House of Commons, who prayed the queen to bestow preferment on him. On the accession of George I. he was made bishop of Bangor, which see he never visited, but continued in London, preaching and publishing political sermons. One of these, on the spiritual kingdom of Christ, produced a violent dispute called the Bangorian controversy. He was afterwards engaged in a contest with Dr. Hare on the nature of prayer. From Bangor he was removed to Hereford, thence to Salisbury, and lastly to Winchester. In 1735 he made an attack on the orthodox faith, in his "Plain Account of the Lord's Supper," which he treated as a matter of mere indifference. This excited another considerable controversy. A complete edition of his works has been published in 4 vols. folio. B. at Westerham, Kent, 1676; D. 1761.

HOANGHO, or YELLOW RIVER, *ho-ang-ho*, a great river of China, and one of the most prominent features in the geography of that vast empire. It rises near *lat.* 34° N.; *lon.* 98° E. Though broad and rapid, it is in many places so shallow as to be unfavourable for navigation. It is also liable to overflow its banks, so that it has been necessary, in many places, to raise dykes for the defence of the surrounding country. Its length is estimated at about 2,000 miles.

HOBART TOWN, *ho'-bart town*, the capital town of Tasmania, on the Derwent. It is the seat of the governor, and has several public schools. *Pop.* Unascertained. *Lat.* 42° 53′ S. *Lon.* 157° 26′ E.

HOBBES, Thomas, *hobs*, a celebrated English philosopher, who received his education at Magdalen Hall, Oxford. In 1608 he became tutor to a son of the earl of Devonshire, with whom he made the tour of Europe. On the death of his patron and pupil, he became travelling tutor to a young gentleman, but the countess dowager of Devonshire recalled him into her family to take upon him the education of the young earl. In 1634 he reprinted his translation of Thucydides, the first edition of which appeared in 1628. The same year he attended the earl on his travels, and at Pisa contracted an intimacy with Galileo. In 1642 he printed his book, "De Cive," which procured him many enemies by its dangerous principles. Soon after this he was appointed mathematical tutor to the prince of Wales. In 1650 appeared, in English, his book on Human Nature; and one, "De Corpore Politico; or, the Elements of Law." The next year he published his famous book, entitled "Leviathan," which is full of paradoxical doctrines. At the Restoration he received a pension of £100 per annum, he having formerly supported the royalist cause with great zeal; but in 1665 the parliament passed a censure on his writings, which greatly alarmed him. Hobbes maintained the propriety of making use of bad means to procure a good end; which he thus illustrated: "If I were cast into a deep pit, and the devil should put down his cloven foot, I would readily lay hold of it to get out." Besides the above works, he published "The Wonders of the Peak," a poem; a translation of Homer; "Elements of Philosophy;" "Letter on Liberty and Necessity;" "Six Lessons to the Professors of the Mathematics;" "Marks of absurd Geometry;" &c. B. at Malmesbury, 1588; D. 1679.

HOBHOUSE, John Cam, Baron Broughton, *hob'-house*, a distinguished English politician and writer of books of travel. After receiving his education at Cambridge, he, in 1809, travelled in the East, and on his return, in 1812, published a work called "A Journey into Albania and other Provinces of the Turkish Empire." Lord Byron dedicated the fourth canto of "Childe Harold" to him about the same time. He was in France during the Hundred Days, and, after the battle of Waterloo, wrote "The Letters of an Englishman," in which he declared himself a supporter of the emperor Napoleon. Mainly through the rancour of his political opponents, he was incarcerated in gaol for four years; but this was the means of his attaining to a considerable degree of popularity. He became a member of the House of Commons in 1820, and, at the same time, assisted several members of the Radical party in establishing the "Westminster Review," wherein he opposed, in the most forcible manner, the Tory party under Canning. Becoming more moderate in his political views, he was, in 1831, appointed secretary of state for war in the cabinet of Earl Grey, and, in 1833, secretary of state for Ireland; but, in the same year, lost his seat in the House of Commons, through an inconsistent vote. In 1834 he was elected M.P. for Nottingham. On the accession to power of the Whig party, headed by Lord John Russell, in 1846, he became president of the India Board of Control, in which important office he remained till 1851, when he was again unseated through his change of political opinions. In the same year he was created a peer, under the title of Baron Broughton of Gyford. After a short ministerial career,

as a member of the coalition ministry of 1853, he retired into private life. B. 1786.

HOCHE, Lazarus, *hosh*, general of the French republican army, was the son of an hostler. Being deprived of his father while a child, the rector of St. Germain-en-Laye took him under his care and made him a chorister, after which he became a groom in the royal stables. At the age of 16 he entered the army, and became a corporal in the grenadiers. Soon after the breaking out of the Revolution, he obtained a commission, and distinguished himself in several engagements. During the tyranny of Robespierre, he was confined in the Conciergerie several months; but the Thermidorean revolution set him at liberty. He drove the Austrians out of Alsace, and being sent against the royalists at Quiberon, he acted with great cruelty, and put to death the brave Charette. Soon afterwards, he commanded the forces sent to Ireland, but returned in disgrace. He next had the command of the army of the Sambre and Meuse, with which he defeated the Austrians on the Rhine; but, after a short illness, he died, in 1797, suspected of being poisoned. B. near Versailles, 1768.

HOCHHEIM, *hoke'-heim*, a town of Germany, 4 miles from Mentz. It stands on a hill sloping to the Main, on which are the vineyards producing the true hock, a name improperly given to Rhenish wines generally.

HOCHSTADT, *hoke'-stat*, a town of Franconia, on the Aisch, 15 miles from Bamberg. *Pop.* 1,500.

HOCHSTADT, a town of the Bavarian states, at the influx of the small river Egwied into the Danube, 20 miles from Augsburg. It is noted for the defeat of the French and Bavarians by the duke of Marlborough and Prince Eugene. The action took place between this town and Blenheim, in 1704. *Pop.* 2,500.—The name of several small towns in Germany.

HOEI, *ho'-i*, the name of a number of towns and cities of the Chinese empire.

HOEL I., *ho'-el*, duke of Brittany in 509, who, driven by Clovis from his estates, became an exile in England; but returned in 513, and obtained possession of his domains by force. D. 545.—II. Son and successor of the above, was killed by his brother Canor, while hunting, in 547.

HOF, HOFF, or STADT ZUM HOF, *hof*, a town of Franconia, on the Saale, 30 miles from Bayreuth. It has manufactures of woollens, cotton, and leather; also extensive breweries. *Pop.* 8,300.—The name, also, of several other small German towns.

HOFER, Andrew, *ho'-fer*, a distinguished Tyrolese patriot, and leader of his countrymen against the Bavarian and French invaders of the Tyrolese mountains. When the treaty of Presburg was signed, by which Napoleon I. transferred the Tyrol to his allies the Bavarians, Hofer was a rich innkeeper and dealer in cattle and wine. By his great natural eloquence and the exercise of his power as a wealthy citizen, Hofer stirred his countrymen into a revolt against the Bavarians and French. The mountaineers were assisted by an Austrian army of 10,000 men, and in the spring of 1809 fell upon the advancing columns of the Bavarians, while marching through the narrow defiles, defeated them with great slaughter, and recovered every fortress in the Tyrol from the enemy. Upon this, Napoleon sent three armies against the mountaineers, one of which defeated the Tyrolese, and put a large number of the inhabitants, male and female, to death. But in May, 1809, Hofer led his countrymen against the Bavarian army, defeated it, and once more set his country free. The Austrians were, however, compelled to evacuate the country a few months later; whereupon he and his countrymen were left alone in the struggle, and at the outset the invaders were victorious; but after several desperate engagements, the Tyrolese were at length successful against the French, from whom they captured 25 pieces of cannon. On the 12th of August, 1809, Marshal Lefebvre, with an army of 23,000 French and Bavarians, and 2,000 cavalry, was defeated by 18,000 armed Tyrolese in a battle which lasted from five in the morning until midnight; thus freeing their native land a third time. Hofer was now proclaimed the head of the province; but his power lasted only a short time; for in October of the same year, an army of 50,000 French and Bavarians, all veteran troops, was marched against him; whereupon he was compelled to seek refuge in the mountains, where he was betrayed by a false friend, a priest named Douay. He was taken and conveyed to Mantua, where, after a trial by court-martial, he was condemned to be shot. In his short, but exceedingly brilliant career, which lasted less than one year, he thrice delivered his country; and for his services the emperor of Austria pensioned his widow and family, created his son a noble, and raised a fine marble statue to his memory in the cathedral of Innsbrück. B. at St. Leonard, in the Tyrol, 1767; shot at Mantua, 1810.

HOFFMAN, *hofe'-man*, Charles Fenno, an American poet and novelist, who, after leaving Columbia College, was called to the bar at New York, where he practised during three years; but, compelled by the state of his health to travel in the prairies, he published, in 1834, a record of his wanderings, under the title of "A Winter in the West," which obtained a considerable share of popularity. This was followed by "Wild Scenes in the Forest and Prairie," in 1837, and the romance of "Greyslaer," in 1840. He had also been one of the founders of the "Knickerbocker Magazine;" but soon retired from its direction. From the above period to the present time he has been one of the most active and successful contributors to the American magazines, for one of which,—"The American Monthly," he wrote his novel of "Vanderlyn." In 1842 he published a collected edition of his poems, under the title of "A Vigil of Faith, and other Poems." For nearly two years he was at the head of the "Literary World," in which he wrote his sketches and essays, under the title of "Sketches of Society." An unfortunate attack of mental alienation, in 1849, suddenly stopped his brilliant career, during which, save for his love of the horrible and repulsive, he might have claimed the first rank among American novelists. B. at New York, 1806.

HOFFMAN, Maurice, an eminent physician, who took his doctor's degree at Padua in 1648; he was made professor of anatomy and surgery at Altdorf, and, the year following, professor of physic. In 1653 he obtained the professorship of botany, to which was added the direction of the physic-garden. He is author of several works on medical botany. B. 1622; D. 1698.

HOFFMAN, John Maurice, son of the above, studied under his father, and, in 1674, took his doctor's degree. In 1681 he was chosen professor of physic. He was also appointed physician to the margrave of Anspach, and, on the death of his father, he succeeded him. B. 1653; D. 1727.

HOFFMAN, Frederick, a celebrated physician, who was chosen professor of physic at Halle, in 1693, which situation he retained till his death. His works, under the title of "A Complete System of Medicine," have been published at Geneva, in 6 vols. B. at Halle, 1660; D. 1742.

HOFFMAN, John James, professor of Greek at Basle, who is known as the author of a work of great labour and value,—"A Universal Historical Dictionary," in Latin, published first in 2 vols. folio, and afterwards enlarged to 4 vols. He also wrote a History of the Popes, in Latin. B. 1635; D. 1706.

HOFFMANN, Augustus Henry, of Fallersleben, a popular German poet, the son of a burgomaster at Fallersleben, who published, in 1820, "The Fragments of Otfried." In the same year, he undertook a journey along the banks of the Rhine and in Holland, with the view of collecting the scattered fragments of the popular poetry of the middle ages. In 1823 he was appointed conservator of the Breslau University library, and soon afterwards published his "Unpolitical Songs," which caused him to become very popular. He has written songs for children, for workmen, and for peasants; indeed, as a poet, he may be said to write only for the simplest among his countrymen. He has also contributed a number of very valuable philological articles to the best periodicals in Germany. B. 1798.

HOG ISLAND, *hog*, one of the smaller Shetland islands.—The name, also, of several small islands on the coast of North Carolina, Virginia, Rhode Island; likewise of several islands in the Eastern seas.

HOG ISLANDS, a cluster of small islands on the coast of Ireland, in the county of Kerry.

HOG'S HEAD, a cape of Ireland, forming the eastern

boundary of Ballinaskelling Bay. *Lat.* 51° 45′ N. *Lon.* 10° 15′ W.

HOGARTH, William, *ho'-garth*, a celebrated painter and pictorial satirist of morals, was apprenticed to an engraver of arms, &c. on silver plate. In 1718, being 21 years of age, he set up for himself, his first employment being the engraving of coats of arms, ciphers, and shop-bills. In 1724 he undertook to execute plates for booksellers, the chief of which are the prints to "Hudibras" and the illustrations to "Mortraye's Travels." His first performance as a painter was a representation of Wanstead Assembly, the portraits being taken from life. In 1730 he married a daughter of Sir James Thornhill, in whose academy he had studied drawing from the living figure. After gaining some pecuniary profit and fame by the publication of a series of small etchings representing London life and folly, he afterwards began to paint portraits; but soon abandoned this line of pictorial art, as being too full of drudgery for a man of invention and original genius. In 1733 appeared his "Harlot's Progress,"—prints which stamped his reputation, and were followed by other works of the same class, admirably executed. Soon after the treaty of Aix-la-Chapelle, he went to France, and while at Calais, began to sketch the gate of the town, for which he was taken up, but was soon released. This circumstance he ridiculed in an excellent caricature. In 1753 he published his "Analysis of Beauty." The sale of engravings of his pictures, executed by himself, was so great, that, notwithstanding they were largely pirated, he was enabled to set up his carriage. His "Rake's Progress," "Marriage à la Mode," "March to Finchley," as well as many other works, have constituted him one of the greatest satirists of the worldly vices and weaknesses that have ever lived; while his fine and solid, though unpretending efforts as a colorist, have marked him as one of the best painters of the early English school. He is the greatest master of caricature the world has seen. B. in London, 1697; D. 1764.

HOGG, James, *hog*, generally known as the Ettrick Shepherd, a Scotch poet of considerable genius. His forefathers had been shepherds for many generations, and he himself, previously to his poetical career, followed the same pursuit. In 1801, while acting as shepherd to Mr. Laidlaw, of Blackhouse, Sir Walter Scott became acquainted with him, and engaged him to collect materials for his "Minstrelsy of the Scottish Border." In 1803 he published a collection of poems, under the title of "The Mountain Bard," which, together with a couple of prizes obtained from the Highland Society for essays on the rearing and management of sheep, made him the possessor of a sum amounting to £300. With this money he took a farm, which was a failure; and after in vain seeking employment as a shepherd, he, "in utter desperation," as he said, "took his plaid about his shoulders, determined, since no better could be, to push his fortune as a literary man." From this period he laboured busily in the field of literature, with varying success. He contributed to "Blackwood's Magazine" and other periodicals, wrote "Madoc the Moor," "The Pilgrim of the Sun," and produced a volume of poems,—some original, some ancient,—entitled "Jacobite Relics of Scotland." "The Altrive Tales," "A Volume of Lay Sermons," and many other works, issued from his fertile but somewhat wild fancy. On his marriage, in 1814, the duke of Buccleuch made him a present of a farm; but the management of it appears to have been so bad as to have made it a bequest of little value to the irregular poet. B. in the Forest of Ettrick, Selkirkshire, 1772; D. at his farm at Altrive, 1835.

HOGSTIES, THE, *hog'-stise*, a dangerous reef of rocks among the Bahamas, 40 miles from Great Mague.

HOGUE, LA, *hoge*, a town of France, in Normandy, in the department of La Manche. It was the scene, in 1692, of a famous sea-fight between the French fleet and the English. *Pop.* 2,000.

HOHENLINDEN, *ho-hen-lin'-den*, a village of Bavaria, 20 miles from Munich, noted for the defeat of the Austrian army in 1800, by the French, under Moreau.

HOHENLOHE, Prince of, *ho-hen-lo'-e*, general of artillery in the service of the emperor. He distinguished himself in Transylvania against the Turks, in 1789; and in the campaign against France, in 1792, he gained great reputation, particularly in the battles of Famars and Mermal. D. 1796.

HOHENSTEIN, *ho'-hen-stine*, a town of Saxony, with a manufacture of cotton stuffs, and mines of silver and arsenic in the neighbourhood, 6 miles from Chemnitz. *Pop.* 5,000.—Also the name of several small towns in Germany.

HOHENZOLLERN, *ho-hen-tsol'-lern*, one of the most ancient reigning houses of Germany, said to have sprung from Tassillon, duke of Bavaria, in the 8th century. It owes its name to a château situate on the Zollernberg, supposed to have been built by Rudolph II., count of Zollern, whose two sons, Frederick and Conrad, became the chiefs of the two principal lines of the royal house,—the line of Swabia and the line of Franconia; from which, in 1417, sprang the electors of Brandenburg, who afterwards became the kings of Prussia.

HOHENZOLLERN-HECHINGEN, *ho-hen-tsol'-lern hesh'-ing-en*, a principality inclosed between Wurtemberg and the two portions of the principality of Hohenzollern-Sigmaringen, made over to Prussia in 1849. *Pop.* 20,000.

HOHENZOLLERN-SIGMARINGEN, *ho-hen-tsol'-lern sish'-ma-ring-en*, a former principality of Germany. *Area*, 335 square miles. *Pop.* 45,000.

HOLBACH, Baron d', *hole-bak*, a rich German noble, who went to Paris while young, and there embraced the sceptical doctrines professed by those who were called the "Philosophical School," previous to the revolution of 1791. He wrote a large number of works of an atheistical nature, most of which were condemned by the Parliament of Paris, and placed in the Index Expurgatorius of Rome. He also composed and translated several works on chemistry, mineralogy, and the natural sciences. B. at Heidesheim, 1723; D. at Paris, 1789.

HOLBEACH, *hol'-beech*, a market town of Lincolnshire, 12 miles from Boston. The church is a fine Gothic structure. *Pop.* 3,621.

HOLBECK, *hol'-bek*, a township of Yorkshire, about a mile from Leeds. *Pop.* 14,000, mostly employed in woollen factories.

HOLBEIN, John, or Hans, *hole'-bine*, a famous portrait-painter and skilful architect, who was instructed

HOLBEIN.

in his art by his father. For the town-house of Basle, he painted a fine picture of our Saviour's passion, and for the fish-market of the same town a Dance of Peasants, and Dance of Death, the last of which has been engraved in a series of plates. He visited England in the reign of Henry VIII., who liberally patronized him, on the recommendation of Sir Thomas More. He painted a

number of portraits of the king and the highest nobility, as well as several historical pieces. B. about 1498; D. in London, of the plague, 1554.

HOLBERG, Louis, Baron de, *hole'-bairg*, a celebrated Danish writer, called the Plautus of his country, who abandoned a military career for one of letters; and was, in 1716, appointed professor in the University of Copenhagen. From that time he wrote especially for the theatre, and produced a large number of plays, which have caused his countrymen to regard him as the founder of dramatic art in Denmark. He wrote also a history of Denmark and an Ecclesiastical History. B. at Bergen, 1684; D. at Copenhagen, 1754.

HOLCROFT, Thomas, *hol'-kroft*, an English playwright and translator of dramas, &c. He was the son of a shoemaker, and became, when very young, a stable-boy in one of the racing stables of Newmarket. At the age of 17 he quitted this employment, and, for several years, led the life of a tramping shoemaker and wandering schoolmaster, all the while working sedulously at the task of self-education. At 21 he married, and, soon after, contributed a few articles to the *Whitehall Evening Post*; subsequently he left London to become a strolling player. After following the career of an actor for some time, and appearing on the London stage, he, in 1780, commenced writing for the theatre. He was one of the most fertile dramatic authors of his day, and was among the first to introduce to the London stage the system of adaptation from the French. He also wrote several novels and a sceptical poem; but it is as a translator of plays that he is chiefly known. His life has been published, and an abridged version of it issued by Messrs. Longman in their "Travellers' Library." B. in London, 1745; D. 1809.

HOLDERNESS, *hol'-der-ness*, a fertile district of Yorkshire, lying between the river Humber and the North Sea. *Pop.* 21,000.

HOLEŠCHAU, *hol'-e-shou*, a town of Moravia, 44 miles from Brunn. *Pop.* 5,300.

HOLINSHED, Raphael, *hol'-in-shed*, a celebrated old English chronicler, whose work is considered highly important by English historians. Nothing certain is known of his profession, but his annals show that he possessed considerable learning. His "Chronicles" were first published in 1577, in 2 vols. folio; and again in 1587 in three. B. uncertain when; D. about 1580.

HOLIS, or HOLITSCH, *hol'-litch*, a town of Hungary, on the Morawa, 46 miles from Presburg. It has several churches and religious establishments. *Manf.* Pottery. *Pop.* 4,333.

HOLKAR, Mulhar Rao, *hol'-kar*, a Mahratta soldier, who, for his military services, received a grant of territory in Malwa in 1737, and subsequently made himself chief of more than half of the same province. D. 1766.

HOLKAR, Jeswunt Rao, a daring military adventurer, who proclaimed himself a relative of the above, and at the head of a large army, collected by his ability and tact, defeated Scindia, the most powerful of the Mahratta chieftains, in 1802, and established himself in Malwa. Hereupon, the Marquis Wellesley, who was at that time governor-general of India, proclaimed war against him; but, after a struggle of nearly three years, a peace was concluded, by which he was allowed to retain the greater portion of his territories. His violent temper subsequently culminated in madness, and he passed the closing years of his life in confinement. D. 1811.

HOLLAND, Henry Fox, *hol'-land*, first lord, was secretary of war under Walpole in 1746, and afterwards paymaster-general of the forces. George III. created him a peer in 1762. He had several sons, one of whom was the celebrated orator Charles Fox. (*See* FOX.) B. 1705; D. 1774.

HOLLAND, Henry Richard Vassall Fox, third lord, nephew of the celebrated orator, and, like him, the champion of public liberty. In 1806 he became lord privy seal in the Grenville-Fox ministry; and in 1814-15 he denounced the war against Napoleon. He greatly aided in the abolition of the Corporation and Test Acts, as well as strongly advocated parliamentary reform. In 1805 he published the "Memoirs of Lope de Vega," and other works, and afterwards translated three comedies from the Spanish. His lordship's house at Kensington was, for a very lengthened period, a hospitable resort for the distinguished in literature and politics. B. 1773; D. at Holland House, 1840.

HOLLAND, Henry, a distinguished English architect, the favourite of George IV. when prince of Wales. His personal history is unknown; but of his works we may mention that he designed Carlton House and the Pavilion at Brighton for his patron, though this last was afterwards improved by Nash. (*See* NASH.) He was the architect of Drury-lane Theatre; but this building was destroyed by fire in 1809. The India House, in Leadenhall Street, was also his design. B. about 1746; D. 1806.

HOLLAND, Sir Henry, an eminent English physician, who, after graduating M.D. at the University of Edinburgh, in 1811, went to London, where he rapidly acquired consideration as a physician. In 1840, he became physician in ordinary to H.R.H. Prince Albert, and in 1852 was appointed to the same duties towards her majesty. He has written a work, entitled "Medical Notes and Reflections," which is regarded by the medical body as being very valuable. In 1853, he was raised to the dignity of a baronet, in consideration of his professional knowledge. Is also a fellow of the Royal College of Physicians of London, and of the Royal Society. B. at Knutsford, Cheshire, 1788.

HOLLAND, Philemon, an English writer, fellow of Trinity College; among the works of whose industrious life may be mentioned the translation of Pliny's "Natural History," and Camden's "Britannia." He was also an eminent practiser of the healing art in his day. B. at Chelmsford, 1551; D. 1636.

HOLLAND, KINGDOM OF. (*See* NETHERLANDS, THE.)

HOLLAND, NEW. (*See* AUSTRALIA.)

HOLLAND, NORTH and SOUTH, two maritime provinces of the kingdom of the Netherlands, bounded W. by the German Ocean, S. by Zealand, E. by the Zuyder Zee and the province of Utrecht. They consist of a narrow peninsula and some islands, the length of the peninsula being about 90 miles, and its breadth varying from 25 to 40. *Area*, about 2,150 square miles. *Desc.* A continued flat, which lies so low as to be under the level of the sea at high water, the tide being prevented from overflowing the country by means of natural sand-banks, or downs, and immense artificial dykes. The numerous canals and ditches which traverse the province, in all directions, are likewise provided with dykes, and serve not only to promote internal communication, but to drain the land of superfluous water. *Rivers.* The Rhine and Maese, or Maas; and in addition to these two great rivers, which water these provinces in common with the rest of the Netherlands, there are several smaller rivers,—the Vecht, the Amstel, the Zaam, the Schie, the Rotte, and the Spaaren; but they have so little current as to be more properly considered as canals or watercourses. *Lakes.* The principal is that of Haarlem. (*See* HAARLEM.) *Climate and Pro.* The soil is in general productive, consisting of a deep rich loam. From the humidity of both soil and climate, not much land is under tillage, and that little is in South Holland. The crops principally cultivated are wheat, madder, tobacco, hemp, and flax. The principal agricultural wealth consists in the pastures, which are almost unrivalled in the abundance and luxuriance of the grass which they produce; and on this are fed large numbers of cattle, many of which are exported to Great Britain. *Manf.* A variety of articles; viz., linen, woollen, and leather; also paper, wax, refined sugar, starch, and, in certain districts, pottery and tiles. Large quantities of gin, or "hollands," are likewise distilled, particularly at Schiedam, near the Maas. *Cities and Towns* in N. Holland. Amsterdam, Haarlem, and Zaardam; in S. Holland, Rotterdam, the Hague, Leyden, and Dort. *Pop.* 1,000,000. *Lat.* between 51° 40′ and 53° 20′ N. *Lon.* between 4° and 5° 20′ E.—Holland, in the middle ages, was governed by counts or earls, and subsequently fell under the dominion of Spain; after its emancipation from which, it was ruled, with some interruptions, by the house of Orange. (*See* Motley's "Rise of the Dutch Republic.") In 1795 it was conquered by the French; and afterwards, under Napoleon, reduced into a province of France, the emperor's brother Louis being created king of Holland. It was freed in 1813, and, from that period, the history of these provinces forms a part of that of the larger government of the Netherlands.

HOLLAND, PARTS OF, a division of Lincolnshire, on

the North Sea. In this district is Holland Fen, containing upwards of 20,000 acres, drained and inclosed. *Area*, upwards of 250,000 acres. *Pop.* 75,000.—Holland, with various prefixes, is the name of three parishes in England.

HOLLAR, Wenceslaus, *holl'-lar*, a distinguished draughtsman and etcher during the 17th century, whose drawings of old London have a peculiar value with the antiquarian and historian. He was educated for the profession of law, at Prague, but abandoned it for the more congenial pursuits of drawing and engraving, obtaining instruction therein from Matthew Marian, an engraver, who had worked for Vandyke and Rubens. At the outset of his artistic career, he travelled from one great German town to another, copying the pictures of great painters, and making perspective views of cities, towns, and remarkable localities, becoming very celebrated for his drawings of the Rhine and Danube. In 1636, Howard, earl of Arundel, met him at Cologne, and at once took him under his patronage. On leaving Germany, the earl brought Hollar with him to England, where he commenced his artistic labours with the "Prospect of Greenwich," which he executed in two plates, in 1637. Two years afterwards, he drew the portraits of the royal family for the great plate of the Entrance of Queen Marie de Medici into England, on a visit to her daughter, Henrietta Maria, queen of England. During the civil war he was taken prisoner by the parliamentarians, and deprived of his liberty for some time; but, on his release, he went to Antwerp. Returning to England in 1652, he executed the etchings for Dugdale's "Monasticon" and his "History of St. Paul's," besides a very large number of other views and drawings. According to one authority, he etched as many as 2,400 prints. Though he had been so laborious an artist, it is recorded that, at the age of 70, he had an execution in his house; whereupon the worthy old man requested only to be left to die in his bed. B. at Prague, 1607; D. in London, 1677.

HOLMAN, James, *hol'-man*, generally known as the Blind Traveller, served, in his early years, in the royal navy, and took part in the wars against the French. At the age of 25 he lost his sight; but, notwithstanding this melancholy infirmity, he, in 1819, commenced his wanderings by travelling over France, Italy, Switzerland, and Holland; an account of which he published in 1822. He had been made, several years previously, a naval Knight of Windsor. He again set out, in 1822, and embarked for St. Petersburg, intending to travel through the Russian empire, and to enter Mongolia and China, after having visited Eastern Siberia; but when he had arrived at Irkutsk, an order from the czar Alexander commanded his return, and he was conducted as a state prisoner back to the German frontier. When he reached England, he published an account of his wanderings, in two volumes. His Russian journey was intended as the commencement of a series of travels and voyages round the world, which he afterwards performed, and which occupied him five years to accomplish. In 1834 he published his work, "Travels Round the World," in 4 volumes. His last wanderings were in the Danubian provinces, in 1843-44. B. about 1787; D. 1857.

HOLME, *holm*, the name of numerous parishes, townships, &c., in England. Various distinguishing affixes are joined to the name.

HOLME, a parish of Orkney, giving name to Holme Sound, which leads into the German Ocean by Stromness. Several of the Orkney islets have also this prefix.

HOLMES, Oliver Wendell, *holms*, an American poet and physician, who has earned, by his poetical works, the title of one of the best lyrical writers of his country. After completing his education at Cambridge, in Massachusetts, he became a doctor of medicine, and visited Europe. Returning to America, he established himself at Boston in 1836, and in 1838 was appointed professor of anatomy and physiology in the college at Dartmouth, and later to Harvard University, the most ancient college in the United States. He has written several valuable medical works, but his fame is due to his poetical effusions, which he has contributed to many of the best American periodicals, and which he has collected under the title of "Holmes's Poetical Works." These have been reprinted in England, and have met with considerable success. B. 1809.

HOLMFIRTH, *holm'-firth*, a township of Yorkshire, 5 miles from Huddersfield. In 1852, this place was wholly overwhelmed by a terrible inundation, caused by the bursting of the Bilberry dam reservoir.

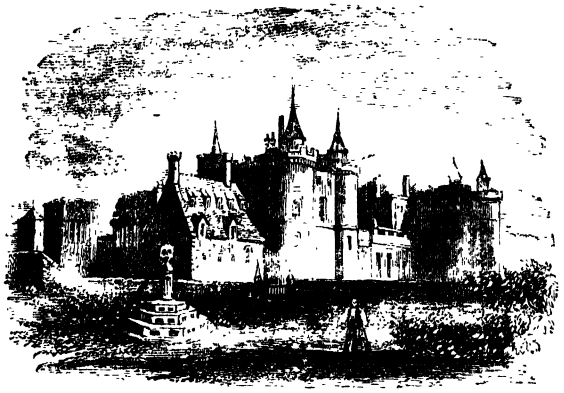
HOLOFERNES, *hol-o-fer'-nees*, a general in Nabucadonosar's army, who invaded Judæa, and was killed, during his sleep, by Judith (*see* JUDITH), B.C. 650.

HOLSTEIN, *holl'-stine*, an extensive duchy of Germany, and a dependency of Denmark, bounded W. and S. by the German Ocean and the Elbe, E. by the Baltic, and N. by Schleswig. *Area*, 3,250 square miles. *Desc.* A generally level surface, with low hills towards the E.; the extensive pastures in the S. and W. being secured against the inundations of the ocean by artificial dykes. *Rivers.* The Elbe, Eider, and Stor. *Lakes.* Numerous, the principal being the Ploen or Ploensee. *Pro.* Wheat, barley, and oats; potatoes, hemp, and flax, with some hops and fruit; its principal wealth, however, is in its pastures. *Minerals.* Lime and salt. *Towns.* Altona, Rendsburg, Kiel, and Gluckstadt. *Inhabitants and Religion.* The Holsteiners are mostly German in language and predilections, and are generally Lutherans. The king of Denmark had originally a seat at the German diet, on account of his Holstein possessions, but in 1806, on the formation of the Confederation of the Rhine, this privilege was lost. In 1815, on the establishment of the Germanic confederation by the congress of Vienna, he was re-admitted into that body. In 1848, this duchy, with Schleswig, attempted to gain its independence; but, after some severe fighting, was reduced to obedience in 1850. There is but little doubt, however, that the embers of disaffection to Denmark still exist. *Pop.* 550,000. *Lat.* between 54° 26′ and 53° 29′ N. *Lon.* between 9° and 11° E.

HOLSTEIN, the house of, a princely German family, which includes the royal line of Denmark and the collateral branches of Holstein-Sonderburg and the ducal line of Holstein-Gottorp, which last is again divided into two branches, the elder being the reigning line of Russia, while the younger is represented by Gustavus, prince of Wasa, a field-marshal in the Austrian service, and also by the Oldenburg family.

HOLT, *holte*, the name of several parishes, townships, and boroughs, both in England and Wales, with small populations.

HOLTON, *hole'-ton*, the name of several parishes in England with a small number of inhabitants.



HOLWICK, *holl'-wik*, a township of Yorkshire, 12 miles from Barnard-castle, in the neighbourhood of which is one of the finest cataracts in England, caused by the fall of the river Tees.

HOLY ISLAND, or LINDISFARN, *ho'-ly*, jutting out into the German Ocean from the coast of Northumberland, but belonging to Durham, is really a peninsula, although insulated at high water. It is about 8 miles from Berwick, and may be crossed by horses and carriages, if they avoid the quicksands, every ebb tide. *Desc.* A continued plain, about 9 miles in circumference, one half being sand-hills forming a rabbit-warren, the remainder being fertile. *Area.* About 1,000 acres; but the parish, in which are included the Farne Islands, about 7 miles distant, has about 3,320. *Desc.* The soil is rich. On the south of the island lies the town, inhabited principally by fishermen, but frequented also for sea-bathing. In a bay on the E. is a small harbour, well known to seamen for the shelter it affords during an easterly gale; and on the opposite side stand the remains of an ancient castle. Near the town are the ruins of an old abbey. The Danes, in 900, destroyed the latter, when the bishopric was transferred to Durham. *Pop.* about 1,000, chiefly engaged in lobster and other fisheries.

HOLYHEAD, *hol-i-hed'*, an island, seaport, borough, and parish of Wales, situate off the W. coast of the isle of Anglesey, with which it is connected by a long causeway, which may be crossed at low water, 23 miles from Bangor. *Desc.* Generally a barren rock, but there is some sheep-pasture; and terminating to the N. in a bold headland composed of serpentine rock, which has been hollowed out by the ocean into many caves, the resort of flocks of sea-fowl. The town consists principally of a long street, and has assembly-rooms, a church, and market-place. It is now a place

of considerable importance, being connected by the Chester and Holyhead Railway with all the principal cities and towns of England, and having become the great port of communication to the Irish capital, and the rendezvous of the mail-packets. A harbour and pier, 900 feet long, has been constructed, to allow vessels to land or sail at all times of the tide, and a lighthouse has been built on this. Two other lighthouses are erected on the adjacent islands of N. and S. Stack. Holyhead is also in communication with the Irish coast by a submarine telegraph, which is 75 miles long, and lands at Kingstown. *Pop.* 6,000. *Lat.* of lighthouse, 53° 20′ N. *Lon.* 4° 37′ W.

HOLYROOD. (*See* EDINBURGH.)

HOLYROOD PALACE.

HOLYSTONE, *ho'-le-stone*, a parish of Northumberland, 6 miles from Rothbury. *Pop.* 450.—This place doubtless takes its name from its connection with the first baptism of many of its inhabitants, as Bede tells us that 3,000 persons were baptized here, on the introduction of Christianity into Northumberland.

HOLYWELL, *ho'-li-wel*, a town and parish of Flintshire, on the Holyhead and Chester Railway, 15 miles from Chester. In its vicinity are lead, copper, and zinc mines. *Manf.* Copper and brass, cottons and galloons. Its easy access to the sea, and the vicinity of the Flintshire coal-pits, render it a valuable site. The stream issuing from the remarkable Holy Well of St. Winifred, the most copious spring in Britain, boils up with violence as from a caldron, and sends forth every minute upwards of 20 tons of the purest water. Advantage is taken of this immense flow of water, by connecting it with machinery. The town is well built; it has several churches and chapels. *Pop.* 12,000.—There are a parish in Huntingdonshire and a township in Northumberland of the same name.

HOMBERG, *hom'-bairg*, William, a celebrated chemist, who, at first, entered the army, but quitted it to practise the law, which he also abandoned, and applied himself to the study of the sciences, particularly botany, medicine, and chemistry, to improve himself in which he travelled through various countries. In 1682 he settled in France, and abjured the Protestant religion; but being disappointed in his expectations, he went to Rome, and practised physic. He afterwards returned to Paris, where he became a member of the Academy of Sciences, and chemist and physician to the duke of Orleans. He discovered the properties of the Bologna stone, and its phosphoric appearance after calcination. Some of his scientific essays are printed in the Memoirs of the Academy of France. B. 1652; D. at Paris, 1715.

HOMBERG, the name of several small towns in Germany.

HOMBURG, *hom'-boorg*, a town of Central Germany, 9 miles from Frankfort. *Manf.* Stockings; but it is best known as the resort of travellers for the twofold purposes of gaining advantage from the use of its mineral springs and attending its gaming-tables. *Pop.* 4,500.

HOME, *home*, a district of Upper Canada, bounded by the lakes Huron and Ontario, and the districts of Newcastle, Gore, and London. Lake Simcoe and the rivers Talbot, Nottasawaja, and Severn are in it; and Toronto is its chief town.—HOME BAY is to the N. of Cumberland Island, British America. *Lat.* 68° 30′ N. *Lon.* 68° W.

HOME, Henry, Lord Kaimes, a Scotch judge and elegant writer, who became senior lord of session in Scotland. He wrote "Essays upon several subjects concerning British Antiquities," 1764; "Essays on the Principles of Morality and Natural Religion," "Historical Law," "The Principles of Equity," "The Elements of Criticism," 3 vols. 8vo; "The History of Man." B. 1696; D. 1782.

HOME, John, a Scottish divine and dramatic author, who, while acting as minister of the kirk, wrote his tragedy of "Douglas," which was represented with the greatest success at Edinburgh. This work, notwithstanding its purity of thought and language, evoked the indignation of the elders of the kirk, and the author was compelled to retire to England, where he obtained a pension from Lord Bute. He afterwards wrote four more tragedies, which, however, did not obtain the popularity of "Douglas," and which are now never heard of in the theatre. B. about 1722 D. 1808.

HOMER, *ho'-mer*, the most ancient and celebrated of the Greek poets, but of whose birthplace, station in life, and actual existence, in point of fact, the most diverse opinions are held by the learned of modern days. The honour of his birthplace was disputed by seven Greek cities. According to one tradition, he was the natural son of a young orphan girl of Smyrna, who lived on the banks of the Meles, and called her son after it, Melesigenes. It further relates, that Phemius, who kept a school for music and belles-lettres at Smyrna, having fallen in love with his mother, married her and adopted Homer, who, on his death, succeeded him as master of the school. Subsequently, having conceived the idea of the "Iliad," he travelled in order to gather knowledge of men and localities for his great work; but being badly treated by his fellow-countrymen on his return, he left Smyrna and established himself at Chios, where he set up a school. Becoming blind in his old age, he was overtaken by poverty, and compelled to earn his bread by wandering from city to city and reciting his verses. Finally, according to this version of his life, he is said to have died in the little isle of Ios, one of the Cyclades. Homer's greatest works are two epic poems. In the "Iliad," which contains twenty-four rhapsodies or chants, are recited the story of Achilles' revenge upon Agamemnon for depriving him of his mistress Briseis; the misfortunes which the Greeks suffered in consequence while besieging Troy, and the death of Hector at the hands of Achilles, who, to avenge the death of his friend Patroclus, killed the Trojan hero. (*See* HECTOR.) In the "Odyssey," the story of the wanderings and adventures of Ulysses on his homeward journey from Troy to his kingdom of Ithaca is told. The "Batrachomyomachia; or, Battle of the Frogs and Mice," and the "Homeric Hymns," are by some allowed to be the work of this poet, while others consider them spurious. The whole of these works are written in the Ionian dialect. Both the "Iliad" and the "Odyssey" have always been considered as the great beginning of all literature, though each shines with a lustre different from the other. In the "Iliad" grandeur of conception, beauty and simplicity of plan, a soaring imagination, rich and sublime images, are the characteristic excellencies. In the "Odyssey," a plan less regular, an imagination less brilliant, are to be

discovered; but it nevertheless commands delight by its strong interest and its entrancing style. In addition to these intrinsic beauties, the "Iliad" and "Odyssey" have preserved the theological traditions, the names and origin of nations, and the description and situation of cities and towns. The poems of Homer, according to the most learned critics, were composed anterior to the invention of writing, and were for a long time preserved by memory alone. They are said to have been interpolated and abridged by the rhapsodists, or Homeridæ (*see* HOMERIDÆ), who selected from them the most interesting episodes for recital. Pisistratus, or, as some others maintain, his son Hipparchus, was the first person who collected and arranged these poems, which were afterwards revised and divided into twenty-four books each, by the grammarians under the Ptolemies, who thus gave them the form in which we now possess them. Some learned critics—Wolf at their head—have put forth a theory that Homer never existed, and that the poems which have come down to us under his name are only a collected version of fragments which had been composed and sung by various authors, whom he terms Homeridæ, and who formed a species of school. Another set of scholars hold that the "Iliad" and the "Odyssey" are not the work of the same author, but that the latter is a very much later production than the former. Again, the derivation of the word Homer has been variously given by different schools of critics; each adopting that which best agrees with its own theory. One, the partisan of common tradition, translates the name by *blind*; others, by *hostage*, pretending that Homer was a hostage in a war which was raging between the inhabitants of Smyrna and Colophon; others, finally, assert that the word is derived from *homereo*, 'collector;' which would seem to show that we owe these poems to a compiler, who only collected scattered fragments, and united them into an harmonious whole. So far as our limits would permit us, we have endeavoured to sketch the theories which are held relating to this, the most interesting literary question in the world. Those who would seek more complete information on the subject, should turn to Thirlwall's "History of Greece," vol. i.; Gladstone's "Homeric Age;" and if they would desire to go still deeper, to the works of Heyne, and the "Lexilogus" of Buttmann; both the latter being German writers. Hobbes, Chapman, Pope, and Cowper have translated Homer. Pope's version is the best known; but it is only a poor reflection of the vigorous original. Chapman's is the best old translation. A very excellent translation is that by Brandreth, published by Pickering. Homer is said by some to have lived between the 10th and 9th centuries B.C.

HOMERIDÆ, *ho-mer'-i-de*, a race of rhapsodists or singers, with regard to whom there are three theories:—1. That they were the descendants of Homer. 2. That they were poets of an early epoch, but of a regular school, whose works Homer collected and arranged in a complete form. 3. That they were a race of wandering minstrels, who, coming after Homer, imitated him, added to, and interpolated his works.

HOMINGTON, *hom'-ing-ton*, a parish of Wiltshire, 3 miles from Salisbury. *Pop.* 176.—Its church contains a monument to the memory of a man who has, perhaps, attained the greatest age in modern times,—G. Stanley, who died, aged 151 years, in 1719.

HOMPESCH, Ferdinand de, *hom'-pesk*, the last grand master of the order of the Knights of Malta, who was invested with that dignity in 1797. Bribed, it is asserted, by the money and promises of the "Directory," he surrendered to the French fleet which was conveying Buonaparte and his army to Egypt. He was conducted to Trieste. Subsequently, he protested against the usurpation of the French, and abdicated his sovereignty in favour of the emperor of Russia, Paul I. He wandered about Germany for some years, but finally took refuge in France. B. at Dusseldorf, 1744; D. 1803.

HONAN, *ho'-nan*, a city of China, in the province of the same name; the latter having a *pop.* of upwards of 23,000,000. *Lat.* 34° 40′ N. *Lon.* 112° 29′ E.

HONDA, *hon'-da*, a town of New Granada, S. America, on the Magdalena, 55 miles from Bogota. *Pop.* 6,000.—The BAY OF HONDA is on the N. coast of New Granada. *Lat.* 12° 20′ N. *Lon.* 71° 50′ W.

HONDURAS, BRITISH, or BELIZE, *hon-dur'-rus*, a British settlement on the E. coast of Central America, bounded N. by Yucatan, W. by Vera Paz, E. by the Caribbean Sea, S. by Guatemala. *Length*, 390 miles; *breadth*, 150. *Area*, 10,370 square miles. *Desc.* It is of a hot and moist temperature, and the soil is of great fertility. *Climate.* The coast being open to the sea, the easterly breezes, which blow from the bay during nine months of the year, temper the not excessive heat. From June to September heavy rains fall, and this is the most unhealthy season. *Zoology.* The red tiger, black tiger, tiger-cat, leopard, other wild animals, and game are found. This country belonged to the Mosquito Indians, who never were subdued by the Spaniards, though they were very cruelly treated by them. These Indians, however, were friendly to the British, who accordingly made settlements in the country. It is governed by a superintendent subordinate to Jamaica. The possession of this territory by the British has formed the subject of much diplomatic correspondence between the governments of Great Britain and the United States. *Pop.* Unascertained.

HONDURAS, a state of the Central American republic, bounded N. by the Gulf of Honduras, S. by Nicaragua, E. by the Mosquito territory, W. by Guatemala. *Area*, 7,000 square miles. *Pop.* 300,000.

HONDURAS, BAY OF, a large and convenient bay, situate between Cape Honduras, in *lat.* 15° N., and that of Coteche, at the E. extremity of the province of Yucatan, in 21° N. It is formed by the coast of the province of Honduras on the S., and that of Yucatan on the W. It is well known from the settlements which the British made in it for the cutting down of mahogany and dye-woods. The principal of these is the town of Balize, or Belize (*see* BALIZE), on the coast of Yucatan, placed at the mouth of the river of that name.

HONE, William, *hone*, a political pamphleteer and compiler of popular antiquities, began life in an attorney's office, at first in London, and subsequently at Chatham. In 1800 he established himself as a bookseller in Lambeth Walk, from which he removed to St. Martin's Churchyard, as the locality was then termed. In 1806, he commenced his singular literary career by issuing an edition of Shaw's "Gardener." An attempt at establishing a savings bank, as well as a new publishing speculation, followed, both being failures. In 1811, he was appointed by the booksellers their "trade auctioneer," and a short time before, had been engaged in the compilation of the index to Froissart. But he was quite unfitted for business, and while engaged in the above post he was occupied in investigating the abuses in lunatic asylums: he was soon a bankrupt for the second time. His family now consisted of seven children, and he gained a livelihood by writing for the "Critical Review" and the "British Lady's Magazine." He next opened a bookseller's shop in Fleet Street, but his ill-fortune still continued: it was twice plundered. In 1815, he was the publisher of the *Traveller* newspaper, and, soon after, began to publish those bold political pamphlets and satires which made him universally known, and led to his being tried for three days in the court of King's Bench. He was acquitted, however, and a large sum of money was collected by subscription for him, with which he established himself once more in business, and once more failed. From this time he was occupied in the compilation and publication of those well-known books which will continue to preserve his name. The chief of these were "Ancient Mysteries described," "The Every-day Book," "The Table Book," and "The Year Book;" his last work being an edition of "Strutt's Sports and Pastimes of the English." B. at Bath, 1779; D. at Tottenham, 1842.

HONFLEUR, *haw'-flur*, a seaport and fortified town of France, in the department of Calvados, on the Seine, opposite to Havre, from which it is distant 8 miles. It has a good harbour sheltered by a pier, and has a maritime trade. *Manf.* Lace, hardware, vitriol, and alum. *Exp.* Eggs, butter, fruits, &c., to England. *Pop.* 9,361.—This town held out the longest of any in Normandy against Henry IV.

HONITON, *hon'-i-ton*, a borough, market-town, and parish of Devonshire, situate in a fertile vale, 16 miles from Exeter, and consisting chiefly of one large and handsome street. It has several churches and chapels,

a union workhouse, and an hospital. *Manf.* Principally lace, the Honiton lace being well known throughout Britain. *Pop.* 3,427.

HONORIUS, *ho-nor'-e-us*, emperor of the West, was the second son of Theodosius the Great, and associated in the empire with Arcadius, his brother, in 395. His guardian, Stilicho, endeavouring to dethrone him, was slain. In 409, Alaric the Goth besieged Rome, and ravaged all the country, while Honorius remained indolent at Ravenna. B. 384; D. 423.

HONORIUS I., Pope, succeeded Boniface V. in 626. He governed with zeal and prudence. Some of his letters are extant. D. 638.

HONORIUS II., of Bologna, succeeded Calixtus II. in 1124, and, at the same time, Thibauld was chosen by another party, under the name of Celestin; but he resigned the chair to his rival. D. 1130.

HONORIUS III. was made pope after Innocent III., in 1216. He confirmed the order of Dominicans, and left several works. D. 1227.

HONORIUS IV., a Roman, ascended the papal chair in 1285. He displayed great zeal for his church, and promoted the crusades. D. 1287.

HOOD, Thomas, *hood*, a modern English poet and humorist, the celebrated author of "The Song of the Shirt" and "The Bridge of Sighs," was the son of a bookseller in the Poultry. When about 14 years old, he was placed in the office of a city merchant; but his health being delicate, he was soon after sent to Dundee on board a coasting vessel. He remained in Scotland for two years, his chief occupations being reading, fishing, and boating. His health improving, he returned to London, and was apprenticed to his uncle, an engraver. In 1821 the "London Magazine" became the property of some of his friends, and he, having already given signs of the possession of literary talent, was offered the post of sub-editor. Soon afterwards he published his first work,—"Odes and Addresses to Great People;" and, in 1826, he collected his contributions to the "London Magazine," and re-issued them in a work called "Whims and Oddities." "The Comic Annual," which he produced for nine years, was commenced in 1829; and while editor of "The Gem," he wrote for it his well-known poem "Eugene Aram's Dream." His work "Up the Rhine" was published after a three years' residence on the continent. Subsequently, he became editor of "The New Monthly Magazine;" and on his retirement from this post, he collected his prose and poetry, scattered through many periodicals, and published them under the title of "Whimsicalities." In all these works a rich current of genial humour runs; and his pleasant wit, ripe observation, and sound sense, have made him an ornament to English literature. B. in London, 1798; D. 1845.

HOOFT, Peter Cornelius Van, *hoft*, a Dutch writer, to whom Louis XIII. of France gave the order of St. Michael, as a reward for his history of Henry IV. His other works are "Poems and Comedies," "The History of the Low Countries from the Abdication of Charles V. to 1598," and a translation of Tacitus into Dutch. B. at Amsterdam, 1581; D. 1647.

HOOGHLY, *hoog'-le*, a town of Bengal, and the capital of a district of the same name, situate on the W. bank of the Hooghly river, on the Calcutta and Benares Railway, 27 miles from Calcutta. It has a civil establishment, which consists of judges, collectors, &c.; and has a government college, where the English and Eastern languages are taught. This place is supposed to have been founded by the Portuguese about 1538, when, these being expelled, in 1632, by the Mogul troops, Hooghly became the imperial port. In 1642, the English, and subsequently the Dutch, obtained permission to erect factories; but a dispute arising between the two, recourse was had to arms, and the town was burnt down, with 500 houses. The nabob, who resided at Dacca, highly incensed, sent a large force to expel the English from Hooghly; but, previous to its arrival, the English had fled. In 1757 it was taken by the British; but, shortly after, retaken by Surajah Dowlah, and again fell, in a few months, into the hands of the British under Clive. The port duties formerly levied here, were transferred, in 1765, from Hooghly to Calcutta, and most of its opulent inhabitants removed to that city. The site of the old English factory is now occupied by a handsome gaol. *Pop.* about 12,000.

HOOGHLY, THE, a river of Bengal, formed by the junction of two western branches of the Ganges, and celebrated for having Calcutta on its banks. The entrance to this river, about 15 miles wide, is rendered extremely dangerous and difficult by numerous sand-banks, which are frequently shifting. At Calcutta the river is about a mile wide, and towards the city the spring tides run up with great violence, advancing at the rate of 15 miles an hour, and frequently overset boats and drive ships from their anchorage. The followers of Brahma consider the Hooghly sacred. Several towns and villages stand on its banks, and few rivers can boast of a more extensive commerce than is carried along its stream.

HOOK, James Clark, A.R.A., *hook*, a modern English painter, of solid merit, who studied at the Royal Academy, whose three medals he carried off by his skill in drawing. During the last few years he has painted pictures of a simple, rustic character; but his first efforts as an artist were on the most ambitious scale. His "Bianca Capello," "Escape of Francesco de Carrara," and "The Chevalier Bayard wounded at Brescia," were admirable specimens of historical painting, the last gaining for him election into the Royal Academy. Although not so popular with the general public as many inferior men, he is highly esteemed as a painter by his brother artists. B. about 1820.

HOOK, Theodore Edward, a popular English humorist and playwright at the beginning of the present century. He was the son of a musical composer, and was remarkable in his youth for his beauty, his sweet voice, and his quick intelligence. He soon began to assist his father, who was a popular song and operatic composer, by writing the words of ballads for him; and was thus early made familiar with musical and theatrical life before and behind the curtain. He had been at Harrow for a short period; but on the death of his mother he left it, and never went to a school again. It was at one time intended to enter him of a college at Oxford; but, after some preliminary reading, he returned to London, where he quickly began to write operas, farces, and published a novel,—"The Man of Sorrow," under an assumed name. His light and joyous temperament, great conversational powers, and marvellous talent as an "Improvisatore," made him the favourite of the most fashionable society; and it was while he was leading this life of exuberant gaiety, that he played off his notorious "hoaxes;" one of which, "the Berners Street hoax," made a great sensation at the time. His social qualities attracted the notice, and procured for him the patronage of the prince-regent, who caused him, in 1812, to be appointed accountant-general and treasurer to the Mauritius, he being then only twenty-five years of age. But in March, 1818, he was arrested on a serious charge, a deficiency of 37,000 dollars having been discovered in the colonial treasury-chest. He was brought to England a prisoner, the law officers of the crown reporting that he was only liable to a prosecution for debt; but a long and harassing course of legal proceedings was the result. In the year 1830, he became, through the instrumentality of Sir Walter Scott, editor of the "John Bull," on its establishment. In this position he distinguished himself by his powerful writing against Queen Caroline, her supporters, and the whole of the Whig party. So successful was this Tory newspaper, that Hook, for a long period, derived from it an income of £2,000 per annum. The Whig party, however, would not allow the law proceedings against him to drop, and in 1823 he was arrested, and remained in custody till May, 1825, when he was permitted to go at large, but was informed that the crown could not consent to forego its debt. With respect to this mysterious affair, it was never clearly shown that he was guilty of false appropriation of the funds intrusted to his charge; but great carelessness was proved against him, it being shown, among other acts of culpable neglect, that he was in the habit of leaving the keys of the treasure-chest with his subordinates, while he was away on parties of pleasure. Between the years 1824 and 1836, he wrote about thirty volumes of novels, which were very successful, and which yielded him very large sums. He continued to lead the life of a gay and fashionable man till July, 1841, when, as he looked in the glass, when dining, he rose, and said, "Ay, I see I look as I am;

done up in purse, in mind, and in body too, at last." Henceforth he was confined to his room; his fine constitution and his great intellectual powers had been worn out by the merciless mode in which he had overtaxed them. His novel of "Gilbert Gurney" contains an interesting autobiographical sketch of himself. B. in London, 1788; D. at Fulham, 1841.

Hooke, Robert, *hook*, a celebrated mathematician, who, in his youth, evincing a taste for drawing, was placed under Sir Peter Lely; but painting in oil-colour disordering his head, he abandoned this pursuit, and was taken by Dr. Busby into his house; after which he went to Christ Church, Oxford. He worked with Dr. Willis in his chemical operations, and became assistant to Mr. Boyle. He was one of the first fellows of the Royal Society, the repository of which was intrusted to his care. In 1664, he was made professor of mechanics to that learned body, and in the following year elected Gresham professor of geometry. After the fire of London, he produced a plan for rebuilding the city, which procured him the appointment of one of the city surveyors; but his design was not adopted. In 1668, he had a dispute with Hevelius respecting telescopic sights, which he conducted with great asperity. In 1671, he attacked Sir Isaac Newton's theory of light and colours, and afterwards pretended that the discovery made by that great man concerning the force and action of gravity was originally made by himself. In 1691, Archbishop Tillotson created him M.D. In 1665, he wrote a book called "Micrographia, or Philosophical Descriptions of minute Bodies made by Magnifying-glasses;" his posthumous works were published after his death. He was a man of great mechanical genius, and the sciences are indebted to him for several valuable instruments and improvements. B. at Freshwater, Isle of Wight, 1635; D. in London, 1702.

Hooke, Nathaniel, an English historian. He was a Roman Catholic, and when Mr. Pope lay on his death-bed, Hooke introduced a priest to him, which gave great offence to Bolingbroke. He wrote the duchess of Marlborough's account of her conduct, for which he received £5,000; but his best work is a Roman history in 4 vols. D. 1764.

Hooker, Richard, *hook'-er*, a celebrated English divine. He received his education at Exeter grammar-school, whence he was sent by his relation, Bishop Jewell, to Corpus Christi College, Oxford, of which he was made bible-clerk, and in 1577 chosen fellow. In 1581 he took orders, and in 1584 was presented to the rectory of Drayton-Beauchamp, in Buckinghamshire, where he was discovered leading a life of poverty by the son of the archbishop of York, who had formerly been his pupil. The young man represented his case to his father, through whose influence he was appointed master of the Temple in 1585. But this place did not suit Hooker, who was best fitted for a country retirement: he therefore applied to Archbishop Whitgift for a removal to "some quiet parsonage," and he was accordingly presented to a living in Wiltshire, where he wrote part of his "Ecclesiastical Polity." In 1595 the queen presented him to the rectory of Bishop's Bourne, where he finished his great work. Pope Clement VIII. said of the "Ecclesiastical Polity," "there are in it such seeds of eternity, as will continue till the last fire shall devour all learning." He wrote many tracts and sermons in addition to his great work, and he is regarded as one of the most profound, learned, and pious divines of the English Church. B. at Heavytree, near Exeter, about 1554; D. 1600.

Hooker, Sir William Jackson, a distinguished English botanist, and, till his death, director of the Royal Gardens at Kew. He abandoned the pursuit of commerce for that of botany, and, in his youth, travelled in Iceland, for the purpose of becoming acquainted with its natural history. Unfortunately losing his collection of specimens collected in that country, he, notwithstanding, published, in 1809, an account of the botany of that island, under the title of "A Tour in Iceland." This was followed, in 1812, by "A Monograph on the British Jungermanniæ;" and, in 1818, he produced a continuation of Curtis's "Flora Londinensis." The "Flora Scotica," "Exotic Flora," a continuation of Curtis's "Botanical Magazine," and the "Botanical Miscellany," were brought out by him between the years 1823 and 1833. In 1837 he completed, in conjunction with Dr. Greville, the "Icones Filicum," in which a complete catalogue of ferns was given, with figures. A complete description of British plants, under the title of "British Flora," was issued under his direction. He also edited the "Journal of Botany," assisted in the management of "The Annals and Magazine of Natural History," and filled the chair of professor of botany in the university of Glasgow; but resigned this to assume the direction of the Royal Gardens at Kew, which, under his control, rapidly became the first establishment of its kind in the world. He was among the foremost professors of systematic botany of the present century. In 1836 he was knighted for his eminent scientific attainments; he was also one of the vice-presidents of the Linnæan Society, an honorary D.C.L. of the university of Oxford, and a knight of the Legion of Honour. B. at Norwich, 1785; D. 1857.

Hooker, Joseph Dalton, son of the above, a living English botanist, who was educated for the pursuit of medicine, which he followed as M.D. for many years; but, on the fitting out of Sir James Ross's expedition to the Antarctic Ocean, in 1839, he was appointed assistant-surgeon to the ship *Erebus*, to which post were added the duties of observing and collecting the botanical specimens of the country to which the expedition was dispatched. On his return he published "Flora Antarctica." In 1848 he set out on a botanical expedition to the Himalayas, during which he discovered many new and valuable plants, although his travels had been conducted under many disadvantages, he having been, at one time, prisoner in a district of the Sikkim Himalaya. In 1852 he produced the fruits of his long travels, in his "Himalayan Journals," besides which he was the means of introducing several valuable varieties of rhododendrons into England. Before his travels, he was a professor in the Museum of Economic Geology, to the Transactions of which institution he has contributed a most valuable and interesting paper on the Vegetation of the Carboniferous Period, as compared with that of the present day. He is a fellow of the Royal Society, a member of the council of the Linnæan Society, and one of the examiners of candidates for the East-India medical service. B. at Glasgow, 1815.

Hoole, John, *hool*, an ingenious writer, was the son of a watchmaker, who was a very able mechanic, and director, for many years, of the machinery at Covent-Garden theatre. At the age of 17 he became a clerk in the India House, but devoted his leisure hours to literary pursuits, particularly the study of the Italian language, of which he acquired considerable knowledge, as appears by his excellent translations, into English, of Ariosto's "Orlando Furioso" and Tasso's "Jerusalem." He also published two volumes of the dramas of Metastasio, and was the author of three tragedies; viz., "Cyrus," acted at Covent Garden in 1768; "Timanthes," performed the year following; and "Cleonice," in 1775. B. in London, 1727; D. 1803.

Hoorn, *hoorn*, a fortified seaport of N. Holland, on the Zuyder Zee, 20 miles from Amsterdam. It has a naval college and a commodious harbour. *Manf.* Woollen cloths and carpets; ship-building also is carried on to a considerable extent. *Pop.* 10,000.—Two noted navigators were born here: Schouten, who discovered Cape Hoorn, or Horn, and so naming it after his native town; and Tasman, the discoverer of New Zealand, or Tasmania.

Hope, Thomas, *hope*, a liberal art-patron and writer on art, was a descendant of the rich banking family of the Hopes of Amsterdam. An enthusiastic admiration for architecture led him, at the age of 18, to travel through Greece, Turkey, Syria, Sicily, France, Germany, and Spain, in search of the greatest examples of the art extant. On his return to England, he commenced applying the principles of which he had made himself master abroad, by extending and enlarging his residence in Duchess Street, Portland Place, which, when finished, he stored with classical vases and statues. In 1820 he issued his splendid work entitled "Household Furniture," which, in 60 folio plates, depicted the magnificent upholstery and decorations of his house. His "Costume of the Ancients" had appeared in 1809; and this work, together with its successor, "Modern Costume," as well as many valuable contributions to fine

art periodicals, greatly tended to improve English taste in matters artistic. The celebrated work, "Anastasius; or, the Memoirs of a Modern Greek," was published by him in 1819, and as it was issued anonymously, Lord Byron was long held to be the only person capable of having been its author. Two other works, both published after his death, came from his pen,—one "On the Origin and Prospects of Man," and the other "An Historical Essay on Architecture." Although a constant patron of the arts, and the first to discern and foster the genius of Thorwaldsen, he became engaged in a dispute with Dubois, a French artist, who, to revenge himself upon him, painted the portraits of Mr. and Mrs. Hope, and exhibited them under the title of "Beauty and the Beast;" but the exhibition was terminated in a sudden manner, by his brother destroying the canvas with his stick. B. about 1770; D. 1831.

HOPE, the name of several towns and parishes in England, with small populations. It is also the name of two United States townships.

HOPE, a town of British Guiana, 1 mile from Fort Wellington. *Pop.* 2,200.

HOPEWELL, *hope'-wel*, the name of several townships of the United States.

HOPEWELL HEAD, a cape of Labrador, which projects into Hudson's Bay, British America. *Lat.* 57° N. *Lon.* 77° W.—HOPEWELL BAY is also adjacent.

HOPKINS, *hop'-kins*, a county of Kentucky, U.S. *Pop.* 14,000.

HOPKINS, Charles, an English poet and classical translator, who, in 1694, published some epistolary poems and translations, and the year following produced a tragedy, called "Pyrrhus, King of Egypt." He translated Ovid's "Tristia" and "Art of Love," and was greatly esteemed by Dryden and other poets. B. at Exeter, 1663; D. 1699.

HOPKINSVILLE, *hop'-kins-veel*, the name of several small towns and villages in the United States.

HOPPNER, John, R.A., *hop'-ner*, one of the first Royal Academicians, and a fashionable portrait-painter in his day. In his early years he was chorister of the Chapel Royal, but afterwards became a student of the Royal Academy, and attracting the notice of the prince of Wales, he painted a considerable number of royal and fashionable portraits, and divided the favour of the highest patrons of art with Lawrence and Opie. He also excelled in landscape-painting. B. in London, 1759; D. 1810.

HOPTON, *hop'-ton*, the name of several parishes in England, with small populations.

HOR, *hor*, a mountain of Arabia Petræa, between the Dead Sea and the Gulf of Akabah. It constitutes a part of Mount Edom, and its form is that of a steep and irregularly-shaped cone, with three peaks. In the highest of these is a grotto, the supposed tomb of Aaron.

HORATII, *ho-ra'-she-i*, the name of three brave Roman brothers, who fought against the three Curiatii of Alba, 667 B.C. Two of them were slain, but the third, by adding artifice to his courage, slew all his antagonists. On his return to Rome he met his sister, who had been betrothed to one of the Curiatii, and on her reproaching him for what he had done, he slew her also. His eminent services, however, were considered an extenuation of his crime, and he was pardoned.

HORATIUS, or HORACE, Quintus Flaccus, *ho-ra'-she-us*, an elegant Roman poet. His father was a freedman; but though poor, he gave his son a good education, placing him first under the best masters at Rome, and then sending him to Athens, that he might study philosophy. Here he was patronized by Brutus, who took him into his army, and made him a tribune; but he had more wit than courage, and at the battle of Philippi he threw away his shield and fled. Being reduced to want, Virgil became his patron, and recommended him to Mæcenas, by whom he was introduced to Augustus, who offered him considerable advancement, which he declined, preferring a private life to the honours of the court. He was greatly esteemed by the highest people in Rome, particularly Mæcenas and Pollio. In the latter part of his life he retired to the country, where he indulged in a philosophical ease, which he has admirably described in his odes. These have been translated into every European language. The last modern edition of his works is Milman's "Life and Works of Horace," published in 1849. B. at Venusia, or Venusium, 65 B.C.; D. 8 B.C.

HORATIUS, Cocles. (*See* COCLES.)

HORBURY, *hor'-ber-e*, a chapelry of Yorkshire, on the Manchester and Leeds Railway, 3 miles from Wakefield. *Pop.* 3,000, mostly engaged in woollen manufactures.

HOREB, *hor'-eb*, a mountain of Arabia Petræa, celebrated in scripture history as Mount Sinai. *Height*, 8,593 feet.

HORLEY, *hor'-le*, a parish of Surrey, on the London and Brighton Railway, 5 miles from Reigate. *Pop.* 1,415.

HORN, CAPE. (*See* CAPE HORN.)

HORN-AFVAN, *horn-af"-van*, a lake of Lappmark, Sweden, falling by the river Skelleften into the Gulf of Bothnia. *Length*, 50 miles; *breadth*, 10. *Lat.* 66° N. *Lon.* between 16° and 18° E.

HORNCASTLE, *horn'-kas-el*, a parish and town of Lincolnshire, on the Bane, 20 miles from Lincoln. It contains a library, various schools, and union workhouse. Tanning is carried on, and it has a trade in corn and wool. A horse fair, which takes place in August, lasts above a week. *Pop.* 5,200.

HORNCHURCH, *horn'-church*, a parish and town of Essex, 2 miles from Romford. *Pop.* 2,400.

HORNE, George, *horn*, bishop of Norwich, and author of the celebrated "Commentary on the Book of Psalms," received his education at Maidstone school, whence he was elected to a scholarship of University College, Oxford, where he took his degree of B.A. He was afterwards chosen fellow of Magdalen College, and applied himself with great diligence to sacred literature, particularly the study of the Hebrew language. In 1753 he entered into orders, and soon became distinguished as an excellent preacher. He appeared also as an acute writer, particularly in controversy, defending the principles of Hutchinson with singular dexterity. In 1768 he was chosen president of his college, on which he took his degree of D.D., and was appointed chaplain in ordinary to the king. His valuable "Commentary on the Psalms" was produced in 1776. B. at Otham, Kent, 1730; D. at Bath, 1792.

HORNE, Rev. Thomas Hartwell, an eminent biblical writer, who was ordained by the bishop of London, without having taken a degree at a university, in consequence of the high estimation in which that prelate held his "Introduction to the Study of the Scriptures." After having been presented to the rectory of two united parishes in the city of London, he published a new and enlarged edition of the above popular work; besides which he produced "A Compendious Introduction to the Study of the Bible," "A Manual of Biblical Biography," "A Manual of Parochial Psalmody," and many other theological works.

HORNE, Richard Henry, a living English littérateur, who was at first sent to Sandhurst for the purpose of being educated for the military service of the East-India Company, bu left that seminary to enter, in 1826, the Mexican navy, as midshipman, while that republic was at war with Spain. On the termination of the war, he went to London, and commenced writing extensively for periodical publications. In 1827, he produced "The Death of Marlowe," and "Cosmo de' Medici," two dramas written upon the Elizabethan model; these being followed by "The Death Fetch," and "Gregory the Seventh;" to which latter play was appended a critical essay on tragic influence. He appeared to become greatly disappointed in the expectations he had formed on commencing his literary career; for, in 1841, he published a singular pamphlet, called "An Exposition of the False Medium excluding Men of Genius from the Public." His plays were not successful either on the stage or with the reading public. In 1841, he wrote a "Life of Napoleon," which was published in Tyas's illustrated series. In 1843, he produced an epic poem, thus singularly announced:—"Orion, an Epic Poem. Price One Farthing," which was generally supposed to be a sarcastic mode of expressing what he thought the public appreciation of such works. Its success was very great, however, first at one far-

thing, next at a penny, and afterwards at half a crown and five shillings. "A new Spirit of the Age" was published in 1844; "Ballad Romances" in 1846; and "Judas Iscariot," a miracle play, with Poems, in 1848. In addition to these, he wrote extensively for the periodicals and reviews of the time. In 1852, he, with Mr. Howitt and others, emigrated to Australia; where, after undergoing many privations as a gold-digger, he became chief of mounted police, and afterwards a gold commissioner; a narrative of his adventures having been contributed, at various times, to the pages of "Household Words." B. about 1807.

HORNE TOOKE. (*See* TOOKE.)

HORNER, Francis, *hor'-ner*, an English politician, writer on political economy, and one of the founders of the "Edinburgh Review." After having received his education at the High School and the university of Edinburgh, he embraced the profession of the law, intending to practise at the Scottish bar. In 1802, he went to London to seek employment in the English courts, and became acquainted with Sir James Mackintosh, Sir Samuel Romilly, and other leading Whigs. After having sat as commissioner at the board of the East-India Company, he was, in 1806, returned to parliament for St. Ives, and gradually assumed importance in his new career. His first great speech was made in 1810, on the subject of the alleged depreciation of bank notes; he was appointed one of the members of the Bullion Committee, his influence in the House of Commons continuing to increase. In 1814, he went abroad, and travelled in Switzerland and the north of Italy. His last speech was in favour of the claims of the Catholics, in 1816. A pulmonary disease compelled him, in the same year, to visit the south of Europe, where he died. B. in Edinburgh, 1778; D. 1817.

HORNSEA, *horn'-se*, a parish and town of Yorkshire, on the North Sea, 14 miles from Hull. At this point the North Sea has made considerable encroachments on the land. *Pop.* 1,000.

HORNSEY, *horn'-se*, a parish of Middlesex, forming a very pleasant suburb of London, with whose citizens it is in much favour as a place of residence. *Pop.* 8,000.

HORROX, Jeremiah, *hor'-rocks*, an English astronomer, who received an academical education at Emmanuel College, Cambridge, after which he retired to Hool, near Liverpool, where he devoted himself to astronomical observations. He was the first who observed the transit of Venus over the sun's disc, his account of which was published by Hevelius, at Dantzic, in 1661, under the title "Venus in Sole visa, anno 1639." B. at Toxteth, about 1619; D. 1640.

HORSA, *hor'-sa*, a Saxon prince, the brother of Hengist (*see* HENGIST), and one of the founders of the kingdom of Kent. He was killed in the battle at Eaglesford, now Aylsford, in 455.

HORSE, THE, *horse*, a small island in the Firth of Clyde, off the entrance of Ardrossan harbour, Ayrshire.—Another small island off the entrance of Castle-Townsend harbour, Cork, having a tower which serves as a landmark.

HORSENS, *hor'-sens*, a seaport of Jutland, Denmark, on the Horsens Fiord, 25 miles from Aarhuus. It has several churches and a good harbour. *Manf.* Flannels and other woollen stuffs; and it carries on a trade in corn and tallow. *Pop.* 5,000. *Lat.* 55° 52′ N. *Lon.* 9° 52′ E.

HORSFORD, *hors'-ford*, a township of Yorkshire, on the Aire, here crossed by a bridge, 5 miles from Leeds. *Pop.* 4,584.

HORSHAM, *hor'-sham*, a parish, town, and borough of Sussex, on the Adur, 20 miles from Brighton, on the London and Brighton Railway. It has a church, with a lofty spire and large east window; and there are several other places of worship, a county gaol, townhall, and union workhouse. *Pop.* 6,000.

HORSLEY, *hors'-le*, the name of several parishes of England, with small populations.

HORSLEY, John, a learned antiquary, who was educated first at Newcastle and afterwards in Scotland, where he took his degree of M.A. He became pastor of a dissenting congregation in his native country. He is the author of a work entitled "Britannia Romana," folio, which gives a copious and exact account of the remains of the Romans in Britain. D. 1731.

HORSLEY, John Calcott, an English painter and A.R.A., who, from his earliest youth, evinced a talent for the fine arts. The first work which attracted the attention of the public towards him was his "Leaving the Ball," exhibited in 1840, a success which was followed up by his gaining a prize of £200 for his cartoon of St. "Augustine Preaching," in 1843. He has since painted two frescoes for the House of Lords,—"The Spirit of Religion" and "Eve surprised;" and has been one of the best among the exhibitors in the yearly display of artistic productions at the Royal Academy. His chief works are "Malvolio," "Master Slender," "Scene from Don Quixote," "L'Allegro and Il Penseroso." In 1855 he was elected an associate of the Royal Academy. B. in London, 1817.

HORSLEY, Samuel, a prelate of the established Church of England. He was educated at Westminster School and Trinity Hall, Cambridge. After entering into holy orders in 1759, he became rector of Newington, on the resignation of his father; in 1767 he was elected fellow of the Royal Society, of which body he was made secretary in 1773. Soon after his appointment as archdeacon of St. Alban's, in 1781, he entered into a theological controversy with Dr. Joseph Priestly, against whom he combated the doctrines of materialism and Unitarianism. In 1788 he was ordained bishop of St. David's, and on taking his seat in parliament, he displayed great political capacity, strongly supporting the measures of Mr. Pitt; for which services he was made, successively, bishop of Rochester and of St. Asaph. He published a large number of theological works, chiefly controversial, but one of them, the "Seventeen Letters to Dr. Priestly," was held to be the exponent of a sound and orthodox theology. B. 1733; D. 1806.

HORTEN, *hor'-ten*, a town of Aggerhuus, Norway, on the Gulf of Christiania, opposite Moss; 32 miles from Christiania. This is one of the chief stations of the Norwegian fleet, and being a principal naval port, possesses an arsenal and large building-yards. *Pop.* 3,000.

HORTENSE, Eugénie de Beauharnais, *hor'-tense*, queen of Holland, and mother of the present emperor of the French, was daughter of Alexander, viscount de Beauharnais, and Josephine Tascher de la Pargerie, afterwards first wife of Napoleon I., and empress of France. On the marriage of her mother to Bonaparte, she became, by her beauty, wit, and accomplishments, the ornament of the consular and imperial courts. She was espoused, though unwillingly, in 1802, to Louis Bonaparte; but the marriage afforded little happiness to either party. Becoming a queen by the elevation of Louis Bonaparte to the throne of Holland in 1806, she displayed little affection for her husband's kingdom, and lived in it only as seldom as she was compelled. After the abdication of Louis, in 1810, she obtained a divorce from him, and took up her residence in Paris, where, still retaining her title of queen, she became the centre of a most distinguished and fashionable circle. She remained in Paris after the first return of the Bourbons, and was accused of assisting Napoleon to re-enter France, and compelled to depart from the capital in 1815. After having wandered about Germany and Switzerland for some time, she retired, in 1817, under the title of the duchess of St. Leu, to the château of Arenenberg, in the canton of Thurgovia, on the borders of Lake Constance. She had by her marriage with King Louis three children: Napoleon-Louis-Charles, born in 1802; Napoleon-Louis, born in 1804; Charles-Louis-Napoleon, born in 1808. The first died young, the second perished in the unfortunate expedition to Forli in 1831, the third is the present emperor of the French. B. at Paris, 1783; D. 1837.

HORTENSIUS, Quintus, *hor-ten'-she-us*, a Roman orator, who pleaded his first cause, with great applause, at the age of 19, B.C. 94. He became successively military tribune, prætor, and consul. B. 114 B.C.; D. 50 B.C.—HORTENSIA, daughter of the above, who inherited his eloquence. When the Roman women were required to render on oath an account of their property, she pleaded the cause of her sex with such force that the decree was annulled.

HORTON, GREAT, *hor'-ton*, a chapelry of Yorkshire. It contains a mechanics' institute and free school. *Pop.*

17,615.—Horton, sometimes with various affixes, is the name of several parishes, &c., in England.

Horus, *hor'-us*, in Egyptian Or, an Egyptian god, son of Osiris and Isis, who was secretly brought up among the lagunes of Bouto. When he reached manhood, he attacked his enemy Typhon, the god of darkness, and killed him. He afterwards travelled through Egypt, introducing everywhere civilization and the arts. His career greatly resembles the Apollo of the Greeks.

Horwich, *hor'-idj*, a chapelry of Lancashire, on the Lancashire and Yorkshire Railway, 5 miles from Chorley. Calico-printing and bleaching are carried on. *Pop.* 4,000.

Hosea, *ho-ze'-a*, the most ancient of the twelve minor prophets, of whose birthplace and history nothing is known. He prophesied in the reign of Jeroboam, the second king of Israel, and in that of Uzziah.

Hoshea, or Hosea, *ho-she'-a*, king of Israel, who succeeded Pekah, whom he slew, and, six years after, ascended the throne, B.C. 728. The Assyrians invaded his kingdom during the first years of his reign, and, unable to resist them, he paid the tribute; but, having sought the aid of So, king of Egypt, to throw off their yoke, the Assyrians defeated him, and carried him and the ten tribes away into Assyria, after which nothing is known of him.

Hoshungabad. (*See* Saugur.)

Hospital, William Francis Antony, marquis de l', *hose'-pe-tal*, a French mathematician. He evinced, at an early age, a genius for mathematical study, and, when only 15, solved a difficult problem of Pascal's. He served for some time in the army, which he left on account of a defect in his sight. In 1693 he was admitted an honorary member of the Academy of Sciences at Paris, and published a work on Newton's Fluxions, being the first Frenchman who wrote on that subject. He afterwards published another mathematical work. B. at Paris, 1661; D. 1701.

Hospitallers, *hos'-pi-tal-lers*, the general title of several religious orders, whose object was the reception and fostering of travellers, pilgrims, the poor, and the sick. The most ancient of them was founded at Sienna, at the end of the 9th century, by a pious inhabitant of that city, who there established the hospital Della Scala. The chief order was the Brother Hospitallers, known also as the Knights of St. John of Jerusalem, the Knights of Rhodes, and, lastly, as the Knights of Malta. This order was established in Jerusalem, after the taking of that city by the crusaders, in 1099, by Gerard Tour. His intention was to provide hospitality for pilgrims, and attendants while sick to cure their maladies. Under Raymond Dupuy, in 1121, the knights defended themselves, by force of arms, against the infidels, and thus became at once a religious and military body. When Saladin took Jerusalem, in 1188, they retired first to Acre, and afterwards to Rhodes, in 1310. Driven from this island, after a long siege and memorable defence, they established themselves, in 1530, in the island of Malta, which Charles V. had ceded to them. From that time the order was known as the Knights of Malta, and was, during three centuries, the terror of the infidels. Bonaparte, on his way to Egypt, in 1798, took possession of Malta, in consequence of an understanding between Hompesch (*see* Hompesch), the last grand master, and the French Directory. After this the order existed in name only.

Hospodar, *hos'-po-dar*, the name borne by the sovereigns of Wallachia and Moldavia. It is said to be derived from two Sclavonic words signifying 'gift of God,' while others affirm it to come from the Greek word *despotes*, 'a lord.' The first to bear the title were a certain Raddulo in Wallachia, and Bogdan in Moldavia, both of whom lived in the first half of the 13th century. Wallachia submitted to Bajazet in 1391, and Moldavia accepted the Turkish rule in 1536. The hospodars were, for a considerable period, elective sovereigns, being chosen from among the inhabitants; but, after many struggles, the sultans of Turkey succeeded in becoming the nominators of the dignity. Since the Greek revolution of 1821, they have been nominated by the assembly of Boyards, under the sanction of the Porte and of the emperor of Russia.

Hoste, *hoste*, an island of Terra del Fuego, separated by Ponsonby Sound from Navarin Isle, on the E., and by Beagle Channel from King Charles' Southland on the N. *Length*, 90 miles; *breadth*, 50. *Lat.* 54° S. *Lon.* 69° W.

Hottentots, *hot'-en-tots*, a people who inhabit the S. of the continent of Africa, bordering on the Cape of Good Hope. Their country extends eastward along the seacoast to the territory of the Kaffirs, and is bounded N. by the Orange river, which separates them from the Bechuanas and Damaras. The races of Hottentots may be divided into three: the inhabitants of the colony; the Bosjesmans or wild Hottentots, who inhabit the mountainous districts extending along the northern frontier of the colony; and the Namaquas, who occupy the N.W. coast. Various missionaries are stationed throughout the country. (*See* Africa.)

Houdon, *hoo'-dawng*, a celebrated French sculptor, who, after studying in Italy, returned to Paris, and executed the busts of Voltaire, Rousseau, Molière, Franklin, Buffon, Diderot, Catharine II., &c. He became, in 1778, member and professor of the Academy of Fine Arts. He was invited to Philadelphia to carve a statue of Washington. B. at Versailles, 1741; D. at Paris, 1828.

Houghton, *hou'-ton*, the name of several townships of England, with small populations.

Houghton-le-Spring, a parish and town of Durham, on the N. of England Railway, 6 miles from Durham. *Pop.* 4,200.

Houghton, Major, an English traveller, who, in 1789, was sent out to determine the course of the Niger, and succeeded in penetrating very far into the interior of Africa; but was seized with dysentery at Jarra, in 1791, where he died. B. about 1750.

Hounan, *hoo'-nan*, a province of China, inclosed by Quang, Kwi-tcheou, Houpe, and Kiangsi. Its surface is elevated and fertile. Its name means 'south of the lake,' all its rivers being tributary to the lake Tongting, to the N. *Pro.* Tea, cotton, and rice. *Pop.* Supposed about 20,000,000.

Hounslow, *hounz'-lo*, a town of Middlesex, on the Colne, at the verge of Hounslow Heath, 9 miles from London. A large barrack and extensive gunpowder-mills are here. *Pop.* 4,000.—On the heath are many vestiges of ancient encampments.

Houpe, *hoo'-pe*, 'north of the lake,' a province in the centre of China proper, traversed by the Yang-tse-kiang. *Pro.* Tea and rice. *Pop.* about 30,000,000.

Houra, *hou'-ra*, a town of British India, forming a suburb of Calcutta, to which it is opposite. Here is the terminus of the railway to the N.W. provinces.

Houris, *hoor'-es*, names given by the Mohammedans to the celestial beauties, who, according to the promises of the Koran, are to be the reward, after death, of virtue and a belief in the Prophet. They are said to enjoy an eternal youth and beauty.

Hourn, Loch, *hoorn*, an inlet of Inverness-shire, running inland from the Sound of Skye. *Length*, 13 miles; *width* at mouth, 5 miles.

Houssa, or Haoussa, *hous'-sa*, an extensive country of Central Africa, but little known to Europeans. (*See* Africa.)

Houssaye, Arsène, *hous'-sai*, a modern French littérateur, who went to Paris early in life, to push his fortunes as an author. He began his career in 1836, with the publication of two romances. His essays in art criticism, and especially his writings illustrative of the biographical history of the regency, attracted the notice of the reading public towards him. During the revolution of 1848, he presented himself as a candidate for the suffrages of his native province, but was beaten by M. Odillon Barrot. Through the influence of Mdlle. Rachel, he was made manager of the Comédie Française in 1849, and succeeded in restoring that theatre to a most prosperous condition, producing more than a hundred new works of the best French playwrights. After the *coup d'état* of 1851, he wrote the cantata for Mdlle. Rachel, entitled "L'Empire c'est la paix." On the death of his wife, in 1856, he resigned the appointment. His literary performances include romances, plays, poems, essays, and criticisms; many of them displaying his strong predilection for the age of Louis XV., while all are characterized by refinement, grace, and lively wit. B. at Bruyères, near Laon, 1815.

HOUSTON, Samuel, *hoos'-ton*, an American general, who began life in a merchant's office, but, spurred with a love of adventure, went to reside among the Indians, with whom he stayed five years. Returning to his native state, he founded a school on the borders of the prairie for the children of the red men. In the war against the English in 1813, he served with much distinction under General Jackson, and was severely wounded at the Horse-shoe Falls. Subsequently General Jackson employed him to negotiate a treaty with his former hosts, the Red Indians. After having brought this mission to a successful termination, he resolved to proceed to Nashville to study the law; and soon afterwards he obtained considerable practice by his great abilities in his new profession. In 1821 he was appointed major-general of the militia of the state of Tennessee. On the breaking out of war with Mexico, he was named general-in-chief, and at the battle of Saint Jacinto, he, with 700 men, took or killed the 1,800 soldiers of Santa Anna, who was himself among the prisoners. The inhabitants of Texas, out of admiration for his bravery, appointed him president of the new republic; but on the incorporation of Texas with the other states of the Union, he became a member of Congress. B. at Rockbridge, Virginia, 1793.

HOUSTON, a parish of Renfrewshire, 5 miles from Paisley. *Pop.* has been estimated at 2,900, mostly engaged in cotton-works.

HOUSTON, the former capital of Texas, N. America. *Pop.* 2,500. (*See* AUSTIN.)

HOVE, *hove*, a parish and town of Sussex, on the S. Coast Railway, 1 mile from Brighton. *Pop.* 5,000.

HOVEDEN, Roger de, *hove'-den*, an English historian in the reign of Henry II., who is said to have been an ecclesiastic and lawyer, two professions then commonly united. His "Annals of English History from 731 to 1192" were printed at London in 1595, and at Frankfort in 1601, and, lately, in Bohn's "Antiquarian Library." Lived towards the end of the 12th century.

HOWARD, *how'-ard*, the name of two counties and several townships in the United States.

HOWARD, Charles, Lord Howard of Effingham, lord high admiral of England, and commander, in 1588, of the fleet which destroyed the invincible armada. In 1596, he, with the earl of Essex, burnt a second Spanish fleet in the harbour of Cadiz, for which he was created earl of Nottingham. When the earl of Essex made his attempt at rebellion, he was appointed to command the army which acted against and defeated him, under the title of lieutenant-general of England. After Queen Elizabeth's death, he still continued to enjoy the most distinguished posts under her successor, James I., discharging every duty with a singular ability and honourable zeal. B. 1536; D. 1624.

HOWARD, Henry, earl of Surrey. (*See* SURREY.)

HOWARD, Catherine, fifth wife of Henry VIII., was the daughter of Edmund Howard, third son of the second duke of Norfolk. She was married, in 1540, to the king; but, two years afterwards, he sent her to the scaffold, under pretext of unfaithfulness. B. about 1520.

HOWARD, Edward, a naval commander, who entered early the maritime service, and, about 1494, was knighted. In 1512 he was sent as lord high admiral of England with a large fleet against France, the coasts of which he ravaged. He also defeated the enemy's fleet off Brest; but, the year following, he was slain in boarding the French admiral's ship, and his body thrown into the sea. D. 1513.

HOWARD, Henry, R.A., and professor of painting in the Royal Academy. After receiving some tuition from Reinagle, he became a student of the Royal Academy in 1783, displaying great talent as a draughtsman, and carrying off the highest honours of the school of art in which he was being educated. In 1791 he went to Italy, and studied at Rome with Flaxman. On his return to England, he was extensively employed to illustrate books with steel plates, and, at the same time, he continued to send to the exhibitions of the academy a number of paintings on classical subjects. In 1801 he was elected an associate, and, in 1808, an academician, and, subsequently, secretary to the Royal Academy. At the first cartoon competition, in 1843, although 73 years of age, he contributed a drawing,—

"Man beset by Contending Passions," which gained a prize of £100. B. 1769; D. 1847.

HOWARD, John, an eminent philanthropic English gentleman, was the son of a tradesman in London, who died while he was an infant, leaving him in the hands of guardians, by whom he was apprenticed to a grocer. His constitution, however, being delicate, and having an aversion to trade, he purchased his indentures from his master, and went abroad. On his return he lodged with a widow lady at Stoke Newington, who attended him with such care in his illness, that he conceived an affection for her, though she was twenty-seven years older than himself, and they were married; but Mrs. Howard died about three years afterwards. In 1756 he embarked for Lisbon, intending to aid the sufferers by the great earthquake, but, on the passage, the ship was taken and carried to France. On his release he went to Italy, and at his return settled in Hampshire. In 1758 he married a second wife; but she died in childbed in 1765, leaving him one son. He was at this time resident at Cardington, near Bedford, where he purchased an estate. In 1773 he served the office of sheriff, which, as he declared, "brought the distress of the prisoners more immediately under his notice," and led him to form the design of visiting the gaols through England, in order to devise means for alleviating the miseries of the sufferers. In 1774 he was examined before the House of Commons on the subject of the prison regulations, and received the thanks of the house. He then extended his benevolent views to foreign countries, making excursions to all parts of Europe. In 1777 he published "The State of Prisons in England and Wales, with Preliminary Observations, and an Account of some Foreign Prisons." In 1780 he published an appendix to it, with an account of his travels in Italy; and in 1784 a new edition appeared, with considerable additions. About this time some admirers of Mr. Howard opened a subscription for erecting a statue to his honour, but at his request the design was dropped. In 1789 he published an "Account of the Principal Lazarettos in Europe." In this work he signified his intention of visiting Russia, Turkey, and of extending his route into the East. "I am not insensible," he said, "of the dangers that must attend such a journey. Should it please God to cut off my life in the prosecution of this design, let not my conduct be uncandidly imputed to rashness or enthusiasm, but to a serious, deliberate conviction that I am pursuing the path of duty; and to the sincere desire of being made an instrument of more extensive usefulness to my fellow-creatures, than could be expected in the narrower circle of a retired life." He fell a sacrifice to his humanity; for, visiting a sick patient in the Crimea, who had a malignant fever, he caught the infection. A statue of Mr. Howard, erected by public subscription, was placed in St. Paul's Cathedral, with an inscription. B. about 1726; D. 1790.

HOWDEN, John Hobart Caradoc, second lord, *how'-den*, a living English diplomatist, in early life served in the army, and was engaged in the battle of Navarino, where he was wounded. He was sent as English commissioner to the siege of Anvers in 1832, and again to the Spanish constitutional army in 1834. In 1847 he was appointed minister plenipotentiary to Rio Janeiro, to settle the Argentine question. In 1850 he became ambassador to the court of Madrid, and in 1854 major-general. B. at Dublin, 1799.

HOWDEN, a parish and town of Yorkshire, on the Ouse, here crossed by a ferry, 24 miles from Hull, on the Hull and Selby Railway. It contains a church, and the remains of the ancient palace of the bishops of Durham. *Pop.* 2,235.

HOWE, Richard, Earl, *how*, a gallant English admiral, entered the naval service at the age of 14, and at 20 was appointed to the command of a sloop of war, in which he beat off two large French frigates, after a gallant action; for which he was made a post-captain. After a variety of active service, he obtained the command of the *Dunkirk*, of 60 guns, with which he captured a French 64 off Newfoundland. In 1757 he served under Admiral Hawke, and, the year following, was appointed commodore of a squadron, with which he destroyed a number of ships and magazines at St. Malo. In 1759, Prince Edward, afterwards duke

of York, was put under his care, and the commodore, on the 6th of August, took Cherbourg and destroyed the basin. This was followed by the unfortunate action off St. Cas, where he displayed great courage and humanity in saving the retreating soldiers at the hazard of his own life. The same year, at the death of his brother, he became Lord Howe, and soon afterwards had a great share in the victory over Conflans. When Admiral Hawke presented him, on this occasion, to the king, his majesty said, "Your life, my lord, has been one continued series of services to your country." In 1763 he was appointed to the Admiralty board, where he remained till 1765, when he was made treasurer of the navy. In 1770 he was appointed commander-in-chief in the Mediterranean. In the American war he commanded the fleet on that coast. In 1782 he was sent to the relief of Gibraltar, which service he performed in sight of the French and Spanish fleets, who, however, avoided an action, though far superior in numbers. In 1783 he was made first lord of the Admiralty, which office he soon afterwards resigned; but, at the end of the year, he was re-appointed, and continued in that station till 1788, when he was created an English earl. In 1793 he took the command of the Channel fleet, and, June 1, 1794, he obtained his splendid and decisive victory over the French fleet. The same month, he was visited on board his ship at Spithead by the king and queen, when the king presented him with a magnificent sword, a gold chain, and medal. He also received the thanks of both houses, the freedom of the city of London, and the applause of the nation. In 1795 he became general of the marines, and, in 1797, was honoured with the garter. B. in London, 1725; D. in London, 1799.

Howitt, William, *how'-it*, a living English littérateur, the son of a member of the Society of Friends, who educated him and his five brothers in the principles of Quakerism. Although he had been sent to several schools kept by Quakers, his education was almost entirely owing to his own perseverance. Up to his twenty-eighth year, when he married and commenced with his wife a career of literature, his time had been spent in acquiring mathematical and scientific knowledge, in studying the classical authors, and in mastering the German, French, and Italian tongues. His studies were varied by rambles in the country, shooting, and fishing; and these again led him to obtain an amount of information relative to English rural life and nature, which was afterwards reproduced in his works. The lady who became his wife was, like himself, a member of the Society of Friends, and strongly imbued with literary tastes. In 1823, the first year of their marriage, they published together a volume of poems, entitled, "The Forest Minstrel," and followed it up by contributions to the "Amulet," "Literary Souvenir," and other annuals then in vogue. These contributions, with some original pieces, were collected and published in 1827, under the title of "The Desolation of Eyam," &c. The "Book of the Seasons," "Popular History of Priestcraft," "Tales of the Pantika; or, Traditions of the most Ancient Times," "Rural Life of England," "Colonization and Christianity," and several other works, were produced by him during the ten following years. In 1839 and succeeding year, he wrote his "Boy's Country Book," and "Visits to Remarkable Places." In 1840 he went to Germany for the purpose of educating his children, and his sojourn there led to the production of the "Rural and Domestic Life of Germany," "German Experiences," &c. In 1847 and the four following years he published his "Homes and Haunts of the most eminent English Poets," "The Hall and Hamlet; or, Scenes and Characters of Country Life," "The Year-Book of the Country," and a novel, "Madame Dorrington, of the Dene." In 1846 he contributed to the "People's Journal," and afterwards became part proprietor of it; but a quarrel between himself and his partner led him to establish a rival publication,—"Howitt's Journal," which, however, like its predecessor, was subsequently unsuccessful. In 1852 he, with his two sons and Mr. R. H. Horne (*see* Horne), sailed for Australia, where he, for some time, worked as a "digger." He also visited Tasmania, Sydney, &c., and communicated his observations in a number of letters to the *Times* newspaper, which he afterwards collected and published with some new matter, under the title of "Land, Labour, and Gold," in 1855. B. at Heanor, Derbyshire, 1795.

Howitt, Mrs. Mary Botham, a living English authoress, wife of the above, came of a family of Quakers, and commenced her literary career, shortly after her marriage, with a volume of poems, called the "Forest Minstrel." After having published several volumes of graceful poetry, and a number of books for the young, she, on visiting Germany with her husband, proceeded to acquire the Swedish and Danish languages, with a view of translating the novels of Miss Bremer and the tales of Hans C. Anderssen. The translations of Miss Bremer's works were published between 1844 and 1852; and the "Improvisatore," a reproduction in English of Anderssen's novel, in 1857. Besides being an industrious contributor to the periodicals, she has written a volume of "Ballads and other Poems," "Sketches of Natural History in Verse;" two novels, called, "The Heir of Wast-Wayland," and "Wood Leighton," and has translated "Ennemoser's History of Magic" for Bohn's Scientific Library. The valuable work entitled "Literature and Romance of Northern Europe," published as the joint production of herself and husband, is almost entirely her work. B. at Uttoxeter, Staffordshire, about 1804.

Howth, *houth*, a parish and fishing-village of Ireland, on a peninsula which forms the northern boundary of the bay of Dublin, 8 miles from that city. From its elevation, and the two lighthouses built on it, it constitutes an excellent landmark to the mariner by day and night. A magnificent harbour has been constructed here, in order to afford shelter to such vessels as are bound for the port of Dublin; but, from the accumulation of sand, and other causes, it has become almost useless. *Pop.* 2,600.

Hoxton, *hox'-ton*, a parochial district of Middlesex, forming a suburb of London. *Pop.* 22,000.—The dean and chapter of St. Paul's claim that this manor belonged to them before the Conquest.

Hoy, *hoi*, one of the Orkney islands, 2 miles from Stromness. The cliffs here are very fine, and there is a harbour at Longhope, from which steamers sail weekly for Leith. *Length*, 15 miles; *breadth*, 5. *Pop.* 340.

Hoya, *ho'-ya*, a considerable province in the S.W. of Hanover, between the Hunt and Weser rivers. *Pop.* 130,000.—Its capital is of the same name. *Pop.* 2,200.

Hoylake, *hoi'-laik*, a village of Chester, at the mouth of the Dee, 11 miles from Great Neston. It is much frequented for bathing purposes, and there are two lighthouses here which guide the mariner into the safe anchorage of Hoylake Roads.

Hoyland, *hoi'-land*, the name, with various affixes, of several parishes in England, with small populations.

Huahrine. (*See* Society Islands.)

Huallaga, *oo-al-la'-ga*, a river of Peru, rising in the Andes, at a height of 13,200 feet above the sea, and, after a course of about 500 miles, joining the Amazon at *lat.* 5° S.; *lon.* 76° 40′ W. In its course it forms several cataracts.

Huamanga, *oo'-a-man-ga*, a city of Ayacucho, Peru, 140 miles from Cuzco. It has a cathedral, several other edifices for religious purposes, and a university. *Pop.* about 16,000.— This place was founded in 1539, by Pizarro; and, in 1824, the Spaniards were here defeated by the Peruvians, the victory sealing the fate of the dominion of the dons in S. America.

Huarté, John, *hoo-ar'-tai*, a Spanish philosopher, who, in 1578, published a work which excited considerable interest at the time: it was entitled "A Trial of Wits; or, a Treatise on the different Kinds of Genius among Men, with Rules and Directions showing to what Kind of Study any Person is best adapted." This book has been translated into English, French, and German, and has been condemned at Rome. B. at Navarre, about 1530; D. about 1600.

Huber, John, *hoo'-bair*, a Swiss draughtsman and naturalist, who was eminent for his talent in cutting portraits out of paper. He painted several pictures illustrating incidents in the private life of Voltaire, with whom he lived on intimate terms during twenty years. He wrote a clever work, entitled "Observations on the Flight of Birds of Prey," which was published at Geneva in 1784. B. at Geneva, 1722; D. 1790.

HUBER, Francis, a distinguished naturalist, son of the preceding, by whom he was taught to observe nature from his earliest years, and he studied with exemplary patience and success the habits of bees. While young, he lost his sight, but nevertheless continued to prosecute his studies with ardour, chiefly through the aid of Francis Burnens, his servant, and his wife, Aimée Lullin. In 1792, he published his discoveries, under the title of "New Observations on Bees," which were conveyed under the form of a series of letters to Charles Bonnet. He published a second and enlarged edition of the same in 1814. B. at Geneva, 1750; D. at Lausanne, 1830.

HUBERTSBURG, *hoo'-bairts-boorg*, a village of Saxony, 24 miles from Leipsic. In the royal castle of this place was signed, in 1763, the peace by which was ended the Seven Years war.

HUBNER, Alexander, Baron de, *hoob'-ner*, a German diplomatist, who, after finishing his studies at the university of Vienna, went to reside in Italy, and on his return attracted the notice of Prince Metternich, who appointed him to an important position in his cabinet. In 1837, he served on the staff of the Austrian ambassador at Paris, but was recalled soon after; and in 1841, on the resumption of diplomatic relations between Portugal and Austria, he was dispatched as secretary of embassy to Lisbon, a post he vacated, to assume that of Austrian consul-general at Leipsic, in 1844. When the Italian revolution of 1848 broke out, he was acting as secretary to the viceroy of Lombardy, was made prisoner by the Italians, and retained as a hostage for several months; but was subsequently released; whereupon he retired into private life. When Prince Schwartzenburg had made head against the Italian and Viennese insurgents, he was recalled, and intrusted with the issuing of proclamations and imperial manifestoes to the populations of Austria and Italy. In 1849, he became Austrian minister plenipotentiary to the French republic, a post he retained for several years. In 1856, he was one of the plenipotentiaries of the belligerent powers who signed the treaty of Paris. B. at Vienna, 1811.

HUC, Abbé, *hook*, a French missionary priest, who, after being ordained, embarked, in 1839, for China. After a voyage of five months, he arrived at Macao, and entered upon the functions of a former missionary, who had been put to death. For five years he travelled throughout China and Tartary, and at length took up a residence in a Buddhist monastery, to study the language and literature of Buddhism. Commanded by the emperor of China to return, he travelled back to Macao, and embarked there, in 1852, for France, but stopped at Ceylon, whence he wandered through India, Egypt, and Palestine. On his return to France, at the beginning of 1853, he collated and arranged his notes of travel, and published "Annals of the Propagation of the Faith in China;" "Travels in Tartary, Tibet and China;" "The Chinese Empire and Christianity in China;" all of which became very popular, and were translated into most of the European languages. Several of his works have been reproduced in an English form, and have attracted considerable attention. B. at Toulouse, 1813.

HUDDERSFIELD, *hud'-ders-feeld*, a parish and town of Yorkshire, on the Colne, 8 miles from Halifax. It is one of the principal seats of the woollen manufacture, and has several churches and chapels, a proprietary college and various schools, mechanics' institute, library, news-room, philosophical hall. *Manf.* Narrow and broad cloths, serges, kerseymeres, and various fancy goods. The cloth-hall is, perhaps, with the exception of Leeds, the greatest mart for woollens in the kingdom. It is a circular building, two stories high, divided into two courts, and subdivided into ranges like streets, where the merchandise is exposed upon stalls. It is attended by nearly a thousand manufacturers weekly. The connection of Huddersfield, by canal and railway, with the principal cities and towns of England facilitates its trade, which possesses great advantages in the proximity of the coal-mines. There are several medicinal springs in the neighbourhood. *Pop.* 50,000.

HUDSON, Henry, *hud'-son*, an English navigator, and discoverer of the Arctic strait called after him. He made several voyages to seek the north-west passage to India and China; in the last attempt he discovered the bay now known as Hudson's Bay, where he wintered; but, on his passage home, some of his crew mutinied, and forced him, his son, and others, into a boat, which was never afterwards heard of. D. about the middle of the 16th century; D. about 1611.

HUDSON, Thomas, a popular English portrait-painter, the predecessor and master of Sir Joshua Reynolds. His greatest work is the portrait of Charles, duke of Marlborough, at Blenheim. His portrait of Handel, hanging in the gallery at Oxford, is said to be the only one the great musician ever sat for. He acquired a large fortune by the practice of his art, and retired to Twickenham, when his former pupil, Sir Joshua Reynolds, became the great English portrait-painter. B. in Devonshire, 1701; D. 1779.

HUDSON, a city, port of entry, and capital of Columbia county, New York, U.S., finely situate on the E. bank of the Hudson, which is navigable to this place for the largest ships, 30 miles from Albany. It was founded in 1784, and its population and importance rapidly increased. It is regularly built, and has several places of worship, a court-house, and literary society. The creeks on the borders of the town afford fine seats for mills and manufactories, and a large number of steamboats go up to New York, while a railway connects it with Boston. *Lat.* 42° 14′ N.

HUDSON, a river of New York, U.S., one of the most picturesque and navigable in America, rises in the mountainous region to the W. of Lake Champlain, and, after a southerly course of more than 300 miles, falls into the Atlantic below New York. It is navigable as far as Albany, near the head of the tide, 150 miles from New York. It is connected by fine canals with lakes Champlain and Erie. Fulton, for whom the Americans claim the honour of being the first who built a vessel propelled by steam, launched his boat on this river in 1807.

HUDSON'S BAY, a large bay of British America situate to the N. of Canada, and inclosed by land, excepting to the N.E., where Hudson's Straits communicate with Davis's Straits. *Length*, 900 miles; *breadth*, 600. *Lat.* 51° to 64° N. *Lon.* 77° to 95° W.—It obtained its name from Henry Hudson, who discovered it in 1610.

HUDSON'S BAY TERRITORY. Under this name is comprised a large proportion of N.W. America, extending from *lat.* 49° to 70° N., and from Cape Charles, Labrador, to the mouth of the Mackenzie river. *Area*, between 2,000,000 and 3,000,000 square miles. *Rivers.* The chief are the Moose, Attitibbe, Mackenzie, Nelson, Churchill, and Coppermine. *Zoology.* Reindeer, musk-ox, moose-deer or elk, and other kinds of deer; bears, wolves, wolverines, foxes, beavers, otters, racoons, and other small animals, valuable on account of their skins or flesh. There are also numbers of water-fowl, and fish is abundant in the numerous lakes. *Races.* Esquimaux and Indians. The former occupy the country on both sides of Hudson's Bay, whilst the latter are dispersed over the whole of the other regions. The number of Europeans settled here is considerable, amounting to some thousands, who are generally connected with the Hudson's Bay Company. The Hudson's Bay Company, established for the purpose of procuring furs, was incorporated by Charles II. in 1670, and was very successful in its undertakings. In 1858 a portion of the territory was formed into a British colony, under the title of British Columbia, which *see*.

HUDSON'S STRAITS, the narrow sea connecting Hudson's Bay with Davis' Straits and the Atlantic Ocean. *Length*, 500 miles; *average breadth*, 100. *Lat.* between 60° and 64° N. *Lon.* 65° and 77° W.

HUE, or HUEFO, *hoo'-ai*, the capital of Anam, Cochin-China, on a river of the same name, about 10 miles from its mouth. It is remarkable for being the only city in the East regularly fortified according to European notions. Its walls are 5 miles round, and inclose the palace, with an inner citadel, and all the works necessary for a fortified place. *Pop.* about 120,000. *Lat.* 16° 30′ N. *Lon.* 107° 12′ E.

HUELVA, *hoo'-el-va*, a maritime town of Seville, Spain, 67 miles from Cadiz. *Pop.* 7,173.

HUESCA, *hoo'-ais-ka*, a city of Aragon, Spain, on the Isuela, 32 miles from Saragossa. It has a university,

cathedral, convents, and a foundling hospital. Here, also, is the old palace of the sovereigns of Aragon, which is memorable for the incident in history known as the "massacre of the bell." *Manf.* Cloth and leather. *Pop.* 10,000.

HUESCAR, *hoo'-ais-kar*, a town of Grenada, Spain, 70 miles from Grenada. *Pop.* 6,300, partly engaged in woollen and linen manufactures.

HUET, Peter Daniel, *hoo'-ai*, a learned French bishop, who studied mathematics under Mambrun, a Jesuit, and Greek and Hebrew under Bochart, whom he accompanied in 1652 to the court of Christina, queen of Sweden, who wished to engage him in her service; but he declined the honour, and returned to France. In 1661 he published an excellent work on the art of translation, entitled, "De Interpretatione." In 1679 appeared his "Demonstratio Evangelica," which was greatly admired. His reputation became so great, that the place of sub-preceptor to the dauphin was conferred on him, and he had for his colleague the illustrious Bossuet. In 1661 he published his valuable edition of the works of Origen. He formed the plan of publishing editions of the classics, which are now known by the title, "In usum Delphini," and spent twenty years in carrying out the project. In 1689 he printed his "Censures on the Cartesian Philosophy," a system to which he had been zealously attached, but the fallacy of which he now exposed. Huet, considering the number and excellence of his works, may be considered as one of the most learned men that any age has produced. His "Origin of Romances," "The Situation of the Terrestrial Paradise," and "Weakness of Human Understanding," have been translated into English. B. at Caen, 1630; D. 1721.

HUFELAND, Christopher William, *hoo'-fe-land*, an eminent German physician, who pursued his profession at Weimar, and became, in 1793, professor in the university of Jena. In 1801 he was appointed physician to the king of Prussia, in 1809 professor of medicine in the university of Berlin, and finally director of the academy of military medicine and surgery in 1819. His celebrated work, "The Art of Prolonging Life," was published in 1799; his "Counsels to Mothers on Physical Education," in 1800; and his "History of Health," in 1812. He was among the first continental physicians to recognize the truth of animal magnetism. B. at Erfurt, 1762; D. at Berlin, 1836.

HUFNAGEL, George, *hoof'-na-gel*, a Flemish painter, extensively employed by several German princes. His reputation recommended him to the emperor Rodolphus, for whom he executed four admirable books representing quadrupeds, birds, insects, and fishes. He also wrote some poems in Latin and German. B. at Antwerp, 1545; D. 1600.

HUGH CAPET. (*See* CAPET.)

HUGHES, John, *hues*, an English poet, whose first work was "An Ode on the Peace of Ryswick," 1697, which was well received, and introduced him to the acquaintance of several men of letters. In 1717 he was appointed secretary to the commissions of the peace, by Lord Chancellor Cowper. His last literary piece was the tragedy of "The Siege of Damascus;" but he expired on the first night of its performance, Feb. 17, 1720. In 1735 his plays and poems were published. He also wrote several pieces in prose, particularly papers in the "Tatler," "Spectator," and "Guardian;" superintended an edition of Spenser's works, in 6 vols.; translated Molière's "Misanthrope," and Fontenelle's "Dialogues of the Dead." B. at Marlborough, Wilts, 1677; D. 1720.

HUGO, Victor-Marie, Viscount, *hoo'-go*, a celebrated living French poet, dramatist, and novelist. The son of a distinguished French general of the imperial army, his early years were spent with him in the isle of Elba, Italy, Rome, and Naples. Returning to Paris in 1809, he being then eight years old, his education was, for the first time, attended to; but being sent for from Spain by his father, he entered into a seminary for nobles in that land, whose bright skies helped to develop his poetical genius, and, at ten years of age, commenced writing verses. In 1813 he became a student at an institution in France, to be prepared for the Ecole Polytechnique. While studying mathematics, poetry was not neglected by him; and in 1817, having previously composed a short poem, he completed a tragedy called "Istamine," written after the classic model. Between the years 1819-22 he three times carried off the poetry prizes of the Academy des Jeux Floraux, at Toulonne. These three odes first attracted public attention towards him; the appearance of Lamartine's "Meditations" quickened his poetical genius into the production of a volume of "Odes and Ballads," which, given to the world in 1822, stamped his reputation permanently as a genuine poet. His next publication was "Hans of Iceland." A second volume of the "Odes and Ballads" appeared in 1826. Hitherto he had composed after the manner of Racine and the classical school; but in 1827 he produced "Cromwell," a play, not written so much for the stage as to combat the principles of the classic school of dramatists. His magnificent collection of lyrics, entitled, "Les Orientales," was brought out in 1828. "Marion Delorme" and "Hernani" were his two next works for the theatre, both written in the "romantic" manner; as also were his "Lucretia Borgia," "Mary Tudor," "Esmeralda," and "Ruy Blas." His best romance, "Notre Dame de Paris," was published in 1831, and his finest set of lyrics, "Autumn Leaves," in 1832. In 1845 he was created a peer of France by Louis Philippe. Returned by the city of Paris, after the revolution of 1848, for the Assemblée Nationale, he took his seat among the extreme democrats, one of whose chief orators he became. On the *coup d'état* of December 2, 1851, he was among the first individuals to be expelled from France, and went to reside in the island of Jersey, where he never ceased to compose burning philippics in prose and verse against Napoleon III. "Napoleon the Little," and "Les Châtiments," being the best-known of these. In 1856 he was compelled to leave Jersey, and went to reside in Guernsey, where he has written another poetical work, "Contemplations," and is said to be at present engaged upon a social romance. Besides the works we have enumerated, he has written a great many articles, tales, sketches, and criticisms for the "Revue des deux Mondes," and a variety of other French periodicals. B. at Besançon, 1802.

HUGO, Francis Victor, a living French littérateur, son of the above, who, after completing his education at the University of Paris, became a writer of political articles for the French papers; he afterwards assisted his father in editing a democratic journal, which the latter had established in 1848. He was sent out of France with his father, on the *coup d'état* of 1851, and went to reside with him in Jersey, and afterwards in Guernsey, where he is said to be engaged in historical research. He published "The Island of Jersey, its Monuments and its History," in 1857; but his best work is a fine French translation of "Shakspeare's Sonnets," which he brought out with an introduction in 1857. B. at Paris, 1829.

HUGUENOT, *hoo'-goo-no*, the title given in France to the followers of the reformed religion generally, and specially to the disciples of Calvin. The derivation of the word has been assigned by some to that party who followed a certain Besançon Hughes, a Genevese religious leader; and by others to *eidgenossen*, 'followers.'

HUISH, *hu'-ish*, the name of several parishes in England having small populations.

HULL, *hull*, a river of Yorkshire, which rises among the eastern Wolds, and falls into the Humber, at Hull (formerly called Kingston-on-Hull).

HULL, or KINGSTON-UPON-HULL, a seaport town, borough, and county in itself, in the East Riding of Yorkshire, situate on the great inlet of the Humber, at the point where this receives the river, 36 miles from York. The town stands in a low level plain, about 29 miles from the mouth of the Humber, the general level of the strata varying from 6 inches to 6 feet below the high-water mark. Thus the outfall of the drainage is prevented by the rising of the tide, which is shut out by floodgates. The oldest part stands to the W. of the Hull, and is inclosed by docks. The parish of Sculcoates, lying to the N. of the Old Dock, contains some handsome streets; Myton, to the W. of the Humber Dock, is the most modern portion; Garrison-side, on the left bank of the river, communicates with Hull by a bridge of four arches. The citadel, surrounded

by a rampart and ditch, has a strong battery, commanding the Hull roads and the Humber. The harbour is artificial, having been formed by deepening and widening the channel of the river; and vast docks have been erected for the accommodation of shipping. Of these, the Old Dock was begun in 1775: it enters immediately from the river Hull, about 300 yards from its mouth. It is 1,703 feet long, 254 wide, and 23 deep, and covers, with the commodious wharfs and quays, an area of 13 acres. The Humber Dock was completed in 1809, and covers a space of more than ten acres. It opens into the Humber by a lock, which will admit a 50-gun ship, and which is crossed by an iron bridge. The Junction Dock, connecting the Old and Humber docks, was completed in 1829, and will contain fifty or sixty large vessels. Besides these, there are several dry docks for repairing vessels. The public buildings are, the Trinity church, a large and beautiful structure, of Gothic architecture and of exquisite workmanship, partly built about the year 1312; St. Mary's and St. John's churches, the latter a neat and simple brick building. Besides these, there are several other churches and chapels, with a floating chapel for mariners, and a Jews' synagogue. Of the charitable institutions, the oldest is the Trinity-house, founded in 1366, for the relief of decayed seamen and their widows; the Charter-house hospital was founded by Michael de la Pole in 1384, for the support of poor pensioners; and there are, besides, several other hospitals for the poor. The grammar-school was instituted in 1136, and its school-room is one of the best in England. The Vicar's school was begun in 1734; and there are various charity and subscription schools, some of them on the Lancasterian system. Hull and Kingston colleges, having two fine buildings, founded in 1838, afford instruction similar to King's and University colleges, London. The other public edifices are the Custom-house, Exchange, pilot, dock, stamp and excise offices, two theatres, concert-hall, gaol, library, Mansion-house, mechanics' institute, Lyceum, Athenæum, &c. In the market-place stands a neat equestrian statue of William III., and at the end of Junction Street is a statue of Wilberforce, a native of this town. Hull is connected by railway with all the principal towns in the N. of England; as also with London, by a continuation of the E. Counties Railway. It also has navigable communications inland, either by rivers or canals, with York, Sheffield, Leeds, Manchester, Liverpool, Nottingham, Birmingham, and Bristol; and is equally open to the E. coast, the continent, and the North Sea. Steam-vessels sail hence for London, Yarmouth, and many other ports on the E. coast of Scotland and England, together with the principal maritime towns of Denmark and Holland, and a large commerce is carried on with ports in the Baltic, and in the whale-fishery. The coasting, as well as its inland trade in coals, corn, wool, manufactured goods, &c., is very large. *Manf.* Metal-founding, cotton and flax, soap, sugar-baking, white lead, brewing, rope-making, ship-building, flour, and linseed oil. *Pop.* 90,000. *Lat.* 53° 44′ N. *Lon.* 0° 10′ W.—Wyke-upon-Hull was the ancient name of this town; but in 1296, Edward I., who saw its great natural advantages, purchased it, and called it Kyngeston-upon-Hull. He began the formation of the harbour, and thus commenced the prosperity of the place. By the end of the 13th century, it had so progressed that its exports amounted to one-seventh of those of the whole kingdom. Under Edward III. it furnished 16 ships and 500 men for the invasion of France, whilst the complement of London was only 25 ships and 700 men. During the civil war, it declared for the parliament, and sustained two severe sieges by the royalists. The old walls have been entirely demolished by the extension and improvements of the town.

HULME, *hulm*, a township of Lancashire, 1 mile from Manchester, within which borough it is included. It contains a cavalry barrack; and the Manchester botanic garden, with an area of nearly 18 acres, is also here. *Pop.* 60,000.

HULTON, LITTLE, MIDDLE, and OVER, *hul'-ton*, the name of three small townships in Lancashire.

HUMBER, *hum'-ber*, one of the largest rivers of England, dividing Yorkshire from Lincolnshire. It is formed by the junction of the Ouse, the Aire, and the Trent, and is the principal outlet for the waters which fall on the E. side of the kingdom, draining, with its tributaries, nearly one-fifth of the kingdom. At the mouth of the Trent, where the Humber properly begins, the river is more than a mile in breadth. It thence flows in an easterly direction towards Hull, receiving in its course, the Foulness and Hull, and the Anchholme and Ludd rivers. Gradually widening its channel to between 2 and 3 miles, it empties itself into the German Ocean, between the promontory of Spurnhead and Salt-fleet, in a vast estuary, 6 or 7 miles wide. On its N., or Yorkshire bank, stands Kingston-upon-Hull, or Hull; on its S., or Lincolnshire bank, Great Grimsby, New Holland, and Barton.

HUMBERT, Joseph Amable, *koom'-bair*, a French revolutionary general, who owed his rise to his fine person, bravery, and bold demeanour. After having received some little education, he became a strolling workman, and afterwards a hawker of rabbit-skins; but, entering the revolutionary army in 1792, he rapidly rose to the position of colonel. In 1793 he was made a general of brigade, and served in that capacity against the insurgents of La Vendée. He was with General Hoche when he attempted to invade Ireland in 1796; but when that expedition was disorganized by a violent storm, he returned to France. In 1798 he was again sent to Ireland at the head of 1,500 men. He landed at Killala, of which he took possession. General Lake marched against him three days afterwards, with a very superior force, but which was mainly composed of yeomanry and militia. Lake was beaten at Castlebar, and Humbert sought to raise the country in the behalf of the French, but met with little success. In a short time, the advanced guard of Lord Cornwallis met and defeated him, taking himself and whole force prisoners. He returned to France in 1799, and was sent to St. Domingo a few years afterwards under General Leclerc, with whose widow he came to France in 1804. Bonaparte was so enraged at this act, that he ordered him to leave Paris, and threatened more severe measures. He fled to America, and led an adventurous life in the Spanish settlements. B. at Bouvray, 1767; D. at New Orleans, 1823.

HUMBOLDT, Frederick Henry Alexander, Baron von, *hoom'-boldt*, a distinguished German philosopher and

BARON HUMBOLDT.

traveller, was the son of a wealthy soldier who had served under Frederick the Great of Prussia. Having previously received an excellent rudimentary education at home, he was sent with his elder brother, in 1786, to the university of Frankfort-on-the-Oder, to study the natural sciences. In 1788 he quitted Frankfort for Göttingen, at which Heyne, the great classical scholar (*see* HEYNE), was then a professor. Heyne's son-in-law, George Forster, had accompanied Captain

Cook in his discoveries in the South Seas, and his glowing descriptions of those regions made a deep impression on the young man's mind. In 1790 he accompanied Forster in a tour through the Rhine districts and Holland, and afterwards visited England with him. His scientific observations made in Germany were afterwards published in 1790, under the title of "Mineralogical Considerations on Certain Basaltic Formations on the Rhine." His intention being to seek employment in the civil service of the Prussian kingdom, he subsequently went to Hamburg to study book-keeping and the other forms of commercial knowledge, and afterwards studied in the mining academy of the eminent Werner, at Freiburg. In 1792 he obtained the post of mining superintendent in the works of Bayreuth, in which situation he remained till the year 1795, during which time he wrote many scientific articles for the German periodicals, and published a botanical work in Latin, called "Specimens of the Flora of Freiburg." Soon after the production of this work he resigned his post as mining superintendent, having determined to explore those parts of the world which had been unvisited by travellers. "I had, from my earliest youth," he says, "felt a burning desire to travel in distant lands unexplored by Europeans." The disturbed state of the continent at the time, owing to the wars consequent on the French revolution, prevented him from executing his design for about two years, during which time he resided at Jena, and became acquainted with Göthe and Schiller, and occupied himself with the composition and publication of "Investigations on the Muscles and Nerve-fibres, with Conjectures on the Chemical Process of Life," and "On Subterranean Gases;" two small works which established his reputation as a natural philosopher. A short visit to Italy was made in 1799, and, in the same year, he went to Paris, with the view of accompanying the expedition about to be despatched from that capital to Egypt. The expedition was abandoned; but Humboldt made the acquaintance of Bonpland, who was to have been the naturalist of the journey, and the two learned men resolved to undertake a great enterprise together. Their first idea was to explore Northern Africa; but, being prevented by the English cruisers in the Mediterranean, they landed in Spain, and obtained permission from the government to travel in the Spanish possessions of South America. In the month of May, 1799, the two travellers embarked at Corunna, and, eluding the English cruisers watching the port, reached Teneriffe, where they ascended the peak and collected some valuable scientific data. Going on board their vessel again, they sailed for Cumana, in South America, which was reached in July. Humboldt and his companion now proceeded to explore the great South American continent, and to collect a body of scientific information, during five years of adventurous research, hitherto unparalleled. For 65 days, he navigated, in an Indian canoe, the Orinoco, the Rio Negro, and the Atrabapo, discovering the connection between the Orinoco and the Amazon. The botany, mineralogy, geology, the physical aspects of the country, and the habits of the natives, were all observed and noted during this great journey. He now returned to the coast and embarked for Havannah, where he sojourned for some time. Returning to South America in 1801, he travelled southward till he reached Lima, crossing the Cordilleras and Andes five times during the journey. In June, 1802, he ascended Chimborazo to an elevation of 19,300 feet, the highest point of the mountain ever attained by a human being. In December, 1803, he embarked for Guayaquil, and in the April following reached Mexico, in exploring which and the adjoining countries he spent a year. Wishing to complete his scientific observations of the island of Cuba, he once more set sail for Havannah, in 1804. A visit to the United States, and a short stay in Washington and Philadelphia succeeded, after which he quitted America for France, and arrived at Bordeaux in August, 1804. He spent nine months in Paris arranging his notes, and assisting Gay-Lussac (*see* LUSSAC) in making some experiments relative to the chemical composition of the atmosphere. After spending a short time in Italy and at Berlin, where he obtained permission from the king to take up his residence in the French capital while his works were being printed,

he returned to Paris. In 1807 appeared the first of a large number of volumes, all published under the general title of "Travels of Humboldt and Bonpland in the Interior of America between the years 1799-1804." In this magnificent undertaking, composed partly in Latin, partly in French, he was assisted by Oetmans for the astronomical, Arago and Gay-Lussac for the chemical and meteorological, Cuvier for the zoological, and Klaproth for the mineralogical divisions. It was mainly divided into six great sections, which again were subdivided into many more, the botanical portion alone consisting of twenty volumes, embellished with 1,200 plates. He spent a portion of the years 1827-28 at Berlin, whither he had been invited by the king of Prussia; in 1829 he, at the express desire, and at the sole expense, of the emperor Nicholas, set out with Rose and Ehrenberg to explore the eastern provinces of Russia, and in nine months travelled, between St. Petersburg and the Chinese frontier, over a distance of 2,320 geographical miles. The results of this expedition were published by him at Paris in 1843, under the title of "Central Asia; Researches on its Mountain-chains and Climatology." Between the years 1830 and 1848, although he desired to keep aloof from politics, he was intrusted by the king of Prussia with several diplomatic missions to the court of Louis Philippe. In 1848 he went to reside near the king of Prussia, whose court he ornamented till his death. In 1845 he commenced his great work, "Kosmos, or a Physical Description of the Universe," which was concluded in 1851, and which has become exceedingly popular in an English translation. He was a member of almost every scientific body in the world; an associate of the Academy of Sciences of Paris and Berlin; was decorated with many orders, and was a grand officer of the French Legion of Honour. By the labours of his long and valuable life he earned the title of creator of the science of comparative geography, and reviver of the study of the natural sciences. In addition to those already quoted, a few of his most important works may be given: "Essay on the Chemical Analysis of the Atmosphere;" "Pictures of Nature;" "Essay on Electrical Fishes;" "Essay on the Geography of Plants;" "Causes of the Difference in Temperature of various portions of the Earth's Surface;" "Fragments of Asiatic Geology and Climatology;" and "The Progress of Nautical Astronomy during the Fifteenth and Sixteenth Centuries." B. at Berlin, September, 1769; D. 1859.

HUMBOLDT, Charles William, Baron von, a distinguished philologist, classical critic, and diplomatist, was elder brother of the above; with whom he pursued an educational career at the universities of Göttingen and Jena. When very young, he wrote many essays on the Greek poets and philosophers; but his first work of consequence was a critical essay on Göthe's "Hemann and Dorothea." In 1802 he was nominated to the post of minister plenipotentiary to Rome; resigning this in 1808, he became head of the department of public instruction, which he quitted to retire into private life, two years afterwards. In 1812 he became Prussian ambassador at the court of Vienna; represented his country at the conference of Prague, in 1813; and signed, with Hardenberg (*see* HARDENBERG), the treaty of Paris. In 1819 he was recalled from England, where he was ambassador, to Berlin, to assume the functions of minister and privy councillor; but not agreeing with his sovereign as to his retrograde policy, he tendered his resignation, and once more sought a retired life. He now occupied himself with the study of classical and semi-civilized languages and comparative grammar, varying these pursuits with critical essays on poetry, philosophy, and the fine arts. He published a small number of poems, but, on the advice of Schiller, he abandoned creative for critical authorship, for which his mind was more fitted. He wrote critical essays on Sanscrit poetry, and on Wolf's edition of Homer's "Odyssey;" published "An Examination of the Basque Language," and a treatise on the Celts and Iberians; besides a very large number of smaller works on classical literature and on speculative physiology. The latter years of his life were occupied with the study of the Malay and American languages; but failing health caused him to abandon the American in order that he might conclude his researches in the Malay tongue. At the time of his death he had almost

completed his task, and his work was afterwards published by Dr. Buschmann, in 1836. B. at Potsdam, 1767.

HUME, David, *hume*, a celebrated English historian and philosophical writer. He was destined for the law, but having little inclination for that profession, he tried mercantile pursuits, and became, in 1734, clerk in an eminent house at Bristol. But he did not continue long in that situation; for, having a strong propensity to literature, he went to France, where he wrote his "Treatise of Human Nature," which he published at London, in 1738. This metaphysical work, however, met with an indifferent reception; nor were his Moral Essays, which appeared in 1742, more successful. About this time he resided with the marquis of Annandale as a companion, but soon afterwards became secretary to General Sinclair, whom he attended to Vienna and Turin; and while he was abroad, his "Enquiry concerning the Human Understanding" was published at London. In 1752 appeared his "Political Discourses," and his "Enquiry concerning the Principles of Morals," the latter of which he accounted the best of his writings. In 1754 he published the first volume of the "History of England, from the Accession of James I. to the Revolution." This volume was poorly received; but the second, which came out in 1756, met with a better fate, and "helped," as the author said, "to buoy up its unfortunate brother." About the same period he published his "Natural History of Religion," which was smartly answered by Dr. Warburton, in a pamphlet which Mr. Hume attributed to Dr. (afterwards Bishop) Hurd. In 1759 appeared his "History of the House of Tudor," and in 1761, the more ancient part of the English history. The work had now acquired considerable celebrity, and the writer gained largely by its popularity; for besides the profit it brought him, he obtained a pension through Lord Bute. In 1763 he accompanied the earl of Hertford on his embassy to Paris, where, in 1765, he remained as *chargé d'affaires*. The year following he returned home, and became under-secretary of state to Mr. Conway. In 1769 he retired to his native country on a small, but to a man of his frugal habits, independent income. After his death appeared a work by him, entitled "Dialogues concerning Natural Religion." His History, although written in an excellent style, is not to be relied on, by reason of its partiality and inaccuracy. He left a charmingly-written autobiography. D. at Edinburgh, 1711; D. in the same city, 1776.

HUME, James Deacon, a commercial statistician, writer on financial and commercial questions, and compiler of the Customs-statute Code. After receiving his education at Westminster School, he obtained, in 1790, a clerkship in the custom-house, and displayed so much zeal and talent that, although very young for the post, he was appointed to a responsible office in the department. On his marriage, in 1798, he rented a large piece of land at Pinner, near Harrow, where he set up as a scientific farmer, on a very extensive scale He continued to fufil his custom-house duties, and in 1822, was induced by the government to abandon his farm and take up a residence in London, where he was employed in the preparation of reports on the revenue. Up to this period the Customs legislation consisted of 1,500 different statutes, mostly contradictory,—an "intricate and labyrinthian chaos," as it was termed. He was requested to reduce this confused mass into one harmonious and intelligible code, a task he performed after three years of the most unremitting labour. The ministry of that day, fully alive to the importance of this task, rewarded him, on its completion, with a sum of £5,000, in addition to the salary of his office in the custom-house. In 1829 he was appointed joint assistant-secretary of the Board of Trade; but in the year 1840, after he had passed 49 years of the most untiring and zealous service in the commercial department of the government of his country, he was allowed to retire on the full salary of his office. He still, however, continued to give valuable evidence in committees on revenue questions in the House of Commons. In 1842, his constitution, worn out by hard work, gave signs of breaking up; an apoplectic stupor ensued, and he was carried off. B. at Newington, 1774; D. 1842.

HUME, Joseph, a distinguished financial reformer and politician, was the son of a poor widow who kept a shop in Montrose, her husband, a master of a small coasting vessel, having died while he was quite young. In his 14th year he was apprenticed to a surgeon, and having obtained a medical diploma from the university of Edinburgh, and passed the Royal College of Surgeons in London, he received an appointment as surgeon to an East-Indiaman in 1797. After a short residence in India, he mastered several native languages, and became successively Persian interpreter, paymaster, and postmaster to Lord Lake's army operating against the Mahrattas. He laboured so energetically and successfully in his various employments, that he was enabled to return to England in 1811, still a young man, with a fortune of about £30,000. Having travelled in Spain, Turkey, Greece, and Egypt, he was, in 1812, elected an M.P. for Melcombe Regis; but on the dissolution of parliament, soon after, he was not returned again. Upon this he turned his attention to the establishment of savings-banks, schools on the Lancasterian principle, and other schemes of social amelioration and utility. He was returned to parliament again in 1818, for the Montrose burghs, which he represented till 1830, in which year he was returned for Middlesex. He lost this seat in 1837; but, through the influence of Mr. O'Connell, was chosen by the electors of Kilkenny to be their representative in parliament. In 1842 his old constituents of the Montrose burghs returned him to the House of Commons, and he sat for his native place till his death. During his parliamentary career he energetically struggled for financial reform, advocated the reduction of taxation, and watched the expenditure of the national funds with more perseverance and disinterested industry than any member of the House of Commons before or after his time. Military, naval, ecclesiastical, fiscal reforms were his constant effort. The abolition of military flogging, imprisonment for debt, and numberless other ameliorations, found in him an untiring advocate. In 1835 he greatly assisted in the discovery of a remarkable Orange plot, the object of which was to secure the throne of England for the duke of Cumberland, instead of giving it to the Princess Victoria, whose education was considered of too liberal a tendency. When his remains were consigned to the tomb, speakers of all shades of political opinion in the House of Commons acknowledged the value of this uncompromising labourer for reform, and enemy of privilege and monopoly. B. at Montrose, 1777; D. at Burnley Hall, Norfolk, 1854.

HUMERPOOR, *hoo-mer-poor'*, a district of the N. W. Provinces, British India. *Desc.* A level plain generally, with fertile soil. *Pro.* Corn, sugar, cotton, and indigo. *Manf.* Cotton, paper, and sugar-refining. Humerpoor is also the name of the capital, which is on the right bank of the Jumna, 150 miles from Agra. *Pop.* of district, about 300,000.

HUMMEL, John Nepomuk, *hoom'-mel*, a German composer and pianist, who, displaying great musical talent from his earliest youth, became chapel-master to Count Esterhazy in 1803, and afterwards to the king of Wurtemberg, in 1816. He was only excelled in instrumental composition by Beethoven. He composed four operas, two masses, and a large quantity of smaller musical pieces. B. at Presburg, 1778; D. 1837.

HUNDSRUCK, *hoons'-druck*, an extensive and mountainous district of Rhenish Prussia, thickly wooded, and rising, at intervals, to a height of 3,000 feet. It lies between the Moselle and the Nahe, and joins the mountain-chain of the Vosges.

HUNGARY, *hun'-gar-e*, an extensive country in Central Europe, forming, under the title of kingdom, a considerable portion of the Austrian dominions. It is bounded W. by part of Germany, N. by Galicia, E. by Moldavia and Wallachia, and S. by Turkey. *Area*, 69,325 square miles. *Divisions.* Hungary proper, Transylvania, and the Military Frontier; and these are again subdivided into five districts, respectively named after their capital cities, Pesth, Presburg, Odenburg, Kaschau, and Grosswardein. *Desc.* The surface of Hungary varies extremely in the different provinces. The Carpathians, an immense mountain-chain beginning near Presburg, divide it from Galicia. They rise to the height in some peaks of nearly 10,000 feet, and form at the tops immense masses of granite, totally destitute of vegetation. (*See* CARPATHIANS.) Besides these, there

are in the N. and W. several detached ranges of very considerable extent. Immense plains also exist. *Rivers.* The Danube, Szamos, March, Maros, Drave, and Save; the Carpathians pour down into the plain the Theiss, Waag, Gran, Poprad, and Temes, all falling into the Danube. *Lakes.* The Platten See, the Neusiedler See; and there is a large tract of marshes, the principal of which is Lake Palitz. *Canals.* The principal are the Franzens Canal and the Beja Canal, both joining the Danube and Theiss. *Climate.* Among the mountains cold is predominant, the snow lying on the ground for many months. In the S., the climate is in general mild, in the sandy districts extremely hot; but on the banks of the rivers, and near the marshes, damp; dampness, indeed, being a prevailing characteristic of the climate of the level part of Hungary. *Minerals.* Important, consisting of silver, lead, copper, iron, zinc, cobalt, salt, alum, and coal. Gold is also occasionally found in the sand of rivers, and is principally washed by the gipsies. Precious stones of various kinds, opals being the most valuable, are discovered in the mountains. *Pro.* The extensive plains lying along the great rivers possess all the richness of an alluvial soil. In the N., clay, stone, and gravel predominate, and the ground there produces but a scanty return, after considerable labour. In the S., too, there are many tracts unfit for the purposes of agriculture. The large heaths of Debreczin and Kecskemet are covered either with sand or with the most scanty vegetation. Several other tracts are covered by moving sands, which are said in some cases to be increasing. In the N. barley and common rye are most frequently sown; in the S., wheat, maize, millet, and, in the marshes of the Banat, rice. Oats are cultivated throughout the kingdom. Potatoes are raised by the Sclavonians and Germans, and pulse by the followers of the Greek Church. Hemp and flax are cultivated, also tobacco and saffron. Various kinds of fruit are grown in great quantities, and extensive pastures are found in many parts of the country. Next to the cultivation of corn and the breeding of cattle, the making of wine forms the most extensive branch of rural industry. The Hungarian wines vary greatly, both in taste and strength; the well-known Tokay being unrivalled in quality. Dense forests and woods abound in the mountainous districts. *Domestic Animals.* The Hungarian oxen are large and well-shaped, and generally of a milk or grey-white colour, with lofty and spreading horns. Some of the sheep are very fine, particularly a peculiar breed, with forked horns. The horses of Hungary seldom reach a great height, and are incapable of drawing heavy loads; but they surpass almost all other horses on the continent in elegance of shape, as well as in vivacity and swiftness. Bacon being a favourite food, vast herds of swine, amounting to more than 5,000,000, are reared. A few buffaloes are found in certain parts of the country. Game of all kinds and fowls are plentiful; bees are largely kept; and the rivers, especially the waters of the Theiss, yield large quantities of fish. *Towns.* The principal are,—Pesth, Buda, Debreczin, Presburg, Szegedin, Kecskemet, Theresienstadt, Erlau, Schemnitz, Raab, Meava, and Cremnitz. *Manf.* Unimportant, being generally confined to not large quantities of woollens, silks, linens, paper, leather, oil, beer, and tobacco. COMMERCE. *Exp.* The chief are corn, tobacco, wine, particularly that of Tokay, and wool; also wax, tallow, potash, alum, antimony, gall-nuts, &c. A little leather, linen, and iron are also sent out of the country. *Imp.* Chiefly manufactured goods and colonial produce. Nearly 1,000 vessels, some of which are steamboats, ascend and descend the Danube, engaged in carrying on the trade between the principal towns of Hungary and Vienna. The roads are generally not good, but railway communication is progressing. *Races.* (*See* AUSTRIA.) *Religion.* Roman Catholic, Greek Church, and Protestant, the former in the ascendant. Education is not, on the whole, well-diffused, but the higher classes are well-cultured and highly intelligent. *Government.* The administration of justice was formerly entirely in the hands of the nobles, as the constitution of Hungary was a compound of monarchy and aristocracy, the latter, however, being predominant. The diet of Hungary was composed of four states or classes: 1st, the Catholic prelates; 2nd, the magnates; 3rd, the representatives of the inferior

nobles; and, 4th, the representatives of the royal free towns. The magnates and prelates formed a chamber by themselves, and the representatives formed another. The periodical assembling of the diet, as prescribed by law, was only once in five years; but its meetings were much more frequent. The suppression of the revolution, however, in 1849, changed all that, and the government was placed on much the same footing as that of other Austrian provinces. *Pop.* 8,200,000.—*Lat.* from 46° to 49° 34′ N. *Lon.* 16° to 25° 3′ E. In the time of the Romans, the country now called Hungary formed the western portion of Dacia and the south of Pannonia. In the 3rd century the Goths occupied all this portion of Europe, and these were driven out in 376 by the Huns, whose name, it is said, joined to that of the Avari, gave its title to the country. After the death of Attila, in 453, the Ostrogothæ, Gepidæ, and Lombards disputed the possession of the territory. Subsequently, in the 7th century, the Avari made themselves masters of the land, but had to defend it against the incursions of the Slaves and Bulgarians. Charlemagne having conquered the Avari in 799, the Magyars, a people of Asiatic origin, and who, a century before, had established themselves on the Don and Dnieper, entered Hungary in 894. Arpad, the son of Almus, was their leader, and allying himself with the emperor of Germany, he defeated most of the tribes who then occupied the country. His successor embraced Christianity; and Stephen I., called the Saint, who had been the chief of the Magyars since 997, took the title of king in the year 1000. This prince completed the subjugation of the Slaves and Bulgarians, and to him Hungary owed the greater portion of her social institutions. After his death, in 1038, the land was a prey to internal dissensions until the accession of Ladislaus I., who brought peace to his people; he conquered Croatia and Slavonia, to which his successor Coloman added Dalmatia. Under Geysa II., in 1148, Transylvania received a number of Flemish immigrants. Bela III., who had been bred at Constantinople, introduced into the state civilization and the manners of the Greek empire. He married Margaret, sister of Philip Augustus, of France, and widow of Henry, son of Henry II., of England; and under him Hungary was divided into comitats. Andrew II. led the fifth crusade to the Holy Land, in 1222, and by his weakness allowed the privileges of the nobles to increase. Under Bela IV., his son, the Mongols ravaged the land; and after him the royal power, weakened by intestine discord and foreign wars, was reduced to the lowest condition, till the end of the reign of Andrew III., with whom closed the Arpad dynasty. The Hungarians then elected Wenceslaus of Bohemia, and, after his abdication, Otho of Bavaria; but Pope Boniface VIII. imposed on them Charles Robert, called Charobert, count of Anjou, and who was recognized as king in 1038. In his reign Hungary attained a high degree of prosperity; it comprised, besides Hungary proper, Dalmatia, Croatia, Bosnia, Servia, Wallachia, Transylvania, Moldavia, and Bulgaria. Charles having married a sister of Casimir, king of Poland, Louis I., his son, succeeded to that kingdom in 1370. After him Marie, his daughter, came to the throne, sharing the government with her husband Sigismund, elector of Brandenburg. In their reign John Huss proclaimed his opinions, and the Turks invaded the kingdom. Under Ladislaus V.—1438 to 1457—the Turks were defeated by the brave John Hunyades, the regent, whose son Matthias I. was elected king in 1458. This monarch was possessed of great administrative as well as military abilities; his reign was flourishing, and he was the founder of a university at Presburg, and a celebrated library at Buda. His successors, however, were unable to keep out the Turks, and in 1526 Louis II. was killed at the fatal battle of Mohacs, which gave a great portion of the kingdom for many years to the Ottomans. Ferdinand of Austria and John Zapolsky now disputed the possession of the country, and the latter was defeated and obliged to fly. The nation, however, did not recognize the Austrian domination until 1570, under Maximilian II.; and it was not until many years later, in 1687, that the crown of Hungary was declared hereditary in the house of Austria. After that, indeed, the emperors had to suppress the successive revolutions headed by Tekeli

and Ragotszy, which were not finally put down till 1711. During these dissensions the Turks had seized on a large portion of Hungary, but were definitively driven out in 1699 by the peace of Carlowitz. From that time to 1848 the nation remained faithful to the house of Austria, especially in the cause of Maria Theresa, and in the wars with France from 1793 to 1815, when it contributed largely to the finances and military forces of the country. In 1848, however, the discontent, which had been gradually gathering force, broke out into a great insurrection, and the Magyar revolution, at one period eminently successful, was only ultimately checked by the assistance of Russia. The circles and comitats which had previously existed, gave place to the organization of the five districts already mentioned. At the time we write, considerable dissatisfaction exists on the part of Hungary in respect to its government by the emperor of Austria, in connection with military, financial, and religious questions.

HUNGERFORD, *hun'-ger-ford*, a parish and market-town in Berkshire, on the Kennet, 26 miles from Reading. The Kennet and Avon Canal passes through it, and the Great Western Railway has a station there. It has a church and free grammar-school. *Pop.* 3,100.

HUNGRY HILL, *hun'-gre*, a mountain of Cork, Ireland, 16 miles from Bantry. On its top is a lake, whence the waters descend in a series of cascades, one falling nearly 700 feet. *Height*, 2,250 feet.

HUNNERIC, *hun'-ne-rik*, king of the Vandals in Africa, succeeded his father Genseric in 477. He was a violent Arian; and though he at first gave the orthodox Christians toleration, he afterwards commenced a persecution against them, and caused upwards of 40,000 to be put to death in the most cruel manner. D. 484.

HUNS, or HUNI, *huns*, a famous barbaric people, who are generally said to have had an Asiatic origin, and to have been of the Mongol race. They figured for the first time in European history at the end of the fourth century. (*See* ATTILA.)

HUNSLET, *huns'-let*, a chapelry of Yorkshire and a suburb of Leeds, with which it is connected by bridges across the Aire. The Midland Railway has a station here. *Manf.* Woollens, potteries, chemicals, and glass. *Pop.* Included in Leeds.

HUNT, James Henry Leigh, *hunt*, an English poet, essayist, and critic. He was the son of a West-Indian gentleman, who was resident in America when the war of independence burst forth. Being a stanch royalist, he was compelled to seek refuge in England, where he entered into orders, and afterwards became tutor to Mr. Leigh, nephew to the duke of Chandos. Leigh Hunt was educated with Lamb, Coleridge, and Barnes at Christ's Hospital, London, but left it at 15. He had already written verses, which were published under the title "Juvenilia; or, a Collection of Poems written between the Ages of Twelve and Sixteen." After leaving school, he first became assistant to his brother Stephen, an attorney, and afterwards obtained a clerkship in the War-office. In 1805 his brother John started *The News*, and for this paper he wrote reviews of books and theatrical criticisms. These last were written in a more ambitious style than had been the case with such literary performances hitherto; and, in 1807, he edited them, and published the series, under the title of "Critical Essays on the Performers of the London Theatres." A year afterwards, he resigned his situation in the War-office, to undertake the joint editorship of the *Examiner* newspaper, which he and his brother John had established. The bold political essays of this print caused its proprietors to undergo three government prosecutions. The first was in 1810, for an attack on the regency. This was, however, abandoned; but, next year, the Hunts were again tried by Lord Ellenborough, for alleged seditious sentiments expressed in an article on military flogging. On this occasion, the remarkable defence of Mr. Brougham greatly contributed to their acquittal by the jury. A third article, in which the prince-regent was severely criticised, and called "an Adonis of fifty," led to their being condemned to two years' imprisonment, with a fine of £500 each. This sentence caused Hunt to become very popular, and to receive the sympathy of Byron, Lamb, Keats, Shelley, and Moore. While in prison, he wrote "The Descent of Liberty, a Masque," "The Story of Rimini," and "The Feast of the Poets;" and, on his release, Keats addressed to him his fine sonnet, "Written on the day that Mr. Leigh Hunt left Prison." His next literary labour was "Foliage; or, Poems Original and translated from the Greek of Homer, Theocritus, &c." In 1818 he commenced a small periodical after the model of Addison's "Spectator," &c., called the "Indicator." In 1823, the "Quarterly Review" attacks on the "cockney school" of poets, to which he belonged, elicited from his pen a satire against Mr. Giffard, its editor, called "Ultra Cupidarius." His fortunes were, at this period, at a very low ebb, and he was induced to accept the kind invitation of Shelley to go to Italy, where himself and Lord Byron then were. But Shelley meeting his death almost as soon as Hunt had reached Italy, he, for some time, resided with Lord Byron, leaving his house, however, with feelings less friendly than he had entered it. In 1828, after his return to England, he published "Lord Byron and some of his Contemporaries, with Recollections of the Author's Life and his Visit to Italy," a book which contained severe criticisms of Lord Byron's personal character, but which, at a later period, he admitted were of too harsh a nature. During the subsequent ten years he edited the "Companion," a sequel to the "Indicator;" wrote "Captain Sword and Captain Pen," contributed to the magazines and reviews, and published a play,—"The Legend of Florence." In addition to these, he superintended the publication of the dramatic works of Wycherly, Farquhar, and Congreve; wrote "The Palfrey, a Love Story of Old Times;" produced a volume of selections, called "One Hundred Romances of Real Life;" and wrote a second novel of a more ambitious nature than the first, under the title of "Sir Ralph Esher; or, Memoirs of a Gentleman of the Court of Charles II." Leading, henceforth, the uneventful life of a studious man of letters, the record of his career is nothing more than a catalogue of the names of his literary productions, with the dates of their publication. Firstly, there are his essays and criticisms on poets and poetry. Of these the chief are "Imagination and Fancy;" "Wit and Humour;" "Men, Women, and Books;" "A Jar of Honey from Mount Hybla," and "A Book for a Corner." Among his genial, chatty, antiquarian sketches, we have "The Town; its Remarkable Characters and Events," and "The Old Court Suburb; or, Memorials of Kensington, Regal, Critical, and Anecdotical." "Stories from the Italian Poets, with Lives," and the dramatic works of Sheridan, were of a similar character with his former editions of Congreve, &c. His last efforts were his Autobiography, in 3 vols., published in 1850, and "The Religion of the Heart; a Manual of Faith and Duty." He became the recipient, in 1847, of a pension of £200 per annum from the crown. B. at Southgate, Middlesex, 1784; D. 1858.

HUNT, Thornton, a living English littérateur, eldest son of the above, and editor of the last edition of his father's Autobiography. He abandoned the profession of an artist, for which he had been educated, to become a fine-art critic. He assisted in the establishment of the "Constitutional," and afterwards edited the "Chester Reformer," and the "Glasgow Argus." Since 1840, he has been engaged on the London press. He was one of the founders of the "Leader" newspaper, and for a considerable time sub-editor of the "Spectator." In 1815, he published a novel, called "The Foster-Brother." B. 1810.

HUNT, Robert, a scientific writer and lecturer, who was brought up for commercial pursuits, but, urged by an enthusiastic love of science, became an earnest student of natural philosophy, &c., and obtained the appointment of secretary to the Cornwall Polytechnic Institution. His lectures and writings on science, chiefly on geology and mineralogy, recommended him to Sir Henry de la Beche, who obtained for him the post of keeper of the mining records in the Museum of Economic Geology. He has written an excellent "Manual of Photography," and published some profound researches into the laws and nature of light. One work by him,—"The Poetry of Science," has attracted considerable attention; his elementary "Treatise on Physics" is also a popular book. He was one of the most active of the scientific men engaged in the organization of the Great Exhibition of 1851, and wrote an essay on the industrial science involved therein. He

was formerly professor of mechanical philosophy in the Museum of Economic Geology, but since his resignation of that post, has been chiefly engaged in writing on science and delivering lectures on natural philosophy in various parts of the kingdom. B. at Devonport, 1807.

HUNT, William, an eminent living English water-colour artist. He is unrivalled for his transcripts of simple rural life, his healthy, ruddy peasant boys, his rustic interiors, and his bits of still life. His works both in the exhibitions of the Water-colour Society and in the engravings are among the most popular art-productions of the time. He was elected a member of the Society of Painters in Water-colours in 1824, his previous career as an artist being very obscure. B. in London, 1790.

HUNT, William Holman, a distinguished living English artist, and one of the founders of the new school of art generally known as the Pre-Raphaelite. On concluding his studies at the Royal Academy, he exhibited his first picture in 1846, which was called "Hark." The "Scene from Woodstock," the "Eve of St. Agnes," and a subject from Bulwer Lytton's "Rienzi," were his subsequent works, all being painted after the usual mode; but in 1850 he, with Millais and other young artists, sought to protest against the old conventional style of art, by an earnest and vigorous attempt at founding a new mode of pictorial representation. These young men called themselves the "Pre-Raphaelite Brethren;" and their works have inaugurated a new era in art. His first work in this new style was called "A Converted British Family Sheltering a Christian Minister." "Valentine Rescuing Sylvia from Proteus," and the "Awakened Conscience," were subsequently produced. His last great works are the "Scapegoat," the "Light of the World," and the fine religious subject, the "Saviour in the Temple." B. in London, 1827.

HUNTE, *hoon'-tai*, a river of Germany, which, rising in the Osnabruck marshes, joins the Weser about 15 miles from Bremen, after a course of some 90 miles.

HUNTER, Robert, *hun'-ter*, an English gentleman, who wrote the famous Letter on Enthusiasm, which was ascribed to Swift and to Shaftesbury. He was governor of New York and the Jerseys several years, and afterwards of Jamaica. D. 1734.

HUNTER, John, a celebrated English anatomist and surgeon. He worked for some time as a cabinet-maker; but solicited his brother William, the celebrated physician, to take him as an assistant, which was granted, and in 1748 he removed to London. The year following he became a student at Chelsea Hospital, where he assiduously studied the rudiments of surgery. He afterwards attended St. Bartholomew's Hospital; and in 1756 was appointed house-surgeon of St. George's Hospital. In the same year he assisted his brother in his school, and acted as demonstrator to his course of lectures. He laboured for 10 years on human anatomy, and not only made himself master of the science as it was then known, but added to it several important discoveries. He also dissected a large number of animals, which laid the foundation of his collection of comparative anatomy. In 1760 he was appointed an army surgeon, and went in that capacity to Belleisle and Portugal. On his return to England, he fixed his residence in London, and taught anatomy and surgery with the highest reputation. In 1767 he was admitted fellow of the Royal Society, and the year following his brother resigned to him his house in Jermyn Street. In 1768 he was chosen one of the surgeons of St. George's Hospital; in 1776 he was appointed surgeon-extraordinary to his majesty. His collection having become extremely large, he took a house in Leicester Square, and erected a building adjoining it for a museum. In 1790 he was appointed inspector-general of hospitals, and surgeon-general of the army. He made more than 10,000 preparations, illustrative of human and comparative anatomy. His contributions to the "Philosophical Transactions" were numerous and interesting. His other works are, a treatise on the "Natural History of the Human Teeth," "Observations on the Animal Economy;" a treatise on the "Blood, Inflammation, and Gunshot-wounds." B. at Long Calderwood, 1726; D. in London, 1793.

HUNTER, William, brother of the preceding, a celebrated English anatomist and physician. He was educated for the church, but an acquaintance with Dr. Cullen inclining him to the study of physic, he resided with the doctor three years. In 1740, he removed to Edinburgh, where he pursued his studies with intense application, and the year following visited London: soon after this he was taken by Dr. Douglas into his house as dissector, and also as tutor to his son. In 1746, he was appointed lecturer to a society of surgeons in Covent Garden, and the year following was admitted a member of the corporation of surgeons. In 1750, he obtained his doctor's degree from Glasgow, and became very distinguished as a physician, particulary in midwifery. In 1762, he was appointed physician extraordinary to the queen, and the same year he published his "Medical Commentaries." In 1767, he was chosen a fellow of the Royal Society, and furnished the Transactions of that body with many valuable papers. In 1768, he was appointed professor of anatomy to the Royal Academy, which office he discharged with great reputation, adapting his anatomical knowledge to the arts of painting and sculpture. In 1781, he succeeded Dr. Fothergill as president of the Society of Physicians in London, and his fame having spread through Europe, he was chosen member of several foreign societies. Dr. Hunter formed a splendid anatomical museum in his house in Windmill Street, at an immense expense; after which, he extended his collection to natural history and general science. He also possessed a magnificent collection of Greek and Latin books, a cabinet of ancient medals, and a large stock of shells, corals, and other curious productions. This museum he bequeathed, at his death, to his nephew Dr. Baillie and Mr. Cruikshank, for thirty years, after which it was to go to the university of Glasgow. B. at Long Calderwood, near Glasgow, 1718; D. 1783.

HUNTER, Henry, a Scotch divine and biblical writer, who, after completing his school and college education in Scotland, became first, a minister of the Scotch church, in his native country, and afterwards at the Scotch church at London Wall. He was a good scholar, a sound divine, very liberal in his principles, and an eloquent preacher. His works are, "Sacred Biography, or Sermons on the principal Characters recorded in Scripture," 6 vols.; two vols. of Miscellaneous Sermons, translations of Lavater's "Physiognomy," St. Pierre's "Studies of Nature," Saurin's Sermons, &c. B. at Culross, Perthshire, 1741; D. at Bristol Wells, 1802.

HUNTER'S ISLES, a group lying in the channel of the same name, off the N.W. extremity of Tasmania.

HUNTERDON, *hun'-ter-don*, a county of New Jersey, U.S., on Delaware river. *Pop.* 29,000.

HUNTINGDON, *hun'-ting-don*, a market-town, borough, and capital of Huntingdonshire, on the Ouse, here crossed by three bridges, which connect it with Godmanchester. The Great Northern Railway has a station here, and it is 16 miles from Cambridge. It has several churches and chapels, town-hall, theatre, and gaols. *Manf.* Beer, and the town has a large traffic in coals, timber, corn, and wool. *Pop.* 6,300.—It is the native place of Oliver Cromwell, whose baptism is entered in the parish register for the year 1599.

HUNTINGDON, a county of Lower Canada, on the S. side of the St. Lawrence.

HUNTINGDON, a county of Pennsylvania, U. S. *Pop.* 25,000.

HUNTINGDON, Selina, Countess of, one of the great patrons of Methodism, was the second daughter of Washington Shirley, Earl Ferrers, and born in 1707. She married Theophilus, earl of Huntingdon, in 1721. After a dangerous illness, she became deeply religious, and, during the remainder of her life, supported a number of itinerant preachers, and built several chapels in various parts of the kingdom. Her religious sentiments were rigidly Calvinistic, and she was the patroness of all of that persuasion. B. 1707; D. 1746.

HUNTINGDONSHIRE, a county of England, inclosed by the counties of Cambridge, Northampton, and Bedford, and comprising 4 hundreds and 107 parishes. The boundaries are mostly artificial and very irregular; but its shape, on the whole, is somewhat similar to that of a square. *Ext.* Its greatest length is 30 miles, and breadth 23. *Area*, 241,690 acres. *Desc.* It is almost entirely an agricultural county. The N. and N.E.

parts consist of fens, which are a portion of the midland division of that extensive tract denominated the Bedford Level, which *see*. *Rivers*. Towards the W. and S. the land rises considerably, leaving an intermediate valley for the waters of the Ouse, which traverses the S. angle of the county, and for various streams which fall into it from the sides of the hills. *Meres or Lakes*. There are several large meres or lakes, of which Whittlesea, though much smaller than formerly, is the largest. The soil is mostly clay, and there are no minerals of importance in the county. *Climate*. Mild and salubrious; not so, however, in the fens, where the dampness and want of pure water operate prejudicially on the health. The uplands originally formed one large forest, and were peculiarly adapted to the pleasures of the chase. Up to the reign of Henry II. it was under forest law; and from the sport of hunting, the county derived its name. *Pro*. Wheat, oats, beans, turnips, rape, hemp, and mustard-seed. Butter is made in large quantities, and horses, cattle, and sheep of mixed breeds are extensively bred. The most celebrated article is the cheese termed Stilton, which was formerly made at a village of that name. *Towns*. Huntingdon, St. Ives, St. Neots, and Kimbolton. *Pop*. 66,000.

HUNTINGTON, *hun'-ting-ton*, the name of a county and several townships of the United States, with small populations. Also of three small parishes in England.

HUNTLY, *hunt'-le*, a parish and town of Aberdeenshire, situate on a point of land formed by the confluence of the Bogie with the Deveron, over which there are here two bridges. It has a market-place and several churches. *Manf*. Cloth and linen-bleaching. *Pop*. 7,200.

HURD, Richard, *hurd*, bishop of Worcester, an English divine and writer, who, after leaving the university of Cambridge, in 1757, became rector of Thurcaston, in Leicestershire. In 1775 he was ordained bishop of Lichfield and Coventry, whence he was translated to Worcester in 1781. In 1783 he refused the archbishopric of Canterbury. His literary works are numerous; "Letters on Romance and Chivalry," "Commentary on Horace's Art of Poetry," and "Twelve Discourses on the Prophecies," being among the chief of them. B. in Staffordshire, 1720; D. 1808.

HURDWAR, or HARDWARA, *hoord-war'*, a town in the district of Seharunpoor, Bengal, on the Ganges, 36 miles from Seharunpoor, at the point where the river emerges from the mountains. It is a great resort of Hindoo pilgrims. Here, in the spring, the largest fair in India takes place, no less than 200,000 or 300,000 attending it. Every twelfth year this number is increased to nearly 2,000,000 pilgrims and merchants, who trade in horses, camels, and cattle; shawls, drugs, dried fruits, &c. *Lat*. 29° 57′ N. *Lon*. 78° 2′ E.

HURLSTONE, Frederick Yeates, *hurle'-ton*, a modern English painter, who completed his studies at the Royal Academy in 1820, exhibiting his first picture in 1821. In a short time he became extensively employed as a portrait-painter, and was very popular for his Spanish, Italian, and historical pieces. A quarrel with the hanging committee of the Royal Academy in 1830 induced him to join the Society of British Artists, to whose annual exhibitions he has ever since sent his works. He subsequently became president of this body. His best pictures are, "Arthur and Constance," the "Game of Morra," an Italian subject, a "Spanish Beauty and a Young Moorish Peasant." B. in London, 1801.

HURON, *hu'-ron*, a lake of N. America, and one of the largest in the world. It receives the surplus waters of Lake Superior by the Straits of St. Mary on the N.W., and communicates with Lake Michigan on the W., and with Lake Erie on the S., by the river and lake of St. Clair. *Ext*. Length, 200 miles; average breadth, 160; mean depth, more than 300 feet. *Area*, nearly 20,000 square miles, being only surpassed in size by Lake Superior. Its E. and W. shores are capable of cultivation, but towards the N. they are steep and sterile. *Height* above the sea, nearly 600 feet. This is also the name of several small rivers in N. America.

HURON, a county of Ohio, U. S. *Pop*. 27,000. The name also of several townships in the United States.

HURST CASTLE, *hurst kas'-el*, a parish of Hampshire, 2 miles from Milford, situate on a causeway which runs out into the sea nearly 2 miles, approaching within a short distance of the coast of the I. of Wight. Two lighthouses have been erected on the beach. Here Charles I. remained for several days previous to his trial.

HUSKISSON, William, *hus'-kis-son*, an English statesman, who commenced his political career in 1792 as secretary to Lord Gower, ambassador to the French court. He was under-secretary of state for War, and secretary of the Treasury, in the Pitt administration. In 1823 he became president of the Board of Trade, and both in the ministry and in the House of Commons, where he had sat since 1796, distinguished himself by his profound knowledge of finance and political economy. As a follower of Adam Smith, he combated the prohibitive system of commerce, advocated the relaxation of customs duties and those on colonial produce. He met his death in an unfortunate manner, having been knocked down and ridden over by a locomotive at Parkside, near Liverpool, at the opening of the Liverpool and Manchester Railway. B. at Birch-Moreton Court, Worcestershire, 1770; D. 1830.

HUSS, John, *huss*, a martyr. He was educated at Prague, where he was ordained in 1400, and became rector of the university, and confessor to the queen. Meeting with some of the writings of Wickliffe, he perceived the errors of popery, and by his means a reformation was commenced in the university of Prague, to check which, the archbishop issued two decrees, whereby the new doctrines spread the more. The pope then granted a bull for suppressing these errors, and Huss being cited to appear at Rome, was excommunicated for disobedience. He continued to propagate his principles, and was supported therein by Wenceslaus, king of Bohemia, till 1414, when he was summoned to appear before the council of Constance. The emperor Sigismund sent him a safe-conduct, promising to preserve him in going to and returning from the council; but the members of that assembly, in violation of this pledge, decreed "that no faith is to be kept with heretics;" and as Huss refused to retract his opinions, he was degraded, and burnt alive. After his death a civil war broke out in Bohemia, in which those who followed the martyr's doctrines, and who were called Hussites, fought against King Wenceslaus. The struggle lasted till 1437. Huss's works were printed at Nuremburg in 1558. D. at Hussinetz, Bohemia, about 1370; D. 1415.

HUSSINETZ, *hoos'-se-netz*, a market-town of Prachin, Bohemia, 75 miles from Prague, celebrated for being the birthplace of John Huss.

HUSUM, *hoo'-soom*, a seaport of Denmark, at the mouth of the Auo, on the W. coast of the duchy of Schleswig, 20 miles from Schleswig. *Manf*. Sugar-refining, dyeing, and bleaching: shipbuilding is carried on to a considerable extent. *Pop*. 5,000.

HUTCHESON, Francis, *hutch'-e-son*, a philosophical writer, who received his education at Glasgow, after which he became pastor of a dissenting congregation in Dublin, where he also kept an academy, till 1729. He afterwards removed to Glasgow, on being appointed professor of philosophy in the university of that city. His chief works are, "An Inquiry into the Ideas of Beauty and Virtue;" "A Treatise on the Passions;" "A System of Moral Philosophy," five vols. B. in Ireland, 1694; D. at Glasgow, 1747.

HUTCHINSON, John, *hutch'-in-son*, a philological and biblical writer. He received a liberal education, after which he became steward first to a country gentleman, and next to the duke of Somerset. Having a love for natural history, he made a large collection of fossils, which he intrusted to Dr. Woodward, to be arranged, and an account published of them. The doctor never began the work, which induced him to rely upon his own pen. He therefore quitted the duke's service, who, however, made him his riding purveyor. He also gave him the presentation to the living of Sutton, in Sussex, which Hutchinson bestowed on his friend Mr. Julius Bate, a zealous defender of his doctrines. In 1754, he published the first part of his "Moses's Principia," in which he ridiculed Woodward's "Natural History of the Earth." He also attempted to refute Sir Isaac Newton's doctrine of gravitation. In the second part he main-

tained, in opposition to the Newtonian system, that a plenum and the air are the principles of scripture philosophy. In this work he intimated that the idea of the Trinity might be taken from the grand agents in the natural system,—fire, light, and spirit; which is said to have made an impression on the mind of Dr. Clarke. Mr. Hutchinson was a great admirer of the Hebrew language, and maintained that all its radicals were to be explained by their etymologies; by the aid of which he fancied that he had discovered the true system of natural philosophy in the writings of Moses. For a time, his notions occasioned some warm controversy, being supported by several ingenious and pious writers, but they were zealously opposed in the universities. His works, which are very curious, though obscurely written, have been printed in 12 vols. B. 1674; D. 1737.

HUTTEN, Ulric von, *hoot'-ten*, a German writer. He studied at Cologne and Frankfort-on-the Oder, where he took the degree of M.A. at the age of 18. He then went to Italy; but receiving no supplies from his parents, he enlisted in the army, and served at the siege of Parma. In 1509, he returned to Germany, and was reduced to such poverty as to be obliged to beg his bread. In 1512, he published a Latin poem in praise of the emperor Maximilian, which gained him reputation and friends. The same year he went to Pavia to study the law; but falling into indigence, he again entered the army. He soon obtained his discharge, and returned to his native country, where he embraced the doctrines of Luther, and wrote some elegant pieces in Latin. For his epigrams the emperor knighted him and made him poet laureate. In 1518, he discovered a manuscript of Livy, which he published, as he afterwards did Pliny, Quintilian, and Marcellinus. His writings against the church of Rome were so severe, that the pope sent orders to the inquisitor to seize him; but Hutten fled into Switzerland with Erasmus. B. at Steckelberg, Franconia, 1488; D. at Afnau, near Zurich, 1523.

HUTTON, *hut'-ton*, the name of several small parishes and townships in England.

HUTTON, James, an English chemical philosopher, who took the degree of doctor of medicine at Leyden, in 1749. He wrote many works after his return to England, principally on agriculture, mineralogy, mathematics, and chemistry. His "Dissertations on the Philosophy of Light and Heat" was first published in 1794. B. at Edinburgh, 1726; D. 1797.

HUTTON, Charles, an English mathematician, who, after receiving some education, became teacher of a school at Jesmond, near Newcastle-upon-Tyne. He afterwards removed to the latter place, and opened a school on his own account, meeting with considerable success in his undertaking. He published several mathematical works, and, in 1773, offered himself as a candidate for the professorship of mathematics at the Royal Military Academy of Woolwich, and passed his examination for the post in the most successful manner. He was made fellow of the Royal Society, and, a few years afterwards, foreign secretary to the same body. His mathematical works were both numerous and valuable. He was made LL.D. of the university of Edinburgh in 1779, and is said to have received the sum of £6,000 for condensing the "Philosophical Transactions." His "Course of Mathematics" is still one of the text-books of the Royal Military Academy at Woolwich. B. at Newcastle-upon-Tyne, 1737; D. 1823.

HUY, *hoo'-e* (almost *we*), a town of Belgium, situate in a beautiful valley, 18 miles from Liege. It stands on the Meuse, and is, by that river, divided into two parts. This town is of considerable antiquity; but it has greatly fallen into decay. *Manf.* Paper, leather, soap, salt, tin-wares, ironmongery, and pipes. *Pop.* 8,000.—This place has withstood several sieges, and had its fortifications dismantled in 1718. In 1815, however, its castle was rebuilt.

HUYGENS, Constantine, *hoi'-gens*, lord of Zuylichem. He was secretary to the prince of Orange, and president of the council, and is known by fourteen books of Latin poems, under the title of "Momenta Desultoria," consisting of epigrams and miscellaneous pieces. B. at the Hague, 1596; D. 1617.

HUYGENS, Christian, an eminent mathematician, son of the above, who, from his youth, evinced great aptitude for mathematical science, and in 1651 gave a specimen of his abilities in a book on the "Quadrature of Circles, Ellipses, &c." Not long after, he published a treatise on horology, in which he described the model of a newly-invented pendulum for clocks. In 1659 appeared his "System of Saturn," giving an account of the discovery which he made of a satellite attending that planet. In 1661 he visited England, and was chosen fellow of the Royal Society. He afterwards resided at Paris, on the invitation of Colbert, who gave him a pension, and he was also admitted a member of the Academy of Sciences. His "Cosmotheoros; or a Treatise on the Plurality of Worlds," was printed the same year, and in 1703 appeared his "Opuscula Posthuma," in 1 vol. 4to. All his works have been collected in 6 vols. B. at the Hague, 1629; D. at the same place, 1695.

HUYSOM, John van, *hoi'-som*, a Dutch painter of flower and fruit pieces. His reputation was so great that he fixed immoderate prices on his works. He would never suffer any person to see him while he was painting; so that his method of mixing his colours was an impenetrable secret. His flower-pieces are exquisitely beautiful, as also are his landscapes and animals. B. at Amsterdam, 1682; D. in England, 1749.

HUZAREH COUNTRY, *hus-ăr-é*, an extensive region of Afghanistan, supposed to be the Paropamisus of the Greeks. *Area*, 80,000 square miles. *Pop.* Unascertained. *Lat.* between 31° 30′ and 37° N. *Lon.* between 62° and 68° E.

HYACINTH, *hi'-a-sinth*, a young Lacedæmonian prince of great beauty, son of Amyclas. He was the favourite of both Apollo and of Zephyr, but himself preferred the former. Zephyr is said to have killed him from jealousy; but Apollo transformed him into the flower called after him, engraving on its petals the two first letters of his name. He was worshipped as a divinity at Sparta.

HYADES, *hi'-a-dees*, five daughters of Atlas, king of Mauritania, who were so disconsolate at the death of their brother Hyas, killed by a wild boar, that they pined away and died. They became stars after death, and were placed near Taurus, one of the twelve signs of the zodiac. Their names are Phaola, Ambrosia, Eudora, Coronis, and Polyxus. To these some have added Thiene and Prodice. The ancients supposed that the rising and setting of the Hyades were always attended with much rain.

HYDE, Earl of Clarendon. (*See* CLARENDON.)

HYDE, *hide*, a township of Cheshire, 8 miles from Manchester. *Pop.* 10,200, chiefly employed in coalmines and the manufacture of cotton.

HYDE, Thomas, a learned divine, who studied at King's College, Cambridge, where he applied himself to the mastery of the Oriental languages. Dr. Walton employed him in his great work, the Polyglot Bible, and in the preface gratefully acknowledged his assistance. In 1658 he was admitted of Queen's College, Oxford, where he took the degree of M.A., and was made under-keeper of the Bodleian Library. In 1665, he translated from the Persian, into Latin, Ulugh Beg's "Observations on the Longitude and Latitude of the Fixed Stars, with Notes," and soon after, he obtained a prebend in the church of Salisbury. In 1678, the archdeaconry of Gloucester was conferred on him; in 1682 he took his degree of D.D.; in 1691 he was chosen Arabic professor; in 1700 appeared his great work, entitled, "Historia Religionis Veterum Persarum, eorumque Magorum, &c." 4to. Besides the above preferments, he was made regius professor of Hebrew and canon of Christchurch. B. at Billingsley, Shropshire, 1636; D. at Oxford, 1703.

HYDER-ALY-KHAN, *hi'-der-a-lee-kan*, a celebrated Indian chieftain. His father was a general, under whom he served; and on his death, in 1751, he joined his brother, who was allied with the French. He succeeded his brother as generalissimo of the rajah of Mysore's armies, and distinguished himself in a number of daring exploits, for which he was raised to the princely rank of Suba of Servia. He carried on a successful war against the Mahrattas for many years, and even threatened the annihilation of the English settlements in India. A treaty was concluded in 1769, which was broken in 1780, and the war renewed with

vigour; but the skill of Sir Eyre Coote proved superior to Hyder, who left the military operations to his son Tippoo Saib. B at Diranelli, Mysore, 1728; D. 1782.

HYDERABAD, *hi-der-ra-bad'*, an extensive province of Hindostan, formerly called Telingana, and afterwards Golconda, confined to the country between the rivers Godavery and Kistna. It forms the S.E. portion of the Nizam's dominions. *Ext.* About 350 miles in extreme length, and about 300 in breadth. *Pop.* Unascertained.

HYDERABAD, the capital of the above province, on the Musah, about 6 miles from Golconda. It is a city of about 7 miles in circumference, and is surrounded by a stone wall. It contains two palaces, some handsome mosques, and a fine building erected by the Nizam for the British resident. *Manf.* Unimportant, and principally consisting of silks interwoven with gold, turbans, and small ornaments. The morals of the city are of the very worst description. *Pop.* Variously estimated at from 100,000 to 200,000. *Lat.* 17° 20′ N. *Lon.* 78° 33′ E.

HYDERABAD, a city of Hindostan, and capital of the province of Scinde. The fortress stands on a rock, the foot of which is washed by a branch of the river Indus. There is a good bazar and several handsome mosques inside the fort; but the houses are mostly composed of brick, wood, and clay, and, taken in conjunction with the narrowness and dirtiness of the streets, present an extremely mean appearance. There is here a palace of the Ameers, a square brick building inlaid with coloured porcelain tiles. *Manf.* Arms and ornamental silks and cottons. *Pop.* 20,000. *Lat.* 25° 22′ N. *Lon.* 68° 41′ E.

HYDRA, or IDRA, *hi'-dra*, an island in the Grecian archipelago, lying on the E. coast of the Morea, between the gulfs of Nauplia and Ægina. *Ext.* About 10 miles long and 2 broad. Its town, called also Hydra, is built on the acclivity of a number of pyramidal rocks, rising in an amphitheatre around its port. The houses are almost all of stone. The port is in the form of a crescent, and the harbour, though not large, is deep and commodious. *Manf.* Silk and cotton stuffs, soap, and leather. It trades not only to the ports of the Archipelago and Mediterranean, but to France, Spain, Italy, and other countries. *Pop.* 20,000. *Lat.* 37° 20′ N. *Lon.* 23° 30′ E. During the war of independence, this place was the only one where the Greeks could feel themselves secure. Accordingly, they came to it from all directions, and doubled the population; but when the continental portion of Greece became safe, the refugees left, and the population fell to 20,000.

HYDRA, a huge monster which infested the neighbourhood of Lake Lerna, in Peloponnesus, the fruit of Echidna's union with Typhon. It had a hundred heads, according to Diodorus. As soon as one was cut off, two immediately grew up, if the wound was not stopped by fire. It was one of the labours of Hercules to destroy this dreadful monster (*see* HERCULES), and this he easily effected with the assistance of Iolaus, who applied a burning iron to the wounds as soon as each head was cut off. The conqueror dipped his arrows in the gall of the hydra, and, from that circumstance, all the wounds which he gave, proved incurable and mortal.

HYDRES. (*See* HYDRES.)

HYGEIA, *hi-ge'-ya*, the goddess of health, daughter of Æsculapius, held in great veneration among the ancients. According to some authors, Hygeia is the same as Minerva.

HYLLUS, *hil'-lus*, son of Hercules and Dejanira, who became, after the death of his father (*see* HERCULES), the chief of the Heraclidæ, and married Iole. Driven from the Peloponnesus by Eurystheus, he took refuge with the Athenians; was subsequently the leader of the Heraclidæ against Eurystheus, whom he killed, about 1307 B.C. He afterwards perished in a combat with Echemus, king of Arcadia.

HYMEN, or HYMENÆUS, *hi'-men*, *hi-me-nē'-us*, the god of marriage among the Greeks, was son of Bacchus and Venus, or, according to another version, of Apollo and one of the Muses. The people of Athens instituted festivals in his honour, and solemnly invoked him at their nuptials, as the Latins did their Thalassius. Hymen was generally represented as crowned with that he always attended at nuptials; for otherwise matrimonial connections were fatal, and ended in dreadful calamities; hence people ran about on these occasions, calling aloud, Hymen! Hymen!

HYPATIA, *hi-pai'-she-a*, an illustrious female, was the daughter of Theon, an eminent mathematician of Alexandria, whom she succeeded in the government of that school, had a number of disciples, and became very celebrated for her lectures on Plato and Aristotle, both at Alexandria and Athens. Synesius in particular, who afterwards became a Christian bishop, celebrated her praises in tho most glowing terms. Orestes, the governor of Alexandria, had a high respect for Hypatia, and frequently consulted her on matters of importance. Between the governor and the patriarch Cyril there was a bitter enmity, which broke out into open war, and the monks siding with their chief, assembled in a riotous manner against Orestes, who was obliged to fly from the city. They then seized Hypatia, and having torn her in pieces, burnt her mangled limbs to ashes. She wrote a commentary on Diophantus, and other works, which have been lost. B. at Alexandria, between 370-380; D. at the same place, 415.

HYPERBOREANS, *hi-per-bor'-e-ans*, 'beyond Boreas,' a name given to the inhabitants of the northern parts of Europe and Asia, and to the people who dwell in cold climates generally. Thrace was the residence of Boreas, the god of the north wind, according to the ancients.

HYPERIDES, *hi-per'-i-dees*, an Athenian orator, the disciple of Isocrates and Plato. He was for a long time the rival of Demosthenes, and distinguished himself by his eloquence, and the active part he took in the management of the Athenian republic. After the battle of Cranon, he was taken alive, and, that he might not be compelled to betray the secrets of his country, he cut out his tongue. Only two of his numerous orations remain, which are admired for the sweetness and elegance of their style. D. 322 B.C.

HYPERION, *hi-peer'-e-on*, a son of Cœlus and Terra, married Thea, by whom he had Aurora, the Sun, and the Moon. Hyperion is often confounded by the poets with Helios, the sun.

HYPERMNESTRA, *hi-perm-nes'-tra*, one of the fifty daughters of Danaus, who spared the life of her husband Lynceus, whom her father ordered her to murder the first night of their marriage. Her father summoned her to appear before a tribunal for her disobedience, but the people acquitted her, and Danaus was afterwards reconciled to her and her husband.

HYPSIPYLE, *hip-sip'-i-le*, a queen of Lemnos, daughter of Thoas, remarkable for having spared the life of her father Thoas, when all the Lemnian women, in a fit of jealousy, inhumanly murdered the whole of their male relations. The Argonauts, in their expedition to Colchis, landed on this island, and during their stay rendered the Lemnian women mothers. Jason, the chief of the expedition, left Hypsipyle pregnant at his departure, and promised her eternal fidelity. Hypsipyle brought twins, Euneus and Nabrophonus. Jason forgot his vows to Hypsipyle, and the unfortunate queen was soon after forced to leave her kingdom. Hypsipyle, in her flight, was seized by pirates, and sold to Lycurgus, king of Nemæa. She was intrusted with the care of Archemorus, the son of Lycurgus; and when the Argives marched against Thebes, they met her, and obliged her to show them a fountain where they might quench their thirst. To do this more expeditiously, she laid down the child on the grass, and, in her absence, he was killed by a serpent. Lycurgus attempted to avenge the death of his son, but Hypsipyle was protected by Adrastus, the leader of the Argives.

HYRCANUS, John, *hir-kai'-nus*, high priest and prince of the Jews, succeeded (B.C. 135) his father Simon Maccabæus, who was murdered by his son-in-law Ptolemæus. The same traitor then invited Antiochus into Judæa, and that monarch accordingly laid siege to Jerusalem, which, however, held out against all his attempts. At length a peace was concluded on condition of the Jews becoming tributary to Antiochus, after whose death Hyrcanus restored his country to independence. D. 106 B.C. He was succeeded by his son Hyrcanus II. D. 30 B.C.

in Persia after the murder of the usurper Smerdis. Hystaspes was the first who introduced into Persia the mysteries of the Indian Brahmins; and to his researches in India the sciences were greatly indebted.

HYTHE, *hithe*, a town on the coast of Kent, and one of the Cinque Ports, at the foot of a steep hill near Romney Marsh, and 11 miles from Dover. Its principal buildings are ranged in one long street, which runs parallel with the sea. Several smaller streets, however, branch off at right angles from this chief thoroughfare. The church is a large cruciform structure, with a tower at the west end. In a vault or crypt under the chancel, is an immense quantity of human bones, ranged in a pile, traditionally said to be the remains of persons slain in a battle between the Britons and an invading army of Danes in the 5th century. It has a court-hall, hospitals, a small theatre, a barracks, public library, reading-rooms, schools, and almshouses, and has become a fashionable resort for sea-bathing. *Pop.* 2,300.

HYWEL AB OWAIN GWYNEDD, *hoo-el'*, a prince of North Wales, some of whose poems are included in the Welsh Archæology. On the death of his father, in 1169, he endeavoured to ascend the throne in place of his brother, but was defeated and wounded; on which he went to Ireland, where he died in 1171.

HYWEL AB MORGAN MAWR, prince of Glamorgan, in 1030. He is represented as having been one of the wisest and best of the British princes. B. 913; D. 1043, at the great age of 130 years. In this line we have the following instances of longevity:—Morgan Mawr, aged 129; Hywel ab Rhys, 124; and Arthvael ab Rhys, 120.

HYWEL DADA, or Howel the Good, a celebrated prince and legislator of Wales, who went to Rome with the purpose of revising the code of laws for the government of his country. D. 948.

## I.

[For places not found in I, look in J and Y; Russian names in JE are sometimes begun with a simple E.]

IACCHUS, *i-ăk'-kus*, the name given to Bacchus in the Eleusinian mysteries. (*See* BACCHUS.)

IAMBLICHUS, *i-am'-ble-kus*, king of Arabia, who was deprived of his estates by Augustus, after the battle of Actium, for supporting the cause of Marc Antony; but his son was restored to the throne by the same emperor, B.C. 22.

IAMBLICHUS, a Greek author, and a musician by profession. He wrote several works in Greek; among others, one entitled "Babylonicus," preserved in the library of the Escurial in Spain. Lived in the 2nd century.

IAMBLICHUS, a Platonic philosopher, who studied under Porphyry. He gained many disciples by his eloquence and probity. He was the author of the "Life of Pythagoras," an "Exhortation to Philosophy," and a protest against Porphyry's letter on the Egyptian mysteries. Lived about 350 B.C.

IAMBLICHUS, a Greek author, was a native of Apamea, in Syria, and flourished in the reign of Constantine and Julian the Apostate. D. 363.

IANICULUM, and IANICULARIUS MONS, *i'-a-nik'-u-lum*, one of the seven hills at Rome, joined to the city by Ancus Martius, and fortified as a citadel. It is famous as the burial-place of King Numa and the poet Italicus. Porsenna, king of Etruria, pitched his camp on Mount Janiculum, and the senators took refuge there in the civil wars, to avoid the resentment of Octavius.

IAR, or YAR, *yar*, a Russian word signifying 'height,' commencing a great number of geographical names.

IARBAS, *i-ar'-bas*, king of Gætulia, who sold to Dido the land upon which she built Carthage. He wished to marry that princess, but she, rather than consent, killed herself. Virgil, in his Æneid, says that Iarbas was defeated by his rival Æneas, and that Dido did not kill herself till she had been abandoned by the latter.

IAROSLAV, George, *yar'-os-laf*, grand-duke of Russia, son of Vladimir I., dethroned his brother Swiatopolk in 1019, and reigned till 1054. He suppressed several insurrections, and defeated Boleslas, king of Poland, and the emperors of Constantinople. He encouraged architecture and painting, built schools, made many salutary laws, and rendered the Russian church independent. Henry I., king of France, married Anne, his daughter. Iaroslav founded the city which bears his name.

IASION and IASIUS, *i-ai'-se-on*, a son of Jupiter and Electra, one of the Atlantides, reigned over part of Arcadia, where he diligently applied himself to agriculture. He married the goddess Cybele, or Ceres, by whom he had two sons, Philomelus and Plutus, to whom some have added a third, Corybas, who introduced the worship and mysteries of his mother in Phrygia. He had also a daughter, whom he exposed in a forest as soon as born; but the child was suckled by a she-bear, and afterwards rendered herself famous under the name of Atalanta. Iasion was killed with a thunderbolt by Jupiter, and, after his death, ranked among the gods by the inhabitants of Arcadia.

IBARRA, Joachim, *e-bar'-ra*, a Spanish printer, whose editions of the classical authors of his country are regarded as marvels of the typographical art. B. at Saragossa, 1725; D. at Madrid, 1785.

IBEK, Cotheddin Ibek, *i'-bek*, the chief slave of Schehabeddin, sultan of India, on whose death he usurped the throne, and added to his dominions many provinces of Hindostan. An account of his conquests was written in a volume entitled "Tage al Mather."

IBEK, Azeddin Ibek, or Ibeg, first sultan of the Mameluke Turks in Egypt. He had been an officer in the court of Malek al Saleh, sultan of Egypt; but, on his death, he married his widow, and became partner with her in the throne; but she caused him to be assassinated, in 1257.

IBERIA, *i-beer'-e-a*, a country of Asia, on the Caspian Sea, between Colchis on the west and Albania on the east, now called Georgia.—An ancient name of Spain, derived from the river Iberus.

IBERIAN MOUNTAINS, *i-beer'-e-an*, the most extensive mountain-chain of Spain, beginning to the W. of the Ebro, and extending to the shores of the Mediterranean.

IBERIAN PENINSULA, the S.W. peninsula of Europe, occupied by the kingdoms of Spain and Portugal.

IBERUS, *i-beer'-us*, a river of Spain, now the Ebro, which formerly separated the Roman from the Carthaginian possessions in that country. — A river of Iberia, in Asia, flowing from Mount Caucasus into the Cyrus.

IBI, *e'-be*, a town of W. Spain, in Valencia, 18 miles from Alicante. It is situate on the side of a conical hill, and has spacious streets and a large parish church surmounted by a tower. *Manf.* Linen; and there are several oil and flour mills. *Pop.* about 3,000.

IBRAHIM, *e'-brau-heem*, a very common name with the Arabs and Turks. It is a variation of Abraham, and is more generally used as a Christian than as a surname.

IBRAHIM, the son of Massoud, eighth caliph of the dynasty of Gaznevides, succeeded his brother Feroszad. He acquired great reputation as a just and pious prince, notwithstanding the frequent wars made on the borders of Hindostan, in which he gained such advantages as to acquire the name of the "Conqueror." He reigned 42 years, during which time he erected a number of cities, mosques, and hospitals; he was also a liberal encourager of arts and letters. D. 1098.

IBRAHIM, the son of the caliph Mahadi, brother of Haroun-al-Raschid, and uncle of Amin and Mamon. He was an excellent poet and musician, and the first orator of his time. He was proclaimed caliph at Bagdad, on the death of his nephew Amin, in 817; but Mamon marching from Khorassan to Bagdad with a powerful army, Ibrahim thought it prudent to abdicate the throne. D. at Samara, in 839.

IBRAHIM, emperor of the Turks, was the son of Achmet, and succeeded his brother Achmet IV. in 1640. He besieged and took the capital of Candia from the Venetians, in 1644; but his cruelties and debaucheries were so great that the soldiers strangled him in 1649.

IBRAHIM BEY, a famous Mameluke chieftain, who for some time governed Cairo, in conjunction with Mourad Bey, but afterwards became sole ruler, and

head of the Mamelukes. The French, when they invaded Egypt, defeated him, in 1799, at Al-Arish. He escaped the general massacre of the Mamelukes in 1805, by refusing to accept Mahomet Ali's invitation to visit Cairo with the rest of his ill-fated followers. (*See* MAMELUKES.) B. in Circassia, about 1735; D. in exile, in Nubia, 1846.

IBRAHIM EFFENDI, a native of Poland, who attained by his courage and talents to the highest dignities in the Ottoman empire. He established the first printing-press in Turkey, in 1728. The count de Bonneval furnished him with the types, the first work he produced being a treatise on the military art. He afterwards published the account of an expedition against the Afghans, a Turkish grammar, and a history of Turkey.

IBRAHIM IMAM, the chief priest of the Mahometan religion, was a descendant of the illustrious house of the Abasides. His reputation and authority became so great, that Marvan, or Hemar, the last caliph of the Ommiades, caused him to be put to death by thrusting his head into a bag of lime, A.D. 748.

IBRAHIM OF SCHIRAZ, a Mussulman doctor of law, who wrote several works on jurisprudence, in Arabic. —There was another of the same name, surnamed Merouzi, some of whose works are extant.

IBROS, *i'-bros*, a town of Spain, in the province of Andalusia, on a height near the Guadalimar, 20 miles from Jaen. It is tolerably well-built, and has a parish church, court-house, prison, and schools. *Manf.* Soap; and there are numerous flour and oil-mills. It has likewise a general trade. *Pop.* 4,000.

IBYCUS, *ib'-i-kus*, a Greek lyric poet, who was murdered by some robbers; but, in his dying moments, observing a number of cranes flying over his head, he implored them to be his avengers. Some time after, these murderers walking in Rhegium, seeing some cranes in the air, one of them cried to his companions, "Behold the witnesses of the death of Ibycus." These words, being overheard, excited suspicion: they were apprehended, and, being tortured, confessed their crime, for which they were put to death. He lived about 540 B.C.

IBZAN, *ib'-zan*, 'father of the buckles,' a judge of Israel.

ICARUS, *ik'-a-rus*, son of Dædalus, who, to escape the resentment of Minos, fled with wings from Crete. In his flight, being too high, proved fatal to him; for the sun melted the wax which cemented his wings, and he fell into the Ægean Sea, and was drowned near the island which was called after his name.

ICELAND, *ice'-land*, a large island in the Atlantic Ocean, belonging to Denmark, and situate between the N. Atlantic and the Arctic oceans. It more properly belongs to America (to which we have assigned it) than to Europe. Its distance from the colonized part of Greenland is 166 miles; from the uninhabited part only 95; from the Faroe Isles, 220; and from Drontheim, in Norway, 330. *Ext.* Its length from E. to W. is about 300 miles; its mean breadth, from N. to S. 210. *Area.* Estimated at 40,000 square miles. *Coastline.* Considerable, and, on the S.E., almost unbroken; but, in every other direction, presenting a continued succession of bold promontories and deep bays or fiords. *Desc.* The surface of this island is in the highest degree rugged and mountainous; its soil is so ungrateful, that it produces no corn, and hardly any of the necessaries of life, while volcanic eruptions are continually occurring in many of its parts. No part of the globe presents such a number of volcanic mountains, so many boiling springs, or such immense tracts of lava. Every hill almost is volcanic; and there are at least 30 with remarkable craters. Many of these mountains, too, are covered with perpetual snow and ice, which form immense glaciers, and take the common name of jökull. The principal range runs from east to west, and the highest summits vary from 3,000 to 6,000 feet, and are called Skapta, Kateja, Huervatte, Torsa, Orafa, and Heela. The last, though by no means the highest, has, from its numerous and dreadful eruptions, become the most celebrated mountain of Iceland. The culminating summit is Orafa, which is situate near the S.E. coast, and has an elevation of 6,409 feet above the level of the sea. *Rivers, Lakes, and Springs.* Numerous; but the former are more remarkable for the abruptness of their course than for either their length or usefulness, and some of them have a peculiar taste and smell. The lakes are also numerous; the most remarkable of which are Thingvallatn, Hvitarvatn, and Myvatn. The hot springs in Iceland are all of different temperatures, from the lukewarmth of milk to a state of violent ebullition. In some instances, they are impregnated with sulphur and other mineral substances. The most remarkable of them are called the Great and New Geysers, a name derived from the Icelandic verb *geysa*, 'to rage.' These astonishing phenomena of nature throw into the air great jets of boiling water, accompanied with a noise like the firing of cannon, and a trembling of the adjacent ground. In the N.E. part of the island, near Myvatn, are three hot springs, hardly inferior to the Geysers; also a sulphur mountain, on which vast beds of sulphur are covered with so thin a crust as to be very dangerous to the passenger. At the north-east extremity of the island is the cavern of Sutzkellir, formed of lava; whilst, on several parts of the coast, basaltic caves occur, not inferior in comparison to that of Fingal, in the island of Staffa. *Climate.* Not more severe than might be expected from its high latitude. Fogs are frequent; but the air, on the whole, is wholesome. *Zoology.* Reindeer and bears, which are sometimes brought to the island on the drifts of ice. With the exception of these, foxes are the only wild animals. The birds comprise eagles, hawks, falcons, and all kinds of seafowl, which are uncommonly abundant. Large flocks of swans, as well as wild ducks and geese, frequent the lakes and marshes. The down and feathers of the eider duck form an important article of export. The streams are well supplied with salmon, and valuable fisheries of seals, torsk, and herrings are pursued along the coasts. The sheep upon the island have been estimated at upwards of 600,000, the horned cattle at 24,000, and the horses at 20,000. *Pro.* No corn of any kind is raised; no woods are to be seen, but here and there a few stunted birch-trees. Grass, and a few hardy shrubs, are almost the only natural productions of the soil. Potatoes have been introduced, and cultivated with some success; and turnips, radishes, and similar roots thrive tolerably well. Pastures are found, which afford sustenance for the sheep and black cattle. There are few goats or pigs. *Minerals.* The most valuable is sulphur; the others are lignite, chalcedonies, rock-crystals, and the well-known double-refracting spar, for which this island has long been famous. *Exp.* Fish of all kinds, oil, tallow, butter, wool, worsted stockings, down, and feathers; also the skins of sheep, foxes, and other animals. *Imp.* These, though small in value, are various; consisting of corn, spirits, wine, beer, paper, soap, salt, iron, tar, coal, cordage, manufactured articles, and articles of colonial produce. *Manf.* Entirely domestic, every family within itself, being capable of supplying its own wants. Whatever surplus there may be, consists of coarse woollens, mittens, and stockings. *Rel.* Lutheranism. The Reformation was early introduced into Iceland, and nowhere has it produced nobler fruits. *Pop.* about 60,000. *Lat.* between 63° 24′ and 66° 33′ N. *Lon.* between 13° 31′ and 24° 17′ W. In 874, Iceland was taken possession of by a colony from Norway. In 1387 it was transferred, with Norway, to the crown of Denmark, with which it still remains, notwithstanding the union of Norway with Sweden. About the year 1530, the reformed religion was introduced, and a translation of the Bible into Icelandic appeared in 1584. Since then, its history exhibits nothing remarkable.

ICENES, or ICENI, *i-se'-ni*, a people of Britain, who revolted against their Roman rulers in the reign of Nero. (*See* BOADICEA.)

ICHTHYOPHAGI, *ik-thi-of'-a-ji*, the name given by the ancients to several peoples who lived upon fish. They were said to inhabit Ethiopia, Arabia Felix, and the shores of the Persian Gulf.

ICILIUS, Lucius, *i-sil'-e-us*, a Roman tribune, to whom Virginia was betrothed. When the latter was carried off by the decemvir Appius Claudius, he raised an army against the decemvirs, and, having caused their fall, was created, by the people, tribune for the second time, B.C. 449. Sheridan Knowles has founded a tragedy, called "Virginius," upon these incidents; and

Macaulay, in one of his ballads, commemorates the story of Virginius.

ICO, *ē'-ko*, a town of Brazil, on the banks of the Salgado, 145 miles from Fortaleza. It is built almost entirely of wood, and, from its being encompassed by hills, the heat is almost insupportable. It has a trade in sugar, hides, cotton, and salt. *Pop.* of the district, 7,000.

ICOLMKILL. (*See* IONA.)

ICONOCLASTES, or ICONOCLASTS, *ī-kon'-o-klasts*, 'image-breakers,' the name of a sect of religious fanatics, who first appeared under the emperor Zeno, about 485. They regarded as idolatrous the worship of images. The sect reached its culminating point of destructive power under Leo the Isaurian, in the 8th century; but was condemned by several councils between 787 and 842. The Iconoclasts destroyed a great number of valuable monuments of religious and secular art.

ICY CAPE, *ī'-se*, a cape on the W. coast of N. America. *Lat.* 70° 29′ N. *Lon.* 161° 46′ E.

IDA, *ī'-da*, a celebrated mountain of Asia Minor, about 30 miles from the site of ancient Troy. It was on Mount Ida that the shepherd Paris adjudged the prize of beauty to the goddess Venus. From its great elevation, the poets say that it was frequented by the gods during the Trojan war. *Lat.* 39° 12′ N. *Lon.* 26° 54′ E.—Another in the island of Crete, now called Psilorite, with an elevation of 7,200 feet. It is reported that Jupiter was educated here by the Corybantes, who, on that account, were called Idæi.

IDA, a nymph of Crete, who went into Phrygia, where she gave her name to a mountain of that country.

IDLE, *ī'-del*, a parish of the W. Riding of Yorkshire. *Pop.* 5,000.

IDLE, a river in Nottinghamshire, which falls into the Trent.

IDOMENEUS, *ī-dom'-e-nuse*, king of Crete, succeeded his father Deucalion on the throne, and accompanied the Greeks to the Trojan war with a fleet of 90 ships. During this war he rendered himself famous by his valour. At his return he made a rash vow, in a dangerous tempest, to Neptune, that if he escaped, he would offer to the god whatever living creature first presented itself to his eye on the Cretan shore. This was his son, who came to congratulate him on his safe return. Idomeneus performed his promise, but the inhumanity of this sacrifice rendered him so odious to his subjects, that he was exiled from his country. Going to Italy, he founded a city called Salentum, in Calabria, where he died at an advanced age.—A Greek historian of Lampsacus, in the age of Epicurus.

IDRIA, *id'-re-a*, a town of Austria, in Carniola, 30 miles from Trieste. The principal public buildings are an elegant church, an hospital, and a dispensary. *Manf.* Silk, lace, and linen goods. Its chief claim to notice, however, are its mines of quicksilver, which, in the neighbourhood, employ the greater proportion of the inhabitants. *Pop.* about 5,000.

IDRIS GAWR, *ī'-dris gowr*, a Welsh astronomer, who is ranked with Gwidion ab Don and Gwyn ab Nudd, as the three great astronomers of Britain. A high mountain in Wales is still called Cader Idris, or the 'seat of Idris.' When he lived is unknown.

IDUMÆA, *i-du-me'-a*, an ancient district of Syria, now divided into two parts; that on the N. called Jebal, and that on the S. called Esh-Sherah, both occupied by Bedouin Arabs.

IDUMEANS, or EDOMITES, ancient inhabitants of Palestine, said to be the descendants of Esau, who was surnamed Edom, 'the red.' They were at first established on the north of the Red Sea, but afterwards spread themselves over Arabia Petræa and the neighbouring countries. The name of Idumean Sea is sometimes given to the Red Sea.

IERMAK, *yer'-mak*, hetman of the Cossacks of the Don, at the end of the 16th century, who, in 1580, undertook, at the head of six thousand men, the invasion of Siberia. After many fierce engagements, he penetrated with 500 horsemen as far as Sibir, the capital, which he took; very soon afterwards, the khans of the neighbouring tribes tendered him their submission. Iermak, fearing that he should not be able to retain his conquests, solicited the aid of Ivan IV., czar of Russia, promising to become his vassal. The czar sent him reinforcements, but he was slain by a Tartar chief, in 1583.

IFFLAND, Augustus William, *if'-fland*, a German author and actor, who became the first comedian of Germany. He subsequently produced a great number of dramas, was appointed director of the theatre at Mannheim, and afterwards of the court spectacles at Berlin. He brought out several adaptations from the French, and from the Italian comedies of Goldoni. B. at Hanover, 1759; D. 1814.

IGLAU, *ig'-lou*, a fortified town of Moravia, near the Iglana, and capital of a circle of the same name, 50 miles from Brunn. It has a large provincial school, six churches, two convents, and several important public offices. *Manf.* Chiefly woollen goods. *Pop.* 16,500.—The CIRCLE is hilly and well wooded, with an area of 780 geographical miles and a population of 190,000.

IGNATIUS, St., *ig'-nai-she-us*, a father of the Church, and martyr, was a native of Syria, and a disciple of St. John the Evangelist, by whom he was made bishop of Antioch, A.D. 68. After discharging the episcopal office with great zeal for 40 years, the emperor Trajan, passing through Antioch, in his Parthian expedition, sent for him, and endeavoured to prevail upon him to renounce his religion. Ignatius continued inflexible; on which the emperor sent him under a guard of soldiers to Rome, where he was exposed to wild beasts in the amphitheatre for the amusement of the people. The martyr joyfully heard his sentence, and endured his sufferings with fortitude. Two pious deacons of his church gathered up his bones, and conveyed them to Antioch, where they were carefully preserved. Seven of his genuine epistles are extant, and were published by Usher at Oxford in 1645. Some others have been attributed to him; but these are generally accounted spurious, though Whiston endeavoured to prove that they were genuine, and that the others were forgeries or abridgments. Suffered martyrdom between 107 and 116.

IGNATIUS, patriarch of Constantinople, was son of the emperor Michael Curopalates, and of Procopia, daughter of the emperor Nicephorus. When his father was deposed by Leo the Armenian, he and his brother were confined in a monastery. Ignatius, whose former name was Nicetas, took the religious vows, and in 847 was raised to the patriarchate; but having rebuked Bardas, one of the principal lords of the court, he was banished to the isle of Terebinthos, and Photius appointed in his stead. A council was called at Constantinople to compel Ignatius to resign, which he refused to do for some time; but close confinement and rigorous usage induced him to yield. When Basil became emperor, he restored Ignatius to his dignity; upon which he immediately excommunicated Photius, and caused the 8th general council to be called at Constantinople. B. 799; D. 878.

IGNATIUS-LOYOLA. (*See* LOYOLA.)

IGOR, *ē'-gor*, grand-duke of Russia, succeeded his father Rurick, and, after making war a long time against his neighbours, proceeded to ravage the East, deluging with blood Pontus, Paphlagonia, and Bithynia. He left his throne to his wife Alga, who, in her old age, embraced Christianity. D. 945.

IGUALADA, *ē'-gwa-la'-da*, a town of Spain, in Catalonia, on the Noya, 36 miles from Barcelona. Its principal buildings are an ancient Gothic church, a town-house, small theatre, and schools. *Manf.* Chiefly woollen goods. *Pop.* 11,000.

IGUAPE, *ē'-gwa-pai*, a town of Brazil, in the province of Sao-Paulo, 90 miles from Santos. It has a considerable trade in rice, rum, and timber. *Pop.* 8,000.

IGUARAÇU, *e-gua-ra'-soo*, a town of Brazil, in the province of Paraiba, 25 miles from Pernambuco. It stands 6 miles from the sea, on a creek, and carries on a considerable trade in sugar and cotton, which are the principal products of the district. *Pop.* 5,000.

IGUMEN, *ē'-gu-men*, a town of Russia, capital of a circle of the same name, 400 miles from Minsk. It is a place of little importance; but the CIRCLE is watered by the Beresina, and is covered with wood and heath. *Pop.* 95,000.

ILCHESTER, *il'-ches-ter*, a borough and market-town of Somersetshire, on the Ivel, over which is a stone

bridge of two large arches, 30 miles from Bristol. It is a place of great antiquity, and had once as many as sixteen churches; but is now of comparatively little consequence, and has scarcely any trade. *Pop.* 1,068.—At the friary of this town Roger Bacon was born, in 1214.

ILDEFONSO, ST., *il'-de-fon-so*, a town of Spain, on the mountain of Guadarrama, 4 miles from Segovia. It is a place of recent date, and owes its origin to the erection of the magnificent royal palace of La Granja, built in the French style and taste, and adorned with statues and numerous other sculptures and paintings. It is a residence of the court during part of the summer, and has a royal manufactory of mirrors. *Pop.* 1,200.

ILFORD, GREAT, *il'-ford*, a village of Essex, on the Roding, 7 miles from London. It has an hospital, which was founded by Henry II. *Pop.* 3,800.

ILFRACOMBE, *il'-fra-koom*, a market-town and seaport of Devonshire, at the mouth of the Bristol Channel, 41 miles from Exeter. It carries on a considerable trade, chiefly in ore, corn, &c., from Cornwall and Devonshire to Bristol, and employs a number of vessels in the herring-fishery of the Bristol Channel. It has a commodious harbour and an excellent pier, 850 feet in length. Of late years it has become a fashionable watering-place. *Pop.* 3,700.—In 1316 this port contributed six ships and 82 mariners to the fleet destined for the expedition to Calais. Steamers run daily to and from Bristol, and at longer intervals to other places on the coast.

ILIA, or RHEA, *il'-i-a, re'-a*, a daughter of Numitor, king of Alba, consecrated a vestal virgin by her uncle Amulius, that she might not become a mother, to dispossess him of his crown. He was, however, disappointed; violence was offered to Ilia, it is said, by the god Mars, in a wood, and she brought forth Romulus and Remus, who drove the usurper from his throne, and restored the crown to their grandfather Numitor. Ilia was buried alive by Amulius, for violating the laws of Vesta; and, because her tomb was near the Tiber, some suppose that she married the god of that river.

ILIACI LUDI, *i-li'-a-si lu'-di*, games instituted by Augustus, in commemoration of the victory he had obtained over Antony and Cleopatra. They are supposed to be the same as the Trojani ludi and the Actia, and Virgil says they were celebrated by Æneas. During these games horse-races and gymnastic exercises were exhibited.

ILIUM, or ILION, *il'-i-um*, a citadel of Troy, built by Ilus, one of the most ancient kings of Troy, from whom it received its name. It is also one of the names of Troy itself.

ILKESTON, *il'-kes-ton*, a town and parish of Derbyshire, 8 miles from Derby. The town is situate on a lofty hill, and consists of one long irregular street, lighted with gas, and rapidly rising in population. The church is an ancient structure, having been partly built in the time of Stephen. It has several chapels, various schools, and a mechanics' institute. *Manf.* Hosiery in all its branches, silk edgings, lace, silk mittens, and also a superior silk fabric, which is made into gloves in London. *Pop.* 5,400.

ILLE-AND-VILAINE, *eel, ve'-lain*, a department in the N.W. of France, bounded on the N. partly by the English Channel and the department Manche, E. by Mayenne, and S. by Loire-Inférieure, and W. by Morbihan and Côtes-du-Nord. *Area*, 2,582 square miles. *Desc.* The surface is in general level, or intersected by hills of little elevation. *Rivers.* The Ille, Vilaine, Meu, and Seiche. It has numerous lakes, or rather large stagnant pools or marshes. *Pro.* Wheat, maslin, oats, buckwheat, hemp, flax, and tobacco. Apple and pear-trees are abundant, and from their fruits some of the best cider and perry in France is made. Poultry, as well as game, are plentiful, whilst great attention is paid to the produce of the dairy. *Manf.* Leather, sailcloth, sacking, and coarse linens, hats, cordage, and sewing-thread. *Pop.* 580,000. *Lat.* between 47° 37′ and 48° 42′ N. *Lon.* between 1° 3′ and 2° 18′ W.

ILLER, *il'-ler*, a large river of Suabia, which rises in the Tyrol, near Baad, and, after a course of about 100 miles, joins the Danube near Ulm.

ILLERTISSEN, *il'-ler-tis'-sen*, a town of Bavaria, and the capital of a district, on the Iller, 12 miles from Ulm. It has two castles, a chapel, and an hospital. *Pop.* 1,200.—The DISTRICT has an area of 48 geographical square miles, and a population of 11,000.

ILLIERS, *il'-le-ai*, a town of France, in the department of the Eure-et-Loire, 15 miles from Chartres, remarkable for the remains of an old castle. *Manf.* Cloth, blankets, hosiery, and leather. *Pop.* 2,300.

ILLINOIS, *il'-le-noi*, a river of the United States, formed by the union of the Kankakee and the Desplaines, in the N.W. part of Indiana. After traversing the state of Illinois in a S.W. direction for nearly 400 miles, it joins the Mississippi in *lat.* 32° 18′ N., 18 miles above the mouth of the Missouri, 1,168 above New Orleans, and 1,400 from Buffalo, New York, on Lake Erie. The river is 400 yards wide at its mouth. A canal has been formed from La Salle, connecting the river with Chicago, on Lake Michigan.

ILLINOIS, one of the western United States, bounded N. by Wisconsin, E. by Indiana and Lake Michigan, S. by Kentucky, and W. by Missouri. *Area*, 56,405 square miles. *Desc.* The state is bordered on three sides by the great rivers Wabash, Ohio, and Mississippi; its N.E. corner touches upon Lake Michigan, and it is intersected by the Illinois and Kaskaskia, which run from N.E. to S.W. into the Mississippi. *Desc.* The greater part of it is either flat or rolling. Extensive prairies constitute two-thirds of its surface, and the character of the various soils of which that is composed might be defined in the following manner.—1. Bottoms, bearing a heavy growth of timber. This land is of the first quality, and is found on all the principal rivers: it varies in width from 50 rods to 2 miles, and is of inexhaustible fertility. 2. Newly-formed land, found at the mouths of rivers. There are many thousands of acres of this land at the mouth of the Wabash, and at the confluence of the Ohio with the Mississippi. It is annually inundated, and is very unhealthy. 3. Dry prairies, approaching the rivers, and bordering on the bottom-land, but elevated from 30 to 100 feet. The prairies of the Illinois river are the most extensive of any east of the Mississippi, and have alone been estimated at 1,200,000 acres. This soil is not inferior to the first-rate river-bottoms. 4. Wet prairie, found remote from rivers, or at their sources. The soil is generally cold and barren, abounding with swamps and ponds, and covered with a tall coarse grass. 5. Timbered land, moderately hilly, well watered, and of a rich soil. 6. Hills, of a sterile soil, and destitute of timber, or covered with stunted oaks and pines. The only part of the state which is thickly wooded is in the S.; in every other part the prairie predominates. The forests consist of oak, walnut, sugar-maple, elm, ash, sycamore, and white pine. *Pro.* Indian corn, wheat, rye, oats, buckwheat, turnips, potatoes, cotton, hemp, flax, tobacco, and the castor bean. Wheat does well, except on the bottoms, where the soil is too rich. Tobacco grows to great perfection, and flax, hemp, oats, Irish and sweet potatoes, do as well as in Kentucky. The common domestic animals are abundant, and large herds of swine feed in the forests. *Minerals.* Lead in immense quantities; indeed the mines of this mineral in this state are considered to be the richest in the world. The others are iron, coal, and copper, limestone, sandstone, and gypsum. Salt springs also are numerous. *Manf.* Inconsiderable, lead being the only article produced to a great extent. *Pop.* 860,000. *Lat.* between 37° and 42° 30′ N. *Lon.* between 87° 17′ and 91° 38′ W.—Illinois was admitted into the Union in 1818.

ILLORA, *eel-yor'-a*, a town of Spain, in the province of Andalusia, 23 miles from Grenada. It is irregularly built, with two parish churches, a monastery, townhouse, and several schools. *Manf.* Woollen and linen stuffs, and there are numerous flour and oil-mills. *Pop.* 7,000.

ILLTYD VARCHOG, *ill'-tud var'-chog*, or, 'Iltutus the Knight,' a saint who accompanied Garmon to Britain, and was placed at the head of the Congregation of Theodosius, so called from being established by that emperor. He introduced an improved method of ploughing among the Welsh. D. about 480.

ILLYRIA, KINGDOM OF, *il-lir'-i-a*, a country in the S. of Europe, lying along the W. shore of the Adriatic, the extent of which has varied very considerably in different ages. Austrian Illyria is now the only country

called Illyria in official papers, and consists of Carinthia, Carniola, the margraviate of Istria, the duchies of Goritz and Gradiska, and the town and territory of Trieste. These three last were incorporated in 1849, previously to which they composed the Littorale, or coast lands. It is bounded on the N. by Salzburg and Styria; E. by Croatia; S. by the Adriatic; and W. by the government of Venice and the Tyrol. *Area*, 8,243 geographical square miles. *Desc.* Mountainous, being intersected by the Carinthian and Julian Alps, interspersed with beautiful and fertile valleys. *Rivers.* The principal are the Save, the Drave, the Laybach, and the Isonzo. *Pro.* Rye, oats, and flax. Wheat is not abundant, but the grape and the finer fruits of the south of Europe are successfully cultivated. The forests supply immense quantities of timber; silk is also cultivated. The pastures being very extensive, large flocks of sheep, with cattle and horses, are raised. As forests cover a large extent of surface, they afford shelter to numbers of bears and wolves, and are, at the same time, a great source of public revenue. *Minerals.* Extremely rich. Copper and iron mines abound, while, at Idria, quicksilver and cinnabar are produced in large quantities. The other mineral products are calamine, vitriol, alum, saltpetre, zinc, sulphur, some gold and silver, and pit-coal. On the coast, bay-salt is made to a large extent. *Manf.* These consist of linen, woollen, and silk, straw-plaiting, and, in particular situations, of hardware. Its trade is considerable, but from the imperfect means of transit at command, was long impeded in its operations. A railway, however, now leads through the centre of the kingdom, from Vienna to Trieste. *Pop.* about 1,285,000.—This country passed under the dominion of Bonaparte after the campaign of 1809. The operations of the Austrians and British for its recovery, took place towards the close of 1813.

**Ilm**, *ilm*, a river of Germany, rising on the N.E. slope of the Thuringerwald, in Saxony, and, after a course of 60 miles, falling into the Saal at Sulza.

**Ilmen**, *il'-men*, a lake of European Russia, near the W. borders of Novogorod. *Ext.* 33 miles long, with a breadth of 28. It receives numerous streams, and, by the Volkhov, discharges itself into Lake Ladoga.

**Ilmenau**, *il'-me-no*, a town of Saxe-Weimar, on the Ilm, 18 miles from Weimar. *Pop.* 2,400. Here, in 1706, a battle was fought by the united forces of the Russians and Saxons against the Swedes.

**Ilminster**, *il'-mins-ter*, a market-town of Somersetshire, on the Ile, 14 miles from Bridgewater. It stands on the acclivity of a hill, and consists of one principal street, intersected, at right angles, by smaller ones. The church is a fine Gothic building, with an elegant tower. *Manf.* Woollens and glove-making. Agriculture is the principal occupation of the inhabitants. *Pop.* 3,300.

**Ilocos**, *e-lo'-kose*, two mountainous provinces of the Philippines, with a united extent of 120 miles, and a breadth of 33. In the plains there is great fertility, producing corn, coffee, sugar, indigo, cacao, and cocoanuts. In the mountains, buffaloes, stags, oxen, and horses abound. *Manf.* Cotton stuffs. *Pop.* 360,000.

**Iloilo**, *e-lo'-e-lo*, a province in the S.E. part of the island of Panay, in the Philippines. It is mountainous and thickly wooded; but, in the valleys, yields rice, cotton, maize, cacao, and tobacco of excellent quality. *Pop.* 260,000.—Its capital town is of the same name, with a population of 4,000.

**Ilovla**, *e-love'-la*, a river of European Russia, rising in the W. of the government of Saratoo, and, after a course of 200 miles, falling into the Don at Fort Donskaia.

**Ilus**, *i'-lus*, fourth king of Troy, son of Tros by Callirhoe. He extended and embellished his city, called Ilium, and also Troy, after his father Tros. Jupiter gave him the Palladium, a celebrated statue of Minerva, and promised that, so long as it remained in Troy, the city would remain impregnable. When the temple of Minerva was in flames, Ilus rushed into the middle of the fire to save the Palladium. For this action he was deprived of his sight by the goddess; but subsequently recovered it. He is said to have reigned between 1402 and 1347 B.C.

**Imam**, or **Iman**, *e'-mam*, the name given by the Mussulmans to the supreme head of their religion.

**Imbert**, Bartholomew, *im'-bair*, a French poet, who became a member of the academy of Nismes, and cultivated literature, particularly poetry, with success. He wrote a poem entitled "The Judgment of Paris;" and also published a volume of fables, which, though excellent, cannot be compared with La Fontaine's. He was likewise the author of a novel entitled "The Mistakes of Love," and some other pieces. B. at Nismes, 1747; D. at Paris, 1790.

**Imbert**, John, an advocate, who published "Enchiridion Juris scripti Galliæ," 1559; "Institutiones Forenses," 1541. D. about 1599.

**Imbert**, Joseph Gabriel, a French painter, who was instructed in his art by Vander Meulen and Le Brun. At the age of 34 he entered into the order of St. Bruno, but still continued to paint. B. at Versailles, 1657; D. 1740.

**Imhoff**, James William, *ime'-hofe*, a celebrated genealogist, of a noble family. He published—1. "De Notitiâ Procerum Germaniæ," 2 vols.; 2. "Historia Genealogica Italiæ et Hispaniæ;" 3. "Familiarum Italiæ, Hispaniæ, Galliæ, et Portugalliæ;" 4. "Magnæ Britanniæ cum appendice," 2 vols. folio; 5. "Recherches sur les Grandes d'Espagne." B. at Nuremberg, 1651; D. 1728.

**Imeretta**, *im'-e-ret'-ta*, a province of Russia, now included in Kutais. It stretches along the southern limit of Caucasus, having the Black Sea on the west and Georgia on the east. *Desc.* Very uneven and rugged, being traversed by ramifications of the Caucasus. *Rivers.* The Rioni and its tributaries. *Pro.* Wheat, maize, barley, tobacco, madder, and hemp. The climate being delightful, fruits grow spontaneously, and cherries, apricots, chestnuts, and walnuts spring up in every direction. The vine, also, is said to grow spontaneously. Considerable attention is paid to the rearing of bees and silkworms. *Manf.* Unimportant; and the trade is wholly in the hands of Armenians, Greeks, and Jews. *Pop.* about 80,000.—In the 14th century, this province formed a part of the kingdom of Georgia; but afterwards became independent, and was governed by its own sovereigns, one of whom, in 1804, voluntarily made it over to Russia.

**Imola**, *e-mo'-la*, a fortified town of Italy, in the Ecclesiastical States, on a small island formed by the Santerno, 25 miles from Ravenna. It is defended by a strong castle, and has an hospital, a theatre, several churches and convents, a college, and a public library. *Manf.* Hosiery and cream of tartar. The town is also the centre of a wine trade. *Pop.* 8,000.—This town was founded by the Lombards on the ruins of Forum Cornelii, destroyed by Justinian, and was afterwards successively held by different chiefs who ruled in Central Italy. Julius II. annexed it to the Papal States.

**Ina**, *i'-na*, king of the West-Saxons, one of the kings of the Heptarchy (*see* Heptarchy), famous for his expeditions against the neighbouring princes. In 726 he went on a pilgrimage to Rome, where he erected an English college, which he endowed by a yearly tax on his kingdom, called Romescot, and afterwards Peterpence.

**Inca**, *in'-ka*, a town of the island of Majorca, standing on a low hill, 17 miles from Palma. It contains a square, several churches, a town-house, and various schools. *Manf.* Leather, linen, soap, and brandy. It has numerous windmills in its neighbourhood. *Pop.* about 5,000.

**Incas**, the title borne by the dynasty reigning in Peru before the conquest of that country by the Spaniards, under Pizarro, in 1533. The Incas pretended to have issued from the sun, and, after death, were adored as deities. The first of the dynasty was Manco-Capac, in the 11th century. His descendants occupied the throne for nearly 500 years. Atabaliba, who occupied the throne at the time of the Spanish invasion, was killed by treachery.

**Inch**, *inch*, a Celtic word, signifying island when used alone, but when with qualifying affixes, it is applied both in Scotland and Ireland to the names of both parishes and islands, of the former of which there are many with small populations in Ireland, and three in Scotland.

**Inchbald**, Mrs. Elizabeth, *inch'-bald*, an English authoress, who, at the age of 16, ran away from her

home in Suffolk, and tried ineffectually to obtain an engagement as actress in a London theatre. She subsequently found employment on the provincial stage; and, after a varied career, married Mr. Inchbald, an actor, who died in 1779. In 1780 she obtained an engagement to play minor parts at Covent-Garden theatre, and remained in that position till 1789, when she retired from the stage. A few years before, she had written a farce, which, being successful, she continued to write for the theatre, and produced in succession nineteen plays, receiving large sums for several of them. Between the years 1806 and 1809 she edited "The British" and "Modern" Theatres, and a collection of farces, in all 42 vols. But the works which cause her name to be remembered are two novels—"A Simple Story," and "Nature and Art." She had written her autobiography, for which £1,000 had been offered and refused by her, and which was destroyed at her request after her death. B. in Suffolk, 1753; D. 1821.

INCH-KEITH, *inch'-keeth*, a small rocky island in the Firth of Forth, about halfway between Leith and Kirkaldy, now occupied as a pasture-ground. A lighthouse, with a revolving light, is erected on it, for the security of vessels navigating the Forth.—There are numerous other islands, with different affixes, in Scotland, but none of them of much importance.

INCHOFFER, Melchior, *inch'-hofe-er*, a German Jesuit, who at first studied the law, but abandoned that profession and entered the Jesuits' college at Rome in 1607. In 1630 he wrote a book, entitled, "The Virgin Mary's Letter to the People of Messina proved to be genuine." Having quarrelled with his brethren, he wrote a satire against them, which was printed after his death, under the title of "Monarchia Folipsorum." He also wrote the "Ecclesiastical History of Hungary." B. at Vienna, 1584; D. at Milan, 1648.

INDEPENDENTS, *in'-de-pen'-dents*, a religious sect, which arose in England during the reign of Charles I., and which, in the administration of its religious ceremonies, permitted neither pastors nor the forms of the established church. The political opinions of the sect were also of the most democratic kind: it desired the abolition of royalty, of the House of Lords, and of all ranks and titles. From this sect, also, arose the term Congregationalists.

INDIA, *in'-di-a*, a corruption of *Hind*, the name given to that region of Asia lying to the south of Tartary, and between Persia and China, with the islands dependent thereon. Besides Hindostan, it contains the Burman empire, Siam, Cochin-China, Tonquin, Tibet, Japan, Ceylon, and a number of principalities of greater or less dimensions, all of which have been, or will be, described under their respective heads.

INDIA, BRITISH, an extensive empire, comprising the larger portion of the great central peninsula of Southern Asia, including Ceylon, the Tenasserim provinces, various districts of the Bengal presidency, the islands in India-beyond-the-Ganges, Singapore, Penang, Malacca, and the Straits Settlement, or Province Wellesley, in or contiguous to the Malay peninsula. This vast region is bounded on the N. by the Himalaya mountains; N.W. by the river Indus and mountain-chain to Cape Monze; W. and S.W. by the Indian ocean, which, with the Bay of Bengal and the Gulf of Manar, bounds it likewise on the S.E.; whilst on its eastern frontier it extends into Upper Assam as far as E. long., and is elsewhere separated by mountain-ranges from the Burmese dominions. *Ext.* 2,000 miles long from N. to S., and 1,800 broad from E. to W. *Area.* Estimated at 1,400,000 square miles. *Desc.* For a general description of this country, in so far as its physical geography, and the manners, customs, religion, &c., of its inhabitants are concerned, we must refer the reader to the articles on HINDOSTAN, CEYLON, BOMBAY, BENGAL, and the names of the various divisions and states comprised within its territory. *Presidencies.* Bengal, Madras, Bombay, and Agra. Bengal is the seat of the governor-general and the supreme council; Madras and Bombay have each a governor and council, and Agra has a lieutenant-governor, without a council. It might be supposed, from the policy of "annexation," regarding which we have heard so much, that the whole of India literally belonged to the British, and that the native states still left independent amidst those dominions over which our direct rule prevails, were both few in number and unimportant in size. Such, however, is far from being really the case. A vast territory is still subject to native princes, either Mahommedan or Hindoo, who reign in all the pomp of barbaric royalty, and govern their subjects with a despotic authority, only tempered by the cautious counsels of the British resident. To enumerate them here, however, would unnecessarily extend this article; but, in order to convey a collective idea of those dependent upon each presidency, we will give the totals of the *areas and populations* of these. Those dependent on Bengal have a united area of 554,391 square miles, and a population of 44,400,000. Those dependent on Madras have a united area of 50,637 square miles, and a population of 4,700,000. Those dependent on Bombay have a united area of 56,400 square miles, with a population of 4,600,000. In applying the word independent, as we have done above, to many of these states, we are aware that it would be incorrect to use the word in the same sense as that in which it is used in Europe. In what we may call their foreign relations, it would be absurd to suppose they possess any freedom of action. But, within their own frontier, the authority of their rulers is almost despotic, and not a few of them possess sufficient power to keep alive the memories which the policy of annexation is blamed for extinguishing. Several are larger than Oude or Nagpore, the latest of our acquisitions in that way. It should seem, therefore, that there is still enough of native rule left in India to give British power the equivocal advantages suggested in the maxim—*divide et impera*. *Public Works.* Great works of public improvement are in course of construction. The Ganges canal has already cost £722,536, and will be completed at an additional cost of some £900,000. The whole length, trunk and branches included, will be 180 miles. It commences at Hindwar, and is to extend nearly to Alighur,—one 170 miles in length, running to the Ganges at Cawnpore; and the other, 165 miles in length, to the Jumna, near Humeerpoor, 40 miles from Futtehpoor. Another canal, 450 miles long, is in progress in the Punjab. Three great trunk roads are far advanced; viz., from Calcutta to Peshawur, 1,422 miles; from Calcutta to Bombay, 1,002 miles; and from Bombay to Agra, 734 miles. One railroad is built; others are projected. A line of telegraph, now extending 82 miles, will soon be increased to 3,150 miles. *The Land Revenue.* There are three different modes of assessing the land-tax in British India: 1st, a *perpetual* settlement with the proprietors of land; 2nd, a *temporary* settlement with the heads of villages or townships; and 3rd, a *definite* settlement with each individual occupant or cultivator of the soil. But the acknowleged basis of every land-revenue settlement in India is the right of government to a certain share of the gross produce of every inch of cultivated land. The share may be alienated entirely or partially, or it may be diminished by grants from government, or it may be commuted for a money payment under engagements more or less extended for a series of years, or even for perpetuity; but the groundwork of the land revenue in India is the right of government to a share of the gross produce of all cultivation. Land is assessed with reference to the payments of former years, and to the actual state of the cultivation, and of the season. *Justice.* Imperfectly administered. In each of the capital cities of Bengal, Bombay, and Madras, there is a superior civil and criminal court, in which the judges are appointed directly by the sovereign. Within these cities English law is held to be equally binding upon the European and the native inhabitants; but beyond them, Europeans alone are subject to English jurisprudence. *Exp.* The value of the exports from British India to different countries may be roundly estimated at about £16,000,000, and consist of those articles which have already mostly been enumerated under the article HINDOSTAN. *Imp.* The value of the imports from all countries to British India may be taken at £9,000,000. *Rev.* About £24,000,000. *Army.* The total military force at the disposal of the governor-general was, before the sepoy mutiny, about 322,000 men. Since that time, however, numerous changes have been made, and are still being made, for the further security of the empire.

*Pop.* under the British rule, estimated at 190,000,000. *Lat.* between 8° 5′ and 34° N. *Lon.* between 66° 38′ and 97° E.—The origin of our Indian empire, as given in the third volume of "Professional Anecdotes, or Ana of Medical Literature," is attributed to the following circumstance:—"Broughton, an English surgeon, whose good fortune it was to open the commerce of India to his countrymen by the following accident, having been sent from Surat to Agra in the year 1636, to treat one of the daughters of the emperor Shaw-Gehan, had the good fortune to cure the princess. By way of recompense, the emperor, among other favours, gave him the privilege of a free commerce throughout the whole extent of his dominions. Broughton immediately returned to Bengal to purchase goods and transmit them by sea to Surat. Scarcely had he returned, when he was requested to attend the favourite of the nabob of the province, labouring under a very dangerous disease. Having fortunately restored his patient to health, the nabob settled a pension on him, confirmed the privilege of the empire, and promised to allow the same to all the English who should come to Bengal. Broughton communicated all this to the English governor of Surat, and it was by the advice of the latter that the Company sent from England, in 1640, two ships to Bengal. Such was the origin of a commerce that has since been carried to so great an extent, and even produced territorial possessions superior in extent and population to the country an association of whose subjects is their sovereign." The rise and progress of British India is, as a matter of course, for the last two centuries, closely identified with that of the East-India Company, the history of which may be divided into four periods. During the first fourteen years, its members were, in a great measure, independent. In the following ninety-five years, although it had a common capital, its operations were confined by the superiority of the Dutch in the Indian seas, by the civil wars at home, and particularly by the calling in question of its exclusive privileges, which were merely a royal and not a parliamentary authority, but confined to mere commercial transactions; and finally, during the subsequent seventy years, its political power was developed. This commenced in 1748. The French had already set the example. In 1740 a French battalion had destroyed the army of the nabob of the Carnatic, and soon after, the French officers succeeded in disciplining Indian troops according to the European method. Thus far the military organization of the Company had been merely on the defensive. It now became able to act offensively; and the entire difference of the European and Indian notions of law could never fail to furnish opportunities to put this new means of power into action. In 1749 the aggression of the Company began with its protection of the pretender of Tanjore. Under pretence of illegitimacy, the nabob of this district was driven out, for the purpose of obtaining some cessions of territory, and then restored, on making further concessions. The Direction in London was now nothing more than a mere control of the real government, which had its seat in India. Its orders were antiquated before they reached Calcutta. The internal situation of the Company became constantly worse; and, in 1772, it was compelled to raise a loan of £600,000 from the bank, and afterwards of £1,400,000 from the government, for its current expenses. About the end of the last century, leave was given to the Company to add £2,000,000 to their capital stock, by creating 20,000 new shares; but as these shares sold at the rate of £173 each, they produced £3,460,000. The government has now passed from their hands and become entirely vested in a representative minister of the crown. (*See* HINDOSTAN.) The following are the names of the governors-general of British India, with the dates of their accession to office, since the battle of Plassy, in 1757:—

| | |
|---|---|
| Colonel Clive | 1759 |
| Mr. Holwell | 1760 |
| Mr. Vansittart | 1761 |
| Mr. Spencer | 1765 |
| Lord Clive | 1765 |
| Mr. Verelst | 1767 |
| Mr. Cartier | 1769 |
| Mr. Warren Hastings | 1772 |
| Sir J. Mc Pherson | 1785 |
| Earl (Marquis) Cornwallis | 1786 |
| Lord Teignmouth (Sir J. Shore) | 1793 |
| Earl of Mornington (Marq. Wellesley) | 1798 |
| Marquis Cornwallis | 1805 |
| Sir G. Barlow | 1805 |
| Earl of Minto | 1807 |
| Earl Moira (Marquis Hastings) | 1813 |
| Earl Amherst | 1823 |
| Lord W. Bentinck | 1828 |
| Lord Auckland | 1835 |
| Lord Ellenborough | 1842 |
| Sir H. (Lord) Hardinge | 1844 |
| Earl (Marquis of) Dalhousie | 1847 |
| Lord Canning | 1857 |

INDIA, FURTHER, INDIA-BEYOND-THE-GANGES, or INDO-CHINA, is the most E. of the three southern peninsulas of Asia, and is bounded N. by the E. Himalaya, W. by Hindostan, E. by the China Sea, and S. by the Gulf of Siam and the Straits of Malacca. *Ext.* 2,000 miles from N. to S., and about 1,200 broad from E. to W. *Divisions.* The Burman empire, Siam, Annam, Lao, British possessions, and the Malagar states. The British possessions comprise Assam, the country on the Bay of Bengal, and that on the E. side of the Gulf of Martaban, which were taken from Burmah in the war of 1826. Besides these, it includes Prince of Wales Island, Malacca, and Singapore. *Desc.* Traversed generally from N. to S. by lofty ranges of mountains and vast rivers, which, at certain seasons, overflow their banks, and submerge a large extent of country. In consequence of this, many of the houses of the natives are built on piles, whilst others are so constructed as to float like ships, by moorings in the water. Little is known of the interior, where it is believed that many independent tribes exist. *Pop.* 20,000,000. (*See* ANNAM, BURMAH, LAOS, SIAM, &c.)

INDIAN OCEAN, that portion of the general ocean which lies to the S. of Africa and Asia, and is bounded E. and W. by the Pacific and Atlantic oceans, and S. by the Antarctic Circle. More particularly, it may be considered to extend from *lat.* 25° N. to the Antarctic Circle, and from *lon.* 19° 56′ 30″ E. to 146° 33′ E. *Ext.* From N. to S. about 6,500 miles long, and from E. to W. from 4,000 to 6,000 wide.

INDIAN OR WESTERN TERRITORY, a tract of country lying to the W. of the settled portions of the United States, allotted by the government of that republic to be the residence of the Indian tribes. It is bounded N. by the Arkansas and S. Kansas rivers; E. by Missouri and Arkansas; S. by Red River, which divides it from Texas; and W. by a desert. *Area* the occupied habitable portion, 120,000 square miles. *Pop.* 342,000 Indians. *Lat.* between 33° 35′ and 39° 16′ N. *Lon.* between 94° 13′ and 100° 30′ W.

INDIANA, *in′-de-ă′-na*, one of the United States bounded on the N. by Michigan territory, on the E. by Ohio, S. by Kentucky, and W. by Illinois. The Ohio forms the southern boundary of the state, and Lake Michigan touches it upon the north. *Ext.* greatest length from N. to S. is 287 miles, and breadth 155. *Area*, 36,000 square miles. *Gen. Desc.* The northern half has been very imperfectly explored. A ridge of hills, commencing near the mouth of the Wabash, and running in a north-east direction, nearly parallel with the Ohio, at no great distance from it, produces a broken and uneven country. Northward these hills lie the flat woods, 70 miles wide, which bordering on all the principal streams, except the Ohio, there are strips of bottom and prairie land of rich soil, usually from 3 to 6 miles in width. The prairies on the Wabash are the finest land in the state. Remote from the rivers the country is broken, and the soil light. Between the Wabash and Lake Michigan the land is mostly level, and interspersed with wet lands, prairies, lakes, and swamps. *River*: The northern part is watered by the Illinois and Wabash, which flow into Lake Michigan; but the Wabash is the great river of Indiana. It receives the waters of two-thirds of its surface. White River, the largest tributary of the Wabash, is formed by two branches which spread out widely through the whole central half of the state. White-water River in the east is a tributary of the Miami. *Pro.* Wheat, Indian corn, oats, rye, flax, hemp, potatoes, and tobacco.

vicinity of Vevay the vineyards are esteemed the best in the United States. *Minerals.* On the banks of the Wabash, in the upper part of its course, the best kind of coal is found in inexhaustible quantities; and, near the sources of several of the navigable rivers, there are salt springs, from which salt in abundance may be procured. Near Corydon is a large cave, abounding with Epsom salts and saltpetre. Besides these, iron and copper have been found, but they have not been worked to any great extent. *Manf.* Woollens, cottons, leather, hats, paper, soap; and there are iron-forges and fulling-mills. *Pop.* about 1,000,000.—This state was admitted into the Union in 1816.

INDIANOPOLIS, *in-di-a-nop'-o-lis*, a town of the United States, and the capital of Indiana. It is situate nearly in the centre of the state, upon White River, here crossed by a bridge, and navigable for steamboats. It has a state-house, built upon the model of the Parthenon at Athens, several churches and meeting-houses, a female institute, and various schools. *Pop.* about 10,000.

INDIANS, the name by which the various tribes of aborigines scattered over the extensive continent of America are distinguished. They are divided into numerous tribes and nations, all in a state more or less savage, and with all the peculiar characteristics of that kind of life. A description of many of these tribes will be found under their respective appellations. They generally decline as the civilized population advances into the country; though reservations of land have always been set apart by the government of the United States for their support.

INDIBILIS, *in-dib'-i-lis*, prince of the Ilergetes of Spain, entered into an alliance with the Carthaginians, and assisted to gain a victory over P. Scipio, father of Scipio the Great, who was killed in the battle, 212 B.C. Subsequently, he became the ally of Scipio the Great (*see* SCIPIO), and fought under his banner against the Carthaginians, hoping thus to be allowed to retain his kingdom by the Romans. But being deceived in these expectations, he revolted, and, after various struggles, lost his life in battle, 205 B.C.

INDIES, EAST, *in'-des*, a general collective name given to all that vast tract of country which is situate to the south of Tartary, between Persia and China, as well as the islands in the Eastern Sea, such as Borneo, Sumatra, Ceylon, Java, the Maldives, Celebes, Moluccas, Philippines, &c., a description of some of which has already been given, and will be given of the rest, under their respective headings.

INDIES, WEST, ANTILLES, or COLUMBIAN ARCHIPELAGO, an immense island-system, extending in a curve from the Florida shore, on the northern peninsula, to the Gulf of Venezuela, on the southern. This name was applied to them by Columbus, under the idea that they formed part of the Indian continent, to which it was the object of his first voyage to find a western passage; and it has still been retained, though the mistake of the navigator has been discovered. The following is a list of the principal of these islands, which will be found treated of under their respective names:—Tobago, Trinidad, Curazao, Grenada, St. Vincent, Barbadoes, Dominica, Martinico, Antigua, Guadaloupe, Mary Galante, Barbuda, St. Christopher, St. Eustatius, St. Martin, St. Bartholomew, Anguilla, St. Thomas, Cuba, Jamaica, Porto Rico, St. Domingo, and the Bahamas, which are frequently included under the general appellation of West Indies. In most of these islands European colonies have been established, whose industry is directed to the cultivation of their peculiar produce, which is exported to Europe in exchange for manufactured goods. *Area* of the whole of the archipelago, 95,000 square miles, of which the greater Antilles occupy nearly 83,000. *Lat.* between 10° and 27° 30′ N. *Lon.* between 59° W. and the coast of Central America.

IDE...NDIGETES, *in-dij'-e-tees*, a name given to deities by, B... hipped only in some particular places, or who ... sta... men became gods; as Hercules, Bacchus, &c. ...ngla... ue derive the word from *inde* and *geniti*, signifying, ...t ot... n at the place where they were worshipped.

...dra NI...GHIRKA, *in-de-gir'-ka*, a river of Siberia, rising ... the N. side of the mountains of Okhotsk, in *lat.* 61° N. ...mc... *lon.* 142° E., and, after a course of about 800 miles, ...ndling into the Arctic Ocean by several mouths.

...ch...

INDORE, *in-dor'*, a city of Hindostan, in the province of Malwa, and the capital of the Mahratta chief Mulhar Row Holkar, 32 miles from Oojein. The city is extensive, but contains few good houses, most of which are of two stories, built of mud and burnt bricks. It has some mosques, and a new palace constructed of granite; but its handsomest edifice is that of the British Residency, which is one of the finest in Hindostan. *Pop.* Unascertained. *Lat.* 22° 42′ N. *Lon.* 75° 50′ E.—The STATE of Indore is under the protection of the British, and consists principally of a territory comprised in the table-land of Malwa. It is inclosed by the territories of the Bombay presidency, Scinde, and the rajahships of Dhar and Dewas. *Area*, estimated at 4,300 square miles. *Pop.* 600,000. *Lat.* between 21° 20′ and 24° N. *Lon.* between 74° 50′ and 77° E.

INDRAGIRI, *in-dra-geer'-e*, the largest river in the island of Sumatra. *Length*, 200 miles.

INDRE, *ändr*, a river of France, rising near the frontiers of the department " Indre, and, after a course of 140 miles, falling into the Loire between Saumur and Tours.

INDRE, a town of France, in the department of the Loire-Inférieure, 5 miles from Nantes. In its neighbourhood are extensive works belonging to the government, at which cannon and steam-engines are manufactured. *Pop.* 3,000.

INDRE, a department of France, bounded by the departments of the Loire-and-Cher, the Creuse, the Upper Vienne, the Vienne, and the Indre-and-Loire. *Area*, about 2,860 square miles. *Desc.* In general, flat; though a few low hills appear in the S.W., and help to relieve the monotonous character of its scenery. *Rivers.* The principal are the Indre, the Creuse, the Bonzanne, and the Aise. *Pro.* Corn, wine, hemp, and flax. *Minerals.* Iron, several varieties of marble, and lithographic stones. *Manf.* Fine woollen, iron made into scythes and cutlery, linen, paper, candles, earthenware, and porcelain. *Pop.* 265,000. *Lat.* between 46° 22′ and 47° 15′ N. *Lon.* between 0° 52′ and 2° 10′ E.

INDRE-AND-LOIRE, a department of France, bounded by the departments of the Loire-and-Cher, the Indre, the Vienne, and the Maine. *Area*, 2,362 square miles. *Desc.* Diversified with hill, dale, valley, and plain, with a climate remarkably mild, and alike free from the extremes of heat and cold. *Rivers.* The principal are the Loire, the Vienne, the Cher, and the Indre. *Pro.* Hemp, flax, liquorice, anise, and coriander. Agriculture has long been in a backward state, but is now being pursued with greater ardour Fruit, especially prunes and melons, is very plentiful. Walnuts and almonds are also gathered in large quantities, and crushed for the sake of their oil. The vine is also extensively cultivated, and many of the wines of this department bear a good name. *Minerals.* Iron is the most important, and there are some millstone-quarries. *Manf.* Unimportant. They consist of woollen and silk goods, gunpowder, and iron. *Pop.* 312,000. *Lat.* between 46° 46′ and 47° 43′ N. *Lon.* between 0° 3′ and 1° 18′ E.

INDULPHUS, *in-dul'-fus*, supposed to be the seventy-seventh king of Scotland, began his reign in 959. The first seven years of his reign were peaceable; but afterwards, his kingdom was several times invaded by the Danes, who were enraged against him for entering into an alliance with the English. On the Danes landing in great force in the north, Indulphus marched against them, and compelled them to fly to their ships; but, pursuing them too eagerly, he was slain by an arrow.

INDUS RIVER, *in'-dus*, one of the great rivers of Asia, which rises in Tibet, on the N. of the mountain Karlas, celebrated in the mythology of the Hindoos. The geographical position of its source is defined as lying about *lat.* 31° 20′ N., and *lon.* 80° 30′ E. After passing the city of Lahdack, in Tibet, it takes a south-westerly course, and forcing its way through the mountains called the Hindoo Koh, enters Hindostan in about the 35th degree of northern latitude. Its course is generally to the south. In *lat.* 28° 20′ it is joined by the five rivers of the Punjab, united into one stream, called the Punjnud; whence declining to the south-east, it enters the province of Scinde, between the 25th and 26th degrees of latitude. It is again divided by a large island into two considerable branches: the principal or western branch, after passing the city of

Tattah, divides into several streams, which form a delta between Hyderabad and the ocean, Kurachee and Luchput-Bunder, 130 miles in length and breadth. The tide rises nearly up to Tattah, a distance of 70 miles. The quantity of water discharged by this river has been estimated at upwards of 150,000,000 tons annually. *Length*, estimated at 1,700 miles.

INES DE CASTRO, *ē'-nais dai kas'-tro*, a noble lady of Castile, famous for her beauty and her misfortunes. Don Pedro, son of Alphonse IV., king of Portugal, fell in love with and secretly married her. The king, on discovering their union, desired his son to abandon her, but on his refusing to do so, caused Ines to be assassinated, in 1335. On succeeding to the throne, in 1357, Don Pedro executed the most summary vengeance upon the murderers of his former wife, and causing her body to be disinterred, crowned her remains, and proclaimed Ines his queen. The Portuguese poet Camöens (*see* CAMÖENS) founded a tragedy upon this incident, and an excellent play has been written upon the same subject.

INFANTA, *in-fan'-ta*, the title borne in Spain by the younger son of the king, the eldest bearing the title of prince of the Asturias. It is said to have been used as far back as the 10th century.

INGELHEIM, *in'-gel-hime*, a market-town of Hesse-Darmstadt, on the Selz, 8 miles from Mainz. It is walled, and has two churches, and was a residence of Charlemagne. *Manf.* Paper, and it has an oil and wine trade. *Pop.* 2,500.

INGEMANN, Bernhard Severin, *in'-ger-man*, a Danish poet and novelist, whose father, the Protestant pastor of Torkildstrup, in the island of Falster, died while his son was very young. His mother contrived, however, to send him to the university of Copenhagen, where, at the age of 23, he carried off the gold medal for his essay in answer to the question "What relation do poetry and eloquence bear to each other?" A year previously he had published a volume of lyrics, and, in 1814, he produced "The Black Knights," an epical and allegorical poem, on the model of Spenser's "Fairie Queene." Subsequently, he wrote two tragedies, "Massaniello" and "Blanca," which became very popular on the Danish stage. A third drama, "The Shepherd of Tolosa," was unsuccessful; and, although he afterwards wrote several dramas, none were composed with a view to theatrical representation. After having travelled in Europe between the years 1818 and 1820, he wrote a volume of poems, and commenced a series of romances, embodying historical and traditional incidents in the mediæval history of his native country. These romances, several of which have been translated into English, were written in imitation of Sir Walter Scott, and became exceedingly popular in Denmark. In 1822 he was nominated professor of the Danish language and literature at the college of Söröe, near Copenhagen, and, in 1842, was appointed director of the same institution, which may be called the Eton of Denmark. B. at Torkildstrup, island of Falster, 1789.

INGENHOUSZ, John, *ing'-en-hous*, an eminent Dutch physician and chemist. Going early to England, and learning the Suttonian method of inoculation, he went to Vienna, on the recommendation of Sir John Pringle, to inoculate the daughter of the emperor, for which he was made imperial physician, and obtained a pension. He was a fellow of the Royal Society. He wrote,—1. "Experiments upon Vegetables;" 2. a Latin translation of Hulme's treatise on the Stone, Scurvy, and Gout; 3. several chemical treatises on Impregnating Water, &c. with Fixed Air; 4. Papers in the "Philosophical Transactions." B. at Breda, 1730; D. 1799.

INGHEN, William Van, *ing'-hen*, a Dutch historical painter. After being the pupil of Anthony Grebber, he studied in Italy, and, on his return, settled at Amsterdam, where his works are held in great esteem. B. at Utrecht, 1651; D. about 1720.

INGHIRAMI, Cavalier Francesco, *in-ge-ra'-me*, an eminent Italian archæologist, who applied himself assiduously to the study of ancient art. His great work, entitled "Monumenti Etruschi," in six volumes, published in 1826, has been the source from which writers on Etruscan antiquities have derived their knowledge. He was also author of a number of other works on the Art and Remains of Antiquity, and, for a long period, was keeper of the Laurentine library at Florence. B. at Volterra, in Tuscany, 1772; D. 1846.

INGLIS, Sir Robert Harry, *in'-glis*, an English politician, who, for a long period, represented the university of Oxford in the House of Commons. After an educational career at Winchester and Christ Church, Oxford, he was called to the bar of Lincoln's Inn in 1808. He subsequently became private secretary to Viscount Sidmouth. In 1824 he was sent to parliament as member for Dundalk, and, two years later, sat for Ripon. When Sir Robert Peel introduced the Roman Catholic Relief Bill, in 1829, he resigned his seat for Oxford university, which Inglis henceforth represented, till his retirement from public life, in 1853. He was a steady supporter of church and state: he opposed the Reform Bill, the emancipation of Catholics and Jews, and, throughout his career, exhibited a perfect example of the thorough Conservative. B. in London, 1786; D. in London, 1855.

INGOLSTADT, *in'-gol-stat*, a town and fortress of Upper Bavaria, on the Danube, 35 miles from Ratisbon. Its fortifications were demolished in 1820, but they have since been rebuilt stronger than they were before. It is a place of some importance, having both civil and military offices and a court of law. Its public buildings are an arsenal, town-house, old castle, hospital, a monastery, nunnery, and various schools and churches. *Manf.* Woollen and linen cloths, gunpowder, playing cards, and potash. *Pop.* about 10,000. This place had a university of some celebrity. It was founded in 1172, but, in 1800, was removed to Munich.

INGOUVILLE, *ang'-oo-veel*, a town of France, in the department of the Lower Seine, about half a mile from Havre, of which it may be said to form a suburb. Its form is amphitheatrical, and it contains many fine villas belonging to the merchants of Havre. *Manf.* Ropes, china-ware, chemicals, and tiles. *Pop.* 12,100.

INGRAM, Robert, *in'-gram*, an English divine, who entered of Corpus Christi College, Cambridge, of which he became fellow, and took there his degrees in arts. His first preferment was the perpetual curacy of Bridhurst, in Kent; after which he obtained, successively, the small vicarage of Orston, in Nottinghamshire, and the vicarages of Wormington and Boxted, in Essex. He wrote a work called "Accounts of the Ten Tribes of Israel being in America, originally published by Menasseh Ben Israel; with observations thereon." This was published in 1792. B. 1727; D. 1804.

INGRASSIA, John Philip, *in-gras'-si-a*, a physician of Palermo, who, in 1575, delivered his country from the fury of the plague. B. 1511; D. 1581.

INGRES, Jean-Dominique-Auguste, *ängr*, a distinguished French painter, whose father, a painter and musician, sought to inspire him with a love of the musical art. His predilection for painting was, however, so strong, that he was allowed to study it exclusively. After having spent some years in the atelier of David, he won, in 1800, the second great prize for painting. In 1802 he produced one of his most celebrated works,—"The Bather." In 1804 he painted a portrait of Napoleon as first consul, and again in 1806 as emperor. He resided for fifteen years at Rome, and four years at Florence, in both of which cities he painted many of his best works. So great is the estimation of Ingres in France, that, in the great exposition of Paris, in 1855, an entire department was allotted to him for the exhibition of his numerous paintings. He was made chevalier of the Legion of Honour in 1834, and commander in 1845. B. at Montauban, 1781.

INGUL, *in'-gul*, a river of Russia, rising in the government of Kherson, and, after a course of 170 miles, joining the Bug at the town of Nicolaev.

INGULPHUS, *in-gul'-phus*, abbot of Croyland in the 11th century, and favourite of William the Conqueror, to whom he was secretary. He rebuilt his monastery, and obtained for it many privileges. His supposed work, the "History of Croyland Abbey," has been translated from the Latin, and published in Bohn's Antiquarian Library. B. about 1030; D. 1109.

INKERMANN, *in'-ker-măn*, a town of Russia, in the government of Taurida, 33 miles from Simferopol, and now in ruins. Here on Nov. 5th, 1854, General Cathcart, and many other brave men fell, in a severe battle sustained by 8,000 British soldiers, for several hours, against a force of more than 60,000 Russians.

INMAN, Rev. James, *in'-man*, an eminent mathematician, many years professor of mathematics at the Royal Naval College, Portsmouth dockyard. He was the oldest of Cambridge senior wranglers, and was long celebrated in naval circles for his application of science to navigation and shipbuilding. He laboured very many years unobtrusively but zealously in his country's service. His degree dated as far back as 1800. He sailed round the world with Flinders, as astronomer, was wrecked with him, and took part with the late Sir John Franklin in that celebrated action in which a fleet of British merchantmen beat off the French Admiral Linois. While professor of mathematics at the Royal Naval College, he reduced to system the previous ill-arranged methods of navigation, and published several valuable works now in general use in the naval service; but he was best known by his having been the first person in England who built ships on scientific principles, and by his having educated a class of men at whose hands the promised "reconstruction" of the British navy is to take place. Dr. Inman's translation of "Chapman," with his valuable annotations, is the text-book on which all subsequent writers on naval architecture have proceeded. B. 1772; D. 1859.

INN, *in*, a river of Europe, rising in a lake at the foot of the Rhætian Alps, and forming the romantic valleys called the Upper and Lower Engadine. It traverses the Tyrol from west to east, and, after a course of about 280 miles, falls into the Danube at Passau. It is well stocked with various kinds of fish.

INN, a circle of Upper Austria, taking its name from the above river, which flows along part of its W. frontier, and separates Austria from Bavaria. *Area*, 2,060 geographical square miles. *Desc.* Mountainous and well wooded, with great fertility in the valleys. *Pop.* 115,000.

INNERLEITHEN, *in'-ner-lee'-then*, a village of Scotland, 6 miles from Peebles, much resorted to on account of its saline springs. It is the "St. Ronan's Well" of Sir Walter Scott. *Pop.* 500.

INNIS, *in'-nis*, a prefix to the names of numerous parishes, towns, and islands in Ireland, with populations ranging between 500 and 15,000.

INNOCENT I., *in'-no-sent*, pope, was a native of Albano, and elected to the pontifical chair in 402. He proceeded to Ravenna to request the emperor Honorius to make peace with Alaric; but during his absence the latter plundered Rome. D. at Ravenna, 417.

INNOCENT II. ascended the throne in 1130. He was elected by part only of the conclave, the rest choosing Peter de Leon, the son of a Jew, who took the name of Anacletus II., and was acknowledged by the kings of Scotland and Sicily, but Innocent was received by the other princes of Europe. Being driven from Italy, he fled to France, where he held several councils. On the death of his rival and the abdication of his successor, Victor IV., he returned to Rome, and held the second Lateran council in 1139. D. at Rome, 1143.

INNOCENT III. (Lothario Conti) came of a noble family. On account of his learning he was made cardinal, and, in 1198, elected pope. He encouraged the crusades to the Holy Land, promoted one against the Albigenses, laid the kingdom of France under interdict, and excommunicated John, king of England. He greatly extended his temporal dominions, and raised the papal authority to its highest degree of power. B. at Anagni, 1160; D. at Perugia, 1216.

INNOCENT IV. was a Genoese, and became chancellor of the Roman church. Gregory IX. created him a cardinal in 1227. He succeeded Celestine IV. in 1243, at which time the court of Rome was engaged in a contest with the emperor Frederick II. Innocent was obliged to retire to France, where he held the council of Lyons, in which Frederick was excommunicated. He is said to have been the first who gave red hats to the cardinals. D. at Naples, 1254.

INNOCENT V., a Dominican, became archbishop of Lyons, cardinal, and lastly pope, in 1276, but died five months after his election. Some religious pieces of his have been printed.

INNOCENT VI., cardinal bishop of Ostia, was advanced to the papacy in 1352. He was a man of great learning and liberality, and some of his letters are extant. D. at Avignon, 1362.

INNOCENT VII. was elected pope in 1403, but not without great opposition. B. at Abruzzo, 1336; D. 1406.

INNOCENT VIII., a noble Genoese, of Greek extraction, obtained the tiara, in succession to Sixtus IV. in 1485. He endeavoured to organize another crusade, but without success. B. 1431; D. 1491.

INNOCENT IX. ascended the papal throne on the death of Gregory XIV., in 1591, but died two months afterwards. B. at Bologna, 1519; D. at Rome, 1591.

INNOCENT X. (John Baptist Panfili), a Roman, succeeded Urban VIII., in 1644, at the age of 73. He condemned the doctrines of Jansenius, and prosecuted the Barberini family with great violence. B. 1571; D. 1655.

INNOCENT XI.—Innocent X. gave him a cardinal's hat and a bishopric. He was elected pope in 1676, and reformed many abuses in the ecclesiastical state. He had a contest with Louis XIV. of France about the right of disposing of benefices and church lands, claimed by that monarch, and confirmed to him by an assembly of his clergy, which nearly terminated in a separation of the French church from the Roman communion. This pope effected a coalition between Germany, Poland, and Venice, against the Turks. B. at Como, 1611; D. 1689.

INNOCENT XII. (Antonio Pignatelli), a Neapolitan of a noble family, who succeeded Alexander VIII. in 1691. He abolished the extraordinary distinctions paid to the nephews of popes, and condemned the "Maxims of the Saints," written by Fenelon. B. at Naples, 1614; D. at Rome, 1700.

INNOCENT XIII. (Michael Angelo Conti), a Roman, and the eighth pope of his family, was elected to the papal chair in 1721. He gave a pension to the grandson of James II., and is said to have died of chagrin for having been persuaded to bestow a cardinal's hat on Dubois. B. 1655; D. 1724.

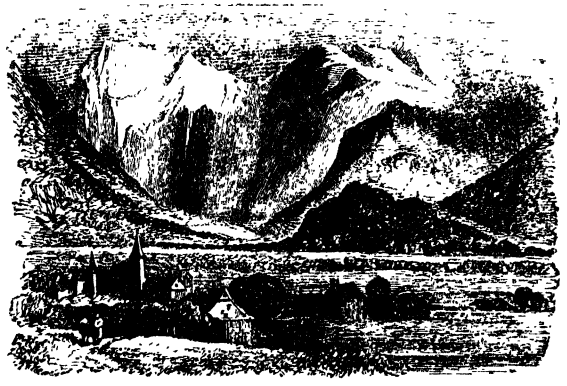
INNSBRUCK, or INNSBRUCK, *ins'-brook*, 'bridge of the Inn,' the capital of the Tyrol, at the confluence of the Sill and the Inn, with a beautiful bridge over the latter river, 60 miles from Munich. Here are several public edifices, more remarkable, however, for size than elegance; such as the government-house, the town-house, the opera, the arsenal, and the barracks. The only buildings of taste are the small chapel erected by the empress Maria Theresa to the memory of her husband, and the great hall in the palace, which was the former residence of the princes of Tyrol. Besides these, there is the Hofkirche, containing the tomb of Maximilian I., although he is not interred in it, and that of Hofer, the celebrated patriot. There are several other churches, containing some good paintings, a lyceum or academy, a medical school, and another establishment called the General Seminary for Tyrol; a museum called the Ferdinandeum, a town-house, and a register-office. *Manf.* Woollens, silks, cottons, gloves, and glass. *Pop.* 13,000.—In the neighbourhood of this place, the Tyrolese peasantry performed many noble deeds in the war of independence.

INO, *i'-no*, a daughter of Cadmus and Hermione. She married Athamas, king of Thebes, after he had divorced Nephele, by whom he had two children, Phryxus and Helle. Ino became mother of Melicertes and Learchus, and soon conceived an implacable hatred against the children of Nephele, because they were to ascend the throne in preference to her own. Phryxus and Helle were informed of her machinations, and escaped to Colchis on a golden ram (*see* PHRYXUS). Juno, jealous of Ino's prosperity, sent Tisiphon to the palace of Athamas, and caused such disturbance therein that Athamas, taking Ino to be a lioness, and her children whelps, pursued her, and dashed her son Learchus against a wall. Ino escaped his fury, but threw herself from a high rock into the sea, with Melicertes in her arms. The gods had compassion on her, and Neptune made her a sea-deity, afterwards called Leucothoe. Melicertes also became a sea-god, known by the name of Palæmon.

INON, *i'-non*, festivals in memory of Ino, celebrated yearly, with sports and sacrifices, at Corinth, Megara, and Laconia.

INOWRAZLAW, or JUNG-BRESLAU, *i'-nou-ras'-law*, a town and capital of a circle of Prussia, in the province of Posen, 14 miles from Bromberg. It has a court of law and several public offices. *Manf.* Saltpetre-works,

and it has both distilleries and breweries. *Pop.* 6,000. —The CIRCLE is flat, but fertile, and has an area of 487 square miles, and a population of 64,000.



INQUISITION, *in'-que-sish'-un*, the name of a terrible institution, the object of which was to root out and punish heresy. The 13th century is said to have been the date of its establishment, the occasion being the sending of missionaries to the central provinces of France by Innocent III., to convert the Albigenses. Peter of Castelnau and some other monks were the first inquisitors. Dominic, a saint of the Roman calendar, was appointed by the pope inquisitor-general in 1215. Introduced into Italy in 1221, the institution received a more complete organization in 1229, under Gregory IX., who raised it to the rank of a regular tribunal. In 1255 an attempt was made to establish the inquisition in France, but it met with only slight success. It was in Spain that the inquisition attained its greatest power, becoming in that country a political as well as a religious institution. In 1232 it commenced its fearful sway in Catalonia, and soon spread over the whole peninsula, Jews and Moors being its especial victims. In 1481, under the reign of Ferdinand and Isabella, the inquisition was reorganized and endowed with new and enlarged powers, being then called, for the first time, the "Holy Office of the Inquisition." Cardinal Torquemada was appointed inquisitor-general, a council known as the "Supreme," and forty-five ordinary inquisitors, being nominated to assist him. This new institution, organized against the will of Pope Sixtus IV., who considered its laws too severe, proceeded to act with more rigour than the former order. Under Philip II. it extended its sway over the Low Countries, and was one of the principal causes which led to the insurrection of those rich provinces, that were afterwards lost by Spain for ever. The power of the inquisition became weaker as civilization and religious tolerance advanced. It existed, however, in Spain when the French entered the country in 1808, but they abolished it. Re-established by Ferdinand VII. in 1814, it was definitively abolished by the Cortes in 1820. The inquisition sought out all who attempted to profess a religion different from the most rigorous form of the Roman Catholic faith; against the unfortunate victims who strove to worship the Divine Being according to their conscience, it employed imprisonment in foul dungeons, horrible tortures, and burning at the stake. This last mode of execution was termed the *auto-da-fe* (act of faith). The history of the inquisition was written by Limborch, and published at Amsterdam in 1692; and by Llorente, whose volumes were produced in Paris in 1817. Both these works were condemned at Rome.

INSARA, or INSAR, *in'-sar*, a town of European Russia, on the banks of the Isa, 58 miles from Penza. *Pop.* 2,500.—This town is the capital of a DISTRICT of the same name, with a population of 180,000.

INSTERBURG, *in'-stair-boorg*, a town and capital of a circle of Prussia, in the province of E. Prussia, 16 miles from Gumbinnen. It has a castle, several schools, an infirmary, court of law, and other public offices. *Manf.* Leather, linen, and earthenware. *Pop.* 10,000.—The CIRCLE is flat, well wooded, but unfertile. *Area*, 350 geographical square miles. *Pop.* 60,000.

INTAPHERNES, *in-ta-fer'-nees*, one of the seven lords of Persia, who conspired to dethrone Smerdis the usurper, 521 B.C. He afterwards endeavoured to seize the crown, for which Darius condemned him to death, with all his family. The wife of Intaphernes presented herself before Darius in a suppliant posture, and not only obtained a pardon for herself, but for any one of her relations whom she might name. She chose her brother, saying she might have another husband and other children, but that, as her father and mother were dead, she could not have another brother. On this, Darius pardoned her brother and son; but Intaphernes was executed.

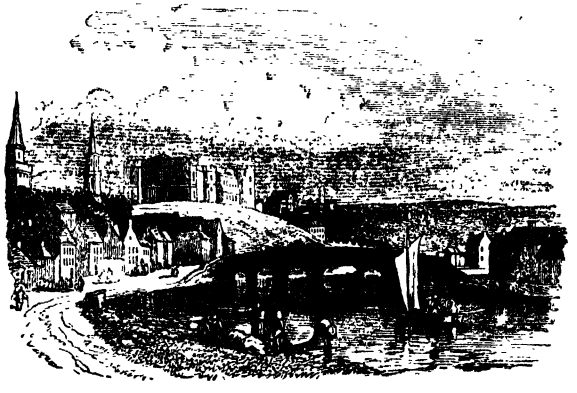
INTERLACHEN, or INTERLAKEN, *in-ter-la'-ken*, 'between the lakes,' a village of Switzerland, 26 miles from Bern. It is beautifully situate near the bank of the Aar, in the valley of Boedeli, between the lakes of

INTERLACHEN.

Brienz and Thun. It has a fine castle and a neat church. On account of its picturesque scenery, and the cheapness of living in it, a great many Englishmen resort to it during the summer months.

INTERREX, *in-ter-rex'*, a supreme Roman magistrate, who, on the death of a king, was intrusted with the duties of the government till a successor had ascended the throne. The first interrex mentioned in Roman history is after the death of Romulus. There was occasionally an interrex during the consular government. He was always a senator, his functions lasting only five days, after which another interrex was nominated.

INTRA, *in'-tra*, a town of the states of Sardinia, on the W. shore of Lake Maggiore, 35 miles from Novara. *Manf.* Cheese, wine, and brandy. *Pop.* 3,800.



INVERARY, *in-ve-rair'-e*, a royal burgh of Scotland, and the chief town of the county of Argyle, in a parish of the same name, 42 miles from Glasgow. It is situate on a small bay, 8 miles from the head of Loch Fyne. The town, though small, is neat and handsome. It has an established and a free church, and a gaol, which contains, also, a range of handsome court and county rooms. The chief support of the place is the herring-fishery, which appears to have flourished from time immemorial. *Pop.* 1,300.—Near to this place is Inverary Castle, a residence of the dukes of Argyle.

INVERGORDON, *in-ver-gor'-don*, a village of Scotland, in Ross-shire, on the Firth of Cromarty, about midway between Tain and Dingwall. It has a safe and commodious harbour for small craft. *Manf.* Flax-spinning; and it has extensive flour-mills. *Pop.* 1,000.

INVERKEITHING, *in-ver-kee'-thing*, a royal burgh and seaport of Scotland, in Fifeshire, on the north coast of the Firth of Forth, 10 miles from Edinburgh. It is of great antiquity, and has a commodious harbour. In the neighbourhood are two foundries, a large distillery, brewery, and shipbuilding-yard and tan-works. *Pop.* 2,800.—This place holds a charter from William the Lion, confirming another of still more ancient date.

INVERNESS-SHIRE, *in-ver-nes'-sheer*, a county of Scotland, bounded on the N. by Ross-shire and part of the Moray Firth; E. by the counties of Nairn, Moray, and Aberdeen; S. by those of Perth and Argyle; and W. by the Atlantic Ocean. *Ext.* About 85 miles in length from E. to W., and about 50 miles at its greatest breadth. *Area*, 4,600 square miles. A small insulated district between the counties of Banff and Moray is annexed to it; also several of the Hebrides. These are Harris, North and South Uist, Benbecula, Sky, Barra, Eigg, and the smaller islets which are situate

on the coast. *Desc.* Generally extremely rugged and uneven, consisting of vast ranges of mountains, separated from each other by narrow and deep valleys. These mountains stretch across the whole county, and lie parallel to every valley, rising like immense walls on both sides, while the intersected parts sink deep between them, with a lake, or rapid river, or arm of the sea, flowing in the centre. The Great Caledonian Glen divides the county, in a N.E. and S.W. direction, into two almost equal parts. The northern extremity of this glen opens by the river Ness, into the Moray Firth, and, following it south-westwards from this point, it incloses lochs Ness, Oich, and Lochy, whence it extends into the Atlantic Ocean, by the long inlet of the sea called Loch Linnhe. There are eight other inferior straths or valleys, which are subordinate to this great glen, and connected with it at different points. In the northern part is another great glen called Strath Glass, with its tributaries, running nearly north-east, and opening into the Firth of Beauly. To the south of the town of Inverness there are other straths bordered by mountains; and farther south, in the district of Badenoch, lies the great strath of the Spey. The coast, especially on the W., is broken by numerous creeks, bays, and arms of the sea; and, in the extensive mosses, huge trunks and stocks of trees are often found, and indicate the fact that, at some distant period, large forests must have covered their surface. *Mountains.* The most extensive range is the Monadlier (Grey Mountain), which extends from Lochaber to the vicinity of Nairn, a distance of 80 miles. In some parts this ridge is 30 miles broad. The Benalder range is the next in point of magnitude, and presents some of the finest mountain scenery in the world. Connected with these ranges are Ben Nevis, 4,370 feet high; Mealfaurvounie, 3,060 feet; Cairngorum and Brae Riach, the one 4,095 and the other 4,304 feet high. *Rivers.* The Ness, the Lochy, the Beauly, and the Spey are the principal. Those of inferior note are the Findhorn, the Nairn, and the Nevis, all of which are fed by numerous smaller streams. Of these may be mentioned the small river Foyers, noted for its tremendous cataract. Mineral springs are rare; but sulphurous and chalybeate springs are found in various situations. The Caledonian Canal, opened in 1832, connects the E. and W. seas from Loch Eil on the W. to the Moray Firth on the E. coast. The number of locks on this canal is 28, all calculated for the passage of a 32-gun frigate. *Zoology.* The mountains and forests are inhabited by herds of red and roe deer; the alpine and common hare, and other game, are also abundant. Wild cats are numerous, large, and very fierce; there are also badgers, and the different varieties of the weasel tribe; whilst the lakes and rivers abound with otters. Most of the species of eagles, hawks, and owls, of different sorts, are to be found. Black game, grouse, and ptarmigan are numerous; also partridges, woodcocks, snipes, and pheasants. The rivers abound with salmon, and, in the lochs, the char is found in great perfection. *Pro.* The soil being extremely various, moss, moor, and heathy ground, covering a large portion of the county, the principal employment of the farmer is the management of black cattle and sheep, especially the former; and numerous herds of goats are also to be found in every district. Oats are the principal crop; but good wheat is grown in the neighbourhood of the Moray Firth. *Minerals.* Limestone is found in every district of the county, and, in many places, approaches to the nature of marble. *Language.* The Gaelic; but, in the neighbourhood of Inverness, the English language is spoken. *Pop.* 96,000.—In order to curb the power of the Highland chieftains, in 1715 and 1745, Fort George, Fort Augustus, and Fort William were constructed. The military roads in this county, made by the soldiers under General Wade, never fail to excite the astonishment and gratitude of travellers.

INVERNESS.

INVERNESS, a royal burgh of Scotland, and the capital of the above county, is situate on both sides of the river Ness, at its entrance into the Moray Firth, 115 miles from Edinburgh. Inverness has long been considered as the metropolis of the Highlands. It is a large and handsome place, adorned with many elegant houses and buildings. The eastern part of the town bears an appearance of antiquity; the western part is of more modern erection, and is not so extensive. Exclusive of the various churches and chapels of different denominations, the principal public buildings are the court-house connected with the gaol, the town-hall, the assembly-rooms, the royal infirmary, the royal academy, endowed by the McIntosh fund, Bell's and the Free Church institutions, a reading-room, debating society, farmers' society, a theatre, schools, and other institutions. Some part of the ramparts of the ancient castle of Inverness still remain. Inverness being the great thoroughfare to the northern counties, is greatly resorted to in the summer season by strangers; and the inns and hotels afford excellent accommodation. The shops are also numerous and handsome; and the whole town wears an aspect of cheerfulness and neatness. *Manf.* The principal are of hemp and flax. Tartan cloth for the Highland markets is manufactured in considerable quantities. There are also several tanneries, candle-works, iron-foundries, rope-works, distilleries, and breweries. The harbour is safe and commodious. *Pop.* about 16,000. *Lat.* 57° 28′ 36″ N. *Lon.* 4° 13′ 30″ W. —Inverness is a place of great antiquity. The first burgh charter was granted to the town by Malcolm Canmore in the year 1067, which has been renewed by successive sovereigns until the reign of James VI., when the constitution or set of the burgh was finally settled. From the time of the Revolution to about the year 1745, Inverness was in a declining state; but it is now almost wholly rebuilt, and its limits are yearly extending on every side.

INVERURY, or INVERURIE, *in-ve-ru'-re*, an ancient royal burgh in Aberdeenshire, seated on a point of land formed by the confluence of the Don and Ury, 14 miles from Aberdeen. It carries on a considerable trade in coal, lime, iron, bricks, and timber. *Pop.* 2,700.—This is the birthplace of William Thom, the poet.

INWOOD, William, *in'-wood*, an English surveyor and architect, who, with his sons, designed many churches and private buildings in London. He and his son Henry were the architects of St. Pancras church, New Road, London, the lower portion of which is an adaptation from an Ionic temple named the Erechtheion, at Athens. The tower is also a copy of the Tower of the Winds at Athens. The Westminster Hospital was his

design, in which he was assisted by his son Charles. B. about 1771; D. 1843.

INWOOD, Henry William, was educated for the architectural profession, and spent several years copying and executing plans of the most celebrated buildings at Athens, &c. The designs for St. Pancras church were prepared after some of these drawings. He published a splendid work, called "Fragments of Athenian Architecture," and commenced a second work on Grecian and Egyptian architectural art; but, owing to his unexpected death, the work remained unfinished. B. 1794; lost at sea, 1843.

INWOOD, Charles Frederick, brother of the above, assisted his father William in many of his works, and was himself architect of the church of All Saints, at Great Marlow, Buckinghamshire. B. 1798; D. 1840.

IO, *ī'-o*, daughter of Inachus, or, according to others, of Jasus or Pirene, was priestess of Juno at Argos. Jupiter became enamoured of her; but Juno discovering the god in her company, Jupiter changed Io into a beautiful heifer, and the goddess obtained from her spouse the animal, whose beauty she had condescended to commend. Juno commanded the hundred-eyed Argus to watch the heifer; but Jupiter despatched Mercury to destroy Argus, and restore her to liberty. Io was now persecuted by Juno, who sent a malicious insect to torment her. She wandered over the earth, and crossed the sea, till at length she stopped on the banks of the Nile, still exposed to Juno's plague. Here she was changed by Jupiter into a woman, and bore Epaphus. She subsequently married Telegonus, or Osiris, king of Egypt. After death she received divine honours under the name of Isis. According to Herodotus, Io was carried away by Phœnician merchants, who wished to make reprisals for Europa, who had been stolen from them by the Greeks.

IOLAS, or IOLAUS, *ī'-o-lăs*. The most celebrated of this name is a son of Iphiclus, king of Thessaly, who assisted Hercules in conquering the Hydra, and burnt with a hot iron the place where the heads had been cut off, to prevent the growth of others. He was restored to youth and vigour by Hebe, at the request of his friend Hercules. Subsequently, he assisted the Heraclidæ against Eurystheus (*see* HERACLIDÆ), and is said by some to have killed that tyrant with his own hand. According to Diodorus, Iolas died and was buried in Sardinia.

IOLE, *ī'-o-le*, a daughter of Eurytus, king of Œchalia. Her father promised her in marriage to Hercules (*see* HERCULES); but he refused to perform his engagements, and Iole was carried away by force. It was to extinguish the love of Hercules for this princess that Dejanira sent him the tunic poisoned with the centaur's blood, which caused his death. After his death, Iole married his son Hyllus. (*See* HYLLUS.)

IOLO GOCH, *e-o'-lo goch*, a Welsh bard, who lived with Owen Glendower, by whom he was employed to compose warlike songs to rouse his countrymen against the English. Lived between 1370 and 1420.

ION, *ī'-on*. The most remarkable of this name is a son of Xuthus, son of Erechtheus. He married Helice, daughter of Selinus, king of Ægiale. He succeeded to his father-in-law's throne, and built a city, which he called Helice, after his wife. His subjects were named after him, Ionians, and their country that of Ionia.

IONA, ICOLMKILL, or I-COLUMB-KILL, *e-o'-na*, 'the isle of Columba's cell or retreat,' one of the W. islands of Scotland, in the Atlantic Ocean, separated from the western point of Mull by a narrow channel, called the Sound of Iona, 7 miles from Staffa. *Ext.* 3 miles long by 1½ broad. *Area*, 2,000 acres. *Desc.* Icolmkill is chiefly interesting to the antiquarian, for the ruins of its ancient religious edifices. These were established about the year 565, by St. Columba, who left Ireland, his native country, with the intention of preaching Christianity to the Picts. The remains of these edifices, almost all constructed of fine sienite, together with crosses and sepulchral monuments, are the antiquities now extant. The exact date of none of the former is known, but the church is said to have been built by Queen Margaret towards the latter end of the 11th century. It is cruciform, and the east window is a beautiful specimen of Gothic workmanship. Here are the tombs of forty-eight Scottish kings, four kings of Ireland, eight Norwegian monarchs, and one king of France. South from the cathedral and St. Oran's chapel are the ruins of the nunnery, the church of which is pretty entire; and here, also, are several monuments. There is an established church and a free church in the village of Iona, which faces the sound, and consists of about forty thatched cottages. *Pro.* Barley, oats, and potatoes; but the rearing of black cattle forms the principal occupation of the inhabitants.

IONIAN ISLANDS, *ī-o'-ni-an*, sometimes called the Republic of the Seven Islands, a small republic in the south-east of Europe, consisting of seven principal islands, and a number of islets, extending along the south-west coast of Greece. The seven principal islands are Corfu, Cephalonia, Zante, Santa Maura, Ithaca or Thiaki, Cerigo, and Paxo. Corfu is the most northerly, and lies opposite to Albania; Paxo, Santa Maura, Ithaca, Cephalonia, and Zante, follow each other in succession to the southward, lying along the coasts of Albania and the ancient Elis; but Cerigo is detached, being 150 miles to the south-east of Zante, and opposite to the coast of the ancient Laconia. They are under the protectorate of Great Britain, having the title of United States of the Ionian Islands. *Area* of the whole, 1,097 square miles. *Desc.* These islands are mostly of an irregular form, and much indented by the sea. Their surface is generally uneven, containing a number of barren rocks and hills, interspersed, however, with fertile plains and valleys. In these, however, there is not sufficient arable land to produce the corn required for the population. *Pro.* Corn, grapes, olives, currants, cotton, honey, wax, &c. *Manf.* Salt, olive-oil, wine, and brandy, as well as other kinds of liquors; and a coarse cotton cloth is made in Cephalonia. *Imp.* Salt-fish, sugar, and drugs; also a limited quantity of woollen, linen, and hardware. *Exp.* Oil, valonia, currants, wine, soap, and salt. *Gov.* This consists of a lord high commissioner, the representative of Great Britain; a senate or executive, composed of a president and five members; and a parliament or legislative assembly, of 40 members, 29 of whom are elected from the various islands. *Pop.* about 220,000. *Lat.* between 35° 43′ and 39° 55′ N. *Lon.* between 18° 35′ and 23° 18′ E. These islands were taken possession of during the last war, by the British, who expelled the French from them, and in their possession they still remain. The people are of the same race as the inhabitants of the adjacent continent, and they partake of the physical configuration of the Greeks. The Ionian Islands were given to France by the treaty of Campo Formio, 1797, by which France and Austria divided the possessions of the republic of Venice. Two years later, a Turco-Russian fleet took possession of them; and by a convention concluded between the Porte and Russia in 1800, it was stipulated that the Seven Islands, and the coast depending on them, should be constituted into a republic, tributary to the Ottoman empire. The treaty of Amiens confirmed the loss to France of the Ionian Islands, by declaring them independent, and placing them under the protection of Russia. The treaty of Tilsit, in 1807, restored them to France, in whose possession they remained till 1814. Finally, by the treaties between the Allied Powers, in 1815, the Ionian Islands were placed under the protectorate of Great Britain.

IONIAN SEA, that portion of the Mediterranean communicating with the Gulf of Venice by the Strait of Otranto, and having Greece and part of European Turkey on the E.; Sicily and the most S. part of Italy on the W. Its greatest breadth is between Cape Matapan in the Morea, and Cape Passaro in Sicily, and which is about 400 miles.

IOWA, *ī'-o-wa*, one of the central United States, bounded on the N. by the Minisotta territory, E. by Wisconsin and Illinois, S. by Missouri, and W. by the unsettled country. *Area*, 50,914 square miles. *Desc.* Varied both in surface and soil, but in general fertile and healthy. *Pro.* Indian corn, wheat, rye, oats, buckwheat, hemp, flax, hay, and potatoes. *Minerals.* Lead, iron, zinc, and limestone. *Pop.* 193,000. This state was admitted into the Union in 1846.

IOWA, a city of the United States, and the capital of the above. It contains a church and a Doric government house. *Pop.* about 3,000.

IPHICRATES, *i-fik'-ra-tees*, a celebrated Athenian

general, who, by introducing some novel improvements in warfare, defeated the Thracians and Spartans. He was the son of a shoemaker, and once, when reproached with the meanness of his origin, answered that he would be the first of his family, whilst his detractor would be the last of his own. B. unknown when; D. 380 B.C.

IPHIGENIA, *if-i-je-ni'-a*, a daughter of Agamemnon and Clytemnestra. When the Grecks, going to the Trojan war, were detained by contrary winds at Aulis, they were informed by Calchas, the soothsayer, that to appease the gods, they must sacrifice Iphigenia to Diana, because her father had killed the favourite stag of that goddess. Agamemnon heard this with the greatest horror and indignation, and rather than shed the blood of his daughter, he, as chief of the Grecian forces, commanded one of his heralds to order the army to disperse. After much solicitation from the other chiefs, Agamemnon consented, however, to immolate his daughter for the common good of Greece; but as soon as Calchas had taken the knife and was about to strike the fatal blow, Iphigenia suddenly disappeared, and a goat of uncommon size was found in her place. This supernatural change animated the Greeks, the wind suddenly became favourable, and the combined fleets set sail from Aulis. Iphigenia's innocence had excited the compassion of the goddess Diana, who carried her to Taurica, where she intrusted her with the care of her temple, whence she subsequently fled with her brother Orestes and his friend Pylades.

IPHIS, *i'-fis*, son of Alector, succeeded his father on the throne of Argos.—2. A beautiful youth of Salamis, of ignoble birth. He became enamoured of Anaxarete; but she treating him with coldness and disdain, he hanged himself. Anaxarete saw him carried to his grave without emotion, and was instantly changed into stone.—3. A daughter of Ligdus and Telethusa, of Crete, was, in consequence of her sex, ordered by her father to be put to death; but Isis commanded her mother, in a dream, to spare the life of her child, and to educate her as if she were a boy. Her father remained ignorant of the deceit, and subsequently gave her in marriage to Ianthe, daughter of Telestes. This involved Telethusa and her daughter in great perplexity; but Isis, on their entreaties, changed the sex of Iphis, and the nuptials were consummated with the greatest rejoicings.

IPHITUS, *if'-i-tus*, a son of Eurytus, king of Œchalia, was killed by Hercules, because his father Eurytus had refused him his daughter Iole, after he had won her by beating him and the other king's sons in drawing the bow.—A king of Elis, who re-established the Olympic games, 338 years after their institution by Hercules, or about 884 years B.C. This epoch is famous in chronological history, as everything anterior to it is involved in fabulous obscurity.

IPSAMBOOL, or ABUSAMBUL, *ip'-sam-bool'*, a place in Nubia, on the left bank of the Nile, 50 miles from Derr. It contains two of the most magnificent and perfect specimens of Egyptian rock-cut temples in existence. *Lat.* 22° 22′ N. *Lon.* 31° 40′ E.

IPSWICH, *ips'-widj*, the capital town of the county of Suffolk, stands on the picturesque river Orwell, here crossed by two bridges, 65 miles from London. The streets are narrow and irregular. The houses are many of them handsome modern buildings; and the rest, though old, are neat, substantial, and commodious, and mostly covered with curiously-carved images. The town contains a number of streets and churches, in the structure of which there is nothing remarkable. The other principal public buildings and institutions are the town-hall, a hall of commerce, a county gaol, a market-place, custom-house, a barracks, hospital, an assembly-room, theatre, a public library, and various schools. *Manf.* Tobacco, snuff, artificial stone, and agricultural implements, for which it is noted. There are also extensive iron-foundries, several breweries, soap-boiling establishments, and shipbuilding-yards. It exports grain and local manufactures, and imports coal in considerable quantities. There is also a pretty extensive general foreign trade, especially in the importation of Norwegian timber, and in oil-cake and linseed. Ipswich is a bonding port for foreign timber. *Pop.* 33,000. According to Camden, this town was originally called Gippeswich, from the neighbouring river Gippen or Gipping. It was destroyed by the Danes, but was subsequently restored by King John, and, since the time of Edward I., it has sent two members to the House of Commons.

IPSWICH, a port of entry in Massachusetts, United States, 24 miles from Boston. It has several churches, a court-house, and a gaol. *Pop.* 3,500.

IRAIL, Augustin Simon, *e'-rail*, a French ecclesiastic, who wrote a tragedy called "The Trumpet of Heroism," "Memoirs for a History of the Republic of Letters," and a "History of the Re-union of Brittany with France." B. at Puy, Valay, 1719; D. 1794.

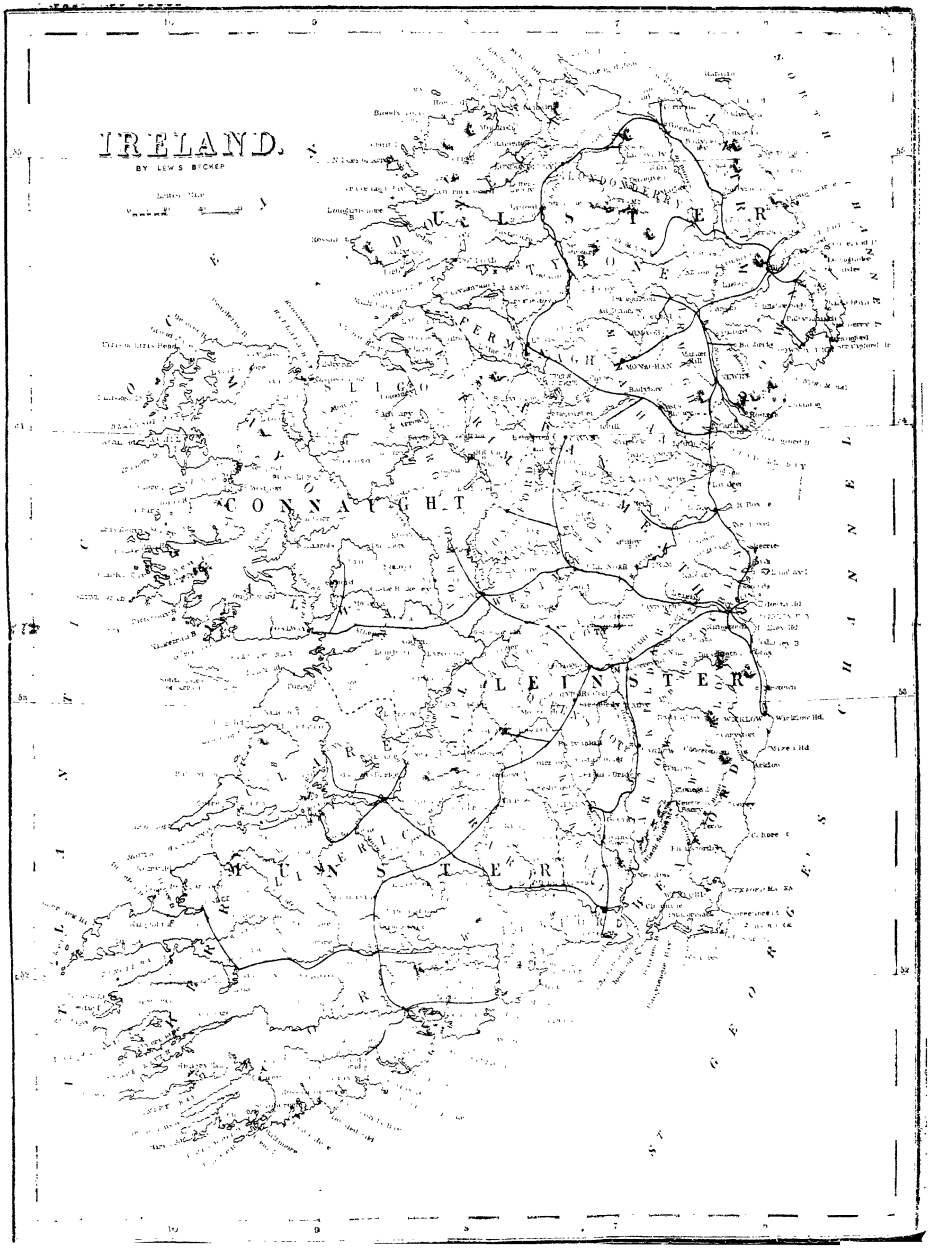
IRAK, *e-rak'*, a province of Persia, bounded S. by Fars and Khuzistan, E. by Khorassan and the Great Salt desert, W. by Kurdistan, N. by Azerbijan, Ghilan, and Mazanderan. *Desc.* Abounding in productive and well-watered valleys, in which there are excellent pasturage and considerable tracts of cultivated land. *Pro.* Wheat, rice, sesamum, and other grains, fruits, tobacco, opium, saffron, silk, and cotton. *Pop.* Unascertained. *Lat.* extending from 31° 35′ to the Kilburz range, in 36° N. *Lon.* between 48° 20′ and 53° 20′ E. Both Teheran and Ispahan are in this province.

IRAK-ARABI, *e'-rak-a'-ra-be'*, a district of Asiatic Turkey, in the pachalic of Bagdad. It lies between the rivers Tigris and Euphrates, and includes the ruins of Babylon *Pop.* Unascertained.

IRBIT, or IRBITSKAIA, *ir'-bit*, a town of Russia, and the capital of a circle of the same name, stands on the river Irbit and the frontiers of Siberia, 270 miles from Perm. It is an entrepôt for Siberian furs and other Asiatic merchandise passing into Europe. *Pop.* 3,400. *Lat.* 57° 35′ N. *Lon.* 62° 50′ E.—The CIRCLE is covered with branches of the Ural Mountains, upon which large numbers of cattle are pastured. *Minerals.* Copper and iron. *Pop.* 95,000.

IRELAND, *ire'-land*, a fertile island of Europe, in the Atlantic Ocean, separated from Great Britain by the Irish Sea, or St. George's Channel, in some parts 130 miles broad, in others not above 12 miles. On all other sides it is surrounded by the Atlantic. It forms the most W. of the two principal islands of which the United Kingdom of Great Britain and Ireland is composed. *Ext.* Measured diagonally from Fair Head in the N.E. to Mizen Head in the S.W., it is 300 miles long, and from Cansore Point in the S.E. to Benwell Head in the N.W., it is 212 broad. Measured in a meridian, and on a parallel of latitude, the greatest length and breadth respectively are only 230 and 180 miles. Between the bays of Dublin and Galway the breadth is 110 miles. *Area*, 32,513 square miles. *Coastline*, 2,200 miles. *Bays and Harbours.* The harbours of Ireland are very numerous. These are Waterford and Cork in the S., Bantry and Dingle in the S.W., the estuary of the Shannon and the vast bay in the W., that great opening in the N.W. with the bay of Sligo is a part. Lough Swilly and Doyle, on the N., are the most considerable. On the E. are the harbours of Belfast, Newry, and Dundalk, and the barred havens of Dublin, Drogheda, and Wexford. Bantry Bay and Cork Harbour are unrivalled, and each might contain all the naval force of the empire. *Capes.* Bengore, Fair Head, Malin Head, and Bloody Foreland on the N.; Erris Head, Achil Head, Slyne Head, Loop Head, Kerry Head, and Mizen Head on the W.; Cape Clear and Cansore Point on the S.; and Wicklow Head and Howth Head on the E. *Islands.* Numerous, but generally unimportant. *Divisions.* For administrative purposes, Ireland is divided into four great provinces,—Ulster, Leinster, Connaught, and Munster, which are again divided into 32 counties, containing 3,436 parishes. Ulster, which occupies the northern part of the kingdom, contains nine counties: Antrim, Armagh, Cavan, Donegal, Down, Fermanagh, Londonderry, Monaghan, and Tyrone. Leinster, situate to the east, contains twelve counties: Carlow, Dublin, Kildare, Kilkenny, King's County, Longford, Louth, Meath, Queen's County, Westmeath, Wexford, and Wicklow. Connaught, towards the west, contains five counties: Galway, Leitrim, Mayo, Roscommon, and Sligo. Munster, which occupies the southern part, contains six counties: Clare, Cork, Kerry, Limerick, Tipperary, and Waterford. *Desc.* The face of the country presents a pleasing variety of surface. In some parts there are rich and fertile plains, watered

by large and beautiful streams, while in other parts hills are found in frequent succession; but, as a whole, the country may be considered as flat. *Mountains.* The mountain-chains are neither numerous nor important; for, though the country, no doubt, contains many hills of considerable elevation, yet they are not of that height, nor are they collected into such masses, as to give to Ireland the character of a mountainous country. The hilly parts are, in general, of easy ascent, and admit of culture a considerable way up their sides; some of them, however, are precipitous, and terminate in cones or spires. The highest summits are Magillicuddy's Reeks, with Gurrane Tual, which attains an elevation of 3,400 feet. Wicklow Hills rise to 3,000; Knockmeledown and the Mairne Mountains to 2,700. These are the loftiest summits in the island. *Bogs.* These form a very remarkable feature in the country, being of different kinds, and in some places very extensive. They are composed of a vegetable matter called peat, and are generally from 20 to 30 feet deep. The peat is used as fuel. The largest bog is that of Allen, situate in King's County, Kildare, Meath, and Roscommon. *Rivers.* The principal are the Shannon, the Bandon, the Lee, the Blackwater, or Broadwater, the Liffey, the Boyne, the Sure, the Barrow, the Slane, and the Bann. The Shannon has a length of 214 miles, and is navigable to Lough Allen, or within 7 miles of its whole extent. The Blackwater has a length of 100 miles, and the Bann is noted for its salmon. *Lakes or Loughs.* The principal are Lough Neagh, Lough Erne, and Lough Corrib. Lough Lane, or the Lake of Killarney, is the most distinguished for its beauties, and Neagh for its size, being 150 square miles, the largest in the British islands. Killarney consists of three lakes,—the Lower, Lake North, and Upper Lake, in which is the island of Innisfallen, considered among the most beautiful in Europe. *Climate.* In general more temperate than the climate of other countries in the same latitude. The heat of summer is less oppressive, and the cold of winter less severe. It is also much more humid, rain being more frequent, and the atmosphere, even when there is no rain, being impregnated with a moisture which affects the walls of houses, as well as the furniture and other articles. *Zoology.* The same as in England; but no venomous reptiles. *Forests.* None; though, in former times, Ireland was called the "Island of Woods." *Pro.* Wheat is grown in various counties, but oats are most extensively cultivated. Ireland has been long celebrated for the immense quantities and excellent quality of potatoes which it produces. Flax is also grown; but the dairy husbandry is the most extensive and the best managed in Ireland. Cattle, swine, and poultry are also largely reared. The fisheries are likewise extensive. *Minerals.* Ireland is said to rest on a bed of granite; and granite is accordingly abundant, also limestone. A great variety of marbles is found; besides gypsum, fuller's earth, and coal. Precious stones, such as beryls, amethysts, and jaspers, have been found; also various species of crystals, which are hard, large, and very brilliant. Pieces of native gold have also been picked up; and the lead-mines in Antrim, Sligo, and Tipperary formerly produced considerable quantities of silver. Copper is found in different counties, and iron-ore is abundant. In the middle of the 17th century, iron-works were very common. Mineral springs, chiefly chalybeate, exist in almost every county. *Manf.* Linen fabrics are the staple branch of industry. The cotton manufacture is also considerable, and that of muslins is carried on in some parts. The distillation of spirits has long been followed in Ireland to a great extent; and there are breweries in different parts. *Imp.* From Great Britain, iron, hops, shot, pepper, tea, pearl-ashes, seeds, tobacco, spices, indigo, drugs, colours, alum, coals, cotton-wool, logwood, silk, calicoes, earthenware, hardware, beer, sugar, coffee, cabinet and upholstery goods, hats, &c. *Exp.* To Great Britain, corn, hides, horsehair, provisions, butter, whiskey, cattle, flax-seed, yarn, tallow, &c. The trade between France and Ireland is considerable: from France wines are imported in exchange for provisions, linen, &c. Portugal sends her wines, particularly her port, and her fruits, &c., and receives provisions, butter, &c. The trade with Spain consists nearly of the same articles.



The commerce between Ireland and the north of Europe is principally carried on through England. With North America and the West Indies the trade is also extensive; but, notwithstanding the numerous advantages which this country enjoys, the condition of its common people has been always very wretched. In former times, they were so poor, and it was so hard for them to get a livelihood, that they frequently went into other countries to seek their fortunes; and, particularly, great numbers passed over to the plantations in America. That part of the inhabitants called the Wild Irish were formerly as savage as the native Americans, and, like them, lived in huts, making a fire in the middle of them; but it is to be hoped that all the rude and barbarous customs, as well as every other trace of wretchedness and degradation, will vanish in time, and that a general industry will take the place of beggary, and that want and misery will be replaced by plenty and comparative happiness. *Rel.* The established religion is the Protestant, though the great majority of the people are Catholics. *Gov.* Vice-regal, the governor being styled the lord-lieutenant of Ireland. In 1800 the Irish parliament was united with that of England. *Pop.* about 7,000,000. *Lat.* between 51° 25′ and 55° 23′ N. *Lon.* between 6° 20′ and 10° 20′ W. —Formerly, Ireland, as a kingdom, was subordinate to that of Great Britain, whose parliament could make laws to bind its people; though an appeal might be made from their courts of justice to the House of Lords in England. In 1782, however, it was declared that, although Ireland was an imperial crown, inseparably annexed to that of Great Britain, yet the kingdom of Ireland was distinct, with a parliament of its own; and that no body of men were competent to make laws for Ireland, except the king, lords, and commons thereof. Some time afterwards, this declaration being thought insufficient, the British legislature, by an express act of parliament, relinquished all claim of right to interfere with the judgment of the Irish courts, or to make laws to bind Ireland in time to come. However, in 1800 it was deemed expedient for the welfare of Ireland that it should be united to Great Britain, and both become one kingdom. Accordingly, the two parliaments passed acts for that purpose, by which the two kingdoms, at the commencement of the year 1801, were to be styled the United Kingdom of Great Britain and Ireland; and that 28 peers, four bishops, and 100 commoners of Ireland were to be elected to represent that country in the imperial parliament, to be assembled in England, at Westminster. Since that time, no public act of any consequence has taken place, save that of Catholic emancipation, which occurred in 1829.

IRELAND, Samuel, a miscellaneous writer and publisher, who was originally a mechanic in Spitalfields; but, having a taste for drawing and engraving, he established himself in business as publisher of illustrated books of home and continental travel. He produced "Picturesque Tours" in Holland, France, and on the Thames and Medway. But the affair which gained him notoriety was his publication of a volume purporting to contain letters and papers of Shakspeare. The whole collection was a forgery by his son; and the exposure of the fraud is said to have hastened the old man's death. D. in London, 1800.

IRELAND, Samuel William Henry, a novelist and miscellaneous writer, notorious for his forgeries of Shakspearian documents, and for producing a play purporting to be Shakspeare's, but which was soon discovered to be a gross forgery. After receiving a fair education in London and in France, he was articled to a lawyer in New Inn. His father was an enthusiastic collector of Shakspearian relics; and it would seem that this first induced him to forge a legal document, to which the autograph of Shakspeare was attached. His simple-minded father was imposed upon; and he soon afterwards supplied him with several more papers, which were published in a volume. William Henry even went so far as to concoct a play called "Vortigern," and to palm it off upon the public as an original work of Shakspeare's. It was produced at Drury-lane theatre, with John Kemble as Vortigern, and was most unequivocally condemned, being sorry trash. The whole of the forgeries were soon afterwards exposed by Malone and others, and he was expelled his father's

IRELAND.
BY LEWIS BICKEP
ULSTER
CONNAUGHT
LEINSTER
MUNSTER

house. He subsequently gained a livelihood by writing a number of indifferent novels and romances, and executing hack-work for booksellers. B. in London, 1777; D. 1835.

IRELAND, one of the Bermuda Islands.

IRELAND'S EYE, a rocky islet, 1 mile from Howth harbour, in the Irish Sea. It contains the ruins of an abbey, and has a martello tower and a lighthouse.

IRELAND, NEW, a narrow island in the S. Pacific, forming the N.E. side of St. George's Channel. *Ext.* 200 miles long, with an average breadth of 12. *Desc.* Hilly, but fertile in the valleys. *Pro.* Sugar, cocoanuts, yams, and bamboos. *Race.* The inhabitants belong to the Australian negroes, and are scrupulously clean in regard to the villages in which they live. *Pop.* Unascertained. *Lat.* between 2° 35′ and 5° 2′ S. *Lon.* between 150° 30′ and 152° 50′ E.

IRENÆUS, St., *i-re-ne'-us*, bishop of Lyons, and the disciple of Polycarp, by whom he is said to have been sent into Gaul. He was at first a priest in the church of Lyons; and, on the martyrdom of Pothinus, succeeded him in the bishopric, in 177. He had a disputation with Valentinus at Rome, and held a council at Lyons, in which the Gnostic heresy was condemned. Irenæus was a great lover of peace, and laboured to allay the controversy, which raged with violence, respecting the time of celebrating Easter. B. in Greece, about 140; D. at Lyons, about 202.

IRENE, *i-re'-ne*, empress of Constantinople, and a saint of the Greek church. She was wife of Leo IV., after whose death she was acknowledged sovereigh, in conjunction with her son Constantine V. She displayed great talents, but committed some atrocious murders on the relations of her husband; and, in order to insure her power, deprived her own son of sight. The people, irritated by her conduct, placed Nicephorus on the throne, who banished her to Lesbos. D. at Athens; D. at Lesbos, 803.

IRETON, Henry, *ire'-ton*, a republican general, and son-in-law of Cromwell. He greatly distinguished himself in the civil war, on the side of the parliament. He studied at Oxford, in which university he took the degree of B.A., and subsequently became a student of the Middle Temple. When the revolution broke out, he entered the parliamentary army, and soon rose to the rank of colonel. At the battle of Naseby he, after fighting very bravely, was taken prisoner by the royalists, but escaped. He was appointed to command in Ireland, where he died. His body was conveyed to England, and interred in Westminster Abbey; but, at the Restoration, it was taken up and hung at Tyburn, with those of Cromwell and Bradshaw. B. in Nottinghamshire, 1610; D. at Limerick, 1651.

IRIS, *i'-ris*, daughter of Thaumas and Electra, one of the Oceanides, messenger of the gods, but more particularly of Juno. Her office was to cut the thread which seemed to detain the soul in the body of those that were expiring. Her name signifies the rainbow, and she is therefore represented with all the beautiful colours of that phenomenon. She is likewise described as supplying the clouds with water to deluge the world.

IRISH SEA, *i'-rish*, that part of the Atlantic Ocean which washes the coasts of Great Britain and Ireland. It lies to the N. of St. George's Channel, and to the S. of the North Channel. *Ext.* 130 miles from N. to S., with a breadth of 60 from E. to W. It contains the islands of Anglesea and Man.

IRKUT, *ir'-kut*, a river of Siberia, in the government of Irkutsk, rising at the foot of the mountains of Sayansk, near the frontiers of China, and, after a course of 220 miles, joining the Angara at the town of Irkutsk.

IRKUTSK, *ir'-kutsk*, a government of Russia, comprehending all the E. part of Siberia, or Asiatic Russia, bounded E. by the Pacific Ocean, or more properly by its gulfs, called the seas of Kamtschatka, Okhotsk, and Anadyr; N. by the Frozen Ocean; W. by Tobolsk; S. by vast chains of mountains, continued from the Altai under the appellations of the Sayansk, Yablonoy, and Slanovoy mountains, which separate it from the regions of Chinese Tartary. *Ext.* From E. to W. about 1,100 miles, with a breadth of about 1,000. *Area*, 350,000 geographical square miles. *General Desc.* Abounding in extensive pastures and large forests. Vast numbers of cattle are reared, and the principal crops are rye, barley, hemp, and flax. There is very little fruit of any kind. *Rivers.* The Lena, the Olonek, the Indigirka, and the Kovyma, which fall into the Icy Sea. *Minerals.* Important; consisting of silver, lead, zinc, tin, and granite. *Manf.* Limited; the principal are leather, soap, and glass. Furs, after metals, form the principal article of export. *Pop.* 508,000. *Lat.* between 48° 40′ and 62° 45′ N. *Lon.* between 96° and 121° E.

IRKUTSK, one of the six circles into which the government of Irkutsk is divided, and which participates in the general description of the above.

IRKUTSK, a city, the capital of the above government and circle, is situate in a plain, 1,237 feet above the level of the sea, at the confluence of the Irkut and the Ushakovar. The houses are of wood, and the streets unpaved. It contains cloisters and many churches, is the residence of the officers of government, and the station of a considerable body of troops; it is also the seat of an archbishopric. Government maintains here a seminary, a popular school, and a school for the Japanese language and navigation. Irkutsk possesses also a great commercial importance. It appears half a Chinese town, from the quantities of porcelain, enamelled and lacquered ware, and Chinese articles of dress and furniture with which the houses are filled. *Manf.* Woollen and linen goods, hats, leather, soap, and glass. The trade is in hay, tea, and other articles imported from China; but more especially in furs, for which the American Company have here large warehouses. The society of the upper classes has a European character; but there are many exiles amongst them. *Pop.* about 15,000. *Lat.* 52° 17′ 16″ N. *Lon.* 104° 26′ 20″ E.

IROCK, *e'-rok*, a town of Sclavonia, 12 miles from Peterwardein. It has a trade in lime. *Pop.* 6,000.

IROQUOIS, *ir'-o-quo*, or the Six Nations, a confederation of the Indians of North America, dwelling partly in the territories of the United States, partly in Canada. The names of these six nations are, the Mohawks, the Oneidas, the Onondagos, the Senecas, the Cayugas, and Tuscaroras. The Iroquois number no more, at the present time, than 12,000 individuals. They are bold, courageous, proud, and hospitable, but passionately addicted to gambling and strong drinks, or "fire-water," the use of which was unknown to them till the arrival of the white man in their country; their indulgence of this passion having decimated their tribes. When the French arrived in Canada in 1603, the Iroquois were a mighty nation, at war with the Adirondacks, these last invoking the assistance of the new comers. The Dutch, spreading themselves along the banks of the Hudson, even as far up as the present city of Albany, drove the Adirondacks before them. During the wars between the English and French, the Iroquois were divided into two great sections, both of which fought alternately on the side of both these nations. In the War of Independence, they were the allies of Great Britain. In 1779 the American troops massacred large numbers of them, and destroyed their villages. Since that period, they have been slowly but effectually driven before the advancing white man, and their tribes have become a mere remnant of their former strength.

IRPEN, *ir'-pen*, a river of Russia, rising in the government of Kiev, and, after a course of 100 miles, joining the Dnieper, 20 miles above the town of Kiev.

IRRAWADI, or IRRAWADY, *ir'-ra-wa'-de*, a river of Asia, traversing the entire length of the Birman empire. It rises in *lat.* 28° N., *lon.* 97° 30′ E.; and, directing its course W.S.W., passes the cities of Umrapoora and Old Ava. In *lat.* 21° 45′ it is joined from the N.W. by the Keenduem river; and, in *lat.* 17° 50′, it divides into two branches, one of which, running to the S.W., passes the town of Persaim or Bassein; the other, running to the S.E., passes Rangoon; but these branches again subdivide into many streams which are met by the tide. The intermediate space is formed into a delta, similar to that of the Nile. Along the banks of this river, the greater part of the population of the Burmese dominions is settled; and it is navigable for vessels of 200 tons burthen as far up as Ava. *Length.* Estimated at 1,200 miles.

IRTISCH, *ir'-tish*, a river of Northern Asia, rising in

the S.W. side of the Altai mountains, near *lat.* 47° N., *lon.* 88° E. At Samarova it joins the Obi, which gives name to the united stream. It abounds with fish, especially the sturgeon.

IRUN, *e'-roon*, a town of Spain, near the left bank of the Bidassoa, 12 miles from St. Sebastian. It is a place of great antiquity, having been in existence in the time of the Romans. *Pop.* 2,600.

IRUPANA, *e-ru-pa'-na*, a town of Bolivia, in the department of La Paz. It has a large and handsome church, with many well-built houses; whilst in its neighbourhood are extensive gardens of exquisite orange-trees. *Pop.* Unascertained.

IRUS, *i'-rus*, a beggar of Ithaca, renowned for his great stature and for his gluttony. His real name was Arneus; but the lovers of Penelope surnamed him Irus, from the Greek *eirein*, 'to speak,' he being employed by them to carry messages. He, not recognizing Ulysses, endeavoured to prevent his entrance to his palace; but that hero killed him by a blow from his fist.

IRVINE, or IRWINE, *ir'-vine*, a seaport and ancient royal burgh of Scotland, in Ayrshire, on the Irvine, and in a parish of the same name, 21 miles from Glasgow. The principal public buildings are the church, surmounted with an elegant spire; the town-hall, which stands in the middle of the street; and, at the N. end of the town, an academy. Besides these, there are several other places of worship, various schools, a handsome news-room, and a subscription library. *Manf.* Weaving, book-muslins, hand-sewing, jaconets, and checks. There are, besides, a manufactory for anchors and cables, and several fine mills. *Pop.* of borough, about 8,000.

IRVINE, a river of Scotland, in Ayrshire, which falls into the Firth of Clyde at Irvine.

IRVING, Rev. Edward, *ir'-ving*, a minister of the Scottish church, and founder of the sect called Irvingites. After finishing his education at the university of Edinburgh, where he took the degree of M.A., he is said to have led the life, for a short period, of a strolling player. In 1811 he became master of the mathematical school of Haddington, and, a year afterwards, was appointed head of the academy at Kirkaldy, where he remained for seven years, being then ordained minister of the Scottish church. After having preached in several churches, he was appointed Dr. Chalmers's assistant at St. John's church, Glasgow, gaining so much reputation for eloquence that he was installed minister of the Scottish church in Hatton Garden. His tall figure, his impressive style of preaching, and his vigorous discourses, caused him to attain great popularity in this church; the most wealthy and accomplished Londoners crowding to his church. Between the years 1823 and 1827, he published several discourses, lectures, and sermons. His church in Hatton Garden having been found too small for his congregation, a new building was erected for him by subscription, in Regent Square, Gray's-Inn Road. This was opened in 1829, and he preached in this place with the same success as formerly. In November, 1830, he was charged with heresy by the presbytery of London, and a course of proceedings, extending over eighteen months, was instituted against him. About this time he introduced into his church what he termed "supernatural inspiration," but which his opponents called "the extravagances of the unknown tongues." In 1823 the London presbytery pronounced him unfitted for his charge, and the trustees of his church declared that "the Rev. Edward Irving had rendered himself unfit to remain a minister of the Caledonian church, Regent Square, and ought to be removed therefrom." On being suspended from his duties, he preached to small congregations in Gray's-Inn Road, and in Newman Street, Oxford Street. In 1833 the presbytery of Annan sentenced him to be deposed from his ministry. His health gave way soon afterwards. B. at Annan, 1792; D. at Glasgow, 1834.

IRVING, Washington, a distinguished American author. His father, a Scotch merchant settled at New York, having died while he was still young, his education, which took place at home, devolved upon his elder brothers, young men of considerable attainments. His health, during youth and early manhood, was exceedingly delicate; and though his studies were retarded by this circumstance, his imagination and perceptive faculties gained by it; for, unable to sit closely to his books, he spent a great deal of his time in wandering about Manhattan Island, observing the picturesque aspects of nature in that place, and listening to the odd traditions of the old Dutch and other settlers. It is to these first impressions of his youth, that so much of the quaint piquancy of his writings is due. His literary career was commenced in 1802, with a number of sketches contributed to the "New York Morning Chronicle," entitled "Letters of Jonathan Oldstyle."

WASHINGTON IRVING.

His health was, however, so frail that he was compelled to travel, with a view to its renovation. He crossed the Atlantic, and visited France, Italy, Switzerland, Holland, and England. On his return to New York, he, together with Mr. Kirke Paulding, commenced a series of humorous and graphic sketches, which were published under the title of "Salmagundi." This work obtained a considerable degree of popularity, but was suddenly stopped at the end of 1807. After this he wrote a number of tales and essays for the magazines and newspapers, and about the same time began to study the law; but although he was admitted to the bar, he never practised as a barrister. In 1809 was published the humorous "History of New York, by Diedrich Knickerbocker," which instantly made Irving one of the most popular American writers. On the breaking out of war between England and the United States, a few years afterwards, he was attached, with the rank of colonel, to the staff of General Tomkins, governor of New York. On the establishment of peace, he went to Liverpool to represent the commercial house of "Irving, Brothers," a firm which subsequently failed; whereupon Washington Irving occupied himself exclusively with literature. After having travelled over England, he commenced his "Sketch-Book," forwarding his manuscript in instalments to New York, where it was published. The very favourable manner in which the London critics spoke of this work induced Irving to seek a publisher for it in England. He was for a long time unsuccessful in this attempt, and having already met with an hospitable reception at Abbotsford, by Sir Walter Scott, he now sought that gentleman's advice. Although Scott could not help him to a publisher, he offered to procure him the post of editor for a periodica then about to be started in Edinburgh. Irving declined this kind proposal. "My whole course of life," he said, "has been desultory, and I am unfitted for ar periodically-recurring task, or any stipulated labour body or mind. I have no command of my talents, su as they are, and have to watch the varyings of my m as I should those of a weathercock. Practice training may bring me more into rule, but at pres I am as useless for regular service as one of my country Indians, or a Don Cossack." He afterw purposed to issue an English edition of his "Sk

Book" at his own risk, but his publisher failed when the first volume only had been produced. The book became so rapidly popular, however, on both sides of the Atlantic, that Mr. Murray resolved to become its English publisher, and henceforth Irving's reputation was made. A second volume of the "Sketch-Book," "Bracebridge Hall," and the "Tales of a Traveller," succeeded, the last work appearing in 1824; the author's residence during the interval of their composition being alternately at London and Paris. In 1826 he set out for Madrid, for the purpose of examining some important documents relative to Columbus, which had just been discovered in a Jesuit college in that city. His researches in the Spanish archives, as well as his explorations of the old cities of Spain, resulted in the publication of several of his most popular books,—the "History of the Life and Voyages of Columbus," the "Voyages and Discoveries of the Companions of Columbus," "The Conquest of Granada," and "Tales of the Alhambra." In 1829 he was appointed secretary of the American legation in London, the Royal Society of Literature awarding him one of its gold medals, and the university of Oxford conferring upon him its honorary degree of LL.D. about the same time. In 1832, "after an absence of seventeen years, he saw again the blue line of his native land," as he has said, and on landing, a most enthusiastic reception awaited him. Leaving New York soon afterwards in company with Mr. Ellsworthy, the Indian commissioner, he travelled in the far west, his knowledge of Indian and prairie life being reproduced in a series of entertaining works, the chief of which were "Tour on the Prairies," "Astoria, or Enterprise beyond the Rocky Mountains," and the "Adventures of Captain Bonneville." These were followed by a variety of sketches supplied to the American periodicals. In 1841 he was nominated minister plenipotentiary to the court of Spain, representing his country with distinguished success at Madrid, till 1846, when he was, at his own wish, recalled. Washington Irving hereupon retired to his beautiful estate on the banks of the Hudson, about 25 miles from New York, which he had purchased a few years before. In this charming retreat he lived, engaged in literary labour, till his death; narrating the rise and progress of Mohammedanism in his lives of "Mahomet" and his "Successors," and the adventures of Oliver Goldsmith, in his biography of that poet and essayist. Besides these, he revised his complete works, and published a collected edition of them. His last productions were "Chronicles of Woolfert's Roost," a series of sketches in the style of the old "Sketch-Book," and the "Life of Washington," the first volume of which was published in 1855; and this, as well as the concluding volumes, was hailed with an enthusiastic reception in America, while in England it became as popular as the previous efforts of its author. B. at New York, 1783; D. at Sunnyside, 1859.

IRWELL, *ir'-wel*, a river of Lancashire, rising near Bacup, and, after a course of 40 miles, falling into the Mersey at Flixton.

ISAAC, *i'-sak*, son of Abraham and Sarah. He was saved by the miraculous interposition of an angel, when his father was about to sacrifice him at the order of God. (*See* ABRAHAM.) If married Rebecca, by whom he had Esau and Jacob, the eldest of these becoming father of the Edomites, and the other, of the Israelites. He lived to the age of 180 years. B. 2053 B.C.; D. 1873 B.C.

ISAAC COMNENUS, a Greek emperor, was proclaimed in 1057, in room of Michael Stratioticus, who was deposed. His reign was marked by valour and prudence, till he meddled with the property of the ecclesiastics, who excited a general discontent against him. He then retired to a monastery, and ceded the crown to Constantine Ducas in 1059. D. 1061.

ISAAC ANGELUS, a Greek emperor, who obtained the crown after putting to death Andronicus Comnenus, in 1185. He was a voluptuous prince, and his brother, Alexius, having gained over his officers, seized the throne, and threw him into prison, where he was deprived of his eyes in 1195. After the death of Alexius, he was released from confinement, and placed again on the throne. B. 1154; D. in 1204.

ISAAC-KARO, *ka'-ro*, a Spanish rabbi, who was forced to quit Spain in consequence of the edict of Ferdinand and Isabella, in 1499, which compelled the Jews to leave that country within four months, or turn Christians. He first went to Portugal, and thence to Jerusalem, where he led a retired life. He wrote a "Commentary on the Pentateuch," printed at Amsterdam, in 1708.

ISABELA, ST., *e'-sa-bai-la*, a town of Brazil, in the province of Mata-Grosso, on the Paraguassu, one of the principal streams of the Paraguay, 130 miles from St. Salvador. It consists of about 3,000 scattered huts, and is the centre of a diamond trade.

ISABELLA OF CASTILE, *is'-a-bel'-la*, queen of Spain, was the daughter of John II., and married, in 1469,

ISABELLA.

Ferdinand V., king of Aragon. The conquest of Grenada, and the discovery of America by Columbus, distinguished their reign. She was a woman of great abilities. B. 1450; D. 1504. (*See* FERDINAND.)

ISABELLA II., queen of Spain, succeeded to the crown in 1833, on the death of her father, Ferdinand VII., in accordance with a decree of the Cortes, made three years previously, by which the salic law, or law excluding females from the throne, was set aside. Her uncle Don Carlos, who would have succeeded to the throne had not the salic law been repealed, refused to take the oath of allegiance, and a civil war broke out in consequence. This was terminated in 1840, the Carlists being totally defeated, and the chiefs of the party expelled the kingdom. She did not attain her majority till the year 1843, her mother having been appointed queen-regent meanwhile; but, in 1840, she was compelled to resign in favour of Espartero, who was nominated regent in her stead. In 1846 the queen married her cousin, Don Francisco de Assis, her younger sister, on the same day, becoming the wife of the Duc de Montpensier, youngest son of the late Louis Philippe, king of France. Her reign has been troubled by several insurrections, Espartero, Narvaez, and General O'Donnell, having in turn been appointed prime minister, according as their particular parties obtained the ascendancy. B. at Madrid, 1830.

ISABELLA OF ARAGON was the daughter of Alphonso, duke of Calabria, the son of Ferdinand, king of Naples. In 1489 she was espoused to John Galeazzo Sforza, then a minor under the guardianship of his uncle, Lewis Sforza, who, on seeing Isabella, fell in love with her. The lovers having been married by proxy only, Lewis contrived by divers means to keep them asunder, and declared his passion to Isabella, who repulsed him, and exhorted her husband to shake off his uncle's yoke. Lewis soon

afterwards married Alphonsina, daughter to the duke of Ferrara, a woman of an ambitious and intriguing spirit, and, by their contrivance, John Galeazzo was poisoned. Lewis then assumed the sovereignty, and Isabella sought refuge at Naples, which soon after was taken by the French, and she had to lament the loss of all her family. She then retired to a small town in the kingdom of Naples, which had been assigned her for a residence. D. 1524.

ISABELLA, daughter of Philip the Fair, king of France, was married in 1308 to Edward, prince of Wales, afterwards Edward II. She was a woman of licentious manners, and, after various adventures, was imprisoned by her son Edward III., in the castle of Rising, where she died after a confinement of 28 years.

ISABELLA, queen of Hungary, was the sister of Sigismund Augustus, king of Poland, and in 1539 married John Zapolita, king of Hungary. In 1540 she was delivered of a son while her husband was besieging the castle of Fogarras, and he was so delighted at the news, that he gave a splendid feast to his troops, and died of intemperance on the occasion. Isabella, unable to cope with the forces of Ferdinand of Austria, with whom her husband had engaged in war, called to her aid Solyman, sultan of the Turks, who treacherously seized the capital of her dominions, and obliged her to retire to Transylvania, which country she was afterwards forced to yield to Ferdinand. She was then obliged to retreat to Cassovia, and on the road wrote these Latin words on a tree,—*Sic fata volunt*,—'so fate decrees.' In 1556 she recovered Transylvania; but, when her son came of age, she refused him a share in the government. D. 1561.

ISÆUS, *i-se'-us*, a Greek orator of Chalcis, who went to Athens and became the master of Demosthenes, who imitated his style in preference to that of Isocrates. Sir William Jones translated his ten orations in 1780, the remainder of his sixty-four great speeches having been lost.

ISÆUS, another Greek orator, who went to Rome about 97. Pliny the younger states him to have been a great master of eloquence and rhetoric.

ISAIAH, *i-si'-a*, the principal of the four great prophets, was the son of Amoz, and nephew of Amaziah, king of Judah. He prophesied in the reigns of Ozias, Jotham, Ahaz, and Hezekiah, from 735 to 681 B.C., in which last year Manasseh, according to the apocryphal book "The Ascension of Isaiah," is said to have caused him to be cut in two with a wooden saw. He is called the evangelical prophet, from the clear and constant view he has taken of the Messiah throughout his predictions, which are composed in a style beautiful and sublime.

ISAR, *e'-sar*, a river of Germany, rising in the Tyrol 6 miles from Innspruck, and, after a course of 190 miles, entering the Danube a little below Deggendorf. This is the river alluded to in Campbell's poem "Hohenlinden," where he says—

> "And dark as winter was the flow
> Of Isar rolling rapidly."

ISAURE, Clemence, *e'-sor*, a rich and noble lady of Toulouse, who instituted, about the year 1490, the "Jeux Floraux" of Toulouse, and left to the city a considerable sum to defray the expenses of this concourse of poetry. Victor Hugo gained one of its prizes at the outset of his poetical career. (*See* HUGO.)

ISCHIA, *ees'-ke-a*, an island in the Gulf of Naples, 6 miles from the coast, and 17 from Naples. *Area*, 25 square miles. *Gen. Desc.* Vines and olives are raised in abundance; also silk. Here are likewise some good pastures. The principal mineral production is sulphur. *Manf.* Straw hats, baskets, and earthenware. *Pop.* 24,000.—In 1807, Ischia was taken by a British and Sicilian force.

ISCHIA, the capital of the above island, stands on its E. coast, and faces the Bay of Naples. It is defended by a citadel, built on a rock of lava. *Pop.* 3,500, engaged in fishing and vine-dressing.

ISCHIM, *ees'-keem*, a town of Siberia, the capital of a circle of the same name, situate on the Ischim, which falls into the Irtisch. *Pop.* 1,000.—The CIRCLE lies in the S. of the government, and consists of extensive steppes, upon which vast herds of cattle are reared. It has also numerous lakes. *Pop.* 130,000.

ISDEGERDES, *is-de-ger'-dees*, king of Persia, succeeded his uncle Sapor, and was debauched, cruel, and avaricious. He made war on the Eastern emperors, who refused to pay him tribute, obliged Theodosius the younger to make peace, and persecuted the Christians with severity. D. 420.

ISEO, or SABINO, *e'-sai-o*, a town and parish of Austrian Italy, in the province of Brescia, lying in a mountainous district, on the S.E. extremity of the Lake Iseo. *Manf.* Hosiery and hats. It has, besides, several silk-mills and tanneries. *Pop.* 2,300.—The LAKE is 14 miles long, by 2 broad, and is nothing more than an expansion of the river Oglio.

ISER, or GISERA, *e'-ser*, a river of Austria, rising in the N. of Bohemia, and, after a course of 60 miles, falling into the Elbe at Alt Bunzlau. Among its pebbles, fine chalcedonics are frequently found.

ISÈRE, *e'-sair*, a river of Europe, which rises in the Sardinian dominions, on the W. side of Mount Iseran, and, after a course of about 190 miles, joins the Rhone, 5 miles above Valence.

ISÈRE, a department in the S.E. of France, forming the N.W. part of the old province of Dauphiné, and bounded by Savoy, and the French departments of the Upper Alps, the Drôme, and the Rhone. It takes its name from the above river. *Area*, 3,185 square miles. *Desc.* Mountainous, especially in the S.E., where it is covered with ramifications of the Alps. It has numerous summits nearly 7,000 feet high, and one, Le Grand Pevona, 13,158. The valleys between the ranges are extremely fertile. *Pro.* All the cereal and leguminous crops, with maize and potatoes in abundance. The produce of the vineyards is also abundant, and the mulberry is largely cultivated. *Minerals.* Iron, copper, lead, a little gold and silver, coal, marble, slate, granite, and porphyry. *Manf.* Coarse woollens, sail-cloth, linen, gloves, tanned leather, and chemicals. *Pop.* 600,000. *Lat.* between 44° 41′ and 45° 52′ N. *Lon.* between 4° 45′ and 6° 25′ E.

ISERLOHN, *e'-ser-lone*, a town of Prussian Westphalia, 15 miles from Arnsberg. It is walled, and has several churches and chapels, a court-house, Latin school, poorhouse, and an hospital. *Manf.* Woollen and linen goods, ribbons, leather, cutlery, and articles of *vertu* in brass, bronze, and iron. *Pop.* 11,000.—Near this place is an iron cross, erected to commemorate the deliverance of Germany from the dominion of Napoleon I.—The CIRCLE of Iserlohn has an area of 96 geographical square miles, and a population of 37,000.

ISERNIA, *e-sair'-ne-a*, a town of Naples, in the province of Sannio, at the foot of the Apennines, 30 miles from Capua. Part of the town was destroyed by an earthquake in 1805, but it has still many remains of antiquity of considerable interest. *Manf.* Hydraulic machinery and blotting-paper. *Pop.* about 6,000.—The DISTRICT in which this town stands, has a population of 92,000.

ISET, *e'-set*, a river of Asiatic Russia, issuing from a small lake on the E. side of the Ural Mountains, and after a course of nearly 300 miles, joining the Tobol, in the government of Tobolsk.

ISGHEM, *is'-gem*, a village and parish of Belgium, in W. Flanders, 18 miles from Bruges. *Manf.* Linens, cottons, silks, threads, and soap: there are also several tan-yards and breweries. *Pop.* 9,000.

ISHIM, *e'-sheem*, a river of Asiatic Russia, rising in a mountainous district in *lat.* 51° N., and *lon.* 74° E., and after a tortuous course of 900 miles, joining the Irtish, near the town of Ishim.

ISHMAEL, *ish'-ma-el*, son of Abraham, by Hagar, who, on the birth of Isaac, son of Sarah, was sent forth from his father's house with his mother. After dwelling in the desert for a long time, he became a great hunter and mighty warrior. The Arabs regard Ishmael as the father of their nation, and the author of their language. He lived 137 years.

ISHMAEL I., founder of the dynasty of the Sophis of Persia, was a descendant of Ali, son-in-law of Mohammed, and began his reign in 1505. He gained many victories, and established the Persian throne upon a solid basis. D. 1523.

ISHMALI II., *ish'-ma-le*, succeeded Thamas on the throne of Persia, in 1575. He was a sanguinary prince, and murdered eight of his brothers. He was

poisoned, in 1579, by his sister, out of zeal for the Turkish religion, Ishmali being of a sect held heretical by the other Mohammedans.

Isia, *ĭ'-i-a*, certain festivals instituted by the Romans, and observed in honour of Isis. On these occasions it was usual to carry vessels full of wheat and barley, as the goddess was supposed to be the first who taught mankind the use of corn. On these rites degenerating into licentiousness, they were abolished by a decree of the senate.

Isia, a river of Scotland, in Forfarshire, joining the Tay at Kinclaven. It is noted for a fall of 70 or 80 perpendicular feet.—Also a river in the county of Banff, falling into the Deveron.

Isidore, St., *ĭ'-se-dor*, bishop of Seville, a celebrated Spanish bishop, one of the most learned men of his time. He wrote a number of books on biblical and classical subjects, and some commentaries on the Old and New Testaments. D. at Carthagena, 566; D. 636.

Isidore, St., surnamed of Pelusium, from his retiring to a cell near that place. He was the disciple of St. Chrysostom, and, when young, embraced the monastic life. He wrote letters, and other pieces, some of which are extant. D. about 440.

Isidorus of Charax, *ĭs'-i-dor'-us*, a Greek historian and geographer. He wrote a "Description of the Parthian Empire." He is said to have lived during the reign of Ptolemy Lagus, three centuries before the Christian era.

Isili, *e-se'-le*, a town of the island of Sardinia, and the capital of a province 35 miles from Cagliari. *Manf.* Woollen table- and bed-covers. *Pop.* 2,200.—The Province is covered with mountains, and has an area of 556 geographical square miles, and a population of 47,000.

Isingrinius, Michael, *ĭ'-sin-grin'-i-us*, a celebrated printer of Bâle, in the 16th century, who printed in Greek the works of Aristotle, with paper and types superior to those of Aldus Manutius. He published, also, with the same elegance and correctness, "The History of Plants," by Fuchs.

Isis, *ĭ'-sis*, a name given to the river Thames.

Isis, one of the principal deities of the Egyptians, daughter of Saturn and Rhea, according to Diodorus of Sicily. Some suppose her to be the same as Io, who was changed into a cow by her lover Jupiter, and restored to her human form in Egypt, where she taught agriculture, and received divine honours after death. Isis was the Venus of Cyprus, the Minerva of Athens, the Cybele of the Phrygians, the Ceres of Eleusis, the Proserpine of Sicily, the Diana of Crete, the Bellona of the Romans, &c. The Egyptians believed that the inundations of the Nile proceeded from the tears which Isis shed for the loss of Osiris, her husband, whom Typhon had murdered. The worship of Isis was universal in Egypt; Cleopatra, the beautiful queen of Egypt, was wont to dress herself like this goddess, and affected to be considered a second Isis.

Iskelib, *ĭs'-ke-lib*, a town of Asiatic Turkey, 106 miles from Angora. It has several mosques, and sepulchral caverns ornamented with sculptures. *Pop.* 9,000.

Iskenderoon. (*See* Alexandretta.)

Islamabad, *is-la-ma-bad'*, a town of Cashmeer, 35 miles from Serinagur. It has no public buildings of importance, and is crowded with beggars and unemployed artisans. *Manf.* Principally shawls, which are sent into Hindostan. *Pop.* From 20,000 to 25,000. *Lat.* 33° 43′ N. *Lon.* 75° 5′ E.

Islamabad. (*See* Chittagong.)

Islamism, *ĭs'-lam-ism*, one of the names given to the religion of Mahomet. It is derived from *islam*, Arabic for 'submission to God.' (*See* Mahometanism.)

Islands, Bay of, a large bay of British America. *Ext.* 18 miles long from N. to S., and about the same wide. It incloses a large number of small islands. *Lat.* 49° 20′ N. *Lon.* 58° 15′ W.

Islay, Ilay, or Ila, one of the Hebrides, or western islands of Scotland, to the south-west of Jura, and belonging to the county of Argyle. *Ext.* 25 miles long, and 2½ broad. *Area*, 154,000 acres. *Desc.* About one-seventh of the island may be stated to be in cultivation; two-sevenths are rugged mountains, rocks, or hills; three-sevenths hill pasture, coppice-wood plantations, and natural grassings, impervious to the plough; and one-seventh moors, peat mosses, and unreclaimed wastes. Agriculture, however, is now carried on with great energy, and after the most improved mode. *Pro.* Barley, oats, pease, and flax. *Manf.* Whiskey is the staple, of which about 250,000 gallons are annually distilled, and chiefly exported to Glasgow. *Pop.* 15,300.—This island was formerly the principal residence of the Lords of the Isles, whose power is still attested by the ruins of numerous forts, castles, and chapels, scattered over the county.

Isle, *eel*, a river of France, rising in the department of Upper Vienne, and, after a course of 160 miles, joining the Dordogne, at Sibourne.

Isle-de-France, an ancient province of France, now included in the departments Oise, Seine, Seine-et-Oise, Seine-et-Marne, and Aisne.

Isle-Dieu, *de-e(r)*, an island of France, lying about 15 miles to the W. of the coast of Vendée. It is defended by a fort and several batteries. *Pop.* 2,500.

Isle of France. (*See* Mauritius.)

Isle of Wight. (*See* Wight.)

Isle Royal, an island on the N.W. side of Lake Superior, N. America. *Ext.* About 35 miles long, and in many places about 10 broad.

Isleworth, *ĭ'-sel-werth*, a village and parish in the county of Middlesex, 8 miles from London, pleasantly situate on the banks of the Thames, opposite Richmond. It is a busy village, and contains many good houses, inhabited by genteel families. *Pop.* 6,614.

Islington, *is'-ling-ton*, anciently called Iseldone, a village and parish in the county of Middlesex, and neighbourhood of London, now forming one of its suburbs. It is chiefly composed of the dwellings of retired citizens, and other persons connected with the capital; but the remains of its antiquity are fast being replaced with modern buildings, which are rising in the form of long streets and broad squares, rivalling, in some degree, the most magnificent parts of the great metropolis. The neighbourhood abounds with pleasing walks, the fields being intersected by the meanders of the New River. *Pop.* about 60,000.

Isluga, *ees-loo'-ga*, a town and volcano in the S. of Peru. The town has an elevation of about 13,000 feet above the level of the sea, and the volcano, which is distant about 4 miles from the town, about 18,000. *Lat.* 19° 12′ S. *Lon.* 68° 50′ W.

Ismaelites, *ĭs'-ma-lites*, the name of a Mussulman sect, whose origin was a schism among the followers of Mahomet, in the 2nd century of the Mussulman, or the 8th of the Christian era. From this sect sprung the Karmathi, who ravaged Persia and Syria in the 8th century, and the "Assassins," who for nearly two hundred years (1090—1260) spread terror throughout the East. The Nasairis, Wahabites, and Druses, at the present time dwelling in Syria, are said to be derived from this sect.

Ismail, or Ismailov, *ĭs'-ma-eel*, a strong town of Russia, in the province of Bessarabia, on the north side of the principal arm of the Danube, 120 miles from Odessa. It is surrounded by a moat and earthen rampart, and forms an important military station near the Turkish frontier. It carries on a considerable trade in the products of Moldavia, and the Armenians settled here have thriving manufactures of leather and shagreen. *Pop.* 22,000. This place was long in the possession of the Turks; it was stormed by the Russians, under Suwarrow, in 1790, and was given up for three days to the pillage and massacre of his barbarians. From this severity it has never completely recovered.

Ismenias, *is-me'-ne-as*, a Theban general, who was sent on an embassy to the king of Persia. No person being admitted to the royal presence without prostration, Ismenias was resolved not to commit an action so degrading to his country. At his introduction, he dropped his ring on the ground, and the act of taking it up was mistaken for submissive homage, in consequence of which he was favourably received.—A Theban musician, who being taken prisoner by the Scythians, and playing before their king, he observed that he liked the music of Ismenias better than the braying of an ass.

Isnik, *ĭs'-nik*, a town of Asiatic Turkey, 65 miles

from Constantinople. It was the capital of Bithynia, and was, in 325 and 787, the seat of two celebrated councils. It is now a mere village. The LAKE of the same name is about 20 miles long, and 6 broad.

ISOCRATES, *i-sok'-ra-tees*, a celebrated Greek orator, who, although master of a sweet and graceful style, was prevented by a certain weakness of speech from speaking in public. It was as a teacher of oratory that his reputation was due. His orations, twenty-one of which are extant, were intrusted to others for delivery. The defeat of the Athenians at Cheronæa, by Philip of Macedon, so affected his spirits that he refused to partake of food, and died after four days of fasting. B. at Athens, 436 B.C.; D. 338 B.C.

ISOLA, *e-so'-la*, a town of Austrian Illyria, 7 miles from Capo d'Istria. *Pop.* 3,500. This is also the name of several small places in the Sardinian states.

ISOLA-DEL-GIGLIO, *dail geel'-ye-o*, an island of Tuscany, in the Mediterranean, 18 miles from Orbitello. *Area*, 8 square miles. *Lat.* 42° 20′ N. *Lon.* 10° 50′ E. The TOWN of the same name is situate on the S. side of the island. *Pop.* 2,000.

ISOLA GROSSA, *grose'-sa*, or SUNGA, an island of Austria, in the Adriatic, on the coast of Dalmatia, 12 miles from Zara. *Ext.* 24 miles long, and 2 broad. *Desc.* Generally fertile, and producing grapes, figs, and olives. Fish abound in the neighbouring seas; fresh water in the island, however, is scarce. *Pop.* 12,000.

ISPAHAN, ISFAHAN, or SPAHAWN, *is-pa-han'*, formerly the capital of Persia, and long celebrated as one of the most splendid cities of the East, is 210 miles from Teheran. According to Chardin, it was 24 miles in circuit, and contained 172 mosques, 48 colleges, 1,800 caravanseras, and 273 public baths. The most splendid edifice was the palace built by Shah Abbas. The walls and buildings of the palace still remain nearly entire; but it has been stripped of all its costly furniture, and everything valuable which could be removed. The Maidan Shah, as a square, seems equally distinguished; it is one-third of a mile in length, and about half that breadth. It was formerly encircled by a canal, bordered by very fine plane-trees; but all vestiges of both are now obliterated. The finest shops of the town are here. There are some splendid buildings, particularly mosques, in the whole circuit of it; but the palace, forming one of the sides, is its chief ornament. Another remarkable object is the Chahar Bang, 'four gardens,' a name given to an avenue of more than a mile, reaching from the Maidan to the mountains east of Ispahan. It is composed of four rows of very large and beautiful plane-trees. Here is the mosque of Sultan Hussein, now converted into a madressa, or college. The Madressa Jedda is another college, remarkable for the beauty of its construction. There are several handsome bridges in Ispahan, and some of the mosques also display great magnificence. The principal one is of vast extent, built of stone, with a lining of marble, the cupolas ornamented with gold, and the gates with silver. The streets are narrow, winding, and irregular; and, being quite unpaved, the wind, when it is high, raises such clouds of dust that the sun cannot be seen. *Manf.* These are still very extensive. In gold brocade this city is unrivalled: it is also the greatest emporium of inland commerce in the Persian empire, being the chief medium of communication with India and Cabul on one side and Turkey on the other. The bazars still show great activity in the people; and all kinds of woven fabrics, from the coarsest nankin and calico to the richest velvet and satin, are made. Gold and silver trinkets, paper and paper boxes, guns, pistols, sword-blades, glass, and earthenware, also give occupation to a number of the inhabitants. *Pop.* Variously estimated; perhaps from 100,000 to 150,000. *Lat.* 32° 39′ 34″ N. *Lon.* 51° 44′ 45″ E. Ispahan was taken by Timor in 1387, who gave it up to indiscriminate massacre. It revived from this calamity; and at length Shah Abbas, the ablest and most fortunate prince of this dynasty, fixed at Ispahan the seat of his dominion, and spared no cost in embellishing it with the most splendid edifices. In 1722 it was taken by the Affghans, and many of its most superb edifices entirely destroyed. In 1727 it was retaken by Nadir Shah, but no pains were taken by that conqueror to restore it to its former prosperity. Since that time Ispahan has never been a royal residence, and it has fallen gradually more and more into decay, and presents only the wreck of what it formerly was. A person may now ride for miles amid its ruins.

ISRAEL, *is'-rai-el*, from a Hebrew word signifying 'the strong,' 'the struggler,' the name given, according to the Bible, to Jacob after his struggle with an angel: hence his descendants have been called Israelites.

ISRAEL, kingdom of, one of the two kingdoms into which, on the death of Solomon, Judæa was divided. It was opposed to the kingdom of Judah. The kingdom of Israel was composed of the following tribes:—Asher, Naphtali, Zabulon, Issachar, Manasseh, Ephraim, Dan, Simeon, Gad, Reuben, or, in other words, it comprised Galilee, Samaria, and the greater portion of the kingdom of Judæa properly so called; it was consequently very much larger than the kingdom of Judah, its rival. Its capital was Sichem, and afterwards Samaria. The kingdom of Israel lasted about 250 years, and never ceased to be at war with the kingdom of Judah, and the kings of Syria and of Assyria. It was destroyed by Salmanasar in 718.

ISRAELITES. (*See* JEWS.)

ISSNY, *is'-nee*, a town of Wurtemberg, in the circle of the Danube, 50 miles from Ulm. It is walled, and has a castle, various schools, and two hospitals. *Manf.* Glass, thimbles, and needles. *Pop.* 2,200. This was once an imperial free town.

ISSOIRE, *is'-swaver*, a town of France, in the department of the Puy de Dôme, 20 miles from Claremont. It has some fortifications, numerous oil-mills, and a trade in nut-oil and cattle. *Pop.* 5,500.

ISSOUDUN, *is'-soo-du(r)*, a walled town of France, in the department of the Indre, here crossed by three bridges, 17 miles from Châteauroux. *Manf.* Stockings, hats, and leather, and a saltpetre-work. *Pop.* 10,000.—This place, in 1651, was partly consumed by fire; but it has since been rebuilt with wider and more regular streets.

ISSUS, *is'-sus*, a town of Cilicia, on the confines of Syria, famous for a battle fought there between Alexander the Great and the Persians, under Darius their king, in October, 333 B.C. In this battle the Persians lost 100,000 foot and 10,000 horse, and the Macedonians only 300 foot and 150 horse, according to Diodorus Siculus. The Persian army, according to Justin, consisted of 400,000 foot and 100,000 horse; and 61,000 of the former, and 10,000 of the latter, were left dead on the spot, and 40,000 were taken prisoners. The loss of the Macedonians, as he further adds, was no more than 130 foot and 150 horse. According to Curtius, the Persians slain amounted to 100,000 foot and 10,000 horse, and those of Alexander to 32 foot and 150 horse killed, and 504 wounded. This spot is likewise famous for the defeat of Niger by Severus, 194 A.D.

ISSY, *is'-se*, a town of France, in the department of the Seine, 3 miles from Paris. *Manf.* Chemicals, lime, whiting, and bricks. *Pop.* 2,100.—Here Cardinal Fleury died, in 1743; and here Fenelon was examined by a conclave of bishops, when he was suspected of heresy.

ISTALIF, *is-ta-lif'*, a town of Afghanistan, at the base of the Hindoo-Coosh. *Manf.* Cotton fabrics, and dyeing is carried on. *Pop.* 15,000. *Lat.* 34° 46 N. *Lon.* 68° 58′ E.

ISTAMBOUL, or STAMBOUL, *e-stam-bool'*, the Turkish name of the capital of the Ottoman empire. (*See* CONSTANTINOPLE.)

ISTHMIA, *isth'-me-a*, sacred games among the Greeks, instituted B.C. 1326. They received their name from the Isthmus of Corinth, where they were observed. They were celebrated in commemoration of Melicertes, who was changed into a sea-deity, when his mother Ino had thrown herself into the sea with him. They were for some time interrupted; but Theseus afterwards reinstated them in honour of Neptune, whom he asserted to be his father. These games were observed every fifth year. Combats of every kind were exhibited, the victors being rewarded with garlands of pine-leaves. Some time after, the victor received a crown of withered parsley. The years were reckoned by the celebration of these games. They were abolished under the reign of Adrian, B.C. 130.

ISTHMUS, *isth'-mus*, a department of New Grenada, comprising the provinces of Panama and Veragna, and uniting South and Central America. *Area*, 25,000

square miles. *Desc.* Hot and fertile, and covered with dense forests. *Pop.* about 100,000.

ISTIB, *is-tib'*, a town of European Turkey, 60 miles from Ghiustendil. *Pop.* 8,000.

ISTRES, *istr*, a town of France, in the department of the Mouths of the Rhone, 18 miles from Arles. It is surrounded by decayed ramparts, overlooked by the ruins of an old castle. *Manf.* Chemicals and soda. *Pop.* about 3,000.

ISTRIA, *ecst'-re-a*, a peninsula of the Austrian empire, in Illyria, formed by the gulfs of Trieste and Fiume, which indent the land from the Adriatic, and bounded on the N. by Carniola. It was formerly divided into Venetian and Austrian; but, at the peace of Campo Formio, the whole was given to Austria; and though it was afterwards, during some years, in the hands of Bonaparte, it was restored to Austria in 1814, and now forms the southern division of Austrian Illyria. *Area*, 1,375 geographical square miles. *Desc.* Mountainous, especially in the N., where it is traversed by branches of the Alps. *Pro.* Wine, olives; and the mulberry is extensively cultivated. There are also large forests, which yield excellent timber. *Pop.* 212,000.

ISTWITH, *ist'-with*, a river of Wales, in Cardiganshire, falling into the Irish Sea.

ITALY, *it'-a-le*, a peninsula in the south of Europe, marked, in its general boundaries, on the N. by Germany and Switzerland, W. by France and the Tuscan or Tyrrhenian Sea, S. by the Ionian Sea, and E. by the Adriatic and the Austrian province of Carniola. It consists partly of islands and partly of mainland. *Ext.* Measured nearly through the centre of the peninsula, in a N.W. direction, it is about 580 miles long, with a breadth of 310 at its widest part, but diminishing as it extends southward. In the centre it is only 150 miles broad, and at its narrowest point it does not exceed 15. *Coast line.* Estimated at 2,000 miles, and much indented. *Gulfs, Bays, and Straits.* Gaeta, Genoa, Naples, Salerno, Policastro, Taranto, and Manfredonia in the Adriatic. The straits are those of Messina, also called Bonifacio, and Faro. *Capes.* Campanella, Spartivento, Di Leuca, Passaro, Corso, and Carbonara. *General Divisions.* The mainland is, and has long been, divided by geographers into three great parts,—the northern, the central, and the southern. The first comprises Piedmont and the continental dominions of the king of Sardinia, the Austrian possessions in Italy, called the Lombardo-Venetian kingdom, and the duchies of Parma and Modena. Central Italy, less extensive, consists of the Papal States, and the small districts of Lucca, Massa di Carrara, and San Marino; while southern Italy consists exclusively of the kingdom of Naples. *Islands.* The principal islands connected with Italy are Sicily, Sardinia, Elba, Corsica, Malta, and the Lipari and Egades groups. Sicily and Sardinia were anciently called the granaries of Rome. Corsica belongs to France, and Malta to England, and is the principal station of the British navy in the Mediterranean. *Political Divisions.* These are exhibited, with their areas and populations, in the following table:—

| | *Area, in sq. miles.* | *Population.* |
|---|---|---|
| Austrian Italy, or Lombardo-Venetian Kingdom (1846) .. | 18,063 | 5,000,000 |
| Kingdom of Sardinia, exclusive of Savoy, which in 1860 was annexed to France (1848)..... | 24,920 | 4,500,000 |
| Kingdom of Naples, including Sicily (1845) ..... | 42,131 | 8,500,000 |
| Papal States (1843)..... | 17,210 | 3,500,000 |
| Grand Duchy of Tuscany, inclusive of Lucca (1846)..... | 9,177 | 1,600,000 |
| Duchy of Parma (1850) ..... | 2,268 | 500,000 |
| Duchy of Modena..... | 2,092 | 586,500 |
| Republic of San Marino ..... | 21 | 8,000 |
| Principality of Manaco ..... | 53 | 6,800 |
| | 115,935 | 23,701,300 |

**As the above divisions are, or will be, specially described in this work, it supersedes the necessity of saying more of them here. For the population of Italy,**

taken in 1858, see the end of this article. *Desc.* Remarkably beautiful and diversified. The mountains, consisting of the Alps and Apennines, present every variety of form and elevation, of rugged rocks and precipices, thick and extensive forests, waterfalls, and all the component parts of picturesque scenery. The valleys are delightful beyond description; and even the plains are enlivened more than in most other countries by gentle elevations, rivers, and woods. All this is heightened by the clearness of the atmosphere, which imparts to every object a peculiar brightness of colouring and distinctness of outline. *Mountains.* In the north and north-west the Alps lift their heads unto the skies, culminating in Mount Viso, in the Cottian range, 12,583 feet high. In the Graian, Mount Cenis attains an elevation of 11,500; and in the Pennine, Mont Blanc and Mont Rosa rise respectively to 15,777 and 15,206 feet. The Apennines unite with the Alps, running N. and S., and in Monte Como culminate at a height of 9,500 feet above the level of the sea. *Volcanoes.* These, in this classic land, are very striking. The principal are Mount Vesuvius, near Naples; Mount Etna, in Sicily; and several in the Lipari Islands. *Plains.* Lombardy, between the Alps and the Apennines, one of the largest and finest in Europe. *Rivers.* The Po, which receives as tributaries the Parrita, the Maira, the Grana, the Felicia, the Sagona, the Belba, the Bormida, the Tanaro, the Doira, the Ticino, the Adda, the Oglio, the Mincio, the Trebia, the Parma, and the Panaro. The other rivers of the north, or rather north-west of Italy, are the Adige, the Brenta, the Piave, and the Tagliamento, all flowing southward from the Alps. In the centre or south of Italy, the Tiber is the principal. There are also the Rubicon and the Arno in Tuscany. In Naples, the principal are the Vulturno, the Garigliano, anciently the Liris, and the Ofanto, formerly the Aufidus, which flows past Cannæ. *Lakes.* Garda, and the Lago Maggiore, or Lake of Locarno. After these come the lakes of Lugano, Como, Lecco, and Iseo; the lakes of Perugia (anciently Thrasymene), Bolsena, Castel Gondolfo, Bracciano, Celano, Varano, and Averno. Many of these lakes are remarkable for the variety of their scenery. That round Maggiore is the most beautiful, that round Como the most sublime. *Climate.* Delightful. The air is mild and genial almost throughout, the excessive heats of summer being moderated by the influence of the mountains and surrounding sea, and the cold of winter being hardly ever extreme. Many districts, however, are unhealthy in the summer and autumn months, owing to the malaria, an intermitting fever of the worst kind, which is peculiar to Italy. The cause of this evil has been ascribed to the pestilential air of the stagnant marshes.

"There are bright scenes beneath Italian skies,
Where glowing suns their purest light diffuse;
Uncultured flowers in wild profusion rise,
And Nature lavishes her warmest hues;
But trust thou not her smile, her balmy breath.—
Away! her charms are but the pomp of Death!"

*Forests.* Not extensive. *Zoology.* The mountains and forests contain a number of wild animals; among others the boar, the stag, the marmot, the badger, the chamois, and the wild goat. The lynx or tiger-cat is found in the mountains of Abruzzo, and the crested porcupine and the tarantula in the south of Italy. Hares, foxes, and the kinds of wild fowl that come under the name of game, are sufficiently abundant. The nautilus, which perhaps suggested to man his first idea of navigating the seas by means of sails, is found along the shores of Italy. Coral is also found in some parts. *Pro.* Grapes, olives, and other fruits of great variety, and of the most delicious quality; also corn, though not in great abundance; pulse, rice, maize, and other vegetables; cotton, and still more, silk. As meadows and pastures are extensive, especially in the plains of the Po, vast herds of cows are reared, from whose milk a peculiar kind of cheese is made, and which other countries have not yet succeeded in imitating. This forms an important article of export to every quarter of the globe. *Minerals.* In the north, towards the German frontier, as well as in the Venetian and Genoese territory, and in Tuscany, there are quarries of beautiful marble, and caverns of stalactites are met

with in many parts. In the Apennines are found alabaster, jasper, agate, rock-crystal, chalcedony, lapis-lazuli, crysolite, with other valuable stones. These mountains abound in basalt, dried lava, sulphur, *pozzolana* sand, and similar volcanic matter. The other mineral productions are alum, copper, and iron. Mineral springs, both cold and hot, are found in various parts of Italy. *Manf.* Silk is the staple, and after it come linen and woollen. Wine and strong spirits are also made in quantities. The articles for commercial exchanges are very limited, and consist less of manufactures than of rude produce. With the Levant the intercourse is still considerable. *Imp.* These are from France, England, Switzerland, and Germany. From England they consist of coffee, sugar, and other colonial produce; muslins, linens, calicoes, woollens, hardware, and dye-stuffs; also fish, dried and salted, for diet on the numerous days of abstinence from butcher-meat enjoined by the Catholic creed. Commerce is active; but business is much impeded by the high tariffs in many of the states, and by the lines of custom-houses. The mercantile marine of Italy is more numerous, in proportion to the extent of the country, than that of any other nation in Europe, England excepted. *Rel.* The established religion is the Roman Catholic; but all other sects are tolerated. Italy alone has very nearly one-half as many bishoprics as there are in the whole of Europe—256 out of 535. The regular and secular clergy of both sexes count in Italy 189,000; and they are, as compared with the number of the population, as 1 to 112. The clergy are more numerous in Sicily than in any other part of Italy, or perhaps in the world; the number of priests, monks, or nuns being 33,266, or 1 out of 69 inhabitants. *Journalism.* There are nearly 300 journals published in Italy, of which number 117 are in the Sardinian states, although they contain only one-fifth of the total population. With great intelligence, the Italians are passionately fond of music; and nothing is more common than to hear the finest airs of Metastasio sung in the streets with correctness and harmony. *Pop.* 27,107,047. Italy is one of the countries in which the largest cities and towns are to be found, 19 of them having more than 50,000 inhabitants, and 8—Rome, Naples, Palermo, Venice, Florence, Milan, Genoa, and Turin—exceed 100,000. *Lat.* between 37° and 47° N. *Lon.* between 6° 21′ and 13° 40′ E. This is the Italia of the ancients, and received its name from Italus, a king of the country, who came from Arcadia; or from *italos*, a Greek word which signifies 'an ox,' an animal very common in that part of Europe. It has been called the garden of Europe. The ancient inhabitants called themselves Aborigines, 'offspring of the soil,' and the country was soon after peopled by colonies from Greece. It was originally divided into as many different governments as there were towns, till the rapid increase of the Roman power changed the face of it. It has been the mother of arts as well as of arms.

ITAMARCA, *e-ta-mar'-ka*, an island of Brazil, in the province of Pernambuco, separated from the mainland by a narrow channel, long known as the river Santa Cruz. *Ext.* 12 miles long, and 3 broad. *Desc.* Fertile, and producing cotton and sugar-cane in considerable quantities. It has also extensive salt-works and some rum-distilleries. The capital is of the same name, and faces the mainland. *Pop.* 8,000.

ITAPARUA, *e'-ta-pa-roo-a*, an island of Brazil, 23 miles from Bahia. *Ext.* 24 miles long, with a breadth of 8 at its widest part. The island abounds with cocoa-trees. *Pop.* Unascertained.

ITAPICURU, *e'-ta-pe-koo-roo*, two rivers of Brazil, the one rising in the mountains of Jacobina, and, after a course of 350 miles, falling into the Atlantic about 100 miles from Bahia; the other rising in the province of Maranhao, and, after a course of 500 miles, falling into the Atlantic, 20 miles from Maranhao.

ITATA, *e-ta'-ta*, a province of Chili, bounded N. by Maule, E. by Chillan, W. by the Pacific Ocean, and S. by Puchacay. *Ext.* About 60 miles long, and 30 broad. *Pop.* Unascertained. The capital is Coulemu, situate in *lat.* 36° 2′ S.

ITATA, a river of the above province, rising on the W. slope of the Chilian Andes, and, after a course of 150 miles, falling into the sea, in *lat.* 36° S.

ITHACA, or THIAKI, *ith'-a-ka*, one of the Ionian Islands, in the Gulf of Patras, between the W. coast of Greece and Cephalonia. *Ext.* 12 miles long, by 4 broad, except in the middle, where it is nearly divided by the Gulf of Molo. *Desc.* It has always been noted for its rugged and barren aspect. *Pro.* Olives, currants, corn, almonds, oranges, honey, and wine. The inhabitants, however, derive the greatest portion of their sustenance from the sea, being mostly fishermen. *Pop.* 10,000. *Lat.* 38° 30′ N. *Lon.* 20° 39′ E.

ITHACA, a post-town in Ulysses, and the capital of Tompkins county, New York, U.S., at the bottom of Cayuga Lake, 180 miles from Albany. It has a court-house, a gaol, a flourishing academy, and a lyceum. *Pop.* 6,000.

ITSHILL. (*See* ADANA.)

ITU, *e'-too*, a town of Brazil, 50 miles from Sao Paulo. The greater number of its houses are constructed of a framework of wood, with the interstices filled up with mud or earth. Its principal buildings are several churches, two convents, an infirmary, and various schools. The soil in the district in which it stands is fertile, and sugar-cane is extensively cultivated. *Pop.* 10,000.

ITUCAMBRIA, *e'-too-kam-bre-a*, a river of Brazil, rising in the Serra de Santo Antonio, and, after a course of 130 miles, falling into the Juquitinhonha. Gold is found in its sands.

ITURUP, or STATEN ISLAND, *it'-u-rup*, one of the largest and most important of the Kurile Islands, in the N. Pacific, where the Japanese have a settlement. *Ext.* 140 miles long, with an average breadth of 20. *Desc.* Fertile, and of volcanic origin. Agriculture was introduced into it by the Japanese; but the natives chiefly live upon the produce of the chase and the fisheries. *Pop.* Unascertained. *Lat.* 44° 29′ N. *Lon.* 146° 34′ E.

ITZEHOE, *it'-sai-ho*, a town of Denmark, in Holstein, on the Stor, 32 miles from Hamburg. It consists of an old and new town, connected by a long bridge. Its principal public buildings are the parish church, an hospital, several other benevolent institutions, a statehouse, in which the provincial assemblies of Holstein are held, and various schools. *Manf.* Cards, candles, tobacco, soap, hats, leather, chicory, and vinegar. *Pop.* 6,000. This is the oldest town in the duchy, and a steamboat plies from it weekly to Hamburg.

IVAN I., Danilovitch, *e'-van*, succeeded Alexander II. in 1328, in the principalities of Vladimir, Moscow, and Novgorod, and reigned during twelve years, with the title of grand-duke of Moscow. He subsequently entered an ecclesiastical order. D. 1340.

IVAN II. reigned between the years 1353-59. He was a mild and wise ruler, and combated with success against the Tartars.

IVAN III., Vasilivitch, reigned from 1462 to 1505. He delivered his country from the Tartars in 1481, brought all the provinces of Russia under his sway, and took possession of Novgorod after a seven years' siege. He introduced the arts of civilization into his dominions. His second wife was Sophia, niece of the last Byzantine emperor. Ivan was the first to adopt the title of czar, having for his arms the double-headed eagle of Constantinople.

IVAN IV., surnamed the Terrible, ascended the throne at the age of 4 years, in 1533. His mother was appointed regent, and sustained, in his name, a great struggle against the nobles of the kingdom. He attained his majority in 1544, and made war against the Poles, the Swedes, and the Tartars, all of whom were in turn vanquished. He committed numberless cruelties upon these peoples, as well as upon his own subjects. He killed with his own hand his eldest son; but his reign was marked by a great advance in civilization. He definitively adopted the title of "czar," and added to it that of "autocrat." D. 1529; D. 1584.

IVAN V., Alexovitch, succeeded to the throne on the death of his brother, Feodor Alexiowitz, in 1682. But being of weak intellect, he was placed in a monastery, and the sceptre given to his brother Peter. The Princess Sophia, hoping to reign in the room of Ivan, excited an insurrection, which ended by the appointment of Ivan and Peter joint sovereigns, and Sophia co-regent. This government lasted six years, when

Sophia having projected the death of Peter, that she might reign alone, the conspiracy was discovered, and the princess confined in a convent. From that time Peter reigned sole monarch. B. 1661; D. 1696.

IVAN VI., of Brunswick-Bevern, was declared czar when but three months old, after the death of his great-aunt, Anne Iwanovna, in 1740. Anne left him to the guardianship of the duke de Biren, who being deposed shortly after, the regency was transferred to the empe-ror's mother. In 1741 he was dethroned and confined in a fortress, whence he was carried away by a monk; but was retaken and placed in a monastery. B. 1740; murdered in prison, 1764.

IVAN, the name of several places in Hungary, none of them with a population above 3,000.

IVES, John, *ives*, an English antiquary. He became Suffolk-herald extraordinary, and fellow of the Royal and Antiquarian societies. He published, in addition to works on heraldry and antiquities, "Remarks on the Gariaunonum of the Romans, the Site and Remains fixed and described," in 1774. B. at Yarmouth, 1716; D. 1776.

IVES, ST., a borough and market-town of Cornwall, on the Bay of St. Ives, 18 miles from Falmouth. It consists chiefly of one long street, branching off at the south into two smaller ones. The buildings in general are mean. The church is a low but spacious building, and there are Independent and Methodist meeting-houses, which have Sunday schools for poor children. The pilchard-fishery is carried on in the bay to a great extent. To protect the port from the north-west winds, a breakwater stretches across the bay. *Pop.* 6,000.

IVES, ST., a market-town of Huntingdon, on the Ouse, over which is a handsome stone bridge, 5 miles from Huntingdon. The markets for cattle and sheep, held in this town, are among the largest in the kingdom. *Pop.* 3,600.

IVETAUX, Nicholas Vauquelin, Seigneur de, *eve'-to*, a French poet. He became preceptor to the duke de Vendôme, son of Gabrielle d'Estrées, and afterwards to Louis XIII. when dauphin; but his life was so irregular, that he was banished from court; on which he took a house in the Faubourg Saint-Germain, where he lived in luxury and debauchery. He wrote "The Institution of a Prince," and a number of stanzas, sonnets, and other poetical pieces. B. at Fresnaye, 1559; D. at Paris, 1649.

IVIÇA, or IBIÇA, or IVIZA, *e-ve'-sa*, an island of the Mediterranean, belonging to Spain, forming the smallest of the three principal islands of the Balcares, 52 miles from Majorca. *Ext.* 25 miles long, and 13 broad at its widest part. *Gen. Desc.* Fertile; producing corn, wine, oil, fruit, flax, and hemp, with little labour. About 15,000 tons of salt are annually got from evapo-ration; and it forms, with fish and wood, the chief articles of export. *Pop.* about 20,000.—The capital is of the same name, and has a good harbour. It stands on a height above the E. shore. *Pop.* 5,000.

IVINGHOE, *i'-ving-ho*, an ancient market-town and parish of Buckinghamshire, 6 miles from Dunstable. *Manf.* Straw-plait and lace. *Pop.* 1,900.

IVORY, James, *i'-vo-re*, an eminent mathematician, was the son of a watchmaker in Dundee, and was sent to the universities of St. Andrew and of Edinburgh, for the purpose of being educated for the Scottish church, but was engaged, in 1786, as teacher in an academy at Dundee, and was subsequently a partner in a flax-spinning factory in Forfarshire. His unwearied pursuit of science, however, enabled him to undertake the duties of professor of mathematics at the Royal Mili-tary College in Buckinghamshire; and when that insti-tution removed to Sandhurst, in Berkshire, he was continued in his post, and remained in it till his retire-ment into private life, in 1819. While professor at Sandhurst, and afterwards, he wrote a great number of very valuable mathematical books, besides con-tributing fifteen papers to the "Transactions of the Royal Society of London." An edition of Euclid; "A New Series for the Rectification of the Cube;" "A New Method of resolving Cubic Equations;" and a host of mathematical and astronomical treatises, were the result of his laborious life. He was fellow of the Royal Societies of London and Edinburgh, a member of the Royal Irish Academy and of the Cambridge Philosophical Society, and corresponding member of the learned societies of Paris, Berlin, and Got-tingen. He enjoyed a pension of £300 per annum, from the year 1831 till his death, and was invested by William IV. with the Hanoverian Guelphic order of knighthood. B. at Dundee, 1765. D. in London, 1842.

IVORY COAST, a portion of the coast of Guinea, in W. Africa, inhabited by a number of small negro tribes, living in a state of independence, except those subject to the Ashantees. *Lat.* between 3° 20′ and 7° 40′ N.

IVREA, *e'-vrai-a*, an old and strong town of Italy, in Piedmont, and the capital of a division of the same name, 32 miles from Turin. It has a cathedral and several churches and convents. *Manf.* Woollens, cottons, leather, candles, carriages, shoes, and vermicelli. *Pop.* 9,000.—The DIVISION has an area of 1,778 square miles, and a population of 250,000. It is situate in the slopes of the Graian and Pennine Alps, producing fruit in abundance, and pasturing large numbers of cattle, sheep, goats, horses, and mules.

IVY BRIDGE, *i'-ve*, a village of Devonshire, 2½ miles from Bideford. It is remarkable for being situate in a neighbourhood in which the scenery is extremely beautiful. *Manf.* Paper. *Pop.* Small.

IXELLES, *eex'-el*, a town and parish of Belgium, 2 miles from Brussels. *Manf.* Linen, and there are distilleries, breweries, and stone-quarries. *Pop.* 7,500.

IXION, *ix-i'-on*, a king of Thessaly, son of Phlegias, married Dia, daughter of Eionius or Deioneus, to whom he promised a present for choosing him as son-in-law. His unwillingness to fulfil this promise led Deioneus to steal away some of his horses. Ixion concealed his resentment, and invited his father-in-law to a feast at Larissa; whereupon he threw him into a pit, which he had previously filled with burning coals. This treachery so irritated the neighbouring princes, that all shunned and despised Ixion. Jupiter, taking compassion upon him, carried him to heaven, and placed him at the tables of the gods. Here he became enamoured of Juno; whereat Jupiter was so dis-pleased that he banished him from heaven; but when he heard that Ixion had the rashness to boast that he had gained the affections of Juno, the god struck him with his thunder, and ordered Mercury to tie him to a wheel in Hades, which continually whirled round. The wheel was perpetually in motion; therefore the punishment of Ixion was eternal.

IXWORTH, *ix'-werth*, a market-town and parish of Suffolk, lying to the N.E. of Bury St. Edmunds. It has an elegant church, with a lofty tower. *Pop.* 1,100.

IZAACKE, Richard, *i'-zăk*, an English antiquary, was educated at Exeter College, Oxford. He afterwards became chamberlain and town-clerk of Exeter, his native city, the history and memorials of which he wrote. This work was continued by his son. D. about 1723.

IZIUM, *e-ze-oom'*, a town of Russia, 70 miles from Khurkoo, surrounded by an earthen rampart and a fosse. It has several churches, and a trade in cattle, corn, and sheep. *Pop.* 7,700.

IZMID, *iz'-mid*, a seaport-town of Asiatic Turkey, 50 miles from Constantinople. It is built on a hill rising from an inlet of the Sea of Marmora. Its trade is considerable. *Pop.* about 4,000. *Lat.* 40° 45′ 30″ N. *Lon.* 30° E.

IZNAJAR, *iz'-na-jar*, a town of Spain, in the province of Andalusia, standing on a height near the Genil, 38 miles from Cordova. *Manf.* Soap, tiles, coarse linen, and hempen tissues. There are, besides, several distilleries, and oil and flour-mills. *Pop.* 4,000.

IZNATORAF, *iz-na-tor'-af*, a town of Spain, in the province of Andalusia, 40 miles from Jaen. It was walled, flanked with towers, and entered by nine gates. Its principal buildings are a handsome church with a lofty tower, a ruined castle, court-house, and various schools. *Manf.* Soap, bricks, and tiles. *Pop.* 2,300.

IZTACCHIHUATT, *iz'-tai-che-hoo-at*, a volcano in Mexico, 30 miles from La Puebla. *Height*, 15,705 feet above the level of the sea.

## J.

JAAPHAR EBN TOPHAIL, *ja'-a-far ebn-to-fail*, an Ara-bian philosopher, supposed to have been the same with Averroes, who wrote a philosophical romance, called "The History of Hai Ebn Yokhdan," which was pub-

lished in Latin by Pocock, at Oxford, in 1671, and in English by Ockley, in 1708. D. about 1198.

JABBEH, *jab'-be*, a considerable town of Bambarra, in Western Africa, on the Niger, 55 miles from Sego. *Pop.* Unascertained.

JABEN, *ja'-bain*, a town of Spain, in the province of Valencia, 48 miles from Alicante. It is walled, and has a church, several chapels, a town-house, prison, and various schools. Grapes and silkworms are extensively grown and reared in the neighbourhood. *Pop.* 3,700.

JABLONSKI, Theodore, *ya-blons'-ke*, counsellor of the court of Prussia, and secretary of the Royal Academy of Sciences at Berlin. He published — "A French and German Dictionary," 1711; "A Course of Morality," 1713; and "A Universal Dictionary of Arts and Sciences." D. about 1740.

JACA, or JACCA, *ja'-ka*, a fortified town of Spain, in Aragon, 32 miles from Huesca. It has several gates and a citadel, a handsome cathedral, different chapels, convents, a prison, barracks, an hospital, and various schools. *Manf.* Linen and hempen fabrics, soap, leather, earthenware, and white wax. *Pop.* 3,200.

JACARCHI, *ja-kar'-she*, a town of Brazil, 50 miles from Sao-Paulo. It has a considerable trade in tobacco and coffee. *Pop.* 7,000.

JACI, or JACI D'AQUILA, *ya'-che*, a maritime town of Sicily, in the Val di Demona, not more than 12 miles from the summit of Mount Etna. It is situate on the Acis. *Manf.* Principally linens. *Pop.* 11,000.

JACKSON, Thomas, *jak'-son*, a learned divine, who became president of Corpus Christi College, Oxford, and dean of Peterborough. His chief work was a "Commentary on the Apostles' Creed." B. at Durham, 1573; D. 1640.

JACKSON, Arthur, a nonconformist divine, who was ejected from the living of St. Faith's, in London, in 1662. He was fined £500 for refusing to give evidence against Christopher Love, and also imprisoned. At the Restoration he was chosen by the assembly of ministers to present a bible to Charles II. He was also one of the commissioners at the Savoy conference. He wrote a judicious Commentary on the Bible. D. 1666.

JACKSON, John, an English divine, who received his education at Jesus College, Cambridge. He obtained the rectory of Rossington, in Yorkshire, and the mastership of Wigston's Hospital, in Lancashire. He was an acute metaphysician, but a zealous advocate for Arianism, and wrote some tracts against the doctrine of the Trinity, and others against Collins and Tindal; but his best work is his "Chronological Antiquities," published in 2 vols. 4to, 1752. B. at Lensey, Yorkshire, 1686; D. 1768.

JACKSON, William, a musical composer and ingenious writer. Having received a liberal education, he was placed under the tuition of the organist of Exeter Cathedral, and afterwards with Mr. Travers, an eminent musician in London. In 1777 he was appointed organist in the cathedral of his native city. He published many excellent songs, canzonets, hymns, and sonatas, of his own composition. His chief literary productions were, "Thirty Letters on various Subjects," "On the Present State of Music," and "The Four Ages," 8vo. One of Mr. Jackson's sons was secretary to Lord Macartney in his embassy to China; another was ambassador to the king of Sardinia, and afterwards at Paris and Berlin. B. at Exeter, 1730; D. at the same place, 1803.

JACKSON, Andrew, an American general and president, was the son of an Irishman, who emigrated to America in 1765. At the breaking out of the War of Independence, he was studying theology in the Waxhaw Academy; but this event made himself and his two brothers soldiers. On the termination of the war with the mother country, he resolved to study the law, but abandoned it after a short time to resume his military career, fighting, on this occasion, against the Indians on the frontiers of the civilized settlements. In 1797 he was chosen senator, and shortly afterwards was appointed by the legislature of Tennessee major-general of the forces of that state. Up to the year 1812 he resided upon his farm at Nashville, on the Cumberland River; but on the renewal of hostilities between England and America in that year, he put himself at the head of some three thousand volunteers, and took up a defensive position in the lower country of the Mississippi. In 1814 the United States government conferred the rank of major-general upon him, and the next year he repulsed the British forces in their attack on New Orleans. For several subsequent years he commanded expeditions against the Indians, displaying both cruelty and recklessness in some of his proceedings. In 1821 he was nominated governor of the newly-acquired state of Florida; and, after holding it for a year, was again elected to represent the state of Tennessee in the senate. Jackson was elected president in 1828, and again in 1832. B. at Waxhaw, South Carolina, 1767; D. at Nashville, Tennessee, 1845.

JACKSON, the name of numerous places in the United States, with populations ranging between 1,000 and 12,000

JACKSON, PORT. (*See* SYDNEY.)

JACKSON'S RIVER, a head-water of James's River, in Virginia, joined by Carpenter's Creek, and receiving the name of Fluvannan river. It is noted for a fall of 200 feet.

JACOB, *jai'-kob*, the son of Isaac and Rebecca, whose sons were founders of the twelve tribes of Israel. He was the favourite of his mother, by whose advice he imposed upon his father, and obtained his blessing, having before taken an advantage of Esau, by purchasing his birthright. To avoid his brother's fury, he fled to Padanaram, where he resided with his uncle Laban, whom he served fourteen years for his daughters Leah and Rachel. He afterwards returned to Canaan with great wealth, and a reconciliation took place between him and his brother Esau. His name was altered to Israel by an angel; whence his posterity have been called Israelites. He lived to the age of 147 years. B. 1993 B.C.; D. in the landof Goshen, 1846 B.C.

JACOB, Henry, a learned divine, was educated at Oxford, where he took his degree of M.A., after which he obtained a living. He wrote some treatises against the Brownists or Puritans, and a work on the sufferings of Jesus Christ. B. 1561; D. 1621.

JACOB, Henry, son of the above, was educated under Erpenius, and acquired a considerable knowledge of the Oriental languages. On his return to England, he entered of Merton College, Oxford, of which he became fellow, but was deprived of this in the civil wars. He wrote some works, which were never printed; but Wood ascribes to him the "Delphi Phœnicianates," published by Dickenson. B. 1608; D. at Canterbury, 1652.

JACOB, Giles, an industrious English lawyer, who published, among a great variety of works, a Law Dictionary, and the "Lives and Characters of English Poets." B. 1690; D. 1744.

JACOB, Ben Naphthali, a learned Jew of the 5th century, was educated in the school of Tiberius, in Palestine. The invention of the Masoretic points and accents is ascribed to him and Ben Aser.

JACOB, a Cistercian monk of Hungary, who quitted his order in 1212, under pretence of being called to deliver the Holy Land from the infidels. He gathered together a prodigious number of fanatics in Germany and France, who being chiefly peasants, obtained the name of the Shepherds. When St. Louis, king of France, was taken by the Saracens, Jacob pretended that the holy Virgin had commanded him to preach a crusade for his deliverance. The queen for some time tolerated this extravagance, but at last she caused the rabble to be dispersed, and Jacob was, shortly after, slain by a butcher.

JACOB, John, the distinguished commander of the Scinde Horse. His first appointment was to the Bombay artillery, which he entered in 1827, and with this corps, composed not of natives, but of Europeans, he passed his first seven years of service. At the expiration of this period he was intrusted with a small detached command, comprising a company of native artillery and a field battery; after which essay of his powers, he proceeded, in the usual way of Indian promotion, to assume civil instead of military duties, and served for a short time in the provincial administration of Guzerat. From these employments, however, he was soon summoned by the outbreak of war; and he participated, as an artillery officer, in the perils and glories of the Affghan campaign. He did not, however,

accompany the expedition all the way to Cabul; for, before the disastrous retreat from that city had been consummated, he received his appointment in the peculiar sphere of duty with which his name has been inseparably connected from that hour to the day of his death. In the year 1839, when all north-western India was in a ferment, it was determined to raise some squadrons of irregular horse for service in those parts; and the idea had been so far developed, that some 500 swarthy cavaliers stood enrolled, in 1841, as the Scinde Horse. This regiment was afterwards augmented, and Colonel Outram, perceiving Jacob's abilities, selected the young artillery lieutenant for the chief command. The campaigns and conquest of Scinde offered, of course, the most admirable opportunities for further distinction; and, on the field of Meanee, Jacob's Horse, and Jacob himself, established a name which was never afterwards sullied or obscured. After Scinde had been annexed, it became necessary to protect it as a frontier province, and, in this service, a prominent part was assigned to the Scinde Horse. Owing partly to the anomalous character of the territorial government, and partly, no doubt, to the confidence reposed in Jacob's personal abilities, the Scinde Horse were left almost entirely to themselves. The results soon became most remarkable. From a few troops, the force was gradually expanded till it included two strong regiments, and mustered 1,600 of the best horsemen in India, the commander of the whole being Brigadier Jacob, assisted by four Europeans and a number of native officers. But, although formidable to those whose occupation was rapine and plunder, Jacob was a benefactor to the people over whom he virtually ruled. On the spot where his troops had encamped, which was a sterile waste for miles around, Jacob, in less than thirteen years, had built a village containing 30,000 people, and the district was transformed into one fertile garden. This city was called Jacobabad. It was here that he ruled, wrote, made experiments in gunnery, and invented the valuable rifle called after his name. But, although still a young man, he, in the year 1858, gave sudden signs of a break-up of constitution. The ardent soldier had exhausted even his iron frame; a brain-fever ensued, and in a few days he was carried off. D. 1813; D. at Jacobabad, 1858.

JACOB, Ben Haim, a rabbi of the 16th century, who published a collection of the Masora at Venice, in 1525, in 4 vols., with the text of the Bible, a work greatly esteemed by the Jews.

JACOB, Al Bardai, a disciple of Severus, patriarch of Constantinople. He was one of the principal leaders of the Eutychians; on which account that sect gained the name of Jacobites.

JACOBÆUS, Oliger, *jä-ko-be'-us*, a Danish physician, who became professor of philosophy and physic at Copenhagen. He wrote a compendium of Medicine, and a number of Latin poems. B. in the isle of Jutland, 1650; D. at Copenhagen, 1707.

JACOBI, Frederick Henry, *ya'-ko-be*, a German metaphysical philosopher, who occupied several distinguished posts under the government of Dusseldorff, and, in 1804, became president of the Academy of Sciences at Munich. He published a great number of literary and philosophical works, in some of which he combated the doctrines of Kant. His principal works are "Letters on the Doctrines of Spinosa," "Hume and Belief; or, Idealism and Realism," and "Letter to Fichte." His complete works were published at Leipsic in 1820. B. at Dusseldorff, 1743; D. 1819.

JACOBINA, *ja-ko-be'-na*, a town of Brazil, 210 miles from Bahia. It has a parish church, other churches, and several schools. In its neighbourhood are grown rice, millet, tobacco, and various fruits, which thrive admirably. *Pop.* of the district, 10,000, supported principally by agricultural produce and a trade in cattle, sheep, and goats.

JACOBINS, CLUB of the, *jäk'-o-bins*, a popular society, formed at Versailles in 1789. It was at first called the Breton Club, having been founded by those deputies of the National Assembly who came from Brittany It was afterwards removed to Paris, where, taking up its quarters in an old Jacobin convent, it was henceforth called the Jacobin Club. At its head were found the most powerful of the opposition party in the National Assembly: all the questions and resolutions which this party intended to move in the senate, were previously discussed in the club. Robespierre was for a long time its chief. This club was the principal instigator of the sanguinary measures of the Reign of Terror; but, with the fall of Robespierre, its power declined, and it was finally abolished on the 21st Brumaire, year III. of the republic (November 11, 1794).

JACOBITES, *jäk'-o-bites*, the title given to the partisans of James II. and his son in England, after the revolution of 1688.

JACOBS, Jurian, *jai'-kobs*, a painter of the Flemish school. He was the disciple of Francis Snyders, whose manner he imitated. In his historical pieces he introduced animals, painted in a masterly manner. B. in Switzerland, 1610; D. 1664.

JACOMB, Thomas, *jai'-komb*, a nonconformist divine, who was educated at Magdalen Hall, Oxford, and afterwards at Cambridge, where he became fellow of Trinity College. In 1617 he removed to London, and had the living of St. Martin, Ludgate, of which he was deprived for nonconformity in 1662. He was then taken into the family of the countess of Exeter. He wrote several theological works. B. in Leicestershire, 1622; D. 1687.

JACOPONE, Da Todi, *ya-ko-po'-nai*, an old Italian poet, celebrated for his "Sacred Canticles," and for being the author of the "Stabat Mater." His Canticles were printed at Venice in 1617. D. 1306.

JACQUARD, Joseph Marie, *jäk'-ard*, a celebrated mechanician and inventor of the Jacquard loom. He was the son of a poor weaver, and is said to have had no school education, having taught himself to read and write. From an early age he evinced a great aptitude for mechanical studies. After having inherited his father's looms and stock in trade, he, for some time, worked as a weaver; but was subsequently compelled to sell all his working apparatus, having contracted many debts through his unfortunate experiments in weaving, cutlery, and type-founding. He served with the republican army in the defence of Lyons and on the Rhine; but afterwards returned to his native city, and applied himself energetically to perfect the splendid piece of mechanism which bears his name, and which is universally employed. B. at Lyons, 1752; D. at Ouillins, near Lyons, 1834.

JACQUELOT, Isaac, *zhak'-lo*, a learned French Protestant, was the son of a minister at Vassy. At the age of 21 he became assistant to his father; but, on the revocation of the edict of Nantes, he went to Heidelberg, and thence to the Hague. The king of Prussia invited him to his capital, where he became his majesty's chaplain, and had a pension. He wrote "Dissertations on the Existence of God," three pamphlets against Bayle's Dictionary, "Dissertations on the Messiah," "A Treatise on the Inspiration of the Scriptures," "Letters to the Bishops of France," Sermons, a work against Socinianism, &c. B. 1647; D. 1708.

JACQUERIE, THE, *zhak'-re*, a faction which ravaged France during the captivity of King Jean II. in England, in 1358. It was chiefly composed of revolted peasants, and led by a certain Caillot, surnamed Jacques Bonhomme; whence its name. After attacking many castles, and killing a number of their lordly masters, it was suppressed at the end of six months.

JACQUES-DE-L'ÉPÉE, St., *zhak*, 'St. James of the Sword,' a military order of knighthood, founded about 1161, by Ferdinand II., king of Leon and Castile, to protect against the Moors, the pilgrims of St. James of Compostella. It is the most important of the military orders of Spain, possessing immense revenues, drawn from two cities and 118 boroughs. Since Charles V. became the grand master, that function has always appertained to the crown of Spain.

JACQUET, Louis, *zha'-kai*, a French writer and ecclesiastic, who wrote an ingenious parallel between the Greek and French tragic poets, and some prize essays, which were rewarded by the academy of Besançon. He was an enthusiastic admirer of Rousseau, whose disposition and manners he greatly resembled. B. at Lyons, 1732; D. 1793.

JADDUS, *jäd'-dus*, high priest of the Jews, who, when Alexander the Great intended to pillage Jerusalem and the temple, went to meet him in his pontifical habits, and the sight so struck the victor, that he fell

at the feet of Jaddus, declaring he had seen in a vision a man dressed in precisely the same garments, who had promised him the empire of Asia. This so altered his sentiments, that he offered sacrifices to the God of Israel.

JADELOT, Nicolas, *shad'-lo*, a French physician. He wrote—"The Picture of Animal Economy," a "Complete Course of Anatomy," and a "Pharmacopœia for the Poor." B. at Nancy, 1736; D. same place, 1793.

JADON, *jai'-don*, a Jewish prophet, who foretold to Jeroboam that the priests of Dan should all perish.

JAEGER, John Wolfgang, *yai'-jer*, a Lutheran divine. He became preacher of the cathedral in his native city, chancellor of the university, and provost of the church of Tubingen. He wrote several works, the chief of which are,—"Ecclesiastical History compared with Profane;" "A Compendium of Divinity;" "The Life of Spinoza." B. at Stutgardt, 1647; D. 1720.

JAEL, *jai'-el*, a Jewish woman, wife of Heber the Kenite. When Sisera, the general of Jabin, king of Hazor, sought refuge in her tent after the defeat of his army, and had lain down to sleep, she drove a nail through his head, and killed him.

JAEN, *ha'-en*, a province of Spain, forming the eastern part of Andalusia, and inclosed by the provinces of Granada, Murcia, Cordova, and La Mancha. *Ext.* About 80 miles long, with a mean breadth of 70. *Desc.* Generally mountainous, and the centre forming a valley along the banks of the Guadalquiver. The hilly districts are devoted to pasturage, and the level to agriculture, although this is by no means well pursued. *Rivers.* The Guadalquiver is the principal. *Minerals.* Lead and copper. *Pop.* 247,000.

JAEN, a city of Spain, and the capital of the above province, 122 miles from Seville. It was formerly surrounded by Moorish walls, flanked with towers, is neatly built, and has several handsome churches and squares, one of which is spacious and encompassed by elegant houses. It is a bishop's see; and the cathedral is a noble structure, divided into six naves, and adorned on the outside with statues and bas-reliefs; in the interior it is set off by magnificent drapery, and has some fine paintings. There are, besides, several other churches, nunneries, an episcopal palace, colleges, museum, various hospitals, schools, a theatre, the palace of Count Villar Don Pardo, the buildings of the Inquisition, and a bull-ring capable of seating 8,000 people. Water is distributed to all parts of the town in great profusion by means of public fountains. *Manf.* Woollens, linens, soap, and brandy. *Pop.* 18,000.—This town was known to the Romans, but its present name was given to it by the Moors, who made it the capital of the kingdom of Jaen, which was the smallest of the four states into which Andalusia was divided.

JAEN DE BRACAMOROS, a province of Quito, bounded on the N. by Loja, Quixos, and Macas; E. by Mainas; W. by Piura; and S. by Caxamarca, or Chachapayas, in Peru. The capital is of the same name, and has a population of 4,000.

JAFFA, or YAFFA, *jäf'-fa*, a town of Palestine, near the coast of the Mediterranean, 31 miles from Jerusalem. It stands on a small eminence in the form of a sugar-loaf; on the summit is a small citadel, which commands the town; whilst the bottom of the hill is surrounded by a wall, without a rampart. The general appearance of the place is now very desolate. Its harbour is one of the worst in the Mediterranean. The commerce consists in the importation of grain, particularly of rice, from Egypt. Jaffa has always been a favourite resort of pilgrims to the Holy Land. The Latins, Greeks, and Armenians have each small convents for the reception of pilgrims. A little to the west is the celebrated tower of Ramlah, 120 feet high, where an extensive view is obtained. *Pop.* 5,000.—This is the ancient Joppa, which was a seaport in the time of Solomon. It was the port of Jerusalem, and the landing-place of the cedars with which the temple in that city was built. In 1799 it was taken by Bonaparte, who here shot 1,200 Turkish prisoners, who had broken their parole, and, it is said, subsequently caused poison to be given to a number of his sick soldiers, rather than that they should fall alive into the hands of their inhuman enemies.

JAFFNA, or JAFFNAPATAM, *jaf'-na-pa-tam'*, the capital of the district of Jaffnapatam, in Ceylon, at some distance from the sea, but communicating with it by a river navigable for large boats. It fronts Palk's Straits, 210 miles from Colombo. The town is fortified, and possesses a good citadel; but it was taken, after a short resistance, by the British troops in 1795. The inhabitants are principally Mahometans; but since Ceylon was taken by the English, many of the country-born Dutch families have settled here. It has a trade in palmyra timber, tobacco, and shells. *Pop.* 8,000. *Lat.* 9° 45′ N. *Lon.* 80° 9′ E.

JAGELLONS, *ja'-gel-lons*, the name of an ancient dynasty of the grand-duchy of Lithuania, which afterwards gave monarchs to Poland, Hungary, and Bohemia. Its founder was the grand-duke Jagiel, who, in 1386, married Hedwige, daughter of the king of Hungary and Poland. He subsequently embraced the Christian religion, and became king of Poland, under the title of Wladislas V. His descendants reigned both in Lithuania and Poland, but Alexander Jagellons united both crowns in 1501. Several Jagellons reigned at a later period in Hungary and Bohemia.

JAGEPORE, *ja-ge-por'*, a town of Hindostan, in the province of Orissa and the presidency of Bengal, 35 miles from Cuttack. It is a large straggling town, and has a manufactory of cotton cloths. *Pop.* Unascertained. *Lat.* 20° 50′ N. *Lon.* 86° 35′ E.

JAGERNDORF, or KARNOW, *yai'-jern-dorf*, a town of Austrian Silesia, 13 miles from Troppau. It has a handsome parish church, with two towers 230 feet high, the loftiest in Silesia. *Manf.* Paper, woollens, and linens. *Pop.* 5,000.—There is a DUCHY of the same name, with an area of 144 geographical square miles, and a population of 41,000. Since 1620 it has belonged to the princes of Lichtenstein.

JAGO, Richard, *jai'-go*, an English poet, was educated at University College, Oxford. He entered into orders, and in 1724 obtained the vicarage of Snittersfield, in Warwickshire. In 1771 he was presented to the living of Kilmcote, in Leicestershire. His "Elegy on the Blackbirds," first published in the "Adventurer," was attributed to different writers. His principal performance is a descriptive poem, entitled "Edgehill." B. in Warwickshire, 1715; D. 1781.

JAGO, ST., *san-te-a'-go*, a province of Chili, bounded on the N. by that of Aconcagua, E. by the Andes, S. by the river Maypo, and W. by Melipilla. *Ext.* 45 miles long, with a breadth of 36; and it is watered by the rivers Mapocho, Colina, Zampa, and by several other beautiful streams.

JAGO, ST., the capital of the above province, on the Mapocho, over which there is a beautiful bridge, which connects the city with the suburbs, 55 miles from Valparaiso. The streets, like those of all the other cities and villages in Chili, are straight, and intersected at right angles, and are 36 geometrical feet in breadth. The great square is 450 feet on each side: in the midst is a handsome fountain of bronze. The most remarkable edifices are the cathedral, the church of St. Dominic, and that of the great college formerly belonging to the Jesuits. The private houses are handsome and pleasant, but, on account of earthquakes, are usually of but one story. Besides the suburbs on the other side of the river, there is one to the south, called St. Isidore. There are several parish churches, convents, nunneries, a house of correction for women, a foundling hospital, several private endowments, a college of nobility, which was under the direction of the Jesuits, and a Tridentine seminary. St. Jago contains a royal university, a mint for coining gold and silver, and barracks for the soldiers. Being the centre of all the commerce of Chili, it abounds with all kinds of meat, fish, and other articles of food, which are obtained from the neighbouring provinces. *Pop.* about 50,000. *Lat.* 33° 26′ S. *Lon.* 70° 44′ W.

JAGO, ST., a town of the island of Cuba, long considered the capital, but now fallen into comparative decay. *Pop.* Unascertained. There are other cities and islands of this name. *Lat.* 20° S. *Lon.* 76° 6′ W.

JAGO, ST., a large river of Quito, in the province of Jaen de Bracamoros, uniting with the Pauto.—Another, which enters the Pacific Ocean in *lat.* 1° 14′ N.

JAGUARIBE, *ha'-gwa-re-bai*, a river of Brazil, rising in the mountains of Boa Vista, and, after a course of

400 miles, falling into the Atlantic, in *lat.* 4° S., *lon.* 38° 10′ W.—Also a TOWN on the banks of the river, 45 miles from Bahia. *Pop.* Unascertained.

JAHICOS, *ha'-he-cose*, a town of Brazil, in the province of Piauhi, 70 miles from Oeiras. It is situate in a district of considerable fertility, and has several churches and schools. *Pop.* 2,000.

JAHN, John, *yan*, a learned German orientalist. He was professor of theology and of the Oriental languages at the university of Vienna, wrote grammars of the Arabian, Hebrew, Syriac, and Chaldean tongues; and, in 1800, published an important work on "Biblical Archæology," which has been translated into English. B. at Taswitz, Moravia, 1750; D. at Vienna, 1815.

JAHPOOR, *ja-por'*, a town of Hindostan, in the presidency of Bengal, 15 miles from Agra. *Pop.* Unascertained. This place has been the scene of two decisive battles; the first fought in 1688, between Aurungzebe and his brother Dara Sheeoh; and the second, in 1707, between Shah Allum and Azaim Ushaun, all Indian princes.

JAILLOT, Charles Hubert, *zhail'-lo*, geographer to the French king, was at first a sculptor; but having married the daughter of a map-colourer, he turned his attention to geography. He engraved many maps and charts, particularly the great maps of France, that of Lorraine being his best work. In 1669 he published a set of maps of the four quarters of the globe, drawn by Sanson, and engraved by himself. D. 1712.

JAILUM, JELUM, JILUM, or BEHUT, *je'-lum*, a river of Hindostan, and supposed to be the principal of the five great rivers which intersect the Punjab E. of the Indus. It rises near the S. point of Cashmere, in *lat.* 33° 33′ N.; *lon.* 75° 40′ E., and, after a course of 450 miles, joins the Chenab, 75 miles from Mooltan. On its banks is a considerable TOWN of the same name. *Pop.* Unascertained. *Lat.* 32° N. *Lon.* 73° 36′ E.

JAKATRA, *ja'-ka-tra*, a division of Batavia, and the name of several other places in Java.

JALAPA, or XALAPA, *ha'-la-pa*, a city of Mexico, 52 miles from Vera Cruz. It stands at the foot of a basaltic mountain nearly 4,400 feet above the level of the sea. Its church is said to have been founded by Cortes, and in its neighbourhood is found the *Ipomea purga*, from which jalap is obtained,—a name derived from the town. *Pop.* 18,000.

JALISCO. (*See* GUADALAXARA.)

JALORE, or JHALORE, *jal-lor'*, a town and fortress of Hindostan, in Ajmeer, 70 miles from Joudpoor. The fortress is accounted the strongest in India, and is the prison of the rajah. *Pop.* 15,000.

JALOMNITZA, *ya'-lom-nitz'-a*, a river of Europe, rising in the Carpathian mountains, on the frontiers of Transylvania, and, after a course of 170 miles, falling into the Danube, 9 miles from Hirchova.

JALON, *ha'-lone*, a river of Spain, rising in the province of Soria, Old Castile, and, after a course of 120 miles, joining the Ebro, 12 miles above Saragossa.

JALOUTROVOSK, *ja'-loo-tro-vosk*, a town of Siberia, and the capital of a district of the same name. It is in the government of Tobolsk, and stands on the Tobol, a little above its confluence with the Iset, in *lat.* 56° 38′ N.; *lon.* 61° 20′ E. *Pop.* 2,300.—The DISTRICT lies in the S.W. of the government, and is covered with marshes and lakes. In the drier grounds it produces barley, and raises immense herds of cattle. *Pop.* Unascertained.

JAMAICA, *ja-mai'-ka*, one of the West-India islands, or Antilles, belonging to Great Britain, and the most considerable and valuable of her possessions in that quarter, lying at between 80 and 90 miles to the S. of Cuba. *Ext.* About 150 miles in length, and, on a medium, 40 miles in breadth. *Area*, 4,256 square miles. *Coastline*, 500 miles, and indented with many excellent harbours, of which Port Royal, or the harbour of Kingstown, is the largest. *Desc.* A lofty range of mountains, called the Blue Mountains, runs through the whole island from E. to W., dividing it into two parts, and rising, in some of its summits, to an elevation of 8,000 feet above the level of the sea. On the N. and S. sides of these mountains the aspect of the country is extremely different. On the former, the land rises from the shore into hills, which are more remarkable for beauty than boldness, being all of gentle

acclivity, and generally separated from each other by expansive vales and undulating surfaces. Every valley has its rivulet, and every hill its cascade. On the S. side of the island the scenery consists of the stupendous ridges of the Blue Mountains, of abrupt precipices, and inaccessible cliffs, as the shore is approached. *Rivers.* Numerous, taking their rise in the mountains, and usually running with great rapidity to the sea on both sides of the island. None of them are navigable, except for boats. Black River is the deepest, and has the greatest current. It falls into Black-River Bay, on the S.W. coast, and has, at its entrance, about 18 feet of water. There are springs, both sulphurous and chalybeate, in different parts of the country. *Climate.* Hot on the plains, the thermometer standing at 80°, and, in the colder season, from 70 to 80. On the higher grounds the cold is greater. The year, however, as in all tropical countries, may be divided between the wet and the dry seasons. *Zoology.* The indigenous quadrupeds were the agouti, the peccary or Mexican hog, the armadillo, the opossum, the racoon, the musk-rat, the alco, and the monkey. Of these only the agouti and the monkey now remain. Horned cattle and mules are numerous, and so are sheep, goats, and hogs. Of the lizard there are many varieties. The woods and marshes abound with different kinds of wild fowl, some of them of exquisite flavour. Among them may especially be noticed the ringdove and rice-bird of South Carolina. Parrots are still found in the groves; but the flamingo is nowhere to be seen. Domestic fowls, however, are abundant, and fish are plentiful along the coasts. *Pro.* The soil has, in some places, been considered deep and fertile; but, on the whole, the island has been pronounced unfruitful and laborious, compared with those countries which have been generally regarded as fertile. Sugar, indigo, cotton, and coffee are the most important natural productions; maize, or Indian corn, and rice, are also cultivated. The bread-fruit tree, with several other useful plants, was introduced by Sir Joseph Banks; whilst different kinds of grass, of excellent quality, are found spontaneously growing upon the island. There are also excellent vegetables of native growth. The other indigenous productions are plantains, bananas, yams of several varieties, calalue, a species of spinach, eddoes, cassavi, and sweet potatoes. Fruits are found in equal perfection and variety, and no country affords so magnificent a dessert. The mountains are covered with woods, containing trees of prodigious growth and solidity; while others, as the well-known mahogany, are well adapted for cabinet-work. *Exp.* Sugar, rum, molasses, coffee, cocoa, cotton, indigo, pimento, ginger, arrow-root, and logwood. *Gov.* Administered by a governor, an executive, and a legislative council, appointed by the crown, and a house of assembly, elected by the freeholders of the island. *Pop.* about 380,000. *Lat.* between 17° 43′ and 18° 32′ N. *Lon.* between 76° 5′ and 78° 26′ W.—Jamaica was discovered by Columbus in 1494, and was, in 1503, first colonized by the Spaniards. In 1655 it was taken by the English, and was afterwards settled by 3,000 British soldiers, disbanded from the parliamentary army. These were subsequently followed by 1,500 royalists; and, from this beginning, the colony gradually increased in importance. The aborigines have long ceased to exist, no traces of them having been discovered even at the time the island was taken from the Spaniards, a couple of centuries ago.

JAMAICA, a township 12 miles from New York, U.S., on the Long Island railroad. *Manf.* Pianofortes and carriages. *Pop.* 4,000.

JAMBE, *zhamb*, a village and parish of Belgium, on the Meuse, forming a suburb of Namur. *Manf.* Tobacco and chicory. *Pop.* 2,000.

JAMBER, or JAMBI, *jam'-be*, the capital of a district the same name in Sumatra, about 60 miles from the on a river which is navigable for boats. The town rge, but the air unwholesome. *Pop.* Unascertained. 1° 24′ S. *Lon.* 103° 39′ E.—The DISTRICT is, along oast, nothing more than a swamp; but the land as it recedes from the sea.—The RIVER, after a se of about 100 miles, falls into the China Sea, in *lat.* 1° S.

JAMBURG, *jam'-boorg*, a town of European Russia, and the capital of a circle, 70 miles S.W. of St. Peters-

burg, on the Lugn, here crossed by a wooden bridge. It has several churches, and a market-place adorned with an obelisk. *Manf.* Woollens, linens, camlets, and silks. There are also some saw-mills and glass-works. *Pop.* 1,500.—The CIRCLE has an area of 880 geographical square miles, and a population of 50,000. It is both well wooded and well watered, but is not fertile.

JAMES, St., a town of France, in the department Manche, 12 miles from Avranches. *Manf.* Cloth, known as the *drap de St. George*, and druggets. *Pop.* 2,000.—Here William the Conqueror built a strong fortress, which remained in the possession of the English till 1448.

JAMES, St., the Great, was the son of Zebedee and Salome, and called to the apostleship with his brother John the Evangelist, while they were mending nets with their father. He was beheaded at Jerusalem by Herod Agrippa, about 44.

JAMES, St., the Less, another of the apostles, obtained the name of Just on account of his virtues. He was the first bishop of Jerusalem. One of his epistles, addressed to the dispersed converted Hebrews, is among the canonical epistles of the New Testament. He was put to death by the high priest Ananias, about 63.

JAMES, St., of Compostella, the patron saint of Spain. This is the name given by the Spanish Roman Catholics to St. James the Great, the inhabitants of Compostella, in Spain, pretending to possess his body enshrined in their cathedral.

SOVEREIGNS OF SCOTLAND.

JAMES I., king of Scotland, the son of Robert III., was taken by the English on his passage to France, and kept in confinement 18 years. In 1424 he obtained his liberty, on condition of marrying the daughter of the earl of Somerset. He severely punished those who had governed his country in his absence, for which he was murdered in his bed in 1437. B. 1393.

JAMES II., king of Scotland, succeeded the preceding king, his father, at the age of seven years. He assisted Charles VII. of France against the English, and punished rigorously those lords who had revolted against him. B. 1431; killed at the siege of Roxburgh, 1460.

JAMES III. was the son and successor of the above, and ascended the throne in 1460. He put to death his brother John, and committed so many cruelties that his subjects revolted. B. about 1453; killed 1488.

JAMES IV. succeeded his father, the last-mentioned, at the age of about 15 years. He defeated the rebellious lords, and assisted Louis XII., king of France, against the English; but was slain at the battle of Flodden Field, in 1513. B. about 1473.

JAMES V., the son of the above, was only a year old at the time of his father's death. At the age of 17 he assumed the government, and assisted Francis I. of France against the emperor Charles V., for which the French king gave him his daughter Margaret in marriage. On her decease, he married Mary of Lorraine, daughter of Claude, duke of Guise. On his death, James left his crown to Mary Stuart, his daughter. B. 1512; D. 1545.

SOVEREIGNS OF ENGLAND.

JAMES I. of England, and VI. of Scotland, was the son of Henry Stuart, Lord Darnley, by Mary queen of Scots, daughter of James V. When only a year old, he was proclaimed king, on the forced resignation of his mother, and, in 1603, he succeeded Queen Elizabeth on the English throne. A plot was soon after discovered to seize on him, and place his cousin, the Lady Arabella Stuart, upon the English throne in his stead, for which Lords Cobham and Grey, and Sir Walter Raleigh, were indicted. But, in 1605, the more desperate attempt to blow up the king, the prince, and both houses of parliament, known as the Gunpowder Plot, was discovered, for which Guy Fawkes and many other persons were executed. In 1606 he established episcopacy in Scotland, and made peace with Spain. In 1612, his son, Prince Henry, by Anne of Denmark, died, and the same year his daughter was married to Frederick, the elector-palatine. One of the greatest blots of his reign was the execution of Sir Walter Raleigh, fifteen years after sentence. James was a man of learning, and affected to be a profound scholar, particularly in theology, being not indifferently acquainted with polemics, of which he was so fond as to found Chelsea College for the maintenance of learned men, who were to employ themselves in managing controversies, especially with the church of Rome. Charles II., however, applied it to the better purpose of affording a home for soldiers worn out in the service of their country. He wrote, among other books, a "Commentary on the Revelations," in which he calls the pope Antichrist; "Basilicon Doron; or, Advice to his Son;" "Dæmonology; or, a Discourse on Witchcraft;" "A Counterblast against Tobacco." B. at the castle of Edinburgh, 1566; D. in England, 1625.

JAMES II., king of England, was the second son of Charles I. He was declared duke of York soon after his birth. During the rebellion he resided in France, where he imbibed the principles of popery. At the Restoration he returned to England, and secretly married Anne Hyde, daughter of the earl of Clarendon, by whom he had two daughters, who afterwards became queens of England; viz., Mary and Anne. In the Dutch war he signalized himself as commander of the English fleet, and showed great skill and bravery. On the death of his first wife, he married Mary Beatrix of Modena. He succeeded to the throne on the death of Charles II., in 1685; but his zeal for his religion leading him into measures subversive of the constitution, the prince of Orange, who married his daughter Mary, was invited to England by several of the English nobility; and the king, finding himself abandoned by his friends, withdrew to France. His son James, commonly called the Elder Pretender, died at Rome, in 1766. B. in London 1633; D. at St. Germains, 1701.

---

JAMES I., king of Aragon, called the "Warrior," succeeded his father, Peter the Catholic, in 1213. He conquered the kingdoms of Majorca and Minorca, Valence, and other countries, from the Moors. Before he expired, he resigned the crown to his successor, and took the habit of the Cistercian monks, according to the superstition of the age. B. 1206; D. at Valence, 1276.

JAMES II., king of Aragon, succeeded his brother, Alphonsus III., in 1291. He carried on a long war against Navarre and the Moors, and united Catalonia to his crown. B. about 1260; D. at Barcelona, 1327.

JAMES OF VORAGINE, a Dominican and bishop, who became provincial of his order, and archbishop of Genoa. He compiled a Golden Legend, full of pious fables, which has been many times reprinted. B. at Genoa, about 1330; D. about 1398.

JAMES, Thomas, a learned divine, was educated first at Winchester school, and next at New College, Oxford, where he was chosen fellow, with the degree of D.D. He was appointed first keeper of Bodley's Library, and made sub-dean of Wells. He collated MSS. of the ancient fathers, with a view to publish them, but failed in his design, for want of encouragement. He wrote several learned books, the chief of which is, "A Treatise of the Corruption of the Scriptures, Councils, and Fathers." B. at Newport, Isle of Wight, 1571; D. at Oxford, 1632.

JAMES, Richard, nephew of the above, was educated at Exeter College, Oxford, whence he removed to Corpus Christi, of which he became fellow. He travelled in Russia, and published a narrative of his journey in 1619. He was of great service to Selden and Sir Robert Cotton, being a man of extensive learning, and profoundly acquainted with ancient MSS. He published several books in Latin. B. 1592; D. in London, 1631.

JAMES, Robert, an English physician, who received his education at St. John's College, Oxford. After practising in the country, he removed to London, and, in 1743, published his Medical Dictionary, in 3 vols. folio, in which he was assisted by Dr. Johnson,—a work of considerable merit in its day. He also published other works in connection with his profession; but he is best known by a valuable medicine, universally celebrated under the name of James's powder, which gave a fortune to his family. B. at Kinverston, Staffordshire, 1703; D. 1776.

JAMES, Thomas, a learned divine, who was educated at Eton whence he was elected to King's College,

Cambridge, where he obtained a fellowship, and proceeded to his degree of D.D. in 1786. He was, for many years, a public tutor in that college. In 1776 he became master of Rugby school, which station he filled, with great honour and satisfaction, till 1793, when he resigned. For his great services he was preferred to a prebend in Worcester cathedral, and the living of Harrington, in the same county. He published a "Compendium of Geography for the use of Rugby School," "An Explanation of the Fifth Book of Euclid by Algebra," and two Sermons. B. at St. Neots, in Huntingdonshire; D. at Harrington, Worcestershire, 1804.

JAMES, George Payne Rainsford, a modern English novelist, historian, and poet. He received the rudiments of his education at a school in Greenwich; but was sent, about the age of 15, to Paris, where he remained several years. When only 17, he wrote several Eastern tales, which were afterwards published for the benefit of the Literary Fund. From that period till the year 1825, he continued to contribute anonymously to the magazines and periodicals; but, encouraged by Sir Walter Scott and Washington Irving, he wrote and published an historical novel, in the style of the former, called "Richelieu." This met with a very decided success, and the young author rapidly produced a number of other works of the same character. During the succeeding quarter of a century, he wrote with great industry; novels, fairy tales, poems, and historical works issuing in quick succession from his rapid and fertile pen. Of his novels, it will be sufficient to enumerate a few of the best: these are, "Darnley," "Henry Masterman," "Philip Augustus," "The Gipsy," "The Smuggler," and "Morley Ernstein." The most successful of his historical works are, "The Life of the Black Prince," "The History of Charlemagne," and the lives of some Foreign Statesmen, which he contributed to "Lardner's Cyclopædia." During the period of his greatest popularity, he had been appointed historiographer of England by William IV.; but soon resigned the office. Mr. James was appointed British consul at Norfolk, Virginia, in 1852. He wrote and published several novels in America, besides sending three or four to be produced in England. He was sent, as Britannic consul-general for the Adriatic ports, a year or two since, to Venice. B. in London, 1801; D. at Venice, 1860.

JAMES BAY, *jaimz*, a bay situate at the bottom of Hudson's Bay, British America. *Ext.* 280 miles long, with a width ranging between 75 and 170. It contains several islands, and receives some considerable rivers. *Lat.* between 51° and 55° N. *Lon.* between 78° 25′ and 82° 30′ W.—Also an island in the Pacific, one of the largest of the Galapagos. *Ext.* 50 miles long, by 20 broad. *Desc.* Volcanic and barren: its coasts, however, are the resort of great numbers of turtles; whilst the interior swarms with tortoises. *Pop.* Unascertained. *Lat.* 12′ 6″ S. *Lon.* 90° 55′ 45″ W.

JAMES CITY, a county of Virginia, U.S., between Chickahominy and James rivers. *Pop.* 5,000.—2. A post-town in Madison county, Virginia.

JAMES RIVER, a river of Virginia, U.S., which, after a course of between 200 and 300 miles, falls into the mouth of the Chesapeake, in *lat.* 37° 2′ N.; *lon.* 76° 20′ W.

JAMESON, Mrs. Anna, *jaim'-son*, a modern English authoress, was eldest daughter of Mr. Murphy, an artist of Dublin, who afterwards became painter-in-ordinary to the Princess Charlotte. A distinguished disciple of art himself, he early imbued his talented daughter with its principles. As a young woman, Anna Murphy occupied the post of governess in two or three families of distinction; but, at the age of 27, she married Mr. Robert Jameson, a barrister, who, several years afterwards, was appointed to an official post in Canada. Mrs. Jameson joined her husband subsequently; but a separation eventually took place by mutual agreement; upon which she returned to London, and devoted herself henceforth to literature and the fine arts. She had already made her appearance as an authoress, having published the "Diary of an Ennuyée," in 1826, a work which was reprinted, with many additions, under the title "Visits and Sketches at Home and Abroad." In 1829 appeared her "Loves of the Poets," a series of imaginative sketches; after that, "Female Biography," "Romance of Biography," "Beauties of the Court of Charles II.," "Female Sovereigns," and "Characteristics of Women," a work similar to the "Loves of the Poets," but of a higher and more ambitious character. In 1838 she published "Winter Studies and Summer Rambles in Canada," which contained a record of her visit to Canada; and, in 1840, she put forth a translation of "The Dramas of Princess Amelia of Saxony." In all her works of foreign travel hitherto published, social and artistic criticisms were to be found; but, about this time, she commenced writing books of an exclusively artistic character; the first of these being her "Handbook to the Public Galleries of Art in and near London," which was published in 1842. Akin to this production were her "Companion to the most Celebrated Private Galleries of Art in London;" "Lives of the Early Italian Painters;" a collection of essays, chiefly artistic, called "Memoirs and Essays;" "The Poetry of Sacred and Legendary Art;" "The Legends of the Monastic Orders," and "The Legends of the Madonna;" this last appearing in 1852. All these works displayed a profound acquaintance with the principles, and a refined appreciation of the great examples of art. Indeed, her labours may be said to have been the precursor of that enlarged and discriminative fine-art criticism which has since sprung up in England. The "Handbook to the Courts of Modern Sculpture at the Crystal Palace" was written by her; but, in addition to her artistic criticisms, she was author of a few on all works, in which she sought to ascertain "whether there was any hope or possibility of organizing, into some wise and recognized system, the talent and energy, the piety and tenderness of our women for the good of the whole community." For two years before her death she had been assiduously engaged upon "The Life of Our Lord," and it was while prosecuting her researches for this purpose at the British Museum, that she caught a cold, which caused her death. B. in Dublin, 1797; D. in London, 1860.

JAMESONE, George, *jame'-sone*, a Scotch painter, termed by Walpole the Vandyck of Scotland. He studied under Rubens, with Vandyck, at Antwerp, and, on his return to his native country, painted the portraits of many of the most distinguished Scotch noblemen then living, as well as one of the English king, Charles I. B. at Aberdeen, 1586; D. 1644.

JAMESTOWN, a post-town of Prince Edward county, Virginia, U.S.—2. A town in James City county, Virginia, on a peninsula on the N. side of James River, 32 miles from its mouth. It is now in ruins; but here, in 1608, the first English settlement in the United States was made.—The name, also, of several townships.

JAMIESON, John, D.D., *jai'-me-son*, a Scotch antiquarian and lexicographer. He was sent by his father, at the early age of nine years, to the university of Glasgow, and, subsequently, attended lectures at the university of Edinburgh. In 1779 he obtained a license to preach from the presbytery of Glasgow, after which he acted as pastor to a number of communions in many Scotch districts, although without any appointment. After having written several poetical sermons, theological works, and many antiquarian researches, he produced, in 1808, his "Etymological Dictionary of the Scottish Language," and, in 1818, "An Abridgement of the Scottish Dictionary;" which last are valuable on account of the very large collection of old words, idioms, and customs, peculiar to his native country, contained therein. He had, for several years before his death, been in receipt of a pension, first from the Royal Society of Literature, and, afterwards, from the civil list. B. at Glasgow, 1759; D. at Edinburgh, 1838.

JAMU, or JUMOO, *ja-moo'*, a town in the Punjab, 88 miles from Lahore, with extensive ruins in its vicinity. *Pop.* 8,000.

JAMYN, Amadis, *zha'-meen*, a French poet, and secretary to Charles IX. Besides his poetical works, he wrote academical discourses in prose, and completed the translation of Homer's Iliad into French verse, which was left imperfect by Salel. B. about 1530; D. about 1585.

JANET-L'ANGE, *zha'-net-lanzh*, commonly so called,

his real name being Ange Louis Janet, a modern French painter and designer on wood. After having studied for several years in the *ateliers* of Ingres and Collin, he afterwards became a pupil of Horace Vernet, whom he assisted in making the designs for the history of Napoleon. Between the years 1836-46, he painted several pictures which were hung in the Paris exhibitions; but about the latter year he was engaged by the proprietors of the French "Illustration" to undertake the artistic direction of that journal. During the ten subsequent years he made a very large number of designs for illustrated newspapers, and for French periodicals, and even for English publishers; but, afterwards, returned to his oil-painting; since which he has painted several historical pieces, which have obtained considerable success in his own country. B. at Paris, 1818.

JANICON, Francis Michael, *zha'-ne-kawng*, a French political writer, who settled in Holland. He was the author of "The present State of the Republic of the United Provinces and their Dependencies." B. at Paris, 1674; D. at the Hague, 1730.

JANICULUM, MOUNT. (*See* IANICULUM.)

JANIN, Jules-Gabriel, *zha'-nă*, a modern French critic and author. He evinced in his earliest years a great aptitude for study, and acquitted himself so well at the college of St. Etienne, in the department of the Loire, that his father decided to send him to Paris, to finish, at the college Louis-le-Grand, an education thus auspiciously commenced. Shortly after leaving this college, he began to write squibs and political satires for the "Figaro," and continued to do so until that publication was suppressed by the government, in 1825. His vivacious and fearless pen was next employed in the columns of the "Messager des Chambres," and so trenchant were his attacks upon the despotic Polignac ministry of Charles X., that, in 1829, the journal to which he contributed was subjected to a heavy fine. In this year appeared his first novel, "The Dead Donkey and the Guillotined Woman," which was nothing else than a satire upon the style of Victor Hugo, as head of the "Romantic" school. So highly did his own party already esteem him, that, although only 25 years of age, he was styled by them "the Prince of Critics." During the three or four following years he published two novels,—"The Confession" and "Barnave," as well as a couple of volumes of short tales. In 1833 he commenced what has since proved to be the greatest of all his literary undertakings,—the dramatic notices and literary reviews for the "Journal des Débats." Every Monday morning, for upwards of a quarter of a century, appeared a witty, sparkling, and pointed criticism on dramatic literature and the stage. These *feuilletons*, or foot-articles (they being always inserted at the bottom of the newspaper columns), soon made a European reputation for their author, who, throwing aside the dogmatic severity of his predecessors, quickly became a public favourite, by the grace, the polish, and the intuitive justice which characterized his articles. The monarch of critics met with one reverse, however: in 1841, on the occasion of his marriage with a young and beautiful heiress, he, instead of his usual literary *feuilleton*, supplied to the "Journal des Débats" a most complete and minute narrative of his happiness. This imprudence brought upon his head a slashing article in the "National," and for a long time Janin was never mentioned in the French newspapers but as the "married critic." Janin has also written many introductions, biographies, and critical essays for the republication of classic French authors. To the "Revue de Paris" he contributed two remarkable sketches, one of Mirabeau, the other of Lord Byron. He has also written, compiled, and edited more than a score of illustrated tours in France, novels, essays, and works of general literature. He also wrote a series of letters on the Great Exhibition of 1851. A collection of his dramatic *feuilletons* has been published, under the pretentious title of "Dramatic and Literary History." B. at St. Etienne, La Loire, 1804.

JANISSARIES, *jin'-i-zar-es*, derived from two Turkish words, *téni* and *tchiri*, 'new soldiers,' a Turkish militia, created either by Amurath I., in 1362, or Bajazet I., in 1389, for the purpose of defending the throne, and acting on the frontiers of the kingdom. They were principally composed of infantry, and were recruited from young Christian captives who had been educated in the religion of Islam. At the outset they numbered about 6,000, but subsequently increased to a very considerable extent, the finest men only being chosen to swell their ranks. They became the best soldiers of the Turkish empire, and rendered good service to it in many engagements; but, growing at length too powerful and insubordinate, and resolutely refusing all attempts at reform, the sultans were anxious to disband the force. In 1826 they headed an insurrection at Constantinople, upon which the sultan Mahmoud II. decreed their extermination. A considerable number were slain on the Place of Atmeidan, at Constantinople, and those who fled were annihilated in the provinces.

JAN MAYEN, *yan mi'-en*, an island in the Arctic Ocean, 150 miles from the E. coast of Greenland. Upon it is a volcanic mountain, frequently in eruption. It was discovered in 1611, by Jan Mayen, the Dutch navigator.

JANNA, JANNINA, or YANINA, *ya-ne'-na*, a considerable town of Thessaly, situate on a lake, which communicates with the river Peneus, 40 miles W. of Larissa. It is the capital of a pashalic of the same name, with irregular and ill-paved streets, and many of the houses no more than mud huts. The dwellings of the middle ranks, however, have been built with an eye to more comfort, being constructed of wood, and mostly with a small open gallery under the roof. The habitations of the higher classes participate of an Oriental character. It has about 16 mosques and a large number of bazars, where jewellery and articles of dress are displayed in great abundance. It carries on a considerable trade, and exports for the Italian ports wool, corn, oil, and tobacco. Inwardly, through Roumelia and Albania, it sends embroidered velvets, stuffs, and cloths, with the stocks of guns and pistols mounted in chased silver. *Pop.* Variously estimated at from 10,000 to 20,000.—This place, in the time of Ali Pasha, enjoyed a high degree of prosperity; but since his death, in 1822, it has greatly fallen into decay. Byron visited this man, "with a tiger's tooth," and thus, in his "Childe Harold," alludes to the vicinity of Jannina:—

"No city's towers pollute the lovely view;
Unseen is Yanina, though not remote,
Veil'd by the screen of hills: here men are few,
Scanty the hamlet, rare the lonely cot;
But peering down each precipice, the goat
Browseth; and, pensive o'er his scatter'd flock,
The little shepherd, in his white capote,
Doth lean his boyish form along the rock,
Or in his cave awaits the tempest's short-lived shock."

—The LAKE is of no great depth, but is surrounded by mountains attaining an elevation of 3,000 feet, rising abruptly from the water's edge, and exhibiting a grand appearance.—The PASHALIC is the ancient Thessalia, and is bounded on the S. by Livadia, on the W. by Albania, and on the E. by the Archipelago.

JANOSI, *ya-no'-se*, the name of several places in Hungary, none of them with a population above 2,000.

JANOVITZ, *ya'-no-vitz*, the name of several places in Germany, none of them with a population above 2,000.

JANSEN, or JANSENIUS, Cornelius, *jan'-sen*, a celebrated Roman Catholic prelate, was educated at Utrecht, whence he removed to Louvain, where he was chosen principal of the college of St. Pulcheria. Being deputed by his university to go on a mission to the king of Spain, that monarch employed him to write a book against France, for which he was rewarded, in 1635, with the bishopric of Ypres, in Flanders. He wrote several books; but that by which he is best known is his "Augustinus," which was published after his death, and occasioned a fierce contest among the divines of the Romish church, which even the papal bulls could not suppress. In 1641 the inquisitors prohibited the perusal of the book; Urban VIII. censured it as heretical; and Innocent X., in 1653, condemned the following propositions extracted from it:—That there are divine precepts which even good men cannot obey without the assistance of God: That no man can resist the influence of divine grace on his mind: That to render human actions meritorious, it is not necessary for them to be free from necessity but constraint: That

Ca[th]e doctrine of free-will is a gross error: That Jesus Christ died not for all men, but only for the elect. These doctrines the pope declared heretical, and a violent persecution was excited against all who maintained them. Jansenism, notwithstanding, found numerous disciples in France and the Low Countries. B. near Leerdam, Holland, 1585; D. at Ypres, 1638.

JANSONIUS, Nicholas. (*See* JENSON.)

JANSSENS, Abraham, *yans'-sens*, a Dutch painter. His colouring was so superior, that a picture of his, representing the descent from the cross, in the church of Ghent, has been taken for the work of Rubens, and is scarcely inferior to the works of that painter. B. at Antwerp, 1569; D. 1631.

JANSSENS, Victor Honorius, an historical painter. He was patronized by the duke of Holstein, who sent him to Rome for improvement. On his return to his own country, he adorned the churches and convents with his works. B. at Brussels, 1664; D. 1739.

JANSSENS, Cornelius, a Dutch painter, who resided in England many years, and, in several respects, was equal to Vandyck. He painted portraits of James I. and his family, and most of the English nobility. D. 1665.

JANTRA, *jan'-tra*, a river of European Turkey, rising in the N. slope of the Balkans, and, after a course of 80 miles, falling into the Danube, 25 miles from Rustchuck.

JANUARIA, or SOBRAL, *yan-oo-air'-e-a*, a town of Brazil, in the province of Ceara, 120 miles from Fortaleza. It has a trade in cotton and raw and dressed hides. *Pop.* Unascertained.—The DISTRICT in which the town is situate is of considerable extent and fertile. The sugar-cane is extensively cultivated, and large quantities of rum are made. *Pop.* 15,000.

JANUARIA, a town of Brazil, 150 miles from Minas Novas. Its houses mostly consist of brick, in a framework of wood. Its trade is chiefly carried on in cotton, timber, and horses. *Pop.* 6,000.

JANUARIUS, St., *jăn-u-air'-e-us*, bishop of Benevento, who was beheaded at Puzzuoli, in the persecution under Diocletian, about the end of the third century. His body was removed to Naples, where a beautiful chapel was erected to his memory in the cathedral. What renders his name remarkable is a pretended miracle exhibited yearly by the priests, who have what they term his blood in a phial. On bringing out what is called the head of the saint, the blood, hitherto in a congealed state, liquefies. This mummery is always practised when Vesuvius shows signs of a convulsion, and the people devoutly believe that the influence of the saint will prevent an earthquake.

JANUS, *jai'-nus*, the most ancient king of Italy. He was a native of Thessaly, and son of Apollo. Establishing himself in Italy, he built a small town on the Tiber, and called it Janiculum. He so greatly improved the barbarous races over whom he reigned, and had such a peaceable kingdom, that he was regarded as the god of peace. During his reign, Saturn, driven from heaven by his son Jupiter, went to Italy, where Janus received him with great hospitality, and made him his colleague upon the throne. Janus is represented with two faces, because he was acquainted with the past and with the future; or, according to others, because he represented the sun, which opens the day at its rising, and closes it at its setting. He is shown in some statues with four heads. He was chiefly worshipped among the Romans, who erected many temples in his honour. Janus was represented in his statues chiefly as a young man. His temple, which was always open in time of war, was only closed three times in 700 years, the Romans, during that period, being continually fighting in some portion of the globe. There was a street in Rome called after his name, and situate near his temple, which was frequented by the usurers.

JAPAN, THE EMPIRE OF, *ja-păn'*, an extensive empire, consisting of several large islands, situate at the E. extremity of Asia, in the N. Pacific Ocean. The principal of these islands are Niphon, Sikok, and Kiu-siu, the two latter lying to the S., and so small that they can scarcely be considered as more than appendages to Niphon. The large island of Jesso, or Yesso, immediately N. of Niphon, has been colonized and governed by Japan, though it is scarcely reckoned an integral part of the empire. Besides these, there are an immense number of smaller islands, the chief of which are Sado, Tsoussima, Amadsi, Yki, Yaksima, Oosima, Tanegasima, with the groups of Okisima, Gohissima, and Kosikisima, which form Japan proper. It is bounded on the N. by the Sea of Okhotsk, on the E. and S. by the Pacific Ocean, and on the N.W. by the Strait of Corea, the Sea of Japan, and the Gulf of Tartary. *Area.* The three original islands have been estimated at about 90,000 square miles, and the whole, inclusive of the Loo-Choo islands, the Boninsmia group, Krafto or Saghalia, and the Kuriles, at nearly 260,000. *Desc.* The general aspect of these islands is rugged and irregular, presenting almost every variety of mountain, rock, and hill, interspersed, in some parts, with plains of considerable extent. Some of the mountains are of a great height, and are covered with perpetual snow. This is particularly the case with Niphon, which is traversed throughout its whole length, by a regular mountain-chain, whose loftiest summit, called Fusi, attains an elevation of 12,000 feet. Volcanoes and earthquakes are felt in every part of the empire, often to a desolating extent. The latter frequently swallow up whole cities, and bury thousands of inhabitants in their ruins. In Jesso, some terrific volcanic eruptions have occurred. In 1783 one of these annihilated 24 villages; and another, in the island of Kiu-siu, in 1792, destroyed 53,000 people. *Zoology.* The animals in the empire are few; the sheep, the goat, the ass, the mule, the camel, and the elephant, are all unknown. Oxen and cows are employed merely for labour, milk and butter not being used as articles of food. Of pigs there are only a few. There is a species of large buffalo, resembling a camel, which is used for draught in the cities; horses—which are small, but excellent, being employed only for occasions of state, are, on the whole, far from numerous. The caprice or superstition of a single emperor introduced the breeding of dogs with a care scarcely known in any other country: they are esteemed as sacred. Cats are numerous, yet the islands are overrun with rats and mice. There are some boars, hares, and deer, a species of which last has been tamed. Foxes still keep their ground against the skilful and persevering war[illegible] are of the natives, who view them with abhorrence, and regard them as animated by demons. The birds are numerous, and include falcons, pheasants, ducks, geese, storks, ravens, pigeons, larks, teal, pelicans, cranes, and herons. The falcon is held in high estimation. Scorpions, centipedes, and the insect tribes are abundant. Tortoises, lizards, and snakes are also found. The seas are well supplied with fish, large quantities of which are taken, as their flesh forms the principal portion of the food of the inhabitants. *Climate.* Extreme, both as regards heat and cold. *Pro.* Various; but, on the whole, rich in vegetables. Among the most remarkable plants is the *Rhus Vernix*, or varnish-tree, affording a milky juice, with which the natives varnish, or, as we call it, japan, all their household furniture, dishes, and plates. The mulberry-tree is remarkable both for its abundance and utility. The tea shrub is still more common, and its leaves of the same universal use as in China, although its produce is inferior to the plant of that country. Fruits are abundant; consisting of a species of winter pear, of very large size, but not fit to be eaten raw; nuts, chestnuts, walnuts, figs, oranges, lemons, apricots, peaches, plums, and a peculiar species of citron. The floral kingdom is varied, rich, and beautiful, much time being devoted to its cultivation. The general crops are rice, barley, wheat, turnips, horseradish, carrots, melons, gourds, and cucumbers. Nothing can exceed the agricultural industry of the Japanese people. Though a great part of the soil is irregular, even the sides of the hills are formed by stone walls into terraces rising one above another, indicating the great attention which is given to rural industry. The chief natural riches of Japan are those which belong to the mineral kingdom. Several provinces produce gold in considerable quantity. Silver is also found; but copper is the metal of all others for which Japan is the most distinguished. Iron appears in three provinces only; sulphur is abundant; pearls of a fine quality are met with along the shores; also ambergris. The other mineral substances are naphtha of a reddish colour, agates, cornelians, and jaspers. The various submarine plants, shrubs, corals, mushrooms, seafans, corallines, and fuci, with all kinds

of shells, are found along the coast in equal plenty and beauty. *Inhabitants.* The Japanese are described as well-made, active, free and easy in their motions, with stout limbs; though their strength is not to be compared to that of the northern inhabitants of Europe. They are of a yellowish colour, sometimes bordering on brown, and sometimes on white. Ladies of distinction seldom go out in the open air without being covered, and are perfectly white. The dress consists of loose robes of silk or cotton, resembling our night-gowns, which are worn by both sexes and all ranks. They have a dress of ceremony, which is put on above this on solemn occasions. The females paint their cheeks and colour their lips purple. They wear their hair very long, adorned with costly ornaments; and, when married, pluck out the hair of their eyebrows and blacken their teeth. The men wear no hats, except in rainy weather; and all are the slaves of custom and etiquette. The principal article of armour is the sabre, in the use of which they are extremely skilful. *Arts and Manf.* Being intelligent, and of a peculiarly active character of mind, the Japanese acquire knowledge with great facility. They possess a certain art of printing, borrowed from the Chinese, practise engraving, and among their books can show extensive works on botany and zoology, in which all the indigenous plants and animals are described, and exhibited in well-executed coloured plates. Japan and the neighbouring countries are delineated in maps, which possess topographical accuracy, though without the divisions of latitude and longitude. The principal manufactures are those of silk and cotton, in which they equal any other Asiatic nation. To this may be added that species of lacquered ware, formed of a mixture of gold and copper, of which they possess almost the exclusive secret, and which we call japanned ware. In the manufacture of porcelain they are said to be superior to the Chinese. Their architecture is slight, owing, perhaps, to the frequency of earthquakes. They work well in iron and copper, and have the art of making glass, though not of blowing it. Shipbuilding and navigation they are wholly unacquainted with, having no vessels except fishing-boats, which scarcely venture out of sight of land. *Imp.* These consist of sugar, coffee, spices of all kinds, glass and iron-ware, lead, tin, and various kinds of Indian piece-goods. Of the returns, nine-tenths are made in copper; to which are added camphor, lacquered ware, painted paper, and some other trifles. *Gov.* A pure despotism. Originally, the supreme power was vested in a spiritual ruler named Dairi, till the secular power was seized by a distinguished commander under the name of Kubo Sama, who left to the Dairi only a shadow of dominion. In compliance with popular prejudices, the Dairi was still allowed the same outward splendour as before. He resides in the imperial city of Miaco, and has the revenue of it and the surrounding district allotted to him for the support of his establishment, which consists of all the descendants of the imperial blood, amounting to several thousands. The Kubo Sama, or secular emperor, resides in pomp at Jeddo, or Yeddo, in a large castle or fortified palace, situate in the heart of the city. Thus there are two emperors of Japan,– one the spiritual, the other the secular. The spiritual emperor has nothing to do with governing the country, and is partly looked up to as a heavenly being; one condition of which is, that everything he wears or uses is destroyed each night, and new clothes supplied the next morning. This is to prevent any one using the sanctified garments. The reigning emperor lives at Nangaski, and is elected by the princes. It is a merely nominal election, for the son regularly succeeds the father, and has done so since his ancestor usurped the throne. It is said that the descent of the spiritual emperor can be traced, names and dates, with many of the branches of his family, for 2,500 years. The country is held by princes, who owe feudal duty to the reigning emperor, who obliges them to reside for six months in the year at Jeddo, with their families; during the other six months he allows them to visit their estates, but keeps their families hostages in Jeddo. This restrains them; and the practice is intended to prevent the princes from obtaining too much influence over the people. *Rel.* The established or state religion is that of Buddha; but another and older exists, called Sinto, or Sin-Siu,
